Epson **EB-475Wi Lamp Warranty**

Bring your classroom presentations to life without installing expensive interactive whiteboards. Epson's EB-475Wi comes with many new features, such as dual pen control, PC-free connectivity and HDMI input, and provides a complete package for engaging learning.

Large fully interactive projections
With Epson's EB-475Wi, you can easily achieve a large projected image size of up to 100 inches/245cm that's fully interactive, right up to the corners. Thanks to the ultra-short-throw design, you can project a 46-inch/116.8cm image from just 27cm away, and annotating can easily be done without casting distracting shadows.
You're in control
This is Epson's first interactive projector to feature two digital pens that allow teachers and students to work together at the same time. These pens are more responsive and easier to use than previous models, thanks to the new 'hover' function that accurately detects the position of the pen when not in contact with the projection surface. The automatic calibration and the driver-less installation means that set-up is extremely fast and easy.
Everything you need
This package includes the projector, wall-mount and two digital pens, and doesn't need a separate screen. It can be mounted in four different ways to maximise learning opportunities: on your wall, on the ceiling or even to the underneath or side of a desk. Mounting to a desk allows groups to work together on documents or multimedia files.
Easy installation and control
Epson has designed this projector to be quick to set up and use. You simply turn on and plug in - there's no warm-up time involved. The image is calibrated automatically and there's also a 16W built-in speaker. You don't even need to switch on your PC as the built-in 'instant annotation' tool allows you to draw on any projected background or video.
Low costs
With the Epson EB-475Wi, running costs are kept low with the long lamp life of 4,000 hours or four years*1, in eco mode, and the 5,000-hour filter life.
High-quality images

KEY FEATURES

- **Very bright output**
  2,600 lumens White/Colour Light Output
- **Ultra-short-throw**
  Reduces shadows and glare
- **Interactive**
  Works horizontally and vertically
- **Large image**
  Up to 100 inches
- **Easy to use**
  Dual pens, automatic calibration
