Where Maternal Matters

BRIDGING THE GAP BETWEEN PRETTY AND FUNCTIONAL

The question was posed, "Do you just like pretty cattle?" Why yes, yes we do. That being said, why can't we have it all? Why can't we have cattle with power, foot size, correctness, MUSCLE, and phenotypically correct proportions, cattle that feed, that have nice udders, with longevity and productivity bred into their pedigree? Why can't we have bulls that will produce offspring with that eye catching correctness and balance on the end of a lead rope, and still sire cattle that will hang a carcass, that grade, and make cows that produce nice calves year, after year, after year? Our answer is you can, we aren't just show cattle. Griswold Cattle sees all ends of the industry, and simply put, we think you as consumer deserves more, let us help you get it. Don't settle for mediocre.

MAINE-ANJOU

Headquarters

M. BLAKE NELSON
AMAA Executive Vice President

Greetings,

I hope that spring is smiling upon you and that you are well! I think we can all agree this has been interesting and unpredictable times. However, this hasn't changed much in agriculture in terms of responsibilities, duties and work load. All of us still get up each day and face the challenges of making the most with what we have to provide food to a public that doesn't truly understand production agriculture. These times have brought on uncertainty and serious health concerns, but I feel that there are some positives that have surfaced from it all. If anything I believe that recent times have brought focus back to true priorities in our society and for some personal priorities as well.

The attention upon agriculturist to feed this nation and abroad has reminded people as to where their food comes from and opened the door to show them how production ag works and also has brought attention to the problems that we face with the markets and the unbalanced profits in the supply chain. I hope that the current investigations will bring light to what has been going on within the industry and the proper corrections are made. This is a topic I think we all should keep an eye on because it cannot only have an immediate effect on our operations, but also for future generations of cattle producers.

The recent occurrences can create opportunities for us to educate the general public about what we do. We must take advantage any time we have the chance to tell the true story of the American Rancher and the wholesome product we produce - Beef. I challenge all of you and your family members to be on the lookout for your chance to tell our stories whether it is at the farmer's market, the county fair or even a child's speech at school. We all must do a better job of communicating and promoting our livelihoods because we know there is always opposition out there that will definitely give their opinions loud and clear. So talk about it at the dinner table and give your family confidence and ideas to discuss when they have the chance. Together we can make a difference!

Another thing that I personally feel the pandemic has changed is the pace at which we live life. The school and activity closings, travel advisory and stay at home orders have definitely affected the normal schedule at the Nelson household (Maybe in a good way!). After living this way for a month, I have spent time reflecting on how quickly we can get caught up in the "rat race". This chance to have more meals at the dinner table and spend more time outside and at the barn have been a great opportunity to recognize what is truly important in life. I hope that

it may have presented some good things for you as well! So, enough of my rantings, but I just wanted to talk about some of the positives that are coming out of the Covid-19 pandemic that we are all dealing with.

Turning our attention to the most asked question that we have gotten lately at the office "Are we having the national junior heifer show?" This has been a daily topic with staff and the only conclusion we consistently come up with is we cannot predict the future, but we can only prepare for it. This is uncharted territory for all of us and I can promise you that we will base our actions with what is best for the AMAA juniors in mind. Lindsey and all the staff are preparing for "Living On Lima Time" to be held June 28th-July 4th in Lima, Ohio. It is our goal to have a tremendous show in Lima and we are looking forward to it.

All we can promise is that we will do our best for our juniors and the American Maine Anjou Association (AMAA). As always if we can help you and anyway, please let us know!

Take care,

Blake

MAINE-ANJOU STUD

Breeding quality Maine-Anjou cattle in Australia for over 30 years

We breed pure-bred, smooth muscled, deep bodied bulls with plenty of length and rump on only grass fed diets.
We are one of the only Maine-Anjou studs to offer 3 year structural guarantee on our cattle.
Our strict culling of cattle with bad temperaments, calving problems, unsound hooves and udder issues ensures the quality of our cattle.

— Sire: Beefmaker Express 71T (P)
— Dam: Wattle Glen Glenda (P)

1230kg at 3 years old, a thick, scurred Maine-Anjou bull breeding exceptional offspring, meeting the commercial market and the show arena.

Commercial Connection

JOSHUA CRIBBS
AMAA Director of
Commercial Development

I am quite sure this letter finds you all in an extended stay at home with plenty of time to execute your mating strategies for next year. You probably have some extra help at home to get projects done that have been lingering for a while, too. All that aside, the one thing that has stayed constant around my part of the world is that the agriculture community has not been slowed down a bit. We have truly had an amazing Spring. The early thaw in March and the light snow load in April, so far has dried us out quicker than the last few years. We have started to see fields take shape and cattle are naturally cycling much faster this year. One can only hope that with the harder grass that has started to appear that we should see accelerated breed up rates!

I sat down to write this article right after doing a Facebook live [video]. One thing in particular comes to mind with the May/June/July issue of the *Voice* being the Herd Sire edition is new bulls for the 2020 breeding season. We have certainly seen a resurgence in new genetics, as well as some bulls surfacing that maybe didn't catch on right away but because of some popular and upcoming sons they are starting to

see more action. We have seen growth in our genetic pool and cattlemen/women are actively searching for bulls to utilize with different genetic lines than what they have been using. They're looking to increase the genetic variation within their own herds. One thing I look forward to seeing is the first true F1 half-blood Maine-Angus bull that utilizes true outcross Angus genetics to bring new influx into the herd book. A bull that not only gets us excited about his phenotypic value, but has genetic value and a EPD profile that pushes those breeders that utilize him.

We are in an exciting time for breed growth. The progress we have made in the last few years has been exciting. The forward momentum and buzz we're generating, it was on full display among the Maine-Anjou breed at Denver and it has certainly continued though the spring. It's safe to say the tradition is trending! Stay safe and I very much look forward to summer visits and time spent with you breeders that continues to create progress.

Maine-Anjou... A Tradition That's Trending!

TOUGHER TOGETHER

From the very first time you stepped into the show ring, there is a fire in the stomach of every exhibitor, breeder, and livestock enthusiast. As time passes on, new techniques are learned, products are developed, partnerships are made, and rivalries are formed. One thing that has remained constant, regardless of what has happened in the world, is the strength of our stock show family. When fires blazed, blizzards stormed, and tragedies have struck, we have always come together. When times have gotten tough, we let go of grudges, put aside competitiveness, and banded together to support those in need. We may not know what tomorrow is bringing, but we do know that we are **TOUGHER TOGETHER.**

6 P.M. CATTLE MAY BEGIN ARRIVING ON THE FAIRGROUNDS.
ABSOLUTELY NO CATTLE ON GROUNDS UNTIL 6 P.M.

MONDAY, JUNE 29

NOON CATTLE MUST BE IN THE BARN
1-3 P.M. CATTLE CHECK-IN & STEER WEIGH IN
3:30 P.M. MAINE-ANJOU & CHIANINA QUEEN & PRINCESS INTERVIEWS
4 P.M. CHIANINA MEMBERSHIP MEETING
8 P.M. Livin' On Lima Time - 5K Fun Run

TUESDAY, JUNE 30

8 A.M. PUBLIC SPEAKING & SALESMANSHIP CONTESTS
12 P.M. AJMAA DELEGATE MEETING/SOCIAL
1 P.M. NOVICE ACTIVITY
2 P.M. LIVESTOCK JUDGING CONTEST
5:30 P.M. STATE LINEUP AND PHOTOS
6:30 P.M. OPENING CEREMONIES/EVENING MEAL

WEDNESDAY, JULY 1

8:30-12 P.M. SULLIVAN SUPPLY/STOCK SHOW U TEAM FITTING (SR, INT, JR)
1 P.M. NOVICE ACTIVITY
1 P.M. QUIZ BOWL
3 P.M. SOAK UP THE SUN ICE CREAM FUN - SPONSORED BY THE TLACH FAMILY
6 P.M. SULLIVAN SUPPLY/STOCK SHOW UNIVERSITY BOOTCAMP & FUN

THURSDAY, JULY 2

7:30 A.M. SULLIVAN SUPPLY/STOCK SHOW MAINE-ANJOU & CHIANINA SHOWMANSHIP CONTESTS
1 P.M. NOVICE ACTIVITY
3:30 P.M. CHIANINA MEMBERSHIP MEETING
4:30 P.M. MAINE-ANJOU DELEGATE MEETING
5:30 P.M. CODY MCCULLOUGH MEMORIAL SENIOR SHOWMANSHIP FINALS (MAINE-ANJOU)
6 P.M. CHIANINA FUNDRAISER AUCTION

FRIDAY, JULY 3

8 A.M. CHIANINA PROSPECT STEERS, PROGRESS STEERS, BULLS, BRED & OWNED CHIANGUS, OWNED CHIANGUS, BRED & OWNED CHIANINA
8 A.M. FULLBLOOD FEMALES, PROSPECT STEERS, MAINE-ANJOU BULLS, PROGRESS STEERS, MAINETAINER BULLS, BRED & OWNED MAINE-ANJOU FEMALES, BRED & OWNED MAINETAINER FEMALES AND MAINE ANGUS FEMALES SHOWS
1 P.M. NOVICE ACTIVITY
6:30-7:15 P.M. AWARDS BANQUET

SATURDAY, JULY 4

8 A.M. MAINE-ANJOU FEMALES, FOLLOWED BY MAINETAINER FEMALES
8 A.M. OWNED CHIANINA FEMALES

Tips for Trip

PROPER PAPERWORK ---

It is important to make sure you have the proper paperwork done, in order and with you before you leave.

Things you will need:

- Original or digital registration paper
- Health paper
- Copy of your entries

STALLING ---

Stalls in the barn are assigned by state. Any stalling requests must be sent to Lindsey at njhs.stalling@gmail.com

Have you:

- Sent in your stall requests?
- Stall request will only be accepted via the above e-mail.

TATTOOS ---

TATTOOS WILL BE CHECKED ON ALL ANIMALS WHO HAVE NOT ALREADY BEEN VERIFIED.

Have you:

- Checked your tattoos?

HAVE YOU CHECKED THE SCHEDULE? ---

We do our very best to have a detailed and informative schedule available for you to see. Have you checked for:

- Arrival times
- Setup times
- When cattle can enter the barn
- Cattle check-in

THINGS THAT ARE NOT ALLOWED IN THE BARN ---

The following items are NOT allowed:

- NO Swamp coolers
- NO Butt fans

TIE OUTS ---

You will be able to tie to your trailers. Bedding is not provided in the tieout tomorrow.

GENERATORS ---

Generators are encouraged!

