

## Lenovo ThinkSystem SR665 V3 Server Product Guide

The Lenovo ThinkSystem SR665 V3 is a 2-socket 2U server that features the AMD EPYC 9004 "Genoa" family of processors. With up to 128 cores per processor and support for the new PCIe 5.0 standard for I/O, the SR665 V3 offers the ultimate in two-socket server performance in a 2U form factor. The server is ideal for dense workloads that can take advantage of GPU processing and high-performance NVMe drives.

Suggested uses: Inference, virtualization, VDI, HPC, Hyperconverged infrastructure

Figure 1. Lenovo ThinkSystem SR665 V3

### Did you know?

The SR665 V3 server is a very configuration-rich offering, supporting 30 different drive bay configurations in the front, middle and rear of the server and 6 different slot configurations at the rear of the server. This level of flexibility ensures that you can configure the server exactly the way your workload requires.

## Key features

Combining performance and flexibility, the SR665 V3 server is a great choice for enterprises of all sizes. The server offers a broad selection of drive and slot configurations and offers high performance features that industries such as finance, healthcare and telco need. Outstanding reliability, availability, and serviceability (RAS) and high-efficiency design can improve your business environment and can help save operational costs.

## Scalability and performance

The following features boost performance, improve scalability and reduce costs:

- Supports one or two fourth-generation AMD EPYC 9004 processors
  - Up to 128 cores and 256 threads
  - Core speed of up to 4.1 GHz
  - TDP rating of up to 400 W
- Support for DDR5 memory DIMMs to maximize the performance of the memory subsystem:
  - Up to 24 DDR5 memory DIMMs, 12 DIMMs per processor
  - 12 memory channels per processor (1 DIMM per channel)
  - DIMM speeds up to 4800 MHz
  - Using 256GB 3DS RDIMMs, the server supports up to 6TB of system memory
- Supports up to eight single-width GPUs or three double-wide GPUs, for substantial processing power in a 2U system.
- The server is Compute Express Link (CXL) v1.1 Ready. With CXL 1.1 for next-generation workloads, you can reduce compute latency in the data center and lower TCO. CXL is a protocol that runs across the standard PCIe physical layer and can support both standard PCIe devices as well as CXL devices on the same link.
- Supports up to 40x 2.5-inch hot-swap drive bays, by using combinations of front-accessible (up to 24 bays), mid bays (8 bays) and rear-accessible (8 bays).
- Supports 20x 3.5-inch drive bays for lower-cost high-capacity HDD storage. 2.5-inch and 3.5-inch drive bays can be mixed if desired.
- Supports up to 32x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity). The use of NVMe drives maximizes drive I/O performance, in terms of throughput, bandwidth, and latency.
- Supports up to 20x SATA drives using the onboard SATA controller (no additional adapter needed), enabling lower cost, high capacity storage solution for cold storage workloads.
- Supports high-speed RAID controllers from Lenovo and Broadcom providing 12 Gb SAS connectivity to the drive backplanes. A variety of PCIe 3.0 and PCIe 4.0 RAID adapters are available.
- Supports two externally accessible 7mm hot-swap drives for operating system boot functions or data storage. Optional RAID with the addition of a RAID adapter installed in a slot.
- Supports M.2 drives for convenient operating system boot functions or data storage. Available M.2 adapters support either one M.2 drive or two M.2 drives. Optional RAID with the addition of a RAID adapter installed in a slot.
- Up to 12x PCIe slots (10x rear, 2x front), plus a slot dedicated to an OCP 3.0 adapter. 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA.
- The server has a dedicated industry-standard OCP 3.0 small form factor (SFF) slot, with a PCIe 5.0 x16 interface, supporting a variety of Ethernet network adapters. Simple-swap mechanism with thumbscrews and pull-tab enables tool-less installation and removal of the adapter. Supports shared BMC network sideband connectivity to enable out-of-band systems management.
- The server offers PCI Express 5.0 (PCIe Gen 5) I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 4.0 (32GT/s in each direction for PCIe 5.0, compared to 16 GT/s with PCIe 4.0). A PCIe 5.0 x16 slot provides 128 GB/s bandwidth, enough to support a 400GbE network connection.

## Availability and serviceability

The server provides many features to simplify serviceability and increase system uptime:

- Designed to run 24 hours a day, 7 days a week
- The server uses ECC memory and supports memory RAS features including Single Device Data Correction (SDDC, also known as Chipkill), Patrol/Demand Scrubbing, Bounded Fault, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, On-die ECC, ECC Error Check and Scrub (ECS), and Post Package Repair.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- Available M.2 configuration with RAID support which can enable two SATA or two NVMe M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and up to six hot-swap redundant fans to provide availability for business-critical applications.
- Optional front-accessible slots and drives so that most major components and cables (except power) are located at the front of the server
- The power-source-independent light path diagnostics uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Solid-state drives (SSDs) offer more reliability than traditional mechanical HDDs for greater uptime.
- Proactive Platform Alerts (including PFA and SMART alerts): Processors, voltage regulators, memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 storage, flash storage adapters), fans, power supplies, RAID controllers, server ambient and subcomponent temperatures. Alerts can be surfaced through the XClarity Controller to managers such as Lenovo XClarity Administrator, VMware vCenter, and Microsoft System Center. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- The built-in XClarity Controller 2 continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager supports diagnostics and can save service data to a USB key drive or remote CIFS share folder for troubleshooting and reduce service time.
- Auto restart in the event of a momentary loss of AC power (based on power policy setting in the XClarity Controller service processor)
- Offers a diagnostics port on the front of the server to allow you to attach an external diagnostics handset for enhanced systems management capabilities.
- Support for the XClarity Administrator Mobile app running on a supported smartphone and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Three-year or one-year customer-replaceable unit and onsite limited warranty, 9 x 5 next business day. Optional service upgrades are available.

## Manageability and security

Systems management features simplify local and remote management:

- The server includes an XClarity Controller 2 (XCC2) to monitor server availability. Optional upgrade to XCC Platinum to provide remote control (keyboard video mouse) functions, support for the mounting of remote media files, FIPS 140-3 security, enhanced NIST 800-193 support, boot capture, and other management and security features.

- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.
- UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Supports AMD Secure Root-of-Trust, Secure Run and Secure Move features to minimize potential attacks and protect data as the OS is booted, as applications are run and as applications are migrated from server to server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Additional physical security features are a chassis intrusion switch and a lockable front bezel.

### **Energy efficiency**

The following energy-efficiency features help save energy, reduce operational costs, and increase energy availability:

- Energy-efficient planar components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Titanium certifications
- Low-voltage 1.1V DDR5 memory offers energy savings compared to 1.2V DDR4 DIMMs, an approximately 20% decrease in power consumption
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.
- Optional Lenovo XClarity Energy Manager provides advanced data center power notification and analysis to help achieve lower heat output and reduced cooling needs.

## Comparing the SR665 V3 to the SR665

The ThinkSystem SR665 V3 improves on the previous generation SR665, as summarized in the following table.

Table 1. Comparing the SR665 V3 to the SR665

Feature	SR665	SR665 V3	Benefits
Processor	<ul style="list-style-type: none"> <li>• 2x 2nd or 3rd Gen AMD EPYC processors</li> <li>• Up to 64 cores</li> <li>• TDP ratings up to 280W</li> <li>• 64x PCIe 4.0 lanes per processor</li> <li>• 4x dedicated xGMI x16 interprocessor links</li> </ul>	<ul style="list-style-type: none"> <li>• 2x 4th Gen AMD EPYC processors</li> <li>• Up to 128 cores</li> <li>• TDP ratings up to 360W</li> <li>• 64x PCIe 5.0 lanes per processor</li> <li>• 4x xGMI x16 interprocessor links, 1 of which can be used for an additional 16 PCIe 5.0 lanes</li> </ul>	<ul style="list-style-type: none"> <li>• Significant increase in cores per processor</li> <li>• Increased performance</li> <li>• Consolidation of more apps on same number of servers, reducing costs</li> <li>• New PCIe 5.0 support means higher performance networking and NVMe storage</li> <li>• Additional 16 PCIe lanes using an xGMI link for PCIe</li> </ul>
Memory	<ul style="list-style-type: none"> <li>• DDR4 memory operating up to 2933 MHz</li> <li>• 8 channels per CPU</li> <li>• 32 DIMMs (16 per processor), 2 DIMMs per channel</li> <li>• Supports RDIMMs and 3DS RDIMMs</li> <li>• Up to 8TB of system memory</li> </ul>	<ul style="list-style-type: none"> <li>• DDR5 memory operating up to 4800 MHz</li> <li>• 12 channels per CPU</li> <li>• 24 DIMMs (12 per processor), 1 DIMM per channel</li> <li>• Supports RDIMMs, 3DS RDIMMs and 9x4 RDIMMs</li> <li>• Up to 6TB of system memory</li> </ul>	<ul style="list-style-type: none"> <li>• New DDR5 memory offers significant performance improvements over DDR4</li> <li>• More memory channels means greater memory bandwidth</li> <li>• Support for lower-cost 9x4 DIMMs</li> </ul>
Internal storage	<ul style="list-style-type: none"> <li>• 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear)</li> <li>• 40x 2.5" SAS/SATA/NVMe (24 front, 8 mid, 8 rear)</li> <li>• Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays</li> <li>• Up to 4x 3.5" or 8x 2.5" rear drive bays</li> <li>• 2x Internal M.2 with optional RAID</li> <li>• 16x onboard NVMe ports</li> <li>• 2x rear 7mm hot swap SAS/SATA/NVMe; optional RAID</li> </ul>	<ul style="list-style-type: none"> <li>• 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear)</li> <li>• 40x 2.5" SAS/SATA/NVMe (24 front, 8 mid, 8 rear)</li> <li>• Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays</li> <li>• Up to 4x 3.5" or 8x 2.5" rear drive bays</li> <li>• 2x Internal M.2 with optional RAID 1 (RAID support via a separate adapter)</li> <li>• 20x onboard NVMe ports</li> <li>• 2x rear 7mm hot swap SAS/SATA/NVMe (RAID support via a separate adapter)</li> </ul>	<ul style="list-style-type: none"> <li>• Flexible storage offerings</li> <li>• Up to 32x NVMe drives for high-performance storage</li> <li>• 7mm hot swap drives as boot drives</li> </ul>

Feature	SR665	SR665 V3	Benefits
RAID	<ul style="list-style-type: none"> <li>8-port and 16-port RAID adapters with up to 8GB flash</li> <li>Support for Lenovo and Broadcom adapters</li> <li>Support for PCIe or Internal cabled (CFF) form factor adapters</li> <li>Support for NVMe drives connected to 940 RAID adapters (Tri-Mode)</li> <li>Storage HBAs available</li> <li>PCIe 3.0 and PCIe 4.0 adapter choices</li> </ul>	<ul style="list-style-type: none"> <li>8-port and 16-port RAID adapters with up to 8GB flash</li> <li>Support for Lenovo and Broadcom adapters</li> <li>Support for PCIe or Internal cabled (CFF) form factor adapters</li> <li>Support for NVMe drives connected to 940 RAID adapters (Tri-Mode)</li> <li>Storage HBAs available</li> <li>PCIe 3.0 and PCIe 4.0 adapter choices with support for Gen 5 adapters when available</li> </ul>	<ul style="list-style-type: none"> <li>Consistent RAID/HBA support</li> <li>Flexible config solution</li> <li>PCIe Gen 5 allows for greater storage performance</li> </ul>

## Components and connectors

The following figure shows the front of the server. The server supports either 2.5-inch or 3.5-inch hot-swap drives at the front, and configurations with 16x 2.5-inch drive bays optionally support 3 front-accessible PCIe slots.

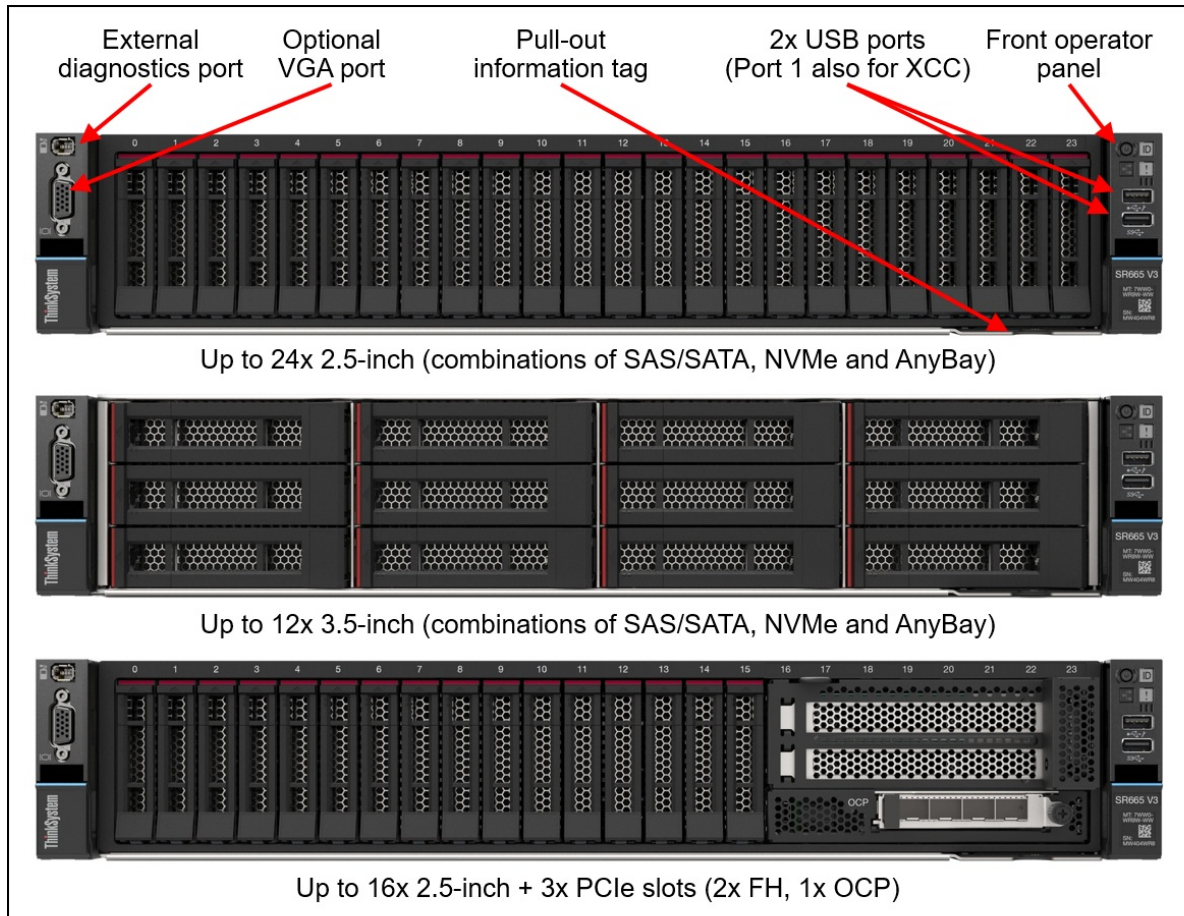

Figure 2. Front view of the ThinkSystem SR665 V3

For details on the front ports, including the optional front VGA port and front external diagnostic port, see the [Local management](#) section.

The following figure shows the components visible from the rear of the server. The figure shows one configuration, with eight full-height PCIe slots, however there are additional rear configurations which include 10 PCIe slots (6x full-height, 4x low-profile), or include 3.5-inch drive bays or 2.5-inch drive bays. The server also supports two rear-accessible 7mm hot-swap drive bays.

Figure 3. Rear view of the ThinkSystem SR665 V3 (configuration with eight full-height PCIe slots)

The following figure shows the locations of key components inside the server.

Figure 4. Internal view of the ThinkSystem SR665 V3

## System architecture

The following figure shows the architectural block diagram of the SR665 V3, showing the major components and their connections.

Note that one of the xGMI links between the processors can be used instead as two PCIe 5.0 x16 connections. These PCIe connections can be used for additional NVMe drive support.

Figure 5. SR665 V3 system architectural block diagram

## Standard specifications

The following table lists the standard specifications.

Table 2. Standard specifications

Components	Specification
Machine types	7D9B - 1 year warranty 7D9A - 3 year warranty
Form factor	2U rack.
Processor	One or two AMD EPYC 9004 Series processors (formerly codenamed "Genoa"). Supports processors up to 128 cores, core speeds of up to 4.1 GHz, and TDP ratings of up to 360W. Supports PCIe 5.0 for high performance I/O.
Chipset	Not applicable (platform controller hub functions are integrated into the processor)
Memory	24 DIMM slots with two processors (12 DIMM slots per processor). Each processor has 12 memory channels, with 1 DIMM per channel (DPC). Lenovo TruDDR5 RDIMMs, 3DS RDIMMs, and 9x4 RDIMMs are supported, up to 4800 MHz
Memory maximum	Up to 6TB with 24x 256GB 3DS RDIMMs

Components	Specification
Persistent memory	Not supported.
Memory protection	ECC, SDDC, Patrol/Demand Scrubbing, Bounded Fault, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, On-die ECC, ECC Error Check and Scrub (ECS), Post Package Repair
Disk drive bays	<p>Up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays:</p> <ul style="list-style-type: none"> <li>• Front bays can be 3.5-inch (8 or 12 bays) or 2.5-inch (8, 16 or 24 bays)</li> <li>• Middle bays can be 3.5-inch (4 bays) or 2.5-inch (8 bays)</li> <li>• Rear bays can be 3.5-inch (2 or 4 bays) or 2.5-inch (4 or 8 bays)</li> <li>• Combinations of SAS/SATA, NVMe, or AnyBay (supporting SAS, SATA or NVMe) are available</li> </ul> <p>The server also supports these drives for OS boot or drive storage:</p> <ul style="list-style-type: none"> <li>• Two 7mm drives at the rear of the server (optional RAID)</li> <li>• Internal M.2 module supporting up to two M.2 drives (optional RAID)</li> </ul> <p>See <a href="#">Storage configurations</a> for details.</p>
Maximum internal storage	<ul style="list-style-type: none"> <li>• 2.5-inch drives: <ul style="list-style-type: none"> <li>◦ 1228.8TB using 40x 30.72TB 2.5-inch SAS/SATA SSDs</li> <li>◦ 1966.08TB using 32x 61.44TB 2.5-inch NVMe SSDs</li> <li>◦ 96TB using 40x 2.4TB 2.5-inch HDDs</li> <li>◦ 7.68TB using 2x 3.84TB 7mm SSDs</li> </ul> </li> <li>• 3.5-inch drives: <ul style="list-style-type: none"> <li>◦ 440TB using 20x 22TB 3.5-inch HDDs</li> <li>◦ 307.2TB using 20x 15.36TB 3.5-inch SAS/SATA SSDs</li> <li>◦ 153.6TB using 12x 12.8TB 3.5-inch NVMe SSDs</li> </ul> </li> </ul>
Storage controller	<ul style="list-style-type: none"> <li>• Up to 20x Onboard SATA ports (non-RAID)</li> <li>• Up to 20x Onboard NVMe ports (non-RAID)</li> <li>• NVMe Retimer Adapter (PCIe 4.0 or PCIe 5.0)</li> <li>• 12 Gb SAS/SATA RAID adapters <ul style="list-style-type: none"> <li>◦ 8, 16 or 32 ports</li> <li>◦ Up to 8GB flash-backed cache</li> <li>◦ PCIe 4.0 or PCIe 3.0 host interface</li> </ul> </li> <li>• 12 Gb SAS/SATA HBA (non-RAID) <ul style="list-style-type: none"> <li>◦ 8-port and 16-port</li> <li>◦ PCIe 4.0 or PCIe 3.0 host interface</li> </ul> </li> </ul>
Optical drive bays	No internal optical drive
Tape drive bays	No internal backup drive
Network interfaces	Dedicated OCP 3.0 SFF slot with PCIe 5.0 x16 host interface, either at the rear of the server (rear-accessible) or the front of the server (front-accessible). Supports a variety of 2-port and 4-port adapters with 1GbE, 10GbE and 25GbE network connectivity. One port can optionally be shared with the XClarity Controller 2 (XCC2) management processor for Wake-on-LAN and NC-SI support. Additional PCIe network adapters supported in PCIe slots.

