MOUNT JOY BOROUGH COUNCIL REPORT FOR JUNE 2021 ACTIVITIES

- Held our first Craft / Maker / Art Show. 14 vendors, light traffic, but vendors were happy and plan on coming back next year. Would like to grow this event in the next few years to a street-closure event.
- 4th Friday was a Downtown Scavenger Hunt. Decided to keep the Scavenger Hunt running for the next few weeks as a free family event.
- Planning Car Show (July 24).
- Worked with several downtown businesses on finding employees. Still difficult to find them.
- Worked with downtown landlord to find new commercial tenant to fill opening (1 South Market). New tenant will be opening August 01.
- Attended 2-day statewide PA Downtown Center's Main Street Manager's conference.
- Met with Lancaster Newspapers on advertising specials/opportunities for Mount Joy.
- Worked with 1 business downtown on advertising plans and markets.
- Started creating a fundraiser program for flower planter replacement project. Kicking off the fundraising after the Car Show.
- Met with new management team at Higher Grounds Cafe.
- Met with new owners of Time 2 Eat (89 East Main – former Just Wing It).

Some of these things require large amounts of time and resources. Our downtown businesses get this support for free from MSMJ.

Web development may total 30 – 60 hours over a span of a few weeks to gather the content, write the copy, take photos and develop e-commerce tools. In the market, web development costs anywhere from $5,000 - $15,000 per website.

Strategic Plan development can total up to 80 hours of work and several long meetings (2+ hours each meeting) to talk about long range goals, gathering data, reviewing data and working out details of the steps on each plan. In the market, Strategic Plan development costs range from $5,000 - $20,000.

xx = Library Closed due to COVID-19

Executive Summary

- **May was a month of preparation.** Preparing for Summer Reading Programs for children and Adults. Meetings about the re-imagined Library Auction, planned for August 28. Planning for the end of COVID-19 restrictions with the Governor announcing the end of all COVID restrictions except masking on May 30. On May 17, the Office of Commonwealth Libraries sent a statement saying, in part: "*Understanding that not everyone is vaccinated, including some of your youngest users, the Office of Commonwealth Libraries (OCL) recommends you continue to follow your current mitigation strategies.*" Shortly after the statement MSL posted signs re-stating masking requirement and featuring OCL language. MSL staff referred to the sign when asked about mask requirements.
- **Circulation continues to be strong.** Total circulation in 2019 was only about 4% higher at 74,132.
- The library served as a polling place on May 18, 2021.
- **Donated books:** $156 given away as Youth Program Prizes, $376 added to the library collection, $853 in Lobby donations for **May total of $1,385 in monetary donations or savings from Donated Books & Materials**
- **22 Youth Programs in May** attended by 342 people for a YTD total of 87 programs and 1.266 people attending.
- **8 Adult Programs/Clubs in May** attended by 66 people for a YTD total of 35 programs/clubs and 179 people attending.
- **Our community volunteered 121 hours** to the library in May; shelving, weeding and other duties as assigned.

Joseph

- Re-write for the Chamber of Commerce Directory for 2022-2023
- Core4 meeting May 26 – Discussed moving things back to the library service floor [after June 1], check list for Service Desk staff for when things are slow, Lobby calendar, library messaging.
- Was on hand for Friend's Yard Sale, May 1
- Spoke to Karla Trout about changes to the District Negotiated Agreement, where big changes are happening.
- Planning for meetings with municipalities and local clubs in early June.

Community/Service Point (Susan)

- Added $376 of Donated Books to the library collection
- Attended core 4 and auction meetings
- Viewed Stig meeting
- Attended Barbara's bench dedication

Youth Services (Jan)

- Live program numbers are creeping upward; had some nicely attended outdoor storytimes
- Printed our events on one side of the LSLC county-wide SRP sheets. Delivered over 1000 to Donegal Primary and Intermediate Schools and Kraybill School to send home with the students.
- Created a Summer Reading Program skit to video and send to DPS and DIS for showing on their D-TV morning announcements. Very corny but, hopefully, memorable
- Did a live interview for the Merchandizer for Summer Reading Program coverage. Think it premiered the last week of May in color above the fold!
- Worked with Kim on setting up a mini-Makerfest for Saturday, June 12.
- Hung out with the nice polling people on election night...was a good chance to work on Summer stuff.
- Morgan created a wonderful stand up lion for the lobby, so the kids can get their picture taken with "Roary".
- Lego Challenge and Bingo were early this month because of the election, so the numbers were a bit lower
- Donated Books: 6 preschool (@$30), 18 juvenile (@ $126) for a total of $156 in donated book giveaways.

Public Relations/Promotions (Kirstin)

- CONSTANT CONTACT:
    - June 2021 Enews: sent to 2,882 contacts, added 19 new contacts; 612 opens (22.1%), 69 clicks (11.3%), 4 unsubscribes.
- SOCIAL MEDIA:
    - Facebook – Total Page Followers 2,044; **15 New Follows; 8,416 people reached; 2,918 post engagements**
    - Instagram – **646 followers = 17 NEW** followers
    - Created posts for National Calendar Days to tie in with what the Library has to offer the public
    - Kept patrons updated with new books on the shelves – Adults thru Children
    - Published 69 "Stories"; 387 unique opens, 41 engagements
    - Also publish to Friends FB page

- 2 PRESS RELEASES - Distributed via news media, municipalities, and Chamber of Commerce.
- WEBSITE
    - 3,242 website entrances; 6,075 page views; 808 page views of calendar; 206 views of Family Story Time; 98 views of Passport page
    - Created 3 new banner for the home page
    - Updated "Library News" page
    - Updated programs for June
    - Updated Summer Hours
- SUMMER READING
    - Began email conversation with ABC27's Ben Schad regarding Summer Reading and Libraries
    - Recorded/edited video of Jan for Summer Reading Program – was shared with the schools in the district and posted to social media
    - Updated the Summer Reading Program Calendar handout
    - Created/printed/put out signs for SRP Kickoff
    - Created signs for front promoting the Soft Pretzel Truck for SRP KO
- MISC
    - Created bookplates for books purchased for our volunteers
    - In contact with volunteer about putting together a pamphlet for our Pollinator Garden, to engage families and treat as educational resource
    - Images in Google profile received 17,388 views in May
    - Continued the emptying book donation shed and gathering books for sale in lobby; took 10 boxes donated books to DHS for students & 7 boxes of Readers' Digest Condensed Novels to the DHS Art Department for recycled art projects
    - Meeting with Senior Staff and Joseph; Staff Meeting
    - Listed sign changes for the street marquee
    - Helped the Library earn over $850 in donations from books in Lobby
    - Updated June print calendar

Volunteers/Programming/Fundraising (Kim)

- **Marietta Lions Club & Planter Project**
    - Three Lions Club members came and dug out each planter and lined them with heavy-duty plastic. They look much better!
- **Grounds Crew:** They have continued to keep the grounds weeded and watered.
- **Auction 2021**
    - DATE CHANGE: Saturday, August 28, at 10:00 am on the library grounds.
    - Confirmed new date with auctioneer.
    - Updated "Ask" letters and donation opportunities forms for mailing.
    - Updated mailing list from previous years.
- Set up 3 passive Adult programs. Working with Megan on these programs. She's a great collaborator!
- Hosted first in-person adult program since COVID!
- Devised and ran "Shabby to Chic" Make-It Monday program; asked Morgan, our resident artist, to assist in the meeting. She did a fabulous job guiding the "students"!
- Worked on programming for 2021.

- Attend webinar about Transportation Alternatives Set Aside program funds
- Meet with East Donegal Twp roadmaster to discuss alley paving and street repair.

8-K

To: Mount Joy Borough Councilors, Borough Manager Pugliese & Mayor Bradley

From: Joseph Ardini

June 2021 Authority Administrator Report

1. Clarifier/Thickener Project:
   - Bridge #2 was placed back onto the abutments.
   - Installation of the internal mechanism was completed.
   - New drive unit was installed along with the electrical.
   - Staff began filling the clarifier for startup.

2. Staff completed the EPA Risk and Resilience Assessment and submitted the plan.

3. Auditors were onsite to begin the 2020-2021 yearly audit.

4. New & Walnut Street Watermain Replacement:
   - The remaining waterline was installed on Walnut Street.
   - Both waterlines were tested for bacteria, which they passed. The waterlines were then pressure tested and passed.
   - Staff relocated all the customer service lines over onto the new watermains.
   - Staff cut and capped the existing 4-inch cast iron watermain for abandonment.
   - Final restoration will occur in the fall.

5. The wastewater plant was issued a new NPDES permit from PA DEP.

MOUNT JOY BOROUGH
MEMORANDUM

TO: Borough Council & Mayor

FROM: Mark G. Pugliese I, Borough Manager

DATE: June 17, 2021

RE: Manager's Report

I continue to become more acclimated with the functioning of Borough affairs. Again, I would mention to amount of support I have received from all the Borough's staff and hopefully for only a short period of time I will continue to rely on their expertise until I can get a better handle on things.

- I continue to review files from previous manager and sort out what is relevant and what is not. It is my intention to organize the closet that is in the Manager's Office and create room for the 3 cabinets of zoning files and create a file cabinet for borough information that I am actively working on and need immediate access to. Currently no such cabinet is present in the office.
- I have met with the Director of Public Works to include a ride around the Borough to look at current and future projects.
- I have reviewed the contract between the Borough and the Police Association and have discussed certain portions with Chief Goshen with regards to short-term disability. I have additionally discussed this with Finance and Business Director as we currently have a police officer on short term disability.
- I have continuously reviewed the budget, balance summary sheets and year-to-date expenses.
- As it appears that there may be a consensus among Councilors and the Mayor to continue to videoconference all the Borough's public meetings, I have started to price out equipment as well as started to make appointments with other municipalities to see what hardware and software they are utilizing to accomplish these hybrid meetings. I have complied a cost analysis for doing all the work inhouse and have obtained a vendor quote (EdgeUp recommended by 12:34 our IT vendor). All will be attached should Council wish to have any discussions on this matter.
- Finance Director and I have had a conference call with the Borough auditor and reviewed certain areas of their previous audit report. Additionally, a meeting has been scheduled for mid-July to review their latest report in detail.
- As approved at the June 7, 2021, Bourgh Council Meeting, an order was placed for 4 air purifiers. These items were received and are now utilized as specified by the Mayor. I would note that they came in under the approved price.
- As approved by Borough Council at the May 3, 2021, Borough Council meeting, I have made a conditional offer of employment to Linda Gainer as a part-time Receptionist/Secretary. Should Ms. Gainer fulfill all the conditions of the offer, she will start her employment with the Borough on July 14, 2021. Ms. Gainer is a 14-year resident of the Borough and will be retiring from Lancaster County Career & Technical Center at the end of June.
- I am working with the insurance company and completing the paperwork for bonding in the amount of $500,000.00.
- I have met with the following councilors during the past month; President B. Hall, D. Castaldi, M. Reese, and Mayor Bradley. I will continue to offer an open door to any Councilor who wishes to meet with me to discuss some of your priorities for the Borough.
- I attended all three committees meeting last month.
- I will be meeting with Jennie Granger, Deputy Secretary Multimodal Transportation – Penn DOT reference to the underground retention basin deed, PennDOT agreement for the train station, and paid parking.

- I have prepared and will forward to each of you an electronic grant tracking document which I plan on providing to you quarterly…the fact that this was not previously done received a negative comment on past year's audit reports. I have had a conference call with our auditor and plan an in-person meeting in an attempt to resolve all negative comments prior to the Borough's next audit.
- I attended a webinar sponsored by Benacon, our worker's compensation manager for Susquehanna Municipal Trust. I have identified several areas where we can improve how our worker's compensation claims are handled and will be implementing these changes shortly. These changes should result in an approved "Report Card" and may decrease our premiums or at least lower our yearly increase.
- We have received the first half of our grant under the American Rescue Plan Act (ARPA) of 2021 in the amount of $433,225.87. This money must be used for one of the following expenditures.
    - Support Public Health Expenditures
    - Address Negative Economic Impact Caused by the Pandemic
    - Replace Lost Public Sector Revenue
    - Provide premium Pay for Essential Workers
    - Invest in Water, Sewer, Broadband Infrastructure. (This would include storm water projects.)

  I will include some literature for your review that may help explain some ways that we can utilize the funds and plan on more discussion at the Administrative & Finance Committee Meeting. I would also mention that After discussion with the auditors along with the Finance and Business Director, the money will go into a separate, stand alone PLIGT account rather than a general fund account.
- The Borough's electrical supplier contract expires in November. I have been working with APPI, provider of choice from PSAB, to start putting together some numbers. I will take this to the Administrative & Finance Committee.
- I processed nine (9) Right-To-Know Requests in June.
- Lastly, I need to provide you with some situational awareness reference to the privately owned retention basin on Locust Lane. Due to property owners being deceased or otherwise failing to pay taxes, the Lancaster County Tax Collection Bureau (LCTCB) technically owns 2 of the three lots. There are several sink holes developing on the property that may need to be addressed. In March of 2019, our solicitor provided some guidance on actions that we can take. I requested that she review the letter to see if any of our options have changed and asked if she could draft a letter to the LCTCB advising them of the issues and potential danger. (Photographs Attached)

Addressing Agenda Items

- **Land Development, Zoning, and Codes** – I will aqueous to Zoning and Codes Enforcement Officer

- **Job Descriptions** - I am asking the Council to review the updated Job Descriptions for the Receptionist/Secretary (Part-Time) and the Administrative Assistant. The previous versions approved in 2015. A recent "desk audit" was conducted on several positions within the Borough. This audit showed that many of the current job descriptions were not up to date. As I review the desk audits and job descriptions, I will be bringing them to the Admin & Finance Committee and then to Council for approval. The above-mentioned Job Descriptions have been reviewed by Committee and forwarded to Council for approval.

- **Penn State Health (PSH) Life Lion LLC acquisition of Susquehanna Valley EMS (SVEMS)** - I will note that there will be representation from both organizations at the Council Meeting and they have asked to be on the agenda to speak to the Council and answer questions.

  This item is broken down into two specific areas. The first being the conveyance of the property at 820 Church St. and the second being the "Ground Ambulance Service Provider Agreement". The Administrative and Finance Committee moved to have Council consider the conveyance of the property. The Public Safety Committee has requested that changes be made to the Ground Ambulance Service Provider Aagreement. I have included at letter from Josele recommending some verbiage, but Public Safety has not met since to review the verbiage.

  Council may wish to table this until Public Safety Committee has an opportunity to review and make a recommendation.

- **Storm Water Bids** – Public Works will be asking permission to move forward on the public bidding process for a storm water project on Manheim Street. This project was not included in this year's budget as Penn DOT did not

inform the Borough of its intention to pave Manheim Street until after the budget was passed. I would note that storm water projects are an approved expenditure under ARPA.

- **Executive Session** – I have requested an Executive Session to discuss two personnel issues. A separate confidential memorandum will be forthcoming with regards to that session.

TERMS AND AGREEMENT/CONTRACT

A. The general project description is contained in the attached document and related documents from herein referred to as "Proposal. Spycom Technology Solutions, LLC; DBA: EdgeUP Technology from herein referred to as EdgeUP.

B. The scope of work to be performed by EdgeUP is the installation of the specified system as outlined in the Proposal.

C. The total amount to be paid (subject to additions and deductions by written change order) shall not exceed the total specified in the Proposal. This may be superseded as specified below in item G.

D. Progress payments will be made according to the payment schedule below. Electronic equipment will not be ordered until the sum of deposits meet or exceed 95 of the project total. These times are subject to the timing of the construction and the lead times required for the ordered equipment to be delivered.

E. Payment is due immediately at invoicing. Unpaid balance beyond 10 days after invoicing of completed tasks as outlined in item D shall bear interest payable to EdgeUP at a rate of 1.75 per month simple interest, minimum 5 per month. Any discounts will be forfeited and become due.

F. Proposal expires after 30 days without approval following the date stated on the top of the Proposal. No work will be scheduled without an initial deposit plus a signed copy of this agreement. Release of all system design specifications are contingent on agreement and retainer.

G. If project is of a retrofitremodel nature on an existing structure, andor scope of work exceeds time and material costs estimated to complete because of unforeseen circumstances, client agrees that heshe will be billed at the current EdgeUP installation rate for all extra labor and necessary parts involved in completing the project.

H. EdgeUP reserves the right to replace proposed models in the case of obsolescence, discontinuation, or unavailability with a comparable model of equal or greater value. EdgeUP will not be held responsible or liable in any way for any said product's obsolescence, discontinuation, or unavailability.

I. At times, EdgeUP will request personal WiFi information, door code passwords, alarm codes, usernames, passwords, and IP addresses. This information is used to program and maintain specific types of components. EdgeUP reserves the right to access your components remotely, for the sole purpose of updating and modifying system programming. EdgeUP will not be held responsible if logins, passwords, codes, or system programming are changed by client after completion. We do not transfer your personal identifiable information to outside parties. The security, integrity and confidentiality of your information is extremely important to us. We have implemented technical, administrative, and physical security measures that are designed to protect your information from unauthorized access, disclosure, use, and unnecessary modification.

J. Due to the complexity of the custom system programming provided by EdgeUP, the need for user preference changes and modifications are to be expected after system completion. Within a 30day period of completion, the client should provide EdgeUP, in writing, any system programmable preference changes requests. These requests will then be scheduled for fulfillment within the limitations of the provided system. This onetime visit, or remote system login, is to be considered part of the original proposed scope of work. Customer must be aware manufacturer firmware and software changesupdates may affect functionality of the system. This may require a service visit to resolve, and the resolution may result in a change of how to use the system. Rare cases and old equipment may require components to be updated or replaced. EdgeUP warranty does not cover costs associated with manufacturer changes.

K. EdgeUP may use photos and details specific to the system installation within social media posts andor other forms of advertising. Sensitive customer information, names, address, contact info, and photos will not be shared. Client agrees to notify EdgeUP in writing of any potential issues and allow 30 days to resolve the issue prior to posting an online review. Positive online reviews are appreciated and encouraged anytime.

1. Contract Documents and Details
The contract documents consist of this agreement, including all general provisions, special provisions, specifications, drawings, addenda, change orders, written interpretations, and written orders for minor changes in work. Work not covered by contract documents will not be required unless it is required by reasonable inference as being necessary to produce the intended result. The costs associated with any related work or materials, including, but not limited to electrical, drywall, painting, cabinets are not included unless specifically documented in the Proposal. EdgeUP is not responsible for any underground trenching or laying or supplying of conduit for outside wiring.

2. Time
With respect to schedule completion of the tasks in section D, time is of the essence. If Contractor is delayed at any time in the progress of the work by customer change orders, fire, labor disputes, acts of God or other causes beyond EdgeUP's control, the completion schedule for the work or affected parts of the work shall be extended by the same amount of the time caused by the delay. Customer will be responsible should the job site not be ready for EdgeUP to fulfill the scheduled work. The appointment must be cancelled or changed 3 business days before scheduled work to avoid additional charges for wasted time.

3. Payments and Completion
The below Payment Schedule is a guideline and approximation. Since EdgeUP will, if possible, open, test and burnin equipment before delivery, all components must be paid for before delivery to job site. Payments may not be withheld under any circumstances. Final payment shall be due immediately following completion of the project invoicing. Punch list items shall not delay invoice payment. EdgeUP will hold owner harmless with respect to claims of subcontractors and suppliers. Customer agrees to be responsible for all costs of collection on unpaid balances including, but not limited to 1.75 interest per month, collection fees (up to 50), court costs, reasonable attorney fees, and time spent by EdgeUP personnel to address the matter billed at our standard service rate.

4. Insurance
EdgeUP shall purchase and maintain such insurance necessary to protect from claims under workers compensation and from any damage to the customer property resulting from the conduct of this contract. Proof of insurance can be provided upon written request.

5. Changes in the Contract
The customer may order changes, additions, or modifications without invalidating the contract. Such changes must be in writing and approved. EdgeUP shall provide the owner in writing the amount of additional costs or cost reductions resulting from changes ordered within 15 working days unless this requirement is waived in writing by the customer. Change Orders shall be paid in full upon acceptance and shall not alter the above payment schedule.

6. Service Warranty
EdgeUP warrants the workmanship and installation of equipment for 30 days from the installation date. During this period, EdgeUP Technology Solutions will repair andor replace defective parts without an additional charge to you.
The above Service Warranty is subject to the following conditions:
1. This warranty extends only to products distributed andor sold by EdgeUP.
2. This warranty covers only normal use of the equipment. EdgeUP shall not be liable under this warranty if any damage or defect results from (i) misuse or neglect; (ii) disasters such as fire, flood, lightning or improper electrical current; or (iii) service or alteration by anyone other than an authorized EdgeUP representative.
For post warranty repair following the 30day period, the client is responsible for payment, at current hourly rates plus trip charge, for any service or repair outside the scope of this limited warranty. EdgeUP will aid the client in servicing their manufacturerwarrantied equipment throughout the life of said warranty, at these same applicable rates.

American Rescue Plan Act Information

COMMONWEALTH OF PENNSYLVANIA
OFFICE OF THE GOVERNOR

Jill Frey
21 East Main Street
Mount Joy PA 17552

Dear Jill Frey:

The American Rescue Plan Act of 2021, signed by President Biden, has allocated $6.15 billion to Pennsylvania counties, metropolitan cities, and local government units to support COVID-19 response efforts, replace lost revenue, support economic stabilization for households and businesses, and address systemic public health and economic challenges.

MOUNT JOY BORO is entitled to a maximum allocation of up to $866,451.74 from this federal funding, but you must take action to request it. The U.S. Department of Treasury requires that local governments that are NOT metropolitan cities or counties – called non-entitlement units of local government (NEUs) – request the funds through the commonwealth by visiting the Pennsylvania Department of Community and Economic Development (DCED) website at **dced.pa.gov/LFRF**. You are receiving this letter because the U.S. Department of Treasury has identified your municipality as an NEU.

Due to Treasury's requirements that states disburse all funding within thirty days of the state receiving the local funds for distribution, **DCED strongly recommends local governments request their funding within five days of receiving this letter.**

Recipients may use these funds to **support public health expenditures**, funding for COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff; **address negative economic impacts caused by the public health emergency**, including economic harms to workers, households, small businesses, impacted industries, and the public sector; **replace lost public sector revenue**, using this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic; **provide premium pay for essential workers**, offering additional support to those who have and will bear the greatest health risks because of their service in critical infrastructure sectors, and to **invest in water, sewer, and broadband infrastructure**, to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet.

More information about the program, including further details on eligible uses of the funding and instructions on requesting the funds, can be found at **dced.pa.gov/LFRF**. This funding provides immediate relief for local governments that have seen unprecedented fiscal challenges due to COVID-19. I encourage you to take advantage of these funds that will help your municipality recover from the pandemic and chart a course for long-term growth.

Sincerely,

Tom Wolf

TOM WOLF
Governor

9014190101

Uses

The COVID-19 ARPA Local Fiscal Recovery Fund will provide eligible state, local, and territorial governments with a substantial infusion of resources to meet pandemic response needs.

Recipients may use these funds to:

- **Support public health expenditures**, funding for COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff
- **Address negative economic impacts caused by the public health emergency**, including economic harms to workers, households, small businesses, impacted industries, and the public sector
- **Replace lost public sector revenue**, using this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic
- **Provide premium pay for essential workers**, offering additional support to those who have and will bear the greatest health risks because of their service in critical infrastructure sectors
- **Invest in water, sewer, and broadband infrastructure**, making necessary investments to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet

Within these overall categories, recipients have broad flexibility to decide how best to use this funding to meet the needs of their communities. To learn more about the eligible uses of the program, reference the **Frequently Asked Questions for the Local Fiscal Recovery Funds program**.

Coronavirus State and Local Fiscal Recovery Funds

Frequently Asked Questions

AS OF JUNE 24, 2021

This document contains answers to frequently asked questions regarding the Coronavirus State and Local Fiscal Recovery Funds (CSFRF / CLFRF, or Fiscal Recovery Funds). Treasury will be updating this document periodically in response to questions received from stakeholders. Recipients and stakeholders should consult the Interim Final Rule for additional information.

- For overall information about the program, including information on requesting funding, please see https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments
- For general questions about CSFRF / CLFRF, please email SLFRP@treasury.gov
- Treasury is seeking comment on all aspects of the Interim Final Rule. Stakeholders are encouraged to submit comments electronically through the Federal eRulemaking Portal (https://www.regulations.gov/document/TREAS-DO-2021-0008-0002) on or before July 16, 2021. Please be advised that comments received will be part of the public record and subject to public disclosure. Do not disclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Questions added 5/27/21: 1.5, 1.6, 2.13, 2.14, 2.15, 3.9, 4.5, 4.6, 10.3, 10.4 (noted with "[5/27]")

Questions added 6/8/21: 2.16, 3.10, 3.11, 3.12, 4.7, 6.7, 8.2, 9.4, 9.5, 10.5 (noted with "[6/8]")

Questions added 6/17/21: 6.8, 6.9, 6.10, 6.11 (noted with "[6/17]")

Questions added 6/23/21: 1.7, 2.17, 2.18, 2.19, 2.20, 3.1 (appendix), 3.13, 4.8, 6.12 (noted with "[6/23]")

Question added 6/24/21: 2.21 (noted with "[6/24]")

Answers to frequently asked questions on distribution of funds to non-entitlement units of local government (NEUs) can be found in this FAQ supplement, which is regularly updated.

1. Eligibility and Allocations

1.1. Which governments are eligible for funds?

The following governments are eligible:

- States and the District of Columbia
- Territories

- Tribal governments
- Counties
- Metropolitan cities
- Non-entitlement units, or smaller local governments

1.2. Which governments receive funds directly from Treasury?

Treasury will distribute funds directly to each eligible state, territory, metropolitan city, county, or Tribal government. Smaller local governments that are classified as non-entitlement units will receive funds through their applicable state government.

1.3. Are special-purpose units of government eligible to receive funds?

Special-purpose units of local government will not receive funding allocations; however, a state, territory, local, or Tribal government may transfer funds to a special-purpose unit of government. Special-purpose districts perform specific functions in the community, such as fire, water, sewer or mosquito abatement districts.

1.4. How are funds being allocated to Tribal governments, and how will Tribal governments find out their allocation amounts?[1]

$20 billion of Fiscal Recovery Funds was reserved for Tribal governments. The American Rescue Plan Act specifies that $1 billion will be allocated evenly to all eligible Tribal governments. The remaining $19 billion will be distributed using an allocation methodology based on enrollment and employment.

There will be two payments to Tribal governments. Each Tribal government's first payment will include (i) an amount in respect of the $1 billion allocation that is to be divided equally among eligible Tribal governments and (ii) each Tribal government's pro rata share of the Enrollment Allocation. Tribal governments will be notified of their allocation amount and delivery of payment 4-5 days after completing request for funds in the Treasury Submission Portal. The deadline to make the initial request for funds is June 21, 2021.

The second payment will include a Tribal government's pro rata share of the Employment Allocation. There is a $1,000,000 minimum employment allocation for Tribal governments. In late-June, Tribal governments will receive an email notification to re-enter the Treasury Submission Portal to confirm or amend their 2019 employment numbers that were submitted to the Department of the Treasury for the CARES Act's Coronavirus Relief Fund. To receive an Employment Allocation, including the minimum employment allocation, Tribal governments must confirm employment numbers by July 16, 2021. Treasury will calculate employment allocations for those Tribal governments that confirmed or submitted amended employment numbers by the deadline. In August,

[1] The answer to this question was updated on June 29, 2021.

Treasury will communicate to Tribal governments the amount of their portion of the Employment Allocation and the anticipated date for the second payment.

1.5. My county is a unit of general local government with population under 50,000. Will my county receive funds directly from Treasury? [5/27]

Yes. All counties that are units of general local government will receive funds directly from Treasury and should apply via the online portal. The list of county allocations is available here.

1.6. My local government expected to be classified as a non-entitlement unit. Instead, it was classified as a metropolitan city. Why? [5/27]

The American Rescue Plan Act defines, for purposes of the Coronavirus Local Fiscal Recovery Fund (CLFRF), metropolitan cities to include those that are currently metropolitan cities under the Community Development Block Grant (CDBG) program but also those cities that relinquish or defer their status as a metropolitan city for purposes of the CDBG program. This would include, by way of example, cities that are principal cities of their metropolitan statistical area, even if their population is less than 50,000. In other words, a city that is eligible to be a metropolitan city under the CDBG program is eligible as a metropolitan city under the CLFRF, regardless of how that city has elected to participate in the CDBG program.

Unofficial allocation estimates produced by other organizations may have classified certain local governments as non-entitlement units of local government. However, based on the statutory definitions, some of these local governments should have been classified as metropolitan cities.

1.7. In order to receive and use Fiscal Recovery Funds, must a recipient government maintain a declaration of emergency relating to COVID-19? [6/23]

No. Neither the statute establishing the CSFRF/CLFRF nor the Interim Final Rule requires recipients to maintain a local declaration of emergency relating to COVID-19.

2. Eligible Uses – Responding to the Public Health Emergency / Negative Economic Impacts

2.1. What types of COVID-19 response, mitigation, and prevention activities are eligible?

A broad range of services are needed to contain COVID-19 and are eligible uses, including vaccination programs; medical care; testing; contact tracing; support for isolation or quarantine; supports for vulnerable populations to access medical or public health services; public health surveillance (e.g., monitoring case trends, genomic sequencing for variants); enforcement of public health orders; public communication

efforts; enhancement to health care capacity, including through alternative care facilities; purchases of personal protective equipment; support for prevention, mitigation, or other services in congregate living facilities (e.g., nursing homes, incarceration settings, homeless shelters, group living facilities) and other key settings like schools; ventilation improvements in congregate settings, health care settings, or other key locations; enhancement of public health data systems; and other public health responses. Capital investments in public facilities to meet pandemic operational needs are also eligible, such as physical plant improvements to public hospitals and health clinics or adaptations to public buildings to implement COVID-19 mitigation tactics.

2.2. If a use of funds was allowable under the Coronavirus Relief Fund (CRF) to respond to the public health emergency, may recipients presume it is also allowable under CSFRF/CLFRF?

Generally, funding uses eligible under CRF as a response to the direct public health impacts of COVID-19 will continue to be eligible under CSFRF/CLFRF, with the following two exceptions: (1) the standard for eligibility of public health and safety payrolls has been updated; and (2) expenses related to the issuance of tax-anticipation notes are not an eligible funding use.

2.3. If a use of funds is not explicitly permitted in the Interim Final Rule as a response to the public health emergency and its negative economic impacts, does that mean it is prohibited?

The Interim Final Rule contains a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of Fiscal Recovery Funds not explicitly listed. The Interim Final Rule also provides flexibility for recipients to use Fiscal Recovery Funds for programs or services that are not identified on these non-exclusive lists but which meet the objectives of section 602(c)(1)(A) or 603(c)(1)(A) by responding to the COVID-19 public health emergency with respect to COVID-19 or its negative economic impacts.

2.4. May recipients use funds to respond to the public health emergency and its negative economic impacts by replenishing state unemployment funds?

Consistent with the approach taken in the CRF, recipients may make deposits into the state account of the Unemployment Trust Fund up to the level needed to restore the pre-pandemic balances of such account as of January 27, 2020, or to pay back advances received for the payment of benefits between January 27, 2020 and the date when the Interim Final Rule is published in the Federal Register.

2.5. What types of services are eligible as responses to the negative economic impacts of the pandemic?

Eligible uses in this category include assistance to households; small businesses and non-profits; and aid to impacted industries.

Assistance to households includes, but is not limited to: food assistance; rent, mortgage, or utility assistance; counseling and legal aid to prevent eviction or homelessness; cash assistance; emergency assistance for burials, home repairs, weatherization, or other needs; internet access or digital literacy assistance; or job training to address negative economic or public health impacts experienced due to a worker's occupation or level of training.

Assistance to small business and non-profits includes, but is not limited to:

- loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure, for example by supporting payroll and benefits costs, costs to retain employees, mortgage, rent, or utilities costs, and other operating costs;
- Loans, grants, or in-kind assistance to implement COVID-19 prevention or mitigation tactics, such as physical plant changes to enable social distancing, enhanced cleaning efforts, barriers or partitions, or COVID-19 vaccination, testing, or contact tracing programs; and
- Technical assistance, counseling, or other services to assist with business planning needs

2.6. May recipients use funds to respond to the public health emergency and its negative economic impacts by providing direct cash transfers to households?

Yes, provided the recipient considers whether, and the extent to which, the household has experienced a negative economic impact from the pandemic. Additionally, cash transfers must be reasonably proportional to the negative economic impact they are intended to address. Cash transfers grossly in excess of the amount needed to address the negative economic impact identified by the recipient would not be considered to be a response to the COVID-19 public health emergency or its negative impacts. In particular, when considering appropriate size of permissible cash transfers made in response to the COVID-19 public health emergency, state, local, territorial, and Tribal governments may consider and take guidance from the per person amounts previously provided by the federal government in response to the COVID crisis.

2.7. May funds be used to reimburse recipients for costs incurred by state and local governments in responding to the public health emergency and its negative economic impacts prior to passage of the American Rescue Plan?

Use of Fiscal Recovery Funds is generally forward looking. The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021.

2.8. May recipients use funds for general economic development or workforce development?

Generally, not. Recipients must demonstrate that funding uses directly address a negative economic impact of the COVID-19 public health emergency, including funds used for economic or workforce development. For example, job training for unemployed workers may be used to address negative economic impacts of the public health emergency and be eligible.

2.9. How can recipients use funds to assist the travel, tourism, and hospitality industries?

Aid provided to tourism, travel, and hospitality industries should respond to the negative economic impacts of the pandemic. For example, a recipient may provide aid to support safe reopening of businesses in the tourism, travel and hospitality industries and to districts that were closed during the COVID-19 public health emergency, as well as aid a planned expansion or upgrade of tourism, travel and hospitality facilities delayed due to the pandemic.

Tribal development districts are considered the commercial centers for tribal hospitality, gaming, tourism and entertainment industries.

2.10. May recipients use funds to assist impacted industries other than travel, tourism, and hospitality?

Yes, provided that recipients consider the extent of the impact in such industries as compared to tourism, travel, and hospitality, the industries enumerated in the statute. For example, nationwide the leisure and hospitality industry has experienced an approximately 17 percent decline in employment and 24 percent decline in revenue, on net, due to the COVID-19 public health emergency. Recipients should also consider whether impacts were due to the COVID-19 pandemic, as opposed to longer-term economic or industrial trends unrelated to the pandemic.

Recipients should maintain records to support their assessment of how businesses or business districts receiving assistance were affected by the negative economic impacts of the pandemic and how the aid provided responds to these impacts.

2.11. How does the Interim Final Rule help address the disparate impact of COVID-19 on certain populations and geographies?

In recognition of the disproportionate impacts of the COVID-19 virus on health and economic outcomes in low-income and Native American communities, the Interim Final Rule identifies a broader range of services and programs that are considered to be in response to the public health emergency when provided in these communities. Specifically, Treasury will presume that certain types of services are eligible uses when provided in a Qualified Census Tract (QCT), to families living in QCTs, or when these services are provided by Tribal governments.

Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic. In identifying these disproportionately-impacted communities, recipients should be able to support their determination for how the pandemic disproportionately impacted the populations, households, or geographic areas to be served.

Eligible services include:

- Addressing health disparities and the social determinants of health, including: community health workers, public benefits navigators, remediation of lead paint or other lead hazards, and community violence intervention programs;

- Building stronger neighborhoods and communities, including: supportive housing and other services for individuals experiencing homelessness, development of affordable housing, and housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity;

- Addressing educational disparities exacerbated by COVID-19, including: early learning services, increasing resources for high-poverty school districts, educational services like tutoring or afterschool programs, and supports for students' social, emotional, and mental health needs; and

- Promoting healthy childhood environments, including: child care, home visiting programs for families with young children, and enhanced services for child welfare-involved families and foster youth.

2.12. May recipients use funds to pay for vaccine incentive programs (e.g., cash or in-kind transfers, lottery programs, or other incentives for individuals who get vaccinated)?

Yes. Under the Interim Final Rule, recipients may use Coronavirus State and Local Fiscal Recovery Funds to respond to the COVID-19 public health emergency, including expenses related to COVID-19 vaccination programs. See 31 CFR 35.6(b)(1)(i). Programs that provide incentives reasonably expected to increase the number of people who choose to get vaccinated, or that motivate people to get vaccinated sooner than they otherwise would have, are an allowable use of funds so long as such costs are reasonably proportional to the expected public health benefit.

2.13. May recipients use funds to pay "back to work incentives" (e.g., cash payments for newly employed workers after a certain period of time on the job)? [5/27]

Yes. Under the Interim Final Rule, recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to unemployed workers. See 31 CFR 35.6(b)(4). This assistance can include job training or other efforts to accelerate rehiring and thus reduce unemployment, such as childcare assistance, assistance with transportation to and from a jobsite or interview, and incentives for newly employed workers.

2.14. The Coronavirus Relief Fund (CRF) included as an eligible use: "Payroll expenses for public safety, public health, health care, human services, and similar employees whose services are substantially dedicated to mitigating or responding to the COVID-19 public health emergency." What has changed in CSFRF/CLFRF, and what type of documentation is required under CSFRF/CLFRF? [5/27]

Many of the expenses authorized under the Coronavirus Relief Fund are also eligible uses under the CSFRF/CLFRF. However, in the case of payroll expenses for public safety, public health, health care, human services, and similar employees (hereafter, public health and safety staff), the CSFRF/CLFRF does differ from the CRF. This change reflects the differences between the ARPA and CARES Act and recognizes that the response to the COVID-19 public health emergency has changed and will continue to change over time. In particular, funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, including first responders, to the extent that the employee's time that is dedicated to responding to the COVID-19 public health emergency.

For administrative convenience, the recipient may consider a public health and safety employee to be entirely devoted to mitigating or responding to the COVID-19 public health emergency, and therefore fully covered, if the employee, or his or her operating unit or division, is primarily dedicated (e.g., more than half of the employee's time is dedicated) to responding to the COVID-19 public health emergency.

Recipients may use presumptions for assessing whether an employee, division, or operating unit is primarily dedicated to COVID-19 response. The recipient should maintain records to support its assessment, such as payroll records, attestations from supervisors or staff, or regular work product or correspondence demonstrating work on the COVID-19 response. Recipients need not routinely track staff hours. Recipients should periodically reassess their determinations.

2.15. What staff are included in "public safety, public health, health care, human services, and similar employees"? Would this include, for example, 911 operators, morgue staff, medical examiner staff, or EMS staff? [5/27]

As discussed in the Interim Final Rule, funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, for the portion of the employee's time that is dedicated to responding to the COVID-19 public health emergency.

Public safety employees would include police officers (including state police officers), sheriffs and deputy sheriffs, firefighters, emergency medical responders, correctional and detention officers, and those who directly support such employees such as dispatchers and supervisory personnel. Public health employees would include employees involved in providing medical and other health services to patients and supervisory personnel, including medical staff assigned to schools, prisons, and other such institutions, and other

support services essential for patient care (e.g., laboratory technicians, medical examiner or morgue staff) as well as employees of public health departments directly engaged in matters related to public health and related supervisory personnel. Human services staff include employees providing or administering social services; public benefits; child welfare services; and child, elder, or family care, as well as others.

2.16. May recipients use funds to establish a public jobs program? [6/8]

Yes. The Interim Final Rule permits a broad range of services to unemployed or underemployed workers and other individuals that suffered negative economic impacts from the pandemic. That can include public jobs programs, subsidized employment, combined education and on-the-job training programs, or job training to accelerate rehiring or address negative economic or public health impacts experienced due to a worker's occupation or level of training. The broad range of permitted services can also include other employment supports, such as childcare assistance or assistance with transportation to and from a jobsite or interview.

The Interim Final Rule includes as an eligible use re-hiring public sector staff up to the government's level of pre-pandemic employment. "Public sector staff" would not include individuals participating in a job training or subsidized employment program administered by the recipient.

2.17. The Interim Final Rule states that "assistance or aid to individuals or businesses that did not experience a negative economic impact from the public health emergency would not be an eligible use under this category." Are recipients required to demonstrate that each individual or business experienced a negative economic impact for that individual or business to receive assistance? [6/23]

Not necessarily. The Interim Final Rule allows recipients to demonstrate a negative economic impact on a population or group and to provide assistance to households or businesses that fall within that population or group. In such cases, the recipient need only demonstrate that the household or business is within the population or group that experienced a negative economic impact.

For assistance to households, the Interim Final Rule states, "In assessing whether a household or population experienced economic harm as a result of the pandemic, a recipient may presume that a household or population that experienced unemployment or increased food or housing insecurity or is low- or moderate-income experienced negative economic impacts resulting from the pandemic." This would allow, for example, an internet access assistance program for all low- or moderate-income households, but would not require the recipient to demonstrate or document that each individual low- or -moderate income household experienced a negative economic impact from the COVID-19 public health emergency apart from being low- or -moderate income.

For assistance to small businesses, the Interim Final Rule states that assistance may be provided to small businesses, including loans, grants, in-kind assistance, technical

assistance or other services, to respond to the negative economic impacts of the COVID-19 public health emergency. In providing assistance to small businesses, recipients must design a program that responds to the negative economic impacts of the COVID-19 public health emergency, including by identifying how the program addresses the identified need or impact faced by small businesses. This can include assistance to adopt safer operating procedures, weather periods of closure, or mitigate financial hardship resulting from the COVID-19 public health emergency.