We love our littles! With no minimum age, the AJMAA and AJCA have many participants that are below the age of 8. With this many young exhibitors the decision was made to ramp up our novice program and offer activities a few afternoons that are geared specifically for the Littles. Additionally, we have many of our exhibitors that attend the show with their older siblings and would love to participate but just aren't quite ready. We have those exhibitors covered too! For four afternoons we invite our Littles to come and enjoy activities like steer cookie decorating, heifer cutout coloring and more! Each activity will last approximately 1 hour and all items they will need will be provided.

SO, HOW DO YOU SIGN YOUR LITTLE UP FOR THESE ACTIVITIES?

- If your child is 8 or below and is exhibiting an animal, you will choose the "Novice" pull down from the age divisions. This will sign them up for all activities and showmanship.
- If your child is 8 or below and is not exhibiting an animal, you will choose "Novice" and the cost will be \$30 for materials. (This will include a t-shirt & bag)

WE LOVE OUR
LITTLES!

Meet the **JUDGES...**

JOHN MCCURRY - KANSAS

Owned Maine-Anjou
Maine Angus Females
Fullblood Females,
Bred & Owned MaineTainer Females
Bulls

Owns and manages McCurry Angus Ranch with his wife, Melody and two daughters, Aubree, Molly and son, Drew. McCurry Angus Ranch is a purebred Angus and commercial cow operation that is striving to produce bulls for their annual bull in March where they will market 120 Angus bulls through the sale and private treaty.

John attended Butler Community College and Kansas State University on the Livestock Judging scholarship and was a member of the Reserve National Senior College Team in 2003.

John and his family raised and showed the National Junior Angus Show Champion Female in 2003, Reserve Female in 2004 and the Champion Bred and Owned Bull in 2005. John served on the junior board from 2001-2003. John is a true believer in Junior Livestock Associations and accredits it for much success in his own life. John is very proud that his family was awarded the 2015 Beef Improvement Federation Seedstock Producer of the Year, 2016 Champion Angus Heifer Pen Show at NWSS and 2017 Reserve Champion Angus Heifer Pen Show at the NWSS.

BRIGHAM STEWART - KANSAS

Owned MaineTainers
Prospect Steers
Progress Steers,
Bred & Owned Maine-Anjou Females

A sixth generation stockman from Washington, Kan. Stewart was born and raised on his family operation, Mid-Continent Farms. Stewart graduated from Kansas State University where he earned a Bachelor of Science degree in Animal Sciences and Industry. An accomplished livestock evaluator, Stewart has judged across the country, including NAILE, American Royal and Junior Nationals.

Brigham currently helps manage his family's ranch of over 1,000 cows and registered cattle in six breeds. No stranger to the showing, Mid Continent Farms has produced and exhibited numerous champions at state fairs and national shows over the last several years.

ALL AROUND SCHOLARSHIP

\$750 CHAMPION

\$250 CHAMPION

Sponsored by Alicia Rigdon

The All Around Senior Scholarship is provided by Alicia Rigdon and is available to all participating senior exhibitors. Exhibitors qualify for this scholarship during the junior national by acquiring points for participation & showing.

Scholarship winners will be announced prior to the selection of the Grand Champion Female

QUALIFICATIONS

- Must be in the Senior Division.
- Can be eligible to win the scholarship more than once.
- Based on participation in both contests and the show.
- Must show and own an animal.
- Must participate in at least 3 contests.
- Showing/owning bred and owned animals will be eligible for double placement points.
- Points are given for all animals shown.
- Points are also given for other participation in Jr. Board activities and Queen Contest
- A Tie will be broken by total participation including: number of contests, number of animals shown and number of additional activities
- You do not apply for this scholarship

HERDSMAN SCHOLARSHIP

To date, the Herdsman Group has awarded over \$90,000 in scholarships to hardworking AJMAA youth. It is the goal of the Herdsman to provide opportunities for young members who portray a positive attitude and determined work ethic.

2012

\$1,000, Rashaee Blakley

2013

\$1,500, Jon Heaton

2014

\$1,500, Bailey Core

\$1,500, Adison Niese
\$1,500, Kaleb Miller

VINCENT BLAKLEY

MEMORIAL SCHOLARSHIP

\$500

QUALIFICATIONS

The Vincent Blakley Memorial was established in 2020 to honor the late Vincent Blakley. A distinguished beef cattleman, "Vinny" was a mentor to countless youth along the show road and in the Maine-Anjou community.

This scholarship was established in his honor and is available to all Maine-Anjou seniors who display the Maine-Anjou the Maine-Anjou family values through herdsmanship and an independent spirit.

The scholarship winner will be chosen by the Vincent Blakley Memorial Scholarship Committee at this summer's National Junior Heifer Show in Lima, Ohio.

Meet the **INTERNS...**

Kalli Ellis - Activities, Junior National & Voice Intern

Hometown: La Ward, Texas

College: Kalli is a graduate student at Oklahoma State University, earning a Master of Science in International Agriculture with an emphasis in communications. Kalli received her Bachelor of Science in Agricultural Communications and Journalism from Texas A&M University.

Kalli grew up in South Texas where her family farms corn, cotton, runs commercial cattle and a purebred Beefmaster herd. She grew up showing Beefmaster and Charolais cattle. Kalli now serves as a director for the Beefmaster Promotion Group and help coordinates open shows and fundraise for the BPG. Kalli is a member of the National convention committee and the Public relation and advertising committee within Beefmaster Breeders United. While she was at Texas A&M, she was involved in Saddle and Sirloin and the Agricultural Communicators of Tomorrow club.

Kalli is looking forward to helping plan the best Maine-Anjou Junior National yet.

Sydney Williams - Junior National Show Intern

Hometown: Wisner, Nebraska

College: Sydney currently attends the University of Nebraska in Lincoln, Neb., where she is pursuing a degree in Animal Science with a focus on food animal production and management and will graduate in December of 2020.

Sydney grew up showing cattle and goats at the local, state and national level. She was an exhibitor at Maine/Chi junior national for 9 years. Sydney has exhibited cattle at almost every major show including Kansas City, Louisville and the National Western Stock Show. Sydney graduated high school in 2016 and attend Northeastern Junior College in Sterling, Colo., where she was on their junior collegiate livestock judging team. She transferred to the University of Nebraska in fall of 2018 and judged at the senior college level for the University in 2019.

Sydney is super excited to work with the junior exhibitors and their families at this year's junior national and is also looking forward to meeting new people through this internship and making connections.

DEDICATION

We have one goal at Wahl: to help you become a better animal expert.

Our quality products provide the durability and performance that make your routine rewarding and full of pride.

It is a simple Wahl formula: dependable products backed with the heritage and know-how to support rewarding results. Discover the pride that can be achieved when you use the right tools.

Join the family. Realize the satisfaction of a well-done job with Wahl and count yourself amongst our successful animal experts.

MAINE-ANJOU

Announcements, News & Events

NEW MEMBERS:

All new members must choose a program when submitting a new membership. The two programs that are offered are MAPP and Breeders Choice. More information on these two programs is available by visiting maine-anjou.org and clicking on "Member Services" "MAPP Agreement." If a membership is submitted without choosing a program, the new member will be placed in the Breeders Choice program.

MEMBERSHIP ACCOUNTS

It is the AMAA policy to only share account information with those authorized on an active account, no matter the age of the account holder. The account holder must provide written permission to add a person(s) to their account to transfer and register on their behalf. Anyone that is not authorized on an account will not be provided passwords or invoice information no matter the age or relation to the account holder. The account holder is the only one that can call or e-mail the AMAA directly to remove or add any person(s) to/from their account. Any authorized person on the account can register, transfer, obtain or change passwords once they are on the account.

2020 DUES

If you have not paid your 2020 dues please do so as soon as possible. Dues run from January 1 to December 31 of each year no matter when you pay them. Active adult accounts will receive the Voice magazine as long as dues are current. You may pay your dues by logging into your online account.

HELPFUL TIPS WHEN REGISTERING:

To avoid delays in your registration work during our busy season follow the tips below.

Double check that all blanks and information are correct and complete before mailing or submitting online.

Things most commonly missed are:

- o Missing herd prefix and herd ID
- o Birthdates
- o Date of sale
- o Name of animal
- o Payment

Make sure the person that is registering the animal owns the dam with the exception of ET calves. If an ET calf, make sure the donor dam has DNA verified and has been PHA & TH tested with the results on file. If you are checking on testing work please e-mail Paige at paige@amaapc.com. When calling or e-mailing please have the name and breeder number of the person submitting the work.

When registering annual active dams for performance only animals please submit them online if you have the capabilities. This will help the registrar processing tremendously.

We appreciate you and your business and want to make sure that the registration process runs as smooth as possible. Thank you in advance for your extra time in making sure all work is correct, complete and received in a timely manner.

REGISTRATIONS:

Please dispose of any old registration and self-billing worksheets. The AMAA will no longer offer a 10% online discount for

registration work that is completed through Digital Beef.

The AMAA will assess a \$5 fee for any registration work received by fax, e-mail or by mail. To avoid this fee, please log into your online Digital Beef account to complete all registration work. New forms can be downloaded from our main webpage under Digital Beef/ Registrations – Printable Forms. If you need assistance logging into your online account please contact us at maine@amaapc.com.

If work is faxed or e-mailed it is the responsibility of the breeder to give us a follow up phone call to make sure that the work is legible and to cover all fees.

BLOCK REGISTRATION DISCOUNTS:

Want to save on registration costs? Consider pre-paying for a block of registrations. The cost savings are as follows:

- 15 head - 12%
- 25 head - 15%
- 50 head - 20%
- 75 head - 25%
- 100 head - 30%

Blocks may only be used on animals under 13 months of age and may not be used on steers or foundation animals. Blocks will only be valid from January 1 - December 31 of each year. Any unused block registration numbers will expire. If you are interested in learning more about block purchases, please contact us at 816-431-9950.

MAPP ENROLLMENT

Anyone who received a MAPP (Maine-Anjou Performance Program) invoice in January-March 2020 and

MAINE-ANJOU

Announcements, News & Events

did not pay, has been removed from MAPP and will have to pay \$50 reactivation fee plus their current MAPP fees to get back in the program. Enrollment for 2021 will start September 1, 2020

FOUNDATION ANIMALS:

Non-registered bulls and females must be entered as a foundation animal prior to progeny being registered. All current "P" (performance only) cattle will be grand-fathered into the program. If the sire is an AI sire and registered at another breed association, the pedigree and testing must be on file with the AMAA. The charge to add a sire pedigree will be a one-time charge of \$40. If the AMAA finds that the pedigree has already been paid for by another breeder, the \$40 charge will not be applied. Dams registered at another breed association may also be added for a one-time charge of \$25. See the new self-billing sheet for foundation fees.