Components	Specification
PCI Expansion slots	<p>Up to 12x PCIe slots (10x rear, 2x front), plus a slot dedicated to an OCP 3.0 adapter. 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA.</p> <p><i>Rear:</i> Up to 10x PCIe slots, plus a slot dedicated to the OCP adapter. Slot are either PCIe 5.0 or 4.0 depending on riser selection and rear drive bay selection. The use of some slots requires two processors.</p> <p>Slots are configured using three riser cards. Riser 1 (slots 1-3) and Riser 2 (slots 4-6) are installed in slots in the system board, Riser 3 (slots 7-8) and Riser 4 (9-10) are cabled to ports on the system board. A variety of riser cards are available. See the <a href="#">I/O expansion</a> for details.</p> <p><i>Front:</i> The server also supports slots at the front of the server (configurations with up to 16 drive bays): 2x PCIe x16 full-height half-length slots, plus 1x OCP 3.0 slot</p> <p><i>Internal:</i> For 2.5-inch front drive configurations, the server supports the installation of a RAID adapter or HBA in a dedicated area that does not consume any of the PCIe slots.</p>
Ports	<p>Front: 1x USB 3.2 G1 (5 Gb/s) port, 1x USB 2.0 port (also for XCC local management), External diagnostics port, optional VGA port.</p> <p>Rear: 3x USB 3.2 G1 (5 Gb/s) ports, 1x VGA video port, 1x RJ-45 1GbE systems management port for XCC remote management. Optional 2nd XCC remote management port (installs in OCP slot). Optional DB-9 COM serial port (installs in slot 3).</p> <p>Internal: 1x USB 3.2 G1 (5 Gb/s) connector for operating system or license key purposes.</p>
Cooling	Up to 6x N+1 redundant hot swap 60 mm fans, configuration dependent. One fan integrated in each power supply.
Power supply	Up to two hot-swap redundant AC power supplies, 80 PLUS Platinum or 80 PLUS Titanium certification. 750 W, 1100 W, 1800 W, 2400 W, and 2600 W AC, supporting 220 V AC. 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Also available is a 1100W power supply with a -48V DC input.
Video	Embedded video graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller. Maximum resolution is 1920x1200 32bpp at 60Hz.
Hot-swap parts	Drives, power supplies, and fans.
Systems management	Operator panel with status LEDs. Optional External Diagnostics Handset with LCD display. Models with 16x 2.5-inch front drive bays can optionally support an Integrated Diagnostics Panel. XClarity Controller 2 (XCC2) embedded management based on the ASPEED AST2600 baseboard management controller (BMC). Dedicated rear Ethernet port for XCC2 remote access for management. Optional 2nd redundant XCC2 remote port supported, installs in the OCP slot. XClarity Administrator for centralized infrastructure management, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XCC Platinum to enable remote control functions and other features.
Security features	Chassis intrusion switch, Power-on password, administrator's password, Root of Trust module supporting TPM 2.0 and Platform Firmware Resiliency (PFR). Optional lockable front security bezel.
Operating systems supported	Microsoft Windows Server, Microsoft Windows 10 & 11, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi, Ubuntu Server. See the <a href="#">Operating system support</a> section for specifics.
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.

Components	Specification
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 766 mm (30.1 in.). See <a href="#">Physical and electrical specifications</a> for details.
Weight	Maximum: 38.8 kg (85.5 lb)

## Models

ThinkSystem SR665 V3 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

### CTO models

ThinkSystem SR665 V3 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two types of base CTO models are available for the SR665 V3 as listed in the columns in the following table:

- General purpose base CTO models are for general business (non-HPC) and is selectable by choosing **General Purpose** mode in DCSC.
- AI and HPC base models are intended for Artificial Intelligence (AI) and High Performance Computing (HPC) configurations and solutions are enabled using the **AI & HPC Hardware - ThinkSystem Hardware** mode in DCSC. These configurations, along with Lenovo EveryScale Solutions, can also be built using [System x and Cluster Solutions Configurator \(x-config\)](#). **Tip:** Some HPC and AI models are not listed in DCSC and can only be configured in x-config.

**Controlled GPU models:** The "Controlled GPU" base CTO models listed in the table are the only models that support high-performance GPUs and accelerators. These models are classified under US Government ECCN regulations and have limited market and customer availability. All other base models do not support high-performance GPUs.

Preconfigured server models may also be available for the SR665 V3, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem SR665 V3 server.

Table 3. Base CTO models

Machine Type/Model General purpose	Machine Type/Model for AI and HPC	Description
7D9ACTO1WW	7D9ACTOLWW	ThinkSystem SR665 V3-3yr Warranty
7D9ACTOAWW	7D9ACTOHWW	ThinkSystem SR665 V3-3yr Warranty with Controlled GPU
7D9BCTO1WW	7D9BCTOLWW	ThinkSystem SR665 V3-1yr Warranty

### CTO models for Windows 10 and Windows 11

The SR665 V3 can run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, the following Base CTO models have been announced to assist building a configuration that can be used with the client operating systems. For more information, see the [Windows 10 and Windows 11](#) section.

Table 4. Base CTO models for SR665 V3 with Windows 10 and Windows 11

Machine Type/Model	Description
7D9ACTO2WW	ThinkSystem SR665 V3 Workstation - 3 year Warranty
7D9BCTO2WW	ThinkSystem SR665 V3 Workstation - 1 year Warranty

### Base feature codes

Models of the SR665 V3 are defined based on whether the server has 2.5-inch drive bays at the front (called the 2.5-inch chassis) or whether it has 3.5-inch drive bays at the front (called the 3.5-inch chassis). For models, the feature codes for these chassis bases are as listed in the following table.

Table 5. Chassis base feature codes

Feature code	Description
BLKJ	ThinkSystem V3 2U 12x3.5" Chassis
BLKK	ThinkSystem V3 2U 24x2.5" Chassis

### Preconfigured models

The following tables list the available preconfigured models, grouped by region.

- [Models for Asia Pacific region](#)
- [Models for Australia and New Zealand](#)
- [Models for EMEA region](#)
- [Models for India](#)

Refer to the Specifications section for information about standard features of the server.

Common to all models:

- Power supplies are Platinum unless otherwise stated
- All models include a Toolless Slide Rail Kit

## Models for Asia Pacific region

The following table lists the models for the Asia Pacific region: Australia, Bangladesh, Brunei, Hong Kong, India, Japan, Korea, Sri Lanka, Malaysia, New Zealand, Philippines, Singapore, Thailand, Taiwan, Vietnam

Table 6. Models for Asia Pacific markets

Model	AMD EPYC processor†	Memory	RAID	Drive bays	OCP	Slots	Power supply	Fans	Front VGA	Front diag	XCC2	Intru switch

## Processors

The SR665 V3 supports processors in the fourth-generation AMD EPYC family of processors. The server supports one or two processors.

Topics in this section:

- [Processor options](#)
- [Processor features](#)
- [xGMI cabled connection](#)
- [One-processor configurations](#)
- [Thermal requirements by processor](#)
- [Lenovo Neptune Processor DWC Module - Open-loop liquid cooling](#)
- [UEFI operating modes](#)
- [Platform Secure Boot](#)

## Processor options

The table below lists the AMD processors that are currently supported by the SR665 V3.

All supported processors have the following characteristics:

- Fourth-generation AMD EPYC processors (formerly codenamed "Genoa")
- 12 DDR5 memory channels
- 128 PCIe 5.0 I/O lanes, 64 lanes available for PCIe and NVMe devices

The SR665 V3 also supports the new 4th Gen AMD EPYC processors with "Zen 4c" architecture (formerly codenamed "Bergamo"). These processors have higher core counts, up to 128 cores, targeted at cloud native applications that are designed to exploit the scale, elasticity, resiliency, and flexibility of private & public clouds.

Table 10. SR665 V3 processor support

Part number*	Feature code	SKU	Description	Quantity supported*
4th Gen AMD EPYC processors ("Genoa")				
4XG7A85822	BREE	9124	ThinkSystem SR665 V3 AMD EPYC 9124 16C 200W 3.0GHz Processor w/o Fan	1 or 2

CTO only	BW9T	9754	ThinkSystem AMD EPYC 9754 128C 360W 2.25GHz Processor	1 or 2

\* Processors with a P suffix are single-socket capable processors and are only available in configure-to-order builds or in preconfigured models. Not available as option part numbers.

Configuration notes:

- Processor options include a heatsink but do not include a system fan

## Processor features

The following table lists the features of the supported processors.

Table 11. Processor specifications

EPYC model**	Cores / Threads	Base Frequency	Max Boost Frequency†	L3 Cache	Memory channels	Memory bus	TDP
4th Gen AMD EPYC processors ("Genoa")							
9124	16 / 32	3.0 GHz	3.7 GHz	64 MB	12	4800 MHz	200W
9174F	16 / 32	4.1 GHz	4.4 GHz	256 MB	12	4800 MHz	320W
9224	24 / 48	2.5 GHz	3.7 GHz	64 MB	12	4800 MHz	200W
9254	24 / 48	2.9 GHz	4.15 GHz	128 MB	12	4800 MHz	200W
9274F	24 / 48	4.05 GHz	4.3 GHz	256 MB	12	4800 MHz	320W
9334	32 / 64	2.7 GHz	3.9 GHz	128 MB	12	4800 MHz	210W
9354	32 / 64	3.25 GHz	3.8 GHz	256 MB	12	4800 MHz	280W
9354P	32 / 64	3.25 GHz	3.8 GHz	256 MB	12	4800 MHz	280W
9374F	32 / 64	3.85 GHz	4.3 GHz	256 MB	12	4800 MHz	320W
9454	48 / 96	2.75 GHz	3.8 GHz	256 MB	12	4800 MHz	290W
9454P	48 / 96	2.75 GHz	3.8 GHz	256 MB	12	4800 MHz	290W

9534	64 / 128	2.45 GHz	3.7 GHz	256 MB	12	4800 MHz	280W
9554	64 / 128	3.1 GHz	3.75 GHz	256 MB	12	4800 MHz	360W
9554P	64 / 128	3.1 GHz	3.75 GHz	256 MB	12	4800 MHz	360W
9634	84 / 168	2.25 GHz	3.7 GHz	384 MB	12	4800 MHz	290W
9654	96 / 192	2.4 GHz	3.7 GHz	384 MB	12	4800 MHz	360W
9654P	96 / 192	2.4 GHz	3.7 GHz	384 MB	12	4800 MHz	360W
4th AMD EPYC processors with AMD 3D V-Cache ("Genoa-X")							
9684X	96 / 192	2.55 GHz	3.7 GHz	1150 MB	12	4800 MHz	400W
4th Gen AMD EPYC processors with Zen 4c architecture ("Bergamo")							
9734	112 / 224	2.2 GHz	3.0 GHz	256 MB	12	4800 MHz	340W
9754	128 / 256	2.25 GHz	3.2 GHz	256 MB	12	4800 MHz	360W

† The maximum single-core frequency that the processor is capable of operating

\*\* Processors with a P suffix are single-socket capable processors

## xGMI cabled connection

As shown in the [System architecture](#) section, the server has four xGMI links between the two processors. By default, three xGMI links are used for inter-processor communications, and the fourth xGMI connection is used to provide two PCIe x16 connections for additional PCIe and NVMe devices. However, to maximize CPU-to-CPU performance, the two xGMI connectors can be joined using a cable.

Ordering information for this xGMI cable is listed in the following table.

Table 12. xGMI cable

Part number	Feature code	Description
4X97A87125	BR65	SR665 V3 CPU interconnection Cable Kit*

\* In DCSC, this cable may be labeled "Cable126"

Configuration notes:

- The following configurations do not support the use of this xGMI cable:
  - Configurations with 16 or more onboard connections to NVMe drives
  - Configurations with front PCIe slots + front OCP slot + front onboard NVMe
  - Configurations with 12 PCIe slots (10x rear, 2x front)

## One-processor configurations

The SR665 V3 can be used with only one processor installed. Most core functions of the server (including the XClarity Controller) are connected to processor 1 as shown in the [System architecture](#) section.

With only one processor, the server has the following capabilities:

- 12 memory DIMMs
- Slot 1-3 are available; Slot 4-8 are not available
- 16 onboard SATA connections
- 8 onboard NVMe connections

Drive support and controller support is as listed in the [Storage configurations](#) section - see the rows for 1 processor installed in the tables.

## Thermal requirements by processor

For thermal requirements for processors, see the Thermal Rules section in the Information Center for the SR665 V3:

[https://pubs.lenovo.com/sr665-v3/thermal\\_rules](https://pubs.lenovo.com/sr665-v3/thermal_rules)

Additional ambient temperature restrictions may apply. See the [Operating environment](#) section for details.

## Lenovo Neptune Processor DWC Module - Open-loop liquid cooling

The SR665 V3 also supports advanced direct-water cooling (DWC) capability with the Lenovo Neptune Processor DWC Module. This module implements a liquid cooling solution where heat from the processors is removed from the rack and the data center using an open loop and coolant distribution units. The liquid used in the loop is a mixture of water and ethylene glycol (EGW).

With the Neptune Processor DWC Module, all heat generated by the processors is removed from the server using water. This means that the server fans and data center air conditioning units only need to remove the heat generated by the other components. This results in lower air conditioning costs and it enables the use of slower fans which results in lower overall power consumption.

The following figure shows the Lenovo Neptune Processor DWC Module.

Figure 6. Lenovo Neptune Processor DWC Module

The Neptune Processor DWC Module also includes a leak detection module which can detect a leakage of more than 0.5ml (about 10 drops) along the length of the tube and then issue an event to the XClarity Controller. XCC will then post an error to the System Event Log and enable further actions. Once the liquid evaporates, a further event is issue to XCC.

The Neptune Processor DWC Module is only available in CTO orders, not as a field upgrade. Ordering information is listed in the following table.

Table 13. Ordering information

Part number	Feature code	Description
CTO only	BZGM*	ThinkSystem V3 Neptune Processor Direct Water Cooling Solution

\* In DCSC, this feature code is listed in the Processor tab

Configuration notes:

- The Neptune Processor DWC Module requires water infrastructure be available in the rack cabinet and data center, as described in the [Water infrastructure](#) section.
- All processor SKUs are supported, including 400W processors
- Two CPUs are required; Configurations with one processor are not supported
- All front drive bay configurations are supported
- Slot 6 is not available for adapters - the water loop is routed through the space otherwise occupied by slot 6
- Rear drive bays are supported
- 7mm drive bays are supported only in slot 3
- M.2 adapters are supported based on the configurations in the [Storage configurations](#) section
- Standard fans can be configured in most configurations
- The use of a cable management arm (CMA) is not supported

For more information, see the Thermal Rules page:  
[https://pubs.lenovo.com/sr665-v3/thermal\\_rules](https://pubs.lenovo.com/sr665-v3/thermal_rules)

The following figure shows the Lenovo Neptune Processor DWC Module installed in the SR665 V3 (risers removed to show internal components).

Figure 7. Lenovo Neptune Processor DWC Module installed in the SR665 V3

### UEFI operating modes

The SR665 V3 offers preset operating modes that affect energy consumption and performance. These modes are a collection of predefined low-level UEFI settings that simplify the task of tuning the server to suit your business and workload requirements.

The following table lists the feature codes that allow you to specify the mode you wish to preset in the factory for CTO orders.

Table 14. UEFI operating mode presets in DCSC

Feature code	Description
BFYA	Operating mode selection for: "Maximum Efficiency Mode"
BFYB	Operating mode selection for: "Maximum Performance Mode"

The preset modes for the SR665 V3 are as follows:

- **Maximum Efficiency Mode** (feature BFYA): Maximizes performance/watt efficiency while maintaining reasonable performance
- **Maximum Performance Mode** (feature BFYB): Achieves maximum performance but with higher power consumption and lower energy efficiency.

For details about these preset modes, and all other performance and power efficiency UEFI settings offered in the SR665 V3, see the paper "Tuning UEFI Settings for Performance and Energy Efficiency on AMD Processor-Based ThinkSystem Servers", available from <https://lenovopress.lenovo.com/lp1267>.

## Platform Secure Boot

Platform Secure Boot (PSB) is a feature of AMD EPYC processors that helps defend against threats to firmware. It is designed to provide protection in response to growing firmware-level remote attacks being seen across the industry. AMD Secure Boot extends the AMD silicon root of trust to help protect the system by establishing an unbroken chain of trust from the AMD silicon root of trust to the BIOS. The UEFI secure boot helps continue the chain of trust from the system BIOS to the OS Bootloader. This feature helps defend against remote attackers seeking to embed malware into firmware.

With PSB enabled, the processor is cryptographically bound to the server firmware code signing key once the processors are installed in the server and the server is powered on. From that point on, that processor can only be used with motherboards that use the same code signing key.

Disabling PSB will stop the protection against remote and local attackers seeking to embed malware into a platform's firmware, BIOS and even UEFI functions. Disabling PSB also allows you to install the processor in another server that you purchased from Lenovo, however, we do not recommend you do this by yourself. Please contact the Lenovo service team for further assistance.

By default, the server has Platform Secure Boot enabled on the installed processors, however for factory orders, you can choose to have the server with PSB disabled. To do this, select feature code C18D as listed in the following table. PSB can be later enabled in System Setup if desired.

**Cannot be disabled once enabled:** Once you enable PSB in a server, it cannot be disabled on those processors.

Table 15. Platform Secure Boot

Feature code	Description	Purpose
C0DF	Platform Secure Boot Enable	PSB is enabled in the factory and cannot later be disabled. Default choice in DCSC.
C18D	Platform Secure Boot Disable	PSB is not enabled in the factory. It can be later enabled in UEFI System Setup if desired.

If you add a second processor as a field upgrade and your server has PSB enabled, then as soon as you install the processor and power the server on, the processor is then cryptographically bound to the server, and can only be used in that server going forward.

**Note:** Platform Secure Boot (PSB) is different from the Secure Boot security feature described in the [Platform Firmware Resiliency](#) section.

## Memory options

The SR665 V3 uses Lenovo TruDDR5 memory operating at up to 4800 MHz. The server supports up to 24 DIMMs with 2 processors. The processors have 12 memory channels and support 1 DIMM per channel. The server supports up to 6TB of memory using 24x 256GB 3DS RDIMMs and two processors.

The following table lists the memory options that are available for the server.

Lenovo TruDDR5 memory uses the highest quality components that are sourced from Tier 1 DRAM suppliers and only memory that meets the strict requirements of Lenovo is selected. It is compatibility tested and tuned to maximize performance and reliability. From a service and support standpoint, Lenovo TruDDR5 memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

Table 16. Memory options

Part number	Feature code	Description	DRAM technology
<b>9x4 RDIMMs</b>			
4X77A81439	BQ3E	ThinkSystem 32GB TruDDR5 4800MHz (1Rx4) 9x4 RDIMM-A	16Gb
4X77A81442	BQ36	ThinkSystem 64GB TruDDR5 4800MHz (2Rx4) 9x4 RDIMM-A	16Gb
<b>10x4 RDIMMs</b>			
4X77A81438	BQ39	ThinkSystem 32GB TruDDR5 4800MHz (1Rx4) 10x4 RDIMM-A	16Gb
4X77A81441	BQ3D	ThinkSystem 64GB TruDDR5 4800MHz (2Rx4) 10x4 RDIMM-A	16Gb
4X77A81448	BUVV	ThinkSystem 96GB TruDDR5 4800MHz (2Rx4) 10x4 RDIMM-A	24Gb
<b>x8 RDIMMs</b>			
4X77A81437	BQ3C	ThinkSystem 16GB TruDDR5 4800MHz (1Rx8) RDIMM-A	16Gb
4X77A81440	BQ37	ThinkSystem 32GB TruDDR5 4800MHz (2Rx8) RDIMM-A	16Gb
4X77A81447	BUVU	ThinkSystem 48GB TruDDR5 4800MHz (2Rx8) RDIMM-A	24Gb
<b>10x4 3DS RDIMMs</b>			
4X77A81443	BQ3A	ThinkSystem 128GB TruDDR5 4800MHz (4Rx4) 3DS RDIMM-A v2	16Gb
CTO only	BYEE	ThinkSystem 128GB TruDDR5 4800MHz (4Rx4) 3DS RDIMM-A v1	16Gb
4X77A81444	BQ3B	ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v2	16Gb
CTO only	BZPN	ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v1	16Gb

9x4 RDIMMs (also known as Optimized or EC4 RDIMMs) are a new lower-cost DDR5 memory option supported in ThinkSystem V3 servers. 9x4 DIMMs offer the same performance as standard RDIMMs (known as 10x4 or EC8 modules), however they support lower fault-tolerance characteristics. Standard RDIMMs and 3DS RDIMMs support two 40-bit subchannels (that is, a total of 80 bits), whereas 9x4 RDIMMs support two 36-bit subchannels (a total of 72 bits). The extra bits in the subchannels allow standard RDIMMs and 3DS RDIMMs to support Single Device Data Correction (SDDC), however 9x4 RDIMMs do not support SDDC. Note, however, that all DDR5 DIMMs, including 9x4 RDIMMs, support Bounded Fault correction, which enables the server to correct most common types of DRAM failures.

For more information on DDR5 memory, see the Lenovo Press paper, *Introduction to DDR5 Memory*, available from <https://lenovopress.com/lp1618>.

The following rules apply when selecting the memory configuration:

- The SR665 V3 supports quantities 1, 2, 4, 6, 8, 10, 12 DIMMs per processor; other quantities not supported
- The server supports four types of DIMMs: 9x4 RDIMMs, 10x4 RDIMMs, x8 RDIMMs and 3DS RDIMMs; UDIMMs and LRDIMMs are not supported
- Mixing of DIMM types is not supported (for example, 9x4 DIMMs with 10x4 RDIMMs)
- Mixing of DRAM technology (16Gb and 24Gb) is not supported. See the column in the above table.

