

2019 Innovation Book

Dear Valued Business Partner,

Our dedicated and talented associates continue the tireless work of revolutionizing the Madison Brand by focusing on “Innovation in all that we do”. Whether it be a new product, new business process, or new way of delivering our message to the market, Madison is dedicated to providing the best solutions to our valued customers.

At the center of it all is our award winning Sparks Innovation Center, which serves as our incubator of ideas for product solutions that address real challenges faced by distributors and installers within the industry. The majority of our new product ideas originate in the minds of industry professionals who actually face these challenges on a daily basis. As a result, these product solutions provide immediate value throughout the Electrical Wholesale Channel.

This latest edition of our product catalog highlights our entire product offering, including many new and innovative product solutions. In addition, please be sure to visit us online at www.meproducts.net. Here you will find additional product information and sell sheets, cross reference tools, video libraries and the latest Madison news. Connect with us via one of our various social medial channels including Facebook, LinkedIn and YouTube.

As always, we value any feedback related to how we can continue to improve your customer experience.

On behalf of our entire team of dedicated employees, I want to thank you for your continued support of Madison Electric Products, Inc.

Best Regards,

Brad Wiandt
President

about

Madison Electric Products

Madison Electric Products provides over 2,500 field-tested and field-created products developed by electricians for electricians. Headquartered in northeast Ohio, Madison Electric Products boasts a customer service oriented coast-to-coast network of sales reps and distribution centers.

Madison Electric Products is built upon a legacy of product innovation, an ongoing commitment to superior customer service and product quality, and a dynamic and progressive management team that establishes open, one-on-one relationships with company partners, including customers, distributors, manufacturers, and inventors.

HISTORY & LEADERSHIP

Madison Electric Products was founded in Cleveland in 1929 by Earl Atkinson, an electrician and inventor of the Madison Strap, one of the electrical industry's most relied-upon and favorite products. At the helm of Madison Electric Products today is President Brad Wiandt and his team of experienced electrical industry veterans.

OUR BRAND

Madison Electric is revolutionizing the electrical distribution market with new attitudes, new processes, new procedures and new products – growing smartly into a spirited, innovative, inspired organization built on the innovative legacy of its founders and the on-going commitment to deliver the highest quality products to customers in construction related trades, OEM and building maintenance. Over the years, Madison Electric has led the industry with field-tested and field created products developed by electricians for electricians.

Today, Madison Electric enjoys a well-deserved reputation as the innovative source and industry thought leader for product development. Our past is the foundation for our future, where a second to none customer service approach is reflected in everything we do. From the way we deal with our distributors and contractors, to the direct, one-on-one relationships we maintain with our manufacturing partners, we work hard to guarantee success, improved quality and superior performance.

DISTRIBUTION

Our main distribution centers are located in Cleveland OH. and Atlanta GA. These Distribution centers combined with our warehousing manufacturer rep partners give Madison the ability to provide our customers with industry leading customer service.

CLEVELAND, OH

ATLANTA, GA

At Madison Electric Products, innovation is what we do.

But we couldn't do it without you.

You're out in the field every day. You know what works and what doesn't. And we're sure that at some point or another you've said to yourself, "I have a great idea. I could do this better."

If you're looking for a partnership with a company that thrives on product innovation and relationships with electricians just like you, visit our Sparks Innovation Center online.

There's no commitment. While we can't guarantee that your idea will make it to market (let's face it, not every idea will)

we can guarantee that we will:

- Respond to you as quickly as possible
- Consider every idea submitted
- Appreciate that you took the time to submit one!

SHARK TOOTH

The only box that cuts its own hole!

A first of its kind, SharkTooth was designed with the electrician in mind for installing over head lighting, wall sconces and smoke detectors. A built in hole saw creates the perfect sized hole every time, while also making it easy to center-on-center mark. A piercing drill bit located at the center of the blade allows for pinpoint accuracy, requiring very little measuring and marking up the wall. Raised mounting rings with center hole are located inside the back wall of the box for surface mount installations, basement or attic studs.

- A perfect cut every time
- Location accuracy during installation
- Quick and easy to install
- Mounting hole spacing accommodates 3/0 and 4/0 fixtures
- Supports fixtures up to 6 lbs.
- Requires 9/16" driver (not included)

SmartLB

Ahead of the Curve!

Unlike traditional LBs that have a sharp 90-degree corner, Smart LB conduit bodies have a built-in radius that helps prevent cables from getting caught or damaged when pulled around corners. With no sharp edges to damage cable, the gentle bend radius meets ANSI/TIA/EIA 568 & NECA/FOA requirements for pulling Optical Fiber Cable. Smart LB are the only conduit bodies that are recommended by the BICSITDMM 13th for telecommunication cable. Includes a gasketed cover for wet locations.

DIE CAST ALUMINUM

- Gray powder coat paint finish
- Suitable for indoor, outdoor (OSP) & plenum use
- For use with EMT, IMC, Rigid or Liquid-Tight conduit and fittings

PVC

- Standard gray
- Suitable for indoor / outdoor (OSP) use
- For use with schedule 40 PVC & schedule 80 PVC
- Works with standard PVC cleaner and cement

Grounding & Bonding at it's best!