ONLINE TRANSFERS:

When transferring an animal online make sure there is not a member number already created for the buyer. Creating more than one number for an individual creates registration problems later. If you find the buyer in the system at a different address please notify the buyer first to confirm the address and then notify the AMAA office to update the account. It is always a good idea to always search for the buyer using the search tool before doing the work, that way if they have a different address it is caught before entering the registration and transfer.

When creating a new profile for a

buyer please make sure to never give a junior a farm name. Please enter the junior's name on the farm line and also as the contact.

RUSH ORDERS:

If you are selling an animal, we ask that you register and transfer the animal in a timely manner to avoid extra charges and to assure buyers they are purchasing from a reputable business person.

Rushes will be done in the order received; a rush fee is currently \$50 (covers eight head). No work will be released until payment is complete.

Rush work is processed ahead of the regular work that is received in our office and mailed by regular mail within one to two business days. We will do our best to complete rush work that is received in our office by 2 p.m. (Monday – Friday). There is no same-day turnaround. If requiring a registration number only, it will still be considered a rush as we still have to process the work to obtain the number.

DNA, TH AND PHA REQUIREMENTS:

Prior to registering any ET calves, all donor dams (including commercial or non-registered dams) must have DNA, TH and PHA on file in our office. Also, all AI sires are required to have the same on file. Therefore, our office will hold any ET registrations submitted out of dams without testing on file as well as all registrations out of AI sires that do not have complete testing on file.

If the donor dam is deceased and not tested, we do require that the ET(s) have the tests done, in the

absence of the donor's records.

The DNA, TH and PHA testing can be done at GeneSeek. A submission form is found on our Web site, maine-anjou.org. **Samples must be on a hair card, blood card or TSU in order to be submitted. Sampling supplies can be ordered on our website under the Genetics/Testing tab. Animals must be in the AMAA herd book before testing can be requested.**

Please note that testing takes approximately 3-4 weeks from the time the sample arrives at the lab.

We would like to start sending the test results by e-mail only, please make sure we have an up-to-date e-mail address for you, if applicable.

BULL CALF REGISTRATION:

If registering a bull calf born after Jan. 1, 2014, it must be TH/PHA free by parentage or have testing completed prior to registering and on file with the AMAA. Carriers will no longer be registered, but may be entered as a foundation animal. All progeny out of a Foundation carrier bull needs to be tested free of that defect prior to registration. If registrations are submitted before testing has been completed, the animal will not be registered. Instead the animal will be given a performance number at a non-refundable penalty charge of \$10. Once the animal has been tested the registration may be completed at the regular rate. Please plan accordingly as testing can take up to three or four weeks.

MAINE-ANJOU

Announcements, News & Events

MAINE ANGUS PAPERS:

If you wish to obtain a Maine Angus registration select the MA/Angus box when registering online. You will receive an error that AMAA staff must check the testing and percentage requirements, please make sure to validate your entry to save it so that AMAA staff can check the entry. If you submit a registration on paper, please put Maine Angus in the comment section of the application. If the animal does not qualify as a Maine Angus it will be recoded as a MaineTainer.

A Maine Angus paper will be blue in color, have Maine Angus under the Maine logo, and will have MaineTainer across the center of the paper. The animal can be shown as a MaineTainer if there is not a Maine Angus division at the show.

MAINE/ANGUS REQUIREMENTS

• Maine Angus refers to cattle with the following characteristics:

• **The animal will have between 3/8 Maine-Anjou to 5/8**

Maine-Anjou blood and have between 3/8 registered Angus to 5/8 registered Angus and/or registered Red Angus blood.

• The standard is both parents must be registered at the AMAA, American Angus Association (AAA) or Red Angus Association of America (RAAA) will provide validated lineage.

• **Qualifying cattle can have no more than 1/8 of non-registered blood or other breeds.**

• A registered Maine Angus bull must be proven free of genetic defects PHA and TH. Depending

on the Maine Angus bull's genetic makeup, the individual must also be proven free of known Angus lethal genetic defects (Ex. AM, NH and CA) and/or known lethal Red Angus genetic defects (Ex. AM, NH, CA and OS) whether determined by pedigree or test.

• A registered Maine Angus female must be proven free of PHA and TH, whether identified by pedigree or test.

MAINE ANGUS COLOR REQUIREMENTS:

• All qualifying individuals will be predominately solid black or red in color. White markings are only allowed on the underline and switch of the tail.

• Starting Jan. 1, 2019 all animals that have qualified and registered as Maine Angus prior to Jan. 1, 2019 will retain their Maine Angus papers but will not be able to exhibit/show in the Maine Angus division, however, these animals are eligible to show as MaineTainers.

OTHER AMAA UPDATES:

Please make sure to update any change in address, phone numbers or e-mails with the AMAA by e-mailing us at maine@amaapc.com, or by logging into your online account. If you have a credit card on file and have received a new card, please make sure to call us to replace the new card on file. Credit cards are not automatically saved when paying online.

MAINE-ANJOU CATTLE FOR SALE:

Looking for cattle to purchase or consign? Do not forget to check out our consignment sale list located at the top of the Digital Beef Cattle search screen called "Maine-Anjou Cattle for Sale." Active breeders may use this tool at any time to consign animals as long as you have a login for Digital Beef.

NATIONAL SHOWS

Anyone showing in a junior or open class at the national level must be an active member with the AMAA or American Maine-Anjou Junior Association (AJMAA). Junior members exhibiting at these shows must be the sole owner of the animal they are showing.

MAINE

WHAT IS MAINE ANGUS?

The Maine Angus program is an initiative created by the American Maine-Anjou Association (AMAA) to showcase the complementation of Maine-Anjou genetics when crossed with Angus or Red Angus cattle. This program will reveal Maine-Anjou cattle's ability to enhance feed efficiency and red meat yield when placed on British based genetics. This program should provide seedstock that will increase production and carcass yield through heterosis.

The name Maine Angus is both strong and informative by stating exactly what breeds are present in said animal.

The standard requirement is that both parents must be registered at the AMAA, American Angus Association (AAA) or Red Angus Association of America (RAAA). This will provide confirmed lineage and genetic information along with valuable EPDs. Through a partnership with the AAA our EPDs will be updated with the latest genetic evaluation by the AAA which will provide the breeders and customers the best genetic prediction available. This program is focused on producing quality registered offspring that will aid in the incorporation of Maine-Anjou genetics into the mainstream of the USA beef sector.

PROGRAM STANDARDS

Maine Angus refers to cattle with the following characteristics:

- The animal will have between 3/8 Maine-Anjou to 5/8 Maine-Anjou blood and have between 3/8 registered Angus to 5/8 registered Angus and/or registered Red Angus blood.

- Both parents must be registered at the AMAA, AAA or RAAA to confirm lineage.
- Qualifying cattle can have no more than 1/8 of non-registered blood or other breeds.
- A registered Maine Angus bull must be proven free of genetic defects PHA and TH. Depending on the Maine Angus bull's genetic makeup, the individual must also be proven free of known Angus lethal genetic defects (Ex. AM, NH and CA) and/or known lethal Red Angus genetic defects (Ex. AM, NH, CA and OS) whether determined by pedigree or test.
- A registered Maine Angus female must be proven free of PHA and TH, whether identified by pedigree or test.