As part of program design and to ensure that the program responds to the identified need, recipients may consider additional criteria to target assistance to businesses in need, including to small businesses. Assistance may be targeted to businesses facing financial insecurity, with substantial declines in gross receipts (e.g., comparable to measures used to assess eligibility for the Paycheck Protection Program), or facing other economic harm due to the pandemic, as well as businesses with less capacity to weather financial hardship, such as the smallest businesses, those with less access to credit, or those serving disadvantaged communities. For example, a recipient could find based on local data or research that the smallest businesses faced sharply increased risk of bankruptcy and develop a program to respond; such a program would only need to document a population or group-level negative economic impact, and eligibility criteria to limit access to the program to that population or group (in this case, the smallest businesses).

In addition, recognizing the disproportionate impact of the pandemic on disadvantaged communities, the Interim Final Rule also identifies a set of services that are presumptively eligible when provided in a Qualified Census Tract (QCT); to families and individuals living in QCTs; to other populations, households, or geographic areas identified by the recipient as disproportionately impacted by the pandemic; or when these services are provided by Tribal governments. For more information on the set of presumptively eligible services, see the Interim Final Rule section on *Building Stronger Communities through Investments in Housing and Neighborhoods* and FAQ 2.11.

2.18. Would investments in improving outdoor spaces (e.g. parks) be an eligible use of funds as a response to the public health emergency and/or its negative economic impacts? [6/23]

There are multiple ways that investments in improving outdoor spaces could qualify as eligible uses; several are highlighted below, though there may be other ways that a specific investment in outdoor spaces would meet eligible use criteria.

First, in recognition of the disproportionate negative economic impacts on certain communities and populations, the Interim Final Rule identifies certain types of services that are eligible uses when provided in a Qualified Census Tract (QCT), to families and individuals living in QCTs, or when these services are provided by Tribal governments. Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic.

These programs and services include services designed to build stronger neighborhoods and communities and to address health disparities and the social determinants of health. The Interim Final Rule provides a non-exhaustive list of eligible services to respond to the needs of communities disproportionately impacted by the pandemic, and recipients may identify other uses of funds that do so, consistent with the Rule's framework. For example, investments in parks, public plazas, and other public outdoor recreation spaces may be responsive to the needs of disproportionately impacted communities by promoting healthier living environments and outdoor recreation and socialization to mitigate the spread of COVID-19.

Second, recipients may provide assistance to small businesses in all communities. Assistance to small businesses could include support to enhance outdoor spaces for COVID-19 mitigation (e.g., restaurant patios) or to improve the built environment of the neighborhood (e.g., façade improvements).

Third, many governments saw significantly increased use of parks during the pandemic that resulted in damage or increased maintenance needs. The Interim Final Rule recognizes that "decrease[s to] a state or local government's ability to effectively administer services" can constitute a negative economic impact of the pandemic.

2.19. Would expenses to address a COVID-related backlog in court cases be an eligible use of funds as a response to the public health emergency? [6/23]

The Interim Final Rule recognizes that "decrease[s to] a state or local government's ability to effectively administer services," such as cuts to public sector staffing levels, can constitute a negative economic impact of the pandemic. During the COVID-19 public health emergency, many courts were unable to operate safely during the pandemic and, as a result, now face significant backlogs. Court backlogs resulting from inability of courts to safely operate during the COVID-19 pandemic decreased the government's ability to administer services. Therefore, steps to reduce these backlogs, such as implementing COVID-19 safety measures to facilitate court operations, hiring additional court staff or attorneys to increase speed of case resolution, and other expenses to expedite case resolution are eligible uses.

2.20. Can funds be used to assist small business startups as a response to the negative economic impact of COVID-19? [6/23]

As discussed in the Interim Final Rule, recipients may provide assistance to small businesses that responds to the negative economic impacts of COVID-19. The Interim Final Rule provides a non-exclusive list of potential assistance mechanisms, as well as considerations for ensuring that such assistance is responsive to the negative economic impacts of COVID-19.

Treasury acknowledges a range of potential circumstances in which assisting small business startups could be responsive to the negative economic impacts of COVID-19,

including for small businesses and individuals seeking to start small businesses after the start of the COVID-19 public health emergency. For example:

- A recipient could assist small business startups with additional costs associated with COVID-19 mitigation tactics (e.g., barriers or partitions; enhanced cleaning; or physical plant changes to enable greater use of outdoor space).
- A recipient could identify and respond to a negative economic impact of COVID-19 on new small business startups; for example, if it could be shown that small business startups in a locality were facing greater difficult accessing credit than prior to the pandemic, faced increased costs to starting the business due to the pandemic, or that the small business had lost expected startup capital due to the pandemic.
- The Interim Final Rule also discusses eligible uses that provide support for individuals who have experienced a negative economic impact from the COVID-19 public health emergency, including uses that provide job training for unemployed individuals. These initiatives also may support small business startups and individuals seeking to start small businesses.

2.21. Can funds be used for eviction prevention efforts or housing stability services? [6/24]

Yes. Responses to the negative economic impacts of the pandemic include "rent, mortgage, or utility assistance [and] counseling and legal aid to prevent eviction or homelessness." This includes housing stability services that enable eligible households to maintain or obtain housing, such as housing counseling, fair housing counseling, case management related to housing stability, outreach to households at risk of eviction or promotion of housing support programs, housing related services for survivors of domestic abuse or human trafficking, and specialized services for individuals with disabilities or seniors that supports their ability to access or maintain housing.

This also includes legal aid such as legal services or attorney's fees related to eviction proceedings and maintaining housing stability, court-based eviction prevention or eviction diversion programs, and other legal services that help households maintain or obtain housing.

Recipients may transfer funds to, or execute grants or contracts with, court systems, non-profits, and a wide range of other organizations to implement these strategies.

3. Eligible Uses – Revenue Loss

3.1. How is revenue defined for the purpose of this provision? [appendix added 6/23]

The Interim Final Rule adopts a definition of "General Revenue" that is based on, but not identical, to the Census Bureau's concept of "General Revenue from Own Sources" in the Annual Survey of State and Local Government Finances.

General Revenue includes revenue from taxes, current charges, and miscellaneous general revenue. It excludes refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, agency or private trust transactions, and revenue generated by utilities and insurance trusts. General revenue also includes intergovernmental transfers between state and local governments, but excludes intergovernmental transfers from the Federal government, including Federal transfers made via a state to a locality pursuant to the CRF or the Fiscal Recovery Funds.

Tribal governments may include all revenue from Tribal enterprises and gaming operations in the definition of General Revenue.

Please see the appendix for a diagram of the Interim Final Rule's definition of General Revenue within the Census Bureau's revenue classification structure.

3.2. Will revenue be calculated on an entity-wide basis or on a source-by-source basis (e.g. property tax, income tax, sales tax, etc.)?

Recipients should calculate revenue on an entity-wide basis. This approach minimizes the administrative burden for recipients, provides for greater consistency across recipients, and presents a more accurate representation of the net impact of the COVID- 19 public health emergency on a recipient's revenue, rather than relying on financial reporting prepared by each recipient, which vary in methodology used and which generally aggregates revenue by purpose rather than by source.

3.3. Does the definition of revenue include outside concessions that contract with a state or local government?

Recipients should classify revenue sources as they would if responding to the U.S. Census Bureau's Annual Survey of State and Local Government Finances. According to the Census Bureau's Government Finance and Employment Classification manual, the following is an example of current charges that would be included in a state or local government's general revenue from own sources: "Gross revenue of facilities operated by a government (swimming pools, recreational marinas and piers, golf courses, skating rinks, museums, zoos, etc.); auxiliary facilities in public recreation areas (camping areas, refreshment stands, gift shops, etc.); lease or use fees from stadiums, auditoriums, and community and convention centers; and rentals from concessions at such facilities."

3.4. What is the time period for estimating revenue loss? Will revenue losses experienced prior to the passage of the Act be considered?

Recipients are permitted to calculate the extent of reduction in revenue as of four points in time: December 31, 2020; December 31, 2021; December 31, 2022; and December 31, 2023. This approach recognizes that some recipients may experience lagged effects of the pandemic on revenues.

Upon receiving Fiscal Recovery Fund payments, recipients may immediately calculate revenue loss for the period ending December 31, 2020.

3.5. What is the formula for calculating the reduction in revenue?

A reduction in a recipient's General Revenue equals:

$$\text{Max } \{[\text{Base Year Revenue}^* (1+\text{Growth Adjustment})^{\left(\frac{n_t}{12}\right)}] - \text{Actual General Revenue}_t ; 0\}$$

Where:

Base Year Revenue is General Revenue collected in the most recent full fiscal year prior to the COVD-19 public health emergency.

Growth Adjustment is equal to the greater of 4.1 percent (or 0.041) and the recipient's average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency.

n equals the number of months elapsed from the end of the base year to the calculation date.

Actual General Revenue is a recipient's actual general revenue collected during 12-month period ending on each calculation date.

Subscript *t* denotes the calculation date.

3.6. Are recipients expected to demonstrate that reduction in revenue is due to the COVID-19 public health emergency?

In the Interim Final Rule, any diminution in actual revenue calculated using the formula above would be presumed to have been "due to" the COVID-19 public health emergency. This presumption is made for administrative ease and in recognition of the broad-based economic damage that the pandemic has wrought.

3.7. May recipients use pre-pandemic projections as a basis to estimate the reduction in revenue?

No. Treasury is disallowing the use of projections to ensure consistency and comparability across recipients and to streamline verification. However, in estimating the revenue shortfall using the formula above, recipients may incorporate their average annual revenue growth rate in the three full fiscal years prior to the public health emergency.

3.8. Once a recipient has identified a reduction in revenue, are there any restrictions on how recipients use funds up to the amount of the reduction?

The Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. Government services can include, but are not limited to, maintenance of infrastructure or pay-go spending for building new infrastructure, including roads; modernization of cybersecurity, including hardware, software, and protection of critical infrastructure; health services; environmental remediation; school or educational services; and the provision of police, fire, and other public safety services.

However, paying interest or principal on outstanding debt, replenishing rainy day or other reserve funds, or paying settlements or judgments would not be considered provision of a government service, since these uses of funds do not entail direct provision of services to citizens. This restriction on paying interest or principal on any outstanding debt instrument, includes, for example, short-term revenue or tax anticipation notes, or paying fees or issuance costs associated with the issuance of new debt. In addition, the overarching restrictions on all program funds (e.g., restriction on pension deposits, restriction on using funds for non-federal match where barred by regulation or statute) would apply.

3.9. How do I know if a certain type of revenue should be counted for the purpose of computing revenue loss? [5/27]

As discussed in FAQ #3.1, the Interim Final Rule adopts a definition of "General Revenue" that is based on, but not identical, to the Census Bureau's concept of "General Revenue from Own Sources" in the Annual Survey of State and Local Government Finances.

Recipients should refer to the definition of "General Revenue" included in the Interim Final Rule. See 31 CFR 35.3. If a recipient is unsure whether a particular revenue source is included in the Interim Final Rule's definition of "General Revenue," the recipient may consider the classification and instructions used to complete the Census Bureau's Annual Survey.

For example, parking fees would be classified as a Current Charge for the purpose of the Census Bureau's Annual Survey, and the Interim Final Rule's concept of "General Revenue" includes all Current Charges. Therefore, parking fees would be included in the Interim Final Rule's concept of "General Revenue."

The Census Bureau's Government Finance and Employment Classification manual is available here.

3.10. In calculating revenue loss, are recipients required to use audited financials? [6/8]

Where audited data is not available, recipients are not required to obtain audited data. Treasury expects all information submitted to be complete and accurate. See 31 CFR 35.4(c).

3.11. In calculating revenue loss, should recipients use their own data, or Census data? [6/8]

Recipients should use their own data sources to calculate general revenue, and do not need to rely on published revenue data from the Census Bureau. Treasury acknowledges that due to differences in timing, data sources, and definitions, recipients' self-reported general revenue figures may differ somewhat from those published by the Census Bureau.

3.12. Should recipients calculate revenue loss on a cash basis or an accrual basis? [6/8]

Recipients may provide data on a cash, accrual, or modified accrual basis, provided that recipients are consistent in their choice of methodology throughout the covered period and until reporting is no longer required.

3.13. In identifying intergovernmental revenue for the purpose of calculating General Revenue, should recipients exclude all federal funding, or just federal funding related to the COVID-19 response? How should local governments treat federal funds that are passed through states or other entities, or federal funds that are intermingled with other funds? [6/23]

In calculating General Revenue, recipients should exclude all intergovernmental transfers from the federal government. This includes, but is not limited to, federal transfers made via a state to a locality pursuant to the Coronavirus Relief Fund or Fiscal Recovery Funds. To the extent federal funds are passed through states or other entities or intermingled with other funds, recipients should attempt to identify and exclude the federal portion of those funds from the calculation of General Revenue on a best-efforts basis.

4. Eligible Uses – General

4.1. May recipients use funds to replenish a budget stabilization fund, rainy day fund, or similar reserve account?

No. Funds made available to respond to the public health emergency and its negative economic impacts are intended to help meet pandemic response needs and provide immediate stabilization for households and businesses. Contributions to rainy day funds and similar reserves funds would not address these needs or respond to the COVID-19 public health emergency, but would rather be savings for future spending needs. Similarly, funds made available for the provision of governmental services (to the extent of reduction in revenue) are intended to support direct provision of services to citizens. Contributions to rainy day funds are not considered provision of government services, since such expenses do not directly relate to the provision of government services.

4.2. May recipients use funds to invest in infrastructure other than water, sewer, and broadband projects (e.g. roads, public facilities)?

Under 602(c)(1)(C) or 603(c)(1)(C), recipients may use funds for maintenance of infrastructure or pay-go spending for building of new infrastructure as part of the general provision of government services, to the extent of the estimated reduction in revenue due to the public health emergency.

Under 602(c)(1)(A) or 603(c)(1)(A), a general infrastructure project typically would not be considered a response to the public health emergency and its negative economic impacts unless the project responds to a specific pandemic-related public health need (e.g., investments in facilities for the delivery of vaccines) or a specific negative economic impact of the pandemic (e.g., affordable housing in a Qualified Census Tract).

4.3. May recipients use funds to pay interest or principal on outstanding debt?

No. Expenses related to financing, including servicing or redeeming notes, would not address the needs of pandemic response or its negative economic impacts. Such expenses would also not be considered provision of government services, as these financing expenses do not directly provide services or aid to citizens.

This applies to paying interest or principal on any outstanding debt instrument, including, for example, short-term revenue or tax anticipation notes, or paying fees or issuance costs associated with the issuance of new debt.

4.4. May recipients use funds to satisfy nonfederal matching requirements under the Stafford Act? May recipients use funds to satisfy nonfederal matching requirements generally?

Fiscal Recovery Funds are subject to pre-existing limitations in other federal statutes and regulations and may not be used as non-federal match for other Federal programs whose statute or regulations bar the use of Federal funds to meet matching requirements. For example, expenses for the state share of Medicaid are not an eligible use. For information on FEMA programs, please see here.

4.5. Are governments required to submit proposed expenditures to Treasury for approval? [5/27]

No. Recipients are not required to submit planned expenditures for prior approval by Treasury. Recipients are subject to the requirements and guidelines for eligible uses contained in the Interim Final Rule.

4.6. How do I know if a specific use is eligible? [5/27]

Fiscal Recovery Funds must be used in one of the four eligible use categories specified in the American Rescue Plan Act and implemented in the Interim Final Rule:

a) To respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality;

b) To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers;

c) For the provision of government services to the extent of the reduction in revenue due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency; and

d) To make necessary investments in water, sewer, or broadband infrastructure.

Recipients should consult Section II of the Interim Final Rule for additional information on eligible uses. For recipients evaluating potential uses under (a), the Interim Final Rule contains a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of Fiscal Recovery Funds not explicitly listed. See Section II of the Interim Final Rule for additional discussion.

For recipients evaluating potential uses under (c), the Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. See FAQ #3.8 for additional discussion.

For recipients evaluating potential uses under (b) and (d), see Sections 5 and 6.

4.7. Do restrictions on using Coronavirus State and Local Fiscal Recovery Funds to cover costs incurred beginning on March 3, 2021 apply to costs incurred by the recipient (e.g., a State, local, territorial, or Tribal government) or to costs incurred by households, businesses, and individuals benefiting from assistance provided using Coronavirus State and Local Fiscal Recovery Funds? [6/8]

The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021. This limitation applies to costs incurred by the recipient (i.e., the state, local, territorial, or Tribal government receiving funds). However, recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to households, businesses, and individuals within the eligible use categories described in the Interim Final Rule for economic harms experienced by those households, businesses, and individuals prior to March 3, 2021. For example,

- Public Health/Negative Economic Impacts – Recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to households – such as rent, mortgage, or utility assistance – for economic harms experienced or costs incurred by the household prior to March 3, 2021 (e.g., rental arrears from

preceding months), provided that the cost of providing assistance to the household was not incurred by the recipient prior to March 3, 2021.

- Premium Pay – Recipients may provide premium pay retrospectively for work performed at any time since the start of the COVID-19 public health emergency. Such premium pay must be "in addition to" wages and remuneration already received and the obligation to provide such pay must not have been incurred by the recipient prior to March 3, 2021.
- Revenue Loss – The Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. The calculation of lost revenue begins with the recipient's revenue in the last full fiscal year prior to the COVID-19 public health emergency and includes the 12-month period ending December 31, 2020. However, use of funds for government services must be forward looking for costs incurred by the recipient after March 3, 2021.
- Investments in Water, Sewer, and Broadband – Recipients may use Coronavirus State and Local Fiscal Recovery Funds to make necessary investments in water, sewer, and broadband. See FAQ Section 6. Recipients may use Coronavirus State and Local Fiscal Recovery Funds to cover costs incurred for eligible projects planned or started prior to March 3, 2021, provided that the project costs covered by the Coronavirus State and Local Fiscal Recovery Funds were incurred after March 3, 2021.

4.8. How can I use CSFRF/CLFRF funds to prevent and respond to crime, and support public safety in my community? [6/23]

Under Treasury's Interim Final Rule, there are many ways in which the State and Local Fiscal Recovery Funds ("Funds") under the American Rescue Plan Act can support communities working to reduce and respond to increased violence due to the pandemic. Among the eligible uses of the Funds are restoring of public sector staff to their pre-pandemic levels and responses to the public health crisis and negative economic impacts resulting from the pandemic. The Interim Final Rule provides several ways for recipients to "respond to" this pandemic-related gun violence, ranging from community violence intervention programs to mental health services to hiring of public safety personnel.

Below are some examples of how Fiscal Recovery Funds can be used to address public safety:

- In all communities, recipients may use resources to rehire police officers and other public servants to restore law enforcement and courts to their pre-pandemic levels. Additionally, Funds can be used for expenses to address COVID-related court backlogs, including hiring above pre-pandemic levels, as a response to the public health emergency. See FAQ 2.19.

- In communities where an increase in violence or increased difficulty in accessing or providing services to respond to or mitigate the effects of violence, is a result of the pandemic they may use funds to address that harm. This spending may include:

  - Hiring law enforcement officials – even above pre-pandemic levels – or paying overtime where the funds are directly focused on advancing community policing strategies in those communities experiencing an increase in gun violence associated with the pandemic
  - Community Violence Intervention (CVI) programs, including capacity building efforts at CVI programs like funding and training additional intervention workers
  - Additional enforcement efforts to reduce gun violence exacerbated by the pandemic, including prosecuting gun traffickers, dealers, and other parties contributing to the supply of crime guns, as well as collaborative federal, state, and local efforts to identify and address gun trafficking channels
  - Investing in technology and equipment to allow law enforcement to more efficiently and effectively respond to the rise in gun violence resulting from the pandemic

  As discussed in the Interim Final Rule, uses of CSFRF/CLFRF funds that respond to an identified harm must be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses.

- Recipients may also use funds up to the level of revenue loss for government services, including those outlined above.

Recognizing that the pandemic exacerbated mental health and substance use disorder needs in many communities, eligible public health services include mental health and other behavioral health services, which are a critical component of a holistic public safety approach. This could include:

- Mental health services and substance use disorder services, including for individuals experiencing trauma exacerbated by the pandemic, such as:
  - Community-based mental health and substance use disorder programs that deliver evidence-based psychotherapy, crisis support services, medications for opioid use disorder, and/or recovery support
  - School-based social-emotional support and other mental health services
- Referrals to trauma recovery services for crime victims.

Recipients also may use Funds to respond to the negative economic impacts of the public health emergency, including:

- Assistance programs to households or populations facing negative economic impacts of the public health emergency, including:
  - Assistance to support economic security, including for the victims of crime;
  - Housing assistance, including rent, utilities, and relocation assistance;
  - Assistance with food, including Summer EBT and nutrition programs; and
  - Employment or job training services to address negative economic or public health impacts experienced due to a worker's occupation or level of training.

- Assistance to unemployed workers, including:

- Subsidized jobs, including for young people. Summer youth employment programs directly address the negative economic impacts of the pandemic on young people and their families and communities;
- Programs that provide paid training and/or work experience targeted primarily to (1) formerly incarcerated individuals, and/or (2) communities experiencing high levels of violence exacerbated by the pandemic;
- Programs that provide workforce readiness training, apprenticeship or pre-apprenticeship opportunities, skills development, placement services, and/or coaching and mentoring; and
- Associated wraparound services, including for housing, health care, and food.

Recognizing the disproportionate impact of the pandemic on certain communities, a broader range of services are eligible in those communities than would otherwise be available in communities not experiencing a pandemic-related increase in crime or gun violence. These eligible uses aim to address the pandemic's exacerbation of public health and economic disparities and include services to address health and educational disparities, support neighborhoods and affordable housing, and promote healthy childhood environments. The Interim Final Rule provides a non-exhaustive list of eligible services in these categories.

These services automatically qualify as eligible uses when provided in Qualified Census Tracts (QCTs), low-income areas designated by HUD; to families in QCTs; or by Tribal governments. Outside of these areas, recipient governments can also identify and serve households, populations, and geographic areas disproportionately impacted by the pandemic.

Services under this category could include:

- Programs or services that address or mitigate the impacts of the COVID-19 public health emergency on education, childhood health and welfare, including:
  - Summer education and enrichment programs in these communities, which include many communities currently struggling with high levels of violence;
  - Programs that address learning loss and keep students productively engaged;
  - Enhanced services for foster youths and home visiting programs; and
  - Summer camps and recreation.

- Programs or services that provide or facilitate access to health and social services and address health disparities exacerbated by the pandemic. This includes Community Violence Intervention (CVI) programs, such as:
  - Evidence-based practices like focused deterrence, street outreach, violence interrupters, and hospital-based violence intervention models, complete with wraparound services such as behavioral therapy, trauma recovery, job training, education, housing and relocation services, and financial assistance; and,
  - Capacity-building efforts at CVI programs like funding more intervention workers; increasing their pay; providing training and professional development for intervention workers; and hiring and training workers to administer the programs.

Please refer to Treasury's Interim Final Rule for additional information.

5. Eligible Uses – Premium Pay

5.1. What criteria should recipients use in identifying essential workers to receive premium pay?

Essential workers are those in critical infrastructure sectors who regularly perform in-person work, interact with others at work, or physically handle items handled by others.

Critical infrastructure sectors include healthcare, education and childcare, transportation, sanitation, grocery and food production, and public health and safety, among others, as provided in the Interim Final Rule. Governments receiving Fiscal Recovery Funds have the discretion to add additional sectors to this list, so long as the sectors are considered critical to protect the health and well-being of residents.

The Interim Final Rule emphasizes the need for recipients to prioritize premium pay for lower income workers. Premium pay that would increase a worker's total pay above 150% of the greater of the state or county average annual wage requires specific justification for how it responds to the needs of these workers.

5.2. What criteria should recipients use in identifying third-party employers to receive grants for the purpose of providing premium pay to essential workers?

Any third-party employers of essential workers are eligible. Third-party contractors who employ essential workers in eligible sectors are also eligible for grants to provide premium pay. Selection of third-party employers and contractors who receive grants is at the discretion of recipients.

To ensure any grants respond to the needs of essential workers and are made in a fair and transparent manner, the rule imposes some additional reporting requirements for grants to third-party employers, including the public disclosure of grants provided.

5.3. May recipients provide premium pay retroactively for work already performed?

Yes. Treasury encourages recipients to consider providing premium pay retroactively for work performed during the pandemic, recognizing that many essential workers have not yet received additional compensation for their service during the pandemic.

6. Eligible Uses – Water, Sewer, and Broadband Infrastructure

6.1. What types of water and sewer projects are eligible uses of funds?

The Interim Final Rule generally aligns eligible uses of the Funds with the wide range of types or categories of projects that would be eligible to receive financial assistance

through the Environmental Protection Agency's Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF).

Under the DWSRF, categories of eligible projects include: treatment, transmission and distribution (including lead service line replacement), source rehabilitation and decontamination, storage, consolidation, and new systems development.

Under the CWSRF, categories of eligible projects include: construction of publicly-owned treatment works, nonpoint source pollution management, national estuary program projects, decentralized wastewater treatment systems, stormwater systems, water conservation, efficiency, and reuse measures, watershed pilot projects, energy efficiency measures for publicly-owned treatment works, water reuse projects, security measures at publicly-owned treatment works, and technical assistance to ensure compliance with the Clean Water Act.

As mentioned in the Interim Final Rule, eligible projects under the DWSRF and CWSRF support efforts to address climate change, as well as to meet cybersecurity needs to protect water and sewer infrastructure. Given the lifelong impacts of lead exposure for children, and the widespread nature of lead service lines, Treasury also encourages recipients to consider projects to replace lead service lines.

6.2. May construction on eligible water, sewer, or broadband infrastructure projects continue past December 31, 2024, assuming funds have been obligated prior to that date?

Yes. Treasury is interpreting the requirement that costs be incurred by December 31, 2024 to only require that recipients have obligated the funds by such date. The period of performance will run until December 31, 2026, which will provide recipients a reasonable amount of time to complete projects funded with Fiscal Recovery Funds.

6.3. May recipients use funds as a non-federal match for the Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF)?

Recipients may not use funds as a state match for the CWSRF and DWSRF due to prohibitions in utilizing federal funds as a state match in the authorizing statutes and regulations of the CWSRF and DWSRF.

6.4. Does the National Environmental Policy Act (NEPA) apply to eligible infrastructure projects?

NEPA does not apply to Treasury's administration of the Funds. Projects supported with payments from the Funds may still be subject to NEPA review if they are also funded by other federal financial assistance programs.

6.5. What types of broadband projects are eligible?

The Interim Final Rule requires eligible projects to reliably deliver minimum speeds of 100 Mbps download and 100 Mbps upload. In cases where it is impracticable due to geography, topography, or financial cost to meet those standards, projects must reliably deliver at least 100 Mbps download speed, at least 20 Mbps upload speed, and be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed.

Projects must also be designed to serve unserved or underserved households and businesses, defined as those that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed.

6.6. For broadband investments, may recipients use funds for related programs such as cybersecurity or digital literacy training?

Yes. Recipients may use funds to provide assistance to households facing negative economic impacts due to Covid-19, including digital literacy training and other programs that promote access to the Internet. Recipients may also use funds for modernization of cybersecurity, including hardware, software, and protection of critical infrastructure, as part of provision of government services up to the amount of revenue lost due to the public health emergency.

6.7. How do I know if a water, sewer, or broadband project is an eligible use of funds? Do I need pre-approval? [6/8]

Recipients do not need approval from Treasury to determine whether an investment in a water, sewer, or broadband project is eligible under CSFRF/CLFRF. Each recipient should review the Interim Final Rule (IFR), along with the preamble to the Interim Final Rule, in order to make its own assessment of whether its intended project meets the eligibility criteria in the IFR. A recipient that makes its own determination that a project meets the eligibility criteria as outlined in the IFR may pursue the project as a CSFRF/CLFRF project without pre-approval from Treasury. Local government recipients similarly do not need state approval to determine that a project is eligible under CSFRF/CLFRF. However, recipients should be cognizant of other federal or state laws or regulations that may apply to construction projects independent of CSFRF/CLFRF funding conditions and that may require pre-approval.

For water and sewer projects, the IFR refers to the EPA Drinking Water and Clean Water State Revolving Funds (SRFs) for the categories of projects and activities that are eligible for funding. Recipients should look at the relevant federal statutes, regulations, and guidance issued by the EPA to determine whether a water or sewer project is eligible. Of note, the IFR does not incorporate any other requirements contained in the federal statutes governing the SRFs or any conditions or requirements that individual states may place on their use of SRFs.

6.8. For broadband infrastructure investments, what does the requirement that infrastructure "be designed to" provide service to unserved or underserved households and businesses mean? [6/17]

Designing infrastructure investments to provide service to unserved or underserved households or businesses means prioritizing deployment of infrastructure that will bring service to households or businesses that are not currently serviced by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed. To meet this requirement, states and localities should use funds to deploy broadband infrastructure projects whose objective is to provide service to unserved or underserved households or businesses. These unserved or underserved households or businesses do not need to be the only ones in the service area funded by the project.

6.9. For broadband infrastructure to provide service to "unserved or underserved households or businesses," must every house or business in the service area be unserved or underserved? [6/17]

No. It suffices that an objective of the project is to provide service to unserved or underserved households or businesses. Doing so may involve a holistic approach that provides service to a wider area in order, for example, to make the ongoing service of unserved or underserved households or businesses within the service area economical. Unserved or underserved households or businesses need not be the *only* households or businesses in the service area receiving funds.

6.10. May recipients use payments from the Funds for "middle mile" broadband projects? [6/17]

Yes. Under the Interim Final Rule, recipients may use payments from the Funds for "middle-mile projects," but Treasury encourages recipients to focus on projects that will achieve last-mile connections—whether by focusing on funding last-mile projects or by ensuring that funded middle-mile projects have potential or partnered last-mile networks that could or would leverage the middle-mile network.

6.11. For broadband infrastructure investments, what does the requirement to "reliably" meet or exceed a broadband speed threshold mean? [6/17]

In the Interim Final Rule, the term "reliably" is used in two places: to identify areas that are eligible to be the subject of broadband infrastructure investments and to identify expectations for acceptable service levels for broadband investments funded by the Coronavirus State and Local Fiscal Recovery Funds. In particular:

- The IFR defines "unserved or underserved households or businesses" to mean one or more households or businesses that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speeds and 3 Mbps of upload speeds.

- The IFR provides that a recipient may use Coronavirus State and Local Fiscal Recovery Funds to make investments in broadband infrastructure that are designed to provide service to unserved or underserved households or businesses and that are designed to, upon completion: (i) reliably meet or exceed

symmetrical 100 Mbps download speed and upload speeds; or (ii) in limited cases, reliably meet or exceed 100 Mbps download speed and between 20 Mbps and 100 Mbps upload speed and be scalable to a minimum of 100 Mbps download and upload speeds.

The use of "reliably" in the IFR provides recipients with significant discretion to assess whether the households and businesses in the area to be served by a project have access to wireline broadband service that can actually and consistently meet the specified thresholds of at least 25Mbps/3Mbps—i.e., to consider the actual experience of current wireline broadband customers that subscribe to services at or above the 25 Mbps/3 Mbps threshold. Whether there is a provider serving the area that advertises or otherwise claims to offer speeds that meet the 25 Mbps download and 3 Mbps upload speed thresholds is not dispositive.

When making these assessments, recipients may choose to consider any available data, including but not limited to documentation of existing service performance, federal and/or state-collected broadband data, user speed test results, interviews with residents and business owners, and any other information they deem relevant. In evaluating such data, recipients may take into account a variety of factors, including whether users actually receive service at or above the speed thresholds at all hours of the day, whether factors other than speed such as latency or jitter, or deterioration of the existing connections make the user experience unreliable, and whether the existing service is being delivered by legacy technologies, such as copper telephone lines (typically using Digital Subscriber Line technology) or early versions of cable system technology (DOCSIS 2.0 or earlier).

The IFR also provides recipients with significant discretion as to how they will assess whether the project itself has been designed to provide households and businesses with broadband services that meet, or even exceed, the speed thresholds provided in the rule.

6.12. May recipients use Funds for pre-project development for eligible water, sewer, and broadband projects? [6/23]

Yes. To determine whether Funds can be used on pre-project development for an eligible water or sewer project, recipients should consult whether the pre-project development use or cost is eligible under the Drinking Water and Clean Water State Revolving Funds (CWSRF and DWSRF, respectively). Generally, the CWSRF and DWSRF often allow for pre-project development costs that are tied to an eligible project, as well as those that are reasonably expected to lead to a project. For example, the DWSRF allows for planning and evaluations uses, as well as numerous pre-project development costs, including costs associated with obtaining project authorization, planning and design, and project start-up like training and warranty for equipment. Likewise, the CWSRF allows for broad pre-project development, including planning and assessment activities, such as cost and effectiveness analyses, water/energy audits and conservation plans, and capital improvement plans.

Similarly, pre-project development uses and costs for broadband projects should be tied to an eligible broadband project or reasonably expected to lead to such a project. For example, pre-project costs associated with planning and engineering for an eligible broadband infrastructure build-out is considered an eligible use of funds, as well as technical assistance and evaluations that would reasonably be expected to lead to commencement of an eligible project (e.g., broadband mapping for the purposes of finding an eligible area for investment).

All funds must be obligated within the statutory period between March 3, 2021 and December 31, 2024, and expended to cover such obligations by December 31, 2026.

7. Non-Entitlement Units (NEUs)

Answers to frequently asked questions on distribution of funds to NEUs can be found in this FAQ supplement, which is regularly updated.

8. Ineligible Uses

8.1. What is meant by a pension "deposit"? Can governments use funds for routine pension contributions for employees whose payroll and covered benefits are eligible expenses?

Treasury interprets "deposit" in this context to refer to an extraordinary payment into a pension fund for the purpose of reducing an accrued, unfunded liability. More specifically, the interim final rule does not permit this assistance to be used to make a payment into a pension fund if both: (1) the payment reduces a liability incurred prior to the start of the COVID-19 public health emergency, and (2) the payment occurs outside the recipient's regular timing for making such payments.

Under this interpretation, a "deposit" is distinct from a "payroll contribution," which occurs when employers make payments into pension funds on regular intervals, with contribution amounts based on a pre-determined percentage of employees' wages and salaries. In general, if an employee's wages and salaries are an eligible use of Fiscal Recovery Funds, recipients may treat the employee's covered benefits as an eligible use of Fiscal Recovery Funds.

8.2. May recipients use Fiscal Recovery Funds to fund Other Post-Employment Benefits (OPEB)? [6/8]

OPEB refers to benefits other than pensions (see, e.g., Governmental Accounting Standards Board, "Other Post-Employment Benefits"). Treasury has determined that Sections 602(c)(2)(B) and 603(c)(2), which refer only to pensions, do not prohibit CSFRF/CLFRF recipients from funding OPEB. Recipients of either the CSFRF/CLFRF may use funds for eligible uses, and a recipient seeking to use CSFRF/CLFRF funds for

OPEB contributions would need to justify those contributions under one of the four eligible use categories.

9. Reporting

On June 17, 2021, Treasury released Guidance on Recipient Compliance and Reporting Responsibilities for the Coronavirus State and Local Fiscal Recovery Funds. Recipients should consult this guidance for additional detail and clarification on recipients' compliance and reporting responsibilities. A users' guide will be provided with additional information on how and where to submit required reports.

9.1. What records must be kept by governments receiving funds?

Financial records and supporting documents related to the award must be retained for a period of five years after all funds have been expended or returned to Treasury, whichever is later. This includes those which demonstrate the award funds were used for eligible purposes in accordance with the ARPA, Treasury's regulations implementing those sections, and Treasury's guidance on eligible uses of funds.

9.2. What reporting will be required, and when will the first report be due?

Recipients will be required to submit an interim report, quarterly project and expenditure reports, and annual Recovery Plan Performance Reports as specified below, regarding their utilization of Coronavirus State and Local Fiscal Recovery Funds.

Interim reports: States (defined to include the District of Columbia), territories, metropolitan cities, counties, and Tribal governments will be required to submit one interim report. The interim report will include a recipient's expenditures by category at the summary level and for states, information related to distributions to non-entitlement units of local government must also be included in the interim report. The interim report will cover activity from the date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Non-entitlement units of local government are not required to submit an interim report.

Quarterly Project and Expenditure reports: State (defined to include the District of Columbia), territorial, metropolitan city, county, and Tribal governments will be required to submit quarterly project and expenditure reports. This report will include financial data, information on contracts and subawards over $50,000, types of projects funded, and other information regarding a recipient's utilization of award funds. Reports will be required quarterly with the exception of non-entitlement units, which will report annually. An interim report is due on August 31, 2021. The reports will include the same general data as those submitted by recipients of the Coronavirus Relief Fund, with some modifications to expenditure categories and the addition of data elements related to specific eligible uses. The initial quarterly Project and Expenditure report will cover two calendar quarters from the date of award to September 30, 2021 and must be submitted to

Treasury by October 31, 2021. The subsequent quarterly reports will cover one calendar quarter and must be submitted to Treasury within 30 days after the end of each calendar quarter.

Non-entitlement units of local government will be required to submit the project and expenditure report annually. The initial annual Project and Expenditure report for non-entitlement units of local government will cover activity from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year.

Recovery Plan Performance Reports: States (defined to include the District of Columbia), territories, metropolitan cities, and counties with a population that exceeds 250,000 residents will also be required to submit an annual Recovery Plan Performance Report to Treasury. This report will include descriptions of the projects funded and information on the performance indicators and objectives of each award, helping local residents understand how their governments are using the substantial resources provided by Coronavirus State and Local Fiscal Recovery Funds program. The initial Recovery Plan Performance Report will cover activity from date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Thereafter, the Recovery Plan Performance Reports will cover a 12-month period and recipients will be required to submit the report to Treasury within 30 days after the end of the 12-month period. The second Recovery Plan Performance Report will cover the period from July 1, 2021 to June 30, 2022 and must be submitted to Treasury by July 31, 2022. Each annual Recovery Plan Performance Report must be posted on the public-facing website of the recipient. Local governments with fewer than 250,000 residents, Tribal governments, and non-entitlement units of local government are not required to develop a Recovery Plan Performance Report.

Please see the Guidance on Recipient Compliance and Reporting Responsibilities for more information.

9.3. What provisions of the Uniform Guidance for grants apply to these funds? Will the Single Audit requirements apply?

Most of the provisions of the Uniform Guidance (2 CFR Part 200) apply to this program, including the Cost Principles and Single Audit Act requirements. Recipients should refer to the Assistance Listing for detail on the specific provisions of the Uniform Guidance that do not apply to this program. The Assistance Listing will be available on beta.SAM.gov.

9.4. Once a recipient has identified a reduction in revenue, how will Treasury track use of funds for the provision of government services? [6/8]

The ARPA establishes four categories of eligible uses and further restrictions on the use of funds to ensure that Fiscal Recovery Funds are used within the four eligible use categories. The Interim Final Rule implements these restrictions, including the scope of

the eligible use categories and further restrictions on tax cuts and deposits into pensions. Reporting requirements will align with this structure.

Consistent with the broad latitude provided to recipients to use funds for government services to the extent of the reduction in revenue, recipients will be required to submit a description of services provided. As discussed in IFR, these services can include a broad range of services but may not be used directly for pension deposits, contributions to reserve funds, or debt service. Recipients may use sources of funding other than Fiscal Recovery Funds to make deposits to pension funds, contribute to reserve funds, and pay debt service, including during the period of performance for the Fiscal Recovery Fund award.

For recipients using Fiscal Recovery Funds to provide government services to the extent of reduction in revenue, the description of government services reported to Treasury may be narrative or in another form, and recipients are encouraged to report based on their existing budget processes and to minimize administrative burden. For example, a recipient with $100 in revenue replacement funds available could indicate that $50 were used for personnel costs and $50 were used for pay-go building of sidewalk infrastructure.

In addition to describing the government services provided to the extent of reduction in revenue, all recipients will also be required to indicate that Fiscal Recovery Funds are not used directly to make a deposit in a pension fund. Further, recipients subject to the tax offset provision will be required to provide information necessary to implement the Interim Final Rule, as described in the Interim Final Rule. Treasury does not anticipate requiring other types of reporting or recordkeeping on spending in pensions, debt service, or contributions to reserve funds.

These requirements are further detailed in the guidance on reporting requirements for the Fiscal Recovery Funds available here.

9.5. What is the Assistance Listing and Catalog of Federal Domestic Assistance (CFDA) number for the program? [6/8]

The Assistance Listing for the Coronavirus State and Local Fiscal Recovery Funds (CSLFRF) was published May 28, 2021 on SAM.gov. This includes the final CFDA Number for the program, 21.027.

The assistance listing includes helpful information including program purpose, statutory authority, eligibility requirements, and compliance requirements for recipients. The CFDA number is the unique 5-digit code for each type of federal assistance, and can be used to search for program information, including funding opportunities, spending on usaspending.gov, or audit results through the Federal Audit Clearinghouse.

To expedite payments and meet statutory timelines, Treasury issued initial payments under an existing CFDA number. If you have already received funds or captured the

initial CFDA number in your records, please update your systems and reporting to reflect the final CFDA number 21.027. **Recipients must use the final CFDA number for all financial accounting, audits, subawards, and associated program reporting requirements.**

To ensure public trust, Treasury expects all recipients to serve as strong stewards of these funds. This includes ensuring funds are used for intended purposes and recipients have in place effective financial management, internal controls, and reporting for transparency and accountability.

Please see Treasury's Interim Final Rule and the Guidance on Recipient Compliance and Reporting Responsibilities for more information.

10. Miscellaneous

10.1. May governments retain assets purchased with Fiscal Recovery Funds? If so, what rules apply to the proceeds of disposition or sale of such assets?

Yes, if the purchase of the asset was consistent with the limitations on the eligible use of funds. If such assets are disposed of prior to December 31, 2024, the proceeds would be subject to the restrictions on the eligible use of payments.