- Mixing of 128GB 3DS RDIMMs and 256GB 3DS RDIMMs is not supported
- Mixing of 128GB 3DS RDIMMs (features BYEE and BQ3A) is not supported
- Mixing of 256GB 3DS RDIMMs (features BZPN and BQ3B) is not supported
- Mixing x4 and x8 DIMMs is not supported
- Mixing of DIMM rank counts is supported. Follow the required installation order installing the DIMMs with the higher rank counts first.
- Mixing of DIMM capacities is supported, however only two different capacities are supported across all channels of the processor (eg 16GB and 32GB). Follow the required installation order installing the larger DIMMs first.
- The use of the 128GB 3D RDIMM feature BYEE has the following requirements for thermal reasons:
  - If CPU TDP > 240W, the combination of GPUs and 24x 2.5-inch drive bays is not supported
  - Additional ambient temperature requirements - see [https://pubs.lenovo.com/sr665-v3/thermal\\_rules](https://pubs.lenovo.com/sr665-v3/thermal_rules) for information

**Note:** Memory mirroring and memory rank sparing are not supported.

For best performance, consider the following:

- Ensure the memory installed is at least the same speed as the memory bus of the selected processor.
- Populate all 12 memory channels with identical DIMMs (same Lenovo part number)

The following memory protection technologies are supported:

- ECC detection/correction
- Bounded Fault detection/correction
- SDDC (for x4-based memory DIMMs; look for "x4" in the DIMM description. Not supported with 9x4 RDIMMs)
- Patrol/Demand Scrubbing
- DRAM Address Command Parity with Replay
- DRAM Uncorrected ECC Error Retry
- On-die ECC
- ECC Error Check and Scrub (ECS)
- Post Package Repair

## Internal storage

The SR665 V3 has three drive bay zones and supports up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays or a combination of drive bays, depending on the selected chassis and backplane configuration. The server also supports configurations without any drive bays if desired.

The three drive bay zones are as follows:

- Front:
  - Up to 12x 3.5-inch hot-swap bays, or
  - Up to 24x 2.5-inch hot-swap bays
- Middle:
  - 4x 3.5-inch hot-swap bays, or
  - 8x 2.5-inch hot-swap bays
- Rear:
  - Up to 4x 3.5-inch hot-swap bays, or
  - Up to 8x 2.5-inch hot-swap bays
  - Also supports 2x 7mm hot-swap drives bays

All drives are hot-swap and are accessible from the front, from the rear, or from drive bays that are located in the middle of the server (accessible when you remove the top cover of the server).

The server also supports one or two M.2 drives, installed in an M.2 adapter internal to the server.

In this section:

- [NVMe drive support](#)
- [Front drive bays](#)
- [Mid drive bays](#)
- [Rear drive bays](#)
- [Storage configurations](#)
- [Field upgrades](#)
- [RAID flash power module \(supercap\) support](#)
- [7mm drives](#)
- [M.2 drives](#)
- [SED encryption key management with SKLM](#)

## NVMe drive support

The SR665 V3 supports NVMe drives to maximize storage performance.

- Up to 32 NVMe drives in a 2.5-inch drive configuration, without oversubscription (that is, each x4 drive has a dedicated x4 (4 lanes) connection to the processor, either direct to the processor or via a retimer adapter)
  - Up to 24 installed in front bays
  - Up to 32 installed in front and mid bays
- Up to 8 NVMe drives in a 3.5-inch drive configuration, without oversubscription
  - All installed in mid bays

**Riser 3 support:** The use of the onboard NVMe ports is mutually exclusive with Riser 3, as these use the same PCIe connectors. See the [System architecture](#) section.

The specifics of these configurations are covered in the [Storage configurations](#) section. The tables in those sections indicate the number of NVMe drives in each configuration.

In addition, the SR665 V3 supports two 7mm NVMe drives for use as boot drives. These two drives optionally support RAID via a separate RAID adapter installed in a PCIe slot.

The RAID 940-8i and RAID 940-16i adapters also support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives in either 2.5-inch and 3.5-inch form factor and requires an AnyBay backplane.

**Tri-Mode requires U.3 drives:** Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

## Front drive bays

The front drive bay zone supports the following configurations:

- 8x or 12x 3.5-inch drive bays (all hot-swap)
- 8x, 16x or 24x 2.5-inch drive bays (all hot-swap)
- No backplanes and no drives (supports [field upgrades](#))

The specific combinations that are supported in the SR665 V3 are shown in the following figures. The feature codes listed are the backplane feature codes when ordering CTO and correspond to the feature codes listed in the table below the figure. Note that NVMe and AnyBay backplanes are available either PCIe Gen4 (G4) or PCIe Gen5 (G5).

Figure 8. SR665 V3 front drive bay configurations - 3.5-inch drive bays

Figure 9. SR665 V3 front drive bay configurations - 2.5-inch drive bays, all the same drive type

Figure 10. SR665 V3 front drive bay configurations - 2.5-inch drive bays, combinations

Figure 11. SR665 V3 front drive bay configurations - 2.5-inch drive bays with front PCIe slots

The backplanes used to provide these drive bays are listed in the following table.

**Field upgrades:** All front backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

Table 17. Backplanes for front drive bays

Feature	Description	Bays	PCIe Gen	Maximum supported
Front 3.5-inch drive backplanes				
B8LP	ThinkSystem 2U 8x3.5" SAS/SATA Backplane	8	-	1
B8LT	ThinkSystem 2U 12x3.5" SAS/SATA Backplane	12	-	1
BPL8	ThinkSystem 2U 8x3.5" SAS/SATA+4 AnyBay Backplane	12	Gen4	1
BPL9	ThinkSystem 2U 8x3.5" SAS/SATA+4 NVMe Backplane	12	Gen4	1
BQ2S	ThinkSystem 2U 12x3.5" SAS/SATA with Rear 4-Bay Expander Backplane	12*	-	1
Front 2.5-inch drive backplanes				
B8LU	ThinkSystem 2U 8x2.5" SAS/SATA Backplane	8	-	3
BH8D	ThinkSystem 2U/4U 8x2.5" NVMe Backplane	8	Gen4	3
BS7Y	ThinkSystem V3 2U 8x2.5" NVMe Gen5 Backplane	8	Gen5	3
BH8B	ThinkSystem 2U/4U 8x2.5" AnyBay Backplane	8	Gen4	3
BLL2	ThinkSystem V3 2U 8x2.5" AnyBay Gen5 Backplane	8	Gen5	3
BPL7	ThinkSystem 2U 6x2.5" SAS/SATA+2 AnyBay Backplane	8	Gen4	1
BQ2T	ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane	24*	-	1
Integrated Diagnostics Panel (for 2.5-inch configurations with 8 or 16 bays only)				
BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2	-	-	1

\* Backplane has an onboard SAS expander that provides connectivity to SAS/SATA drive bays in a separate rear backplane (order the rear backplane separately). See also note below for BQ2T.

The use of front drive bays has the following configuration rules:

- The SR665 V3 also supports configurations without any drive bays, allowing for drive bay upgrades as described in the [field upgrades](#) section.
- If 3.5-inch front drive bays are used, an internal (CFF) RAID adapter or HBA is not supported as the adapter and bays occupy the same physical space
- Any 8x 2.5-inch and 16x 2.5-inch drive configuration (SAS/SATA, AnyBay, or NVMe) can optionally be configured for use with the Integrated Diagnostics Panel as described in the [Local management](#) section. 3.5-inch drive configurations do not support the Integrated Diagnostics Panel. With the Integrated Diagnostics Display, 8-bay configurations can be upgrade to 16 bays, however 16-bay configurations cannot be upgrade to 24 bays.
- If you are building a server configuration that includes the ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane (feature BQ2T) and the order also includes a rack cabinet, then you can configure at most 6 drives to be installed in the factory. The remaining drives must be ordered separately using the option part numbers for the drives. This requirement does not apply if the order does not include a rack cabinet. The requirement is due to the shock/vibration limits of the 24x 2.5-inch backplane.

### Mid drive bays

The SR665 V3 supports hot-swap drives installed in the middle of the server chassis. The drive bays are accessible by removing the top lid of the server and levering the mid drive chassis up at the front.

The following configurations are supported:

- 4x 3.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap NVMe drive bays

The drive bays in the open position are shown in the following figure.

**M.2 support:** When mid drive bays are configured, the M.2 adapter is installed on the mid drive bay mechanical as shown in the images.

Figure 12. Mid-chassis drive bays

The backplanes used to provide these drive bays are listed in the following table.

Table 18. Backplanes for mid drive bays

Feature code	Description	PCIe Gen	Maximum supported
Mid - 3.5-inch drive backplane			
BCQK	ThinkSystem 2U 4x3.5" SAS/SATA Middle Backplane	-	1
Mid - 2.5-inch drive backplane			
BCQL	ThinkSystem 2U 4x2.5" SAS/SATA Middle Backplane	-	2‡
BDY7	ThinkSystem 2U 4x2.5" Middle NVMe Backplane	Gen4	2‡

‡ 2.5-inch drive backplanes for the mid-chassis area must be installed in pairs. NVMe and SAS/SATA cannot be mixed.

**Field upgrades:** Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

The use of drive bays in the mid-chassis area has the following configuration rules:

- All processors are supported. Higher TDP processors will require the performance heatsinks.
- Full-length adapter cards are not supported
- GPUs (including low profile GPUs such as the NVIDIA A2) are not supported
- The use of mid drive bays requires Riser 1 be installed, since power for the mid bay backplanes comes from Riser 1

### Rear drive bays

The SR665 V3 supports hot-swap drives installed at the rear of the server chassis. Supported configurations are as follows:

- 3.5-inch hot-swap drives
  - 2x SAS/SATA drive bays
  - 4x SAS/SATA drive bays
- 2.5-inch hot-swap drives
  - 4x SAS/SATA drive bays
  - 4x AnyBay drive bays
  - 8x SAS/SATA drive bays

The configurations are shown in the following figure.

Figure 13. Rear 2.5-inch and 3.5-inch drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

**7mm drives:** The SR665 V3 supports two 7mm drives. See the [7mm drives](#) section for details.

Table 19. Backplanes for rear drive bays

Feature code	Description	PCIe Gen	Maximum supported
Rear - 3.5-inch drive backplanes			
BAG7	ThinkSystem 2U 2x3.5" SAS/SATA Rear Backplane	-	1
B8L3	ThinkSystem 1U/2U 4x3.5" SAS/SATA Backplane	-	1
Rear - 2.5-inch drive backplanes			
B8LV	ThinkSystem 2U 4x2.5" SAS/SATA Backplane	-	1
BQ2U	ThinkSystem V3 1U/2U 4x2.5" AnyBay Backplane	Gen4	1
B97X	ThinkSystem 2U 8x2.5" SAS/SATA Rear Backplane	1	1

**Field upgrades:** Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

The use of rear drive bays has the following configuration rules:

- The use of rear bays restricts the number of slots and the choice of risers that are supported. See the [I/O expansion](#) section for details.
- The use of rear drive bays may require that Riser 1 or Riser 2 be installed, since power for the rear backplane comes from that riser.

## Storage configurations

This section describes the various combinations of front and rear drives that the server supports, as well as M.2 support.

**Tip:** These tables are based on Config Matrix V1.5H in TRD 4.1.

In this section:

- [Overview of configurations - 3.5-inch front drive bays](#)
- [Overview of configurations - 2.5-inch front drives supporting rear slots \(no front slots\)](#)
- [Overview of configurations - 2.5-inch front drives supporting front slots \(no rear slots\)](#)
- [Overview of configurations - 2.5-inch front drives supporting 12 slots \(front & rear\)](#)
- [Details - 3.5-inch front drive bays](#)
- [Details - 2.5-inch front drives supporting rear slots \(no front slots\)](#)
- [Details - 2.5-inch front drives supporting front slots \(no rear slots\)](#)
- [Details - 2.5-inch front drives supporting 12 slots \(front & rear\)](#)

The following tables summarize the storage configurations for the SR665 V3. For details, including processor requirements, M.2 and 7mm support, and controller selections, see each of the Details tables.

### Overview - 3.5-inch front drives

The following table summarizes the configurations that use 3.5-inch front drive bays.

Click to jump down to the [details of the 3.5-inch front drive configurations](#) .

Return to [Storage configurations](#).

Table 20. Overview - 3.5-inch front drives

Config	Total drives (NVMe)	Front			Mid			Rear			Backplanes

### Details - 3.5-inch front bays

The following table details the configurations that use 3.5-inch front drive bays.

Click to go to the [overview of the 3.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 + RAID adapter** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.
- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.
- **7mm + RAID adapter** means the 7mm SATA/NVMe kit (BU0N) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

### Details - 2.5-inch front bays supporting rear slots (no front slots)

The following table details the configurations that use 2.5-inch front bays supporting rear slots (no front slots).

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 + RAID adapter** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.

- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.
- **7mm + RAID adapter** means the 7mm SATA/NVMe kit (BU0N) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

### Details - 2.5-inch front bays supporting front slots (no rear slots)

The following table details the configurations that use 2.5-inch front bays supporting front slots (no rear slots).

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 + RAID adapter** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.
- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.
- **7mm + RAID adapter** means the 7mm SATA/NVMe kit (BU0N) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

### Details - 2.5-inch front drives supporting 12 slots (front & rear)

The following table details the configurations that use 2.5-inch front drives supporting 12 slots (front & rear).

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 + RAID adapter** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.
- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.
- **7mm + RAID adapter** means the 7mm SATA/NVMe kit (BU0N) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

## Field upgrades

The SR665 V3 is orderable without drive bays, allowing you to add a backplane, cabling and controllers as field upgrades. The server also supports upgrading some configurations by adding additional front drive bays (for example, upgrading from 8 to 16x 2.5-inch drive bays).

To add drive bays you will need to order both drive backplanes and cable kits. Backplane kits do not include cables.

The upgrades are listed as follows:

- [3.5-inch chassis drive bay upgrades](#)
- [2.5-inch chassis drive bay upgrades](#)
- [Upgrades to Retimer adapters](#)
- [Upgrades to an Internal \(CFF\) HBA/RAID adapter](#)

For more information about the backplane kits and cable kits, see the Lenovo server options site: [https://serveroption.lenovo.com/cable\\_kit\\_options/](https://serveroption.lenovo.com/cable_kit_options/)

### 3.5-inch chassis drive bay upgrades

The table below lists the backplane kits and cable kits needed to build one of the supported 3.5-inch chassis configurations.

**Tip:** The configurations each have a letter that matches the configurations listed in the [Storage configurations](#) section.

Table 28. Drive bay field upgrade for the 3.5-inch chassis (Blue = SAS/SATA, Purple = AnyBay, Red = NVMe)

When adding drive bays, you will also need to add the appropriate storage controller(s). Consult the tables in the [Storage configurations](#) section to determine what controller sections are supported and what additional controllers you will need. Controllers are described in the [Controllers for internal storage](#) section.

### 2.5-inch chassis drive bay upgrades

The table below lists the backplane kits and cable kits needed to build one of the supported 2.5-inch chassis configurations.

**Tip:** The configurations each have a letter that matches the configurations listed in the [Storage configurations](#) section.

**Note:** Front drive cable kits are based on the location of the backplane in the server. The three backplane locations are BP1, BP2 and BP3 as shown in the following figure.

Figure 14. Backplane numbering

Table 29. Drive bay field upgrade for the 2.5-inch chassis (Blue = SAS/SATA, Purple = AnyBay, Red = NVMe)

When adding drive bays, you will also need to add the appropriate storage controller(s). Consult the tables in the [Storage configurations](#) section to determine what controller sections are supported and what additional controllers you will need. Controllers are described in the [Controllers for internal storage](#) section.

### Upgrades to Retimer adapters

If you are upgrading to a configuration that includes a Retimer adapter (see the Detailed tables in the [Storage configurations](#) section), then you will need to also order one of the following cable kits.

Table 30. Cable kits when upgrading to a Retimer configuration

Part number	Description	Quantity required
4X97A85860	ThinkSystem SR665 V3 32x2.5" PCIe Gen4 NVME Retimer Cable Option Kit	1
4X97A85859	ThinkSystem SR665 V3 24x2.5" PCIe Gen4 NVME Retimer Cable Option Kit	1

### Upgrades to an Internal (CFF) HBA/RAID adapter

If you want to add an internal (CFF) storage adapter (HBA, RAID adapter or SAS expander) to a configuration, you will need to order the cable kit as listed in the following table. Suitable upgrades are either replacing an existing adapter in a rear PCIe slot, or adding the CFF adapter to a server without any storage adapter installed.

The cable kit to order is listed in the following table.

Table 31. Cable kit when upgrading to an Internal HBA/RAID adapter

Part number	Description	Quantity required
4X97A85177	ThinkSystem SR665 V3 Internal HBA/RAID Adapter Cable Option Kit	1

### RAID flash power module (supercap) support

If you plan to add one of the RAID adapters that includes a RAID flash power module (supercap) as a field upgrade, then you may also need to order a Supercap installation kit for the supercap, depending on the location where the supercap will be installed. For CTO orders, the components needed are automatically derived when you select the RAID adapter.

The adapters that this applies to are as follows:

- Any supported RAID 9350 adapter
- Any supported RAID 940 adapter

The location of the supercaps depends on the mid-chassis drive cage used in the server, as shown in the following table.

Table 32. Supercap support

Mid drive cage	Supercaps supported	Location of supercaps	Supercap holder
No mid drive cage	4	Mounted on the air baffle	Not needed
2.5-inch drives	2	Mounted on the left side of the mid drive cage	Integrated into the left side of the 2.5-inch mid drive cage
3.5-inch drives	1	Mounted under the system fan cage	Included with ThinkSystem SR665 V3 Middle 4x3.5" SAS/SATA Backplane Option Kit (4XH7A85892) or order separately (see below)

For 3.5-inch drive bay configurations, if the server already has 3.5-inch mid-chassis drive bays, then the supercap holder is already present under the system fan cages. If you plan to add 3.5-inch mid-chassis drive bays by adding ThinkSystem SR665 V3 Middle 4x3.5" SAS/SATA Backplane Option Kit (4XH7A85892), then the supercap holder is part of the option kit.

## 7mm drives

The SR665 V3 supports two 7mm drives, either both SATA or both NVMe, at the rear of the server. These drives go in place of either PCIe slot 3 (Riser 1) or PCIe slot 6 (Riser 2) as shown in the following figure.

Figure 15. Rear 7mm drive bay configurations

For CTO orders, the configuration includes the drive bays and the cage the drive bays are mounted on to. The cage required depends on where the 7mm drives are located (Riser 1 or Riser 2) and whether there are PCIe slots above the 7mm drive bays. The following table lists the ordering information.

**Tip for 4x 3.5-inch rear drives:** If you wish to configure 4x 3.5-inch rear drives plus 7mm drives in a CTO configuration, the 7mm drives will install in slot 6. You should specify riser card BLKP for Riser 1 and then leave Riser 2 without a riser selected.

Table 33. CTO feature codes for 7mm drive bays

Feature code	Description	SATA drives	NVMe drives	RAID	Maximum supported	Windows 10/11 support
Backplane - 7mm drives						
BU0N	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2	Yes	Yes (x1 lane)	Optional	1	No
B8P3	ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID	No	Yes (x1 lane)	Integrated (Marvell)	1	No
BYFG	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit	Yes	Yes (x1 lane)	Integrated (Broadcom)	1	Supported

The following table lists the PCIe RAID adapters that can be used to add RAID functionality to ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (BU0N)

Table 34. CTO feature codes to select 7mm RAID (ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 only)

Feature code	Description	Maximum supported
Hardware RAID support for ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (BU0N)		
BT7N	ThinkSystem RAID 5350-8i for M.2/7mm SATA Boot Enablement	1
BT7P	ThinkSystem RAID 540-8i for M.2/7mm NVMe Boot Enablement	1

The use of the 7mm rear drive bays has the following configuration rules:

- The 7mm rear drive kit is supported in either slot 3 or slot 6 but not both at the same time.
- M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (feature BU0N):
  - The 7mm drive bays support either SATA drives or NVMe drives but not both. You specify SATA or NVMe in the configurator using feature codes BTTV (SATA) or BTTW (NVMe).
  - If RAID support is required, select feature code BS7A in the configurator to enable RAID
  - The support of RAID-1 with the 7mm drives requires an additional RAID adapter that is installed in PCIe slot 2 or slot 3:
    - RAID support for 7mm SATA drives requires a RAID 5350-8i adapter (feature BT7N)
    - RAID support for 7mm NVMe drives requires a RAID 540-8i adapter operating in Tri-Mode (feature BT7P)
  - The RAID adapter used for 7mm drive support cannot be configured for use with other drive bays (not even with M.2)
  - If RAID support is not required, the 7mm drives connect to an onboard port; No additional adapter is required
- For ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID (feature B8P3)
  - The adapter only supports NVMe drives
  - RAID functionality is integrated into the 7mm adapter using a Marvell 88NR2241 NVMe RAID Controller
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit (feature BYFG)
  - The adapter supports either SATA or NVMe drives
  - RAID functionality is integrated into the 7mm adapter using a Broadcom RAID Controller

### 7mm drive field upgrades

For field upgrades, using the following ordering information. The kits include two cages for use depending on your PCIe slot configuration. The cages are for either Riser 1 or Riser 2. The part numbers also include the cables necessary to connect the 7mm backplane to either the system board or RAID adapter.