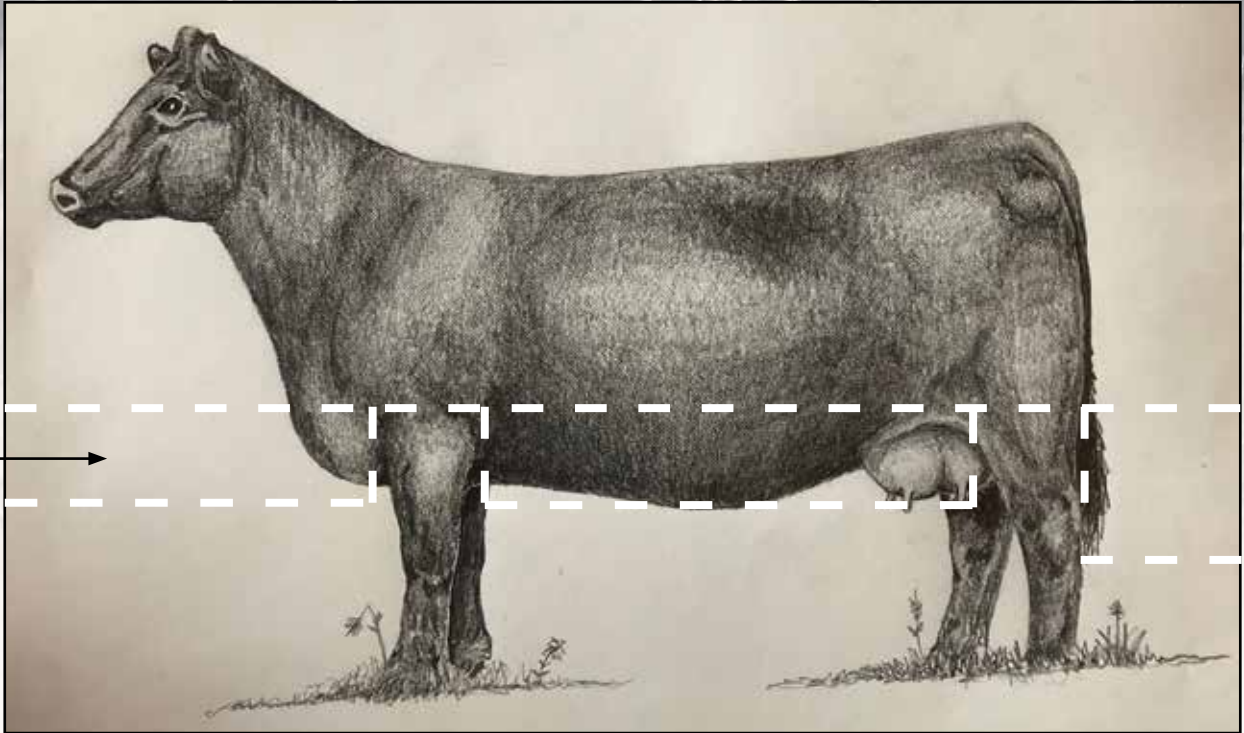

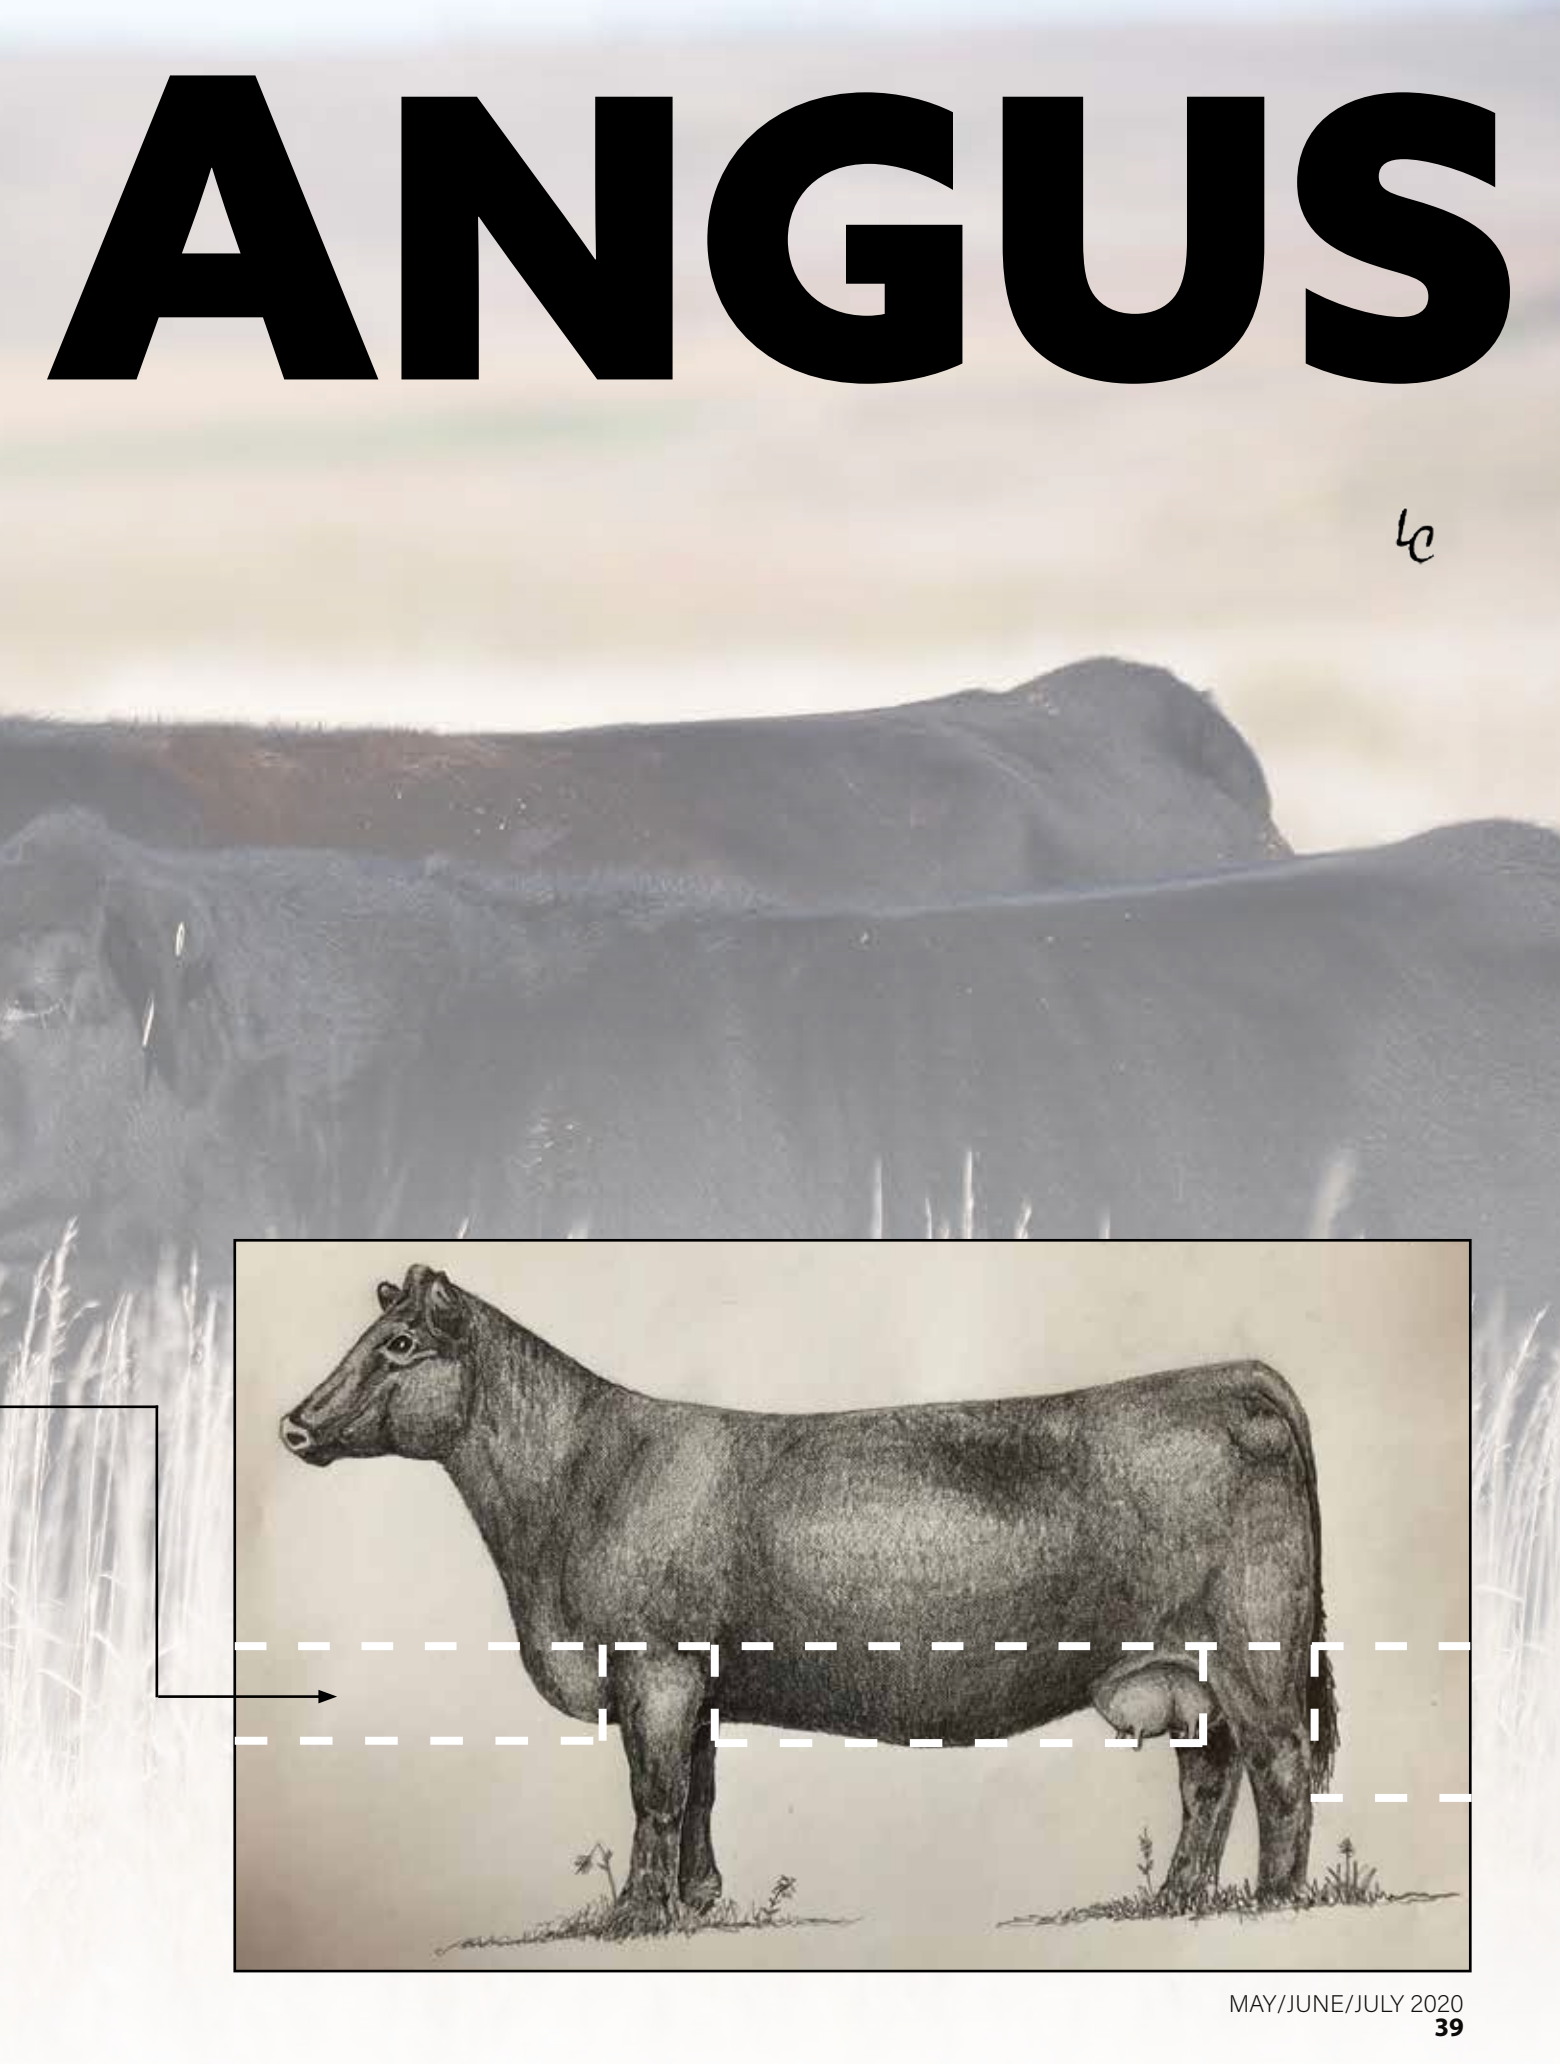

MAINE ANGUS COLOR STANDARDS

All qualifying individuals will be predominately solid black or red in color. White markings are only allowed on the underline and switch of the tail. Feet and legs must be solid black or red.

- NOTE: All Maine Angus animals that do not meet the color requirement, but were registered prior to Jan. 1, 2019, will retain their Maine Angus papers. They will not be able to exhibit/show in the Maine Angus division, but are still eligible to show as MaineTainers.
- If an animal is registered Maine Angus, but is found to not meet the color requirements, they will be reverted to a MaineTainer registration.

MEMBERSHIP APPLICATION 2020

**NEW MEMBERS MUST CHOOSE A REGISTRATION PROGRAM TO BE ABLE TO REGISTER
PROGRAMS OFFERED ARE BREEDER’S CHOICE OR MAPP**

Breeder’s Choice is the basic program – EPD data will not be provided on registration work or be eligible for a \$10 registration discount.