10.2. Can recipients use funds for administrative purposes?

Recipients may use funds to cover the portion of payroll and benefits of employees corresponding to time spent on administrative work necessary due to the COVID–19 public health emergency and its negative economic impacts. This includes, but is not limited to, costs related to disbursing payments of Fiscal Recovery Funds and managing new grant programs established using Fiscal Recovery Funds.

10.3. Are recipients required to remit interest earned on CSFRF/CLFRF payments made by Treasury? [5/27]

No. CSFRF/CLFRF payments made by Treasury to states, territories, and the District of Columbia are not subject to the requirement of the Cash Management Improvement Act and Treasury's implementing regulations at 31 CFR part 205 to remit interest to Treasury. CSFRF/CLFRF payments made by Treasury to local governments and Tribes are not subject to the requirement of 2 CFR 200.305(b)(8)–(9) to maintain balances in an interest-bearing account and remit payments to Treasury.

10.4. Is there a deadline to apply for funds? [5/27]

The Interim Final Rule requires that costs be incurred by December 31, 2024. Direct recipients are encouraged to apply as soon as possible. For direct recipients other than Tribal governments, there is not a specific application deadline.

Tribal governments do have deadlines to complete the application process and should visit www.treasury.gov/SLFRPTribal for guidance on applicable deadlines.

Non-entitlement units of local government should contact their state government for information on applicable deadlines.

10.5. May recipients use funds to cover the costs of consultants to assist with managing and administering the funds? [6/8]

Yes. Recipients may use funds for administering the CSFRF/CLFRF program, including costs of consultants to support effective management and oversight, including consultation for ensuring compliance with legal, regulatory, and other requirements.

11. Operations

11.1. How do I know if my entity is eligible?

The Coronavirus State and Local Fiscal Recovery Funds American Rescue Plan Act of 2021 set forth the jurisdictions eligible to receive funds under the program, which are:

- States and the District of Columbia
- Territories
- Tribal governments
- Counties
- Metropolitan cities (typically, but not always, those with populations over 50,000)
- Non-entitlement units of local government, or smaller local governments (typically, but not always, those with populations under 50,000)

11.2. How does an eligible entity request payment?

Eligible entities (other than non-entitlement units) must submit their information to the Treasury Submission Portal. Please visit the **Coronavirus State and Local Fiscal Recovery Fund website** for more information on the submission process.

11.3. I cannot log into the Treasury Submission Portal or am having trouble navigating it. Who can help me?

If you have questions about the Treasury Submission Portal or for technical support, please email covidreliefitsupport@treasury.gov.

11.4. What do I need to do to receive my payment?

All eligible payees are required to have a DUNS Number previously issued by Dun & Bradstreet (https://www.dnb.com/).

All eligible payees are also required to have an active registration with the System for Award Management (SAM) (https://www.sam.gov).

And eligible payees must have a bank account enabled for Automated Clearing House (ACH) direct deposit. Payees with a Wire account are encouraged to provide that information as well.

More information on these and all program pre-submission requirements can be found on the **Coronavirus State and Local Fiscal Recovery Fund website.**

11.5. Why is Treasury employing id.me for the Treasury Submission Portal?

ID.me is a trusted technology partner to multiple government agencies and healthcare providers. It provides secure digital identity verification to those government agencies and healthcare providers to make sure you're you – and not someone pretending to be you – when you request access to online services. All personally identifiable information provided to ID.me is encrypted and disclosed only with the express consent of the user. Please refer to ID.me Contact Support for assistance with your ID.me account. Their support website is https://help.id.me.

11.6. Why is an entity not on the list of eligible entities in Treasury Submission Portal?

The ARPA statute lays out which governments are eligible for payments. The list of entities within the Treasury Submission Portal includes entities eligible to receive a direct payment of funds from Treasury, which include states (defined to include the District of Columbia), territories, Tribal governments, counties, and metropolitan cities.

Eligible non-entitlement units of local government will receive a distribution of funds from their respective state government and should not submit information to the Treasury Submission Portal.

If you believe an entity has been mistakenly left off the eligible entity list, please email SLFRP@treasury.gov.

11.7. What is an Authorized Representative?

An Authorized Representative is an individual with legal authority to bind the government entity (e.g., the Chief Executive Officer of the government entity). An Authorized Representative must sign the Acceptance of Award terms for it to be valid.

11.8. How does a Tribal government determine their allocation?

Tribal governments will receive information about their allocation when the submission to the Treasury Submission Portal is confirmed to be complete and accurate.

11.9. How do I know the status of my request for funds (submission)?

Entities can check the status of their submission at any time by logging into Treasury Submission Portal.

11.10. My Treasury Submission Portal submission requires additional information/correction. What is the process for that?

If your Authorized Representative has not yet signed the award terms, you can edit your submission with in the into Treasury Submission Portal. If your Authorized Representative has signed the award terms, please email SLFRP@treasury.gov to request assistance with updating your information.

11.11. My request for funds was denied. How do I find out why it was denied or appeal the decision?

Please check to ensure that no one else from your entity has applied, causing a duplicate submission. Please also review the list of all eligible entities on the **Coronavirus State and Local Fiscal Recovery Fund website.**

If you still have questions regarding your submission, please email SLFRP@treasury.gov.

11.12. When will entities get their money?

Before Treasury is able to execute a payment, a representative of an eligible government must submit the government's information for verification through the Treasury Submission Portal. The verification process takes approximately four business days. If any errors are identified, the designated point of contact for the government will be contacted via email to correct the information before the payment can proceed. Once verification is complete, the designated point of contact of the eligible government will receive an email notifying them that their submission has been verified. Payments are generally scheduled for the next business day after this verification email, though funds may not be available immediately due to processing time of their financial institution.

11.13. How does a local government entity provide Treasury with a notice of transfer of funds to its State?

For more information on how to provide Treasury with notice of transfer to a state, please email SLRedirectFunds@treasury.gov.

MOUNT JOY BOROUGH

Lancaster County, Pennsylvania

APPLICATION FOR CONSIDERATION OF A SUBDIVISION AND/OR LAND DEVELOPMENT PLAN

The undersigned hereby applies for approval under Chapter 240, Subdivision and Land Development, of the Code of the Borough of Mount Joy for the Plan submitted herewith and described below:

For Mount Joy Borough Use Only

Mount Joy Borough File No: 21003	Date of Receipt/Filing: 4/1/21

Plan & Project Information

Plan Name: Preliminary/Final Land Development Plan for Gerberich Payne Shoe Company	
Plan No: 1378-20	Plan Date: March 22, 2021
Location: 240 W Main Street	
Property Owner: Mount Joy Senior Housing LP	
Owner Address: 2121 Old Gatesburg Road Suite 200 State College, PA 16803	
Telephone Number: 814-272-8945	
Email: clovrack@gatesburgroaddevelopment.com	
Deed Reference: 6574192	Tax Parcel No: 450-34256-0-0000
Applicant (if not landowner): same as owner	
Applicant Address:	
Telephone Number:	
Email:	
Firm Which Prepared Plan: DC Gohn Associates	
Firm Address: 32 Mount Joy Street Mount Joy, PA 17552	
Telephone Number: 717-653-5308	
Person Responsible For Plan: Brian R. Cooley	
Email: bcooley@dcgohn.com	
Plan Type: ☐ Sketch Plan	
☐ Preliminary Plan ☐ Subdivision ☐ Land Development ☐ Lot-Line Change Plan	
☒ Final & Preliminary/Final Plan ☐ Lot-Line Change Plan (expedited)	
☐ Improvement Construction Plan	
Description: Convert existing building into 36 senior housing apartments, construct retail on ground floor, re-configure existing parking lot	
Total Acreage: 1.279	
Zoning District: Commercial Business District	
Is/was a zoning variance, special exception or conditional use approval necessary? ☐ yes ☒ no	
If yes, please attach Zoning Hearing Board Decision.	

Proposed Lots and Units					
	# of Lots	# of Units		# of Lots	# of Units
Total #	1	36	Mixed Use		
Commercial			Single Family Detached		
Industrial			Multifamily		
Institutional			Other Senior housing	1	36
Total Square Feet of Ground Floor Area (building footprint):			11,428		
Total Square Feet of Existing Structures (all floors):			57,888		
Total Square Feet of Proposed Structures (all floors):			57,140		
Total Square Feet (or Acres) of Proposed Parkland/Other Public Use:			0		
Linear feet of new street:			0		
Identify all street(s) not proposed for dedication:			All access drives are private		

NOTES:

1. **All units of occupancy shall be provided with a complete water supply system which shall be connected to the Borough's water supply system in accordance with the requirements of Council, the Authority and DEP.**
2. **All units of occupancy shall be provided with a complete sanitary sewer system, which shall be connected to the Borough's sanitary sewer system in accordance with the requirements of Council, the Authority and DEP.**
3. **The final plan application shall include a statement from the Authority indicating the approval of plans for design, installation, and possible financial guarantees.**
4. **Applicants shall comply with all plan processing procedures of the County Planning Commission. It is the responsibility of the applicant to determine the requirements of the County Planning Commission, including, but not limited to, the number of copies which must be submitted and the filing fee.**
5. **The final plan or preliminary/final plan shall be recorded in the office of the Recorder of Deeds in and for Lancaster County.**

To Whom It May Concern,

Mount Joy Senior Apartments has several sources of financing that are both conventional and public sourced. The financing includes Federal Tax Credits sold to a corporate investor, Lancaster County Redevelopment Authority HOME funds, and Pennsylvania Housing Finance Agency debt. As part of this financing, we are obligated to restrict our units to seniors over the age of 62 years of age, and must be persons who have incomes of less than 60% area median income. Violation of this requirement could jeopardize all of this financing. The developer has developed 11 senior properties with similar financing.

PHFA and Lancaster County will require a Rent Regulatory Agreement executed and recorded at financial closing. The Rent Regulatory Agreement outlines the Age restriction for the financing. A copy of that agreement is attached from a similar project. The Age restriction is noted on Page 3 under Tenant Selection.

Should you have any questions or need additional information, please do not hesitate to contact me at 814-272-8907.

RENT REGULATORY AGREEMENT

This Agreement is made and entered into this 23rd day of December, 2020, to be effective as of December 23, 2020,

by and between:

RIVERVIEW SENIOR HOUSING LP, a Pennsylvania limited partnership, with an address of 2121 Gatesburg Road, Suite 200, State College, PA 16803 ("the Borrower"),

AND

COUNTY OF ALLEGHENY, a home rule county and political subdivision of the Commonwealth of Pennsylvania, acting through its Department of Economic Development ("DOED"), with its address at One Chatham Center 112 Washington Place, Suite 900, Pittsburgh, Pennsylvania 15219 (the "County" or "Allegheny County").

WITNESSETH:

WHEREAS, the County's DOED operates the "Allegheny Housing Development Fund Program" (hereinafter the "Program") under which DOED provides monies made available to the County by the United States Department of Housing and Urban Development ("HUD") pursuant to Title II of the National Affordable Housing Act of 1990 under the HOME Investment Partnerships Program (hereinafter "the HOME Program") and also under the Allegheny Housing Trust Fund Program ("AHTF") as loans to assist in the development of new or substantially rehabilitated housing at affordable rental rates for low/moderate-income households; and

WHEREAS, the Borrower has proposed the acquisition, development and construction of thirty (30) units of affordable senior rental housing, of which 30 units are expected to be low income units (the "Project"), to be located at 1330 Eleventh Avenue in the Harrison Township, Allegheny County, Pennsylvania, 15065 being more particularly described on Exhibit "A" attached hereto (the "Property"); and

WHEREAS, pursuant to the Program, the County has agreed to provide a loan of HOME/AHTF Program funds in the amount of [redacted] and 00/100 Dollars ([redacted]) to assist Borrower in the development and construction activities of the Project (the "Loan"); and

WHEREAS, the proceeds of the Loan (the "Loan Proceeds") will be allocated to four (4) floating Assisted Units (the "Assisted Units") in the Project, subject to the HOME rent and income restrictions (as detailed below); and

WHEREAS, the Loan is evidenced by a Mortgage Note (the "Note"), secured by an Open-End Mortgage and Security Agreement (the "Mortgage") and this Rent Regulatory Agreement (the "Regulatory Agreement" or the "Rent Regulatory Agreement"), and the Construction Loan and Development Agreement between the parties, all of even date herewith, and other related security documents (collectively the "Loan Documents"); and

WHEREAS, the County is making the Loan pursuant to the HOME Investment Partnerships Program, 42 U.S.C. 12701 et seq., Titles I and II and the regulations promulgated by the Secretary of the United States Department of Housing and Urban Development pursuant thereto at 24 CFR Part 92 (the "HOME Program Regulations"); and

WHEREAS, as a condition for the making of the Loan, the County and the Borrower have entered into an agreement for the implementation of the FY 2017 HOME Investment Partnerships Program/Affordable Housing Trust Fund Program (hereinafter "the HOME Agreement"); and

WHEREAS, the County is setting the allowable rent and tenant income limits for two periods, the first of which shall be the HOME affordability period, which will have a length of twenty-two years from the date of this document, and the second, known as the County affordability period which will begin at the end of the HOME affordability period until the expiration date of this agreement, thirty (30) years from the date of this document; and

WHEREAS, the Borrower, in consideration of the Loan and the other matters set forth herein and in the other Loan Documents, has agreed to operate the Project and the Assisted Units pursuant to certain prescribed conditions as set forth in this Regulatory Agreement, the Construction Loan and Development Agreement and the HOME Agreement; and

NOW, THEREFORE, the County and the Borrower, in consideration of the mutual promises and covenants contained herein and agreeing to be legally bound thereby, the parties hereto agree as follows:

1. Rent

A. Rent for the HOME affordability period (years 0-22). The rent (the "Rent") for the Assisted Units shall not exceed the fair market rent for existing housing for comparable units in the area as established by HUD under 24 CFR §888.111 or thirty percent (30%) of the adjusted gross income of the tenant whose annual income equals sixty-five percent (65%) of the median income for the area, all as more specifically set forth in the HOME Program Regulations at 24 CFR §92.252. Because the Project has fewer than five (5) Assisted Units, none of the Assisted Units are required to be leased at Low HOME Rent levels. (The Rent for Low HOME Rent, defined as thirty percent (30%) of the tenant's monthly-adjusted income, or thirty percent (30%) of the annual income of a family whose income equals fifty percent (50%) of the median income for the area.) All assisted units are rent limited only to the High HOME rent limits. The Rent shall include a pro rata portion of all costs to Borrower of operating the Property, including all electric, gas, water and sewer charges for each unit if paid by Borrower, but excluding the Assisted Units' telephone and any other optional services such as cable television. The initial rent limits are included in Exhibit "B" attached hereto. Exhibit "B" will also contain the number of each size unit required to be counted as the Assisted Units. Please note that if the HOME Rent limits are updated prior to the completion of construction, the updated HOME Rent limits may be applied to the HOME-Assisted units, if requested of the County in writing and once an approval letter from the County is received.

B. Rent for the County affordability period (years 23-30). The rent for the

Assisted Units may not exceed the rent limits in effect for the non-assisted affordable units, as set by the Pennsylvania Housing Finance Agency ("PHFA") and updated by PHFA from time to time.

C. (i) The maximum rents set forth in paragraphs A and B above may not be increased prior to January 1, 2023. Thereafter, the maximum rents may be increased by Borrower provided that such request is not disapproved by the County by notice to Borrower given within sixty (60) days after Borrower submits to the County a notice that it intends to increase the maximum rents (the "Rent Increase Notice"). Rent Increase Notices shall include the Project's current audited financial statement and a proposed annual operating budget and any other documentation relied on for the rent increase.

(ii) The Borrower may not increase rents more than two times in any calendar year. Rent increases shall be effective for leases entered into, renewed, or extended beginning sixty (60) days after submission and the County's approval of a Rent Increase Notice.

(iii) In making its determination as to whether a requested increase will be disapproved in full or in part, the County shall consider all relevant factors including the operating results set forth in the Borrower's financial statements, Borrower's need to operate on a break-even basis, general increases in operating costs as evidenced by the United States Department of Labor, Bureau of Labor Statistics Consumer Price Index, and other relevant data, extraordinary increases in operating costs which are beyond the control of the Borrower, and the maintenance and capital needs of the Property, the reasonableness of the compensation, and other amounts paid for management and other expenses.

(iv) In general, the County shall not disapprove rent increases caused by increases in the following operating expenses except to the extent offset by any reduction in other operating expenses or by such amounts, if any, that the County reasonably deems certain expenses to be excessive:

(a) Utility rates and real estate taxes; or

(b) Insurance, refuse removal, and HVAC maintenance (the "Service Contracts") if the increases in the Service Contract expenses have resulted in actual operating expenses exceeding budgeted annual operating expenses by more than one-half of one percent (0.5%).

(v) Notwithstanding any other provision of this Regulatory Agreement, in no event shall the maximum rents in force during the HOME Affordability period exceed the maximum rent allowable under the HOME Program Regulations and any other applicable federal regulations.

2. Tenant Selection.

A. Tenant Selection during the HOME Affordability Period (years 0-22). Tenant selection shall be made by Borrower. All tenants shall be aged 62 years or older. The household incomes of the Assisted Units can be no greater than 60% or less of median income for Allegheny County as published by HUD. Per the HOME rules, this applies at the initial occupancy for each tenant, but afterwards each tenant's income may increase up to 80% of median income.

B. Tenant Selection during the County Affordability Period (years 23-30). Tenant selection shall be made by Borrower. All tenants shall be aged 62 years or older. Household incomes of tenants for the Assisted Units may be limited under the same standards and limits, as set by PHFA, for the non-Assisted, non-market rate units.

C. The Borrower shall maintain tenant records with respect to the Assisted Units (including eligibility requirements) in such a way that compliance with the criteria set forth herein can be ascertained by the County. The Borrower shall furnish, not less than annually, tenant income certification to the County and permit access to such records by an agent of County at any reasonable time.

3. **Restrictions.** Except as otherwise expressly permitted in this Regulatory Agreement, the Borrower shall not do any of the following without the prior written approval of County:

A. Require, as a condition of the occupancy or leasing of any unit on the Property, any consideration or deposit other than the prepayment of the first month's rent plus a security deposit in an amount not in excess of one month's rent. All security deposits shall be kept separate and apart from all other funds of the Property in a trust account, the amount of which shall at all times equal or exceed the aggregate of all outstanding obligations under said account.

B. Permit the use of the units for any purpose except residential accommodations.

C. Violate any applicable provisions of the HOME Program Regulations, during the HOME affordability period.

4. **Reserve for Replacements.** The Borrower shall establish and maintain a reserve fund for replacements (the "Reserve for Replacement Fund") in a separate account held by the Borrower or PHFA. Beginning at initial occupancy, or other such date approved by PHFA and the County, the Borrower shall make annual payments to the Reserve for Replacement Fund Account in an amount equal to $375 per unit per year unless a different date or amount is approved in writing by PHFA and the County.

5. **Financial Statements.** On or before June 30 of each year, Borrower will provide the County with an audited annual financial statement for the Project as of December 31st of the immediately previous calendar year prepared by an independent certified public accountant in accordance with generally accepted accounting principles consistently applied.

6. **Discrimination.** The Borrower will comply with the provisions of any applicable federal, state or local law prohibiting discrimination in housing on the grounds of race, color, creed, age, ancestry, sex, religion, disability, familial status, national origin, actual or perceived sexual orientation, gender identity, or marital status.

7. **Remedies.** Upon the violation of any of the above provisions of this Regulatory Agreement by the Borrower, the County shall give written notice thereof to the Borrower, the Borrower's limited partner ("Limited Partner"), Citizens Bank, N.A. ("Bank") and PHFA. If such violation is not corrected by the Borrower, the Limited Partner, the Bank or PHFA to the

satisfaction of the County within sixty (60) days after the giving of such notice or within such further time as the County determines is necessary to correct the violation, without further notice, the County may declare a default under this Regulatory Agreement. Upon such declaration of default, the County may pursue any and all of its legal and equitable rights and remedies including but not limited to the pursuit of any remedy provided for in the Loan Documents and the application to any court, state or federal, for specific performance of this Regulatory Agreement, for an injunction against any violation of the Regulatory Agreement, for the appointment of a receiver to take over and operate the Property in accordance with terms of the Regulatory Agreement, or for such other type of relief as may be appropriate. It is agreed that the injury to the County arising from a default under any of the terms of this Regulatory Agreement would be irreparable and the amount of damages would be difficult to ascertain. Notwithstanding anything to the contrary contained herein or in the other Loan Documents, the County hereby agrees that any cure of any default made or tendered by the Borrower's limited partners shall be deemed to be a cure by the Borrower and shall be accepted or rejected on the same basis as if made or tendered by the Borrower.

8. **Duration of Covenants.**

A. Except as set forth in Subparagraph B below, this Regulatory Agreement shall constitute a covenant running with the land starting from the date of the execution of this Regulatory Agreement and ending thirty (30) years thereafter.

B. In addition, in the event of any sale, lease (other than unit leases) or other transfer of the Property or any part thereof by the Borrower, its heirs, successors, successors in title or assigns, at any time or times during or after the term of this Regulatory Agreement, the Property shall be subject to and the transferor shall cause a covenant running with the land to be inserted in the deed or lease for such transfer, prohibiting discrimination upon the basis of race, color, creed, religion, sex, age, ancestry, disability, actual or perceived sexual orientation, gender identity, or marital status, familial status or national origin in the sale, lease or rental, or in the use or occupancy of the Property, and providing that the County and the United States Government are beneficiaries of and entitled to enforce such covenant. County, in undertaking its obligation in carrying out the Program through the Loan provided, agrees to take such measures as are necessary to enforce such covenant and will not itself so discriminate.

9. **Partial Invalidity.** The invalidity of any clause, part or provision of this Regulatory Agreement shall not affect the validity of the remaining portions thereof.

10. **Successors.** The covenants, conditions and promises contained in this Regulatory Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

11. **Non-Recourse.** Notwithstanding anything to the contrary in this Regulatory Agreement, no personal liability for repayment of the Loan shall be asserted or be enforceable against the Borrower or any partner of the Borrower under this Regulatory Agreement. Any execution pursuant to any judgment obtained on account of the Borrower's monetary obligations hereunder shall be limited to the real and personal property subject to the Mortgage and any other security given County to secure repayment of the Loan.

12. **Notices.** Any notice hereunder shall be deemed given on the next business day after being mailed by registered or certified United States mail, or sent via overnight delivery, return receipt requested, addressed to parties at their respective addresses as herein above specified or at such other address as may be specified from time to time by notice in the manner herein set forth, or upon hand delivery to the parties. All notices under this Regulatory Agreement shall be copied to:

Limited Partner:	CREA Riverview Natrona Heights, LLC 30 South Meridian Street, Suite 400 Indianapolis, IN 46204 Attn: Asset Management
	With copies to:
	Jones Day 100 High Street Boston, MA 02110 Attention: John D. Kelley, Esquire
Bank:	Citizens Bank, National Association 1215 Superior Avenue – OHS-760 Cleveland, OH 44114 Attention: Timothy B. Smith
	With copies to:
	Thompson Hine LLP 3900 Key Center 127 Public Square Cleveland, OH 44114 Attention: David M. Lewis, Esquire
PHFA:	Pennsylvania Housing Finance Agency 211 North Front Street Harrisburg, PA 17101 Attention: Legal Division

13. **Subordination.** The Lender has agreed to subordinate its rights and interests under this Agreement to the obligations of the Borrower to the Bank during the development and construction of the Project so long as the indebtedness of the Bank remains outstanding and to the PHFA during the development and operation of the Project so long as the indebtedness of PHFA remains outstanding.

14. **Counterparts.** This Agreement may be executed in counterparts which shall all be originals.

RE: **Gatesburg Road Development, Gerberich Payne Shoe Company**

Dear Mr. Cooley:

The South Central Transit Authority (SCTA) reviewed the revised "Proposed Layout, Easement, and Landscape Plan" for the redevelopment of the Gerberich Payne Shoe Company. The revised plan was prepared following a February 7, 2021 virtual meeting with Mr. Haines and you to discuss including a bus stop as part of the project.

SCTA currently has a designated bus stop with sign located on West Main Street at Williams Alley. The revised plan reviewed by SCTA provide for an enhanced bus stop at its current location. The plans include the construction of a 5 FT x 8 FT concrete boarding & alighting pad at the bus stop in accordance with ADA requirements. A separate 6 FT x 10 FT concrete pad is being planned for the installation of a bus shelter. The planned installation of a bus shelter supplied by SCTA is expected to help attract and retain bus riders from the residents. An ADA accessible route to the bus stop and shelter will be available via the sidewalk for residents. An accessible path will also be provided across Williams Alley.

Based on its review of the revised plan received on February 22, 2021, SCTA concluded the proposed stop with a shelter meets our requirements. SCTA looks forward to the completion of the proposed redevelopment of the Gerberich Payment Shoe Company and the construction of the enhanced bus stop improvements.

Sincerely

David W. Kilmer
Executive Director

MEMORANDUM

TO:	Brian R. Cooley, ASLA – D.C. Gohn Associates, Inc.		
FROM:	John M. Schick		
DATE:	March 12, 2021		
PROJECT NAME:	Gerberich Payne Shoe Company Site	**PROJECT NO.:**	041432008
SUBJECT:	Comment / Response Letter		

As requested, we have reviewed and addressed the November 25, 2020 Traffic Comments provided by Arro Consulting, Inc. We offer the following responses to each comment:

Comment 7 - The trips generated based on the ITE Land Use Code 820 shown in Table 1 appear to have used the average rate rather than the fitted curve equation. The equation shall be used when available.

Response - The use of the equations for ITE LUC 820 (Shopping Center) are not reasonable or feasible for the proposed small amount of retail space. The use of the trip equations for 3,000 SF of retail would generate approximately 554 trips per day, with 153 occurring in the AM Peak and 40 in the PM Peak. The equation for the AM peak trips is $T = 0.50(X) + 151.78$, so even 1,000 SF of retail would generate 153 trips. Therefore, we believe the use of the average rates are more realistic for a small 3,000 SF retail use located in Mount Joy Borough.

Comment 8 - The bottle neck at the adjacent Alley and West Henry Street needs to be taken into consideration and dimensioned to determine if it is feasible to maintain a two-way alley from the proposed one-way section to West Henry Street. Further discussion needs to be held with the Borough. (reference page 2 of 5 of the TIA memo).

Response – It is our understanding that the adjacent Alley will be converted to a one-way north flow. The entrance to the Alley and West Henry Street was revised to relocate the utility pole and widen that area on the plans. There were dimensions and signage also added to the plans.

Comment 9 - There appears to be a typo in the AM base analysis on the intersection of Main Street, Lumber Street and Fairview Street. The right turn volume from Fairview Street should be 17 according to the traffic counts.

Response – The analyses were revised to change the right turn volume from 15 to 17. The updated TIA has been revised accordingly.

Comment 10 - It appears the AM base analysis for the intersection of Henry Street and the Alley was conducted using the 6:00 to 7:00 AM counts even though the study indicated a peak hour of 8:00AM to 9:00AM.

Response – The report was revised to remove the peak hour references. The peak hours at all of the intersections varied. The analyses utilized the peak hour of each intersection in order to analyse "worse-case" scenario.

Comment 11 - It appears the PM existing analysis for the intersection of West Henry Street and the Alley was conducted using the 4-5PM counts even though the study indicates a peak hour of 5-6PM.

Response – See response to Comment #10. The 4:00 – 5:00 was the highest hour for this intersection, therefore this hour was used. There are 12 total vehicles using this intersection during the 4:00 – 5:00 p.m. peak hour. The 5:00 – 6:00 p.m. hour total is 7 vehicles.

Comment 12 - The existing PM analysis shows 4 vehicles turning right from eastbound Main Street. However, the counts show no vehicles making a right turn and 4 vehicles making a left turn.

Response - The 4 eastbound left turns are into the VFW driveway which is not included in this intersection analysis since it is located to the west of the Alley. The right turning volumes were review and revised. The updated TIA has been revised accordingly.

Comment 13 - The Turn Lane Warrant analysis for Main Street, Lumber Street and Fairview Street for the 2022 PM Peak Hour shows the advancing left turn lane volume as 17. According to the intersection analysis, it should be 18.

Response – The turn lane warrant analyses were updated based on the change of the commercial uses. The updated TIA contains the revised analyses and results.

The revised TIA contains all updated traffic counts, analyses, and findings. If you have any questions or comments, please feel free to call me. Thanks!

VIA EMAIL

Stacie Gibbs, BCO
Planning, Zoning & Code Administrator
Mount Joy Borough
21 E. Main Street
Mount Joy, PA 17552

SUBJECT: Gerberich-Payne Shoe Company Re-Development
Preliminary/Final Land Development Plan Modification Requests
DCG Project Number **1378-20**

Ms. Stacie Gibbs:

On behalf of our client, Gatesburg Road Development, we are submitting the requested modifications for the Preliminary/Final Land Development Plan for the Gerberich-Payne Shoe Company Re-Development.

Subdivision and Land Development Ordinance

1. **Section 240-43.H.1 – Improvement of Existing Streets**
   We request relief from the requirement that in cases where a subdivision or land development abuts an existing Borough and/or state street, the street shall be improved to the ultimate width in accordance with Subsection H(1) or as indicated on the Official Map, whichever is greater, and additional right of way shall be provided, concrete curbing, and sidewalk, and any other street improvements that are required by this Chapter, shall be constructed.

   The Official Map indicates that the Alley and the portion of West Henry Street along the property frontage as proposed local streets. There are no additional requirements for any adjacent streets noted on the Official Map.

   The Alley requires a 16 feet cartway and a 20 feet right of way. If improved to local street standards, it requires a 24 feet cartway and a 50 feet right of way. Currently, the Alley consists of a 15' right of way and a cartway width of 12 feet. The proposal is to maintain the existing Alley right of way of 15 feet and the cartway width of 12 feet and not upgrade the Alley to a local street standard. The Alley is proposed to be widened along the property frontage to accommodate the re-configured access to the site and provide for better maneuverability into the site. The existing building and sidewalk on the subject property and the existing building on the adjacent property are directly adjacent to the Alley which would prohibit expanding the cartway or right of way in this area.

West Henry Street requires a 24 feet cartway with curbing and no parking and a 50 feet right of way. Currently, West Henry Street consists of a 49.5 feet right of way and a cartway width of 18.1 feet. The existing street is adequate for access to the site.

West Main Street is classified as arterial which requires 36 feet cartway with curb and no parking and a 60 feet right of way. Currently, West Main Street consists of a 39 feet cartway with curb and a 60 feet right of way. The street meets current standards.

2. **Section 240-43.I.(4) – Street Radius**
We request relief from the requirement that the street intersection with a local street shall be a minimum radius of 20 feet. The request is to provide a radius of 15 feet and 8 feet for the parking lot access drive to Williams Alley. The smaller radius are a result of the layout of the parking lot and access drives which accommodate the required number of parking spaces and provides access to the building. The smaller radius permit resident vehicles and emergency vehicles from entering and exiting the parking lot to the alley.

3. **Section 240-46.C.(1) – Curbing**
We request relief from the requirement that curbing shall be provided along the edge of any landscaped portions of a parking facility. The request is to provide curbing in the area of the handicap parking area, the center landscape island, and the northern portion of the parking lot adjacent to the building. The remaining parking areas do not propose curbing. The parking lot is designed to sheet flow stormwater from Henry Street to the storm sewer system along the curbed areas for collection to the stormwater BMP. There is a landscape and grass buffer between the areas adjacent to the parking lot which do not contain curbing along Henry Street and the western property line.

4. **Section 240-57.D.(1) – Dedication of Recreation**
We request relief from the requirement to dedicate recreation land. There is limited areas of the site to dedicate areas for recreation. As an alternate, the project proposes to pay a fee in lieu of dedication of recreation as indicated in Section 240-57.G.

5. **Section 240-57.G – Fee In Lieu of Dedication**
We request relief from the requirement to provide a fee in lieu of dedication of recreation. As an alternate, the applicant is proposing a fee in lieu of $2,000 per unit. Based on the 36 residential units, the proposed fee in lieu of is $72,000.

6. **Section 240-62.B – Traffic Study**
We request relief from the requirement for applications for all residential developments containing 20 or more dwelling units and all nonresidential developments with buildings containing 1,000 square feet of usable space shall provide a traffic study and report. The alternate is a traffic assessment. The traffic assessment has been revised based on comments received from the public meetings regarding the review of the sketch plan and previous traffic assessment. In particular, the New Haven Street and Henry Street and West Main Street, Manheim Street, and New Haven Street intersections have been analyzed in addition to the previous intersections. The revisions are incorporated into the revised assessment.

The assessment is based on the 36 senior apartment units, 3,000 square feet of general retail, and 3,000 square feet of medical office. The traffic assessment indicates that there are approximately 21 AM peak trips and 34 PM peak trips for the senior housing, retail, and medical office. The results of the capacity analyses indicate that the studied intersections currently operate at an overall acceptable level of service and will continue to operate at an overall acceptable level of service for the project. The results of the queue analyses indicated that the proposed redevelopment will not have any significant impact on the studied intersections. The results of the auxiliary turn lane warrant analysis indicates that turn lanes are not warranted for traffic along Main Street turning right or left onto Lumber Street. The crash data for the area indicated 9 reportable crashes at the five intersections over the past 5 years. Based on the traffic assessment, the redevelopment will not create any adverse traffic conditions to the surrounding street network and no roadway improvements are warranted.

Stormwater Management Ordinance

1. **Section 226-32.A.(2)(c) – Loading Ratios**
   We request relief of the requirement that the maximum loading ratios in Karst areas shall be 3:1 impervious drainage area to infiltration area and 5:1 total drainage area to infiltration area.

   The loading ratio for the proposed rain garden is 18.9:1 for the total area to infiltration area and 12.0:1 for the impervious area to the infiltration area. The rain garden is designed to infiltrate stormwater from a portion of West Henry Street, parking lot, sidewalks, and grass areas. A soil amended area is installed at the bottom of the rain garden which will promote infiltration and aid in water quality. A spillway is used as an overflow during larger storm events. The dewatering time is 24 hours for the volume storage area. The rain garden is routed for the 100 year storm to ensure that stormwater drains to the infiltration basin without impacting the adjacent areas of development.

   Currently, there are no stormwater detention facilities on-site. Based on the re-configured parking lot, the existing building, and the surrounding street network, there is limited areas for stormwater infiltration and detention. The proposed rain garden is designed to infiltrate the net increase in the 2 year volume associated with Area A and designed to detain stormwater for the 2, 10, 25, 50, and 100 year rate. The addition of the rain garden will provide a stormwater facility which provides infiltration, treats water quality, and detains rate for an existing site which did not contain any such facility.

2. **Section 226-37.A.(6)(b) — Emergency Spillway Conveyance**
   We request relief of the requirement that the use of the emergency spillway to convey flows greater than the 50 year storm is permitted. The request is to use the emergency spillway to convey flows from the 2, 10, and 25 year storm events. This is in addition to the emergency spillway conveying the 50 and 100 year storms which is permitted. The spillway is designed with the required erosion control liner for the 100 year storm inflow hydrograph to the rain garden to prevent erosion. The stormwater overflow will drain to

the existing inlet located in West Main Street similar to the pre development stormwater flow condition.

Call me directly if you have any questions or concerns. Thank you.

Sincerely,

RE: Gatesburg Road Development
Gerberich Payne Shoe Company Land Development
ARRO #10863.39

Dear Stacie:

ARRO Consulting, Inc. ("ARRO") reviewed the following information in accordance with the Mount Joy Borough Subdivision and Land Development, Zoning, and Stormwater Management Ordinances:

1. Preliminary/Final Land Development Plan for Gerberich Payne Shoe Company prepared by D.C. Gohn Associates, Inc. with Drawing # CG-3049 dated March 22, 2021.

2. Traffic Assessment prepared by Rettew with Project No. 041432008 dated November 10, 2020 and revised on March 11, 2021.

3. Preliminary/Final Land Development Plan Modification Request Letter submitted by D.C. Gohn Associates, Inc. with Project No. 1378-20 dated March 22, 2021.

4. Stormwater Infiltration Summary Report for the Gerberich Payne Shoe Company prepared by Kleinfelder, Inc. with Project No. 20213553.001A dated February 19, 2021.

5. Post-Construction Stormwater Management Report for Preliminary/Final Land Development Plan: Gerberich Payne Shoe Company – 240 West Main Street prepared by D.C. Gohn Associates, Inc. with DCG Project No. 1378-20 dated March 22, 2021.

6. Lighting Plan for Gatesburg Road Development Gerberich Payne Shoe Company prepared by D.C. Gohn Associates, Inc. with Drawing # CG-3049 dated March 16, 2021 and the luminaire details.

7. Drainage Area Maps for Gerberich Payne Shoe Company prepared by D.C. Gohn Associates, Inc. dated March 16, 2021.

We offer the following comments:

Subdivision and Land Development

1. The applicant shall post financial security to the Borough. [§240-31.A]

2. As-built plans shall be provided after construction is complete and the cost for preparation of the plans shall be included in the financial security [§240-37]. A note shall be added to the plans requiring the submission of as-built plans.

3. Any change to a street or access intersection with a state road, such as changing Williams Alley from two-way to one-way, shall require a Highway Occupancy Permit Application submission to PennDOT and the following note shall be shown on the plan: "A highway occupancy permit is required pursuant to Section 420 of the Act of June 1, 1945 (P.L. 1242, No. 428), known as the 'State Highway Law', before access to a state highway is permitted. Access to the state highway shall be as authorized by a highway occupancy permit and the Borough Council's approval of this plan in no way implies that such a permit can be acquired." [§240-61.D.12.c]

4. The plans shall be signed and sealed by a registered engineer, surveyor, or landscape architect. [§240-61.A.5]

5. The right-of-way for Williams Alley is 15' wide and the cartway at the intersection of West Henry Street is wider. The applicant shall clarify if additional right-of-way will be dedicated to the Borough. [§240-43.H]

6. Proposed pavement markings and signage shall be shown on the plan. Based on the response from previous Comment 8, Williams Alley is to be one 'way northbound 190' north of West Henry Street. The applicant shall provide appropriate signage to indicate this change. Changing from existing two-way traffic to one-way traffic requires a PennDOT Highway Occupancy Permit. The PennDOT Highway Occupancy Permit plan shall be submitted to the Borough for review prior to submission to PennDOT. [§240-61.D.2]

7. Clear sight triangles shall be shown on the plan for the intersections of Williams Alley with Main Street and West Henry Street. [§240-61.D.11]

Stormwater Management

8. The measurement of impervious area shall include the proposed future parking area. This area shall be included in the volume calculations. [§226-31.H.1]

9. The rain garden detail on Sheet 9 shows the spillway at an elevation of 376.30' and shall be corrected. [§226-43.J.5]

10. Financial security shall be provided in the amount indicated in an approved construction cost estimate. [§226-60]

11. An Operation and Maintenance Agreement shall be prepared, signed, and provided to the Borough. [§226-62]

Zoning

12. The electrical lines to the proposed lighting fixtures shall be provided to show there are no conflicts with other proposed features. [§270-76]

Traffic

13. Williams Alley is proposed to be one way northbound from 190' north of West Henry Street. The analysis shall reflect this change.

14. The study shall indicate that the peak hour for each intersection varies and that the analysis utilized the highest peak hour at each intersection in order to analyze the "worst-case" scenario.

15. The plan indicate that the proposed use is to be senior housing and retail or restaurant space. The analysis shall provide the trip generation calculations and analysis for the "worst-case" scenario.

General

16. The sidewalk detail on Sheet 7 of 12 shall be revised to state 4' minimum – varies, see plan.

17. A note shall be provided on the plan indicating that the curb shall be painted yellow or "No Parking" signs shall be installed along Main Street between Williams Alley and the proposed parking spaces to the west.

18. Notes on the plan state that West Henry Street may be widened and parking constructed in the future. If the developer/owner decides to proceed with construction, approval by Borough Council must be obtained and maintenance and other applicable agreements must be executed with the Borough prior to beginning construction.

19. A "Tenant Parking Only" sign shall be shown on the plans at the entrance to the parking lot.

Waivers – Subdivision and Land Development

20. The applicant is requesting to waive the requirement to improve streets in which a subdivision or land development abuts an existing Borough and/or state street (§240-43.H.1). Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

21. The applicant is requesting to waive the requirement for street intersections with a local street to be a minimum radius of 20' [§240-43.I.4]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

22. The applicant is requesting to waive the requirement that curbing shall be provided along the edge of any landscaped portion of a parking facility [§240-46.C.1]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

23. The applicant is requesting to waive the requirement to dedicate recreation land to the Borough because there is limited area on the site for this purpose. As an alternative, the applicant is proposing to pay a fee in lieu of dedication of recreation land. Based on the justification provided, **ARRO recommends granting this waiver request.**

24. The applicant is requesting to waive the requirement to provide a fee in lieu of dedication of recreation [§240-57.G]. The applicant proposes paying a fee of $2,000.00 per unit for a total fee of $72,000.00. However, because land is not being provided on the subject property, the fair market value cannot be determined. Therefore, Borough Council must decide if $72,000.00 is an acceptable fee in lieu of land dedication.

25. The applicant is requesting to waive the requirement that applications for all residential developments with 20 or more dwelling units and buildings containing 1,000 square feet of usable space provide a traffic study and report [§240-62.B]. Because a traffic assessment was prepared which provides adequate information to evaluate the traffic impacts on the adjacent roadway system, **ARRO recommends granting this waiver request.**

26. The applicant is requesting to waive the requirement that the applicant shall make an estimated contribution of the sum necessary to defray the costs of improvements recommended by the Traffic Impact Study [§240-62.B.5]. After discussion with Borough staff and the applicant's engineer, this waiver is not required because the traffic study is not recommending improvements.