Table 35. Field upgrade part numbers for 7mm drives

Part number	Description	Purpose
7mm Enablement Kits		

Part number	Description	Purpose
4XH7A85898	ThinkSystem SR665 V3 Rear 2x7mm SATA/NVMe Enablement Kit <ul style="list-style-type: none"> <li>• 2-bay hot-swap drive enclosure</li> <li>• 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots)</li> <li>• 7mm SSD Riser Cage (without PCIe slots)</li> <li>• 2x 7mm drive bay fillers</li> <li>• Signal and power cables for onboard connections</li> </ul>	7mm drive bays for SATA or NVMe drive support with no RAID support (does not include cables needed for RAID support with a separate adapter)
4XH7A85899	ThinkSystem SR665 V3 Rear 2x7mm SATA/NVMe RAID Enablement Kit <ul style="list-style-type: none"> <li>• 2-bay SATA hot-swap drive enclosure</li> <li>• 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots)</li> <li>• 7mm SSD Riser Cage (without PCIe slots)</li> <li>• 2x 7mm drive bay fillers</li> <li>• Signal and power cables for RAID adapter connectivity</li> </ul>	7mm drive bays for SATA or NVMe drives, plus cables for use with a RAID adapter. Requires a separate RAID adapter for RAID support.
4XH7A88742	ThinkSystem SR665 V3 Rear 2x7mm NVMe RAID Enablement Kit <ul style="list-style-type: none"> <li>• 2-bay hot-swap drive enclosure</li> <li>• 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots)</li> <li>• 7mm SSD Riser Cage (without PCIe slots)</li> <li>• 2x 7mm drive bay fillers</li> <li>• Signal and power cables for onboard connections</li> </ul>	7mm drive bays for NVMe drive support. RAID support is integrated into the adapter using an onboard Marvell 88NR2241 NVMe RAID controller.
4XH7A93167	ThinkSystem SR665 V3/SR655 V3 7mm RAID B540p-2HS SATA/NVMe Enablement Kit <ul style="list-style-type: none"> <li>• 2-bay hot-swap drive enclosure</li> <li>• 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots)</li> <li>• 7mm SSD Riser Cage (without PCIe slots)</li> <li>• 2x 7mm drive bay fillers</li> <li>• Signal and power cables for onboard connections</li> </ul>	7mm drive bays for SATA or NVMe drive support. RAID support is integrated into the adapter using an onboard Broadcom RAID controller.
RAID adapters for optional 7mm HW RAID support (for use with 4XH7A85899)		
4Y37A72482	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter	RAID adapter needed for SATA RAID-1 with 2x 7mm SATA drives
4Y37A78834	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter	RAID adapter needed for NVMe RAID-1 with 2x 7mm NVMe drives  <b>Tip:</b> Once the 540-8i adapter is installed, it will need to be configured to operate in Tri-mode to enable NVMe RAID.

## M.2 drives

The SR665 V3 supports one or two M.2 form-factor SATA or NVMe drives for use as an operating system boot solution or as additional storage.

The M.2 drives install into an M.2 module which is mounted horizontally in the server:

- In servers without mid-chassis drives, the M.2 module is mounted on the air baffle
- With a mid-chassis drive cage (2.5-inch or 3.5-inch), the M.2 module is mounted on the drive cage, as shown in the [Mid drive bays](#) section.

The supported M.2 modules are listed in the following table. For field upgrades see the [M.2 field upgrades](#) section below.

Table 36. M.2 modules

Part number	Feature code	Description	SATA drives	NVMe drives	RAID	Maximum supported	Windows 10/11 support
4Y37A79663	BM8X	ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter	Yes	Yes (x4 lanes)	Optional	1	Supported
4Y37A09750	B8P9	ThinkSystem M.2 NVMe 2-Bay RAID Adapter	No	Yes (x1 lane)	Integrated (Marvell)	1	No
4Y37A90063	BYFF	ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter	Yes	Yes (x1 lane)	Integrated (Broadcom)	1	Supported

The ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter optionally supports RAID with the addition of a separate RAID adapter is required. For CTO orders, ordering information is listed in the following table to derive the required RAID adapter.

Table 37. CTO feature codes to select M.2 RAID (ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter only)

Feature code	Description	RAID support	Maximum supported	Windows 10/11 support
BT7N	ThinkSystem RAID 5350-8i for M.2/7mm SATA Boot Enablement	SATA	1	Supported
BT7P	ThinkSystem RAID 540-8i for M.2/7mm NVMe Boot Enablement	NVMe	1	Supported

Configuration notes:

- M.2 is not supported with all storage configurations - see [Storage configurations](#) for details.
- M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration
- For field upgrades, an additional cable is needed as described in the [M.2 field upgrades](#) section below
- For ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663):
  - RAID support is implemented with the use of an additional RAID adapter installed in a slot
  - The adapter is not supported with Riser 3 or front PCIe slots
  - If RAID support is not required, the M.2 adapter connects to an onboard port. No additional adapter is required
  - The support of RAID-1 with the M.2 drives requires an additional RAID adapter that is installed in PCIe slot 2 or slot 3:
    - RAID support for M.2 SATA drives requires a RAID 5350-8i adapter (feature BT7N)
    - RAID support for M.2 NVMe drives requires a RAID 540-8i adapter operating in Tri-Mode (feature BT7P)

- The RAID adapter used for M.2 drive support cannot be configured for use with other drive bays (not even with 7mm)
- For ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750):
  - RAID is implemented using an onboard Marvell 88NR2241 NVMe RAID controller
- For ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063):
  - RAID is implemented using an onboard Broadcom RAID controller

Supported drives are listed in the [Internal drive options](#) section.

The ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- When two drives installed, they must be either both SATA or both NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- No onboard RAID; RAID functionality is provided by a separate adapter (SATA or NVMe)
- Either 6Gbps SATA or PCIe 4.0 x4 interface to the drives depending on the drives installed
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- When connected to a separate PCIe RAID adapter, supports SED drive encryption via the RAID adapter, otherwise no SED support

The ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750) has the following features:

- Supports one or two NVMe M.2 drives
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Marvell 88NR2241 NVMe RAID Controller
- With 1 drive, supports single-drive RAID-0
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or two single-drive RAID-0 arrays
- PCIe 3.0 x2 host interface; PCIe 3.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- No support for SED drive encryption

The ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063) has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Broadcom SAS3808N RAID Controller
- With 1 drive, supports JBOD
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or JBOD
- PCIe 4.0 x2 host interface; PCIe 4.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature
- Firmware update via Lenovo firmware update tools
- Supports SED drive encryption

### **M.2 field upgrades**

For field upgrades, the SR665 V3 also requires additional cables necessary to connect the M.2 to either the system board or RAID adapter. Ordering information is listed in the following table.

Table 38. Cable kit for M.2 drive support

Part number	Description
M.2 Cable Kit - cables for use with RAID adapters or with onboard connectivity	
4X97A87126	ThinkSystem SR665 V3 M.2 Enablement Cable Option Kit
RAID adapters for M.2 RAID support (ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter only)	
4Y37A72482	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter (SATA M.2 support)
4Y37A78834	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter (NVMe M.2 support using Tri-Mode)

### SED encryption key management with SKLM

The server supports self-encrypting drives (SEDs) as listed in the [Internal drive options](#) section. To effectively manage a large deployment of these drives in Lenovo servers, IBM Security Key Lifecycle Manager (SKLM) offers a centralized key management solution. A Lenovo Feature on Demand (FoD) upgrade is used to enable this SKLM support in the management processor of the server.

The following table lists the part numbers and feature codes for the upgrades.

Table 39. FoD upgrades for SKLM support

Part number	Feature code	Description
Security Key Lifecycle Manager - FoD (United States, Canada, Asia Pacific, and Japan)		
00D9998	A5U1	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 1 year S&S
00D9999	AS6C	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 3 year S&S
Security Key Lifecycle Manager - FoD (Latin America, Europe, Middle East, and Africa)		
00FP648	A5U1	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 1 year S&S
00FP649	AS6C	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 3 year S&S

The IBM Security Key Lifecycle Manager software is available from Lenovo using the ordering information listed in the following table.

Table 40. IBM Security Key Lifecycle Manager licenses

Part number	Description
7S0A007FWW	IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & Support 12 Months
7S0A007HWW	IBM Security Key Lifecycle Manager For Raw Decimal Terabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months
7S0A007KWW	IBM Security Key Lifecycle Manager For Raw Decimal Petabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months
7S0A007MWW	IBM Security Key Lifecycle Manager For Usable Decimal Terabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months
7S0A007PWW	IBM Security Key Lifecycle Manager For Usable Decimal Petabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months

## Controllers for internal storage

The SR665 V3 offers a variety of controller options for internal drives:

- For 2.5-inch and 3.5-inch drives:
  - Onboard SATA ports (feature AVUX)
  - Onboard NVMe ports (feature BC4V)
  - NVMe switch and retimer adapters (PCIe slot-based)
  - RAID adapters and HBAs for SAS/SATA drives (PCIe slot-based)
  - RAID adapters, SAS Expander, and HBAs for SAS/SATA drives (cabled in a dedicated space)
- For 7mm drive bays in the rear of the server (see the [7mm drives](#) section)
  - SATA controller integrated into the 7mm drive bay enclosure
  - NVMe controller integrated into the 7mm drive bay enclosure
- For M.2 drives internal to the server (see [M.2 drives](#) section)
  - SATA controller integrated on the M.2 SATA 2-Bay RAID Enablement Kit
  - NVMe controller integrated on the M.2 NVMe 2-Bay RAID Enablement Kit

As well as supporting RAID adapters and HBAs that install in a PCIe slot, the SR665 V3 with 2.5-inch front drive bays supports a custom form factor (CFF) adapter that is mounted in the server and cabled to one of the onboard NVMe ports. These Internal Adapters are not supported with 3.5-inch front drives due to a lack of physical space.

The following table lists the adapters used for the internal storage of the server.

Table 41. Internal Storage adapter support

Part number	Feature code	Description	Power module (supercap)	PCIe lanes	Max qty	Slots supported	Windows 10/11 support
Onboard controllers							
CTO only	AVUX	Onboard SATA AHCI Mode	No		1	N/A	Supported
CTO only	BC4V	Non RAID NVMe (Onboard NVMe)	No		1	N/A	Supported
RAID controllers - PCIe Gen 3							
4Y37A72482	BJHK	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter	No	Gen3 x8	3	1,2,3,4,5,6	Supported

‡ These custom form factor (CFF) adapters are only supported with 2.5-inch front drive bays. Not supported in configurations with 3.5-inch front drive bays.

† Adapter also supports PCIe 4.0 x1 connectivity to NVMe drives (requires NVMe drives with U.3 interface)

#### Configuration notes:

- **Supercap support limits the number of RAID adapters installable** : The table lists whether the adapter includes a power module (supercap) to power the flash memory. The server supports between 1 and 4 supercaps depending on the server configuration as described in the [RAID flash power module \(supercap\) support](#) section. The number of supercaps supported also determines the maximum number of RAID adapters with flash that can be installed in the server.
- **Field upgrades**: If you are adding a RAID adapter with supercap to the server as a field upgrade,

you may need a supercap holder as described in the [RAID flash power module \(supercap\) support](#) section.

- **7mm drive support:** The storage adapters listed in the table below do *not* provide connectivity to the 7mm drive bays. The 7mm drives have their own independent RAID controller. See the [7mm drives](#) section for details.
- **E810 Ethernet and X350 RAID/HBAs:** The use of both an Intel E810 network adapter and an X350 HBA/RAID adapter (9350, 5350 and 4350) is currently not supported in ThinkSystem servers. For details see [Support Tip HT513226](#). Planned support for this combination of adapters is 2Q/2024.

The RAID 940-8i and RAID 940-16i adapters also support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives in either 2.5-inch and 3.5-inch form factor and requires an AnyBay backplane.

**Tri-Mode requires U.3 drives:** Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

The onboard SATA controller has the following features:

- Controller integrated into the AMD processor
- JBOD only; no RAID support
- Supports up to 20 SATA drives in the SR665 V3 (16 with one processor)
- Supports HDDs and SSDs; can be mixed

The onboard NVMe support has the following features:

- Controller integrated into the AMD processor
- Supports up to 20x NVMe drives direct connected to onboard ports; additional drives through retimer/switch adapters
- Each drive has PCIe 5.0 x4 host interface
- Supports JBOD - Intel and non-Intel NVMe SSDs
- No support for RAID

For specifications about the RAID adapters and HBAs supported by the SR665 V3, see the ThinkSystem RAID Adapter and HBA Reference, available from:

<https://lenovopress.lenovo.com/lp1288-thinksystem-raid-adapter-and-hba-reference#sr665-v3-support=SR665%2520V3>

For more information about each of the adapters, see the product guides in the RAID adapters or HBA sections of the Lenovo Press web site:

<https://lenovopress.com/servers/options/raid>  
<https://lenovopress.com/servers/options/hba>

## Internal drive options

The following tables list the drive options for internal storage of the server.

2.5-inch hot-swap drives:

- [2.5-inch hot-swap 12 Gb SAS HDDs](#)
- [2.5-inch hot-swap 24 Gb SAS SSDs](#)
- [2.5-inch hot-swap 12 Gb SAS SSDs](#)
- [2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [2.5-inch hot-swap PCIe 5.0 NVMe SSDs](#)
- [2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

2.5-inch 7mm hot-swap drives:

- [7mm 2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [7mm 2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

3.5-inch hot-swap drives:

- [3.5-inch hot-swap 12 Gb SAS HDDs](#)
- [3.5-inch hot-swap 6 Gb SATA HDDs](#)
- [3.5-inch hot-swap 24 Gb SAS SSDs](#)
- [3.5-inch hot-swap 12 Gb SAS SSDs](#)
- [3.5-inch hot-swap 6 Gb SATA SSDs](#)
- [3.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

M.2 drives:

- [M.2 SATA drives](#)
- [M.2 PCIe 4.0 NVMe drives](#)

**M.2 drive support:** The use of M.2 drives requires an additional adapter as described in the [M.2 drives](#) subsection.

**SED support:** The tables include a column to indicate which drives support SED encryption. The encryption functionality can be disabled if needed. Note: Not all SED-enabled drives have "SED" in the description.

Table 42. 2.5-inch hot-swap 12 Gb SAS HDDs

## USB memory key

For general portable storage needs, the server also supports the USB memory key option that is listed in the following table.

Table 58. USB memory key

Part number	Feature	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive

## Internal backup units

The server does not support any internal backup units, such as tape drives or RDX drives. External backup units are available as described in the [External backup units](#) section.

## Optical drives

The server supports the external USB optical drive listed in the following table.

Table 59. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

## I/O expansion

The SR665 V3 supports a total of up to 12x PCIe slots, 10x at the rear and 2x at the front, plus 1x OCP 3.0 SFF slot for networking. The OCP slot can be either at the front or at the rear (but not both). Slot availability is based on riser selection and drive bays configured. The use of some slots requires that both processors be installed as listed below.

Topics in this section:

- [Slot layout and connections](#)
- [Slot combinations](#)
- [Slot ordering information](#)
- [Serial port](#)

### Slot layout and connections

The slots are provided by riser cards:

- Riser 1: Slots 1, 2 and 3, all full-height slots (connect to CPU 1)
- Riser 2: Slots 4, 5, and 6, all full-height slots (connect to CPU 2)
- Riser 3: Slot 7 and 8
  - When configured as full-height slots: Slot 7 connects to CPU 1, slot 8 to CPU 2
  - When configured as low-profile slots: Both slots connect to CPU 1
- Riser 4: Slots 9 and 10 (connect to CPU 2)

**NVMe support:** The use of Riser 3 is mutually exclusive to onboard NVMe support as they use the same PCIe connectors.

The slots in each riser are either PCIe x16 or PCIe x8 depending on the riser card selected as listed in the table below. All x8 slots are open-ended and physically support x16 adapters. Depending on the risers selected, slots are either PCIe 5.0 or PCIe 4.0.

The SR665 V3 also supports front-accessible PCIe slots: 2x PCIe 4.0 x16 slots plus a dedicated OCP 3.0 SFF slot for networking. Front-accessible slots are as follows:

- Slot 11: PCIe 4.0 x16 FHHL (connects to CPU 2)
- Slot 12: PCIe 4.0 x16 FHHL (connects to CPU 2)

As discussed in the [Internal storage](#) section, the server supports drive bays in the rear of the server. Depending on the drive bays selected, the number of slots available for adapters is reduced. The figure below shows the supported combinations of slots and drive bays.

**Internal HBA/RAID adapter:** For configurations with 2.5-inch front drive bays, an internal RAID adapter or HBA can be installed in a dedicated space and cabled to a PCIe x8 connector, thereby freeing up a slot for other purposes.

The following figure shows the locations of the rear-accessible slots for each configuration selection. The OCP slot is located in the lower-left corner.

Figure 16. SR665 V3 rear slot configurations

The following figure shows the locations of the front-accessible slots.

Figure 17. SR665 V3 front slots

## Slot combinations

The SR665 V3 supports the riser combinations as listed in the following table. The table lists the PCIe slot risers in the rear of the server, the PCIe slots in the front of the server, and the front & rear OCP slots.

The table also lists the total number of PCIe slots (excluding the OCP slot) assuming a 3-slot riser is selected for Riser 1 and Riser 2.

Table 60. Slot combinations

Total PCIe slots	Riser 1	Riser 2	Riser 3	Riser 4	Front slots	Rear OCP	Front OCP
<b>Rear slots + Rear OCP</b>							
3	Yes	No	No	No	No	Yes	No
6	Yes	Yes	No	No	No	Yes	No
8	Yes	Yes	Yes	No	No	Yes	No
10	Yes	Yes	Yes	Yes	No	Yes	No
<b>Rear + Front slots + Rear OCP</b>							
5	Yes	No	No	No	Yes	Yes	No
8	Yes	Yes	No	No	Yes	Yes	No
10	Yes	Yes	Yes	No	Yes	Yes	No
12	Yes	Yes	Yes	Yes	Yes	Yes	No
<b>Rear + Front slots + Front OCP</b>							
5	Yes	No	No	No	Yes	No	Yes
8	Yes	Yes	No	No	Yes	No	Yes
<b>Front slots + Rear OCP</b>							
2	No	No	No	No	Yes	Yes	No

## Slot ordering information

The following table lists the riser cards available for CTO builds and for field upgrades.

**No slots:** It is also possible to build a configuration without any slots, in which case slot fillers will be derived in the configurator. Slots can be added later as field upgrades using option part numbers as listed in the table.

Table 61. Riser cards

Part number	Feature code	Description	Slot configuration* (Green = Gen5, Blue = Gen4)			Purpose
			Slot 1	Slot 2	Slot 3	
<b>Rear Riser 1 (FH slots)</b>			<b>Slot 1</b>	<b>Slot 2</b>	<b>Slot 3</b>	
4XH7A82898	BPQU	ThinkSystem V3 2U x16/x8/x8 PCIe Gen5 Riser 1 or 2	Gen5 x16	Gen5 x8	Gen5 x8	3 slots PCIe 5.0
4XH7A82896	BLKL	ThinkSystem V3 2U x16/x8/x8 PCIe Gen4 Riser1 or 2	Gen4 x16	Gen4 x8	Gen4 x8	3 slots PCIe 4.0
4XH7A82900	BPQV	ThinkSystem V3 2U x16/x16/E PCIe Gen5 Riser1 or 2	Gen5 x16	Gen5 x16	No slot	2 slots PCIe 5.0; COM port or 7mm drives in slot 3

Part number	Feature code	Description	Slot configuration* (Green = Gen5, Blue = Gen4)				Purpose
4XH7A82892	BLKM	ThinkSystem V3 2U x16/x16/E PCIe Gen4 Riser1 or 2	Gen4 x16	Gen4 x16	No slot		2 slots PCIe 4.0; COM port or 7mm drives in slot 3
4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2	No slot	Gen5 x16	Gen4 x16		PCIe 5.0 in slot 2; DW GPU in slot 2
4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2	No slot	Gen4 x16	Gen4 x16		2 slots PCIe 4.0; DW GPU in slot 2
4XH7A82890	BLKP	ThinkSystem V3 2U x16 PCIe Gen4 Riser1 or 2	No slot	No slot	Gen4 x16		1 slot PCIe 4.0; For 4x 3.5-inch rear drives
<b>Rear Riser 2 (FH slots)</b>			<b>Slot 4</b>	<b>Slot 5</b>	<b>Slot 6</b>		
4XH7A82898	BPQU	ThinkSystem V3 2U x16/x8/x8 PCIe Gen5 Riser 1 or 2	Gen5 x16	Gen5 x8	Gen5 x8		3 slots PCIe 5.0
4XH7A82896	BLKL	ThinkSystem V3 2U x16/x8/x8 PCIe Gen4 Riser1 or 2	Gen4 x16	Gen4 x8	Gen4 x8		3 slots PCIe 4.0
4XH7A82900	BPQV	ThinkSystem V3 2U x16/x16/E PCIe Gen5 Riser1 or 2	Gen5 x16	Gen5 x16	No slot		2 slots PCIe 5.0; COM port or 7mm drives in slot 6
4XH7A82892	BLKM	ThinkSystem V3 2U x16/x16/E PCIe Gen4 Riser1 or 2	Gen4 x16	Gen4 x16	No slot		2 slots PCIe 4.0; COM port or 7mm drives in slot 6
4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2	No slot	Gen5 x16	Gen4 x16		PCIe 5.0 in slot 5; DW GPU in slot 5
4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2	No slot	Gen4 x16	Gen4 x16		2 slots PCIe 4.0; DW GPU in slot 5
4XH7A82890	BLKP	ThinkSystem V3 2U x16 PCIe Gen4 Riser1 or 2	No slot	No slot	Gen4 x16		1 slot PCIe 4.0; For 2x or 4x 3.5-inch rear drives

Part number	Feature code	Description	Slot configuration* (Green = Gen5, Blue = Gen4)				Purpose
			Slot 7	Slot 8	Slot 9	Slot 10	
<b>Rear Riser 3 (2x FH slots)</b>			<b>Slot 7</b>	<b>Slot 8</b>			
4XH7A85887	BLL9	ThinkSystem V3 2U x16/x16 PCIe Gen5 Riser3 Kit	Gen5 x16	Gen5 x16			2x PCIe 5.0 x16 slots; DW GPU in slot 7
4XH7A85885	BPKG	ThinkSystem V3 2U x16/x16 PCIe Gen4 Riser3 Kit with Cage	Gen4 x16	Gen4 x16			2x PCIe 4.0 x16 slots; DW GPU in slot 7
4XH7A85886	BPKH	ThinkSystem V3 2U x8/x8 PCIe Gen5 Riser3 Kit with Cage	Gen5 x8	Gen5 x8			2x PCIe 5.0 x8 slots
4XH7A85884	BPKF	ThinkSystem V3 2U x8/x8 PCIe Gen4 Riser3 Kit with Cage	Gen4 x8	Gen4 x8			2x PCIe 4.0 x8 slots
<b>Rear Riser 3 &amp; 4 (4x LP slots)</b>			<b>Slot 7</b>	<b>Slot 8</b>	<b>Slot 9</b>	<b>Slot 10</b>	
4XH7A85888	BQ2W†	ThinkSystem V3 2U PCIe Gen5 Riser 3/4-part 1 for Rear 10 slots	Gen5 x8	Gen5 x8			2x PCIe 5.0 x8 slots
	BTMS†	ThinkSystem V3 2U PCIe Gen5 Riser 3/4-part 2 for Rear 10 slots			Gen5 x8	Gen4 x8	2x PCIe x8 slots (Gen 5, Gen4)
<b>Front Riser</b>			<b>Slot 11</b>	<b>Slot 12</b>			
4XH7A85889	BQ2X	ThinkSystem V3 2U Front x16/x16 PCIe G4 Riser	Gen4 x16	Gen4 x16			2x PCIe 4.0 x16 front-accessible slots

\* All PCIe x8 slots are open ended and will physically support x16 adapters

† In the configurator, when feature BQ2W is selected, BTMS is automatically derived and provides slots 9 & 10. 4XH7A85888 contains both risers.