MAPP – Maine Anjou Performance Program – requires MAPP contract signed to acknowledge the rules of such program. Those that select MAPP will be required to pay dues by January 1 of each year and will also be required to enroll all AMAA active dams by AMAA set due date each year. A \$5.00 assessment fee is charged per active dam enrolled. Please print the agreement from our website; link named “MAPP Agreement” and return it to AMAA with your application. Please select a program below:

MAPP Program: Fax, email or mail agreement to AMAA as soon as possible

Breeder’s Choice

Signature of Applicant: _____ Guardian Signature: _____

You shop, Amazon gives!

Recently the AJMAA & AMAA teamed up with AmazonSmile. The AmazonSmile program will give back a percentage to the Association for every qualifying purchase that you make on your Amazon account. NOTE Amazon will make the donation based on a percentage of your purchase -YOU WILL NOT BE CHARGED FOR THE DONATION!

Listed below is how it works. When selecting your charitable organization, please select:

Reaching Beyond Maine-Anjou Foundation.

All proceeds will benefit the AMAA foundation and junior programs.

What is AmazonSmile?

AmazonSmile is a simple and automatic way for you to support your favorite charitable organization every time you shop, at no cost to you. When you shop at smile.amazon.com, you'll find the exact same low prices, vast selection and convenient shopping experience as Amazon.com, with the added bonus that Amazon will donate a portion of the purchase price to your favorite charitable organization. You can choose from nearly one million organizations to support.

How do I shop at AmazonSmile?

To shop at AmazonSmile simply go to smile.amazon.com from the web browser on your computer or mobile device. You may also want to add a bookmark to smile.amazon.com to make it even easier to return and start your shopping at AmazonSmile.

Which products on AmazonSmile are eligible for charitable donations?

Tens of millions of products on AmazonSmile are eligible for donations. You will see eligible products marked "Eligible for AmazonSmile donation" on their product detail pages. Recurring Subscribe-and-Save purchases and subscription renewals are not currently eligible.

Can I use my existing Amazon.com account on AmazonSmile?

Yes, you use the same account on Amazon.com and AmazonSmile. Your shopping cart, Wish List, wedding or baby registry, and other account settings are also the same.

How do I select a charitable organization to support when shopping on AmazonSmile?

On your first visit to AmazonSmile (smile.amazon.com), you need to select a charitable organization to receive donations from eligible purchases before you begin shopping. We will remember your selection, and then every eligible purchase you make at smile.amazon.com will result in a donation.

Please feel free to contact Lindsey with any questions you may have, (816) 858-9954.

THE ALL AMERICAN ... point season ran from March 2019 to March 2020. Points were awarded for all open Maine-Anjou shows that were reported to the American Maine-Anjou Association (AMAA) office during that time, as reported by that show's office. Shows of less than 40 head receive half points, shows of more than 40 head receive full points, while animals exhibited at the American Royal, Kansas City, Mo., North American International Livestock Exposition, Louisville, Ky, National Western Stock Show, Denver, Colo., and Southwestern Exposition and Livestock Show, Fort Worth, Texas, receive double points.

In order to qualify for the All American program, animals must be exhibited at a minimum of two double point shows. Breeders and owners of cattle are listed according to the AMAA database during the point season.

BREEDER OF THE YEAR

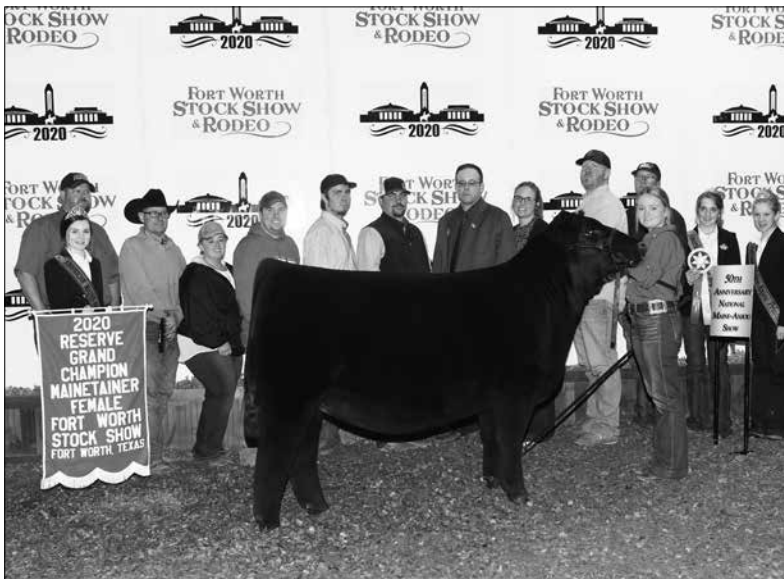

2019-2020

Willow Spring Cattle Co.

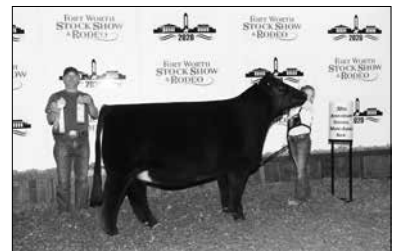

Prairie Grove, Ark.

WSSC Pringcess 67F ET - Many time champion Maine Angus/MaineTainer Show by Taylor Goering, McPherson, Kan.

WSSC Ali 33G ET - Many time champion MaineTainer. Shown by Cassidy Barker, Kearney, Mo.

WILLOW SPRINGS CATTLE COMPANY is owned and operated by Eric, Lindsay, Mason, Whitney & Catelyn Walker and is located in Prairie Grove, Ark. The WSSC prefix has been a constant figure and is easily recognized among cattlemen. A champion for the breed, their customers and in the ring, the American Maine-Anjou Association would like to congratulate the entire Willow Springs crew on their success as the 2019-2020 Breeder of the Year.

EXHIBITOR OF THE YEAR

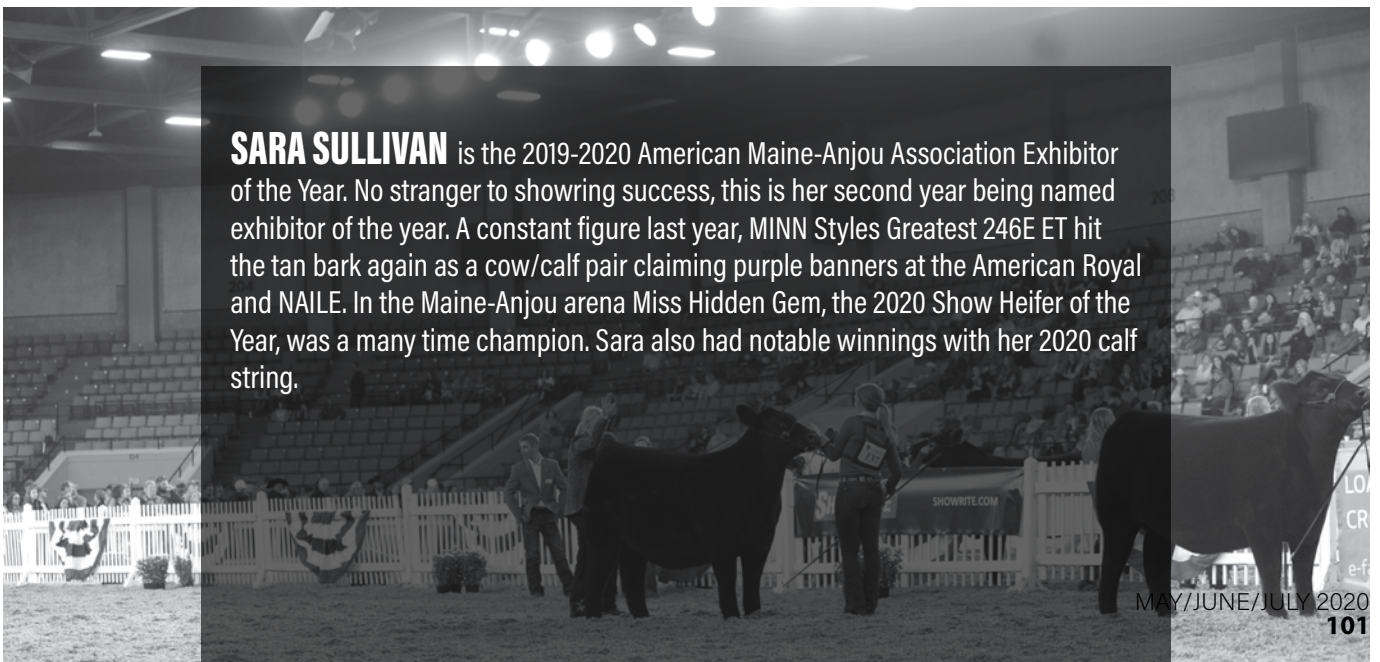

2019-2020

Sara Sullivan

DUNLAP, IOWA

SARA SULLIVAN is the 2019-2020 American Maine-Anjou Association Exhibitor of the Year. No stranger to showing success, this is her second year being named exhibitor of the year. A constant figure last year, MINN Styles Greatest 246E ET hit the tan bark again as a cow/calf pair claiming purple banners at the American Royal and NAILE. In the Maine-Anjou arena Miss Hidden Gem, the 2020 Show Heifer of the Year, was a many time champion. Sara also had notable winnings with her 2020 calf string.

CORNERSTONE DAMS

PEAK PRODUCTION THROUGH GENETIC SUPERIORITY - BUILDING FOR GENERATIONS TO COME

MAINE-ANJOU AND MAINETAINER TOP PRODUCING FEMALES

The American Maine-Anjou Association (AMAA) is proud to recognize the breeding programs that have bred, or now own, these top female genetic packages! The reporting of accurate data in contemporary groups that have meaning is of untold value to the genetic progress of the Maine-Anjou breed. The females represented in the Cornerstone gallery of Gold, Silver and Bronze designations are the "curve benders" of the breed. I would invite you to follow up and visit the breeding operations that measure their progress of genetic advancement.

The listed dams are the 2019 honorees. Each dam listed has met the following criteria:

- Dams must be active, with their most recent calf born after Dec. 31, 2019 with performance data submitted to the AMAA.
- Dams must have first calf between 18 and 30 months of age (584 and 913 days).
- The interval between a dam's first and second calf must be no more than 410 days.
- Embryo transplant calves are not used in determining calving intervals or average weaning ratios.
- Twins are used in calculating calving intervals, but not average weaning ratios.
- The average weaning ratio of all of the cows' calves must be at least 104.5.

TRAIT LEADERS

Congratulations to the breeders and owners of this exclusive group! The sires that are listed meet the criteria set forth. Levels of accuracy and current use within the Maine-Anjou breed are key components in making this elite list.