Waivers – Stormwater Management

27. The applicant is requesting to waive the requirement for the loading ratios in Karst areas to be a maximum of 3:1 impervious drainage area to infiltration area and 5:1 total drainage area to infiltration area. The site is very limited in space which limits the size of the infiltration area [§226-32.A.2.c]. Based on the justification provided, **ARRO recommends granting this waiver request.**

28. The applicant is requesting to waive the requirement that the use of the emergency spillway to convey flows greater than the 50-year storm is permitted [§226-37.A.6.b]. The spillway is designed as the primary outlet for the rain garden and will convey flows from the 2-year through 100-year events without erosion. Based on the justification provided, **ARRO recommends granting this waiver request.**

Please call me at 717-560-6065 if you have questions.

Sincerely,

Darrell L. Becker, P.E.
Vice President

Re: Preliminary/Final Land Development Plan for Gerberich Payne Shoe Company
Our File No. 16724-3

Dear Stacie:

We have received the Preliminary/Final Land Development Plan for Gerberich Payne Shoe Company (the "Plan") and supporting information from D.C. Gohn Associates, Inc. ("D.C. Gohn"). The Plan relates to an existing lot located on the south side of West Main Street (SR 0230) which also has frontage on West Henry Street and Williams Alley identified as 240 West Main Street (the "Property"). The Plan proposes the conversion of the vacant building on the Property into 36 apartment dwellings together will the installation of 40 off-street parking spaces and storm water management facilities. This letter will set forth comments on the Plan. We did previously review a sketch plan for the Property and provided comments by a letter dated November 17, 2020.

The Property is currently owned by Mount Joy Senior Housing LP ("Landowner") by virtue of a deed recorded at Document No. 6574192. There is a mortgage against the Property held by S & A Homes, Inc. recorded at Document No. 6574193. The Plan proposes the installation of storm water management facilities, so there must be a Storm Water Management Agreement executed by Landowner. The mortgage holder will have to execute the necessary Joinder by Mortgagee. D.C. Gohn should prepare an exhibit for the Storm Water Management Agreement containing the operation and maintenance procedure table from Sheet 9 of the Plan.

Sheet 3 of the Plan shows "future road widening of West Henry Street" and "future parking areas of West Henry Street." Plan Note 2 indicates that no improvements are intended for dedication to the Borough. I therefore assume that Gatesburg Road Development ("Developer") is not intending to perform the road widening or install the off-street parking. The letter dated March 22, 2021, requests waivers from Section 240-43.H(1) of the Subdivision and Land Development Ordinance ("SALDO"), so I assume these designated "future" improvements are to be installed by others. The Plan should make that clear.

The letter dated March 22, 2021, requests waivers from the requirement to dedicate open space and recreation land or pay a fee in lieu of dedication required by Section 240-57 of the

SALDO. My letter to you reviewing the sketch plan addressed the policy issues raised by the request that an indoor community room and indoor fitness room should be considered to be the park and recreation facilities. Whether the proposal to pay a fee in lieu of dedication of $72,000, $2,000 per unit, is acceptable is a policy issue for Council.

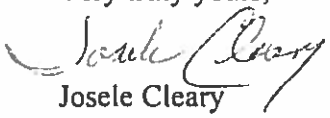
The traffic assessment prepared by Rettew Associates, Inc., recommends that Williams Alley be restricted to one-way traffic north from 190 feet north of Henry Street to West Main Street. The Borough must enact an ordinance if it will make Williams Alley a one-way street for any or all of the portion abutting the Property. The Developer should reimburse the Borough for all costs associated with the preparation and advertising of such an ordinance.

The Plan does not propose to make improvements to the street frontages or dedication additional right-of-way. The Borough should consider whether it desires to waive or defer any or all of the requirements. If Council will defer rather than waive any of the requirements, there should be a recorded Deferred Improvements Agreement between Landowner and the Borough.

The off-street parking is sufficient only if the apartments are age restricted. The Developer should identify how it intends to establish the age restriction. A statement in the zoning site data table that the parking requirements are based on housing permanently restricted to persons 62 years and older and/or physically handicapped is not sufficient.

If you have any questions concerning these comments, please contact me.

Very truly yours,



Josele Cleary

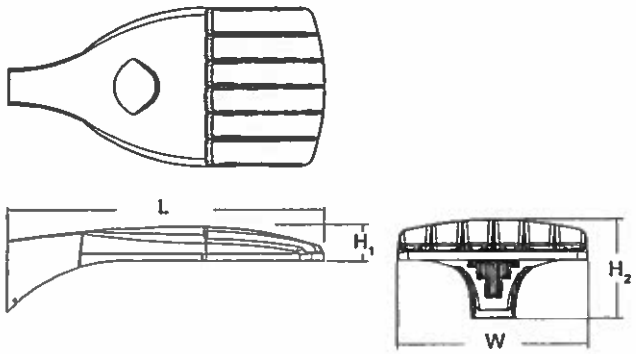
Specifications

EPA:	0.95 ft² (.09 m²)
Length:	26" (66.0 cm)
Width:	13" (33.0 cm)
Height$_1$:	3" (7.62 cm)
Height$_2$:	7" (17.8 cm)
Weight (max):	16 lbs (7.25 kg)



Introduction

The modern styling of the D-Series is striking yet unobtrusive - making a bold, progressive statement even as it blends seamlessly with its environment. The D-Series distills the benefits of the latest in LED technology into a high performance, high efficacy, long-life luminaire.

The outstanding photometric performance results in sites with excellent uniformity, greater pole spacing and lower power density. It is ideal for replacing up to 400W metal halide with typical energy savings of 70% and expected service life of over 100,000 hours.

NOTES
1. HA not available with P4, P7, and P13.
2. P10, P11, P12 and P13 and rotated options (L90 or R90) only available together.
3. Any Type 5 distribution with photocell, is not available with WBA.
4. Not available with HS or DDL.
5. MVOLT driver operates on any line voltage from 120-277V (50/60 Hz).
6. Single fuse (SF) requires 120V, 277V or 347V. Double fuse (DF) requires 208V, 240V or 480V. XVOLT not available with fusing (SF or DF).
7. XVOLT only suitable for use with P4, P7 and P13.
8. XVOLT operates with any voltage between 277V and 480V.
9. XVOLT not available with fusing (SF or DF) and not available with PIR, PIRH, PIR1FC3V, PIRH1FC3V.
10. Suitable for mounting to round poles between 3.5" and 12" diameter.
11. Universal mounting brackets intended for retrofit on existing pre-drilled poles only. 1.5 G vibration load rating per ANCI C136.31. Only usable when pole's drill pattern is NOT Lithonia template #8.
12. Must order fixture with SPA mounting. Must be ordered as a separate accessory; see Accessories information. For use with 2-3/8" diameter mast arm (not included).
13. Must be ordered with PIRHN.
14. Sensor cover available only in dark bronze, black, white and natural aluminum colors.
15. Must be ordered with NLTAIR2. For more information on nLight Air 2 visit this link
16. Photocell ordered and shipped as a separate line item from Acuity Brands Controls. See accessories. Shorting Cap included.
17. If ROAM® node required, it must be ordered and shipped as a separate line item from Acuity Brands Controls. Shorting Cap included.
18. DMG not available with PIRHN, PER5, PER7, PIR, PIRH, PIR1FC3V or PIRH1FC3V, FAO.
19. Reference Controls Options table on page 4.
20. Reference Motion Sensor Default Table on page 4 to see functionality.
21. Not available with other dimming controls options.
22. Not available with BLC, LCCO and RCCO distribution.
23. Must be ordered with fixture for factory pre-drilling.
24. Requires luminaire to be specified with PER, PER5 or PER7 option. See Controls Table on page 4.
25. For retrofit use only. Only usable when pole's drill pattern is NOT Lithonia template #8

Performance Data

Lumen Ambient Temperature (LAT) Multipliers

Use these factors to determine relative lumen output for average ambient temperatures from 0-40°C (32-104°F).

Ambient		Lumen Multiplier
0°C	32°F	1.04
5°C	41°F	1.04
10°C	50°F	1.03
15°C	50°F	1.02
20°C	68°F	1.01
25°C	77°C	1.00
30°C	86°F	0.99
35°C	95°F	0.98
40°C	104°F	0.97

Projected LED Lumen Maintenance

Data references the extrapolated performance projections for the platforms noted in a 25°C ambient, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate LLF, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other lumen maintenance values, contact factory.

Operating Hours	Lumen Maintenance Factor
25,000	0.96
50,000	0.92
100,000	0.85

Motion Sensor Default Settings						
Option	Dimmed State	High Level (when triggered)	Photocell Operation	Dwell Time	Ramp-up Time	Ramp-down Time

Controls Options

Nomenclature	Description	Functionality	Primary control device	Notes
FAO	Field adjustable output device installed inside the luminaire; wired to the driver dimming leads.	Allows the luminaire to be manually dimmed, effectively trimming the light output.	FAO device	Cannot be used with other controls options that need the 0-10V leads
DS	Drivers wired independently for 50/50 luminaire operation	The luminaire is wired to two separate circuits, allowing for 50/50 operation.	Independently wired drivers	Requires two separately switched circuits. Consider nLight AIR as a more cost effective alternative.
PER5 or PER7	Twist-lock photocell receptacle	Compatible with standard twist-lock photocells for dusk to dawn operation, or advanced control nodes that provide 0-10V dimming signals.	Twist-lock photocells such as DLL Elite or advanced control nodes such as ROAM.	Pins 4 & 5 to dimming leads on driver, Pins 6 & 7 are capped inside luminaire
PIR or PIRH	Motion sensors with integral photocell. PIR for 8-15' mounting; PIRH for 15-30' mounting	Luminaires dim when no occupancy is detected.	Acuity Controls SBGR	Also available with PIRH1FC3V when the sensor photocell is used for dusk-to-dawn operation.
NLTAIR2 PIRHN	nLight AIR enabled luminaire for motion sensing, photocell and wireless communication.	Motion and ambient light sensing with group response. Scheduled dimming with motion sensor over-ride when wirelessly connected to the nLight Eclypse.	nLight Air rSDGR	nLight AIR sensors can be programmed and commissioned from the ground using the CLAIRity Pro app.

Performance Data

Lumen Output

Lumen values are from photometric tests performed in accordance with IESNA LM-79-08. Data is considered to be representative of the configurations shown, within the tolerances allowed by Lighting Facts. Contact factory for performance data on any configurations not shown here.

FEATURES & SPECIFICATIONS

INTENDED USE
The sleek design of the D-Series Size 0 reflects the embedded high performance LED technology. It is ideal for many commercial and municipal applications, such as parking lots, plazas, campuses, and pedestrian areas.

CONSTRUCTION
Single-piece die-cast aluminum housing has integral heat sink fins to optimize thermal management through conductive and convective cooling. Modular design allows for ease of maintenance and future light engine upgrades. The LED driver is mounted in direct contact with the casting to promote low operating temperature and long life. Housing is completely sealed against moisture and environmental contaminants (IP65). Low EPA (0.95 ft^2) for optimized pole wind loading.

FINISH
Exterior parts are protected by a zinc-infused Super Durable TGIC thermoset powder coat finish that provides superior resistance to corrosion and weathering. A tightly controlled multi-stage process ensures a minimum 3 mils thickness for a finish that can withstand extreme climate changes without cracking or peeling. Available in both textured and non-textured finishes.

OPTICS
Precision-molded proprietary acrylic lenses are engineered for superior area lighting distribution, uniformity, and pole spacing. Light engines are available in 3000 K, 4000 K or 5000 K (70 CRI) configurations. The D-Series Size 0 has zero uplight and qualifies as a Nighttime Friendly™ product, meaning it is consistent with the LEED® and Green Globes™ criteria for eliminating wasteful uplight.

ELECTRICAL
Light engine(s) configurations consist of high-efficacy LEDs mounted to metal-core circuit boards to maximize heat dissipation and promote long life (up to L85/100,000 hours at 25°C). Class 1 electronic drivers are designed to have a power factor >90%, THD <20%, and an expected life of 100,000 hours with <1% failure rate. Easily serviceable 10kV surge protection device meets a minimum Category C Low operation (per ANSI/IEEE C62.41.2).

STANDARD CONTROLS
The DSX0 LED area luminaire has a number of control options. DSX Size 0, comes standard with 0-10V dimming driver. Dusk to dawn controls can be utilized via optional NEMA twist-lock photocell receptacles. Integrated motion sensors with on-board photocells feature field-adjustable programing and are suitable for mounting heights up to 30 feet.

nLIGHT AIR CONTROLS
The DSX0 LED area luminaire is also available with nLight® AIR for the ultimate in wireless control. This powerful controls platform provides out-of-the-box basic motion sensing and photocontrol functionality and is suitable for mounting heights up to 40 feet. Once commissioned using a smartphone and the easy-to-use CLAIRITY app, nLight AIR equipped luminaries can be grouped, resulting in motion sensor and photocell group response without the need for additional equipment. Scheduled dimming with motion sensor over-ride can be achieved when used with the nLight Eclypse. Additional information about nLight Air can be found here.

INSTALLATION
Included mounting block and integral arm facilitate quick and easy installation. Stainless steel bolts fasten the mounting block securely to poles and walls, enabling the D-Series Size 0 to withstand up to a 3.0 G vibration load rating per ANSI C136.31. The D-Series Size 0 utilizes the AERIS™ series pole drilling pattern (template #8). Optional terminal block and NEMA photocontrol receptacle are also available.

LISTINGS
UL Listed for wet locations. Light engines are IP66 rated; luminaire is IP65 rated. Rated for -40°C to 50°C ambient with HA option. U.S. Patent No. D672,492 S. International patent pending.

DesignLights Consortium® (DLC) Premium qualified product and DLC qualified product. Not all versions of this product may be DLC Premium qualified or DLC qualified. Please check the DLC Qualified Products List at www.designlights.org/QPL to confirm which versions are qualified.

International Dark-Sky Association (IDA) Fixture Seal of Approval (FSA) is available for all products on this page utilizing 3000K color temperature only.

WARRANTY
5-year limited warranty. Complete warranty terms located at:
www.acuitybrands.com/support/customer-support/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application.
All values are design or typical values, measured under laboratory conditions at 25 °C.
Specifications subject to change without notice.

LED wall sconce

121

Gardco LED wall sconce 121 offers distinction through its styling, powerful optical design, array of distributions, and impressive selection of control possibilities. Designed to add an element of style to your application by pairing straight lines with rounded edges, the form of the 121 is timeless, yet contemporary, and will complement a wide assortment of architectural styles and designs, while delivering high light levels and functional distributions. 121 sconces are available in Type 2, 3, and 4 distributions, and provide output of up to 12,400 lumens. Energy saving control options help to increase energy savings and offer California Title 24 compliance. Emergency Battery Backup option available for path-of-egress and is integral to the luminaire.

Values from photometric tests performed in accordance with IESNA LM-79 and are representative of the configurations shown. Actual performance may vary due to installation and environmental variables, LED and driver tolerances, and field measurement considerations. It is highly recommended to confirm performance with a photometric layout.

NOTE: Some data may be scaled based on tests of similar (but not identical) luminaires. Contact factory for configurations not shown.

For emergency EBPC option, published values are based on initial lumens.

Predicted Lumen Depreciation Data

Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions. L_{70} is the predicted time when LED performance depreciates to 70% of initial lumen output. Calculated per IESNA TM21-11. Published L_{70} hours limited to 6 times actual LED test hours

Ambient Temperature °C	Drive current	Calculated L_{70} Hours	L_{70} per TM-21	Lumen Maintenance % at 60,000 hrs
40°C	up to 1200 mA	>100,000 hours	>42,000 hours	>99%

121 LED wall sconce

Specifications

Housing

Main body cast housing and back plate made of a low copper die cast Aluminum alloy for a high resistance to corrosion. 0.100" (2.5mm) minimum thickness. Hinged door allows access to driver and LED compartment.

Light Engine

Light engine comprises of a module of 16-LED aluminum metal clad board fully sealed with optics offered in multiples of 1 and 2 modules or 16 and 32 LEDs. Module is RoHS compliant. Standard color temperatures: 3000K +/-125K, 4000K, 5000K +/- 200K. Minimum CRI of 70. Also available in 2700K, 3500K, and Amber (590nm) with extended lead times. Contact factory for details.

LED light engine is rated IP66 in accordance to Section 9 of IEC 60598-1.

Energy Saving Benefits

System efficacy up to 140 lms/W with significant energy savings over Pulse Start Metal Halide luminaires. Optional control options provide added energy savings during unoccupied periods.

Mounting

Mounting is completed through integral back plate that features a separate recessed feature for hook and lock quick mount plate that secures with two set screws from bottom of luminaire. Mounting plate is located in the center of the luminaire width and 3.5" above the luminaire bottom (lens down position). Luminaire ships fully assembled, ready to install.

Optical System

Type 2, 3, and 4 distributions available. Performance tested per LM-79 and TM-15 (IESNA) certifying its photometric performance. Luminaire designed with 0% uplight (U0 per IESNA TM-15).

Control Options

0-10V dimming (DD): Access to 0-10V dimming leads supplied through back of luminaire (for secondary dimming controls by others). Cannot be used with other control options.

Dual Circuit Control (DCC): Luminaire equipped with the ability to have two separate circuits controlling drivers and light engines independently. Permits separate switching of 2 modules each at 530mA (32L models), controlled by use of two sets of leads, one for each circuit. Not recommended to be used with other control options, motion response, or photocells.

Field Adjustable Wattage Selector (FAWS): Luminaire equipped with the ability to manually adjust the wattage in the field to reduce total luminaire lumen output and light levels. Comes pre-set to the highest position at the lumen output selected. Use chart below to estimate reduction in lumen output desired. Cannot be used with other control options or motion response.

FAWS Position	Percent of Typical Lumen Output
1	25%
2	50%
3	55%
4	65%
5	75%
6	80%
7	85%
8	90%
9	95%
10	100%

Note: Typical value accuracy +/- 5%

SiteWise (SW): SiteWise system includes a controller fully integrated in he luminaire that enables the luminaires to communicate with a dimming ignal transmitter cabinet located on site using patented central dimming technology. A locally accessible mobile app allows users to access the system and set functionalities such as ON/OFF, dimming levels and scheduling. SiteWise is available with motion response options in order to bring the light back to 100% when motion is detected. Cannot be used with other control options or photocell options. Additional functionalities are available such as communication with indoor lighting and connection to BMS systems. Complete information on the control system can be found on the SiteWise website at philips.com/sitewise.

Automatic Profile Dimming (CS/CM): Standard dimming profiles provide flexibility towards energy savings goals while optimizing light levels during specific dark hours. Dimming profiles include two dimming settings including dim to 30% or 50% of the total lumen output. When used in combination with not programmed motion response it overrides the controller's schedule when motion is detected. After 5 minutes with no motion, it will return to the automatic dimming profile schedule. Automatic dimming profile scheduled with the following settings:

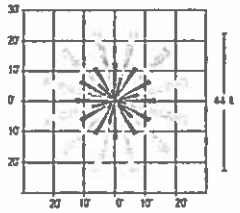
- CS50/CS30: Security for 7 hours night duration (Ex., 11 PM - 6 AM)
- CM50/CM30: Median for 8 hours night duration (Ex., 10 PM - 6 AM)

All above profiles are calculated from mid point of the night. Dimming is set for 6 hours after the mid point and 2, or 3 hours before depending of the duration of dimming. Cannot be used with other dimming control options.

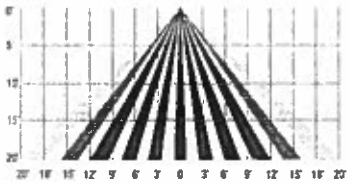
Emergency Battery Backup Cold Pack (EBPC): Emergency battery pack is cold weather rated down to -20oC (-4oF) and integral to the luminaire, allowing for a consistent look between emergency and non-emergency sconces. A separate surface mount accessory box is not required. Emergency battery pack is used with 16L configuration up to 700mA, operating in emergency mode to meet various redundancy requirements. Secondary driver with relay immediately detects AC power loss and powers luminaire for a minimum of 90 minutes from the time power is lost. Available in 120 or 277V only.

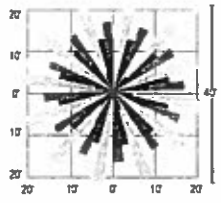
Wireless system (LLC): Optional wireless controller integral to luminaire ready to be connected to a Limelight system (sold by others). The system allows you to wirelessly manage the entire site, independent lighting groups or individual luminaires while on-site or remotely. Based on a high-density mesh network with an easy to use web-based portal, you can conveniently access, monitor and manage your lighting network remotely. Wireless controls can be combined with site and area, pedestrian, and parking garage luminaires as well, for a completely connected outdoor solution. Equipped with motion response with #2 lens (LLC-IMRI2) for 8' to 15' mounting height" or #3 lens (LLC-IMRI3) for 8-25' mounting heights. Also available with remote pod accessory where pod is mounted separate from luminaire to pole or wall.

LLC-IMRI2 Luminaire or remote mount controller with #2 lens



LLC-IMRI3 Luminaire or remote mount controller with #3 lens





Motion Response Options

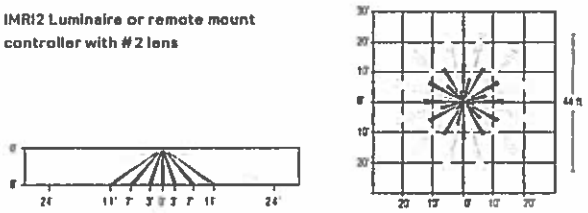
121 LED wall sconce

Specifications

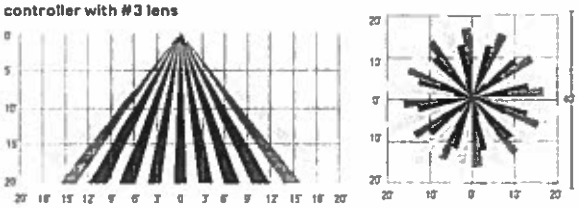
Bi-Level Infrared Motion Response (BL-IMRI3): Motion Response module is mounted integral to luminaire factory pre-programmed to 50% dimming when not ordered with other control options. BL-IMRI is set/operates in the following fashion: The motion sensor is set to a constant 50%. When motion is detected by the PIR sensor, the luminaire returns to full power/light output. Dimming on low is factory set to 50% with 5 minutes default in "full power" prior to dimming back to low. When no motion is detected for 5 minutes, the motion response system reduces the wattage by 50%, to 50% of the normal constant wattage reducing the light level. Other dimming settings can be provided if different dimming levels are required. This can also be done with FSIR-100 Wireless Remote Programming Tool (contact Technical Support for details).

Infrared Motion Response with Other Controls (SW-IMRI3): When used in combination with other controls (Automatic Dimming Profile and SiteWise), motion response device will simply override controller's schedule with the added benefits of a combined dimming profile and sensor detection. In this configuration, the motion response device cannot be re-programmed with FSIR-100 Wireless Remote Programming Tool. The profile can only be reprogrammed via the controller. Infrared Motion Response Lenses (IMRI2/IMRI3): Infrared Motion Response Integral module is available with two different sensor lens types to accommodate various mounting heights and occupancy detection ranges. Lens #2 (IMRI2) is designed for lower mounting heights up to 8' with larger coverage areas up to 44' diameter coverage area. Lens #3 (IMRI3) is designed for mounting heights up to 20' with a 40' diameter coverage area. See charts for approximate detection patterns:

IMRI2 Luminaire or remote mount controller with #2 lens



IMRI3 Luminaire or remote mount controller with #3 lens



Driver: Driver efficiency (>90% standard). 120-480V available (restrictions apply). Open/short circuit protection. Optional 0-10V dimming to 10% power. RoHS compliant.

Button Photocontrol (PCB): Button style design for internal luminaires mounting applications. The photocontrol is constructed of a high impact UV stabilized polycarbonate housing. Rated voltage of 120V or 208-277V with a load rating of 1000 VA. The photocell will turn on with 1-4Fc of ambient light.

Surge protection (SP1/SP2): Each luminaire is provided as standard with surge protector tested in accordance with ANSI/IEEE C62.45 per ANSI/IEEE C62.41.2 Scenario I Category C High Exposure 10kV/5kA waveforms for Line Ground, Line Neutral and Neutral Ground, and in accordance with U.S. DOE (Department of Energy) MSSLC (Municipal Solid-State Street Lighting Consortium) Model Specification for LED Roadway Luminaires Appendix D Electrical Immunity High Test Level 10kV / 5kA. Optional 20kV is available for additional protection.

Finish

Five standard colors offered in textured black, white, bronze, dark gray and medium gray. Color in accordance with the AAMA 2604 standard. Application of polyester powder coat paint 2.5 mils minimum. The thermosetting resins provides a discoloration resistant finish in accordance with the ASTM D2244 standard, as well as luster retention in keeping with the ASTM D523 standard and humidity proof in accordance with the ASTM D2247 standard. RAL and custom color matching available.

Listings

cULus Listed for Canada and USA suitable for wet locations when mounted downward facing. cULus Listed for Canada and USA suitable for damp locations when inverted upward facing when mounted in covered ceiling application. Emergency Battery Pack option is tested and listed to UL924 and CSA C22.2 No. 141-10 DesignLights Consortium qualified on models as listed on DLC QPL. CCTs 3000K and warmer are Dark Sky Approved. Luminaire is rated for operation in ambient temperature of -40°C (-40°F) up to +40°C (+104°F)[4].

Warranty

121 LED sconce luminaires feature a 5-year limited warranty.
See signify.com/warranties for complete details and exclusions

RE: Stormwater Infiltration Summary Report
Gerberich Payne Shoe Company
Mount Joy Borough, Lancaster County, Pennsylvania
Kleinfelder Project No.: 20213553.001A

Dear Mr. Cooley:

In accordance with your request, Kleinfelder, Inc. (Kleinfelder) has completed a Stormwater Infiltration Summary Report for the above referenced project site to evaluate the suitability of the subsurface soils for the infiltration of stormwater. This correspondence serves to transmit the results of our evaluation.

SITE & PROJECT DESCRIPTION

The project site currently consists of a developed parcel located at 240 West Main Street in Mount Joy Borough, Lancaster County, Pennsylvania. The site is bordered to the north by West Main Street, to the east and west by commercial properties and to the south by West Henry Street. Topography across the project slopes gently downgradient towards the north. The approximate location of the site in relation to the surrounding area is presented on the *Topographic Map* (Figure 1) within the Appendix.

Based on information provided by the Client, the project will consist of renovating the existing building and parcel. Development of the project will also include constructing new parking areas and stormwater management facilities. Based on existing and proposed grades, maximum cuts of approximately 7 feet will be required to reach the invert elevations of the proposed stormwater management facilities.

SCOPE OF WORK

The objective of our work was to determine the permeability of the invert soils and to identify any limiting zones (i.e. bedrock, groundwater and/or seasonal high-water table) within the proposed stormwater management facilities. Our scope of work included a subsurface exploration, laboratory testing program and preparation of this report. This report presents a summary of the work completed, conditions encountered and results of our engineering analysis of the subsurface conditions.

SITE GEOLOGY

According to the Pennsylvania State Geologic Survey, Atlas of Preliminary Geologic Quadrangles, 1981, the project site is underlain by the Ordovician Epler Formation (geologic symbol Oe). A depiction of the project site within its geologic setting is presented on the *Geologic & Karst Features Map* (Figure 2) within the Appendix.

The Pennsylvania Geologic Survey publication, *Engineering Characteristics of the Rocks of Pennsylvania*, Second Edition, 1982, describes the Epler Formation as consisting of very finely crystalline, medium gray limestone with interbedded gray dolomite. Some coarsely crystalline limestone lenses and veins are present. The bedding of this formation well developed, thin to flaggy. Fractures are moderately abundant and have a seamy pattern, ranging from well to poorly developed. The rock in this formation is moderately resistant to weathering, and decomposition results in flat rectangular fragments. The overlying soil mantle varies in thickness, and in some cases may be greater than 80 feet thick. The soil-to-bedrock interface is typically characterized by pinnacles.

The underlying bedrock formation is comprised of carbonate lithology which is prone to dissolution and the development of sinkholes and other karst geologic features.

SUBSURFACE EXPLORATION

To characterize subsurface conditions across the stormwater management facilities, 4 test pits were excavated utilizing a John Deere 35-D mini-excavator on February 5, 2021. Supervision and monitoring of the subsurface exploration were provided by a representative of Kleinfelder who field located the test locations utilizing a hand-held GPS unit based on the *Final Grading/PCSM* plan, prepared by D.C. Gohn Associates. The approximate test pit locations, referenced as IT-1 through IT-4, are shown on the *Exploration Plan* (Figure 3) found within the Appendix. Data pertaining to the subsurface exploration was documented in the field and is presented in detail on the *Test Pit Logs* within the Appendix, which contain visual descriptions of the subsurface materials encountered and infiltration test data.

LABORATORY ANALYSIS

Soil samples retrieved from the site were visually reviewed and classified by Kleinfelder. A representative sample was subjected to laboratory analysis to verify visual classification in accordance with the following schedule:

- Natural Moisture Content (ASTM D2216)
- Sieve Analysis (ASTM D422)
- Atterberg Limits Determination (ASTM D4318)

A Unified Soil Classification System (USCS) Group Symbol and ASTM Group Name has been assigned to the soil analyzed. The results of the testing conducted are presented within the Appendix and table below.

LABORATORY RESULTS											
Location	Depth (ft)	Soil Type	% Gravel	% Sand	% Fines	LL	PL	PI	Natural Moisture Content	USCS Group Symbol	ASTM Group Name
IT-4	7	Stratum I	18.3	17.3	64.4	36	13	23	17.0%	CL	Gravelly Lean CLAY with Sand
LL-Liquid Limit; PL-Plastic Limit; PI-Plasticity Index											

SUBSURFACE CONDITIONS

Soil

Surficial Materials

Test pits IT-1, IT-2 and IT-4 were covered by approximately 4 to 6 inches of topsoil, while test pit IT-3 was covered by approximately 2 inches of gravel. However, it should be noted, the possibility always exists for surficial material thicknesses to vary in unexplored areas of the project site.

Fill – Brown CLAY with varying amounts of Sand Gravel, brick, cobble- to boulder-sized rock fragments and brick and plastic fragments

Existing Fill was encountered within test pits IT-1, IT-2, and IT-4, extending to depths ranging from approximately 2 to 4 feet below existing site grades. Upon review, the Fill was found to be poorly graded, plastic and comprised predominantly of CLAY with secondary amounts of Sand, Gravel, cobble to boulder-sized rock fragments as well as brick and plastic fragments.

Upon review, the existing Fill was found to be free of deleterious materials such as ash, cinder, slag and topsoil and/or organic debris. These samples were taken from discrete locations and the possibility does exist for unsuitable materials to be present in unexplored portions of the site.

Stratum I – Brown CLAY with varying amounts of Sand and Gravel

Stratum I was encountered within test pits IT-1, IT-3 and IT-4, extending to their termination depths of approximately 6 and 10 feet below existing site grades. Laboratory testing conducted on a representative sample of Stratum I shows this soil to be poorly graded and plastic, with a natural moisture content of 17.0%. Stratum I is described under the USCS as Gravelly Lean CLAY with Sand (CL).

Bucket Refusal/Bedrock

Bucket refusal was encountered within test pit IT-2 at a depth of approximately 4 feet below existing site grades, which was attributed to the boulder-sized material present within the existing Fill and unable to be removed with the given excavation equipment. Furthermore, the bedrock surface was not encountered within test pits IT-1, IT-3 and IT-4. Within these test pits, the bedrock surface would have been defined as the depth at which refusal of the excavation equipment was encountered on the competent bedrock surface underlying the naturally occurring soils.

Published geologic data indicates the bedrock beneath the property is comprised of carbonate rock which is characterized as having an erratic bedrock surface profile over short lateral distances. Therefore, the possibility exists for the bedrock surface to be encountered at depths which vary from those stated above during construction.

Groundwater/Soil Mottling

Neither groundwater nor soil mottling (indicator of seasonal high-water table and/or poorly draining soils) were noted during the subsurface exploration. These observations were made at the time of the field operation and the groundwater table elevation will vary with daily, seasonal, climatological, and anthropogenic variations.

CONSIDERATION OF KARST GEOLOGY

The project site is underlain by carbonate lithology which is subject to dissolution and the development of sinkholes and other karst-geologic features. The *Sinkhole Map of Pennsylvania*, prepared by William Kochonov of the Pennsylvania Geologic Survey, does not show any mapped karst features within the project site; however, several surface depressions are mapped within 1,500 feet of the project site are shown on adjacent lands to the north, south and west.

The following recommendations are provided in an effort to minimize the potential for development of sinkholes at the site.

- Surface water is not recommended to collect or pool in low lying areas of the site for extended periods of time and should be directed to appropriate storm water channels. Expeditious backfilling or grading of low-lying areas will also help minimize the potential development of sinkholes.
- The extent of excavations should be kept to a minimum and the influx of surface water into excavations should be minimized. The potential for sinkhole development generally increases as the bedrock surface is encountered. Therefore, the prolonged exposure of the bedrock surface should also be minimized.
- Storm sewer conveyance lines should be constructed as "water-tight" joints.
- Positive drainage away from structures should always be maintained. Roof drains should also be directed away from structures and into designated stormwater channels.
- Unpaved areas, swales or surface basins should be minimized adjacent to building/foundation areas. Designing/installing subsurface stormwater infiltration facilities in proposed parking areas is considered a risk in areas underlain by carbonate geology.

The above recommendations constitute best management practices for construction and development in karst settings. Contingencies should be made in the construction schedule and budget for the repair of sinkholes and unstable soil conditions encountered during development of the site.

Sinkholes may occur during construction, and specifically during and shortly following mass grading of the project site. All sinkholes and unstable soil conditions should be reviewed by the geotechnical engineer of record. Following review of the specific characteristics and locations of a given sinkhole feature, a detailed repair procedure should be developed and implemented.

Structural Areas *(areas adjacent to structures/beneath pavement)*

- Any and all loose and/or excessively moist soils within the sinkhole should be excavated and continue until stable soils, a "throat" is identified, or until the extent of the excavation equipment is reached.
- Upon removal of the unstable soils, the excavation should be backfilled using high mobility, low strength flowable fill (500 psi) to final subgrade elevation; however, utilities should not be encased with flowable fill.
- Dependent on specific conditions, specialty mitigations may be warranted, such as ground modification (i.e., karst grouting).

Non-Structural Areas *(non-pavement/landscaped areas)*

- Any and all loose and/or excessively moist soils should be excavated from the sinkhole. Excavation should continue until stable soils, a "throat" is identified, or until the extent of the excavation equipment is reached.
- The excavation should be backfilled with aggregate of decreasing size, commonly referred to as an Inverted Filter.

The repairs outlined above are general guidelines and each sinkhole occurrence should be thoroughly reviewed by the Geotechnical Engineer of Record for an appropriate mitigation plan.

The site is underlain by carbonate lithology which has the potential for sinkhole development. The influx of water into concentrated areas increases this risk. The site owner must recognize the risks associated with the development of sinkholes in areas underlain by carbonate geologic formations. Contingencies should be made in the construction schedule and budget for the repair of sinkholes and unstable soil conditions encountered during development of the site.

INFILTRATION ANALYSIS

To evaluate the feasibility of stormwater infiltration, infiltration testing was completed within each test pit utilizing the "double-ring" infiltrometer method in accordance with the Pennsylvania Stormwater Best Management Practices Manual. Each test pit extended to a minimum depth of approximately 2 feet below the actual test elevation to review the presence of limiting zones. Information regarding the results of the infiltration testing is provided within the table below.

INFILTRATION TEST RESULTS					
Test Location	Surface Elevation (ft)	Proposed Test Elevation (ft)	Actual Test Elevation(s) (ft)	Limiting Zone Elevation (ft)	Infiltration Rate* (in/hr)
IT-1	378	375	375	Not Encountered at 372	1.8
IT-2	377	375	375	Bucket Refusal at 373	1.2
IT-3	381	378	378	Not Encountered at 375	0.2
IT-4	385	378	378	Not Encountered at 375	3.0
*Rates are field rates and are unfactored.					

Based on the results of our field exploration and engineering analysis of the data obtained, we offer the following comments regarding the infiltration of stormwater at the project site:

- Infiltration testing was conducted within the existing Fill layer and naturally occurring soils of Stratum I.
- Neither groundwater nor soil mottling (indication of seasonal high-water table and/or poorly draining soils) were encountered within the test pits excavated.
- Bucket refusal was encountered within test pit IT-2 at a depth of approximately 4 feet below existing site grades, which was attributed to the boulder-sized material present within the existing Fill and unable to be removed with the given excavation equipment. Furthermore, the bedrock surface was not encountered within test pits IT-1, IT-3 and IT-4.
- The unfactored field infiltration rates were found to range from 0.2 to 3.0 inches per hour. The PADEP recommended rate for infiltration of stormwater is 0.1 to 10 inches per hour.

The project site is underlain by carbonate lithology and is subject to the development of sinkholes and other karst geologic features and the concentrated influx of water into these areas will increase this risk. The Owner should recognize the risks associated with development of project sites underlain by carbonate bedrock.

LIMITATIONS

This work was performed in a manner consistent with that level of care and skill ordinarily exercised by other members of Kleinfelder's profession practicing in the same locality, under similar conditions and at the date the services are provided. Our conclusions are based on a limited number of observations and data. It is possible that conditions could vary between or beyond the data evaluated. Further, Kleinfelder assumes no liability for interpolation of data between the specific testing locations discussed herein. Kleinfelder makes no other representation, guarantee, or warranty, express or implied, regarding the services, communication (oral or written), report, opinion, or instrument of service provided.

This report may be used only by the Client and the registered design professional in responsible charge and only for the purposes stated for this specific engagement within a reasonable time from its issuance, but in no event later than 2 years from the date of the report.

The varied nature of carbonate geology precludes absolute certainty in assessing sinkhole formation. Therefore, the Owner should be aware that conditions could be encountered during construction that would require modifications to the proposed stormwater design/plan. Kleinfelder makes no warranty or guarantee with regard to the development of sinkholes on the project site. The site Owner must recognize the risks associated with areas underlain by karst geologic formations.

Our scope of services for this exploration and report did not include environmental assessments or evaluations regarding the presence or absence of wetlands or hazardous substances in the soil, surface water, or groundwater at this site.

CLOSING

We thank you for the opportunity to work on this project with you. Should you have any questions or require any additional information, please do not hesitate to contact us.

Sincerely,
KLEINFELDER, INC.

RE: Project Name: Gerberich Payne Shoe Company
LCCD Plan ID: ESP03359
Mount Joy Borough, Lancaster County

Dear Applicant:

I have reviewed the Erosion & Sediment Pollution Control Plan dated March 22, 2021 for the above referenced project. The following comments need to be addressed.

1. Include the following within the limits of disturbance:
    a. The existing utility pole to be removed (southeast side of site, shown on the Existing Conditions Plan). §102.4(b)(5)(iii)
    b. The plantings on the northeast side of the site adjacent to the rain garden. §102.4(b)(5)(iii)
2. Verify the following pertaining to the limits of disturbance:
    a. A bolded line type is shown immediately downslope of compost sock #4 adjacent to Williams Alley. Clarify what this feature is. If the construction of this feature will involve earth disturbance, include it within the limits of disturbance (LOD). §102.4(b)(5)(iii)
    b. Clarify whether any earth disturbance will occur within the footprint of the existing building. If so, include the anticipated disturbed areas within the LOD. §102.4(b)(5)(iii)
    c. Sheet 3 of the plan drawings indicates a future road widening of West Henry Street. It is noted that the majority of West Henry Street is not included within the LOD. Verify whether all areas proposed for widening of Henry Street are included within the LOD. Additionally, verify whether there will be any earth disturbance on West Henry Street apart from the areas shown within the LOD. §102.4(b)(5)(iii)
    d. Verify the topsoil stockpile will be able to be located within the limits of disturbance as shown on the E&S plans without conflict to the proposed parking area. Additionally, as the soil stockpile is located in a separate area of the site from the proposed rain garden, verify the soil stockpile location as presented is suitable for construction of the rain garden, which is identified in the construction sequence to be installed after other earthmoving activities on site. §102.4(b)(5)(iii)
3. Construction sequence:
    a. Clarify in the construction sequence how the limits of disturbance will be marked prior to earth disturbance activities occurring. Ensure the method of marking is appropriate for the impervious areas throughout the limits of disturbance. §102.4(b)(5)(vii)
    b. Within the construction sequence, provide instructions for the repair/replacement of compost sock #1 when the sewer/water laterals are installed. §102.4(b)(5)(vii)

4. Provide supporting calculations which verify the Qmax of 3.3 cfs identified on Figure 9.4. §102.4(b)(5)(viii)
5. Provide Type C inlet protection for the inlets on West Main Street north of the proposed rain garden or justify how the inlets will be protected from sedimentation while construction of the rain garden and sewer/water laterals are underway. If inlet protection is used, add Standard Construction Detail #4-15 from the PA Erosion Control Program Manual and notes or other appropriate Type C inlet protection detail to the E&S plan drawings. §102.4(b)(5)(ix)
6. Provide a perimeter control BMP below the soil stockpile and add associated standard construction details. §102.4(b)(5)(ix)

These comments need to be addressed and incorporated into the Plan before a determination of the Plan's adequacy to comply with the rules and regulations adopted under the PA Clean Streams Law relating to erosion and sedimentation control can be made. **Please reference the date of revision on any future resubmissions.** Contact me at (717) 299-5361 if you have any questions pertaining to the review.