To configure the rear OCP slot, no additional feature codes are needed. To configure the front OCP slot, you will need the components listed in the following table. These components are used to route the rear OCP signals to the front of the server.

**Tip:** See the Slot combinations section to see which slot combinations are supported with the front and rear OCP slots

Table 62. Feature codes for the front OCP slot

Feature code	Description
BQ2E	ThinkSystem V3 1U/2U Front OCP Interposer Card
BQ2F*	ThinkSystem V3 1U/2U Rear OCP Interposer Card

\* BQ2F is automatically derived when BQ2E is selected

Configuration rules:

- Riser 3 is not supported with the M.2 adapter
- Front PCIe slots are not supported with the M.2 adapter
- For best performance, install PCIe 5.0 adapters in PCIe 5.0 (Gen5) slots
- The server only supports one OCP slot, either in the rear of the server or the front of the server, not both
- If you want to configure 4x low profile slots for slots 7-10, select feature BQ2W which provides riser 3 (slots 7, 8). Feature BTMS will then be automatically derived to provide riser 4 (slots 9 & 10), along with the necessary cables. Option part number 4XH7A85888 contains both of these risers and the cables.
- If you want to add both a 7mm drive enclosure plus 2x PCIe slots above it, you will need to order the 7mm drive option (either 4XH7A85898 or 4XH7A85899) plus the x16/x16/E riser kit (4XH7A82900 for PCIe Gen 5 or 4XH7A82892 for Gen 4). The riser kit part number provides the 2-slot riser card.
- All PCIe x8 slots are open ended and will physically support x16 adapters

### Serial port

The SR665 V3 optionally supports a RS-232 serial port by adding a COM port bracket to either slot 3 or slot 6. Ordering information is shown in the following table.

**Front PCIe slots:** The serial port is not supported in the front PCIe slots

Table 63. Serial port

Part number	Feature code	Description
4X97A82921	BMNJ	ThinkSystem V2/V3 1U COM Port Upgrade Kit

The bracket is shown in the following figure. The option part number includes both Low Profile and Full Height brackets.

Figure 18. ThinkSystem V2/V3 1U COM Port Upgrade Kit

## Network adapters

The server has a dedicated OCP 3.0 SFF slot with PCIe 5.0 x16 host interface. See [Figure 3](#) for the location of the OCP slot.

The following table lists the supported OCP adapters. One port can optionally be shared with the XCC management processor for Wake-on-LAN and NC-SI support. Only 1 OCP card can be installed in the server, either rear-accessible or front-accessible.

Table 64. Supported OCP adapters

Part number	Feature code	Description	Maximum supported	Windows 10/11 support
<b>Gigabit Ethernet</b>				
4XC7A08235	B5T1	ThinkSystem Broadcom 5719 1GbE RJ45 4-port OCP Ethernet Adapter	1	Supported
4XC7A88428	BW97	ThinkSystem Intel I350 1GbE RJ45 4-Port OCP Ethernet Adapter V2	1	Supported
4XC7A08277	B93E	ThinkSystem Intel I350 1GbE RJ45 4-port OCP Ethernet Adapter	1	Supported
<b>10 Gb Ethernet - 10GBASE-T</b>				
4XC7A08236	B5ST	ThinkSystem Broadcom 57416 10GBASE-T 2-port OCP Ethernet Adapter	1	Supported
4XC7A08240	B5T4	ThinkSystem Broadcom 57454 10GBASE-T 4-port OCP Ethernet Adapter	1	Supported
4XC7A08278	BCD5	ThinkSystem Intel X710-T2L 10GBASE-T 2-port OCP Ethernet Adapter	1	Supported
4XC7A80268	BPPY	ThinkSystem Intel X710-T4L 10GBase-T 4-Port OCP Ethernet Adapter	1	Supported
<b>25 Gb Ethernet</b>

4XC7A81883	BQBN	ThinkSystem NVIDIA ConnectX-7 NDR200/200GbE QSFP112 2-port PCIe Gen5 x16 InfiniBand Adapter	Gen5 x16	6	1,2,4,5,7,8	No

Part number	Feature	Description	PCIe lanes	Max Qty	Slots supported	Windows 10/11 support
400 Gb Ethernet / NDR InfiniBand						
4XC7A80289	BQ1N	ThinkSystem NVIDIA ConnectX-7 NDR OSFP400 1-Port PCIe Gen5 x16 InfiniBand Adapter	Gen5 x16	6	1,2,4,5,7,8	No

\* The AMD X3522 10/25GbE adapter is not supported in slot 2 or slot 3 of a x16/x8/x8 riser (BLKL or BPQU)

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:

<https://lenovopress.com/servers/options/ethernet>

**Configuration requirements:**

- Adapters with a x16 host interface require a x16 slot to maximize performance
- PCIe Gen5 adapters will require a Gen5 riser to maximize performance
- **E810 Ethernet and X350 RAID/HBAs:** The use of both an Intel E810 network adapter and an X350 HBA/RAID adapter (9350, 5350 and 4350) is currently not supported in ThinkSystem servers. For details see [Support Tip HT513226](#). Planned support for this combination of adapters is 2Q/2024.

## Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by the SR665 V3.

**No Windows 10/11 support:** None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 66. Fibre Channel HBAs

Part number	Feature code	Description	PCIe lanes	Max qty	Slots supported
<b>64 Gb Fibre Channel HBAs</b>					
4XC7A77485	BLC1	ThinkSystem Emulex LPe36002 64Gb 2-port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12
<b>32 Gb Fibre Channel HBAs</b>					
4XC7A76498	BJ3G	ThinkSystem Emulex LPe35000 32Gb 1-port PCIe Fibre Channel Adapter v2	Gen4 x8	10	1-12
4XC7A76525	BJ3H	ThinkSystem Emulex LPe35002 32Gb 2-port PCIe Fibre Channel Adapter v2	Gen4 x8	10	1-12
4XC7A08279	BA1G	ThinkSystem QLogic QLE2770 32Gb 1-Port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12
4XC7A08276	BA1F	ThinkSystem QLogic QLE2772 32Gb 2-Port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12
<b>16 Gb Fibre Channel HBAs</b>					
01CV840	ATZV	Emulex 16Gb Gen6 FC Dual-port HBA	Gen3 x8	10	1-12
01CV830	ATZU	Emulex 16Gb Gen6 FC Single-port HBA	Gen3 x8	10	1-12
01CV760	ATZC	QLogic 16Gb Enhanced Gen5 FC Dual-port HBA	Gen3 x8	10	1-12
01CV750	ATZB	QLogic 16Gb Enhanced Gen5 FC Single-port HBA	Gen3 x8	10	1-12

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters category:  
<https://lenovopress.com/servers/options/hba>

## SAS adapters for external storage

The following table lists SAS HBAs and RAID adapters supported by SR665 V3 server for use with external storage.

**No Windows 10/11 support:** None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 67. Adapters for external storage

Part number	Feature code	Description	PCIe lanes	Max qty	Slots supported
<b>SAS HBAs</b>					
4Y37A78837	BNWK	ThinkSystem 440-8e SAS/SATA PCIe Gen4 12Gb HBA	Gen4 x8	8	1 - 8,11,12**
4Y37A09724	B8P7	ThinkSystem 440-16e SAS/SATA PCIe Gen4 12Gb HBA	Gen4 x8	8	1 - 8,11,12**
<b>External RAID adapters</b>					
4Y37A78836	BNWJ	ThinkSystem RAID 940-8e 4GB Flash PCIe Gen4 12Gb Adapter	Gen4 x8	4	1 - 8,11,12**

\* See below regarding supercap requirements

\*\* When Riser 3 is full-height slots, slots 1-8 are supported; when Riser 3 is configured as low-profile slots, 8 & 10 are supported, but 7 & 9 are not.

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

<https://lenovopress.lenovo.com/lp1288#sr665-v3-support=SR665%2520V3&internal-or-external-ports=External>

The RAID 940-8e adapter uses a flash power module (supercap), which can be installed in one of up to 4 locations in the server depending on the server configuration. See the [RAID flash power module \(supercap\) support](#) section for details. The number of 940-8e RAID adapters supported is based on how many supercaps can be installed in the server. If an internal RAID adapter with flash power modules is installed, the maximum number of 940-8e adapters supported is reduced by 1.

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters and RAID adapters categories:

<https://lenovopress.com/servers/options/hba>  
<https://lenovopress.com/servers/options/raid>

## Flash storage adapters

The SR665 V3 currently does not support PCIe Flash Storage adapters.

## GPU adapters

This section describes the supported GPUs.

- [GPU part numbers](#)
- [Riser selections for double-wide GPUs](#)
- [GPU Enablement Kit](#)
- [GPU cable kits](#)

## GPU part numbers

The SR665 V3 supports the following graphics processing units (GPUs).

Table 68. Supported GPUs

Part number	Feature code	Description	TDP	Aux power	PCIe lanes	Max qty	Slots supported	Windows 10/11 support
<b>Double-wide GPUs</b>								
4X67A90669	BYFH	ThinkSystem NVIDIA L40S 48GB PCIe Gen4 Passive GPU	350W	Yes	Gen4 x16	3	2, 5, 7	Supported
4X67A84823	BT87	ThinkSystem NVIDIA L40 48GB PCIe Gen4 Passive GPU	300W	Yes	Gen4 x16	3	2, 5, 7	Supported
4X67A81102	BP04	ThinkSystem AMD Instinct MI210 PCIe Gen4 Passive Accelerator	300W	Yes	Gen4 x16	3	2, 5, 7	No
4X67A82257	BR9U	ThinkSystem NVIDIA H100 80GB PCIe Gen5 Passive GPU	350W	Yes	Gen5 x16	3	2, 5, 7	No
4X67A76715	BLK1	ThinkSystem NVIDIA A100 80GB PCIe Gen4 Passive GPU	300W	Yes	Gen4 x16	3	2, 5, 7	No
CTO only	BQZP	ThinkSystem NVIDIA A100 80GB PCIe Gen4 Passive GPU w/o CEC	300W	Yes	Gen4 x16	3	2, 5, 7	No
4X67A72593	BQZQ	ThinkSystem NVIDIA A40 48GB PCIe Gen4 Passive GPU w/o CEC	300W	Yes	Gen4 x16	3	2, 5, 7	Supported
4X67A76581	BJHG	ThinkSystem NVIDIA A30 24GB PCIe Gen4 Passive GPU	165W	Yes	Gen4 x16	3	2, 5, 7	Supported
CTO only	BQZR	ThinkSystem NVIDIA A30 24GB PCIe Gen4 Passive GPU w/o CEC	165W	Yes	Gen4 x16	3	2, 5, 7	Supported
4X67A76727	BQZU	ThinkSystem NVIDIA A16 64GB Gen4 PCIe Passive GPU w/o CEC	250W	Yes	Gen4 x16	3	2, 5, 7	Supported
4X67A71310	BFT0	ThinkSystem NVIDIA RTX A6000 48GB PCIe Active GPU	300W	Yes	Gen4 x16	3	2, 5, 7	Supported
4X67A76726	BNFD	ThinkSystem NVIDIA RTX A4500 20GB PCIe Active GPU	200W	Yes	Gen4 x16	3	2, 5, 7	Supported
4X67A76720	BMT9	ThinkSystem NVIDIA RTX A2000 12GB PCIe Active GPU	70W	Yes	Gen4 x16	3	2, 5, 7	Supported
<b>Single-wide GPUs</b>								
4X67A81547	BP05	ThinkSystem NVIDIA A2 16GB PCIe Gen4 Passive GPU	60W	No	Gen4 x8	8	1 - 8	Supported
CTO only	BQZT	ThinkSystem NVIDIA A2 16GB PCIe Gen4 Passive GPU w/o CEC	60W	No	Gen4 x8	8	1 - 8	Supported

\* When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available

For information about these GPUs, see the ThinkSystem GPU Summary, available at: <https://lenovopress.com/lp0768-thinksystem-thinkagile-gpu-summary>

For CTO orders, the SR665 V3 also supports the selection of a placeholder for a GPU. This selection results in a "GPU ready" configuration which ensures that the server ships with the components needed for GPU installation (GPU power cables, air ducts, power supplies, fans, etc) without actually including the GPUs themselves. The following table lists the ordering information for CTO orders.

Table 69. GPU-Ready configurations - ordering information

Part number	Feature code	Description
CTO only	BW40	ThinkSystem NVIDIA A4500 GPU-Ready Installation
CTO only	BVLL	ThinkSystem NVIDIA H100 GPU-Ready Installation
CTO only	BW3Z	ThinkSystem NVIDIA L40 GPU-Ready Installation
CTO only	BZUS	ThinkSystem NVIDIA L40S GPU-Ready Installation
CTO only	BP4X	ThinkSystem DW GPU-Ready Installation (for all other supported DW GPUs)

### Configuration rules

The following configuration requirements must be met when installing GPUs:

- Some NVIDIA A Series GPUs are available as two feature codes, one with a CEC chip and one without a CEC chip (ones without the CEC chip have "w/o CEC" in the name). The CEC is a secondary Hardware Root of Trust (RoT) module that provides an additional layer of security, which can be used by customers who have high regulatory requirements or high security standards. NVIDIA uses a multi-layered security model and hence the protection offered by the primary Root of Trust embedded in the GPU is expected to be sufficient for most customers. The CEC defeatured products still offer Secure Boot, Secure Firmware Update, Firmware Rollback Protection, and In-Band Firmware Update Disable. Specifically, without the CEC chip, the GPU does not support Key Revocation or Firmware Attestation. CEC and non-CEC GPUs of the same type of GPU can be mixed in field upgrades.
- All GPUs installed must be identical
- When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available
- Flash storage adapters are not supported.
- Middle drive bays and Rear drive bays are not supported
- For details regarding supported combinations of front drive bays, processors, fans, and ambient temperature, see the Thermal Rules page of the User Guide:  
[https://pubs.lenovo.com/sr665-v3/thermal\\_rules#gpu-configurations](https://pubs.lenovo.com/sr665-v3/thermal_rules#gpu-configurations)

### Riser selections for double-wide GPUs

When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available. The riser cards listed in the following table are used with double-wide GPUs.

Table 70. Risers needed for double-wide GPUs

Riser	Part number	Feature code	Description
Riser 1 (GPU in slot 2) - PCIe Gen5	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2
Riser 1 (GPU in slot 2) - PCIe Gen4	4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2
Riser 2 (GPU in slot 5) - PCIe Gen5	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2
Riser 2 (GPU in slot 5) - PCIe Gen4	4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2
Riser 3 (GPU in slot 7) - PCIe Gen5	4XH7A85887	BLL9	ThinkSystem V3 2U x16/x16 PCIe Gen5 Riser3 Kit
Riser 3 (GPU in slot 7) - PCIe Gen4	4XH7A85885	BPKG	ThinkSystem V3 2U x16/x16 PCIe Gen4 Riser3 Kit with Cage

### GPU Enablement Kit

When installing any full-length GPU as a field upgrade, you will also need to order the GPU Enablement Kit as listed in the following table. This kit is not required for the NVIDIA A2 GPU.

Table 71. ThinkSystem SR665 V3 GPU Full Length Thermal Option Kit

Part number	Description	Maximum supported
4X67A85856	<p>ThinkSystem SR665 V3 GPU Full Length Thermal Option Kit</p> <ul style="list-style-type: none"> <li>• 2x 1U processor performance heatsinks - replace existing 2U heatsinks (SBB7A54175)</li> <li>• 1x ThinkSystem 2U GPU air duct - replaces main air baffle (SBB7A54054)</li> <li>• 3x GPU extend air ducts - needed in a zone if an A10 or other single-wide GPU &gt; 75W is installed in the upper slot (SBB7A43702)</li> <li>• 3x Air duct fillers - needed in each riser zone if no GPU is installed in that zone (SBB7A54052)</li> <li>• 3x 8-pin GPU power cables for double-wide GPUs (SBB7A49792)</li> <li>• 3x 16-pin GPU power cables for double-wide GPUs (SBB7A66338)</li> <li>• 3x GPU power cables for GPUs such as A4500 (SBB7A44786)</li> <li>• 3x GPU power Y-cables when 2x single-wide GPUs installed on one riser (SBB7A23757)</li> </ul>	1

The following figure shows the GPU air duct with GPU air duct fillers and GPU extend air ducts installed. Note that the drawings might not 100% reflect the shipping components.

Figure 19. SR665 V3 GPU air duct

### GPU cable kits

The following cable kits are offered to provide auxiliary power cables for GPUs that require one. See the [Supported GPUs table](#) to see which GPUs require an auxiliary power cable.

Configuration notes:

- This cable kits are only required for field upgrades; factory (CTO) orders will automatically include any required cables.
- For double-wide GPUs, The DW (double-wide) cable kit is only required if you are adding *additional* double-wide GPUs to a server that already has a DW GPU installed from a CTO order. If you are doing a field upgrade to install the *first* DW GPU to a server, order the ThinkSystem SR665 V3 GPU Full Length Thermal Option Kit, 4X67A85856 instead, since the Enablement Kit includes the necessary power cables.
- The SW (single-wide) cable kit is required if you are doing any field upgrades to add a single-wide GPU that requires an auxiliary power cable (GPU power > 75 W), however, all currently supported GPUs do *not* require auxiliary power cables.

Table 72. GPU cable kits

Part number	Description
4X97A86165	ThinkSystem SR665 V3/SR655 V3 DW GPU Cable Option Kit <ul style="list-style-type: none"> <li>• 3x GPU power cable for H100, L40, L40S GPUs (SBB7A66338)</li> <li>• 3x GPU power cables RTX A4500 (SBB7A44786)</li> <li>• 3x GPU power cables for all other double-wide GPUs (SBB7A49792)</li> </ul>
4X97A86166	ThinkSystem SR665 V3/SR655 V3 SW GPU Cable Option Kit <ul style="list-style-type: none"> <li>• 3x Power cables for SW GPUs and the RTX A4500 (SBB7A44786)</li> <li>• 3x Power Y-cable when 2x single-wide GPUs installed on one riser (SBB7A23757)</li> </ul>

## Cooling

The SR665 V3 server has up to six 60 mm hot-swap variable-speed fans. Five fans are needed when one processor is installed and six fans are required when two processors are installed. The server offers N+1 redundancy. The server also has one or two additional fans integrated in each of the two power supplies.

Depending on the configuration, the server will need either Standard fans (single-rotor 17K RPM) or Performance fans (dual-rotor 21K RPM).

Under all of the following conditions, standard fans can be used:

- CPUs have a TDP < 240W
- No GPUs
- No Mellanox ConnectX-6 or ConnectX-7 adapters
- No Broadcom 57454 10GBASE-T 4-port OCP adapter
- No 3DS RDIMMs
- No front 12x 3.5-inch drive bays
- No mid-chassis drive bays
- No rear drive bays

If any conditions are not met, Performance fans are required.

