

## HP MSM Controller Series

Data sheet

### Product overview

Working in unison with HP MSM access points, the HP MSM Controller Series delivers high-performance networking solutions. The enhanced architecture scales to 802.11n without requiring controller replacement. Robust identity- and roles-based user account profiles, as well as Virtual Service Communities (VSCs) with independently configurable Quality of Service (QoS), authentication, encryption, and VLAN support, deliver intelligence to the network edge. Scalable from small to larger deployments, the MSM wireless controllers support a fast-roaming capability. Wireless security is comprehensive with support for internal and external authentication, authorization, and accounting (AAA) servers, built-in stateful firewall, per-user VLAN mapping, and authentication.

### Key features

- Ease of use, scalability, and redundancy
- Enhanced architecture for flexible network design
- IEEE 802.11a/b/g/n AP and access device support
- Comprehensive WLAN security
- Appliance and blade form factors

## Features and benefits

### Quality of Service (QoS)

- **Rate limiting:** supports per-wireless client ingress-enforced maximums and per-wireless client, per-queue guaranteed minimums
- **Diagnostic:** client event log records association, authentication, and DHCP events; includes a packet capture tool for Ethernet and IEEE 802.11 interfaces (PCAP format), a wireless client data rate matrix, and a client status page; complete session logging provides detailed information for problem identification and resolution
- **Centralized traffic:** Layer 2 and Layer 3 QoS settings are maintained when using Mobility Traffic Manager or guest access

### Firewall

- **Stateful firewall:** enforces firewall policies to control traffic and filter access to network services; maintains session information for every connection passing through it, enabling the firewall to control packets based on existing sessions
- **NAT/PAT:** choice of dynamic partial address translation (PAT) or static network address translation (NAT) preserves a network's IP address pool or conceals the private address of network resources, such as Web servers, which are made accessible to users of a guest or public wireless LAN
- **Authenticated network access:** authenticates users with an internal or external RADIUS server or Microsoft® Active Directory before allowing full network connectivity

## Management

### • Automated work flows:

- **Initial controller settings:** define basic operational settings for the controller, including network connections, security settings, and system time
- **Wireless network for employees:** enables setup of a new wireless network for employees, including network and security settings
- **Wireless network for guests:** provides wireless access for guest users, including network and security settings specific to guest access

### • Remote configuration and management:

are available through secure Web browser, command-line (console port or SSH), SOAP, or SNMP

- **Management interface control:** allows interfaces to be enabled or disabled depending on security preferences

- **Management VLAN:** segments traffic to and from management interfaces, including CLI, Web browser interface, and SNMP

- **RADIUS accounting support:** separates RADIUS accounting server support per SSID; provides detailed session, usage, and billing information for each client activity

- **Logging:** provides local and remote logging of events via SNMP (v2c and v3) and syslog; provides log throttling and log filtering to reduce the number of log events generated

- **Controller networking:** includes IEEE 802.1d-compliant bridging and Bridge MIB (RFC 4188), which is supported only on a primary bridge interface; stateful firewall; PPPoE Client (RFC 2516); ICMP (RFC 792); IEEE 802.1q VLAN tagging; NAT (RFC 1631); CIDR (RFC 1519); L2TP and PPTP servers for wireless clients; VPN client, which establishes PPTP or IPSec tunnels to other devices; and IGMP snooping, which is supported on the wireless interfaces of APs

- **DHCP support:** includes RFC 2131 and RFC 3046 (DHCP Relay Option-82) for server and built-in DHCP client for client

- **Band steering:** the MSM422, MSM430, MSM466, and MSM466-R APs can automatically redirect 5 GHz-capable clients to the 5 GHz spectrum

- **Network management support:**
  - **HP PCM+ and Mobility Manager:** provide central management for discovery, logging, status, and configuration management
  - **Controller management:** provides secure Web browser (SSL, VPN), command-line interface and SOAP, SNMP v2c and v3, MIB-II with traps, RADIUS Authentication Client MIB (RFC 2618), RIPv2 MIB Extension (RFC 1724), scheduled configuration and firmware upgrades from a central server, per-user activity records by time used or data transferred, and remote syslog
- **Unified network visibility:** provides visibility between a wired and wireless network using IEEE 802.1AB Link Layer Discovery Protocol (LLDP) and sFlow