Yours for a better environment,

Eric Hout

MEMORANDUM

TO:	Brian R. Cooley, ASLA – D.C. Gohn Associates, Inc.		
FROM:	John M. Schick		
DATE:	November 10, 2020 ***Revised: March 11, 2021***		
PROJECT NAME:	Gerberich Payne Shoe Company Site	**PROJECT NO.:**	041432008
SUBJECT:	Traffic Assessment		

As per your request, we have completed our traffic assessment on the proposed redevelopment of the Gerberich Payne Shoe Company building to be converted into 36 senior housing dwelling units with a possible 3,000 SF medical office and a possible 3,000 SF of general retail use. The existing building is located at the southwest corner of the intersection of West Main Street (SR 0230) and a public unnamed alley in Mount Joy Borough, Lancaster County, PA. The following summary of our data collection effort, traffic analyses, and findings for your review and comment:

EXISTING TRAFFIC CONDITIONS

Manual turning movement counts were conducted at the following intersections on the dates indicated during the weekday morning peak period (6:00 to 9:00 a.m.) and during the afternoon peak period (3:00 to 6:00 p.m.):

- West Main Street and Alley (Wednesday, November 4, 2020)
- West Main Street, Fairview Street, and Lumber Street (Wednesday, November 4, 2020)
- Alley and Henry Street (Wednesday, November 4, 2020)
- West Main Street, Manheim Street, and New Haven Street (Wednesday, February 24, 2021)
- New Haven Street and Henry Street (Wednesday, February 24, 2021)

Copies of the traffic count summary sheets for each intersection are attached to this memorandum.

CRASH ANALYSIS

Reportable crash data was obtained from the PennDOT PCIT (Pennsylvania Crash Information Tool) website and reviewed for the five (5) intersections listed above. The results of our investigation indicated that there were nine (9) reportable crashes during the most recent five-year time period beginning January 1, 2015 and ending December 31, 2019. A review of the crash data shows no discernible crash patterns at any of the studied intersections. A copy of the crash data results is attached to this memorandum.

TRIP GENERATION

Estimated trip generation for the proposed redevelopment was computed using the procedures derived from the manual *Trip Generation, 10th Edition + Supplement, 2020*, an Institute of Transportation Engineers (ITE) Informational Report. The trip generation program for the proposed redevelopment for the weekday daily and weekday AM and PM peak hours are summarized on the following page in **Table 1.**

Table 1 - Trip Generation Program							
Land Use	ADT	AM Peak Hour			PM Peak Hour		
		In	Out	Total	In	Out	Total
36-Senior Adult Housing (Attached) (ITE Land Use Code 252)	120	2	5	7	6	5	11
3,000 SF Medical Office (ITE Land Use Code 720)	28	8	2	10	3	9	12
3,000 SF General Retail (ITE Land Use Code 820)	114	2	2	4	5	6	11
Total	262	12	9	21	14	20	34

A copy of the ITE trip generation worksheet is attached to this memorandum.

The trips from the development, shown in **Table 1**, were distributed onto the roadway network based the following: (1) an analysis of existing traffic patterns and volumes adjacent to the site; (2) the available routes; and (3) the proposed site access location.

Based on the width of the adjacent alley and the availability of access from Lumber Street to Henry Street, we recommend that the adjacent Alley be restricted to one way northbound from 190' north of Henry Street north to West Main Street. Site generated traffic can access the parking in the rear of the building via Lumber Street and/or Henry Street from New Haven Street.

The directional distribution percentages of the new site generated traffic are displayed in **Table 2** below.

Table 2 – Trip Distribution Percentages		
Direction (To/From)	Assignment (To/From)	Distribution Percentage (To/From)
East	via West Main Street	20%
West	via West Main Street	40%
North	via Manheim Street	25%
South	via New Haven Street to Henry Street	15%
Total		**100%**

FUTURE TRAFFIC CONDITIONS

In order to evaluate future traffic conditions, it was necessary to determine an appropriate growth rate for "background" traffic. PennDOT's *Growth Factors for August 2020 to July 2021* provides growth factors based on the

functional classification of a subject roadway. The roadways within the study area are classified as Urban Non-Interstate Roadways. Roadways in Lancaster County with this classification have exhibited an average growth rate of 1.04% per year by PennDOT. The current traffic data was projected to the 2022 design year (expected completion and opening year) using a growth factor of 1.04% compounded annually in accordance with the following formula:

$$F = P(1 + i)^n$$

where: F - future traffic volumes
i - growth factor
P - present traffic volumes
n - number of years in projection

EXISTING AND FUTURE TRAFFIC CONDITIONS

Capacity analyses were performed at the intersections listed above for the for the following peak period scenarios:

- Existing 2020 AM and PM Peak Hour Conditions
- 2022 "Build" AM and PM Peak Hour Conditions

The capacity analyses were conducted in accordance with the methodology presented in the *Highway Capacity Manual, 6th Edition* utilizing the PTV VISTRO™ Software, Version 2021 (SP 0-3). It should be noted that existing left and right turning traffic along West Main Street at the Alley were redistributed to Lumber Street for the 2022 "Build" conditions.

Table 3 provides a summary of the level of service analysis results for the scenarios described above.

Table 3 – Level of Service Summary

Intersection	Movement	Existing Conditions		"Build" 2022 Conditions	
		AM Peak	PM Peak	AM Peak	PM Peak

	ILOS	**A (0.30)**	**A (0.53)**	**A (0.32)**	**A (1.59)**

ILOS = Intersection Overall Level of Service

As can be seen, all of the intersections studied currently operate at overall acceptable levels of service and will continue to operate at the same overall acceptable levels under 2022 "build' conditions. Copies of the capacity analysis worksheets are attached to this memorandum.

QUEUE ANALYSIS

95th percentile queue analyses were also conducted at the studied intersection for the 2022 "build" conditions using the *Highway Capacity Manual, 6th Edition* methodology. The queue length values were calculated and taken directly from the VISTRO™ analyses. The queue analysis results are summarized in **Table 4**. As can be seen, future 2022 "build" traffic volumes add, at the most, less than one car length to the 2020 "existing" condition queues.

Table 4 – 95TH Percentile Queue Summary					
Intersection	Movement	Existing Conditions		"Build" 2022 Conditions	
		AM Peak	PM Peak	AM Peak	PM Peak
West Main Street, Fairview Street, and Lumber Street	SB Fairview Street App	< 25'	< 25'	< 25'	< 25'
West Main Street and Alley	NB Alley App.	< 25'	< 25'	< 25'	< 25'

New Haven Street and Henry Street	EB Henry Street	< 25'	< 25'	< 25'	< 25'
	WB Henry Street	< 25'	< 25'	< 25'	< 25'

AUXILIARY TURN LANE ANALYSIS

In addition to capacity and queue analyses, auxiliary turn lane warrant criteria was reviewed for the left and right turning movements onto Lumber Street from West Main Street using the 2022 "build" traffic condition peak hour traffic volumes and the methodologies contained in Chapter 11 of PennDOT's *Publication 46*. The results of the auxiliary (left and right) turn lane warrant analyses indicated that no auxiliary turn lanes are warranted. Copies of the auxiliary turn lane warrant analyses are attached to this memorandum.

CONCLUSIONS

The overall findings and conclusions of our analyses are as follows:

1. There were nine (9) reportable crashes at the five (5) studied intersections over the past five-year period. There is no discernible crash pattern at the studied intersections.
2. The proposed 36 senior living dwelling units, 3,000 SF of medical office use, and 3,000 SF of general retail use will generate approximately 262 trips per day (131 entering and 131 exiting). Of that total, approximately 21 trips will occur during the AM peak hour and approximately 34 trips will occur during the PM peak hour.

3. The proposed project was assumed to be completed and operational in 2022.
4. Based on the narrowness of the adjacent Alley and the availability of access from Lumber Street to Henry Street to the site's parking lot, we recommend that the adjacent Alley be restricted to one way north from 190' north of Henry Street north to West Main Street.
5. The results of the capacity analyses indicated that the studied intersections currently operate at an overall acceptable level of service and will continue to operate at an overall acceptable level of service under 2022 "build" conditions.
6. The results of the queue analyses indicated that the proposed redevelopment will not have any significant impact on the studied intersections.
7. The results of the auxiliary turn lane warrant analysis indicated that turn lanes are not warranted for traffic along Main Street turning right or left onto Lumber Street.

Based on the results of our analysis, it is our opinion that the redevelopment of the Gerberich Payne Shoe Company building, will not create any adverse traffic conditions to the surrounding roadway network and no roadway improvements are warranted.

If you have any questions or wish to discuss any of the information contained within this memorandum, please feel free to call me. Thanks!

NOTES:

1 Injury Severity Disclaimer
Please note that beginning January 1, 2016, PennDOT adopted the Federal standard for collecting injury severity data. The field descriptions and definitions changed from the state standard that had been in use for decades. This resulted in a substantial shift in severity levels. Therefore, comparison of the "Suspected Serious Injury", "Suspected Minor Injury" and "Possible Injury" categories will not be consistent for crashes taking place before versus after the adoption of the new standard.

Re: Advisory Plan Review Comments
LCPC # 75-212-2, Gerberich Payne Shoe Company
Mount Joy Borough

The Pennsylvania Municipalities Planning Code establishes standards and procedures for the review of subdivision and land development plans. The Lancaster County Planning Department offers the following advisory comments and recommendations, which are for your consideration in the application of municipal subdivision and land development regulations to the project.

GENERAL INFORMATION

Subject:	**Final Land Development Plan**
Proposal:	**Proposal to redevelop the Gerberich Payne Shoe Company building into a mixed-use senior living facility that will consist of 36 senior apartment units, a 1st floor commercial space and a reconfigured off-street parking area that will accommodate 40 parking spaces. The acreage of the lot is 1.28 acres.**
Owner(s):	**Mount Joy Senior Housing, LP**
Applicant:	**Same**
Firm:	**DC Gohn Associates, Inc.**
Received:	**April 1, 2021**

LOCATION

Parcel ID #:	**4503425600000**
Address:	**240 W. Main Street**
Location:	**South side of West Main Street, Rt. 230, north side of west Henry Street**
Places2040:	**The project is located inside the Donegal Urban Growth Area and is located within the urban core character zone.**

PATTERN

Zoning:	**CBD – Commercial Business**
Present Use:	**Abandoned Factory**

TIMING
Utilities: **Public Sewer and Public Water**

RECOMMENDATIONS

PLACES2040 COMMENTARY

Connecting People, Place & Opportunity
- ***Make it easier for residents and visitors to get around without a car.***
  - Provides pedestrian transportation network for all users.

Taking Care of What We Have
- ***Use existing buildings and maintain public infrastructure.***

Growing Responsibly
- ***The project is located inside of the Urban Growth Area.***
- ***Prioritize opportunities to redevelop built areas and fill in the gaps in urban areas.***
- ***Build more compactly and efficiently.***

SITE DESIGN COMMENTARY

1. Please add the LCPC File # **75-212-2** to the lower right-hand corner of the plan

Please note that no land shall be conveyed, transferred, or agreed to be sold, nor shall the construction of any improvements be initiated, until authorized by the local municipal officials.

RE: Gatesburg Road Development
Gerberich Payne Shoe Company Land Development Plan
ARRO # 10863.39
D.C. Gohn No. 1378-20

Dear Ms. Gibbs:

Please accept this letter and the accompanying plans and documents as our response on behalf of Gatesburg Road Development / Gerberich Payne Shoe Company to the ARRO letter dated May 3, 2021. We respond to that engineering review letter as follows:

There is a future ADA sidewalk proposed between the parking lot and the building entrance on the west side. The purpose to show the future walk is to account for the 500 square feet of impervious area associated with future walk. The stormwater calculations, report, and waiver request letter have been revised to include the future walk area. The entire future walk drains to the proposed rain garden.

There is an age restriction letter and standard rental agreement included with this submission which addresses the comment in the Borough Solicitor letter dated April 9, 2021.

Subdivision and Land Development

1. The applicant shall post financial security to the Borough [§240-31.A]
   The applicant will post financial security prior to plan approval.

2. As-built plans shall be provided after construction is complete and the cost for preparation of the plans shall be included in the financial security. [§240-37]. A note shall be added to the plans requiring the submission of as-built plans.
   The note has been added to Sheet 4 under Plan Notes, Note 10 and the line item for the as built is provided in the cost estimate.

3. Any change to a street or access intersection with a state road, such as changing Williams Alley from two-way to one-way, shall require a Highway Occupancy Permit Application submission to PennDOT and the following note shall be shown on the plan: "A Highway occupancy permit is required pursuant to Section 420 of the Act of June 1, 1945 (P.L.

1242, No.428), known as the 'State Highway Law', before access to a state highway is permitted. Access to the state highway shall be authorized by a highway occupancy permit and the Borough Council's approval of this plan in no way implies that such a permit can be acquired." [§240-61.D.12.c]
Since there is no physical alterations to Williams Alley, a Highway Occupancy Permit Application to PennDOT is not required.

4. The plans shall be signed and sealed by a registered engineer, surveyor, or landscape architect. [§240-61.A.5]
The plans will be signed and sealed prior to plan recording.

5. The right-of-way for Williams Alley is 15' wide and the cartway at the intersection of West Henry Street is wider. The applicant shall clarify if additional right-of-way will be dedicated to the Borough. [§240-43.H]
There is additional right of way proposed for the widening of Williams Alley along the property frontage. Sheet 3 indicates the additional right of way. A legal description and exhibit is included with this submission which will be used to offer the additional right of way through a deed of dedication to the Borough. The waiver letter has been revised based on the additional right of way offered for dedication.

6. Proposed pavement markings and signage shall be shown on the plan. Based on the response from previous Comment 8, Williams Alley is to be on way northbound 190' north of West Henry Street. The applicant shall provide appropriate signage to indicate this change. Changing from existing two-way traffic to one-way traffic requires a PennDOT Highway Occupancy Permit. The Highway Occupancy Permit plan shall be submitted to the Borough for review prior to submission to PennDOT. [§240-61.D.2]
The signage is provided on Sheet 3. Since there is no physical alterations to Williams Alley, a Highway Occupancy Permit Application to PennDOT is not required.

7. Clear sight triangles shall be shown on the plan for the intersections of Williams Alley with Main Street and West Henry Street. [§240-61.D.11]
The safe stopping sight distance is provided on Sheet 3 which is consistent with the Borough ordinances. The safe stopping sight distance chart is included with this submission. Section B and C of the chart is not required since the alley is one way northbound.

Stormwater Management

8. The measurement of impervious area shall include the proposed future parking area. This area shall be included in the volume calculations. [§226-31.H.1]
A note has been added to Page 14 of the PCSM Report which indicates that the stormwater volume calculations include 2,447 square feet of impervious area associated with the future parking spaces and road widening associated with West Henry Street and the 500 square feet associated with the future ADA sidewalk. A

similar note is provided on Page 9 of the PCSM Report. The stormwater rate and volume calculations account for the future impervious areas.

9. The rain garden detail on Sheet 9 shows the spillway at an elevation of 376.30' and shall be corrected. [§226-43.J.5]
   The spillway elevation of 376.50 has been provided on the rain garden detail on Sheet 9.

10. Financial security shall be provided in the amount indicated in an approved construction cost estimate. [§226-60]
    A cost estimate is included with this submission.

11. An Operation and Maintenance Agreement shall be prepared, signed, and provided to the Borough. [§226-62]
    The Borough Solicitor will provide a draft of the O&M Agreement for review by the applicant.

Zoning

12. The electrical line to the proposed lighting fixtures shall be provided to show there are no conflicts with other proposed features. [§270-76]
    The exact electrical line locations to the light fixtures are unknown at this time based on the ongoing electrical design inside the building and the final locations of the outside electrical transformers and utility pole locations. Based on the site lighting locations, there are no known potential conflicts with other features. The water and sewer connections are located along Main Street. There is adequate room to accommodate the electrical lines and the storm sewer conveyance systems.

Traffic

13. Williams Alley is proposed to be one way northbound from 190' north of West Henry Street. The analysis shall reflect this change.
    The analysis is based on the assumption that Williams Alley is one way northbound.

14. The study indicate that the peak hour for each intersection varies and that the analysis utilized the highest peak hour at each intersection in order to analyze the "worst-case" scenario.
    This comment was addressed in the Memo prepared by RETTEW that addressed comments received during the sketch plan review.

15. The plans indicate that the proposed use is to be senior housing and retail or restaurant space. The analysis shall provide the trip generation calculations and analysis for the "worst-case" scenario.
    Sheet 1 under Site Data has been revised to General Retail or Medical Office which is consistent with the assessment.

General

16. The sidewalk detail on Sheet 7 of 12 shall be revised to state 4' minimum-varies, see plan.
The detail has been revised with the additional note.

17. A note shall be provided on the plan indicating that the curb shall be painted yellow or "No Parking" signs shall be installed along Main Street between Williams Alley and the proposed parking spaces to the west.
A "No Parking Here To Corner" sign has been added at the eastern parking space along Main Street.

18. Notes on the plan state the West Henry Street may be widened and parking constructed in the future. If the developer/owner decides to proceed with construction, approval by Borough Council must be obtained and maintenance and other applicable agreements must be executed with the Borough prior to beginning construction.
The note has been added to Sheet 4 under Plan Notes, Note 11.

19. A "Tenant Parking Only" sign shall be shown on the plans at the entrance to the parking lot.
The sign has been added to Sheet 3.

Waivers – Subdivision and Land Development

20. The applicant is requesting to waive the requirement to improve streets in which a subdivision or land development abuts an existing Borough and/or state street [§240-43.H.1] Based on the justification provided in the applicant's modification request letter, **ARRO recommends grating this waiver request.**

21. The applicant is requesting to waive the requirement for street intersections with a local street to be a minimum radius of 20' [§240-43.I.4]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

22. The applicant is requesting to waive the requirement that curbing shall be provided along the edge of any landscaped portion of a parking facility [§240-46.C.1]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

23. The applicant is requesting to waive the requirement to dedicate recreation land to the Borough because there is limited area on the site for this purpose. As an alternative, the applicant is proposing to pay a fee in lieu of dedication of recreation land. Based on the justification provided, **ARRO recommends granting this waiver request.**

24. The applicant is requesting to waive the requirement to provide a fee in lieu of dedication of recreation [§240-57.G]. The applicant proposes paying a fee of $2,000.00 per unit for a total fee of $72,000.00. However, because land is not being provided on the subject property, the fair market value cannot be determined. Therefore, Borough Council must decide if $72,000.00 is an acceptable fee in lieu of land dedication.

25. The applicant is requesting to waive the requirement that applications for all residential developments with 20 or more dwelling units and buildings containing 1,000 square feet of usable space provide a traffic study and report [§240-62.B]. Because a traffic assessment was prepared with provides adequate information to evaluate the traffic impacts on the adjacent roadway system, **ARRO recommends granting this waiver request.**

26. The applicant is requesting to waive the requirement that the applicant shall make an estimated contribution of the sum necessary to defray the costs of improvements recommended by the Traffic Impact Study [§240-63.B.5]. After discussion with Borough staff and the applicant's engineer, this waiver is not required because the traffic study is not recommending improvements.
    The waiver has been removed from the plans and the waiver request letter.

Waivers – Stormwater Management

27. The applicant is requesting to waive the requirement for the loading ratios in Karst areas to be a maximum of 3:1 impervious drainage area to infiltration area and 5:1 total drainage area to infiltration area. The site is very limited in space which limits the size of the infiltration area [§226-32.A.2.c]. Based on the justification provided, **ARRO recommends granting this waiver request.**

28. The applicant is requesting to waive the requirement that the use of the emergency spillway to convey flows greater than the 50-year storm is permitted. The spillway is designed as the primary outlet for the rain garden and will convey flows from the 2-year through 100-year events without erosion. Based on the justification provided, **ARRO recommends granting this waiver request.**

Plans are being submitted directly to ARRO for review.

We submit the following for review:

1. 15 copies 11 x 17 of the Preliminary/Final Land Development Plan
2. 1 copy of the cost estimate
3. 1 copy of the legal description for additional right of way
4. 1 copy of the exhibit for additional right of way
5. 1 copy of the PCSM Report
6. 1 copy of the waiver request letter
7. 1 copy of the PADOT SSSD Chart

8. 1 copy of the age restriction letter
9. 1 copy of the rental agreement

Respectfully,

D. C. Gohn Associates, Inc.

Stacie Gibbs, BCO
Planning, Zoning & Code Administrator
Mount Joy Borough
21 E. Main Street
Mount Joy, PA 17552

SUBJECT: Gerberich-Payne Shoe Company Re-Development
Preliminary/Final Land Development Plan Modification Requests
DCG Project Number **1378-20**

Ms. Stacie Gibbs:

On behalf of our client, Gatesburg Road Development, we are submitting the requested modifications for the Preliminary/Final Land Development Plan for the Gerberich-Payne Shoe Company Re-Development.

Subdivision and Land Development Ordinance

1. **Section 240-43.H.1 – Improvement of Existing Streets**
We request relief from the requirement that in cases where a subdivision or land development abuts an existing Borough and/or state street, the street shall be improved to the ultimate width in accordance with Subsection H(1) or as indicated on the Official Map, whichever is greater, and additional right of way shall be provided, concrete curbing, and sidewalk, and any other street improvements that are required by this Chapter, shall be constructed.

   The Official Map indicates that the Alley and the portion of West Henry Street along the property frontage as proposed local streets. There are no additional requirements for any adjacent streets noted on the Official Map.

   The Alley requires a 16 feet cartway and a 20 feet right of way. If improved to local street standards, it requires a 24 feet cartway and a 50 feet right of way. Currently, the Alley consists of a 15' right of way and a 12' cartway. The proposal is to offer for dedication 9 feet to 17 feet of additional right of way on the western side of the alley which will encompass the alley widening along the project frontage to accommodate the re-configured access to the site and provide for better maneuverability into the site. This results in a total right of way of 24 feet to 32 feet. In addition, there is 7.8 feet to 15 feet of additional widening of the alley along the property frontage. This results in a total cartway width of 19.8 feet to 25 feet. The existing building and sidewalk on the subject property and the existing building on the adjacent property are directly adjacent to the Alley which would prohibit expanding the cartway or right of way in this area.

West Henry Street requires a 24 feet cartway with curbing and no parking and a 50 feet right of way. Currently, West Henry Street consists of a 49.5 feet right of way and a cartway width of 18.1 feet. The existing street is adequate for access to the site.

West Main Street is classified as arterial which requires 36 feet cartway with curb and no parking and a 60 feet right of way. Currently, West Main Street consists of a 39 feet cartway with curb and a 60 feet right of way. The street meets current standards.

2. **Section 240-43.I.(4) – Street Radius**
   We request relief from the requirement that the street intersection with a local street shall be a minimum radius of 20 feet. The request is to provide a radius of 15 feet and 8 feet for the parking lot access drive to Williams Alley. The smaller radius are a result of the layout of the parking lot and access drives which accommodate the required number of parking spaces and provides access to the building. The smaller radius permit resident vehicles and emergency vehicles from entering and exiting the parking lot to the alley.

3. **Section 240-46.C.(1) – Curbing**
   We request relief from the requirement that curbing shall be provided along the edge of any landscaped portions of a parking facility. The request is to provide curbing in the area of the handicap parking area, the center landscape island, and the northern portion of the parking lot adjacent to the building. The remaining parking areas do not propose curbing. The parking lot is designed to sheet flow stormwater from Henry Street to the storm sewer system along the curbed areas for collection to the stormwater BMP. There is a landscape and grass buffer between the areas adjacent to the parking lot which do not contain curbing along Henry Street and the western property line.

4. **Section 240-57.D.(1) – Dedication of Recreation**
   We request relief from the requirement to dedicate recreation land. There is limited areas of the site to dedicate areas for recreation. As an alternate, the project proposes to pay a fee in lieu of dedication of recreation as indicated in Section 240-57.G.

5. **Section 240-57.G – Fee In Lieu of Dedication**
   We request relief from the requirement to provide a fee in lieu of dedication of recreation. As an alternate, the applicant is proposing a fee in lieu of $2,000 per unit. Based on the 36 residential units, the proposed fee in lieu of is $72,000.

6. **Section 240-62.B – Traffic Study**
   We request relief from the requirement for applications for all residential developments containing 20 or more dwelling units and all nonresidential developments with buildings containing 1,000 square feet of usable space shall provide a traffic study and report. The alternate is a traffic assessment. The traffic assessment has been revised based on comments received from the public meetings regarding the review of the sketch plan and previous traffic assessment. In particular, the New Haven Street and Henry Street and West Main Street, Manheim Street, and New Haven Street intersections have been analyzed in addition to the previous intersections. The revisions are incorporated into the revised assessment.

The assessment is based on the 36 senior apartment units, 3,000 square feet of general retail, and 3,000 square feet of medical office. The traffic assessment indicates that there are approximately 21 AM peak trips and 34 PM peak trips for the senior housing, retail, and medical office. The results of the capacity analyses indicate that the studied intersections currently operate at an overall acceptable level of service and will continue to operate at an overall acceptable level of service for the project. The results of the queue analyses indicated that the proposed redevelopment will not have any significant impact on the studied intersections. The results of the auxiliary turn lane warrant analysis indicates that turn lanes are not warranted for traffic along Main Street turning right or left onto Lumber Street. The crash data for the area indicated 9 reportable crashes at the five intersections over the past 5 years. Based on the traffic assessment, the redevelopment will not create any adverse traffic conditions to the surrounding street network and no roadway improvements are warranted.

Stormwater Management Ordinance

1. **Section 226-32.A.(2)(c) – Loading Ratios**
   We request relief of the requirement that the maximum loading ratios in Karst areas shall be 3:1 impervious drainage area to infiltration area and 5:1 total drainage area to infiltration area.

   The loading ratio for the proposed rain garden is 18.9:1 for the total area to infiltration area and 12.2:1 for the impervious area to the infiltration area. The rain garden is designed to infiltrate stormwater from a portion of West Henry Street, parking lot, sidewalks, and grass areas. A soil amended area is installed at the bottom of the rain garden which will promote infiltration and aid in water quality. A spillway is used as an overflow during larger storm events. The dewatering time is 24 hours for the volume storage area. The rain garden is routed for the 100 year storm to ensure that stormwater drains to the infiltration basin without impacting the adjacent areas of development.

   Currently, there are no stormwater detention facilities on-site. Based on the re-configured parking lot, the existing building, and the surrounding street network, there is limited areas for stormwater infiltration and detention. The proposed rain garden is designed to infiltrate the net increase in the 2 year volume associated with Area A and designed to detain stormwater for the 2, 10, 25, 50, and 100 year rate. The addition of the rain garden will provide a stormwater facility which provides infiltration, treats water quality, and detains rate for an existing site which did not contain any such facility.

2. **Section 226-37.A.(6)(b) — Emergency Spillway Conveyance**
   We request relief of the requirement that the use of the emergency spillway to convey flows greater than the 50 year storm is permitted. The request is to use the emergency spillway to convey flows from the 2, 10, and 25 year storm events. This is in addition to the emergency spillway conveying the 50 and 100 year storms which is permitted. The spillway is designed with the required erosion control liner for the 100 year storm inflow hydrograph to the rain garden to prevent erosion. The stormwater overflow will drain to

the existing inlet located in West Main Street similar to the pre development stormwater flow condition.

Call me directly if you have any questions or concerns. Thank you.

Sincerely,

D. C. GOHN ASSOCIATES, INC.

RE: Gatesburg Road Development
Gerberich Payne Shoe Company Land Development
ARRO #10863.39

Dear Stacie:

ARRO Consulting, Inc. ("ARRO") reviewed the following information in accordance with the Mount Joy Borough Subdivision and Land Development, Zoning, and Stormwater Management Ordinances and ARRO's May 3, 2021 Review Letter:

1. Comment Response Letter for Gerberich Payne Shoe Company prepared by D.C. Gohn Associates, Inc., dated May 17, 2021.
2. Preliminary/Final Land Development Plan for Gerberich Payne Shoe Company prepared by D.C. Gohn Associates, Inc. with Drawing # CG-3049 dated March 22, 2021, last revised May 17, 2021.
3. Legal Description of Right-of-Way Dedication on Williams Alley for Gerberich Payne Shoe Company, dated May 18, 2021.
4. Preliminary/Final Land Development Plan Modification Request Letter submitted by D.C. Gohn Associates, Inc. with Project No. 1378-20 dated May 17, 2021.
5. Post-Construction Stormwater Management Report for Preliminary/Final Land Development Plan: Gerberich Payne Shoe Company – 240 West Main Street prepared by D.C. Gohn Associates, Inc. with DCG Project No. 1378-20 dated March 22, 2021, last revised May 17, 2021.
6. Engineer's Opinion of Probable Cost for Gerberich Payne Shoe Company, dated May 17, 2021.
7. Proposed Right-of-Way Exhibit for Mount Joy Senior Housing LP prepared by D.C. Gohn Associates, Inc., dated May 6, 2021.
8. Driveway Sight Distance Measurements for Mount Joy Senior Housing dated May 17, 2021.

We offer the following comments:

Subdivision and Land Development

1. The plans shall be signed and sealed by a registered engineer, surveyor, or landscape architect. [§240-61.A.5]

   The applicant indicated that the plans will be signed and sealed prior to plan recording.

Stormwater Management

2. The soils found on site are Hagerstown-Urban Land Complex (Hc), not Urban Land (Uc), as utilized in the stormwater report. Hc is a hydrologic soil group (HSG) of B, not D. Volume calculations shall be revised utilizing a HSG of B given that it will make a difference in the amount of volume increase [§226-32]. However, rate calculations do not have to be redone as there is less impervious area on the site and, therefore, the rate will be less regardless of HSG. And, considering the soils as D is also conservative in terms of flow for pipe capacity and spillway stability so these calculations do not have to be revised.
3. The volume control calculations shall encompass the entire limit of disturbance as well as the additional parking area (approx. 1.15 acres) [§226-32].
4. The applicant shall include the limit of disturbance on the plans. This area can exclude the future parking area. If the limit of disturbance is greater than one acre, applicable state permits shall be acquired and provided to the Borough [§226.44.A and §226-31.D].
5. The Kleinfelder recommendations shall be addressed. Therefore, notes shall be provided on the plans requiring water-tight joints at all stormwater pipe connections as well as an elimination of the weep holes in the inlets [§226-31.J.(5)].
6. Erosion control matting (ECS-2) shall be shown for the spillway on the plans [§226-34.H].
7. An Operation and Maintenance Agreement shall be prepared, signed, and provided to the Borough [§226-62].

Zoning

8. The electrical lines to the proposed lighting fixtures shall be provided to show there are no conflicts with other proposed features [§270-76].

   The applicant responded that the electrical line locations to the proposed lighting fixtures cannot be determined at this time because the outside transformer and pole locations have not been determined at this time. Locations of the electrical lines shall be provided to show there are no conflicts with other proposed features prior to plan approval.

Traffic

9. Williams Alley is proposed to be one way northbound from 190' north of West Henry Street. The analysis shall reflect this change.

This comment remains because the proposed analysis still showed vehicles entering Williams Alley from Main Street.

10. The study shall indicate that the peak hour for each intersection varies and that the analysis utilized the highest peak hour at each intersection in order to analyze the "worst-case" scenario.

    This comment remains because a letter from RETTEW was submitted but was not attached as correspondence in the Traffic Assessment.

General

11. A Highway Occupancy Permit is required when working within the state right-of-way and shall be submitted to the Borough for review prior to submission to PennDOT.

Waivers – Subdivision and Land Development

12. The applicant is requesting to waive the requirement to improve streets in which a subdivision or land development abuts an existing Borough and/or state street (§240-43.H.1). Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

13. The applicant is requesting to waive the requirement for street intersections with a local street to be a minimum radius of 20' [§240-43.I.4]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

14. The applicant is requesting to waive the requirement that curbing shall be provided along the edge of any landscaped portion of a parking facility [§240-46.C.1]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

15. The applicant is requesting to waive the requirement to dedicate recreation land to the Borough [§240-57.D]. Because there is limited area on the site for this purpose and, as an alternative, the applicant is proposing to pay a fee in lieu of dedication of recreation land, **ARRO recommends granting this waiver request.**

16. The applicant is requesting to waive the requirement to provide a fee in lieu of dedication of recreation [§240-57.G]. The applicant proposes paying a fee of $2,000.00 per unit for a total fee of $72,000.00. However, because land is not being provided on the subject property, the fair market value cannot be determined. Therefore, Borough Council must decide if $72,000.00 is an acceptable fee in lieu of land dedication.

17. The applicant is requesting to waive the requirement that applications for all residential developments with 20 or more dwelling units and buildings containing 1,000 square feet of usable space provide a traffic study and report [§240-62.B]. Because a traffic assessment was prepared which provides adequate information to evaluate the traffic impacts on the adjacent roadway system, **ARRO recommends granting this waiver request.**

18. The applicant is requesting to waive the requirement that the applicant shall make an estimated contribution of the sum necessary to defray the costs of improvements recommended by the Traffic Impact Study [§240-62.B.5]. After discussion with Borough staff and the applicant's engineer, this waiver is not required because the traffic study is not recommending improvements.

Waivers – Stormwater Management

19. The applicant is requesting to waive the requirement for the loading ratios in Karst areas to be a maximum of 3:1 impervious drainage area to infiltration area and 5:1 total drainage area to infiltration area. The site is very limited in space which limits the size of the infiltration area [§226-32.A.2.c]. Based on the justification provided, **ARRO recommends granting this waiver request**.

20. The applicant is requesting to waive the requirement that the use of the emergency spillway to convey flows greater than the 50-year storm is permitted [§226-37.A.6.b]. The spillway is designed as the primary outlet for the rain garden and will convey flows from the 2-year through 100-year events without erosion. Based on the justification provided, **ARRO recommends granting this waiver request**.

Please call me at 717-560-6065 if you have questions.

Sincerely,

Darrell L. Becker, P.E.
Vice President

RE: Gatesburg Road Development
Gerberich Payne Shoe Company Land Development Plan
ARRO # 10863.39
D.C. Gohn No. 1378-20

Dear Ms. Gibbs:

Please accept this letter and the accompanying plans and documents as our response on behalf of Gatesburg Road Development / Gerberich Payne Shoe Company to the ARRO letter dated May 25, 2021. We respond to that engineering review letter as follows:

Subdivision and Land Development

1. The plans shall be signed and sealed by a registered engineer, surveyor, or landscape architect. [§240-61.A.5]
   The applicant indicated that the plans will be signed and sealed prior to plan recording.

Stormwater Management

2. The soils found on site are Hagerstown-Urban Land Complex (Hc), not Urban Land (Uc), as utilized in the stormwater report. Hc is a hydrologic soil group (HSG) of B, not D. Volume calculations shall be revised utilizing a HSG of B given that it will make a difference in the amount of volume increase [§226-32]. However, rate calculations do not have to be redone as there is less impervious area on the site and therefore, the rate will be less regardless of HSG. And considering the soils as D is also conservative in terms of flow for pipe capacity and spillway stability so these calculations do not have to be revised.
   The volume worksheet has been revised to indicate a HSG of B for the two disturbed areas and the area to the rain garden. Page 14 and 15 of the PCSM Report contain the revised volumes. Listed below is a summary of the revisions:

   Disturbed Area A:
   - ***The previous increase in volume was 0.039 acre feet and the revised increase in volume is 0.040 acre feet which is a 0.01 volume increase.***

- ***The rain garden spillway elevation of 376.50 corresponds to 0.054 acre feet which is greater than the 0.040 acre feet of two year volume increase. As a result, the rain garden as designed meets the volume requirements. There are no revisions proposed for the rain garden.***

Disturbed Area B:

- ***The previous decrease in volume was 0.022 acre feet and the revised decrease in volume is 0.016 acre feet. Since there continues to be a net decrease in volume, no stormwater BMP's are required.***

To Rain Garden:

- ***The previous volume to the rain garden is 0.150 acre feet and the revised volume to the rain garden is 0.129 acre feet. The 0.129 acre feet to the rain garden remains greater than the 0.040 acre feet of the net increase in the two year volume.***

3. The volume control calculations shall encompass the entire limit of disturbance as well as the additional parking area (approx.. 1.15 acres) [§226-32].
   The limit of disturbance includes the on-site disturbed areas and the future parking and road widening of West Henry Street. The stormwater volume and stormwater rate calculations include the future parking and road widening of West Henry Street and the rain garden is designed based on the future impervious areas.

4. The applicant shall include the limit of disturbance on the plans. This area can exclude the future parking area. If the limit of disturbance is greater than one acre, applicable state permits shall be acquired and provided to the Borough [§226-44.A and §226-31.D].
   The limit of disturbance is 0.94 acres and is noted on Sheet 4 under Storm Drainage Notes, Note 13.

5. The Kleinfelder recommendations shall be addressed. Therefore, notes shall be provided on the plans requiring water-tight joints at all stormwater pipe connections as well as an elimination of the weep holes in the inlets [§226-31.J.(5)].
   The watertight note has been added to Sheet 4 under Storm Drainage Notes, Note 3 under the notes taken from the geology report. The weep holes have been removed from the inlet box on the Precast Concrete Box Inlet detail on Sheet 8.

6. Erosion control matting (ECS-2) shall be shown for the spillway on the plans [§226-34.H].
   The matting for the spillway is shown on Sheet 5 and 6. It is extended to the extent of the site grading to ensure erosion protection of the slopes.

7. An Operation and Maintenance Agreement shall be prepared, signed and provided to the Borough. [§226-61].

The Borough Solicitor will provide a draft of the O&M Agreement for the applicant to review.

Zoning

8. The electrical line to the proposed lighting fixtures shall be provided to show there are no conflicts with other proposed features. [§270-76]
   The applicant responded that the electrical line locations to the proposed lighting fixtures cannot be determined at this time because the outside transformer and pole locations have not been determined at this time. Locations of the electrical lines shall be provided to show there are no conflicts with other proposed features prior to plan approval.
   The underground electrical lines and light pole locations have been added to Sheet 3

Traffic

9. Williams Alley is proposed to be one way northbound from 190' north of West Henry Street. The analysis shall reflect this change.
   This comment remains because the proposed analysis still showed vehicles entering Williams Alley from Main. Street.
   Based on a conversation with the applicant's traffic consultant (RETTEW), the comment has been addressed.

10. The study indicate that the peak hour for each intersection varies and that the analysis utilized the highest peak hour at each intersection in order to analyze the "worst-case" scenario.
    This comment remains because a letter from RETTEW was submitted but was not attached as correspondence in the Traffic Assessment.
    Based on a conversation with the applicant's traffic consultant (RETTEW), the comment has been addressed.

General

11. A Highway Occupancy Permit is required when working within the state right-of-way and shall be submitted to the Borough for review prior to submission to PennDOT.
    Since there is no physical alterations to Williams Alley, a Highway Occupancy Permit Application to PennDOT is not required.

Waivers – Subdivision and Land Development

12. The applicant is requesting to waive the requirement to improve streets in which a subdivision or land development abuts an existing Borough and/or state street [§240-43.H.1] Based on the justification provided in the applicant's modification request letter, **ARRO recommends grating this waiver request.**

13. The applicant is requesting to waive the requirement for street intersections with a local street to be a minimum radius of 20' [§240-43.I.4]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

14. The applicant is requesting to waive the requirement that curbing shall be provided along the edge of any landscaped portion of a parking facility [§240-46.C.1]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

15. The applicant is requesting to waive the requirement to dedicate recreation land to the Borough [§240-57.D.1]. Because there is limited area on the site for this purpose and, as an alternative, the applicant is proposing to pay a fee in lieu of dedication of recreation land, **ARRO recommends denying this waiver request.**

16. The applicant is requesting to waive the requirement to provide a fee in lieu of dedication of recreation [§240-57.G]. The applicant proposes paying a fee of $2,000.00 per unit for a total fee of $72,000.00. However, because land is not being provided on the subject property, the fair market value cannot be determined. Therefore, Borough Council must decide if $72,000.00 is an acceptable fee in lieu of land dedication.

17. The applicant is requesting to waive the requirement that applications for all residential developments with 20 or more dwelling units and buildings containing 1,000 square feet of usable space provide a traffic study and report [§240-62.B]. Because a traffic assessment was prepared with provides adequate information to evaluate the traffic impacts on the adjacent roadway system, **ARRO recommends granting this waiver request.**

18. The applicant is requesting to waive the requirement that the applicant shall make an estimated contribution of the sum necessary to defray the costs of improvements recommended by the Traffic Impact Study [§240-63.B.5]. After discussion with Borough staff and the applicant's engineer, **this waiver is not required because the traffic study is not recommending improvements.**

Waivers – Stormwater Management

19. The applicant is requesting to waive the requirement for the loading ratios in Karst areas to be a maximum of 3:1 impervious drainage area to infiltration area and 5:1 total drainage area to infiltration area. The site is very limited in space which limits the size of the infiltration area [§226-32.A.2.c]. Based on the justification provided, **ARRO recommends granting this waiver request.**

20. The applicant is requesting to waive the requirement that the use of the emergency spillway to convey flows greater than the 50-year storm is permitted [§226-37.A.6.b]. The spillway is designed as the primary outlet for the rain garden and will convey flows from the 2-year through 100-year events without erosion. Based on the justification provided, **ARRO recommends granting this waiver request.**

Plans are being submitted directly to ARRO for review.

We submit the following for review:

1. 15 copies 11 x 17 Preliminary/Final Land Development Plan
2. 1 copy of the PCSM Report
3. 1 copy of the LCCD approval letter

Respectfully,

D. C. Gohn Associates, Inc.

TABLE OF CONTENTS

LIST OF TABLES

LIST OF FIGURES

APPENDICES

1 PROJECT INTRODUCTION

The enclosed information should be considered part of the Preliminary / Final Land Development Plan for Gerberich Payne Shoe Company located in Mount Joy Borough, Lancaster County, PA.

1.1 Project Intent

Mount Joy Senior Housing LP, the owner and developer of the property, is proposing to renovate the existing building to provide 36 senior apartment units, commercial space on the ground floor, re-configure the existing paved areas for the parking lot, stormwater facilities, utilities, landscaping, sidewalks, and other site improvements.