PERFORMANCE TRAIT LEADERS - DAMS

A. Sires must rank in top 10% of breed for a selected trait.

B. Show a minimum of 70% accuracy for a selected trait.

C. Have produced a minimum of 10 registered progeny in the last three years. (After 2016 and before 2020).

MATTISON BEATTIE

2020 AMERICAN MAINE-ANJOU QUEEN - A YEAR IN REVIEW

BY MATTISON BEATTIE

Every time I put on the American Maine-Anjou Association (AMAA) Queen sash and secure my tiara, I feel a sense of pride and I feel honored to be representing, in my opinion, the best cattle breed in the industry. My journey of becoming the American Maine-Anjou Queen started at my first junior national in 2018. The Grand Fiesta was a show I will never forget. It was the week that opened my eyes to so many opportunities within the breed. My dream since then was to someday become the queen of the association, however, I was not expecting it to come true so soon!

My name is Mattison Beattie. I am 16 years old and a sophomore in high school. I live in Sumner, Neb., where I have grown up on a sixth generation diversified farm. I have been showing Maine-Anjou cattle since I was eight years old and I have enjoyed every minute of it. Showing cattle has taught me many lessons and skills that cannot be taught in a classroom and the relationships I have created through my showing career are unreal. The wonderful thing about being involved in this breed association is it is not only about showing and winning banners. There are so many different opportunities that bring members together from all over the country that help

define each of us and help shape those who are involved into better leaders.

Being the Maine-Anjou Queen has been an experience that I will cherish forever. During my term, the two princesses, Jacie Wolfinger and Emma Yochum, and I had the chance to travel around the country and attend all four National shows. We helped in the ring and handed out awards

I would encourage all of you to be bold during this year's show and become more involved in this outstanding breed association that you are a part of.

at the American Royal in Kansas City, North American International Livestock Exhibition in Louisville, National Western Stock Show in Denver, and my personal favorite, the Fort Worth Stock Show. When assisting in the ring at each show, it was truly amazing to be able to analyze each and every high quality Maine heifer that walked through. It made me realize the value and quality that this association has to offer for the cattle industry. From my experience of being Queen, the thing I will hold on to forever is the relationships and connections that I made with judges, board members, junior board members and other people involved in the Maine-Anjou breed.

As my Queen term comes to a close, I

will not look at it as the end, but instead the beginning of my journey through the American Junior Maine-Anjou Association. I am thrilled for this year's junior national in Lima, Ohio! I would encourage all of you to be bold during this year's show and become more involved in this outstanding breed association that you are a part of. Take advantage of the life changing opportunities offered within the breed. The princesses and I are planning several activities and are continuing the Queen's Tea during this year's show. I am looking forward to seeing you all there and to meeting more of you Lima. I am eager to see who the new 2020-2021 American Maine-Anjou Queen will be!

MAINE-ANJOU

Rules & Regulations

BULLS

- All bulls born after January 1, 2014 must be TH and PHA free by test or pedigree in order to register. If a bull is found to be a carrier, he can register as a foundation or performance bull only, but all progeny will have to test free of that defect in order to register. Foundation bulls will carry their Maine-Anjou percentage to their offspring.
- All AI sires, regardless of breed and/or commercial, must have DNA, TH and PHA on file prior to registering any progeny.
- Maine Angus bulls must be TH and PHA free as well as AM, NH and CA free for black Angus and AM, NH, CA and OS free for Red Angus

FEMALES

- Carrier heifers out of carrier bulls born after January 1, 2014 can only be registered as foundation or performance only. Foundation carriers will carry their Maine-Anjou percentage to their offspring, but their offsprings must test free of that defect.
- All donor dams must have DNA, TH and PHA on file prior to registering their ET calves. If a donor is dead before a sample was procured, you must DNA, TH and PHA test all ET calves in order to register them.
- Maine Angus heifers must be TH and PHA free.

2020 SIRE SUMMARY

practical || profitable || predictable

WHAT ARE EPDs?

Expected Progeny Differences (EPDs) may be used to estimate how future progeny of the subject animal will compare to progeny of other animals within the breed. The key words are estimate, future, compare and within breed. EPDs are not designed to predict the performance of one or two progeny of a sire, but rather should be used to compare bulls based on estimated progeny performance. EPDs predict differences, not absolutes. They describe the genetic value of an animal much like a feed tag describes the contents of a feed sack.

EPDs are computed as part of the AMAA National Cattle Evaluation (NCE) program. The NCE program represents the application of the most recent genetic and computing technology for calculating EPDs for beef cattle. The Maine-Anjou NCE program incorporates all available performance into the prediction of an individual's EPD for a specific trait.

An EPD may be based on any combination of individual performance, pedigree and progeny performance information. In addition, EPDs are more accurate than anything previously available because they account for the following factors:

- Genetic value of cows to which a bull is bred
- Environmental differences affecting contemporary groups
- Genetic values of other parents in the contemporary group.
- Genetic trend

EPDs are reported in pounds for birth weight, weaning weight, maternal milk, maternal milk & growth and yearling weight.

EXAMPLE LISTING AND TRAIT DEFINITIONS

Main & Young Listings					Carcass Listings

1. SIRE INFORMATION

Sires alphabetical registered name. Also included in this column are the bull's date of birth, registration number, breed percentage, color (if available), horned/polled/scurred status, sire (S), breeder (B) and current owners (O).

2. CALVING EASE

Calving ease EPD describes the heritable component of a sire's ability to produce calves with minimal dystocia or calving difficulty when mated to heifers. It is the best selection tool to use to reduce dystocia. A sire with an 9.0 CE EPD is expected to 6% more unassisted births than a sire with a 3.0 CE EPD. Units are in percentage of additional unassisted births.

3. BIRTH WEIGHT

Progeny can be expected to weight 1.2lbs more at birth than progeny sired by a bull with an EPD of 0.3 lb. (1.5 minus 0.3 = 1.2 lb.) Birth weight is an indicator of calving ease. Larger birth weight EPDs usually indicate more calving difficulty.

4. WEANING WEIGHT

Weaning EPD reflects pre-weaning growth. Calves sired by the above bull should have a 16 lb. advantage in 205-day adjusted weaning weight compared to calves sired by a bull with an EPD of 32.0 lb. (48.0 minus 32.0 = 16 lb.)

5. YEARLING WEIGHT

Yearling EPD for this sire indicates his progeny should be 16 lb. above the average of progeny of a bull with an EPD of 54 lb. Yearling EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

6. MATERNAL CALVING EASE

Maternal Calving Ease provides an indicator of the ability of a sire's daughters to calve unassisted. Units of measure are additional percentage of unassisted births. A sire MCE EPD of 4.2 is expected to sire daughter that have 4% more unassisted births than a bull with a 0.2 MCE EPD.

7. MATERNAL MILK

The milking ability of a sire's daughters expressed in pounds of calf weaned. It predicts the difference in average weaning weight of sires' daughters' progeny due to milking ability. Daughters of the sire in the above example should produce progeny with 205-day weights averaging 4.1 lb. more (as a result of greater milk production) than daughters of a bull with a maternal milk EPD of 10.8 lb. (14.9 minus 10.8 = 4.1 lb.). This difference in weaning weight is due to total milk production over the entire lactation.

EXAMPLE LISTING AND TRAIT DEFINITIONS (CONTINUED)

8. TOTAL MATERNAL

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. The bull in the above example should sire daughters with progeny weaning weights averaging 5 lb. heavier than progeny of a bull's daughters with a Maternal Milk & Growth EPD of 34 lb. (39 minus 34 = 5 lb.). It is equal to one-half the sire's weaning weight EPD, plus all of his milk EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. This EPD is sometimes referred to as "total maternal" or "combined maternal."

9. CARCASS WEIGHT

Carcass Weight EPD reflects differences in the 450-day adjusted hot carcass weight (pounds) of progeny. Carcass Weight EPD for this sire indicates his progeny should be 18.0 lb. above the average of progeny of a bull with an EPD of 0.0 lb.

10. FAT THICKNESS

Fat Thickness EPD reflects expected differences in a sire's progeny for the carcass measurement of inches of 12th rib fat thickness. A negative Fat Thickness EPD reflects the expectation of progeny having less fat thickness (leaner carcass). Fat thickness is one of the components used to determine USDA Yield Grade and estimates of cutability.

11. RIB-EYE AREA

Rib-eye Area EPD reflects expected differences in a sire's progeny for the carcass measurement of square inches of rib-eye area

taken between the 12th and 13th ribs. Rib eye area is one of the components used to determine USDA Yield Grade and estimates of cutability. Positive Rib-eye Area EPDs are reflective larger average progeny rib-eye area.

12. MARBLING

Marbling EPD reflects differences in expected progeny marbling scores (intramuscular fat). Marbling EPD is measured in marbling score units. For example the progeny of a sire that has a Marbling EPD of 0.50 would be expected to average one-half marbling score better than progeny of a sire with Marbling EPD 0.00.

13. PERCENT RETAIL CUT

Percent Retail Cuts EPD reflects the expected genetic differences in the percentage of boneless closely trimmed retail cuts (PBCTRC) of progeny. PBCTRC is a measure of cutability and is closely related to USDA Yield Grade. Positive values represent expectations of progeny with more desirable cutability (a higher percentage of retail cuts).

14. HERDS

Number of herds in which progeny were raised with recorded measurements for each specific trait. Number of herds gives a general indication of progeny distribution.

15. PROGENY

The number of progeny sired by the bull with recorded measurements for each specific trait. Number of progeny should not be used in lieu of accuracy, but simply to further clarify accuracy values.

PERCENTILE BREAKDOWN OF EPDs

Percentile charts for the breed's active Maine-Anjou and MaineTainer sires (those producing a calf with a performance record since 2012) appear below. These can be used to get a better idea of how a bull ranks in the current group of active sires in the Maine-Anjou or MaineTainer breed groups. The chart is divided into 5 percent increments for each trait. The top 5 percent are further divided into 1 percent increments.

Very few bulls rank at the top in every trait, but through careful evaluation you should be able to find bulls to match your specifications. To see how the table may be used, let's look at our example bull used previously.

Since EPDs may be used to compare young bulls that are not parents, the average EPDs and ranges and a

percentile breakdown for animals born in 2011-2012 are also provided. These tables are useful for comparing the EPDs of calves born in these years. Moreover, since the recent change is relatively small, it can be used as a benchmark for all young calves.

The breakdown chart and EPD ranges for the active cows with a calf reported since Jan. 1, 2013, allow one to compare his or her herd with all active cows in the Maine-Anjou breed.

The Percentile Breakdown charts and Genetic Trend graphs for the MaineTainer cattle appear on pages 7 and 8.