## Connectivity

- **10 GbE connections to the switch fabric (MSM765 zl Premium Mobility controller only):** two 10-GbE wire-speed internal connections help ensure that the network connections from the application to the switch backplane will not limit application performance
- **IPv6 wireless client traffic forwarding:** is supported for Layer 2 and Layer 3 mobility (MTM) and for client traffic directly bridged at the AP
- **IEEE 802.3ad Link Aggregation Control Protocol (LACP) and HP port trunking (MSM720 controller only):** support up to six ports bonded via LACP; support manually configured trunks between an HP switch and the controller

## Performance

- **High-performance processor system:**
  - **MSM720:** Freescale Dual Core 800MHZ P1020 Processor with a 256 KB cache in an appliance designed for 10 to 40 APs
  - **MSM760:** Intel® Core™ 2 Duo Processor E6400 with 2.13 GHz and 2 MB cache in an appliance designed for larger environments
  - **MSM765 zl:** Intel Core 2 Duo Processor T7500 with 2.2 GHz and 4 MB cache in a single-switch slot designed for larger chassis-based environments
- **Memory subsystems:** 4/2/1 GB of memory (MSM765 (DDR2)zl/MSM760 (DDR2)/MSM720 (DDR3) provides enhanced application performance
- **Disk drive (MSM76x):** 250 GB SATA II 7200 rpm hard disk drive allows rapid data reads/writes, providing improved application performance

## Mobility

- **Solutions enhanced for businesses:** MSM7xx controllers deliver services for a range of vertical markets, including healthcare, hospitality, education, manufacturing, transportation, and service providers
- **Powerful security capabilities:** robust, identity- and role-based user account profiles use internal or external AAA services
- **Solutions that cover the most important WLAN applications:** HP MSM solutions deliver rich application support, including guest access, location-based services, Voice over Wi-Fi (VoWi-Fi), hotspot, surveillance, and secure point of sale
- **Capacity that scales from small office to large campus:** efficiently deploy wireless LANs (WLANs) with the MSM710 controller, which controls up to 10 APs; the MSM720 controller, which supports 10 to 40 APs; and the MSM760 and MSM765 zl controllers, which control 40 to 200 APs
- **Premium Mobility Scalability Features:**
  - **Virtual controller:** supports a team of up to 800 APs and five controllers (MSM76x—must be the same type within a team) or 40 APs across two controllers (MSM720) managed via a single IP address
  - **N+1 redundancy:** teaming provides N+1 redundancy
  - **Seamless failover:** APs can fail-over without rebooting, which preserves network mobility services for wireless clients when the client traffic is bridged locally at the AP
  - **64 VSC profiles:** up to 64 profiles can be defined
- **Mobility Traffic Manager:** flexible and multiple network distribution schemes address any business need; policies for user network and security profiles are consistently applied and enforced; wireless traffic can be directed anywhere in the network as required; enterprise businesses can easily migrate to the MSM mobility solution, preserving prior network design

- **Controller client access control:** provides SSL-protected universal access method, MAC address authentication, and IEEE 802.1x authentication; Web proxy server; support for centralized portal; AAA Security; WPA and WPA2 encryption; client-fixed IP address spoofing; per-site and per-user access lists; white list and black list support; bandwidth limiting per user, per VLAN, or per VSC; and concurrent users (100 for the MSM710, 250 for the MSM720, and 2,000 for the MSM760 and MSM765 zl controllers)
- **Simplified management with central control:** MSM7xx controllers reduce the time and complexity of managing a wireless network; the solution controls up to hundreds of APs (depending on the controller) from a single management interface and helps ensure that a consistent set of services is delivered throughout the wireless network; the controllers push authentication, encryption, QoS enforcement, and access policies to the access points, delivering intelligence to the edge of mobile networks
- **Services:** provides standard Layer 2 roaming and VoWLAN support on all controllers, advanced fast roaming on mobility controllers, plug-and-play AP management, and public and guest Internet access
- **Advanced fast roaming (requires mobility controller or upgrade):** provides WPA2 Opportunistic Key Caching through controller support and inter-/intra-subnet roaming and seamless roaming (less than 50 ms roaming delay) support for Voice-over-Wi-Fi deployments