1.2 Project Location

The site is located at 240 West Main Street. Refer to Figure 1 for the site location.

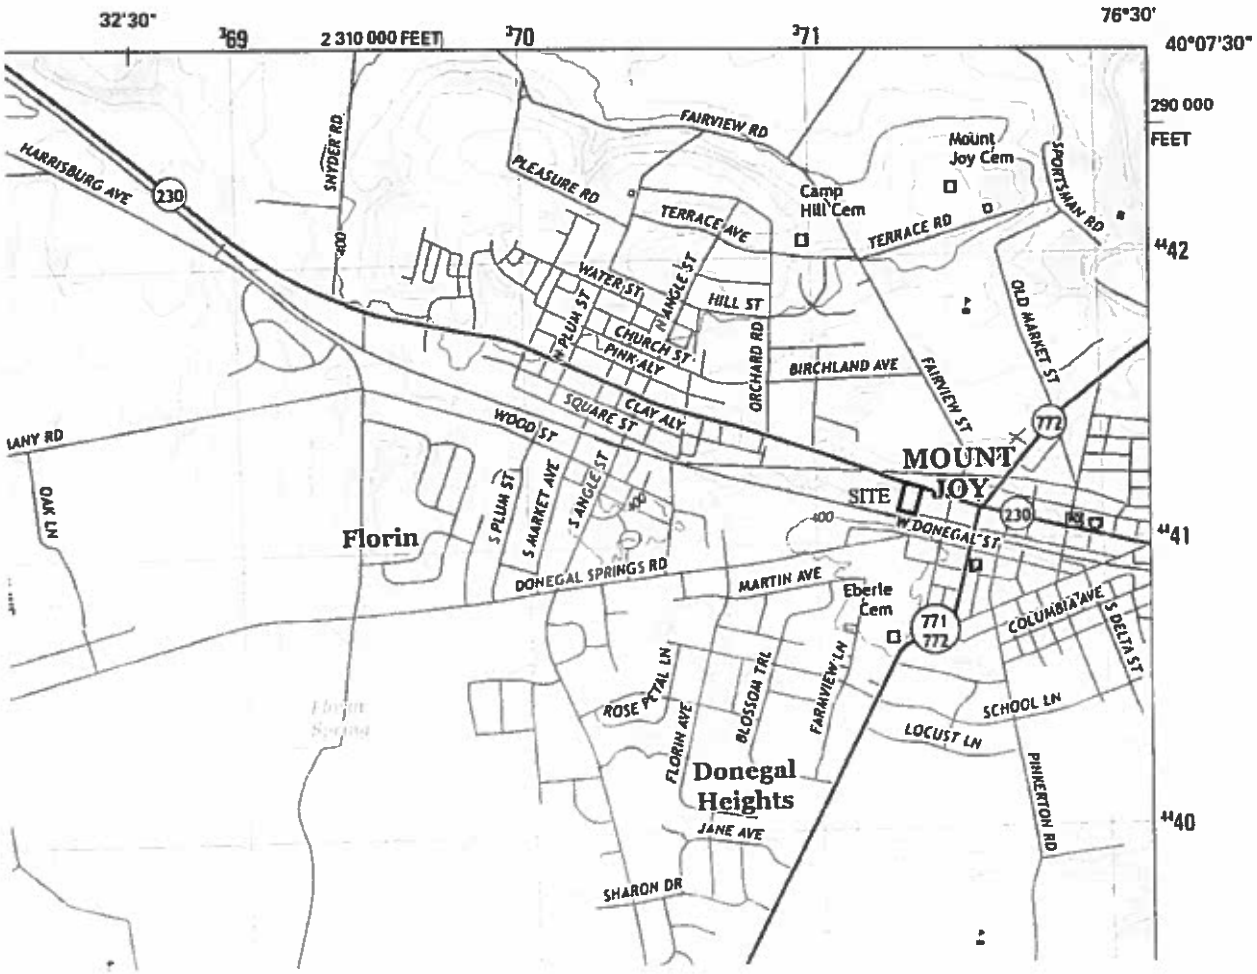
1.3 Site Description

The area of the proposed improvements consists of an existing building, existing gravel and paved areas to be removed, and grass areas. There are no wetlands. All stormwater ultimately drains to the Little Chickies Creek which is designated as TSF, MF. The past land use is commercial, the present land use is vacant, and the proposed land use is senior housing and office space.

Governing Ordinance

The governing ordinance is the Mount Joy Borough Stormwater Management Ordinance, Ordinance No. 2-14, as amended.

Figure 1 - USGS Map
Columbia West, PA Quadrangle



PRE-DEVELOPMENT CONDITION

1.4 Land Cover Conditions

The area of the proposed improvements consists of an existing building, existing gravel and paved areas to be removed, and grass areas.

1.5 Soils

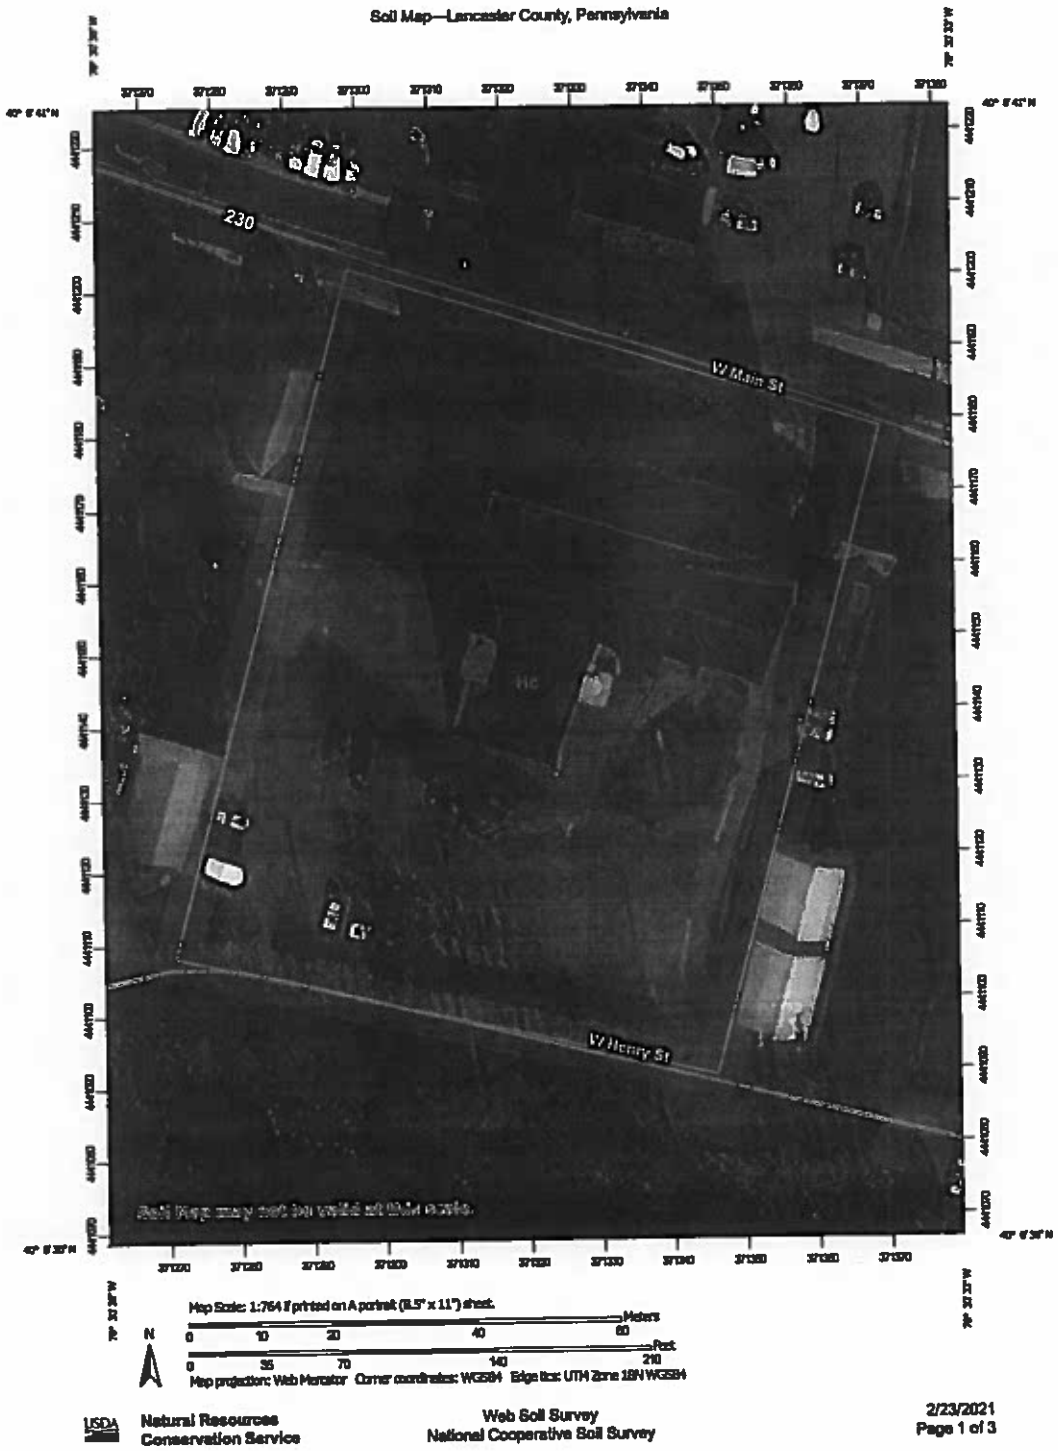
According to the Soil Survey of Lancaster County, the site contains the soil types listed below. Table 1 provides a summary of the present soil types.

Table 1 – Soils Series

MAP SYMBOL	SOIL NAME	HYDRO. SOIL GROUP
Uc	Urban Land	D

Figure 3 presents an excerpt from the Soil Survey of Lancaster County.

Figure 2 – Soils Map



1.6 Drainage Areas

There are two drainage areas associated with the project.

Pre Area A is analyzed from the highpoint of the site along the existing parking lot and building to the property line adjacent to West Main Street. There is a portion of off-site drainage which drains to the analyzed area.

Pre Area B is analyzed from the highpoint of the site along the existing parking lot and building to the property line adjacent to West Main Street. There is a portion of off-site drainage which drains to the analyzed area.

1.7 Peak Runoff Determination

1.7.1 Calculation Method

In accordance with the ordinance, the Rational Method has been used to calculate the stormwater runoff for the project site. The runoff coefficients used are based upon the information provided in the Appendix of the Mount Joy Borough Stormwater Management Ordinance. The Rainfall Intensity data used is based upon PADOT Region 4 for the project site.

1.7.2 Drainage Area Properties

The following table summarizes the pre-development drainage areas as required to utilize the Rational Method to calculate stormwater runoff. Please refer to Appendix 'A' for the detailed calculations.

Table 2 - Pre-Development Drainage Areas

Drainage Area	Total Area (acres)	Weighted 'C'	Tc (Min.)
Pre Area A	1.23	0.643	6.08
Pre Area B	0.58	0.681	7.15

1.7.3 Drainage Area Peak Flows

The following table summarizes the peak flows calculated for the pre-development drainage areas using the Rational Method. Please refer to Appendix 'A' for the detailed calculations.

Table 3 - Pre-Development Drainage Area Peak Flows

Drainage Area	2 Year	10 Year	25 Year	50 Year	100 Year
Pre Area A	3.10	4.06	4.50	4.95	5.48
Pre Area B	1.46	1.93	2.14	2.35	2.61

2 POST-DEVELOPMENT CONDITION

2.1 Overview

Mount Joy Senior Housing LP, the owner and developer of the property, is proposing to renovate the existing building to provide 36 senior apartment units, office space on the ground floor, re-configure the existing paved areas for the parking lot, stormwater facilities, utilities, landscaping, sidewalks, and other site improvements.

The actual proposed improvements have been used to determine the impervious coverage utilized within the hydrologic calculations. The stormwater calculations include 2,447 square feet of impervious area associated with the future parking spaces and road widening associated with West Henry Street and 500 square feet of impervious area associated with the future ADA handicap sidewalk connection from the parking lot to the sidewalk at the existing building entrance.

2.2 Peak Runoff Determination

2.2.1 Calculation Method

Similar to pre-development, the Rational Method has been used to calculate the stormwater runoff for the project site. The runoff coefficients used are based upon the information provided in the Appendix of the Mount Joy Borough Stormwater Management Ordinance. The Rainfall Intensity data used is based upon PADOT Region 4 for the project site.

2.2.2 Calculation Approach

There is a proposed rain garden which is designed to mitigate stormwater from the proposed improvements. There are no existing stormwater storage facilities on-site.

2.2.3 Drainage Area Properties

The following table summarizes the post-development drainage areas as required to utilize the Rational Method to calculate stormwater runoff. Please refer to Appendix 'B' and Appendix 'C' for the detailed calculations.

Table 4 - Post-Development Drainage Area Properties

Drainage Area	Total Area (acres)	Weighted 'C'	Tc (Min.)
To Rain Garden	0.78	0.643	5.0
Post Area A Undetained	0.62	0.603	5.0
Post Area B Undetained	0.42	0.633	5.0

2.2.4 Drainage Area Peak Flows

The following table summarizes the peak flows for the Post-Development Drainage Areas. Please refer to Appendix 'B' and Appendix 'C' for the detailed calculations.

Please note that the values presented in the table for the "Rain Garden" represents the peak inflows to the proposed rain garden.

Table 5 - Post-Development Drainage Area Peak Flows

Drainage Area	2 Year	10 Year	25 Year	50 Year	100 Year
To Rain Garden	2.10	2.71	3.01	3.31	3.67
Post Area A Undetained	1.57	2.02	2.24	2.47	2.74
Post Area B Undetained	1.11	1.44	1.59	1.76	1.95

2.2.5 Pre/Post Peak Runoff Comparison

As required by the ordinance, the post-development runoff for the 2, 10, 25, 50, and 100 year storm events shall not exceed the peak rates of runoff prior to development.

Table 6 – Pre Area A / Post Area A Undetained / Rain Garden Discharge Pre/Post Peak Runoff Comparison

Storm Event	*Pre-Development*	*Post-Development*			
	Pre Area A Peak Flow, cfs	Rain Garden Discharge, cfs	Post Area A Undetained Peak Flow, cfs	Total Post Development Flow, cfs	Total Allowable Post Peak Flow, cfs
2 year	3.10	0.14	1.57	1.71	3.10
10 year	4.06	0.46	2.02	2.48	4.06
25 Year	4.50	0.68	2.24	2.92	4.50
50 Year	4.95	0.92	2.47	3.39	4.95
100 Year	5.48	1.25	2.74	3.99	5.48

Table 7 – Pre Area B / Post Area B Undetained Pre/Post Peak Runoff Comparison

Storm Event	*Pre-Development*	*Post-Development*			
	Pre Area B Peak Flow, cfs		Post Area B Undetained Peak Flow, cfs		Total Allowable Post Peak Flow, cfs
2 year	1.46		1.11		1.46
10 year	1.93		1.44		1.93
25 Year	2.14		1.59		2.14
50 Year	2.35		1.76		2.35
100 Year	2.61		1.95		2.61

3 STORMWATER MANAGEMENT FACILITY DESIGN

One proposed rain garden has been designed to mitigate the increase in stormwater generated by the proposed development.

3.1 Rain Garden Design

The proposed rain garden has been designed to control the stormwater rate for the 2, 10, 25, 50 and 100 year storm events and infiltrate the net increase in the two year volume. An emergency spillway is designed to discharge stormwater from the basin. The results of the proposed rain garden routing is presented in the following table. Please refer to Appendix 'C' for the detailed calculations.

Table 8 - Proposed Rain Garden Routings Summary

Storm Frequency	Peak Elevation (ft)	Peak Storage (acre-ft)	Peak Outflow (cfs)
2 Year	376.51	0.054	0.14
10 Year	376.55	0.056	0.46
25 Year	376.57	0.056	0.68
50 Year	376.60	0.058	0.92
100 Year	376.62	0.058	1.25

3.1.1 Emergency Spillway Design

The emergency spillway has been designed to safely convey the one hundred (100) year storm in the event that the principle outlet becomes clogged. As required by the ordinance, the emergency spillways have been designed for the peak 100-year inflow to the rain garden. Please refer to Appendix 'C' and Appendix 'D' of this report for the detailed calculations.

Table 9 - Proposed Emergency Spillway Design

BMP ID	Top of Berm Elevation (ft)	Emergency Spillway Crest Elev. (ft)	100-year Peak Elevation (ft)	Flow Depth thru Spillway (ft)
Rain Garden	377.00	376.50	376.62	0.12

3.1.2 Rain Garden Dewatering Time

The rain garden must completely drain the rate control storage volume over a period of time less than or equal to in less than twenty-four (24) hours from the peak 100 year water surface design elevation. The dewatering time for the rain garden is 0.10 hours.

The rain garden shall completely drain the volume storage over a period of time not less than 24 hours and not more than 72 hours from the end of the design storm. The dewatering time is 24 hours. The infiltration rate of 0.75 inches per hour and the 18" depth of stormwater results in the 24 hour dewatering time. Please refer to Appendix 'C' and Appendix 'E' for the detailed calculations.

4 CONVEYANCE SYSTEMS DESIGN

4.1 Storm Sewer Design

The storm sewers were designed using the Autodesk Hydraflow Storm Sewers 2021 program. As required by the ordinance, the storm sewer systems were designed to convey the twenty-five year storm event for stormwater conveying on-site flow and the 50 year storm event for stormwater conveying off-site flow. The storm sewer systems were also checked for the one hundred year (100-year) storm event to verify that the systems can safely convey the runoff generated by the larger storm event without adversely affecting the adjoining properties. Please refer to Appendix 'D' for the detailed calculations.

4.2 Swale Design

All proposed swales have been analyzed for the 100 year storm event and temporary and/or permanent swale linings have been proposed where required to limit soil erosion. Please refer to Appendix 'D' for the detailed calculations for the emergency spillway design.

4.3 Outfall Erosion Protection

The exit velocities at each pipe outfall have been checked to ensure that no erosion problems will occur. Rip-rap aprons have been designed at the pipe outfalls where it was determined that erosion was likely. Please Refer to Appendix 'D' for the detailed calculations.

5 INFILTRATION REQUIREMENTS

The Borough requirements state that the increased runoff volume shall be managed from the 2 YR/24 HR Storm Event. The stormwater volume calculations include 2,447 square feet of impervious area associated with the future parking spaces and road widening associated with West Henry Street and 500 square feet of impervious area associated with the future ADA handicap sidewalk connection from the parking lot to the sidewalk at the existing building entrance.

A stormwater infiltration summary report was completed by Kleinfelder dated February 19, 2021. The report indicates 4 test pit locations in the area of the proposed improvements and the test pit locations are shown on the Final Grading / PCSM Plans.

Based on the report, there is one limiting zone noted in Test Pit 2 with shallow boulder which was attributed to the existing fill. There are no limiting zones at Test Pit 1, 2, and 3. There was no groundwater or soil mottling encountered in any test pit. There is existing fill encountered in Test Pit 1, 2, and 4, extending to depths of 2 to 4 feet below existing grades. The fill is poorly graded, plastic, and compromised of predominately clay with secondary amounts of sand, gravel, cobble to boulder size rock fragments as well as brick and plastic fragments. The fill is free of deleterious materials such as ash, cinder, slag, and topsoil/organic debris.

The infiltration rates ranged from 0.20 inches per hour to 3.0 inches per hour which are field rates and are unfactored.

The project site is underlain by carbonate geology. The geologic and karst features map in the Kleinfelder report did not indicate any karst features on the subject property or in the area adjacent to the subject property.

There are two areas analyzed for the net volume increase in the 2 year storm which corresponds to the disturbed area for the pre and post development drainage areas.

Disturbed Area A:

- The net increase in volume is 0.040 acre feet. The disturbed area assumes 20% of the existing impervious area being disturbed is converted to meadow. The 2 year volume to the rain garden is 0.129 acre feet. The proposed rain garden is

designed with a bottom elevation of 375.00. The spillway is set at 376.50 which provides 1.50 feet of infiltration storage. The 376.50 elevation corresponds to 0.054 acre feet which is greater than the 0.040 acre feet net two year increase. As a result, the two year net increase in volume is infiltrated within the proposed rain garden. The emergency spillway is used to discharge stormwater rate above the infiltration storage area.

Disturbed Area B:

- The net decrease in volume is -0.016 acre feet. The disturbed area assumes 20% of the existing impervious area being disturbed is converted to meadow. As a result of the net decrease, there are no proposed stormwater facilities associated with Disturbed Area B.

The thermal impacts of the project were minimized using the rain garden by treating the first flush of stormwater. There are no naturally occurring geological formations or soil conditions that have the potential to cause pollution during or after earth disturbance activities.

The loading ratio for the proposed infiltration basin is listed in the chart below. Since this site is located in a Karst area, the PA BMP Manual and Borough stormwater ordinance notes that the loading ratio is 5:1 for total drainage area to infiltration area and 3:1 for impervious area to infiltration area. The infiltration area is based on the square footage at the spillway elevation of 376.50.

Table 10 - Proposed Stormwater Infiltration Facility Loading Ratios

Stormwater Facility	Infiltration Area, s.f.	Total Drainage Area, s.f.	Total Impervious Area, s.f.	Proposed Loading Ratio (Total; Impervious)	Required Loading Ratio (Total; Impervious)
Rain Garden	1,786	33,820	21,859	18.9:1; 12.2:1	5:1; 3:1

Material and Performance Specification

ECS-2® Double Net Straw Rolled Erosion Control Product

Description:

The ECS-2® is made with uniformly distributed 100% agricultural straw and two polypropylene nets securely sewn together with degradable thread. The tightly compressed blankets are wrapped and include a product label, code and installation guide. The blankets are palletized for easy transportation.
The ECS-2® has functional longevity of approximately 12 months, but will vary depending on soil and climatic conditions, and is suitable for slopes 2:1 or less and low to medium flow channels. The ECS-2® meets Type 2.D specification requirements established by the Erosion Control Technology Council (ECTC) and Federal Highway Administration's (FHWA) FP-03 Section 713.17.

2-Year Volume Increase (ft3):	1,756	0.040 acre/feet

2-Year Volume Increase = Developed Conditions Runoff Volume - Existing Conditions Runoff Volume

1. Runoff (in) = $Q = (P-0.2S)^2 / (P+0.8S)$ where
   P = 2-Year Rainfall (in)
   S = (1000/CN) - 10
2. Runoff Volume CF = Q x Area x 1/12
   Q = Runoff (in)
   Area = Land use area (sq. ft.)

Note: Runoff Volume must be calculated for EACH land use type/condition and HSGI.
The Use of a weighted CN value for volume calculations is not acceptable.
20% of the existing impervious area being disturbed has been been converted to a meadown condition.

Worksheet 4: Change in Runoff Volume for 2-YR Storm Event

Project:	Gerberich Payne Shoe Company
Drainage Area:	Disturbed Area B
2-Year Rainfall:	3.10 in

Total Site Area:	0.24	acres
Protected Site Area:	0.00	acres

Total		33,820	0.78				3.27	5,627

2-Year Volume Increase (ft3):	5,627

0.129 acre/feet

2-Year Volume Increase = Developed Conditions Runoff Volume - Existing Conditions Runoff Volume

1. Runoff (in) = Q = $(P-0.2S)^2 / (P+0.8S)$ where
   - P = 2-Year Rainfall (in)
   - S = (1000/CN) - 10
2. Runoff Volume CF = Q x Area x 1/12
   - Q = Runoff (in)
   - Area = Land use area (sq. ft.)

Note: Runoff Volume must be calculated for EACH land use type/condition and HSGI.
The Use of a weighted CN value for volume calculations is not acceptable.
20% of the existing impervious area being disturbed has been been converted to a meadown condition.

Storage/Elevation Curve: P:\1378\1378-20\Correspondence\Drainage\Rain Garden.ES

Basin Storage/Elevation Input

Elevation (ft)	Area (acres)	Storage (acre-ft)
375.00	0.029	0.000
376.00	0.036	0.033
377.00	0.046	0.074

2 yr. volume elev = 376.19 → 376.00

← 0.033 2 yr. volume

Increase = 1,756 ft³ or 0.040 ac/ft.

Spillway elev = 376.50

Berm elev = 377.00

Test Pit 1 = 1.80 in/hr

Test Pit 2 = 1.20 in/hr.

3.00 in/hr / 2 (average) / 2 (safety factor) = 0.75 in/hr

Depth of water = 1.50' or 18.0"

18.0" / 0.75 in/hr = 24 hours dewatering time.

LANCASTER COUNTY
CONSERVATION DISTRICT

Conserving Natural Resources for Our Future

May 27, 2021

Mount Joy Senior Housing LP
2121 Old Gatesburg Road, Suite 200
State College, PA 16803

RE: **Project Name – Gerberich Payne Shoe Company**
LCCD Plan ID: ESP03359
Mount Joy Borough

Dear Sir:

I have reviewed the Erosion and Sediment Pollution Control Plan dated March 22, 2021 and revised April 28, 2021 for the above referenced project. If the Erosion and Sediment Pollution Control Plan is fully implemented as described, it should be adequate to meet the intent of the rules and regulations adopted under the PA Clean Streams Law relating to erosion and sedimentation control.

The Conservation District reviews this plan solely to determine whether it is adequate to satisfy the requirements of 25 PA Code §102.1 et.seq, the erosion control regulations of the Department of Environmental Protection. By a determination that the plan is adequate to meet those requirements, neither the Conservation District nor the County assumes any responsibility for the implementation of the plan or the proper construction and operations of the facilities contained in the plan.

A representative of the Lancaster County Conservation District may conduct periodic inspections of the erosion and sedimentation control facilities during the construction of this project. The approved Erosion and Sediment Pollution Control Plan must be available at the site of the earthmoving activity at all times.

Yours for a better environment,

Eric Hout
Resource Conservationist

RE: Gerberich Payne Shoe Company
Water and Sewer Plan, Construction Schedule and Cost Opinion review
ARRO # 10818.21

Dear Scott:

ARRO has completed its review of the Gerberich Payne Shoe Company Preliminary/Final Development Plan, Cost Opinion and Construction Schedule dated March 22, 2021, latest revision date April 30, 2021, and offers the following comments based on the Authority's specifications and current engineering practices.

1. Sheet 4 – Sanitary Sewer Note 12 refers to water service work not sanitary sewer work. ARRO recommends this note is moved to avoid confusion during construction.

2. Sheet 5 – The proposed 6" water service line will require a valve at the connection to the existing 8" water main. ARRO recommends this be shown on the plan prior to approval.

3. As for the Construction Cost Opinion, ARRO agrees with the estimate therefore we recommend setting the Financial Security at $37,202.00.

4. Based upon the provided anticipated schedule ARRO recommends setting the Construction Escrow at $14,110.00 to cover the cost of pre-construction meeting, shop drawing submittal reviews, construction observation services, "as-constructed" document review, etc.

Should you have any questions, please feel free to contact me.

Sincerely,

Jimmy L. Dennis
Engineering Specialist

7	RM	Acer rubrum 'Armstrong'	Armstrong Red Maple	6' Min Height	BB
22	JZ	Taxus x media 'Hatfieldii'	Hatfield Yew	2' Min Height	1 Gallon
20	JZ	Buxus sempervirens	American Boxwood	2' Min Height	1 Gallon

LANDSCAPING NOTES:

A. ALL PLANTING SHALL BE PERFORMED IN CONFORMANCE WITH GOOD NURSERY AND LANDSCAPE PRACTICE. PLANT MATERIALS SHALL CONFORM TO THE STANDARDS RECOMMENDED BY THE AMERICAN ASSOCIATION OF NURSERYMAN, INC., IN THE AMERICAN STANDARD OF NURSERY STOCK, ANZI Z60, CURRENT EDITION, OR ANY AMENDMENTS MADE HEREAFTER.

1. THE TOP OF THE MAIN ORDER ROOT (FIRST LARGE SET OF ROOTS THAT DIVIDE FROM THE TRUNK) SHALL BE PLANTED NO LOWER THAN ONE (1) OR TWO (2) INCHES INTO THE SOIL.

2. NO STAKING AND WIRING OF TREES SHALL BE ALLOWED WITHOUT A MAINTENANCE NOTE FOR THE STAKING AND WIRING TO BE REMOVED WITHIN ONE (1) YEAR OF PLANTING.

3. ALL REQUIRED LANDSCAPE PLANTS SHALL BE MAINTAINED AND GUARANTEED FOR A LENGTH OF 18 MONTHS FROM THE DATE OF PLANTING. NO MORE THAN ONE-THIRD (1/3) OF THE TREE OR SHRUB SHALL BE DAMAGED OR DEAD WITHOUT REPLACEMENT. REPLACEMENT PLANTS SHALL CONFORM TO ALL REQUIREMENTS OF THIS SECTION AND SHALL BE MAINTAINED AFTER REPLANTING FOR AN ADDITIONAL 18 MONTHS.

B. THE PLANT'S GROWTH SHALL NOT INTERFERE WITH THE STREET CARTWAY, ACCESS DRIVES OR DRIVEWAY LOCATIONS, SIDEWALK, SIGNAGE, EASEMENT LOCATIONS, CLEAR SIGHT TRIANGLES, OR UTILITY LINE LOCATIONS. NO LANDSCAPING WITH SIGHT TRIANGLE EASEMENT LOCATIONS SHALL EXCEED TWO (2) FEET IN HEIGHT.

C. IN ORDER TO AID SURVEILLANCE AND MINIMIZE THE POTENTIAL FOR CRIME, PLANTINGS SHALL BE SITED, MASSED, AND SCALED TO MAINTAIN VISIBILITY OF DOORS AND FIRST FLOOR WINDOWS FROM THE STREET AND FROM WITHIN THE DEVELOPMENT TO THE GREATEST EXTENT POSSIBLE. PLANTING PATTERNS SHALL NOT OBSTRUCT SIGHT LINES OR CREATE ISOLATED AREAS, ESPECIALLY NEAR PEDESTRIAN WALKING PATHS.

D. ALL TREES SHALL HAVE A NORMAL HABIT OF GROWTH AND SHALL BE SOUND, HEALTHY, AND VIGOROUS; THEY SHALL BE FREE FROM DISEASE, INSECT EGGS, AND LARVAE.

E. THE TRUNK CALIPER, MEASURED AT A HEIGHT OF SIX (6) INCHES ABOVE FINISH GRADE SHALL BE A MINIMUM OF TWO (2) INCHES.

F. TREE PLANTING DEPTH SHALL BEAR THE SAME RELATIONSHIP TO THE FINISHED GRADE AS THE TOP OF THE ROOTBALL OR ORIGINAL GRADE OF ORIGIN.

PARKING LOT TREE CALCULATION:

ONE DECIDUOUS TREE SHALL BE REQUIRED FOR EVERY 10 NEW OFF STREET PARKING SPACES

THERE ARE 40 OFF STREET PARKING SPACES WHICH REQUIRES 4 TREES. THERE ARE 4 TREES PROVIDED.

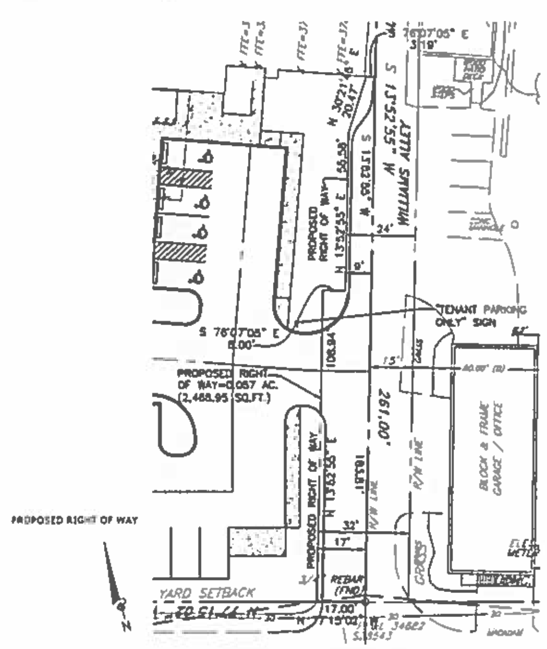
BUFFER YARD LANDSCAPE CALCULATION:

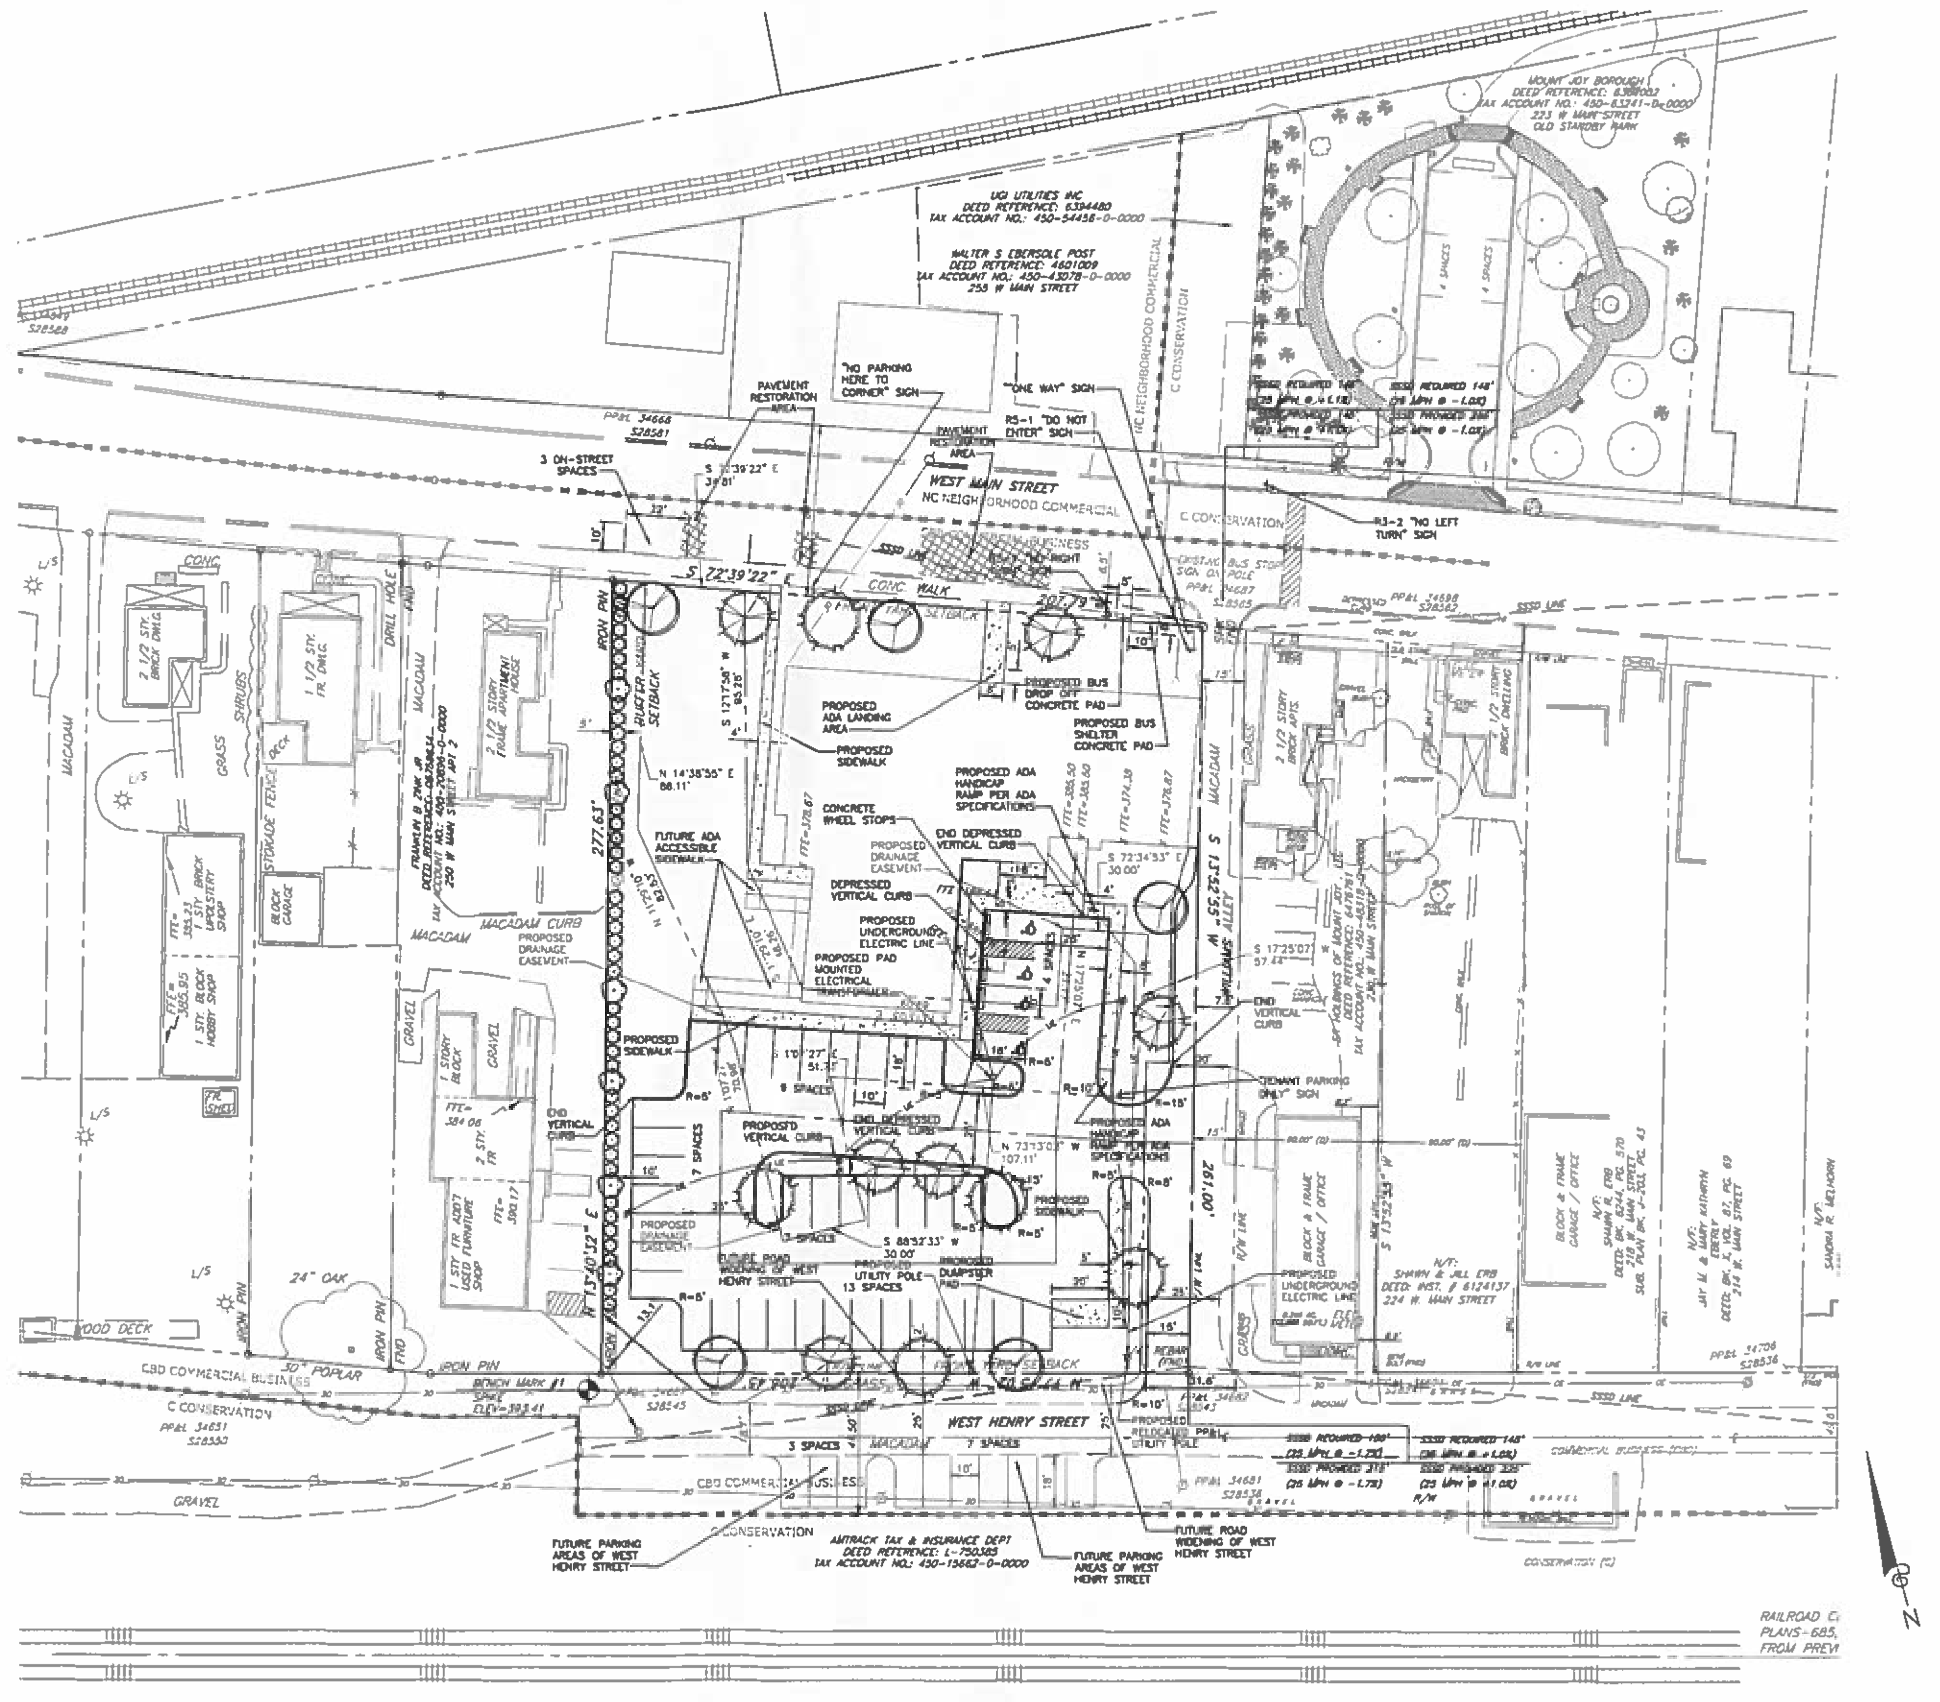
ONE DECIDUOUS TREE SHALL BE REQUIRED FOR EVERY 40 FEET OF LENGTH OF THE BUFFER YARD

THE BUFFER YARD LENGTH IS 278 FEET WHICH REQUIRES 7 TREES. THERE ARE 7 TREES PROVIDED.