GENETIC TRENDS

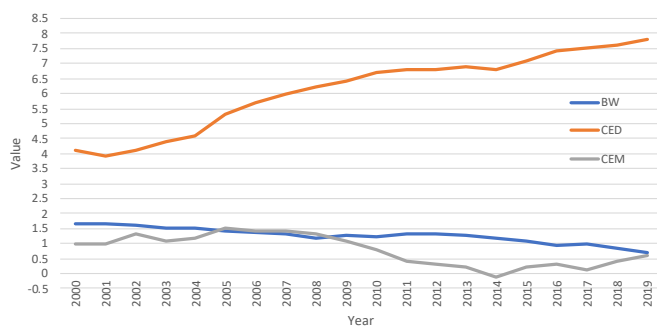

The graphs below illustrate the genetic trends in the Maine-Anjou and MaineTainer breed groups. All animals in the analysis were used to generate this information. This includes Fullblood and Purebred animals as well as lower percentage Maine-Anjou cattle. In general, the EPD changes from one year to the next are quite small.

This does not mean the performance of the cattle has not changed over the years. The actual weights taken on animals are phenotypic measurements. Phenotypic changes can be made through changing not only an animal's genetics, but also by changing an animal's environment.

QUESTIONS -AND- ANSWERS

If a bull has a yearling weight EPD of +80lb., does this mean he will add 80 lb. to yearling weights?

It is important to remember that EPDs do not predict performance; they merely allow us to compare the average expected performance of progeny of different bulls. This bull, when compared to another bull within the same breed with a 65 lb. yearling EPD, would be expected to produce an additional 15 lb. of yearling weight if both were randomly mated to a large number of cows in the same environment.

Does a +15 lb. milk EPD mean an extra 15 lb. of milk?

No. Maternal milk EPDs are expressed in pounds of calf weaning weight, not in pounds of milk. In an attempt to explain how this works, let's consider a contemporary group of calves where there is a prediction of how each calf should rank within that group based on weaning weight EPDs of the sires and dams represented. Assume that a bull has daughters that consistently wean calves that are 15 lb. above the predicted rank when compared to daughters of other bulls in the same contemporary group. This greater weaning weight is credited to milk production, even though other environmental factors may also play a role.

Do I need to know what the breed average is for birth weight before I select a bull?

Absolute breed averages for birth weight or any other traits do not exist because of non-genetic environmental factors such as climate, nutrition, management systems, etc. For example, we know that birth weights may be as much as 15 to 20 lb. lower in Florida than in Montana, strictly due to variation in temperature, humidity and grass quality. Thus, breed averages will vary from one herd to the next and the only way you will know what breed average is in your herd is with experience gained by using proven bulls with high accuracy. Remember, EPDs are meant to predict differences in progeny performance rather than determine absolute performance.

How much confidence can I have in an EPD with a low accuracy value less than .30?

If you were able to sample several bulls with low accuracy, on the average the EPDs would do a fairly good job of sorting the bulls into high, medium and low performance levels. However, when you are selecting only one bull, "on the average" is not good enough, so you really need to know the possible change associated with the given accuracy. For example, let's assume the minimum yearling weight you are willing to accept is 70 lb., and you were considering a bull with a yearling weight EPD of +85 lb. with an accuracy of .40. Next we look at the Possible Change Value table on page 3 and find a value of +15.4 for yearling weight with an accuracy of .40. This bull may work for you because +85 minus 15.4 is 69.6 lb., which is slightly lower than the acceptable level of 70 lb. It is true that the bull could stay the same or even go up in yearling weight EPD. You must decide how much risk you are willing to accept. For a given accuracy, approximately 67 percent of the bulls will not change more than plus or minus the possible change value when re-evaluated with additional progeny information. The table for converting accuracy to possible change is printed on page 3 of this Sire Summary. Please note that possible change values differ for each trait.

How are embryo transfer (ET) calves handled with respect to EPD values?

The performance records of ET calves are not considered in the calculation of EPDs for the animal or its sire and dam. The reason is because there is no way to account for the influence of the recipient female on the calf's performance. EPDs for ET animals are estimated using information from relatives until the animal has progeny with performance records.

Will mating a specific sire to my best cows affect his EPDs?

No. When calculating EPDs, the mates of a particular animal are accounted for in the analysis. In other words, breeding a sire to either high growth cows or low growth cows should not affect his EPDs. For example, let's say you have 50 cows. You breed your higher yearling weight EPD cows to Sire A and breed your lower yearling weight EPD cows to Sire B. Sire A's calves should weigh more at a year of age than Sire B's simply because of the dams. This type of mating is accounted for in the present statistical analysis.

How important is it to identify my contemporary groups correctly?

Extremely important. More inaccuracies in the genetic analysis occur from incorrectly identifying contemporary groups than any other single cause. Weaning Management Codes (feed code and group) must be used to distinguish calves which have had different opportunities to perform. Calves that have been treated differently should have different management codes.

Do I need to send in to AMAA the performance records of all my calves?

Absolutely YES. Sending in only your best calves really hurts your best sires and dams. You must record ALL calves for the analysis to be correct. If one calf has been sick and therefore weighs much less, simply give him a different management code. Also at birth, weighing the dead calves is just as important as the live calves.

Should calves out of my first-calf heifers be in separate contemporary groups than calves out of my older cows?

A contemporary group is a group of animals who have been treated alike. If you treat your first-calf heifers differently than your mature cows, those calves should be in different contemporary groups. If you treat your first-calf heifers identically to your mature cows, both sets of calves would be considered contemporaries. Use different management codes to identify separate contemporary groups. How you manage and feed your cows is totally your decision, but calves (or dams) treated differently should be grouped separately. If you treat your first-calf heifers better than your mature cows and still group them all together, the calves out of the first-calf heifers get the added adjusted weaning weight correction as well as the superior treatment.

GLOSSARY

ACCURACY (ACC)

A measure of certainty regarding the genetic merit of an animal. Accuracy values are calculated for each EPD according to Beef Improvement Federation (BIF) Guidelines and reported as a decimal number between zero and one. Larger values indicate greater accuracy.

BIRTH WEIGHT

Calf weight at birth adjusted to a mature dam equivalent. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average birth weight of a bull's calves compared to calves of all other bulls evaluated. When comparing birth weight EPDs of two sires, the larger EPD indicates a heavier average birth weight for calves sired by this bull.

CALVING EASE

Controlling the percentage of heifers experiencing dystocia during their first calving is a goal of many producers. Service sires mated to these heifers can have a large influence on the rate of calving difficulty or dystocia. Calving ease EPD describes the additional percentage of calves expected to be born unassisted. The CE EPD uses both calving ease scores for calves born to heifers and birth weights from calves born to all age of dam classifications to predict calving ease.

CARCASS WEIGHT

Carcass Weight EPD reflects differences in the 450-day adjusted hot carcass weight of progeny. Carcass Weight EPDs are estimated from progeny carcass weights and/or the genetically correlated ultrasound Scan Weight of the individual and/or progeny. Larger Carcass Weight EPDs are associated with heavier expected progeny average hot carcass weights. Carcass Weight EPD is expressed in pounds.

EXPECTED PROGENY DIFFERENCE (EPD)

The expected difference in performance of a bull's progeny when compared to the average progeny performance of all evaluated bulls. The EPD is a prediction of 1/2 of an animal's breeding value or its genetic value as a parent.

FAT THICKNESS

Fat Thickness EPD reflects expected differences in a sire's progeny for the carcass measurement of 12th rib fat thickness at a standard 450 days of age. The EPD is scaled in inches of fat thickness. A negative Fat Thickness EPD reflects the expectation of progeny having less fat thickness (leaner carcass) on average. Fat thickness is one of the components used to determine USDA Yield Grade and estimates of cutability.

GENETIC CORRELATION

Correlations between two traits that arise because the same genes affect both traits. When two traits are positively correlated (e.g. weaning and yearling weights) selection for an increase in one trait will result in an increase in the other trait. When two traits are negatively correlated (e.g. birth weight and calving ease) selection for an increase in one trait will result in a decrease in the other trait.

HERITABILITY

The proportion of variation observed in a trait that is due to heredity and is transmitted to offspring (i.e. additive gene action). Heritability varies from zero to one. The higher the heritability of a trait, the more rapid should be the response to selection.

MARBLING

Marbling EPD reflects differences in expected progeny marbling scores (intramuscular fat) at an age constant basis of 450 days. Marbling EPD is measured in marbling score units. For example the progeny of a sire that has a Marbling EPD of 0.50 would be expected to average one-half marbling score better than progeny of a sire with Marbling EPD 0.00. The USDA Quality Grade of Select contains animals that display marbling in the Slight score (Slight 00 - Slight 99). The Choice grade spans three marbling scoreS: Small 00 - Small 99

(Choice-), Modest 00 - Modest 99 (Choiceo) and Moderate 00 - Moderate 99 (Choice+).

MATERNAL CALVING EASE

In addition to the genetic influence a service sire has on the calving ease of a particular calf, there is a genetic component to the ability of a sire's daughters to calve unassisted. This genetic effect is described by MCE EPD. The unit of measure is in additional percentage of calves born unassisted to first calf heifers.

MATERNAL MILK

The maternal ability of a bull's daughters. Expected progeny performance is expressed in pounds of calf weaning weight. The EPD value predicts the difference in average 205-day weight of a bull's daughters' calves compared to calves from daughters of all other bulls evaluated. When comparing milk EPDs of two sires, the larger maternal milk EPD indicates heavier average weaning weights due to daughters' greater maternal ability.

MATERNAL WEANING WEIGHT

The weaning weight of a bull's daughters' calves. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average 205-day weight of a bull's daughters' calves compared to calves from daughters of all other bulls evaluated. The evaluation reflects both the maternal ability of a bull's daughters and the growth potential of their calves. When comparing maternal weaning weight EPDs of two sires, the larger maternal weaning weight EPD indicates heavier weaning weights due to daughters' ability to produce heavier calves.

PERCENT RETAIL CUTS

Percent Retail Cuts EPD reflects the expected genetic differences in the percentage of boneless closely trimmed retail cuts (PBCTRC) of progeny. PBCTRC is a measure of cutability and is closely related to USDA Yield Grade. Percent Retail Cuts EPD is computed as a linear index of Carcass Weight, Fat Thickness and Rib-eye Area EPDs. Positive values represent expectations of progeny with more desirable cutability (a higher percentage or retail cuts) on average.

RIB-EYE AREA

Rib-eye Area EPD reflects expected differences in a sire's progeny for the carcass measurement of rib-eye area taken between the 12th and 13th ribs at an age constant basis of 450 days of age. Rib-eye Area and Rib-eye Area EPD are measured in square inches. Rib eye area is one of the components used to determine USDA Yield Grade and estimates of cutability. Positive values represent expectations of progeny with larger average rib-eye area.