Ordering information for the fans is listed in the following table.

Table 73. Fan ordering information

Part number	Feature code	Description	Quantity required
4F17A14497	BH8F	ThinkSystem V3 2U Standard Fan Option Kit	1x CPU: 5 2x CPUs: 6
4F17A82884	BLL6	ThinkSystem V3 2U Performance Fan Option Kit	1x CPU: 5 2x CPUs: 6

## Power supplies

The SR665 V3 supports up to two redundant hot-swap power supplies.

The power supply choices are listed in the following table. Both power supplies used in server must be identical.

**Tip:** When configuring a server in the DCSC configurator, power consumption is calculated precisely by interfacing with Lenovo Capacity Planner. You can therefore select the appropriate power supply for your configuration. However, do consider future upgrades that may require additional power needs.

Table 74. Power supply options

Part number	Feature code	Description	Connector	Max quantity	110V AC	220V AC	240V DC PRC only	-48V DC
<b>AC input power - 80 PLUS Titanium efficiency</b>								
4P57A82019	BR1X	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v3	C13	2	No	Yes	Yes	No
CTO only	C07V	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v4	C13	2	No	Yes	Yes	No
4P57A72666	BLKH	ThinkSystem 1100W 230V Titanium Hot-Swap Gen2 Power Supply	C13	2	No	Yes	Yes	No
4P57A78359	BPK9	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply	C13	2	No	Yes	Yes	No
4P57A72667	BKTJ	ThinkSystem 2600W 230V Titanium Hot-Swap Gen2 Power Supply	C19	2	No	Yes	Yes	No
<b>AC input power - 80 PLUS Platinum efficiency</b>								
4P57A72670	BNFG	ThinkSystem 750W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	C13	2	Yes	Yes	Yes	No
4P57A72671	BNFH	ThinkSystem 1100W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	C13	2	Yes	Yes	Yes	No
4P57A26294	BMUF	ThinkSystem 1800W 230V Platinum Hot-Swap Gen2 Power Supply v2	C13	2	No	Yes	Yes	No
4P57A26295	B962	ThinkSystem 2400W 230V Platinum Hot-Swap Gen2 Power Supply	C19	2	No	Yes	Yes	No
<b>-48V DC input power</b>								
4P57A26296	B8QE	ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply	DC	2	No	No	No	Yes

Supported power supplies are auto-sensing dual-voltage units, supporting both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. For China customers, all power supplies support 240V DC.

AC power supplies up to 1800W have a C14 connector. AC power supplies 2400W and above have a C19 connector.

The supported -48V DC power supply has a Weidmuller TOP 4GS/3 7.6 terminal as shown in the following figure.

Figure 20. Connector on the ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply

Power supply options do not include a line cord. For server configurations, the inclusion of a power cord is model dependent. Configure-to-order models can be configured without power cords if desired.

### Power supply LEDs

The supported hot-swap power supplies have the following LEDs:

- Power input LED:
  - Green: The power supply is connected to the AC power source
  - Off: The power supply is disconnected from the AC power source or a power problem has occurred
- Power output LED:
  - Green: The server is on and the power supply is working normally
  - Blinking green: The power supply is in Zero-output/Standby mode (see below)
  - Off: The server is powered off, or the power supply is not working properly
- Power supply error LED:
  - Off: The power supply is working normally
  - Yellow: The power supply has failed

**Zero-output mode:** When Zero-output mode (also known as Standby mode or Cold Redundancy mode) is configured in XCC and the server power load is sufficiently low, one of the installed power supplies enters into the Standby state while the other one delivers entire load. When the power load increases, the standby power supply will switch to Active state to provide sufficient power to the server. Zero-output mode can be enabled or disabled in the XClarity Controller web interface, Server Configuration > Power Policy. If you select Disable, then both power supplies will be in the Active state.

## Power cords

Line cords and rack power cables with C13 connectors can be ordered as listed in the following table.

**110V customers:** If you plan to use the 1100W power supply with a 110V power source, select a power cable that is rated above 10A. Power cables that are rated at 10A or below are not supported with 110V power.

Table 75. Power cords

#### **-48V DC power cord**

For the -48V DC Power Supply, the following power cable is supported.

Table 77. -48V DC power cable

Part number	Feature code	Description
4X97A59831	BE4V	2.5m, -48VDC Interconnecting Cable

## Systems management

The SR665 V3 contains an integrated service processor, XClarity Controller 2 (XCC), which provides advanced control, monitoring, and alerting functions. The XCC2 is based on the AST2600 baseboard management controller (BMC) using a dual-core ARM Cortex A7 32-bit RISC service processor running at 1.2 GHz.

Topics in this section:

- [System I/O Board](#)
- [Local management](#)
- [System status with XClarity Mobile](#)
- [Remote management](#)
- [XCC2 Platinum](#)
- [Lenovo XClarity Provisioning Manager](#)
- [Lenovo XClarity Administrator](#)
- [Lenovo XClarity Integrators](#)
- [Lenovo XClarity Essentials](#)
- [Lenovo XClarity Energy Manager](#)
- [Lenovo Capacity Planner](#)

## System I/O Board

The SR665 V3 implements a separate System I/O Board that connects to the Processor Board. The location of the System I/O Board is shown in the [Components and connectors](#) section. The System I/O Board contains all the connectors visible at the rear of the server as shown in the following figure.

Figure 21. System I/O Board

The board also has the following components:

- XClarity Controller 2, implemented using the ASPEED AST2600 baseboard management controller (BMC).
- Root of Trust (RoT) module - a daughter card that implements Platform Firmware Resiliency (PFR)

hardware Root of Trust (RoT) which enables the server to be NIST SP800-193 compliant. For more details about PFR, see the [Security](#) section.

- Connector to enable an additional redundant Ethernet connection to the XCC2 controller. The connector is used in conjunction with the ThinkSystem V3 Management NIC Adapter Kit (4XC7A85319). For details, see the [Remote management](#) section.
- Internal USB port - to allow the booting of an operating system from a USB key. The VMware ESXi preloads use this port for example. Preloads are described in the [Operating system support](#) section.
- MicroSD card port to enable the use of a MicroSD card for additional storage for use with the XCC2 controller. XCC2 can use the storage as a Remote Disc on Card (RDOC) device (up to 4GB of storage). It can also be used to store firmware updates (including N-1 firmware history) for ease of deployment.

**Tip:** Without a MicroSD card installed, the XCC2 controller will have 100MB of available RDOC storage.

Ordering information for the supported USB drive and Micro SD card are listed in the following table.

Table 78. Media for use with the System I/O Board

Part number	Feature code	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive
4X77A77064	BNWP	ThinkSystem MicroSD 32GB Class 10 Flash Memory Card
4X77A92672	C0BC	ThinkSystem MicroSD 64GB Class 10 Flash Memory Card

## Local management

The SR665 V3 offers a front operator panel with key LED status indicators, as shown in the following figure.

**Tip:** The Network LED only shows network activity of the installed OCP network adapter.

Figure 22. Front operator controls are on the left and right side of the server

## Light path diagnostics

The server offers light path diagnostics. If an environmental condition exceeds a threshold or if a system component fails, XCC lights LEDs inside the server to help you diagnose the problem and find the failing part. The server has fault LEDs next to the following components:

- Each memory DIMM
- Each drive bay
- Each power supply

### Front VGA and External Diagnostics ports

The VGA port at the rear of the server is included in all models, however the VGA port at the front of the server is optional. Also optional is the External Diagnostics port which enables the use of the External Diagnostics Handset.

To configure either the VGA port or the External Diagnostics port at the front of the server, select one of the following feature codes when configuring the server.

Table 79. Front VGA port

Part number	Feature code	Description	Front VGA port	External diagnostics port
CTO only	BQQ2	ThinkSystem 2U V3 EIA Latch Standard	No	No
4XH7A86164	BQQ1	ThinkSystem 2U V3 EIA Latch with VGA & External Diagnostics Ports	Included	Included
4XH7A86816	BQQ4	ThinkSystem 2U V3 EIA Latch with External Diagnostics Port	No	Included
4XH7A86817	BQQ3	ThinkSystem 2U V3 EIA Latch with VGA Port	Included	No

### External Diagnostics Handset

The SR665 V3 optionally has a port to connect an External Diagnostics Handset as described in the preceding section. The External Diagnostics Handset has the same functions as the Integrated Diagnostics Panel but has the advantages of not consuming space on the front of the server plus it can be shared among many servers in your data center. The handset has a magnet on the back of it to allow you to easily mount it on a convenient place on any rack cabinet.

Figure 23. External Diagnostics Handset

Ordering information for the External Diagnostics Handset with is listed in the following table.

Table 80. External Diagnostics Handset ordering information

Part number	Feature code	Description
4TA7A64874	BEUX	ThinkSystem External Diagnostics Handset

**Integrated Diagnostics Panel for 8x 2.5-inch and 16x 2.5-inch drive bay configurations**

For configurations with 8x 2.5-inch or 16x 2.5-inch drive bays at the front, the server can optionally be configured to have a pull-out Integrated Diagnostics Panel. The following figure shows the standard (fixed) operator panel and the optional Integrated Diagnostics Panel.

Figure 24. Operator panel choices for the 8x 2.5-inch drive bay configuration

The Integrated Diagnostics Panel allows quick access to system status, firmware, network, and health information. The LCD display on the panel and the function buttons give you access to the following information:

- Active alerts
- Status Dashboard
- System VPD: machine type & mode, serial number, UUID string
- System firmware levels: UEFI and XCC firmware
- XCC network information: hostname, MAC address, IP address, DNS addresses
- Environmental data: Ambient temperature, CPU temperature, AC input voltage, estimated power consumption
- Active XCC sessions
- System reset action

The Integrated Diagnostics Panel can be configured as listed in the following table. It is only available configure-to-order (CTO); not available as a field upgrade.

Table 81. Ordering information for the Integrated Diagnostics Panel

Part number	Feature code	Description
CTO only	BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2

### Information pull-out tab

The front of the server also houses an information pull-out tab (also known as the network access tag). See [Figure 2](#) for the location. A label on the tab shows the network information (MAC address and other data) to remotely access the service processor.

### System status with XClarity Mobile

The XClarity Mobile app includes a tethering function where you can connect your Android or iOS device to the server via USB to see the status of the server.

The steps to connect the mobile device are as follows:

1. Enable USB Management on the server, by holding down the ID button for 3 seconds (or pressing the dedicated USB management button if one is present)
2. Connect the mobile device via a USB cable to the server's USB port with the management symbol 
3. In iOS or Android settings, enable Personal Hotspot or USB Tethering
4. Launch the Lenovo XClarity Mobile app

Once connected you can see the following information:

- Server status including error logs (read only, no login required)
- Server management functions (XClarity login credentials required)

### Remote management

The server offers a dedicated RJ45 port at the rear of the server for remote management via the XClarity Controller management processor. The port supports 10/100/1000 Mbps speeds.

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (no SET commands; no SNMP v1)

- Common Information Model (CIM-XML)
- Representational State Transfer (REST) support
- Redfish support (DMTF compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for device being used - laptop, tablet, phone) with NLS support

The SR665 V3 also supports the use of an OCP adapter that provides an additional redundant Ethernet connection to the XCC2 controller. Ordering information is listed in the following table.

Table 82. Redundant System Management Port Adapter

Part number	Feature code	Description	Maximum quantity
4XC7A85319	BTMQ	ThinkSystem V3 Management NIC Adapter Kit	1

The use of this adapter allows concurrent remote access using both the connection on the adapter and the onboard RJ45 remote management port provided by the server. The adapter and onboard port have separate IP addresses.

Configuration rules:

- The Redundant System Management Port Adapter is installed in the OCP adapter slot at the rear of the server and is mutually exclusive with any OCP network adapter.
- It is not supported installed in the front OCP slot (if the front OCP slot is configured)
- If the Redundant System Management Port Adapter is installed in the rear slot, then the front OCP slot (if configured) cannot be used.

The following figure shows the server with the Redundant System Management Port Adapter installed in the OCP slot.

Figure 25. SR665 V3 with the Redundant System Management Port Adapter installed

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 83. IPMI-over-LAN settings

Feature code	Description
B7XZ	Disable IPMI-over-LAN (default)
B7Y0	Enable IPMI-over-LAN

## XCC2 Platinum

The XCC2 service processor in the SR665 V3 supports an upgrade to the Platinum level of features. Compared to the XCC functions of ThinkSystem V2 and earlier systems, Platinum adds the same features as Enterprise and Advanced levels in ThinkSystem V2, plus additional features.

XCC2 Platinum adds the following Enterprise and Advanced functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- International keyboard mapping support
- Syslog alerting
- Redirecting serial console via SSH
- Component replacement log (Maintenance History log)
- Access restriction (IP address blocking)
- Lenovo SED security key management
- Displaying graphics for real-time and historical power usage data and temperature
- Boot video capture and crash video capture
- Virtual console collaboration - Ability for up to 6 remote users to be log into the remote session simultaneously
- Remote console Java client
- Mapping the ISO and image files located on the local client as virtual drives for use by the server
- Mounting the remote ISO and image files via HTTPS, SFTP, CIFS, and NFS
- System utilization data and graphic view
- Single sign on with Lenovo XClarity Administrator
- Update firmware from a repository
- License for XClarity Energy Manager

**Note:** The SR665 V3 does not support Power capping.

XCC2 Platinum also adds the following features that are new to XCC2:

- System Guard - Monitor hardware inventory for unexpected component changes, and simply log the event or prevent booting
- Enterprise Strict Security mode - Enforces CNSA 1.0 level security
- Neighbor Group - Enables administrators to manage and synchronize configurations and firmware level across multiple servers

Ordering information is listed in the following table. XCC2 Platinum is a software license upgrade - no additional hardware is required.

Table 84. XCC2 Platinum license upgrade

Part number	Feature code	Description
7S0X000KWW	SBCV	Lenovo XClarity Controller 2 (XCC2) Platinum Upgrade

With XCC2 Platinum, for CTO orders, you can request that System Guard be enabled in the factory and the first configuration snapshot be recorded. To add this to an order, select feature code listed in the following table. The selection is made in the Security tab of the DCSC configurator.

Table 85. Enable System Guard in the factory (CTO orders)

Feature code	Description
BUT2	Install System Guard

For more information about System Guard, see [https://pubs.lenovo.com/xcc2/NN1ia\\_c\\_systemguard](https://pubs.lenovo.com/xcc2/NN1ia_c_systemguard)

### Lenovo XClarity Provisioning Manager

Lenovo XClarity Provisioning Manager (LXPM) is a UEFI-based application embedded in ThinkSystem servers and accessible via the F1 key during system boot.

LXPM provides the following functions:

- Graphical UEFI Setup
- System inventory information and VPD update
- System firmware updates (UEFI and XCC)
- RAID setup wizard
- OS installation wizard (including unattended OS installation)
- Diagnostics functions

### Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions. It provides agent-free hardware management for ThinkSystem servers, in addition to ThinkServer, System x, and Flex System servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Because Lenovo XClarity Administrator does not require any agent software to be installed on the managed endpoints, there are no CPU cycles spent on agent execution, and no memory is used, which means that up to 1GB of RAM and 1 - 2% CPU usage is saved, compared to a typical managed system where an agent is required.

Lenovo XClarity Administrator is an optional software component for the SR665 V3. The software can be downloaded and used at no charge to discover and monitor the SR665 V3 and to manage firmware upgrades.

If software support is required for Lenovo XClarity Administrator, or premium features such as configuration management and operating system deployment are required, Lenovo XClarity Pro software subscription should be ordered. Lenovo XClarity Pro is licensed on a per managed system basis, that is, each managed Lenovo system requires a license.

The following table lists the Lenovo XClarity software license options.

Table 86. Lenovo XClarity Pro ordering information

Part number	Feature code	Description
00MT201	1339	Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S
00MT202	1340	Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S
00MT203	1341	Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S
7S0X000HWW	SAYV	Lenovo XClarity Pro, per Managed Endpoint w/6 Yr SW S&S
7S0X000JWW	SAYW	Lenovo XClarity Pro, per Managed Endpoint w/7 Yr SW S&S

Lenovo XClarity Administrator offers the following standard features that are available at no charge:

- Auto-discovery and monitoring of Lenovo systems
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-2 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting with Windows PowerShell, providing command-line visibility and control over hardware resources

Lenovo XClarity Administrator offers the following premium features that require an optional Pro license:

- Pattern-based configuration management that allows to define configurations once and apply repeatedly without errors when deploying new servers or redeploying existing servers without disrupting the fabric
- Bare-metal deployment of operating systems and hypervisors to streamline infrastructure provisioning

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

### Lenovo XClarity Integrators

Lenovo also offers software plug-in modules, Lenovo XClarity Integrators, to manage physical infrastructure from leading external virtualization management software tools including those from Microsoft and VMware.

These integrators are offered at no charge, however if software support is required, a Lenovo XClarity Pro software subscription license should be ordered.

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates and configuration patterns to Lenovo x86 rack servers and Flex System from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware failures are predicted

For more information about all the available Lenovo XClarity Integrators, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

## Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- **Lenovo Essentials OneCLI**  
OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and operating systems. It provides functions to collect full system health information (including health status), configure system settings, and update system firmware and drivers.
- **Lenovo Essentials UpdateXpress**  
The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.
- **Lenovo Essentials Bootable Media Creator**  
The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page: <http://support.lenovo.com/us/en/documents/LNVO-center>

## Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager (LXEM) is a power and temperature management solution for data centers. It is an agent-free, web-based console that enables you to monitor and manage power consumption and temperature in your data center through the management console. It enables server density and data center capacity to be increased through the use of power capping.

LXEM is a licensed product. A single-node LXEM license is included with the XClarity Controller Platinum upgrade as described in the [XCC2 Platinum](#) section. If your server does not have the XCC Platinum upgrade, Energy Manager licenses can be ordered as shown in the following table.

Table 87. Lenovo XClarity Energy Manager

Part number	Description
4L40E51621	Lenovo XClarity Energy Manager Node License (1 license needed per server)

**Note:** The SR665 V3 does not support the following Energy Manager functions:

- Power capping
- Policy-based management

For more information about XClarity Energy Manager, see the following resources:

- Lenovo Support page:  
<https://datacentersupport.lenovo.com/us/en/solutions/Invo-lxem>
- User Guide for XClarity Energy Manager:  
<https://pubs.lenovo.com/lxem/>

## Lenovo Capacity Planner

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:  
<http://datacentersupport.lenovo.com/us/en/solutions/Invo-lcp>

## Security

Topics in this section:

- [Security features](#)
- [Platform Firmware Resiliency - Lenovo ThinkShield](#)
- [Security standards](#)

### Security features

The SR665 V3 server offers the following electronic security features:

- Secure Boot function of the AMD EPYC processor
- Support for Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) - see the [Platform Firmware Resiliency](#) section
- Firmware signature processes compliant with FIPS and NIST requirements
- System Guard (part of [XCC Platinum](#)) - Proactive monitoring of hardware inventory for unexpected component changes
- Administrator and power-on password
- Integrated Trusted Platform Module (TPM) supporting TPM 2.0
- Self-encrypting drives (SEDs) with support for enterprise key managers - see the [SED encryption key management](#) section

The server is NIST SP 800-147B compliant.

The SR665 V3 server also offers the following physical security features:

- Optional chassis intrusion switch
- Optional lockable front security bezel

The optional lockable front security bezel is shown in the following figure and includes a key that enables you to secure the bezel over the drives and system controls thereby reducing the chance of unauthorized or accidental access to the server.

**Front PCIe slots:** The use of the security bezel is not supported when the server has front PCIe slots.

Figure 26. Lockable front security bezel

The dimensions of the security bezel are:

- Width: 437 mm (17.2 in.)
- Height: 87 mm (3.4 in.)
- Width: 23 mm (0.9 in.)

The following table lists the security options for the SR665 V3.

Table 88. Security features

Part number	Feature code	Description
4X97A90518	BVGB	ThinkSystem SR665 V3 Intrusion Cable
4XH7A09886	B8M2	ThinkSystem V2 2U Security Bezel Option Kit
4XH7A90300	BXBQ	ThinkSystem V3 2U Security Bezel Option Kit

**Tip:** The only difference between security bezels 4XH7A09886 and 4XH7A90300 is the Lenovo logo: On 4XH7A09886, the logo is made from plastic; on 4XH7A90300, the logo is made from aluminum alloy.

### Platform Firmware Resiliency - Lenovo ThinkShield

Lenovo's ThinkShield Security is a transparent and comprehensive approach to security that extends to all dimensions of our data center products: from development, to supply chain, and through the entire product lifecycle.

The ThinkSystem SR665 V3 includes Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the system to be NIST SP800-193 compliant. This offering further enhances key platform subsystem protections against unauthorized firmware updates and corruption, to restore firmware to an integral state, and to closely monitor firmware for possible compromise from cyber-attacks.

PFR operates upon the following server components:

- UEFI image – the low-level server firmware that connects the operating system to the server hardware
- XCC image – the management “engine” software that controls and reports on the server status separate from the server operating system
- FPGA image – the code that runs the server’s lowest level hardware controller on the motherboard

The Lenovo Platform Root of Trust Hardware performs the following three main functions:

- Detection – Measures the firmware and updates for authenticity
- Recovery – Recovers a corrupted image to a known-safe image
- Protection – Monitors the system to ensure the known-good firmware is not maliciously written

These enhanced protection capabilities are implemented using a dedicated, discrete security processor whose implementation has been rigorously validated by leading third-party security firms. Security evaluation results and design details are available for customer review – providing unprecedented transparency and assurance.

