

Save up to 30%* while boosting long-term efficiency!

It's a Win-Win situation

From August 1st through December 31st, 2020*, Eaton is offering deep discounts on eight modular Eaton UPS skus.

UPS systems run at greatest efficiency when they are close to their maximum rated capacity. Using plug-and-play modular units enables you to scale up or down to keep your actual load demand closer to capacity. Jump on this great pricing to increase your capacity and runtime without investing in a new UPS. Put those savings to use in other areas of your business!

Your only risk? Waiting.

Now is the time to boost the overall performance and efficiency of your entire system at a fraction of the normal cost. But when these units are gone, this streak of savings will run dry.

Eaton SKU	Product Description
9PXMBAT	9PXM battery pack
9PXMSPPM	9PXM power entry module 3.6 kW 4000 VA
ZC122P060100000	BladeUPS 12kW 400V for parallel configuration
