# PANZONE® Horizontal Slack Manager and Accessories

## SPECIFICATION SHEET

### specifications

The horizontal slack manager shall consist of a steel slack tray and injection molded plastic slack spools and bend radius posts. The horizontal slack manager shall replace a traditional horizontal cable manager and eliminate the need for vertical slack management. Each horizontal slack manager shall be capable of managing 48 Category 6 copper cables or 144 fiber cables. In addition, the horizontal slack manager shall allow the ability to make front-only accessible moves, adds, and changes quickly and easily.

The bend radius post kits shall include two injection molded plastic posts and mounting hardware. The bend radius post kits are zero rack space cable managers that alleviate cable strain when transitioning between the horizontal and vertical channel. The bend radius posts shall have built-in cable retainers that can be oriented or removed by the installer to best manage copper and fiber cables. The bend radius post kits shall be offered in 3 inch and 4 inch increments.

### technical information

<b>Dimensions:</b>	PZCHSM2: 3.50"H x 19.00"W x 13.00"D (88.9mm x 482.6mm x 330.2mm) PZBR3: 3.00"H (76.2mm) PZBR4: 4.00"H (101.6mm)
<b>Packaging:</b>	PZCHSM2: Horizontal slack tray, six slack spools, four 4" bend radius posts and assembly hardware PZBR3/PZBR4: Two (3" or 4") bend radius posts and assembly hardware

### key features and benefits

<b>Improved cable routing</b>	Allows the ability to make front accessible moves, adds, and changes quickly and easily
<b>Improved airflow</b>	Clears the vertical channel of large cable bundles which improves side ventilation
<b>Eliminates the need for vertical slack management</b>	Reduces real estate required for rack or cabinet lineups by allowing narrower vertical channels
<b>High capacity horizontal manager</b>	Capable of managing and storing slack for 48 Category 6 copper cables or 144 fiber cables
<b>Zero rack space cable manager</b>	Maximizes the number of usable rack spaces for network equipment or patch panels without taking up valuable rack spaces

### applications

The PANZONE® Horizontal Slack Manager is an ideal cable management solution for full size cabinets, wall mount cabinets, or racks with limited vertical channel space. The horizontal slack manager is capable of managing and storing slack for 48 Category 6 copper cables or 144 fiber cables. In addition, the horizontal slack manager also helps to improve side ventilation by clearing the vertical channel of large cable bundles. This allows for improved airflow and cooling of network equipment and

is of particular benefit for Power over Ethernet applications. The horizontal slack manager can be installed between an active network switch and patch panel to manage the patch cords, which is especially useful for high-density applications. The PANZONE® Bend Radius Post Kits are zero rack space cable managers that alleviate cable strain when transitioning between the horizontal and vertical channel.

#### PANZONE® Cable Management

<b>Horizontal slack manager:</b>	PZCHSM2
<b>Cable bend radius post, 3":</b>	PZBR3