The SR665 V3 includes support for Secure Boot, a UEFI firmware security feature developed by the UEFI Consortium that ensures only immutable and signed software are loaded during the boot time. The use of Secure Boot helps prevent malicious code from being loaded and helps prevent attacks, such as the installation of rootkits. Lenovo offers the capability to enable secure boot in the factory, to ensure end-to-end protection. Alternatively, Secure Boot can be left disabled in the factory, allowing the customer to enable it themselves at a later point, if desired.

The following table lists the relevant feature code(s).

Table 89. Secure Boot options

Part number	Feature code	Description	Purpose
CTO only	BPKQ	TPM 2.0 with Secure Boot	Configure the system in the factory with Secure Boot enabled.
CTO only	BPKR	TPM 2.0	Configure the system without Secure Boot enabled. Customers can enable Secure Boot later if desired.

**Tip:** If Secure Boot is not enabled in the factory, it can be enabled later by the customer. However once Secure Boot is enabled, it cannot be disabled.

## Security standards

The SR665 V3 supports the following security standards and capabilities:

- **Industry Standard Security Capabilities**
  - AMD CPU Enablement
    - AES-NI (Advanced Encryption Standard New Instructions)
    - GMET (Guest Mode Execute Trap)
    - Hardware-based side channel attack resilience enhancements
    - NX (No eXecute)
    - PSB (Platform Secure Boot)
    - Shadow Stack
    - SEV (Secure Encrypted Virtualization)
    - SEV-ES (Encrypted State register encryption)
    - SEV-SNP (Secure Nested Paging)
    - SVM (Secure Virtual Machine)
    - SME (Secure Memory Encryption)
    - UMIP (User Mode Instruction Prevention)
  - Microsoft Windows Security Enablement
    - Credential Guard
    - Device Guard
    - Host Guardian Service
  - TCG (Trusted Computing Group) TPM (Trusted Platform Module) 2.0
  - UEFI (Unified Extensible Firmware Interface) Forum Secure Boot
- **Hardware Root of Trust and Security**
  - Independent security subsystem providing platform-wide NIST SP800-193 compliant Platform Firmware Resilience (PFR)

- Host domain RoT supplemented by AMD Platform Secure Boot (PSB)
- Management domain RoT supplemented by the Secure Boot features of XCC
- **Platform Security**
  - Boot and run-time firmware integrity monitoring with rollback to known-good firmware (e.g., “self-healing”)
  - Non-volatile storage bus security monitoring and filtering
  - Resilient firmware implementation, such as to detect and defeat unauthorized flash writes or SMM (System Management Mode) memory incursions
  - Patented IPMI KCS channel privileged access authorization (USPTO Patent# 11,256,810)
  - Host and management domain authorization, including integration with CyberArk for enterprise password management
  - KMIP (Key Management Interoperability Protocol) compliant, including support for IBM SKLM and Thales KeySecure
  - Reduced “out of box” attack surface
  - Configurable network services
  - FIPS 140-3 (in progress) validated cryptography for XCC
  - CNSA Suite 1.0 Quantum-resistant cryptography for XCC
  - Lenovo System Guard

For more information on platform security, see the paper “How to Harden the Security of your ThinkSystem Server and Management Applications” available from <https://lenovopress.com/lp1260-how-to-harden-the-security-of-your-thinksystem-server>.

- **Standards Compliance and/or Support**
  - NIST SP800-131A rev 2 “Transitioning the Use of Cryptographic Algorithms and Key Lengths”
  - NIST SP800-147B “BIOS Protection Guidelines for Servers”
  - NIST SP800-193 “Platform Firmware Resiliency Guidelines”
  - ISO/IEC 11889 “Trusted Platform Module Library”
  - Common Criteria TCG Protection Profile for “PC Client Specific TPM 2.0”
  - European Union Commission Regulation 2019/424 (“ErP Lot 9”) “Ecodesign Requirements for Servers and Data Storage Products” Secure Data Deletion
  - Optional FIPS 140-2 validated Self-Encrypting Disks (SEDs) with external KMIP-based key management
- **Product and Supply Chain Security**
  - Suppliers validated through Lenovo’s Trusted Supplier Program
  - Developed in accordance with Lenovo’s Secure Development Lifecycle (LSDL)
  - Continuous firmware security validation through automated testing, including static code analysis, dynamic network and web vulnerability testing, software composition analysis, and subsystem-specific testing, such as UEFI security configuration validation
  - Ongoing security reviews by US-based security experts, with attestation letters available from our third-party security partners
  - Digitally signed firmware, stored and built on US-based infrastructure and signed on US-based Hardware Security Modules (HSMs)
  - TAA (Trade Agreements Act) compliant manufacturing, by default in Mexico for North American markets with additional US and EU manufacturing options
  - US 2019 NDAA (National Defense Authorization Act) Section 889 compliant

## Rack installation

The following table lists the rack installation options that are available for the SR665 V3.

Table 90. Rack installation options

Part number	Feature	Description
Rail Kits		
4M17A13564	BK7W	ThinkSystem Toolless Friction Rail v2
4M17A11754	B8LA	ThinkSystem Toolless Slide Rail Kit v2
4M17A11756	B91Y	ThinkSystem Toolless Slide Rail Kit v2 with 2U CMA
Enhanced Rail Kits for > 34 kg server weight*		
4M17A11755	B8LB	ThinkSystem Toolless Slide Rail Kit v2 Enhanced
4M17A11757	B97N	ThinkSystem Toolless Slide Rail Kit v2 Enhanced with 2U CMA
Separate Cable Management Arm		
7M27A05698	B135	ThinkSystem 2U CMA Upgrade Kit for Toolless Slide Rail

\* The Enhanced Slide Rail Kits are used when the server is shipped in a rack and the server is 34 kg or heavier (configuration with 20x 3.5-inch HDDs for example)

The following table summarizes the rail kit features and specifications.

Table 91. Rail kit features and specifications summary

Feature	ThinkSystem Toolless Friction Rail v2	ThinkSystem Toolless Slide Rail Kit v2	ThinkSystem Toolless Slide Rail Kit v2 Enhanced	ThinkSystem Toolless Slide Rail Kit v2 with 2U CMA	ThinkSystem Toolless Slide Rail Kit v2 Enhanced with 2U CMA
Option part number	4M17A13564	4M17A11754	4M17A11755	4M17A11756	4M17A11757
Rail type	Half-out slide rail (friction)	Full-out slide rail (ball bearing)	Full-out slide rail (ball bearing)	Full-out slide rail (ball bearing)	Full-out slide rail (ball bearing)
Toolless installation	Yes	Yes	Yes	Yes	Yes
CMA support	No	Optional, 7M27A05698*	Optional, 7M27A05698*	Included	Included
Supported rack type	Four-post IBM and Lenovo standard rack, complying with the IEC standard	Four-post IBM and Lenovo standard rack, complying with the IEC standard	Four-post IBM and Lenovo standard rack, complying with the IEC standard	Four-post IBM and Lenovo standard rack, complying with the IEC standard	Four-post IBM and Lenovo standard rack, complying with the IEC standard
In-rack server maintenance	No	Yes	Yes	Yes	Yes
1U PDU support	Yes	Yes	Yes	Yes	Yes
0U PDU support	Yes	Limited support**	Limited support**	Limited support**	Limited support**
Supported mounting holes	Square or round	Square or round	Square, round, or threaded	Square or round	Square, round, or threaded
Thickness of mounting flanges	2.0-3.3 mm (0.08-0.13 inches)	2.0-3.3 mm (0.08-0.13 inches)	2.0-3.3 mm (0.08-0.13 inches)	2.0-3.3 mm (0.08-0.13 inches)	2.0-3.3 mm (0.08-0.13 inches)
Supported distance between front and rear mounting flanges‡	610-864 mm (24-34 inches)	610-813 mm (24-32 inches)	635-813 mm (25-32 inches)	610-813 mm (24-32 inches)	635-813 mm (25-32 inches)
Rail length†	751 mm (29.6 inches)	740 mm (29.1 inches)	740 mm (29.1 inches)	820 mm (32.3 inches)	820 mm (32.3 inches)

\* CMA mounting brackets are not preinstalled on the rail. The CMA mounting brackets are contained in the CMA option kit package and you will need to install the CMA mounting brackets first. For detailed instructions, refer to the documentation that comes with the CMA option kit.

\*\* If you want to install the rails and a 0U PDU into the same rack, the rack must meet the height and depth requirements as described in [ThinkSystem Rail Support Matrix](#).

‡ For best performance, it is recommended that you install the rails to the racks with a 719-mm distance (28.31-inch, Lenovo rack default distance) between the front and rear mounting flanges.

† Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail. Rail is in closed position.

## Operating system support

The SR665 V3 supports the following operating systems:

- Microsoft Windows 10 Professional (x64)
- Microsoft Windows 11 Professional (x64)
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 8.7
- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.9
- Red Hat Enterprise Linux 9.0
- Red Hat Enterprise Linux 9.1
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.3
- SUSE Linux Enterprise Server 15 SP4
- SUSE Linux Enterprise Server 15 SP5
- SUSE Linux Enterprise Server 15 Xen SP4
- SUSE Linux Enterprise Server 15 Xen SP5
- Ubuntu 20.04 LTS 64-bit
- Ubuntu 22.04 LTS 64-bit
- VMware ESXi 7.0 U3
- VMware ESXi 8.0
- VMware ESXi 8.0 U1
- VMware ESXi 8.0 U2

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

<https://lenovopress.lenovo.com/osig#servers=sr665-v3-7d9b-7d9a>

For configure-to-order configurations, the server can be preloaded with VMware ESXi installed on M.2 cards. Ordering information is listed in the following table.

Table 92. VMware ESXi preload

Part number	Feature code	Description
CTO only	BMEY	VMware ESXi 7.0 U3 (Factory Installed)
CTO only	BMT5	VMware ESXi 8.0 (Factory Installed)
CTO only	BYC7	VMware ESXi 8.0 U2 (Factory Installed)

Configuration rule:

- An ESXi preload cannot be selected if the configuration includes an NVIDIA GPU (ESXi preload cannot include the NVIDIA driver)

You can download supported VMware vSphere hypervisor images from the following web page and load it on the M.2 drives or 7mm drives using the instructions provided:

[https://vmware.lenovo.com/content/custom\\_iso/](https://vmware.lenovo.com/content/custom_iso/)

## Windows 10 and Windows 11

The SR665 V3 can now run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, additional Base CTO models 7D9ACTO2WW and 7D9BCTO2WW have been created to assist building a configuration that can be used with the client operating systems. See the [Models](#) section for details.

The XClarity management toolset is supported with Windows 10 and Windows 11.

**Windows client license:** A Windows client license for the system cannot be ordered from Lenovo nor can the OS be preloaded on the system in the factory. For the Windows license and for preloads, please contact your Lenovo business partner. A Windows Pro license is required as a qualifying base OS license in order to use a client Volume License offering.

See the part number tables in the following sections to see which adapters are supported with Windows 10 and Windows 11:

- [Controllers for internal storage](#)
- [M.2 adapters](#)
- [Network adapters](#)
- [GPU adapters](#)

**GPU recommended:** Lenovo recommends that if you plan to install Windows 10 or 11 on this server to run graphics-intensive applications, then you should selected a dedicated graphics adapter (GPU).

The following components are not supported:

- Fibre Channel adapters
- InfiniBand and VPI adapters
- External storage adapters
- Flash storage adapters

## Physical and electrical specifications

The SR665 V3 has the following overall physical dimensions, excluding components that extend outside the standard chassis, such as EIA flanges, front security bezel (if any), and power supply handles:

- Width: 445 mm (17.5 inches)
- Height: 87 mm (3.4 inches)
- Depth: 766 mm (30.1 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 93. Detailed dimensions

Dimension	Description
482 mm	$X_a$ = Width, to the outsides of the front EIA flanges
435 mm	$X_b$ = Width, to the rack rail mating surfaces
445 mm	$X_c$ = Width, to the outer most chassis body feature
87 mm	$Y_a$ = Height, from the bottom of chassis to the top of the chassis
698 mm	$Z_a$ = Depth, from the rack flange mating surface to the rearmost I/O port surface
732 mm	$Z_b$ = Depth, from the rack flange mating surface to the rearmost feature of the chassis body
727 mm (≤1100W) 755 mm (1800W) 781 mm (2400W)	$Z_c$ = Depth, from the rack flange mating surface to the rearmost feature such as power supply handle
34 mm	$Z_d$ = Depth, from the forwardmost feature on front of EIA flange to the rack flange mating surface
46 mm	$Z_e$ = Depth, from the front of security bezel (if applicable) or forwardmost feature to the rack flange mating surface

Figure 27. Server dimensions

The shipping dimensions (cardboard packaging) of the SR665 V3 are as follows:

- Width: 592 mm (23.3 inches)
- Height: 282 mm (11.1 inches)
- Depth: 992 mm (39.1 inches)

The server has the following weight:

- Maximum weight: 38.8 kg (85.5 lb)

Electrical specifications for AC input power supplies:

- Input voltage:
  - 100 to 127 (nominal) Vac, 50 Hz or 60 Hz
  - 200 to 240 (nominal) Vac, 50 Hz or 60 Hz
  - 180 to 300 Vdc (China only)
- Inlet current: See the following table.

Table 94. Maximum inlet current

Part number	Description	100V AC	200V AC	220V AC	240V DC
<b>AC input power - 80 PLUS Titanium efficiency</b>					
4P57A82019	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v3	No support	4A	3.6A	3.3A
4P57A72666	ThinkSystem 1100W 230V Titanium Hot-Swap Gen2 Power Supply	No support	5.9A	5.3A	5A
4P57A78359	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply	No support	9.7A	8.7A	8.3A
4P57A72667	ThinkSystem 2600W 230V Titanium Hot-Swap Gen2 Power Supply	No support	13.2A	13A	11.9A
<b>AC input power - 80 PLUS Platinum efficiency</b>					
4P57A72670	ThinkSystem 750W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	8.4A	4.1A	3.69A	3.5A
4P57A72671	ThinkSystem 1100W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	12A	6A	5.4A	5.1A
4P57A26294	ThinkSystem 1800W 230V Platinum Hot-Swap Gen2 Power Supply v2	No support	10A	9.1A	9A
4P57A26295	ThinkSystem 2400W 230V Platinum Hot-Swap Gen2 Power Supply	No support	14A	12.6A	12A

Electrical specifications for DC input power supply:

- Input voltage: -48 to -60 Vdc
- Inlet current (1100W power supply): 26 A

## Operating environment

The SR665 V3 server complies with ASHRAE Class A2 specifications with most configurations, and depending on the hardware configuration, also complies with ASHRAE Class A3 and Class A4 specifications. System performance may be impacted when operating temperature is outside ASHRAE A2 specification.

Depending on the hardware configuration, the SR665 V3 server also complies with ASHRAE Class H1 specification. System performance may be impacted when operating temperature is outside ASHRAE H1 specification.

Topics in this section:

- [Ambient temperature requirements](#)
- [Temperature and humidity](#)
- [Acoustical noise emissions](#)
- [Shock and vibration](#)
- [Particulate contamination](#)

## Ambient temperature requirements

Additional restrictions to ASHRAE support, based on server configuration, are as follows:

- The ambient temperature must be limited to 35 °C or lower if the server has any of the following components:
  - Broadcom 57416 10GBASE-T 2-port OCP

- Broadcom 57454 10GBASE-T 4-port OCP
  - PCIe network adapters at a rate greater than or equal to 100 Gb
  - Parts with AOC and at the rate of 25 Gb
- The ambient temperature must be limited to 30 °C or lower if the server has any of the following components:
  - 24x 2.5" or 12x 3.5" front bay with middle or rear bay
  - GPU (except front 24x 2.5" configurations and configurations with Group E processors)
  - Parts with AOC and at a rate greater than 25 GB
  - 9654(P)/9554(P)/9174F/9754/9734/9684X processors using performance heat sinks in a front 8x 2.5", 8x 3.5", or 16x 2.5" standard configuration.
  - Group E processors using advanced heat sinks in a front 12x 3.5" or 24x 2.5" configuration without middle/rear bay
- The ambient temperature must be limited to 25 °C or lower if the server has any of the following components:
  - 9274F/9374F/9474F using performance heat sinks in a front 8x 2.5", 8x 3.5" or 16x 2.5" standard configuration
  - 9654(P)/9554(P)/9174F/9754/9734 using performance heat sinks in a front 24x 2.5" configuration without middle/rear bay
  - 9654(P)/9554(P)/9174F/9754/9734/9684X in a front 8x 2.5", 8x 3.5", 16x 2.5" + GPU configuration
  - 24x 2.5" front bay + GPU
  - Gen5 7.68 TB or larger capacity NVMe in a configuration with middle/rear bay
  - Group A (240 W < cTDP ≤ 300 W) processor in a configuration with middle/rear bay
  - ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v1

Note:

- Group B processors: 200 W ≤ cTDP ≤ 240 W
- Group A processors: 240 W < cTDP ≤ 300 W
- Group E processors: 320 W ≤ cTDP ≤ 400 W

**Server shutdown:** When the ambient temperature is greater than the supported max temperature (ASHARE A4 45°C), the server will shut down. The server will not power on again until the ambient temperature falls within the supported temperature range.

For additional information, see the Environmental specifications and Thermal rules sections in the product documentation:

- [https://pubs.lenovo.com/sr665-v3/server\\_specifications\\_environmental](https://pubs.lenovo.com/sr665-v3/server_specifications_environmental)
- [https://pubs.lenovo.com/sr665-v3/thermal\\_rules](https://pubs.lenovo.com/sr665-v3/thermal_rules)

## Temperature and humidity

The server is supported in the following environment:

- Air temperature:
  - Operating:
    - ASHRAE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
    - ASHRAE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
    - ASHRAE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
    - ASHRAE Class H1: 5 °C to 25 °C (41 °F to 77 °F); Decrease the maximum ambient temperature by 1°C for every 500 m (1640 ft) increase in altitude above 900 m (2,953 ft).

- Server off: 5°C to 45°C (41°F to 113°F)
- Shipment/storage: -40°C to 60°C (-40°F to 140°F)
- Maximum altitude: 3,050 m (10,000 ft)
- Relative Humidity (non-condensing):
  - Operating
    - ASHRAE Class A2: 8% to 80%; maximum dew point: 21°C (70°F)
    - ASHRAE Class A3: 8% to 85%; maximum dew point: 24°C (75°F)
    - ASHRAE Class A4: 8% to 90%; maximum dew point: 24°C (75°F)
    - ASHRAE Class H1: 8% to 80%; Maximum dew point: 17°C (63°F)
  - Shipment/storage: 8% to 90%

## Acoustical noise emissions

The server has the following acoustic noise emissions declaration:

- Sound power level ( $L_{WAd}$ ):
  - Idling: 5.9 Bel (Min), 6.5 Bel (Typical), 7.3 Bel (GPU rich), 7.3 Bel (Storage rich)
  - Operating: 6.5 Bel (Min), 8.1 Bel (Typical), 8.7 Bel (GPU rich), 7.5 Bel (Storage rich)
- Sound pressure level ( $L_{pAm}$ ):
  - Idling: 41.5 dBA (Min), 51 dBA (Typical), 60.2 dBA (GPU rich), 60.2 dBA (Storage rich)
  - Operating: 48.3 dBA (Min), 66.6 dBA (Typical), 71.9 dBA (GPU rich), 61.3 dBA (Storage rich)

Notes:

- These sound levels were measured in controlled acoustical environments according to procedures specified by ISO7779 and are reported in accordance with ISO 9296.
- The declared acoustic sound levels are based on the following configurations, which may change depending on configuration/conditions :
  - Min: 2x 240W CPU, 12x 64GB RDIMMs, 8x SAS HDDs, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1100W PSU
  - Typical: 2x 300W CPU, 24x 64GB RDIMMs, 16x SAS HDDs, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1800W PSU
  - GPU rich: 2x 300W CPU, 24x 64GB RDIMMs, 16x SAS HDDs, RAID 940-16i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 3x A100 80G GPUs, 2x 2400W PSU
  - Storage rich: 2x 240W CPU, 12x 64GB RDIMMs, 16x SAS HDDs, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1800W PSU
- Government regulations (such as those prescribed by OSHA or European Community Directives) may govern noise level exposure in the workplace and may apply to you and your server installation. The actual sound pressure levels in your installation depend upon a variety of factors, including the number of racks in the installation; the size, materials, and configuration of the room; the noise levels from other equipment; the room ambient temperature, and employee's location in relation to the equipment. Further, compliance with such government regulations depends on a variety of additional factors, including the duration of employees' exposure and whether employees wear hearing protection. Lenovo recommends that you consult with qualified experts in this field to determine whether you are in compliance with the applicable regulations.

## Shock and vibration

The server has the following vibration and shock limits:

- Vibration:
  - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
  - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
  - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
  - Non-operating:
    - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces (3x GPU config, 2.5" config)
    - 32 kg - 68 kg: 35 G for 136 in./sec velocity change across 6 surfaces (20x 3.5" HDD config)

## Particulate contamination

Airborne particulates (including metal flakes or particles) and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might damage the system that might cause the system to malfunction or stop working altogether.