Our Inline Intersystem Bonding Bridge will change the way you ground all of your conductors from your utilities. It provides a dependable method for grounding and bonding for electrical systems. Typical applications include communications, solar, cable, and transmission lines.

- Designed for indoor and outdoor use
- Inspection window
- Gangable
- Incorporates 6 terminating points (2x the amount required by the NEC)
- Mounts to enclosures, conduit bodies and inline with conduit

When running conduit, having inferior conduit bodies can grind a project to a halt. Breaking or coming loose due to poor fit can cost valuable time and labor. All of Madison's conduit bodies are made from high grade aluminum or malleable iron for Rigid conduit, and aluminum for EMT. Madison produces quality at an affordable price. Available in all conduit body types and with a wide range of conduit sizes we have exactly what you need to get the job done.

EZLB

EZ as 1-2-3!

Madison's EZLB provides the most efficient method of installing large service entrance wire through a right angle opening. No more struggling to force the wire into a tight connection. Our patented 3-piece design allows the installer plenty of room to maneuver the wire into place. Splitting the EZLB in half has eliminated the pinch points that has caused electricians problems for decades. The EZLB is a one man installation saving time, money, and eliminating wire damage.

- Ideal for service entrance
- 3-piece design for easy installation
- Includes gasket for wet locations

The EZLB installs in just three simple steps:

1. Install the collar fitting onto 2" PVC pipe.
2. Bend wire at 90 degrees and install into the back half of the EZLB.
3. Finish by installing the front cover.

DraftSEAL

Look for the green seal!

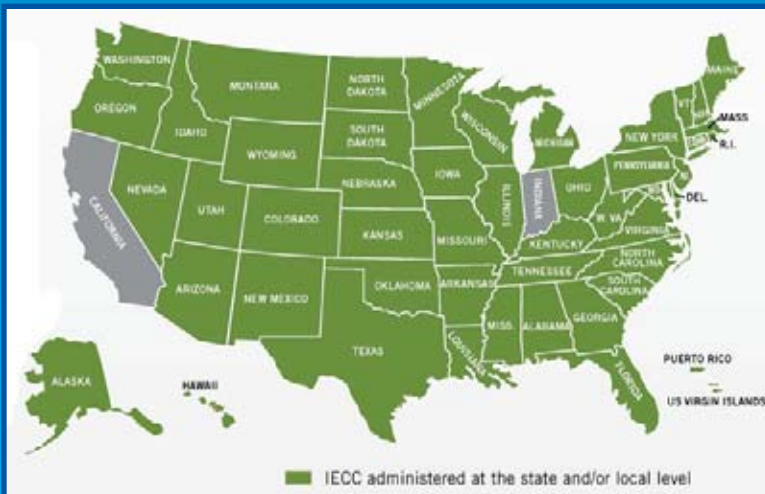

The Madison Draft Seal product is truly innovation that works. Available in 1 gang through 4 gang, plus a round kit for ceiling boxes, the Draft Seal attaches to most manufactured plastic boxes in seconds, saving time and money. Each Draft Seal kits also includes adhesive backed foam pads for a tight seal around the wires, no more messy and costly fire stop caulk.

- Easy to install
- Costs less than all-in-one pre sealed boxes
- Can be used with most major brand non-metallic boxes
- Saves time over inefficient and messy caulking methods
- Requires less inventory space
- More versatile, allowing the use of more wiring box types
- Easily identified by inspectors after the dry wall is up

The IECC is the national model energy code

The International Energy Conservation Code is administered at the state and/or local level in 48 states. The IECC requires that any time you penetrate the insulation barrier in a wall separating conditioned air from unconditioned air (also known as the envelope), the wiring box must be sealed. There are approximately 64 boxes in the envelope in a typical 2200 sq. ft home.

What is a building envelope?

A building envelope is the physical separator between the conditioned and unconditioned environment of a building including the resistance to air, water, heat, light, and noise transfer. It includes all exterior walls, the roof and foundation.

NEW DRAFT SEAL

Helps to reduce drafts, vapors and sound transmissions through exterior walls

Material: PVC, foam gaskets
Features: Works with all standard non-metallic boxes. Green Ring easily identifiable after dry wall install. Eliminates need for caulking & sealants. Complies with the IECC & LEED for envelope sealing
Notes: Includes foam gaskets to cover wire ports

Work smarter!

The Tracer Tool accurately and easily traces 2" x 3" metal or plastic old work box outlines on surfaces for proper installation in walls, centering the box to match any existing. Integrated vertical and horizontal levels and center point location mark allow for quick and easy placement of the tracer.

Made of durable plastic, the Tracer Tool has a rubber backing for turning ease and pliability to surfaces when tracing. Small and easy to use, it works both vertically and horizontally with bull's eye accuracy.

- Now includes snap-on adapter for plastic boxes
- Works vertically and horizontally
- Durable plastic with rubber backing
