DATASHEET

These fast, flexible 24" and 44" printers give your professional printing even more impact with the addition of Vivid Magenta to the Epson UltraChrome Ink set. With more accurate, longer-lasting, life-like colour they will transform the way you print POS materials, CAD/GIS prints and more.

Two black inks for greater versatility

The ink set includes both Matte and Photo Black inks, which maximises quality on your chosen media, including glossy photo paper. The printer will automatically select the optimum ink to match the media, which adds convenience and productivity whatever you print.

Our most advanced printhead ever

The new Epson MicroPiezo™ TFP printhead combines improved performance with greater durability. Optimised to work with Epson UltraChrome Ink with Vivid Magenta, it delivers perfectly accurate dots with virtually no misting or satellites. It also works with Epson Variable-sized Droplet Technology to produce droplets as small as 3.5 picolitres for perfect smoothness and detail.

Colour LCD panel

The bright colour LCD gives you easy control of all aspects of your printer, from ink levels and quick cleaning to paper cutting and job cancellation. With clear buttons and the high-visibility 320x200 pixels colour screen you're always in charge.

Barcode printing

Barcode printing makes it easy to keep track of media during changes. Simply print the barcode before the roll is removed, and you'll know exactly how much is left, so you'll never have to deal with misprints because there's not enough paper on the roll.

Versatile connectivity

These printers are 100Base TX/10Base T Ethernet network-ready, making them easy to install and share across your office or studio. There's also a USB 2.0 port, with sophisticated compression and decompression technologies for fast data processing.