The following specifications indicate the limits of particulates that the system can tolerate:

- Reactive gases:
  - The copper reactivity level shall be less than 200 Angstroms per month (Å/month)
  - The silver reactivity level shall be less than 200 Å/month
- Airborne particulates:
  - The room air should be continuously filtered with MERV 8 filters.
  - Air entering a data center should be filtered with MERV 11 or preferably MERV 13 filters.
  - The deliquescent relative humidity of the particulate contamination should be more than 60% RH
  - Environment must be free of zinc whiskers

For additional information, see the Specifications section of the documentation for the server, available from the Lenovo Documents site, <https://pubs.lenovo.com/>

## Water infrastructure for the Lenovo Neptune Processor DWC Module

The Lenovo Neptune Processor DWC Module is the liquid-based processor cooling offering for the SR665 V3, as described in the [Lenovo Neptune Processor DWC Module](#) section.

The DWC module requires the following water infrastructure components in the rack cabinet and data center:

- Supported 42U or 48U rack cabinet

The 42U or 48U Heavy Duty Rack Cabinet (machine types 7D6D or 7D6E) are supported. Two 0U mounting points are required for the water manifolds, at the rear of the rack cabinet, one either side.

For information about the 42U and 48U Heavy Duty Rack Cabinets, see the product guide: <https://lenovopress.lenovo.com/lp1498-lenovo-heavy-duty-rack-cabinets>
- 38-port water manifold, installed in the rear of the rack cabinet

The manifold provides quick-disconnect couplings that each server in the rack are connected to. Ordering information is in the table below.

- Coolant distribution unit (CDU), either in-rack or in-row
  - In-rack CDUs are installed at the bottom of the rack cabinet. The supported in-rack CDU is as follows:
    - Lenovo Neptune DWC RM100 In-Rack CDU; see the [RM100 In-Rack Coolant Distribution Unit](#) section
  - In-row CDUs are separate cabinets that are typically installed at the end of a row of rack cabinets. Examples of suitable in-row CDUs include (but not limited to):
    - CoolTera FS400 310KW CDU
    - Vertiv Liebert XDU60 60KW CDU
- Hose kit to connect to the CDU to the manifold
  - Ordering information is in the table.

The following figure shows the major components of the solution.

Figure 28. Water manifold connections

Configuration requirements:

- Maximum number of SR665 V3 servers support in a rack:
  - 48U rack: 19 servers
  - 42U rack with in-rack CDU: 18 servers
  - 42U rack without in-rack CDU: 19 servers
- Inlet water flow rate:
  - 0.5 LPM: Maximum 40°C inlet water temperature
  - 1.0 LPM: Maximum 45°C inlet water temperature
  - 1.5 LPM: Maximum 50°C inlet water temperature

- Water pressure requirement:
  - Maximum operating node inlet pressure = 43.5 psi (3 Bar)

The 38-drop water manifold and hoses can be ordered as part numbers or by using the CTO process in the configurators using CTO model 7DE6CTO1WW. The following table lists the ordering information for the water manifold for the Neptune Processor DWC Module.

Table 95. Ordering information

Part number	Feature code (7DE6CTO1WW)	Description
Manifold for 42U and 48U rack cabinet		
4XF7A90061	BXHD	ThinkSystem Neptune DWC 38 Port Rack Manifold
Hoses to connect the manifold to an in-rack CDU		
4XF7A90232	BXHE	Connection Set, for 38 Ports Manifold with in-Rack CDU in 42U Rack
4XF7A90233	BXHF	Connection Set, for 38 Ports Manifold with in-Rack CDU in 48U Rack
Hoses to connect the manifold to an in-row CDU		
4XF7A90234	BXHG	Hose Set, 1 inch EPDM, 1.3m, for 38 Ports manifold for in-row CDU
4XF7A90235	BXHH	Hose Set, 1 inch EPDM, 2.3m, for 38 Ports manifold for in-row CDU

Configuration notes:

- This water connection solution cannot be used with Lenovo's water-cooled servers as the water requirements are different.
- The hoses for in-row CDUs have Eaton FD83 quick-disconnect couplings

## RM100 In-Rack Coolant Distribution Unit

The RM100 In-Rack Coolant Distribution Unit (CDU) can provide 100kW cooling capacity within the rack cabinet. It is designed as a 4U high rack device installed at the bottom of the rack. The CDU is supported in the 42U and 48U Heavy Duty Rack Cabinets.

For information about the 42U and 48U Heavy Duty Rack Cabinets, see the product guide: <https://lenovopress.lenovo.com/lp1498-lenovo-heavy-duty-rack-cabinets>

The following figure shows the RM100 CDU.

Figure 29. RM100 In-Rack Coolant Distribution Unit

The CDU can be ordered using the CTO process in the configurators using machine type 7DBL. The following table lists the base CTO model and base feature code.

Table 96. Ordering information

CTO model	Base feature	Description
7DBLCTOLWW	BRL4	Lenovo Neptune DWC RM100 In-Rack CDU

For details and exact specification of the CDU, see the In-Rack CDU Operation & Maintenance Guide: [https://pubs.lenovo.com/hdc\\_rackcabinet/rm100\\_user\\_guide.pdf](https://pubs.lenovo.com/hdc_rackcabinet/rm100_user_guide.pdf)

**Professional Services:** The factory integration of the In-Rack CDU requires Lenovo Professional Services review and approval for warranty and associated extended services. Before ordering CDU and manifold, contact the Lenovo Professional Services team ([CDUsupport@lenovo.com](mailto:CDUsupport@lenovo.com)).

## Warranty and Support

The SR665 V3 has a 1-year or 3-year warranty based on the machine type of the system:

- 7D9B - 1 year warranty
- 7D9A - 3 year warranty

The standard warranty terms are customer-replaceable unit (CRU) and onsite (for field-replaceable units FRUs only) with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.

Lenovo's additional support services provide a sophisticated, unified support structure for your data center, with an experience consistently ranked number one in customer satisfaction worldwide. Available offerings include:

- **Premier Support**

Premier Support provides a Lenovo-owned customer experience and delivers direct access to technicians skilled in hardware, software, and advanced troubleshooting, in addition to the following:

- Direct technician-to-technician access through a dedicated phone line
- 24x7x365 remote support
- Single point of contact service
- End to end case management
- Third-party collaborative software support
- Online case tools and live chat support
- On-demand remote system analysis

- **Warranty Upgrade (Preconfigured Support)**

Services are available to meet the on-site response time targets that match the criticality of your systems.

- 3, 4, or 5 years of service coverage
- 1-year or 2-year post-warranty extensions
- **Foundation Service:** 9x5 service coverage with next business day onsite response. YourDrive YourData is an optional extra (see below).
- **Essential Service:** 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select markets). Bundled with YourDrive YourData.
- **Advanced Service:** 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select markets). Bundled with YourDrive YourData.

- **Managed Services**

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

- **Technical Account Management (TAM)**

A Lenovo Technical Account Manager helps you optimize the operation of your data center based on a deep understanding of your business. You gain direct access to your Lenovo TAM, who serves as your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. In addition, your TAM will help proactively make service recommendations and manage your service relationship with Lenovo to make certain your needs are met.

- **Enterprise Server Software Support**

Enterprise Software Support is an additional support service providing customers with software support on Microsoft, Red Hat, SUSE, and VMware applications and systems. Around the clock availability for critical problems plus unlimited calls and incidents helps customers address challenges fast, without incremental costs. Support staff can answer troubleshooting and diagnostic questions, address product comparability and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

- **YourDrive YourData**

Lenovo's YourDrive YourData is a multi-drive retention offering that ensures your data is always under your control, regardless of the number of drives that are installed in your Lenovo server. In the unlikely event of a drive failure, you retain possession of your drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The YourDrive YourData service can be purchased in convenient bundles and is optional with Foundation Service. It is bundled with Essential Service and Advanced Service.

- **Health Check**

Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that your systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo Service offerings are region-specific. Not all preconfigured support and upgrade options are available in every region. For information about Lenovo service upgrade offerings that are available in your region, refer to the following resources:

- Service part numbers in Lenovo Data Center Solution Configurator (DCSC):  
<http://dcsc.lenovo.com/#/services>
- Lenovo Services Availability Locator  
<http://lenovocator.com/>

For service definitions, region-specific details, and service limitations, please refer to the following documents:

- Lenovo Statement of Limited Warranty for Infrastructure Solutions Group (ISG) Servers and System Storage  
<http://pcsupport.lenovo.com/us/en/solutions/ht503310>
- Lenovo Data Center Services Agreement  
<http://support.lenovo.com/us/en/solutions/ht116628>

## Services

Lenovo Services is a dedicated partner to your success. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

**Note:** Some service options may not be available in all markets or regions. For more information, go to <https://www.lenovo.com/services>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

Here's a more in-depth look at what we can do for you:

- **Asset Recovery Services**

Asset Recovery Services (ARS) helps customers recover the maximum value from their end-of-life equipment in a cost-effective and secure way. On top of simplifying the transition from old to new equipment, ARS mitigates environmental and data security risks associated with data center equipment disposal. Lenovo ARS is a cash-back solution for equipment based on its remaining market value, yielding maximum value from aging assets and lowering total cost of ownership for your customers. For more information, see the ARS page, <https://lenovopress.com/lp1266-reduce-e-waste-and-grow-your-bottom-line-with-lenovo-ars>.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

- **Basic Hardware Installation**

Lenovo experts can seamlessly manage the physical installation of your server, storage, or networking hardware. Working at a time convenient for you (business hours or off shift), the technician will unpack and inspect the systems on your site, install options, mount in a rack cabinet, connect to power and network, check and update firmware to the latest levels, verify operation, and dispose of the packaging, allowing your team to focus on other priorities.

- **Deployment Services**

When investing in new IT infrastructures, you need to ensure your business will see quick time to value with little to no disruption. Lenovo deployments are designed by development and engineering teams who know our Products & Solutions better than anyone else, and our technicians own the process from delivery to completion. Lenovo will conduct remote preparation and planning, configure & integrate systems, validate systems, verify and update appliance firmware, train on administrative tasks, and provide post-deployment documentation. Customer's IT teams leverage our skills to enable IT staff to transform with higher level roles and tasks.

- **Integration, Migration, and Expansion Services**

Move existing physical & virtual workloads easily, or determine technical requirements to support increased workloads while maximizing performance. Includes tuning, validation, and documenting ongoing run processes. Leverage migration assessment planning documents to perform necessary migrations.

## Regulatory compliance

The SR665 V3 conforms to the following standards:

- ANSI/UL 62368-1
- IEC 62368-1 (CB Certificate and CB Test Report)
- CSA C22.2 No. 62368-1
- Mexico NOM-019
- India BIS 13252 (Part 1)
- Germany GS
- TUV-GS (EN62368-1, and EK1-ITB2000)
- Brazil INMETRO
- Ukraine UkrCEPRO
- Morocco CMIM Certification (CM)
- Russia, Belorussia and Kazakhstan, TP EAC 037/2016 (for RoHS)

## External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

**Note:** Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site:

<http://datacentersupport.lenovo.com>

Table 97. External drive enclosures

Model	Description
4587HC1	Lenovo Storage D1212 Disk Expansion Enclosure (2U enclosure with 12x LFF drive bays)
4587HC2	Lenovo Storage D1224 Disk Expansion Enclosure (2U enclosure with 24x SFF drive bays)
6413HC1	Lenovo Storage D3284 High Density Expansion Enclosure (5U enclosure with 84x LFF drive bays)
7DAHCTO1WW	Lenovo ThinkSystem D4390 Direct Attached Storage (4U enclosure with 90x LFF drive bays)

For details about supported drives, adapters, and cables, see the following Lenovo Press Product Guides:

- Lenovo Storage D1212 and D1224  
<http://lenovopress.lenovo.com/lp0512>
- Lenovo Storage D3284  
<http://lenovopress.lenovo.com/lp0513>
- Lenovo ThinkSystem D4390  
<https://lenovopress.lenovo.com/lp1681>

## External storage systems

Lenovo offers the ThinkSystem DE Series and ThinkSystem DM Series external storage systems for high-performance storage. See the DE Series and DM Series product guides for specific controller models, expansion enclosures and configuration options:

- ThinkSystem DE Series Storage  
<https://lenovopress.com/storage/thinksystem/de-series#rt=product-guide>
- ThinkSystem DM Series Storage  
<https://lenovopress.com/storage/thinksystem/dm-series#rt=product-guide>
- ThinkSystem DG Series Storage  
<https://lenovopress.com/storage/thinksystem/dg-series#rt=product-guide>

## External backup units

The following table lists the external backup options that are offered by Lenovo.

Table 98. External backup options

Part number	Description
External RDX USB drives	
4T27A10725	ThinkSystem RDX External USB 3.0 Dock
External SAS tape backup drives	
6160S7E	IBM TS2270 Tape Drive Model H7S
6160S8E	IBM TS2280 Tape Drive Model H8S
6160S9E	IBM TS2290 Tape Drive Model H9S
External SAS tape backup autoloaders	
6171S7R	IBM TS2900 Tape Autoloader w/LTO7 HH SAS
6171S8R	IBM TS2900 Tape Autoloader w/LTO8 HH SAS
6171S9R	IBM TS2900 Tape Autoloader w/LTO9 HH SAS
External tape backup libraries	
6741A1F	IBM TS4300 3U Tape Library-Base Unit
6741A3F	IBM TS4300 3U Tape Library-Expansion Unit
Full High 8 Gb Fibre Channel for TS4300	
01KP938	LTO 7 FH Fibre Channel Drive
01KP954	LTO 8 FH Fibre Channel Drive
02JH837	LTO 9 FH Fibre Channel Drive
Half High 8 Gb Fibre Channel for TS4300	
01KP936	LTO 7 HH Fibre Channel Drive
01KP952	LTO 8 HH Fibre Channel Drive
02JH835	LTO 9 HH Fibre Channel Drive
Half High 6 Gb SAS for TS4300	
01KP937	LTO 7 HH SAS Drive
01KP953	LTO 8 HH SAS Drive
02JH836	LTO 9 HH SAS Drive

For more information, see the list of Product Guides in the Backup units category:

<https://lenovopress.com/servers/options/backup>

## Fibre Channel SAN switches

Lenovo offers the ThinkSystem DB Series of Fibre Channel SAN switches for high-performance storage expansion. See the DB Series product guides for models and configuration options:

- ThinkSystem DB Series SAN Switches:  
<https://lenovopress.com/storage/switches/rack#rt=product-guide>

## Uninterruptible power supply units

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo.

Table 99. Uninterruptible power supply units

Part number	Description
55941AX	RT1.5kVA 2U Rack or Tower UPS (100-125VAC)
55941KX	RT1.5kVA 2U Rack or Tower UPS (200-240VAC)
55942AX	RT2.2kVA 2U Rack or Tower UPS (100-125VAC)
55942KX	RT2.2kVA 2U Rack or Tower UPS (200-240VAC)
55943AX	RT3kVA 2U Rack or Tower UPS (100-125VAC)
55943KX	RT3kVA 2U Rack or Tower UPS (200-240VAC)
55945KX	RT5kVA 3U Rack or Tower UPS (200-240VAC)
55946KX	RT6kVA 3U Rack or Tower UPS (200-240VAC)
55948KX	RT8kVA 6U Rack or Tower UPS (200-240VAC)
55949KX	RT11kVA 6U Rack or Tower UPS (200-240VAC)
55948PX	RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55949PX	RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55943KT†	ThinkSystem RT3kVA 2U Standard UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55943LT†	ThinkSystem RT3kVA 2U Long Backup UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55946KT†	ThinkSystem RT6kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)
5594XKT†	ThinkSystem RT10kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)

† Only available in China and the Asia Pacific market.

For more information, see the list of Product Guides in the UPS category:

<https://lenovopress.com/servers/options/ups>

## Power distribution units

## Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region-specific offers, please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:

<https://www.lenovo.com/us/en/landingpage/lenovo-financial-services/>

## Seller training courses

The following sales training courses are offered for employees and partners (login required). Courses are listed in date order.

1. **Lenovo Data Center Product Portfolio**  
2024-04-22 | 20 minutes | Employees and Partners

This course introduces the Lenovo data center portfolio, and covers servers, storage, storage networking, and software-defined infrastructure products. After completing this course about Lenovo data center products, you will be able to identify product types within each data center family, describe Lenovo innovations that this product family or category uses, and recognize when a specific product should be selected.

Published: 2024-04-22

Length: 20 minutes

Employee link: [Grow@Lenovo](mailto:Grow@Lenovo)

Partner link: [Lenovo Partner Learning](#)

Course code: SXXW1110r7

## 2. **Family Portfolio - ThinkSystem Rackmount Servers powered by AMD**

2024-04-22 | 15 minutes | Employees and Partners

This course covers rackmount servers powered by AMD processors. After completing this course, you will be able to identify products and features within this ThinkSystem rackmount server family, describe unique innovations that this product family uses, and recognize when a specific product should be selected. You will also be able to describe how AMD rackmount servers are used in AI environments.

Published: 2024-04-22

Length: 15 minutes

Employee link: [Grow@Lenovo](mailto:Grow@Lenovo)

Partner link: [Lenovo Partner Learning](#)

Course code: SXXW1216r7

## 3. **Partner Technical Webinar - ISG Portfolio Update**

2024-04-15 | 60 minutes | Employees and Partners

In this 60-minute replay, Mark Bica, NA ISG Server Product Manager reviewed the Lenovo ISG portfolio. He covered new editions such as the SR680a \ SR685a, dense servers, and options that are strategic for any workload.

Published: 2024-04-15

Length: 60 minutes

Employee link: [Grow@Lenovo](mailto:Grow@Lenovo)

Partner link: [Lenovo Partner Learning](#)

Course code: 041224

## 4. **Partner Technical Webinar – StorMagic**

2024-03-19 | 60 minutes | Employees and Partners

March 08, 2024 – In this 60-minute replay, Stuart Campbell and Wes Ganeko of StorMagic joined us and provided an overview of StorMagic on Lenovo. They also demonstrated the interface while sharing some interesting use cases.

Published: 2024-03-19

Length: 60 minutes

Employee link: [Grow@Lenovo](mailto:Grow@Lenovo)

Partner link: [Lenovo Partner Learning](#)

Course code: 030824

## 5. **Intel Transparent Supply Chain on Lenovo Servers**

2024-01-29 | 12 minutes | Employees and Partners

This course introduces the Intel Transparent Supply Chain (TSC) program, explains how the program works, and discusses the benefits of the Intel TSC program to customers. Adding the Intel TSC feature to an order is explained.

Course objectives:

- Describe the Intel® Transparent Supply Chain program
- Explain how the Intel® Transparent Supply Chain program works
- Discuss the benefits of the Intel® Transparent Supply Chain program to Lenovo customers
- Explain how to add Intel® Transparent Supply Chain program feature to an order

Published: 2024-01-29

Length: 12 minutes

Partner link: [Lenovo Partner Learning](#)

Course code: SXXW1230

## 6. **Family Portfolio: Storage Controller Options**

2024-01-23 | 25 minutes | Employees and Partners

This course covers the storage controller options available for use in Lenovo servers. The classes of storage controller are discussed, along with a discussion of where they are used, and which to choose.

After completing this course, you will be able to:

- Describe the classes of storage controllers
- Discuss where each controller class is used
- Describe the available options in each controller class

Published: 2024-01-23

Length: 25 minutes

Employee link: [Grow@Lenovo](#)

Partner link: [Lenovo Partner Learning](#)

Course code: SXXW1111

## 7. **Lenovo-Intel Sustainable Solutions QH**

2024-01-22 | 10 minutes | Employees and Partners

This Quick Hit explains how Lenovo and Intel are committed to sustainability, and introduces the Lenovo-Intel joint sustainability campaign. You will learn how to use this campaign to show customers what that level of commitment entails, how to use the campaign's unsolicited proposal approach, and how to use the campaign as a conversation starter which may lead to increased sales.

Published: 2024-01-22

Length: 10 minutes

Employee link: [Grow@Lenovo](#)

Partner link: [Lenovo Partner Learning](#)

Course code: SXXW2524a

## 8. **Family Introduction: Rack and Tower**

2024-01-19 | 11 minutes | Employees and Partners

This course is designed to give Lenovo sales and partner representatives a foundation on the characteristics of the rack and tower server family. As an introduction to the family, this course also includes positioning, when to use a product, and keywords a client may use when discussing a rack product.

Course Objectives:

- Family Characteristics
- Priority Positioning
- Product Usage
- Keywords and Phrases

Published: 2024-01-19

Length: 11 minutes

Employee link: [Grow@Lenovo](#)

Partner link: [Lenovo Partner Learning](#)

Course code: SXXW1100r3

9. **FY24Q3 Intel Servers Update**

2023-12-11 | 15 minutes | Employees and Partners

This update is designed to help you discuss the features and customer benefits of Lenovo servers that use the 5th Gen Intel® Xeon® processors. Lenovo has also introduced a new server, the ThinkSystem SD650-N V3, which expands the supercomputer server family. Reasons to call your customer and talk about refreshing their infrastructure are also included as a guideline.