SIGNAGE NOTES:

A. ALL SIGNS SHALL MEET CURRENT PENNDOT SPECIFICATIONS.





PAVING LEGEND

ROUTE 230 PAVEMENT RESTORATION

BUS SHELTER NOTES:
1. THE SOUTH CENTRAL TRANSIT AUTHORITY (SCTA) PROVIDES THE BUS SHELTER.
2. CONTRACTOR TO COORDINATE WITH SCTA AND MANUFACTURER FOR THE INSTALLATION OF THE BUS SHELTER.

PLOTTED: June 02,2021 @ 09:59AM

PLAN NOTES:

1. THE PURPOSE OF THIS PLAN IS TO SHOW THE IMPROVEMENTS WHICH CONSIST OF CONVERTING THE EXISTING BUILDING INTO 36 SENIOR HOUSING APARTMENT UNITS, COMMERCIAL SPACE ON THE GROUND FLOOR, RE-CONFIGURE THE EXISTING PARKING AREAS, STORMWATER FACILITIES, SITE UTILITIES, AND OTHER SITE IMPROVEMENTS.
2. NO IMPROVEMENTS ARE INTENDED FOR DEDICATION TO MOUNT JOY BOROUGH.
3. AS OF THE DATE OF THIS PLAN, EXACT LOCATION AND ROUTING OF UNDERGROUND FACILITIES MAY VARY AND MUST BE FIELD VERIFIED PRIOR TO ANY CONSTRUCTION.
4. THE SITE IS CURRENTLY SERVED BY PUBLIC WATER AND SEWER FACILITIES PROVIDED BY MOUNT JOY BOROUGH AUTHORITY.
5. NOTHING WILL BE PLACED, PLANTED, SET, OR PUT WITHIN THE AREAS OF ANY EASEMENTS THAT WOULD ADVERSELY AFFECT THE FUNCTION OF THE EASEMENT OR CONFLICT WITH THE EASEMENT AGREEMENT. ACCESS TO EASEMENTS INDICATED AS STORM WATER EASEMENTS APPLIES TO LOCAL MUNICIPAL OFFICIALS.
6. NO STRUCTURES, LANDSCAPING, OR GRADING WOULD BE CONSTRUCTED, INSTALLED OR PERFORMED WITHIN THE AREAS OF THE PROPOSED ACCESS DRIVE INTERSECTIONS WHICH WOULD OBSCURE THE VISION OF THE MOTORIST TO A HEIGHT OF 3 FT.
7. FEATURES SHOWN WITHIN 200' OF THE SITE BASED UPON INFORMATION FROM LANCASTER COUNTY GIS, DEEDS OBTAINED FROM THE LANCASTER COUNTY RECORDER OF DEEDS, AND PASDA.
8. A STORMWATER INFILTRATION SUMMARY REPORT PREPARED BY KLEINFELDER, DATED FEBRUARY 19, 2021, KLEINFELDER PROJECT NO. 20213553.001A, ACCOMPANIES THIS PROJECT.
9. CLEAR SIGHT TRIANGLES NEED TO BE CLEAR OF ANY PERMANENT OBSTRUCTIONS AND PLANT MATERIALS OVER THIRTY (30) INCHES HIGH AND BELOW TEN (10) FEET.
10. AS-BUILT PLANS SHALL BE PROVIDED AFTER CONSTRUCTION IS COMPLETE AND THE COST FOR PREPARATION OF THE PLANS SHALL BE INCLUDED IN THE FINANCIAL SECURITY.
11. WEST HENRY STREET MAY BE WIDENED AND PARKING CONSTRUCTED IN THE FUTURE. IF THE DEVELOPER/OWNER DECIDES TO PROCEED WITH CONSTRUCTION, APPROVAL BY BOROUGH COUNCIL MUST BE OBTAINED AND MAINTENANCE AND OTHER APPLICABLE AGREEMENTS MUST BE EXECUTED WITH THE BOROUGH PRIOR TO BEGINNING CONSTRUCTION.

BOROUGH NOTES AND REQUIREMENTS:

1. ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH BOROUGH ORDINANCES OR SPECIFICATIONS AS APPLICABLE.
2. ALL CONSTRUCTION STANDARDS AND MATERIALS NOT SPECIFIED BY BOROUGH REGULATIONS SHALL BE IN ACCORDANCE WITH DEPARTMENT OF TRANSPORTATION SPECIFICATIONS, PUBLICATION 408, LATEST EDITION AND STANDARDS FOR ROADWAY CONSTRUCTION, PUBLICATION 72, LATEST EDITION, UNLESS CERTAIN LOCAL REGULATIONS APPLY.
3. MAINTENANCE OF ALL DRAINAGE SWALES, DETENTION FACILITIES, AND DRAINAGE EASEMENTS SHALL BE THE RESPONSIBILITY OF THE LOT OWNER. THE BOROUGH RESERVES THE RIGHT TO ENTER ANY EASEMENT TO MONITOR, INSPECT, OR REPAIR FACILITIES LOCATED WITHIN. ALL COSTS INVOLVED IN MAINTENANCE BY THE BOROUGH SHALL BE THE RESPONSIBILITY OF THE LOT OWNERS. ALL FACILITIES MUST REMAIN AS DESIGNED AND SHOWN ON THESE PLANS.
4. THE BOROUGH IS NOT RESPONSIBLE FOR THE CONSTRUCTION OR MAINTENANCE OF ANY AREA, PLANTINGS, OR STREET NOT DEDICATED FOR PUBLIC USE.
5. IF SUBSURFACE WATER IS ENCOUNTERED DURING EXCAVATION AND CONSTRUCTION, THE SITE ENGINEER, MOUNT JOY BOROUGH, MOUNT JOY BOROUGH ENGINEER AND OWNER SHALL BE NOTIFIED AND THE INSTALLATION OF UNDER DRAINS SHOULD BE CONSIDERED FOR PARKING AND ROADWAY AREAS.

CONTRACTOR NOTES:

1. AREAS DISTURBED BY CONSTRUCTION ARE NOT TO BE COVERED BY IMPERVIOUS SURFACES OR LANDSCAPING SHALL BE SEEDED AND MULCHED IN ACCORDANCE WITH THE SPECIFICATIONS AS LISTED WITHIN THE SEDIMENTATION AND EROSION CONTROL PLAN NARRATIVE FOR THIS SITE.
2. CONTRACTOR SHALL VERIFY ALL EXISTING UTILITY LOCATIONS PRIOR TO CONSTRUCTION AND MAINTAIN UNINTERRUPTED SERVICES. ANY DAMAGE DUE TO THE CONTRACTOR'S NEGLIGENCE SHALL BE IMMEDIATELY AND COMPLETELY REPAIRED AT THE CONTRACTOR'S EXPENSE.
3. CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND INFORMATION SHOWN ON THIS PLAN PRIOR TO COMMENCEMENT OF CONSTRUCTION. ANY DISCREPANCIES WHICH ARISE BEFORE AND DURING CONSTRUCTION SHALL BE CONVEYED TO THE OFFICERS OF D. C. GOHN ASSOCIATES, INC. AND NO CONSTRUCTION SHALL COMMENCE OR CONTINUE UNTIL THE DISCREPANCY IS VERIFIED AND REMEDIED. D. C. GOHN ASSOCIATES, INC. WILL ASSUME NO RESPONSIBILITY OR LIABILITY FOR THE CONTRACTOR'S FAILURE TO PERFORM THE ABOVE.
4. THE CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS FORM THE LOCAL MUNICIPALITY, COUNTY, STATE, ETC. AS REQUIRED AND AS IT RELATES TO CONSTRUCTION ACTIVITY BEING UNDERTAKEN PRIOR TO COMMENCING CONSTRUCTION ON THE PROJECT SITE OR OFF-SITE AREAS.
5. ANY DISTURBANCE OF STEEP SLOPES SHALL BE COMPLETED IN ONE CONSTRUCTION SEASON, AND DISTURBED AREAS SHALL NOT BE LEFT BARE AND EXPOSED DURING THE WINTER AND SPRING THAW PERIODS. PERMANENT VEGETATIVE COVER SHALL BE PLANTED WITHIN THREE (3) DAYS AFTER COMPLETION OF GRADING.

MISCELLANEOUS NOTES:

1. THIS PLAN IS NOT TO BE CONSTRUED AS AN ENVIRONMENTAL AUDIT/ASSESSMENT PLAN. THIS PLAN MAKES NO WARRANTY OR GUARANTEE EITHER EXPRESSED OR IMPLIED AS TO THE ENVIRONMENTAL CONDITIONS OF THE PREMISES HEREON DESCRIBED, I.E. THE DETECTION OF SURFACE OR SUBSURFACE CONTAMINANTS AS DEFINED IN D.E.R. TITLE 25-PA CODES 71, 101, 271, 273, 275, 27, 279, 281, 283, AND 285.
2. CONTRACTOR IS TO TAKE ALL NECESSARY PRECAUTIONS TO PROTECT THE EXISTING UTILITIES AND MAINTAIN UNINTERRUPTED SERVICE AND ANY DAMAGE RESULTING FROM HIS NEGLIGENCE SHALL BE IMMEDIATELY AND COMPLETELY REPAIRED AT HIS EXPENSE.
3. CONTRACTOR IS TO BE RESPONSIBLE FOR ALL TRAFFIC CONTROL, TRENCH BARRICADING, COVERING, SHEETING, AND SHORING.
4. NO ONE SHALL SCALE FROM THESE PLANS.
5. CONTRACTOR SHALL COORDINATE UNDERGROUND ELECTRICAL AND OTHER UTILITY PROVIDERS FOR SERVICE AS APPLICABLE.
6. D. C. GOHN ASSOCIATES, INC. MAKES NO REPRESENTATION AS TO THE SUBSURFACE CONDITIONS OF THE PROJECT SITE AREA (I.E. THE EXISTENCE OR DEPTH OF ROCK, WATER TABLE, SOIL CONDITIONS, ETC.).

STORM DRAINAGE NOTES:

1. ALL SWALES, STORM WATER MANAGEMENT FACILITIES, AND FLOODPLAIN AREAS SHALL BE KEPT FREE OF STRUCTURES, FILL, AND OTHER ENCROACHMENTS.
2. NOTHING EXCEPT EROSION CONTROL AND/OR STORM WATER MANAGEMENT FACILITIES SHALL BE PLACED, PLANTED, OR PUT WITHIN THE AREA OF A STORM WATER MANAGEMENT EASEMENT. NOTHING SHALL BE PLACED, PLANTED, SET, OR PUT WITHIN THE AREA OF AN EASEMENT THAT WOULD ADVERSELY AFFECT THE FUNCTION OF THE EASEMENT OR CONFLICT WITH THE EASEMENT AGREEMENT.
3. ALL INLETS SHALL BE PENNDOT STANDARD INLET BOX WITH TYPE M OR TYPE C TOP UNIT AS SHOWN, UNLESS OTHERWISE SPECIFIED. THE GRATES SHALL BE PENNDOT STRUCTURAL STEEL, BICYCLE SAFE.
4. PROPOSED INLETS, EXCEPT THOSE IN GRASSED AREAS, ARE TO BE SUMPED 2" FROM FINISHED GRADE.
5. CONSTRUCTION OF STORM WATER MANAGEMENT AND EROSION CONTROL FACILITIES SHALL BE IN ACCORDANCE WITH MOUNT JOY BOROUGH STANDARDS AND SPECIFICATIONS.
6. ALL STORM SEWER PIPES, CULVERTS, MANHOLES, INLETS, END WALLS, AND ENDWALL SECTIONS SHALL BE CONSTRUCTED IN ACCORDANCE WITH PENNDOT PUBLICATION 408 AND 72M AND THE MUNICIPALITY'S STORM WATER MANAGEMENT ORDINANCE.
7. A MINIMUM OF ONE (1) FOOT OF COVER IS REQUIRED OVER ALL PIPES.
8. ALL STORM SEWER PIPES SHALL HAVE WATERTIGHT JOINTS.
9. THE MAINTENANCE OF ALL STORM WATER CONVEYANCE AND MANAGEMENT FACILITIES SHALL BE THE RESPONSIBILITY OF THE PROPERTY OWNER. MAINTENANCE SHALL INCLUDE, BUT NOT BE LIMITED TO, NORMAL MAINTENANCE AS WELL AS REPAIR OF STRUCTURAL DAMAGE OR DETERIORATION OF ANY KIND, INCLUDING THAT CAUSED BY SINKHOLES OR OTHER EVENTS. THE BOROUGH SHALL HAVE THE RIGHT, BUT NOT THE DUTY, OF ACCESS AT ANY TIME TO INSPECT AND MAINTAIN THE FACILITY AT THE PROPERTY OWNER'S EXPENSE IF THE OWNER SHOULD FAIL TO PROPERLY MAINTAIN THE FACILITY.
10. THE PROPOSED IMPERVIOUS AREA TO THE RAIN GARDEN IS 21,350 S.F.
11. INLETS, JUNCTION BOXES, OR MANHOLES GREATER THAN 5 FEET IN DEPTH SHALL BE EQUIPPED WITH NON-ALUMINUM LADDER RUNGS.
12. THE BOROUGH SHALL HAVE THE RIGHT OF ENTRY FOR THE PURPOSES OF INSPECTING ALL STORMWATER CONVEYANCE, TREATMENT, OR STORAGE FACILITIES.
13. THE LIMIT OF DISTURBANCE IS 0.94 ACRES OR 40,825 SQUARE FEET.

THE FOLLOWING NOTES WERE TAKEN FROM THE STORMWATER INFILTRATION SUMMARY REPORT PREPARED BY KLEINFELDER:

1. SURFACE WATER IS NOT RECOMMENDED TO COLLECT OR POOL IN LOW LYING AREAS OF THE SITE FOR EXTENDED PERIODS OF TIME AND SHOULD BE DIRECTED TO APPROPRIATE STORM WATER CHANNELS. EXPEDITIOUS BACKFILLING OR GRADING OF LOW-LYING AREAS WILL ALSO HELP MINIMIZE THE POTENTIAL DEVELOPMENT OF SINKHOLES.
2. THE EXTENT OF EXCAVATIONS SHOULD BE KEPT TO A MINIMUM AND THE INFLUX OF SURFACE WATER INTO EXCAVATIONS SHOULD BE MINIMIZED. THE POTENTIAL FOR SINKHOLE DEVELOPMENT GENERALLY INCREASES AS THE BEDROCK SURFACE IS ENCOUNTERED. THEREFORE, THE PROLONGED EXPOSURE OF THE BEDROCK SURFACE SHOULD ALSO BE MINIMIZED.
3. STORM SEWER CONVEYANCE LINES SHOULD BE CONSTRUCTED AS "WATER-TIGHT" JOINTS.
4. POSITIVE DRAINAGE AWAY FROM STRUCTURES SHOULD ALWAYS BE MAINTAINED. ROOF DRAINS SHOULD ALSO BE DIRECTED AWAY FROM STRUCTURES AND INTO DESIGNATED STORMWATER CHANNELS.
5. UNPAVED AREAS, SWALES OR SURFACE BASINS SHOULD BE MINIMIZED ADJACENT TO BUILDING/FOUNDATION AREAS. DESIGNING/INSTALLING SUBSURFACE STORMWATER INFILTRATION FACILITIES IN PROPOSED PARKING AREAS IS CONSIDERED A RISK IN AREAS UNDERLAIN BY CARBONATE GEOLOGY.

THE ABOVE RECOMMENDATIONS CONSTITUTE BEST MANAGEMENT PRACTICES FOR CONSTRUCTION AND DEVELOPMENT IN KARST SETTINGS. CONTINGENCIES SHOULD BE MADE IN THE CONSTRUCTION SCHEDULE AND BUDGET FOR THE REPAIR OF SINKHOLES AND UNSTABLE SOIL CONDITIONS ENCOUNTERED DURING DEVELOPMENT OF THE SITE.
SINKHOLES MAY OCCUR DURING CONSTRUCTION, AND SPECIFICALLY DURING AND SHORTLY FOLLOWING MASS GRADING OF THE PROJECT SITE. ALL SINKHOLES AND UNSTABLE SOIL CONDITIONS SHOULD BE REVIEWED BY THE GEOTECHNICAL ENGINEER OF RECORD. FOLLOWING REVIEW OF THE SPECIFIC CHARACTERISTICS AND LOCATIONS OF A GIVEN SINKHOLE FEATURE, A DETAILED REPAIR PROCEDURE SHOULD BE DEVELOPED AND IMPLEMENTED.

STRUCTURAL AREAS (AREAS ADJACENT TO STRUCTURES/BENEATH PAVEMENT)

1. ANY AND ALL LOOSE AND/OR EXCESSIVELY MOIST SOILS WITHIN THE SINKHOLE SHOULD BE EXCAVATED AND CONTINUE UNTIL STABLE SOILS, A "THROAT" IS IDENTIFIED, OR UNTIL THE EXTENT OF THE EXCAVATION EQUIPMENT IS REACHED.
2. UPON REMOVAL OF THE UNSTABLE SOILS, THE EXCAVATION SHOULD BE BACKFILLED USING HIGH MOBILITY, LOW STRENGTH FLOWABLE FILL (500 PSI) TO FINAL SUBGRADE ELEVATION; HOWEVER, UTILITIES SHOULD NOT BE ENCASED WITH FLOWABLE FILL.
3. DEPENDENT ON SPECIFIC CONDITIONS, SPECIALTY MITIGATIONS MAY BE WARRANTED, SUCH AS GROUND MODIFICATION (I.E., KARST GROUTING).

NON-STRUCTURAL AREAS (NON-PAVEMENT/LANDSCAPED AREAS)

1. ANY AND ALL LOOSE AND/OR EXCESSIVELY MOIST SOILS SHOULD BE EXCAVATED FROM THE SINKHOLE. EXCAVATION SHOULD CONTINUE UNTIL STABLE SOILS, A "THROAT" IS IDENTIFIED, OR UNTIL THE EXTENT OF THE EXCAVATION EQUIPMENT IS REACHED.
2. THE EXCAVATION SHOULD BE BACKFILLED WITH AGGREGATE OF DECREASING SIZE, COMMONLY REFERRED TO AS AN INVERTED FILTER.

THE REPAIRS OUTLINED ABOVE ARE GENERAL GUIDELINES AND EACH SINKHOLE OCCURRENCE SHOULD BE THOROUGHLY REVIEWED BY THE GEOTECHNICAL ENGINEER OF RECORD FOR AN APPROPRIATE MITIGATION PLAN.

SANITARY SEWER NOTES:

1. THE SANITARY SEWER CONNECTION SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE RULES, REGULATIONS, AND SPECIFICATIONS OF MOUNT JOY BOROUGH AUTHORITY.
2. SEWER CLEANOUTS MAY BE REQUIRED BY THE AUTHORITY AT HORIZONTAL BENDS DEPENDING ON THE FIELD LOCATION OF THE INSPECTION TEE AT THE RIGHT-OF-WAY. ANY CLEANOUTS AND THE TRAP SHOULD BE LOCATED IN GRASS AREAS OR APPROPRIATE PROTECTION SHALL BE PROVIDED FOR EXPOSED PVC FITTINGS.
3. A 48 HOUR NOTICE SHALL BE PROVIDED TO THE AUTHORITY PRIOR TO CONSTRUCTION OF THE SEWER LATERAL.
4. A HORIZONTAL SEPARATION OF 10 FEET AND A VERTICAL SEPARATION OF AT LEAST 18 INCHES WILL BE MAINTAINED BETWEEN SANITARY SEWER FACILITIES AND OTHER UTILITIES. THE SANITARY SEWER FACILITIES SHALL BE BENEATH WATER FACILITIES AT CROSSINGS.
5. CLEANOUTS ARE REQUIRED ALONG THE SANITARY SEWER SERVICE AT ALL CHANGES OF DIRECTION AND AT A MAXIMUM SPACING OF 50 FEET.
6. IF SINKHOLES ARE ENCOUNTERED DURING THE INSTALLATION OF SANITARY SEWER OR WATER UTILITIES, THE AUTHORITY NEEDS TO BE NOTIFIED AND MITIGATION HAS TO BE PERFORMED UNDER THE DIRECTION OF A GEOLOGIST REGISTERED IN THE STATE OF PENNSYLVANIA.
7. IF ANY UNUSED SERVICE LATERALS ARE LOCATED DURING CONSTRUCTION THE OWNER IS RESPONSIBLE TO DISCONNECT THAT LATERAL AT THE MAIN.
8. HEAVY DUTY FRAMES AND COVERS ARE REQUIRED ON TYPICAL TRAPS AND CLEANOUTS PROPOSED WITHIN PAVED AREAS.
9. THE NEED FOR A "PRE-CONSTRUCTION" MEETING THAT MUST BE CONDUCTED PRIOR TO THE START OF CONSTRUCTION.
10. THE NEED FOR THE CONTRACTOR TO SUBMIT SHOP DRAWINGS FOR REVIEW AND APPROVAL PRIOR TO THE START OF CONSTRUCTION.
11. "AS-CONSTRUCTED" DOCUMENTS FOR BOTH THE SANITARY SEWER AND WATER SYSTEM IMPROVEMENTS ARE REQUIRED PRIOR TO THE RELEASE OF FINANCIAL SECURITY.

WATER SERVICE NOTES:

1. ALL WATER LINE CROSSINGS SHALL HAVE 18" MINIMUM VERTICAL CLEARANCE BETWEEN PIPES. ALL CROSSINGS WHICH HAVE LESS THAN 18" CLEARANCE SHALL BE CONCRETE ENCASED. A 10' HORIZONTAL SEPARATION SHALL BE MAINTAINED BETWEEN ANY UTILITY LINE AND THE OUTSIDE WALL OF ALL MANHOLES AND INLETS. WHEN WATER LINE CROSSES SANITARY SEWER, ENCASE THE SANITARY SEWER. WHEN WATER LINE CROSSES STORM SEWER, ENCASE THE WATER LINE.
2. A MINIMUM OF 4' OF COVER IS REQUIRED OVER ALL WATER LINES.
3. THE CONTRACTOR IS RESPONSIBLE FOR ALL TESTING AND "RECORD DRAWINGS" PER MOUNT JOY BOROUGH AUTHORITY REQUIREMENTS.
4. 95% FILL COMPACTION IS REQUIRED FOR ALL WATER DISTRIBUTION FACILITIES LOCATED IN FILL MATERIAL.
5. WATER SERVICE LATERALS SHALL BE INSTALLED A MINIMUM OF 5 FEET OUTSIDE OF RIGHT-OF-WAY LINE. IF OTHER UTILITIES EXIST OR ARE TO BE PLACED ALONG THE RIGHT-OF-WAY, INSTALL WATER SERVICE LATERAL A MINIMUM OF 5 FEET FROM THESE UTILITIES.
6. CONTRACTOR TO CONTACT MOUNT JOY BOROUGH AUTHORITY (717)-653-5938, THREE (3) DAYS PRIOR TO INSTALLING THE WATER SERVICE.
7. CORPORATION – COMPRESSION TYPE BY MUELLER OR FORD (SEE DETAIL)
8. SERVICE CONNECTION – TYPE CU OR PE LINES FOR DOMESTIC WATER SERVICE
9. CURB STOP (MUELLER OR FORD – SEE DETAIL)
10. CURB BOX BY B & T
11. GATE VALVES – AMERICAN FLOW CONTROL
12. ALL WATER SERVICE MATERIALS TO MEET THE CURRENT MOUNT JOY BOROUGH AUTHORITY SPECIFICATIONS FOR MATERIALS.
13. PROVIDE MECHANICAL JOINTS AS REQUIRED ACCORDING TO MOUNT JOY BOROUGH AUTHORITY STANDARD SPECIFICATIONS.
14. IF SINKHOLES ARE ENCOUNTERED DURING THE INSTALLATION OF SANITARY SEWER OR WATER UTILITIES, THE AUTHORITY NEEDS TO BE NOTIFIED AND MITIGATION HAS TO BE PERFORMED UNDER THE DIRECTION OF A GEOLOGIST REGISTERED IN THE STATE OF PENNSYLVANIA.
15. THE NEED FOR A "PRE-CONSTRUCTION" MEETING MUST BE CONDUCTED PRIOR TO THE START OF CONSTRUCTION.
16. THE NEED FOR THE CONTRACTOR TO SUBMIT SHOP DRAWINGS FOR REVIEW AND APPROVAL PRIOR TO THE START OF CONSTRUCTION.
17. "AS-CONSTRUCTED" DOCUMENTS FOR BOTH THE SANITARY SEWER AND WATER SYSTEM IMPROVEMENTS ARE REQUIRED PRIOR TO THE RELEASE OF FINANCIAL SECURITY.
18. THE AUTHORITY APPROVES A ONE (1) DAY SHUTDOWN TO REMOVE THE EXISTING 2" SERVICE SADDLE AND CORPORATION STOP AND INSTALLING THE NEW 8" x 8" TEE FOR THE NEW WATER SERVICE LATERAL ALONG WITH CUTTING OUT THE EXISTING 8" TEE AND SLEEVING A NEW PIECE OF 8" PIPE IN ITS PLACE.

SCHEDULE OF INSPECTIONS:

THE ENFORCEMENT OFFICER SHALL INSPECT ALL PHASES OF THE REGULATED ACTIVITY, INCLUDING BUT NOT LIMITED TO THE FOLLOWING PHASES:

1. THE COMPLETION OF PRELIMINARY SITE PREPARATION, INCLUDING STRIPPING OF VEGETATION, STOCKPILING OF TOPSOIL AND CONSTRUCTION OF TEMPORARY STORMWATER MANAGEMENT FACILITIES.
2. THE COMPLETION OF ROUGH GRADING, BUT PRIOR TO PLACEMENT OF TOPSOIL, PERMANENT DRAINAGE OR OTHER SITE DEVELOPMENT IMPROVEMENTS AND GROUND COVERS.
3. DURING THE CONSTRUCTION OF THE PERMANENT STORMWATER MANAGEMENT FACILITIES AT SUCH TIMES AS SPECIFIED BY THE ENFORCEMENT OFFICER. THIS INCLUDES INSPECTION FOR SUBGRADE PRIOR TO STONE AND PIPE PLACEMENT.
4. THE COMPLETION OF PERMANENT STORMWATER MANAGEMENT FACILITIES, INCLUDING ESTABLISHMENT OF GROUND COVERS AND PLANTINGS.
5. THE COMPLETION OF ANY FINAL GRADING, VEGETATIVE CONTROL MEASURES OR OTHER SITE RESTORATION WORK DONE IN ACCORDANCE WITH THE PERMIT.
6. DESCRIPTION OF MAINTENANCE REQUIREMENTS, INCLUDING, BUT NOT LIMITED TO, THE FOLLOWING:
   a. REGULAR INSPECTION OF THE SWM FACILITIES, TO ASSURE PROPER IMPLEMENTATION OF BMPS, MAINTENANCE AND CARE SWM BMPS SHOULD BE INSPECTED BY A QUALIFIED PERSON WHICH MAY INCLUDE THE LANDOWNER, OR THE OWNER'S DESIGNEE (INCLUDING WEST DONEGAL BOROUGH FOR DEDICATED AND OWNED FACILITIES), ACCORDING TO THE FOLLOWING MINIMUM FREQUENCIES:
   i. ANNUALLY FOR THE FIRST 5 YEARS
   ii. ONCE EVERY 3 YEARS THEREAFTER.
   iii. DURING OR IMMEDIATELY AFTER THE CESSATION OF A 10-YEAR OR GREATER STORM.
   iv. AS SPECIFIED IN THE OPERATION AND MAINTENANCE AGREEMENT.
   b. ALL PIPES, SWALES AND DETENTION FACILITIES SHALL BE KEPT FREE OF ANY DEBRIS OR OTHER OBSTRUCTION AND IN ORIGINAL DESIGN CONDITION.
   c. REMOVAL OF SILT FROM ALL PERMANENT STRUCTURES WHICH TRAP SILT OR SEDIMENT IN ORDER TO KEEP THE MATERIAL FROM BUILDING UP IN GRASS WATERWAYS, PIPES, DETENTION OR RETENTION BASINS, INFILTRATION STRUCTURES, OR BMPS, AND THUS REDUCING THEIR CAPACITY TO CONVEY OR STORE WATER.
   d. RE-ESTABLISHMENT OF VEGETATION OF SCOURED AREAS OR AREAS WHERE VEGETATION HAS NOT BEEN SUCCESSFULLY ESTABLISHED. SELECTION OF SEED MIXTURES SHALL BE SUBJECT TO APPROVAL OF THE BOROUGH.

NO WORK SHALL BEGIN ON A SUBSEQUENT PHASE (AS IDENTIFIED IN SUBSECTION A) UNTIL THE PRECEDING PHASE HAS BEEN INSPECTED AND APPROVAL HAS BEEN NOTED ON THE PERMIT.

IN ORDER TO AVOID DELAYS FOR INSPECTIONS, IT IS THE RESPONSIBILITY OF THE DEVELOPER TO NOTIFY THE ENFORCEMENT OFFICER 48 HOURS IN ADVANCE OF THE COMPLETION OF EACH IDENTIFIED PHASE OF DEVELOPMENT

ANY PORTION OF THE WORK WHICH DOES NOT COMPLY WITH THE APPROVED PLAN MUST BE CORRECTED BY THE DEVELOPER. NO WORK MAY PROCEED ON ANY SUBSEQUENT PHASE UNTIL THE REQUIRED CORRECTIONS HAVE BEEN MADE.

AS BUILT RECORDS:

A. UPON COMPLETION OF THE PLAN IMPROVEMENTS AND PRIOR TO THE RELEASE OF FINANCIAL SECURITY, THE APPLICANT SHALL SUBMIT AS-BUILT PLAN TO THE BOROUGH. THE AS-BUILT PLAN MUST SHOW THE FINAL DESIGN SPECIFICATIONS FOR ALL STORMWATER MANAGEMENT FACILITIES AND BE SEALED BE A REGISTERED PROFESSIONAL ENGINEER.

B. REVIEW BY BOROUGH ENGINEER.

(1) THE AS-BUILT PLAN SHALL BE REVIEWED BY THE BOROUGH ENGINEER TO VERIFY THE PLAN INCLUDES ALL OF THE STORMWATER MANAGEMENT FACILITIES ON THE SUBJECT PROPERTY AND THE FACILITIES ARE SHOWN AT THE CORRECT LOCATION.

(2) THE BOROUGH ENGINEER SHALL EITHER APPROVE THE AS-BUILT PLAN OR IDENTIFY CORRECTIONS REQUIRED.

(3) IF THE BOROUGH ENGINEER IDENTIFIES CORRECTIONS REQUIRED TO THE AS-BUILT PLAN, THE APPLICANT SHALL SUBMIT A REVISED AS-BUILT PLAN TO THE BOROUGH ADDRESSING THE CORRECTIONS.

C. FOLLOWING APPROVAL OF THE AS-BUILT PLAN BY THE BOROUGH ENGINEER, THE APPLICANT SHALL SUBMIT THE SWM SITE PLAN FOR RECORDATION IN THE OFFICE OF THE RECORDER OF DEEDS.

D. DIGITAL INVENTORY.

(1) WHEN REQUIRED, A DIGITAL INVENTORY SHALL BE SUBMITTED FOLLOWING APPROVAL OF THE AS-BUILT PLAN BY THE BOROUGH ENGINEER IF THE PROJECT INCLUDES ANY OF THE FOLLOWING:
(a) SWM FACILITIES WHICH ARE OFFERED FOR DEDICATION TO THE BOROUGH.
(b) SWM FACILITIES WHICH CONNECT TO OR ALTER ANY PORTION OF THE BOROUGH'S MS4.
(c) BMPS INCLUDED ON A NPDES PERMIT FOR WHICH THE BOROUGH IS REQUIRED TO KEEP AN INVENTORY UNDER THE BOROUGH'S MS4 PERMIT.
(2) DIGITAL INVENTORY REQUIREMENTS.
(a) THE DIGITAL INVENTORY SHALL BE IN AN ELECTRONIC FORMAT ACCEPTABLE TO THE BOROUGH ENGINEER.
(b) THE DIGITAL INVENTORY SHALL INCLUDE ALL INFORMATION INCLUDED AND SHOWN ON THE APPROVED AS-BUILT PLAN.
(c) ALL COORDINATES AS DEPICTED ON THE PLAN SHALL BE BASED ON THE PA SOUTH ZONE STATE PLAN COORDINATE SYSTEM (NAD83 FRO HORIZONTAL AND NAVD88 FOR VERTICAL).

BMP ID.	INSPECTION FREQUENCY	OPERATION AND MAINTENANCE PROCEDURE
RAIN GARDEN	BI-ANNUALLY	• TO ASSURE PROPER OPERATION AND STRUCTURAL STABILITY, THE OWNER SHALL INSPECT THE RAIN GARDENS AT LEAST ONCE EACH APRIL, AT LEAST ONCE EACH OCTOBER, AND WITHIN 48 HOURS AFTER EVERY RAINFALL EVENT EXCEEDING 1 INCH OF PRECIPITATION IN 24 HOURS. • INSPECT FOR EROSION PROBLEMS, VEGETATION DAMAGE, SEDIMENT AND DEBRIS ACCUMULATION, AND LITTER. • REMOVE ACCUMULATIONS OF SEDIMENT >3 INCHES IN DEPTH AND IMMEDIATELY STABILIZE DISTURBED AREAS. • REMOVE SEDIMENT DURING PERIODS WHEN RUTTING WILL BE MINIMAL. • PRUNE VEGETATION AND WEED GARDENS TO ENSURE SAFETY, AESTHETICS, PROPER OPERATION, WEED AND INVASIVE/NOXIOUS VEGETATION SUPPRESSION. • REMOVE INVASIVE/NOXIOUS PLANTS AND IMMEDIATELY STABILIZE DISTURBED AREAS. • REMOVE LITTER, DEBRIS, AND DETRITUS.
ENDWALL	BI-ANNUALLY (TWICE A YEAR; ONCE IN APRIL AND ONCE IN OCTOBER)	• ENDWALL SHALL BE INSPECTED AND CLEANED AT LEAST TWO TIMES A YEAR OR AS CONDITIONS WARRANT. THE VEGETATION AROUND THE FLARED END SECTION SHALL BE MAINTAINED IN A GOOD CONDITION, AND ANY BARE SPOTS REVEGETATED AS SOON AS POSSIBLE.
RIP-RAP APRON	BI-ANNUALLY (TWICE A YEAR; ONCE IN APRIL AND ONCE IN OCTOBER)	• RIP-RAP APRONS SHALL BE INSPECTED AND CLEANED AT LEAST TWO TIMES A YEAR OR AS CONDITIONS WARRANT. THE VEGETATION AROUND THE RIP-RAP APRONS SHALL BE MAINTAINED IN A GOOD CONDITION, AND ANY BARE SPOTS REVEGETATED AS SOON AS POSSIBLE. DISPLACED RIPRAP WITHIN THE APRON SHALL BE REPLACED IMMEDIATELY.

NOTES:

SEED AND SOIL AMENDMENTS SHALL BE APPLIED ACCORDING TO THE RATES IN THE PLAN DRAWINGS PRIOR TO INSTALLING THE BLANKET.

PROVIDE ANCHOR TRENCH AT TOE OF SLOPE IN SIMILAR FASHION AS AT TOP OF SLOPE.

SLOPE SURFACE SHALL BE FREE OF ROCKS, CLODS, STICKS, AND GRASS.

BLANKET SHALL HAVE GOOD CONTINUOUS CONTACT WITH UNDERLYING SOIL THROUGHOUT ENTIRE LENGTH. LAY BLANKET LOOSELY AND STAKE OR STAPLE TO MAINTAIN DIRECT CONTACT WITH SOIL. DO NOT STRETCH BLANKET.

THE BLANKET SHALL BE STAPLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS.

BLANKETED AREAS SHALL BE INSPECTED WEEKLY AND AFTER EACH RUNOFF EVENT UNTIL PERENNIAL VEGETATION IS ESTABLISHED TO A MINIMUM UNIFORM 70% COVERAGE THROUGHOUT THE BLANKETED AREA. DAMAGED OR DISPLACED BLANKETS SHALL BE RESTORED OR REPLACED WITHIN 4 CALENDAR DAYS.

SLOPE MATTING INSTALLATION DETAIL

STORM WATER MANAGEMENT FACILITIES (ERNST 181 SEED MIX)

SITE PREPARATION NOTES:

1. INVASIVE SPECIES, PARTICULARLY THOSE THAT WILL ADAPT TO WET CONDITIONS, SHOULD BE REMOVED OR SPRAYED BEFORE THEY BECOME INCORPORATED INTO THE SITE. NORMAL VEGETATION CAN BE WORKED INTO THE TOPSOIL, WHICH SHOULD BE STOCKPILED UNTIL THE FINAL GRADE HAS BEEN ESTABLISHED.
2. WITH THE ENGINEER'S SPECIFICATIONS AND DIMENSIONS IN HAND, ON-SITE CONSTRUCTION OF THE BERM AND OUTLETS MUST BE EXECUTED CAREFULLY IN ORDER TO MAINTAIN STRUCTURAL INTEGRITY. THE PLANT GROWTH AREAS SHOULD BE LOOSE AND FRIABLE, HIGH IN ORGANIC MATTER, AND COMPLETED WITHOUT COMPACTIONS FROM HEAVY EQUIPMENT. BY USING THE "DIG AND DROP" METHOD, ONE CAN USE AN EXCAVATOR TO DIG AND FROM EACH AREA OF THE BOTTOM SOIL IN A LOOSE MANNER. AT THIS POINT, ONE CAN INCORPORATE LIME, COMPOSTED LEAVES, AND/OR GRASS CLIPPINGS. THE EXCAVATION MACHINE DOES NOT MOVE OVER THE FINISHED SURFACE, THUS AVOIDING UNNECESSARY COMPACTION. NATIVE VEGETATION CAN BE PLANTED OR SEEDED OVER THIS UNEVEN, ABSORBENT SURFACE.

SEEDING AND PLANTING METHODS NOTES:

1. SEEDING AND PLANTING SHOULD BEGIN IMMEDIATELY UPON COMPLETION OF THE STRUCTURE WHEN THE SOIL IS STILL FRIABLE AND BEFORE INVASIVE WEEDS EMERGE. PLAN SEEDING AND PLANTING BEFORE THE BASIN IS FLOODED, OR ALLOW THE BASIN TO DRAIN TO A FEW INCHES BEFORE SEEDING. BROADCAST SEED EVENLY OVER EACH UNIT BY HAND SEEDING OR HYDROSEEDING. SEEDING RATES ARE GENERALLY LOW (1/2 LB PER 1,000 SQ FT). THE USE OF A SEED FILLER; I.E. PAM-12, CAN BE USED TO CREATE A MIX OF 10 LB PER 1,000 SQ FT (I.E. 9-1/2 LB OF PAM-12 MIXED WITH ½ LB OF SEED), WHICH CAN BE BROADCAST EVENLY OVER THE AREA. BARLEY, OATS, OR RYE CAN PROVIDE TEMPORARY VEGETATION TO PROTECT THE SOIL IN STORM WATER MANAGEMENT FACILITIES UNTIL PERMANENT VEGETATION CAN BE ESTABLISHED. THE USE OF NATIVE SPECIES; I. E. VIRGINIA WILD RYE, CAN CREATE AN INTERMEDIATE VEGETATIVE COVE THAT SUCCEEDS TO NATIVE LONG-TERM VEGETATION. STRAW MULCH OR STRAW COCONUT MATS ARE FREQUENTLY USED TO CONTROL EROSION AND PROTECT EMERGING SEEDLINGS FROM EXTREME TEMPERATURES AND DRYING OUT. MULCH SHOULD BE SPARSE TO ALLOW SUNLIGHT TO REACH THE GROUND.
2. TRANSPLANTED SEEDLINGS AND SHRUBS NEED TEMPORARY WATER UNTIL THEY BECOME WELL ROOTED. IRRIGATION OF SEEDED AREAS IS OF VALUE UNTIL SEEDLINGS BECOME ESTABLISHED.

GENERAL MAINTENANCE NOTES:

1. IN ADDITION TO STRUCTURAL MAINTENANCE, SILTATION NEEDS TO BE REMOVED AS NEEDED. PLANTS NEED TO BE TRIMMED BACK TO MAINTAIN AESTHETIC VALUE AND INVASIVE SPECIES NEED TO BE CONTROLLED. CLOSE MOWING OR EXTENSIVE CHEMICAL USE IS NOT CONDUCIVE TO WATER QUALITY IMPROVEMENT OR WILDLIFE HABITAT.

