

## Great value, high performance NAS

The TeraStation™ 3010 series (TS3210DN, TS3410DN, TS3410RN) is a high-performance, cost-effective Network Attached Storage (NAS) solution, ideal for small businesses and demanding small office and home office (SOHO) users. With a powerful Annapurna Labs Alpine AL-212 1.4 GHz dual-core processor, it provides speedy transfer rates and stable operation during heavy-load work tasks. The robust central processing unit (CPU) and 1 GB of DDR3 RAM means it can run multiple services simultaneously. This allows businesses to focus on concurrent tasks with minimal performance degradation.

The TS3010 series is ready to use with a fast, user-friendly interface. It comes with dedicated NAS hard drives for higher reliability and essential features to support your business, such as Active Directory, iSCSI target, cloud backup (Amazon S3, Dropbox and Dropbox for Business). The 'Duplex system firmware boot' protects the TS3010 from boot failure. With the firmware located on both the hard drive and the mainboard, if one fails, the system will function and recover from the other.

TS3010 protects your data with RAID, and hot swap functionality allows users to change disks without downtime. For additional data security, the device also comes with boot authentication, disk encryption and 11 free NovaStor NovaBACKUP® Buffalo Edition licenses.

The high efficiency airflow chassis is combined with an easy to clean dust-filter, which provides reliable and long-term use. The two Gigabit Ethernet ports, two USB 3.0 ports, also provides users with a versatile and feature-rich NAS

The TS3010 series comprises a 2-bay desktop NAS TS3210DN and the 4-bay desktop and rackmount versions TS3410DN and TS3410RN. All three versions are fully populated with capacities of 2 to 8 TB for the 2-bay and 4 to 16 TB for the 4-bay version.

## **Features and Benefits**

- Available as 2-bay desktop as well as 4-bay desktop or rackmount version
- Fully populated with 2, 4, or 8 TB (TS3210DN) and 4, 8, 12 or 16 TB capacities (TS3410DN/RN)
- Annapurna Labs Alpine AL-212 1.4 GHz dual-core processor
- 1 GB of fast DDR3 memory installed
- Simultaneous NAS and iSCSI target functionality
- Duplex System Firmware Boot
- NAS HDD
- Packed with rich backup features:
  - Failover
  - Replication
  - Scheduled Backup
  - NovaStor NovaBACKUP® (11 licenses of NovaBACKUP® Buffalo Edition)
  - Supports Amazon S3 and Dropbox/Dropbox for Business cloud storage service

- Boot Authentication feature
- Hot Swap: Change drives in RAID without down time
- WebAccess: easily open TeraStation™ files via browser from a remote site or with WebAccess Apps available for iOS and Android®
- Intuitive interface and management GUI
- The rackmount version TS3410RN comes ready-to-use with a rail kit included in the box
- 3 year VIP warranty included, Extended Warranty available

## **About BUFFALO**

BUFFALO is a leading global provider of award-winning storage, networking and multimedia solutions for the home and small business environments as well as for system builders and integrators. With more than four decades of networking and computer peripheral experience, BUFFALO has proven its commitment to delivering innovative solutions that have put the company at the forefront of infrastructure technology.
