

Gen 9 - 14R4 Equipment Package

Gen 9 - 14R4 Design Sample

Gen 9 - 14R4 Prototype

Description

The Gen 9 - 14R4 is iFLY's most innovative redesign to date and the new flagship prototype of the industry standard 14-foot tunnel. The exemplary model for all entertainment, sport, and military users, the Gen 9 was redesigned for both the skydiver and the tunnel owner. The model provides a flight chamber suitable to the most elite of competitions. Considerable alterations to the construction requirements save costs by eliminating excavation and shortening construction timelines with a simplified steel design. The floor plan is optimized with years of experience from our corporate fleet.

Options

- Extended Glass

Specifications

Tunnel Diameter	4.3 m 14 ft
Flying Height	13.4 m 43.8 ft
Building Length	31.8 m 104.2 ft
Building Width	19.4 m 63.6 ft
Building Height	19.8 m 65.0 ft
Max Air Speed	263.1 km/hr 163.5 mph
Average Power	400 kw/hr
Max Number of Flyers	8 flying / 15 static