WEANING WEIGHT

Calf weight taken between 130 and 280 days of age and adjusted to 205 days of age and a mature dam equivalent. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average 205-day weight of a bull's calves compared to calves of all other bulls evaluated. When comparing weaning weight EPDs of two sires, the larger EPD indicates a heavier average weaning weight for calves sired by this bull.

YEARLING WEIGHT

Weight taken between 300 and 470 days of age and adjusted to 365 days of age and a mature dam equivalent. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average 365-day weight of a bull's progeny compared to progeny of all other evaluated bulls. When comparing yearling weight EPDs of two sires the larger EPD indicates a heavier average yearling weight for calves sired by this bull.

I'm Blakelee Hayes from Ada, Okla., and I'm your Region 3 Director. Currently, I'm a Sophomore at Oklahoma State University majoring in Ag Business.

I hope everyone is as excited about the summer show season that is quickly approaching. I know this spring has been a bit of a challenge for everyone due to the COVID-19. Hopefully, you've all taken this down time to rest, rejuvenate, set goals and value the time you've had with your families.

Although there has been time lost with friends and doing what we all love, showing cattle, I hope your time has been productive.

I am super excited about our upcoming Junior National in Lima, Ohio and getting to spend time with my Maine-Anjou family. The junior board has been hard at work preparing for this years junior nationals and we're already looking forward to 2021 in my home state of Oklahoma.

Take care, stay safe and be prepared to be "Livin' On Lima Time". I feel confident that you're going to enjoy every minute.

BUILDING ON A STRONG FOUNDATION

by Cam Fagerhaug

the Caffee Family

Hidden down a winding gravel road in central South Dakota, a legendary cowherd known for producing national showing champions grazes on rock speckled hillsides. A winner's backdrop fades into a rolling prairie landscape and that coveted judge's slap becomes a rancher's firm handshake. The Dave and Nancy Caffee Ranch cows might be known for their look, but these Maine-influenced herd matrons

are more than just a pretty face. Their genetics take them beyond the banner wins and provide a living for this ranching family.

"Every cow on this place is one I raised, I just like knowing everything about them, and being able to look them up in my book for generations back," Dave Caffee, owner of Caffee Ranch, explains the fact that he hasn't bought a female for 30 years and

that "calving book" traces back to cow records from 1972. Rightfully so, that is one of Dave's proudest accomplishments.

Born into the cattle business, Dave grew up not far from where he and wife Nancy operate now, on a homestead nestled within the rolling prairie hills west of Wessington Springs, S.D. Dave's father, Les Caffee was a pioneer of artificial insemination in the area in the 60's, often

teaching neighbors and friends how to A.I. While always a part of his family's operation, Dave acquired his first few cows through FFA projects and was afforded an opportunity to add to his own herd in 1976.

"My dad was reducing his herd due to the drought here in '76, so I bought 30 cows from him. They were half Maine and half Simmis, dad had already been Aling since 1963 at that point. Then I bought a few from Bud and Leo DeJong around that time. Those were half-blood Maine cows, Covino III daughters actually. They were some really exceptional cows, they did us a lot of good over the years."

1976 also marked the first year Dave sold a "show steer", one he raised from a home raised cow. An Angus sired calf by Coastal Boswell 777. That calf was selected by Don Lindsey, a cattle buyer from Iowa who was in the area looking at feeder calves. "That steer went on to win the Clay County Fair in Iowa for Don's son Shane Lindsey. That was a fun feeling and seemed to get people to come look through my calves the next year. We weren't really trying to raise show steers at that time, we were just trying to raise good cattle."

Along the way, Dave met area cowgirl Nancy (Wulf) through mutual friends. The two often ran into each other at jackpot ropings. The two married in 1980 and from there built a ranch and a family near Dave's hometown of Wessington Springs.

With a strong foundation of percentage Maine-Anjou cows Dave continued on with the production of both winning and productive genetics. To make progress in a cowherd Dave finds that utilizing crossbreeding is a great advantage. "Crossbreeding really works here in this

environment," Dave explains his reasoning for taking advantage of heterosis. "I can market a Maine-influenced calf on our fall private treaty sale in September because they have eye appeal, and our Maine x Angus bulls we sell in the spring have the biggest scrotal measurements and yearling weights of all the bulls. That shot of Maine adds so much value and versatility to our cowherd."

Because of that added value, the Caffee's bred over 200 cows to Maine-influence bulls last summer and plan to do the same in 2020. "We sold about 40 low Maine heifers in our fall sale in 2019 and out of 37 bulls, 20 were Maine-influenced on our March bull sale. Next year we will have a few more. We don't just target people that raise show cattle, we target people that want attractive cattle that perform."

In conversation with Dave, you don't hear him say "I" or "me" but rather "we" and "us", undoubtedly because it is a true family operation. It's no secret Nancy's cooking might be part of their customer retention, most notably her chocolate chip cookies, but her decision making regarding cattle matings, pasture rotations and hay development play a pivotal role in the Caffee Ranch day to day operation.

Dave and Nancy's oldest daughter Lacey also contributes to daily work on the ranch when not traveling for her business, Lacey Caffee LLC. Youngest son Treg works for Titan Machinery in Pierre, S.D., and assists on weekends when he can.

Because Lacey and Treg aren't always close to home it's important to the Caffee's to select a low maintenance cow to retain in the herd. One that can take care of herself in the harsh conditions the South

Dakota plains often provide, but produce a calf with eye appeal to fall into their maternal/bull sale program or produce a calf for their fall steer and heifer sale.

Years of experience in selection and culling give Dave and Nancy the foresight to select the best replacement females from their heifer calf crop each year "First we look at the pedigree, really the cow history, if she comes from a productive cow family that checks a box, their look is important too, of course. They've got to have eye appeal to produce marketable calves. Structure and soundness are the third box, we have some rough terrain and they have to be able to get around," Dave explains.

Long-term requirements to stay in the herd are gentle dispositions and Dave's biggest pet peeve, good udders. "A cow's udder needs to be above the hock. That means longevity to me. I am not a fan of white underlines either, sun burnt bags are a problem. And one small problem like needing to help a calf nurse can take a whole day to fix and then we still have to get chores done. If I have to help a cow, I guarantee I won't be helping her the next year, she'll be gone."

For their first, second and third calf, Caffee Ranch females are mated to maternally targeted bulls, most often Maine-Anjou, Simmental or Angus. It isn't until their fourth calf do they potentially put a cow into their club calf program to produce a show steer. This allows the family to evaluate the best direction for that female and gives them the opportunity to retain daughters and market sons on their spring bull sale as well as allow for a variety of genetics used to keep their

DNC Miss Shz A Bell S60

cowherd current in an ever changing industry.

Their philosophy in female selection has produced multiple National and State Fair champions for young exhibitors including the 2007 Junior National High Percent Maine-Anjou Heifer, DNC Miss Shz A Bell S60, exhibited by Danner Duncan. Later that year, a now well known producer on the Caffee Ranch, DNC Miss Sugar S10 was named Champion MaineTainer in Kansas City and Reserve MaineTainer at the National Western Stock Show for daughter Lacey. In 2014, Lacey saw something special in a heifer on the family's September private treaty sale and purchased DNC Miss Oh La La A90. It proved a profitable decision as they captured both the Kansas City and Louisville crown jewels and A90 was later named Reserve Show heifer of the Year. While showring wins play a significant

role in their cowherd success, it's just as important those heifers produce as much as they win once they're turned out to pasture.

Where some operations rely on EPDs for the selection and mating of their stock, actual weights are another instrumental part of the program's decisions. Dave articulates, "We actually prefer a 90 pound calf out of our cows, and our heifers can easily have an 80 pound calf. Sometimes those 60-70 pound calves don't have the vigor or toughness to survive if they are born in the cold temperatures common to here. I also believe you lose pelvic area in your females when you continue to stack light birth weight on light birth weight." Dave also adds, "You've got to have a little weight to begin with to have growth, those are the calves that gain all summer long and really perform post weaning."

Keeping up with contemporary practices

often provides a challenge, especially when fostering a cowherd off the beaten path in central South Dakota. But Lacey's marketing knowledge and abilities help set their program apart. While their approach to advertising is simple, keeping it mostly local, it proves highly effective for both of their annual sales to be backed by Lacey's professional touch in photographs, videos and advertisement. Most recently, Lacey's social media management has drawn an even larger spotlight on the ranch's methods and daily activities.

"Planning a budget for two sales a year, our fall steer and heifer private treaty bid off sale and our online spring bull sale, could be daunting but by utilizing area specific print options and social media marketing, we see a better result in our money spent," Lacey explains.

The Caffee's are quick to point out the efforts of the renowned American Maine-

Anjou Association (AMAA) Junior program and how that has impacted their program as well. With more incentives for juniors to show and participate in the junior activities they have seen an increased interest in registered Maine heifers on their fall private treaty sale. "A kid can buy a show heifer on our sale the end of September, but still have a great cow to turn out after the summer shows are over," Lacey adds.

The Caffee program included marketing Maine-Anjou, Simmental and Angus bulls private treaty from the beginning in the 70's. However, Dave and family felt it was time for a change in 2013 and began holding an online bull sale the third week in March. "It was Brad Smith that suggested we go online, our bull numbers had grown due to an increase in demand and it was just time. I was skeptical that our customers wouldn't like it, but I was pleasantly surprised at how well they accepted it and we still have great foot traffic through the bulls," commented Dave.

Another way the operation maintains efficiency is implementing an evening feeding program during calving season. "Our cows normally calve around 6 a.m. because they spend the night eating. About 80% of our calves are born during the day and they have been for the 40 years we've done evening feedings. To try and find new calves in the dark during a blizzard can be near impossible so it really works for us." says Dave. "This helps too, because we don't have many extra hands around here."

Between winning multiple state fairs in the same year, accumulating national championships and selling countless head to folks sight unseen, it's those low maintenance cows with a look that got Caffee's started in the beef business. However, it's passion and the ability to procure lasting customer relationships that allow their operation to press forward. "Some of our customers have made the trip to see our cattle for nearly 40 years, to think people like your cattle enough to travel to see them, and us, well that is just pretty neat." Dave says with a grin. When people respect your work that much, well, it's hard to put into words how that makes us feel. It just makes it real enjoyable and we are very appreciative of folks' support."

His name says it all, Fame. Fame was the crowd favorite and high seller at Denver and interest hasn't let up since. Great cattlemen across the country have expressed how he has all the power you expect from his genetic makeup, but has that extra flexibility and soft structure. An added bonus is his stop you in your tracks front end that is sure to stamp out impressive show heifers. He is already slated to be flushed to some breed greats, so get on the semen list early!
