ARUBA BEACONS AND SENSOR	
Aruba Beacons <p>Our Beacons leverage Bluetooth Low-Energy (BLE) technology to provide a more accurate blue-dot experience, and proximity-aware push notifications at venues. When standalone Aruba Beacons and those in APs are used in conjunction with the Meridian mobile app platform, they enable organizations to infuse their mobile apps with innovative wayfinding and notification features, like discount offers and conference room optimization data.</p> 	
Aruba Sensor <p>The Aruba Sensor is a small, dual-band 802.11n client radio and a Bluetooth Low Energy (BLE) radio that makes it easy for IT to manage a large multi-location beacon deployment that does not involve Aruba wireless infrastructure. The Sensor provides the ability to pull data from the Beacons that can be viewed via a cloud management application.</p> 	

ARUBA MOBILE FIRST PLATFORM

Aruba Mobile First Platform is the software layer between the Aruba network infrastructure and is designed to share rich, contextual insights with third party business, IT and end user facing applications.

NETWORK CONTROLS: ARUBAOS	
ArubaOS is the operating system for all controller-managed wireless LANs and Aruba Mobility Controllers. ArubaOS 6.5 is able to deliver a wide range of critical campus mobility services such as unified wired and wireless, enterprise grade security, simplified operations with centralized licensing and application aware visibility and control in AppRF. ArubaOS 8 deployed as a virtual machine running on servers, is the operating system for all Aruba Mobility Controllers, Virtual Mobility Controllers, Mobility Master and controller-based access points. With an extensive set of integrated technologies and capabilities, ArubaOS 8 delivers automated RF planning (AirMatch), multi tenancy in AP (MultiZone), an always on network (Controller Clustering) to support high density environments.	ARUBAOS
NETWORK MANAGEMENT: ARUBA AIRWAVE	
AirWave is a powerful and easy-to-use network operations system that not only manages wired and wireless infrastructures from Aruba and a wide range of third-party manufacturers, but also provides granular visibility into devices, users and applications running on the network.	AIRWAVE
Hardware	
AW-HWDL360-PRO	Pro Edition for up to 1500 managed devices
AW-HWDL360-ENT	Enterprise Edition for up to 4000 managed devices
Software Licenses	
LIC-AW	Airwave license for one managed device
AW-QY-FR	AirWave fallowler software licenses for (x) devices
CLOUD NETWORKING: ARUBA CENTRAL	
Aruba Central is a cloud platform that offers IT organizations a simple, secure and cost-effective way to manage and monitor their controllerless Aruba Instant wireless LANs and Aruba-CX Switches, as well as services such as customizable guest Wi-Fi, application insight, and presence analytics.	ARUBA CENTRAL
Subscription Licenses	
SUB1-CNP-IAP-1	1 year subscription for 1 Instant AP
SUB3-CNP-IAP-1	3 year subscription for 1 Instant AP
SUB5-CNP-IAP-1	5 year subscription for 1 Instant AP
SUB7-CNP-IAP-1	7 year subscription for 1 Instant AP
SUB10-CNP-IAP-1	10 year subscription for 1 Instant AP
SUB1-CNP-MAS-1	1 year subscription for 1 Aruba Switch
SUB3-CNP-MAS-1	3 year subscription for 1 Aruba Switch
SUB5-CNP-MAS-1	5 year subscription for one Aruba Switch
Note: Central subscriptions include 24x7 online/phone support	
LOCATION-BASED SERVICES: ARUBA MERIDIAN	
Aruba Meridian	MERIDIAN
The Aruba Location-based Services solution enables enterprises and public-facing venues such as retailers, hotels, casinos, airports, stadiums, and hospitals to engage with users' mobile devices while on location to increase productivity, or revenue per visit and boost customer satisfaction.	
Aruba Meridian Mobile App Platform	
Meridian is a mobile-app software platform that allows organizations to create or improve mobile apps by engaging visitors via their mobile devices. By leveraging Meridian to deliver location relevant information such as indoor mapping, turn-by-turn directions, venue-specific content, and proximity-based notifications they are able to enhance a user's experience.	
POLICY MANAGEMENT: ARUBA CLEARPASS	
Policy management for users, traditional devices, and IoT are delivered via Aruba ClearPass across any wired or wireless multi-vendor network. ClearPass replaces outdated AAA with context-aware policies and NAC, by collecting and leveraging valuable user, device, location and dekke status for enhanced network authorization and real-time remediation controls. ClearPass Exchange allows for the sharing of contextual policy information with cloud-based IT applications and security services to better protect your network and resources, using Extensions, bidirectional Rest-based APIs and Syslog messages.	CLEARPASS
Aruba ClearPass Policy Manager	
Provides role and device-based network access control for employees, contractors and guests across any multivendor wired, wireless and VPN infrastructure. Secure 802.1X enforcement support exists for wireless and wired connections. ClearPass OnConnect delivers a non-AAA enforcement model for wired infrastructure where 802.1X is not an option. ClearPass Policy Manager is available as hardware or VM in three appliance sizes: <ul style="list-style-type: none">Aruba ClearPass Policy Manager - 500 endpointsAruba ClearPass Policy Manager - 5,000 endpointsAruba ClearPass Policy Manager - 25,000 endpoints	
Aruba ClearPass Onboard	
A fully IT-managed, and automated configuration and provisioning service for the onboarding of mobile devices, which enable approved users to securely connect to internal enterprise networks in support of BYOD initiatives. Built-in certificate authority also offers simplified BYOD certificate management. ClearPass Onboard can be ordered via perpetual license or subscription-Available Enterprise options provide the ability for organizations to flexibly use the licenses for ClearPass Onboard, Guest or OnGuard.

HPE FLEXNETWORK SWITCHES	
The HPE FlexNetwork portfolio for core, aggregation, and routing enables IT to deliver the maximum performance and value to organizations across all verticals.	
HPE FlexNetwork 10500 Switch Series	HPE FlexNetwork 5120 SI Switch Series
Enterprise campus core switch designed to enable a cloud-connected and rich-media-capable infrastructure. It sets the benchmark for performance, reliability, and scalability with 3-microsecond latency, ultra high 1/10/40GbE port density, 100GbE support, and 4 Chassis IRF stacking. <ul style="list-style-type: none">HPE FlexNetwork 10512 Switch Chassis (JC748A)HPE FlexNetwork 10508 V Switch Chassis (JC511A)HPE FlexNetwork 10508 Switch Chassis (JC512A)HPE FlexNetwork 10504 Switch Chassis (JC513A)	Fully managed basic Layer 2+ switch with static IP routing, PoE+, ACLs, IPv6 and support for IRF stacking (up to 4 switches). <ul style="list-style-type: none">JE072B - HPE 5120 48G S1 SwitchJE073B - HPE 5120 16G S1 SwitchJE074B - HPE 5120 24G S1 SwitchJE091B - HPE 5120 24G PoE+ (370W) S1 SwitchJE309B - HPE 5120 8G PoE+ (180W) S1 SwitchJE310B - HPE 5120 8G PoE+ (65W) S1 Switch

ARUBA TECHNOLOGY ECOSYSTEM

At Aruba, we are working with the industry's best technology partners and app developers to deliver solutions that are easy to deploy and consume. Together our efforts deliver innovative solutions that connect the dots between today's business and IT priorities. Depending on your business, our technology partner programs cover everything from wireless connectivity to mobile engagement.