## Security

- **Secure Shell:** encrypts all transmitted data for secure remote CLI access over IP networks
- **Secure Sockets Layer (SSL):** encrypts all HTTP traffic, allowing secure access to the browser-based management GUI in the switch
- **IEEE 802.1X, Active Directory, and RADIUS network logins:** control wireless network access for authentication and accountability using IEEE 802.1x, Microsoft Active Directory, and RADIUS
- **RADIUS-based MAC authentication:** authenticates a wireless client with a RADIUS server based on the MAC address of the client; this is useful for clients with minimal or no user interface
- **Web-based authentication:** provides a Web browser-based environment to authenticate clients that may not support the IEEE 802.1X supplicant
- **IEEE 802.1x supplicant on MSM APs:** helps prevent deployment of rogue networking equipment

- **Secure management access:** securely encrypts all access methods (CLI, GUI, or MIB) through SSH v2c, SSL, and/or SNMPv3

## Policy management

- **Standards-based authentication support for Microsoft Active Directory and IEEE 802.1X:** seamlessly integrates into existing authentication services or uses the built-in database
- **Integration with HP Identity Driven Manager:** helps ensure that ACLs, VLANs, QoS profiles, and bandwidth limits are applied and enforced uniformly across wireless and wired networks

## Additional information

- **TAA versions for the MSM720 controller:** for U.S. government manufactured sales requirements, order the TAA MSM720 controller models; for all other AMS and WW orders, use WW models
- **New licensing model for guest user access (v5.7 and later):** the full number of supported guest access user sessions is enabled with the base-level controller models and no longer is tied to the AP upgrade license (e.g., the base MSM720 [access and Premium Mobility] controllers will now support 250 concurrent guest access user sessions; the MSM76x base controllers will now support 2,000 guest access user sessions without requiring additional AP license upgrades)
- **10-AP license upgrade option:** can be used on the MSM720 and MSM76x products on all supported firmware releases
- **New licensing model for the MSM317 controller (v5.7 and later):** no additional AP licensing is required for MSM317 controllers; non-MSM317 wireless devices are subject to AP licensing; maximum wireless device limits per controller and team are unchanged, and all devices count toward these maximums (e.g., an MSM760 controller can manage 200 MSM317 controllers, 40 APs, and 160 MSM317 controllers with no additional AP license, or 80 APs and 120 MSM317 controllers with one additional 40-AP license)

## Warranty and support

- **Lifetime warranty:** for the MSM720 and MSM765 zl controllers, with the exception of the hard disk drive (which has a 5-year limited warranty), for as long as you own the product, with next-business-day advance replacement (available in most countries)\*
- **1-year warranty:** for the MSM710 and MSM760 controllers
- **Electronic and telephone support:** limited electronic and telephone support is available from HP; refer to [www.hp.com/networking/warranty](http://www.hp.com/networking/warranty) for details on the support provided and the period during which support is available
- **Software releases:** refer to [www.hp.com/networking/warranty](http://www.hp.com/networking/warranty) for details on the software releases provided and the period during which software releases are available for your product(s)

†Hardware warranties replacement for as long as you own the product, with next business day advance replacement (available in most countries). The disk drive included with HP Alliance One Advanced Services and Services zl Modules, HP Threat Management Services zl Module, HP AllianceOne Ext zl Mod w/Rvrbd Silhd, HP E-MSM765zl Mobility Controller and HP Surv Brch Com zl Mod pwrby Msft Lync has a five-year hardware warranty. For details, refer to the Software license and hardware warranty statements at [www.hp.com/networking/warranty](http://www.hp.com/networking/warranty).