ERNST CONSERVATION SEEDS

ERNST SEED MIX NOTES
NOT TO SCALE

RAIN GARDEN CONSTRUCTION NOTES:

1. LIMIT COMPACTION OVER THE RAIN GARDEN AREA.
2. EXCAVATE THE RAIN GARDEN TO THE SUBGRADE ELEVATION OF 373.00. EXCAVATION OF THE RAIN GARDEN SHALL BE DONE WITH EQUIPMENT OUTSIDE OF THE RAIN GARDEN TO THE EXTENT PRACTICAL.
3. IF A LIMITING ZONE OF ROCK OR FILL MATERIAL IS ENCOUNTERED WITHIN THE 24" DEPTH, REFER TO THE NOTES AS FOLLOWS:
   - IN THE EVENT THAT ROCK OR FILL MATERIAL ARE ENCOUNTERED DURING CONSTRUCTION OF THE STORMWATER MANAGEMENT FACILITIES, THEY SHOULD BE OVER-EXCAVATED TO A DEPTH OF 2 FEET BELOW THE PROPOSED BOTTOM ELEVATION AND THE RESULTING EXCAVATION SHOULD BE BROUGHT BACK UP TO PROPOSED GRADES WITH AN AMENDED SOIL MIXTURE.
   - CONTRACTOR TO EXCAVATE THE ROCK OR FILL MATERIAL TO A MAXIMUM DEPTH OF 24" BELOW THE EXPOSED SUBGRADE. EXCAVATION OF THE ROCK OR FILL SHALL BE FROM OUTSIDE OF THE RAIN GARDEN TO THE EXTENT PRACTICAL.
   - CARE SHALL BE TAKEN TO MINIMIZE EXCESSIVE ROCK DISTURBANCE OR FILL MATERIAL TO THE EXTENT PRACTICAL. ALL LOOSE ROCK SHALL BE REMOVED FROM AREAS PRIOR TO BACKFILLING. IF THERE ARE AREAS OF VOIDS, FRACTURES, SOFT OR WET SOILS, POTENTIAL SINKHOLE AREAS OR OTHER CONDITIONS OF CONCERN, THE AREAS SHALL BE PROPERLY MITIGATED BASED ON THE RECOMMENDATIONS OF THE GEOTECHNICAL ENGINEER. NO BLASTING IS PERMITTED.
4. UPON PERMANENT CONVERSION OF THE RAIN GARDEN, SCARIFY BOTTOM OF RAIN GARDEN IN THE AREA OF THE AMENDED SOILS A MINIMUM 12" BELOW PROPOSED SUBGRADE ELEVATION OF 373.00. SCARIFICATION OF THE RAIN GARDEN SHOULD BE DONE WITH EQUIPMENT OUTSIDE OF THE RAIN GARDEN TO THE EXTENT PRACTICAL.
5. INSTALL AMENDED SOIL IN 6-INCH MAXIMUM LIFTS AND LIGHTLY COMPACT (TAMP WITH BACKHOE BUCKET OR BY HAND). KEEP EQUIPMENT MOVEMENT OVER AMENDED SOIL TO A MINIMUM AND DO NOT OVERCOMPACT. PLANT ERNST SEED MIX AS NOTED ON THE PLANS PER MANUFACTURER'S SPECIFICATIONS. REFER TO THE FINAL GRADING / PCSM PLAN FOR THE LOCATION AND EXTENT OF THE AMENDED SOIL AREA AND SEED MIX.

GENERAL RAIN GARDEN NOTES:

1. THE AMENDED SOIL SHALL BE A UNIFORM MIXTURE CONSISTING OF 20% SAND, 60% TOPSOIL, AND 20% COMPOST. THE COMPOST SHALL BE APPROVED LANDSCAPING COMPOST COMPRISED OF NATURAL MATERIALS AND WITH AN ORGANIC MATTER CONTENT OF 35% TO 65% AS DETERMINED BY THE LOSS ON IGNITION METHOD. THE TOPSOIL SHALL BE FRIABLE LOAMY SOIL AS CLASSIFIED BY THE USDA, FREE OF WEEDS, HERBICIDES, PETROLEUM-BASED MATERIALS, ANY OTHER DELETERIOUS MATERIALS, ROCKS, AND DEBRIS. THE TOPSOIL SHALL HAVE A PH OF BETWEEN 5.5 AND 8.0. 100% OF THE TOPSOIL SHALL PASS THROUGH A 3/4" SCREEN.
2. IN THE EVENT THAT GROUNDWATER IS ENCOUNTERED DURING CONSTRUCTION, CONTRACTOR TO CONTACT GEOTECHNICAL ENGINEER AND DC GOHN PRIOR TO PROCEEDING WITH CONSTRUCTION. A REVISED BMP DESIGN WILL NEED TO BE REVIEWED BY THE TOWNSHIP PRIOR TO COMPLETING CONSTRUCTION OF THE BMP.

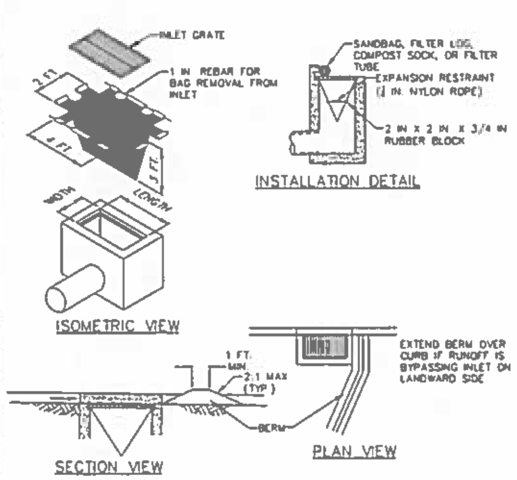
PCSM DETAILS
FOR
GATESBURG ROAD DEVELOPMENT
GERBERICH PAYNE SHOE COMPANY
MOUNT JOY BOROUGH
LANCASTER COUNTY, PENNSYLVANIA

DRAWING #: CG-3049
SHEET #: 9 OF 12

CONSTRUCTION SEQUENCE

1. The Contractor shall contact and invite the Owner, Borough Officials, the Erosion and Sediment Control Plan Preparer, and the Lancaster County Conservation District at least seven days prior to any earth disturbance activity to set an on site pre-construction meeting.
2. The Contractor shall call the PA One Call System Incorporated at least seven days prior to the start of construction. PA One Call System Incorporated #1-800-242-1776.
3. The Contractor is responsible for the construction and implementation of an Erosion and Sediment Control Plan for the site, as well as areas associated with materials removed from this project.
4. The Contractor shall assure that an Erosion and Sediment Control Plan has been prepared and approved by the Lancaster County Conservation District.
5. Before initiating any revisions to the approved Erosion and Sediment Control Plan or revisions to other plans, which may affect the effectiveness of the approved Plan, the Contractor must receive approval of the revisions from the Lancaster County Conservation District.
6. All earth disturbance activities shall proceed in accordance with the following sequence. Each stage shall be completed before any following stage is initiated. Clearing and grubbing shall be limited to only those areas described in each stage.
7. Erosion and sediment control devices/BMPs must be constructed, stabilized, and functional before site disturbance begins within the tributary areas of the devices. Only limited disturbance shall be permitted to provide access to install those devices.
8. Clearly mark all limits of disturbance using white flags or another appropriate method in the grass areas and white spray paint or another appropriate method for the areas of the existing impervious areas.
9. Install orange construction fence.
10. Install filtersoxx.
11. Install rock construction entrance.
12. Strip topsoil.
13. Remove existing pavement and gravel to be removed.
14. Grade the site with the exception of the proposed rain garden. Install erosion control blankets on all slopes 3:1 or greater.
15. Install site utilities and storm sewer and inlet protection. Contractor to repair, reset, or replace Filtersoxx 1 during water/sewer utility line installations.
16. Install stone base course for access drives and parking lots.
17. Install wearing course for access drives and parking lots.
18. Upon final site stabilization, minimum uniform 70% perennial vegetative ground cover, contact the Lancaster County Conservation District, and remove the temporary erosion and sediment control devices/BMP's with their approval. Permanent erosion and sediment control devices/BMP's shall be thoroughly cleaned of latent sediment, including the storm sewer system. Any areas disturbed during the removal and/or cleaning of the devices/BMP's shall be redressed and stabilized immediately. Install the rain garden, amended soils, and low maintenance grass seed mix. Minimize compaction in the area of the rain garden.
19. Upon conservation district approval and only during dry periods, cut open filter socks and distribute material.
20. Contact the Lancaster County Conservation District for a final site inspection.



NOTES:

MAXIMUM DRAINAGE AREA = 1/2 ACRE.

INLET PROTECTION SHALL NOT BE REQUIRED FOR INLET TRIBUTARY TO SEDIMENT BASIN OR TRAP. BERMS SHALL BE REQUIRED FOR ALL INSTALLATIONS.

ROLLED EARTHEN BERM SHALL BE MAINTAINED UNTIL ROADWAY IS STONED. ROAD SUBBASE BERM SHALL BE MAINTAINED UNTIL ROADWAY IS PAVED. SIX INCH MINIMUM HEIGHT ASPHALT BERM SHALL BE MAINTAINED UNTIL ROADWAY SURFACE RECEIVES FINAL COAT.
AT A MINIMUM, THE FABRIC SHALL HAVE A MINIMUM GRAB TENSILE STRENGTH OF 120 LBS, A MINIMUM BURST STRENGTH OF 200 PSI, AND A MINIMUM TRAPEZOIDAL TEAR STRENGTH OF 50 LBS. FILTER BAGS SHALL BE CAPABLE OF TRAPPING ALL PARTICLES NOT PASSING A NO. 40 SIEVE.

INLET FILTER BAGS SHALL BE INSPECTED ON A WEEKLY BASIS AND AFTER EACH RUNOFF EVENT. BAGS SHALL BE EMPTIED AND RINSED OR REPLACED WHEN HALF FULL OR WHEN FLOW CAPACITY HAS BEEN REDUCED SO AS TO CAUSE FLOODING OR BYPASSING OF THE INLET. DAMAGED OR CLOGGED BAGS SHALL BE REPLACED. A SUPPLY SHALL BE MAINTAINED ON SITE FOR REPLACEMENT OF BAGS. ALL NEEDED REPAIRS SHALL BE INITIATED IMMEDIATELY AFTER THE INSPECTION. DISPOSE OF ACCUMULATED SEDIMENT AS WELL AS ALL USED BAGS ACCORDING TO THE PLAN NOTES.

DO NOT USE ON MAJOR PAVED ROADWAYS WHERE PONDING MAY CAUSE TRAFFIC HAZARDS.

FILTER BAG INLET PROTECTION – TYPE C INLET
NOT TO SCALE

EROSION AND SEDIMENT CONTROL PLANS

1. The Contractor shall assure that the approved Erosion and Sediment Control Plan is properly and completely implemented.
2. A copy of the approved Erosion and Sediment Control Plan must be made available at the site of the construction activity at all times.
3. The staging of earth disturbance activities and maintenance requirements obtained in the Erosion and Sediment Control Plan must be followed at all times.
4. Immediately upon discovering unforeseen circumstances posing the potential for accelerated erosion and/or sediment pollution, the Contractor shall implement appropriate erosion and sediment control devices or BMPs to eliminate the potential for accelerated erosion and/or sediment pollution.
5. All building materials and wastes must be removed from the site and recycled or disposed in accordance with the Department's Solid Waste Management Regulations at 25 PA Code 260.1 et seq., 271.1 et seq., and 287.1 et seq. No building material or wastes or unused building materials shall be buried, dumped, or discharged at the site.
6. All pumping of sediment laden water shall be through a sediment control BMP, such as a pumped water filter bag or equivalent sediment removal facility, over undisturbed vegetated areas.

PREPAREDNESS, PREVENTION, AND CONTINGENCY PLANS

If the potential exists for causing accidental pollution of air, land, or water, or for causing endangerment of public health and safety through accidental release of toxic, hazardous, or other polluting materials, the permittee or co-permittee must develop a Preparedness, Prevention, and Contingency (PPC) Plan. The PPC Plan shall be developed in accordance with Department regulations. The PPC Plan shall identify areas which may include, but are not limited to, waste management areas, raw material storage areas, temporary and permanent spoils storage areas, maintenance areas, and any other areas that my have the potential to cause non-compliance with the terms and conditions of this permit due to the storage, handling, or disposal of any toxic or hazardous substances such as oil, gasoline, pesticides, herbicides, solvents, etc. BMPs shall be developed and implemented for each identified area. The PPC Plan shall be maintained on site at all times and shall be made available for review at the Department's or County Conservation District's request.

PRE-CONSTRUCTION CONFERENCES

The permittee or co-permittee shall contact the reviewing entity at least seven days before construction is to begin to determine if a pre-construction conference is required. The permittee, co-permittee and others undertaking the earth disturbance activity must attend a pre-construction conference if requested by the reviewing entity.

SPOIL OR BORROW AREA

An Erosion and Sediment Control Plan, shall be prepared, developed, and implemented for all spoil and borrow areas, regardless of their location. The Plan must be developed when locations are known.

WETLAND PROTECTION

There are no wetlands on-site.

STABILIZATION OF STEEP SLOPES

All slopes greater than 3:1 are to be stabilized as:

Perennial Rye @ 25 lbs. per acre
Note: Lbs. per acre given is the pure live seed count.

Mulch shall be installed with mulch control netting or erosion control blankets on all slopes greater than 3:1.

MAINTENANCE PROGRAM

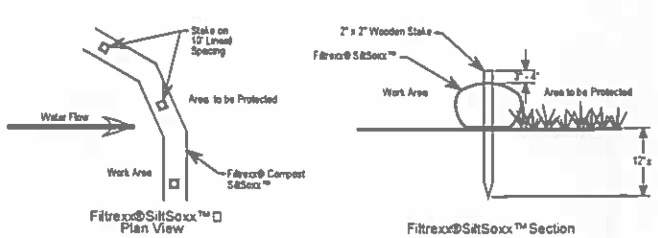
1. Until the site is stabilized, all erosion and sediment control BMP's must be maintained properly. Maintenance must include inspections of all erosion and sediment control BMP's after each runoff event and on a weekly basis. All preventive and remedial maintenance work, including cleaning out, repair, replacement, regrading, reseeding, remulching and renetting must be performed immediately. If erosion and sediment control BMP's fail to perform as expected, replacement BMP's, or modifications to those installed will be required.
2. The permittee and co-permittee must ensure that visual site inspections are conducted weekly., and after each measurable precipitation event by qualified personnel, trained and experienced in erosion and sediment control, to ascertain that the erosion and sediment control BMP's are operational and effective in preventing pollution to the Waters of the Commonwealth. A written report of each of the inspections shall be kept and include:
   - a summary of site conditions, E&S BMP's, and compliance, and;
   - the date, time, and the name of the person conduction the inspection.
3. Any sediment removed from BMP's during construction will be returned to upland areas on site and incorporated into the site grading.

STABILIZATION SPECIFICATIONS

1. Permanent stabilization is defined as "a minimum 70% perennial vegetative cover or other permanent non-vegetative cover with a density sufficient to resist accelerated surface erosion and subsurface characteristics sufficient to resist sliding and other movements."
2. Erosion control blankets should be used on all slopes 3:1 or steeper and where potential exists for sediment pollution to receiving surface waters. Erosion control blankets should be used for all seeded areas within 50 feet of a surface water – 100 feet of a special protection watershed – regardless of slope.
3. Immediately after earth disturbance activities cease, the operator shall stabilize the disturbed areas. During non-germinating periods, mulch must be applied at the specific rates. Disturbed areas which are not at finished grade and which will be re-disturbed within 1 year must be stabilized in accordance with the temporary vegetative stabilization specifications. Disturbed areas where earth disturbance activity has ceased for 4 or more days shall be temporarily stabilized. Disturbed areas which are at final grade or which will not be re-disturbed within 1 year must be stabilized in accordance with the permanent vegetative stabilization specifications.
4. Straw and hay mulch should be anchored immediately after application to prevent being windblown. A tractor-drawn implement may be used to "crimp" the straw or hay into the soil. This method is limited to slopes no steeper than 3:1. the machinery should be operated on the contour. (Note: Crimping of hay or straw by running over it with tracked machinery is not recommended). A wood cellulose fiber may be spread over the straw mulch at a rate of 1,500 lb./acre.
5. Tracking slopes is required by running tracked machinery up and down the slope, leaving tread marks parallel to the contour. (Note: If a bulldozer is used, the blade shall be up.) Care should be exercised on soils having a high clay content to avoid over compaction.
6. Topsoil must be placed a minimum of 6" on all disturbed areas to be re-vegetated.
7. If groundwater is encountered during construction, the contractor shall notify the conservation district and the site engineer.

ENVIRONMENTAL DUE DILIGENCE AND CLEAN FILL MATERIAL

1. Clean Fill is defined as: Uncontaminated, non-water soluble, non-decomposable, inert, solid material. The term includes soil, rock, stone, dredged material, used asphalt, and brick, block or concrete from construction and demolition activities that is separate from other waste and is recognizable as such. The term does not include materials placed in or on the waters of the commonwealth unless otherwise authorized. (The term "used asphalt" does not include milled asphalt or asphalt that has been processed for re-use.)
2. Investigative techniques, including, but not limited to, visual property inspections, electronic data base searches, review of property ownership, review of property use history, Sanborn maps, environmental questionnaires, transaction screens, analytical testing, environmental assessments or audits. Analytical testing is not a required part of due diligence unless visual inspection and/or review of the past land use of the property indicates that the fill may have been subjected to a spill or release of regulated substance. If the fill may have been affected by a spill or release of a regulated substance, it must be tested to determine if it qualifies as clean fill. Testing should be performed in accordance with Appendix A of the department's policy "Management of Fill."
3. Fill material that does not qualify as clean fill is regulated fill. Regulated fill is waste and must be managed in accordance with the department's municipal or residual waste regulations based on 25 Pa. Code Chapters 287 Residual Waste Management or 271 Municipal Waste Management, whichever is applicable.
4. All building materials and wastes shall be removed from the site and recycled or disposed of in accordance with the Department's solid waste management regulations at 25 PA. code 260.1 ET Seq. 271.1., AND 287.1 et Seq. NO building materials or wastes or unused building materials shall be burned, buried, dumped, or discharged at the site. It is anticipated that the project site will contain building waste such as excess building materials, concrete, cardboard, and other materials.



NOTES
COMPOST FILTER SOCK SHALL BE PLACED AT EXISTING LEVEL GRADE. BOTHE ENDS OF THE SOCK SHALL BE EXTENDED AT LEAST 8 FEET UP SLOPE AT 45 DEGREES TO THE MAIN SOCK ALIGNMENT. STAKES MAY BE INSTALLED IMMEDIATELY DOWNSLOPE OF THE SOCK IF SO SPECIFIED BY THE MANUFACTURER.

TRAFFIC SHALL NOT BE PERMITTED TO CROSS FILTER SOCKS.

ACCUMULATED SEDIMENT SHALL BE REMOVED WHEN IT REACHES HALF THE ABOVEGROUND HEIGHT OF THE SOCK AND DISPOSED IN THE MANNER DESCRIBED ELSEWHERE IN THE PLAN.

SOCKS SHALL BE INSPECTED WEEKLY AND AFTER EACH RUNOFF EVENT. DAMAGED SOCKS SHALL BE REPAIRED ACCORDING TO MANUFACTURER'S SPECIFICATIONS OR REPLACED WITHIN 24 HOURS OF INSPECTION.

BIODEGRADABLE FILTER SOCKS SHALL BE REPLACED AFTER 6 MONTHS; PHOTODEGRADABLE SOCKS AFTER 1 YEAR. POLYPROPYLENE SOCKS SHALL BE REPLACED ACCORDING TO MANUFACTURER'S RECOMMENDATIONS.

UPON STABILIZATION OF THE AREA TRIBUTARY TO THE SOCK, STAKES SHALL BE REMOVED. THE SOCK MAY BE LEFT IN PLACE AND VEGETATED OR REMOVED. IN THE LATTER CASE, THE MESH SHALL BE CUT OPEN AND THE MULCH SPREAD AS A SOIL SUPPLEMENT.

FILTREXX ® SILTSOXX DETAIL
NOT TO SCALE

SITE PREPARATION

ALL UNCOVERED AREAS OF GROUND SHALL BE STABILIZED IMMEDIATELY WITH SEED AND ADEQUATE MULCH (SALT HAY DURING THE GROWING SEASON, WOOD CHIPS DURING THE WINTER) IF THEY REMAIN OPEN MORE THAN TWENTY DAYS. THE FOLLOWING SEEDING SPECIFICATIONS SHALL BE USED:

APPLY 1-TON AGRICULTURAL GRADE LIMESTONE PER ACRE PLUS FERTILIZER AT A RATE OF 40 – 40 – 40 PER ACRE AND INCORPORATE INTO GROUND. SECURE A SOIL TEST BEFORE MAKING A PERMANENT SEEDING. AFTER SEEDING, MULCH WITH HAY OR STRAW AT A RATE OF 3.0 TONS PER ACRE.

PERMANENT SEEDING AND FERTILIZER SPECIFICATIONS

DISTURBED AREAS WHICH ARE AT FINAL GRADE OR WHICH WILL NOT BE REDISTURBED WITHIN ONE (1) YEAR MUST BE STABILIZED IN ACCORDANCE WITH THE PERMANENT SEEDING SPECIFICATIONS.

THE FOLLOWING INFORMATION FOR THE FERTILIZER AND SEED MIXTURE WAS TAKEN FROM SITE ONE LANDSCAPE SUPPLY, LESCO PRODUCTS, 130 SOUTH TREE DRIVE, LANCASTER, PA 17603.

MATERIAL

LIMESTONE – RAW, GROUND AGRICULTURAL LIMESTONE CONTAINING MORE THAN 90% CARBONATES.

LESCO 14-20-4 PROFESSIONAL TURF FERTILIZER – 50 POUNDS OF FERTILIZER COVERS APPROXIMATELY 10,000 SQUARE FEET AT THE APPLICATION RATE OF ONE POUND OF PHOSPHATE (5.00 POUNDS OF FERTILIZER) PER 1,000 SQUARE FEET. CONTRACTOR MAY SUBSTITUTE PRODUCT WITH AN APPROVED EQUAL.

MULCH – CLEAN OAT OR WHEAT STRAW SHALL BE FREE FROM MATURE SEED-BEARING STALKS OF ROOTS OR PROHIBITED OF NOXIOUS WEEDS AS DEFINED BY THE PENNSYLVANIA SEED ACT OF 1947. APPLY AT A RATE OF 3.0 TONS PER ACRE. THE MULCH SHOULD BE STABILIZED & MECHANICALLY HELD DOWN BY NETTING, TACIFIER, OR LANCASTER COUNTY CONSERVATION DISTRICT APPROVED EQUAL UNTIL THE VEGETATIVE COVER IS ESTABLISHED. STRAW MULCH SHALL BE APPLIED IN LONG STRANDS NOT CHOPPED OR FINELY BROKEN.

SEED MIXTURE – SHALL BEAR A GUARANTEED STATEMENT OF ANALYSIS: PERMANENT SEED PROPORTION MIXTURE. PERMANENT SEED IS TO BE PLANTED FROM LATE MARCH TO EARLY OCTOBER OR AS PRESCRIBED BY PERMANENT SEED MANUFACTURE.

ALL DISTURBED AREAS ARE TO BE HYDRO-SEEDED WITH 100% WITH THE LESCO ALL PRO TEAM MATES MIX OR APPROVED EQUAL. THE MIX FOR NEW ESTABLISHMENT CONSISTS OF 6-8 POUNDS PER 1,000 SQUARE FEET. THE PURE LIVE SEED (PLS) IS 88.26% BASED ON AN APPLICATION RATE OF 7 POUNDS PER 1,000 SQUARE FEET.

PREPARATION OF SEED BED

GRADE AS NECESSARY TO BRING THE SUBGRADE TO A TRUE SMOOTH SLOPE PARALLEL TO AND SIX (6) INCHES BELOW FINISH GRADE. PLACE TOPSOIL OVER SPECIFIED AREAS TO A DEPTH SUFFICIENT TO OBTAIN SIX (6) INCHES AFTER SETTLEMENT AND LIGHT ROLLING. THE COMPLETED WORK WILL CONFORM TO LINES, GRADES, AND ELEVATIONS SHOWN OR SPECIFIED.

FERTILIZER AND LIME SHALL BE THOROUGHLY INCORPORATED INTO SOIL BY ROTATILLING OR OTHER METHODS TO MINIMUM DEPTH OF FOUR (4) INCHES. THE ENTIRE SURFACE SHALL BE SEEDED IN TWO (2) SEPARATE OPERATIONS. THE SECOND SEEDING SHALL BE DONE IMMEDIATELY AFTER THE FIRST AND AT RIGHT ANGLES TO THE FIRST SEEDING AND LIGHTLY RAKED INTO THE SOIL. MULCH ALL SEEDED AREAS IMMEDIATELY AFTER SEEDING.

TEMPORARY OUT OF SEASON STABILIZATION MEASURES

SEEDING SHALL OPTIMALLY BE UNDERTAKEN IN THE SPRING FROM APRIL 1 THROUGH JUNE 15, AND IN LATE SUMMER FROM AUGUST 1 TO OCTOBER 15. DURING THE PEAK SUMMER MONTHS AND IN THE FALL AFTER OCTOBER 15 WHEN SEEDING IS FOUND TO BE IMPRACTICABLE, APPROPRIATE CLEAN OAT MULCH, WHEAT STRAW MULCH AND/OR WOOD CHIPS SHALL BE APPLIED.

TEMPORARY SEEDING SPECIFICATIONS

DISTURBED AREAS WHICH ARE NOT AT FINAL GRADE AND WHICH WILL BE REDISTURBED WITHIN ONE (1) YEAR MUST BE STABILIZED IN ACCORDANCE WITH THE TEMPORARY SEEDING SPECIFICATIONS.

LESCO 14-20-4 PROFESSIONAL TURF FERTILIZER – 50 POUNDS OF FERTILIZER COVERS APPROXIMATELY 10,000 SQUARE FEET AT THE APPLICATION RATE OF ONE POUND OF PHOSPHATE (5.00 POUNDS OF FERTILIZER) PER 1,000 SQUARE FEET. CONTRACTOR MAY SUBSTITUTE PRODUCT WITH AN APPROVED EQUAL.

ALL DISTURBED AREAS ARE TO BE HYDRO-SEEDED WITH 100% WITH THE LESCO ANNUAL RYEGRASS OR APPROVED EQUAL. THE MIX FOR NEW ESTABLISHMENT CONSISTS OF 4-6 POUNDS PER 1,000 SQUARE FEET. THE PURE LIVE SEED (PLS) IS 88.19% BASED ON AN APPLICATION RATE OF 5 POUNDS PER 1,000 SQUARE FEET.

NOTES:

MAXIMUM DRAINAGE AREA = 1/2 ACRE.

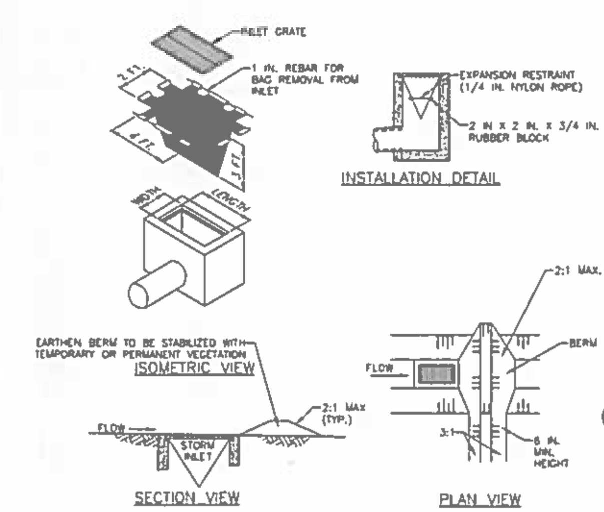
INLET PROTECTION SHALL NOT BE REQUIRED FOR INLET TRIBUTARY TO SEDIMENT BASIN OR TRAP. BERMS SHALL BE REQUIRED FOR ALL INSTALLATIONS.

ROLLED EARTHEN BERM IN ROADWAY SHALL BE MAINTAINED UNTIL ROADWAY IS STONED. ROAD SUBBASE BERM ON ROADWAY SHALL BE MAINTAINED UNTIL ROADWAY IS PAVED. EARTHEN BERM IN CHANNEL SHALL BE MAINTAINED UNTIL PERMANENT STABILIZATION IS COMPLETED OR REMAIN PERMANENTLY.

AT A MINIMUM, THE FABRIC SHALL HAVE A MINIMUM GRAB TENSILE STRENGTH OF 120 LBS., A MINIMUM BURST STRENGTH OF 200 PSI, AND A MINIMUM TRAPEZOIDAL TEAR STRENGTH OF 50 LBS. FILTER BAGS SHALL BE CAPABLE OF TRAPPING ALL PARTICLES NOT PASSING A NO. 40 SIEVE.

INLET FILTER BAGS SHALL BE INSPECTED ON A WEEKLY BASIS AND AFTER EACH RUNOFF EVENT. BAGS SHALL BE EMPTIED AND RINSED OR REPLACED WHEN HALF FULL OR WHEN FLOW CAPACITY HAS BEEN REDUCED SO AS TO CAUSE FLOODING OR BYPASSING OF THE INLET. DAMAGED OR CLOGGED BAGS SHALL BE REPLACED. A SUPPLY SHALL BE MAINTAINED ON SITE FOR REPLACEMENT OF BAGS. ALL NEEDED REPAIRS SHALL BE INITIATED IMMEDIATELY AFTER THE INSPECTION. DISPOSE ACCUMULATED SEDIMENT AS WELL AS ALL USED BAGS ACCORDING TO THE PLAN NOTES.

DO NOT USE ON MAJOR PAVED ROADWAYS WHERE PONDING MAY CAUSE TRAFFIC HAZARDS.



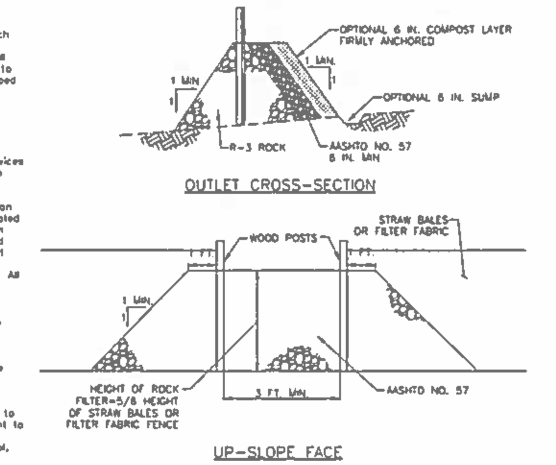
INLET PROTECTION DETAIL
NOT TO SCALE

MAINTENANCE

1. Maintenance of the storm water/erosion and sediment control/BMP devices will consist of weekly inspections of each device to determine how well the site stabilization measures used are working. All facilities will be inspected after rainfall events of 0.25 inches or more to determine their durability to driving rain and erosion. Any areas that may become stripped of vegetation shall be re-established with appropriate stabilization material immediately. If erosion and sediment control devices and BMPs fail to perform as expected, replacement devices/BMPs and/or modifications of those installed will be required.
2. Sediment cleaned from the erosion and sediment control devices shall be graded on site and stabilized. Trash removed from the site shall be taken to an approved disposal area. All seeded or sodded areas that have become stripped of vegetation shall be re-established with appropriate stabilization materials in a timely fashion. This procedure shall be repeated after every measurable storm event until no signs of erosion are evident. At monthly intervals, thereafter, inspections and necessary cleaning will be done. The area around the outlet structure must remain clear of brush and other vegetative debris due to the existing flat slope and brushy conditions. All local regulations shall be complied with. Maintenance of all storm water/erosion control/BMP facilities shall be the responsibility of the General Contractor until the soil for the entire project has been properly stabilized, minimum uniform 70% perennial vegetative ground cover.
3. Maintenance of permanent storm water management, BMP, erosion and sediment control, and drainage facilities shall be the responsibility of the Owner after soil stabilization has occurred. The Municipality shall not be responsible for any permanent storm water management, BMP, erosion and sediment control, and drainage facility that is not dedicated to the Municipality. However, The Municipality will have the right to access the property at any time to inspect the permanent storm water management, BMP, erosion and sediment control, and drainage facilities.

GENERAL NOTES

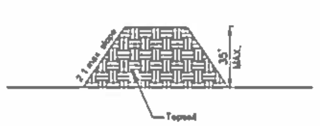
1. All underground utilities are shown according to the best available information. The locations are approximate and must be verified prior to construction, excavation, or blasting. D. C. GOHN ASSOCIATES, INC. assumes no responsibility for any damages incurred as a result of utilities omitted or inaccurately shown.
2. All construction operations shall be carried out in a manner such that soil erosion and air/water pollution is minimized. State and local laws concerning pollution abatement shall be followed.
3. Should unforeseen erosive conditions develop during construction, the contractor shall take action to remedy such conditions and to prevent damage to any adjacent properties as a result of increased runoff and/or sediment displacement. Special attention should be given to frozen slopes. Stockpiles of wood chips, crushed stone and other mulches shall be in readiness to deal immediately with the emergency erosion problems.
4. The contractor shall be thoroughly familiar with the provisions of appendix 64 "Erosion Control Rules and Regulations", Title 25, Part 1, Subpart C, "Protection of Natural Resources", and Article III "Water Resources", Chapter 102 Erosion Control. All are published by the Pennsylvania Department of Environmental Resources. A copy of these plans and report must be posted at the construction site in accordance with state law.
5. Any reference to stabilization refers to a minimum uniform 70% vegetative ground cover (perennial for permanent and annual for temporary) being achieved. Upon completion of any stage or phase of an earth disturbance activity, the site shall be immediately seeded, mulched, or otherwise protected from accelerated erosion and sedimentation.
6. The past land uses (at least 50 years, if known) consists of agriculture.



NOTES:
A ROCK FILTER OUTLET SHALL BE INSTALLED WHERE FAILURE OF A SILT FENCE OR STRAW BALE BARRIER HAS OCCURRED DUE TO CONCENTRATED FLOW. ANCHORED COMPOST LAYER SHALL BE USED ON UPSLOPE FACE IN HQ AND EV WATERSHEDS.

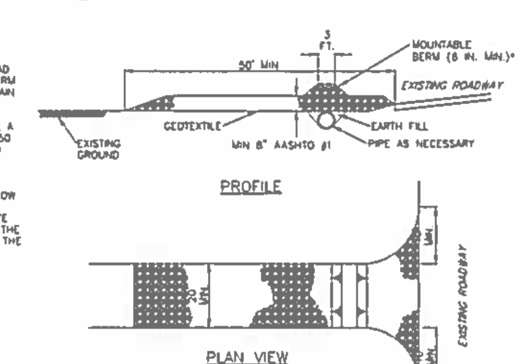
SEDIMENT SHALL BE REMOVED WHEN ACCUMULATIONS REACH 1/3 THE HEIGHT OF THE OUTLET.

ROCK FILTER OUTLETS
NOT TO SCALE



NOTES:
1. STOCKPILES SHALL BE PLACED IN AREAS SHOWN ON THE PLAN.
2. STOCKPILES SHALL BE STABILIZED WITH A TEMPORARY COVER CROP OF ANNUAL RYE GRASS (1 LB./1,000 S.F.) OR WINTER RYE (3 TO 5 LBS./1,000 S.F.).
3. ANY EXCESS TOPSOIL SHALL BE RETAINED ON SITE AND SPREAD AS ADDITIONAL LAYER OR FOR CONSTRUCTING BERMS.
4. ANY SEDIMENT CONTROL BMP'S DOWN SLOPE OF THESE PILES THAT ARE UNDERMINED SHALL BE REPLACED.
5. ANY DISPLACED SEED OR MULCH SHALL BE REPLACED.

TOPSOIL STOCKPILE
NOT TO SCALE



* MOUNTABLE BERM USED TO PROVIDE PROPER COVER FOR PIPE

NOTES:

REMOVE TOPSOIL PRIOR TO INSTALLATION OF ROCK CONSTRUCTION ENTRANCE. EXTEND ROCK OVER FULL WIDTH OF ENTRANCE.

RUNOFF SHALL BE DIVERTED FROM ROADWAY TO A SUITABLE SEDIMENT REMOVAL BMP PRIOR TO ENTERING ROCK CONSTRUCTION ENTRANCE.

MOUNTABLE BERM SHALL BE INSTALLED WHEREVER OPTIONAL CULVERT PIPE IS USED AND PROPER PIPE COVER AS SPECIFIED BY MANUFACTURER IS NOT OTHERWISE PROVIDED. PIPE SHALL BE SIZED APPROPRIATELY FOR SIZE OF DITCH BEING CROSSED.

MAINTENANCE: ROCK CONSTRUCTION ENTRANCE THICKNESS SHALL BE CONSTANTLY MAINTAINED TO THE SPECIFIED DIMENSIONS BY ADDING ROCK. A STOCKPILE SHALL BE MAINTAINED ON SITE FOR THIS PURPOSE. ALL SEDIMENT DEPOSITED ON PAVED ROADWAYS SHALL BE REMOVED AND RETURNED TO THE CONSTRUCTION SITE IMMEDIATELY. IF EXCESSIVE AMOUNTS OF SEDIMENT ARE BEING DEPOSITED ON ROADWAY, EXTEND LENGTH OF ROCK CONSTRUCTION ENTRANCE BY 50 FOOT INCREMENTS UNTIL CONDITION IS ALLEVIATED OR INSTALL WASH RACK. WASHING THE ROADWAY OR SWEEPING THE DEPOSITS INTO ROADWAY DITCHES, SEWERS, CULVERTS, OR OTHER DRAINAGE COURSES IS NOT ACCEPTABLE.

ROCK CONSTRUCTION ENTRANCE

Brian R. Cooley, ASLA

D.C. Gohn Associates, Inc.

Staci Gibbs, Codes and Zoning Officer

Mount Joy Borough

Brian and Staci,

I have reviewed your latest send, "Truck Turning Radius" concerning the Mount Joy Senior Housing project (Old Shoe Factory), dated 06/07/21.

Fire Department Mount Joy has noted the following and taken the following position statement which follows the individual bullets;

- It appears you have made all feasable efforts to improve fire vehicle access on Williams Alley. While we still feel alley access is not desirable, it appears there are no other reasonable alternatives.

- We believe the situation has improved, with relocating a pole and widening of Williams Alley as shown in this plan.

- The FDC location is acceptible (our concerns were presented in correspondence 01/14/21).

Fire Department Mount Joy feels you have met our concerns to the best outcome able to be achieved. <u>We approve of what was presented.</u> This plan was reviewed by both Deputy Chief Johns and Planning Chief Clark, as appointed by Fire Chief Matt S. Gohn.

Should you or the Borough have any further concerns with FD input, please reach out.

Respectfully,

Samuel W. Clark, Planning Chief of Fire Department Mount Joy

RE: Gatesburg Road Development
Gerberich Payne Shoe Company Land Development
ARRO #10863.39

Dear Stacie:

ARRO Consulting, Inc. ("ARRO") reviewed the following information in accordance with the Mount Joy Borough Subdivision and Land Development, Zoning, and Stormwater Management Ordinances and ARRO's May 25, 2021 Review Letter:

1. Comment Response Letter for Gerberich Payne Shoe Company prepared by D.C. Gohn Associates, Inc. dated June 1, 2021.
2. Preliminary/Final Land Development Plan for Gerberich Payne Shoe Company prepared by D.C. Gohn Associates, Inc. with Drawing # CG-3049 dated March 22, 2021; last revised June 1, 2021.
3. Post-Construction Stormwater Management Report for Preliminary/Final Land Development Plan: Gerberich Payne Shoe Company – 240 West Main Street prepared by D.C. Gohn Associates, Inc. with DCG Project No. 1378-20 dated March 22, 2021; last revised June 1, 2021.

We offer the following comments:

Subdivision and Land Development

1. The plans shall be signed and sealed by a registered engineer, surveyor, or landscape architect [§240-61.A.5].

   The applicant indicated that the plans will be signed and sealed prior to plan recording.

Stormwater Management

2. An Operation and Maintenance Agreement shall be prepared, signed, and provided to the Borough [§226-62].

   The applicant indicated that an O&M Agreement is being drafted by the Solicitor.

Zoning

3. The previous zoning comment has been addressed.

Traffic

4. The previous traffic comments have been addressed.

Waivers – Subdivision and Land Development

1. The applicant is requesting to waive the requirement to improve streets in which a subdivision or land development abuts an existing Borough and/or state street (§240-43.H.1). Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

2. The applicant is requesting to waive the requirement for street intersections with a local street to be a minimum radius of 20' [§240-43.I.4]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

3. The applicant is requesting to waive the requirement that curbing shall be provided along the edge of any landscaped portion of a parking facility [§240-46.C.1]. Based on the justification provided in the applicant's modification request letter, **ARRO recommends granting this waiver request.**

4. The applicant is requesting to waive the requirement to dedicate recreation land to the Borough [§240-57.D]. Because there is limited area on the site for this purpose and, as an alternative, the applicant is proposing to pay a fee in lieu of dedication of recreation land, **ARRO recommends granting this waiver request.**

5. The applicant is requesting to waive the requirement to provide a fee in lieu of dedication of recreation [§240-57.G]. The applicant proposes paying a fee of $2,000.00 per unit for a total fee of $72,000.00. However, because land is not being provided on the subject property, the fair market value cannot be determined. Therefore, Borough Council must decide if $72,000.00 is an acceptable fee in lieu of land dedication.

6. The applicant is requesting to waive the requirement that applications for all residential developments with 20 or more dwelling units and buildings containing 1,000 square feet of usable space provide a traffic study and report [§240-62.B]. Because a traffic assessment was prepared which provides adequate information to evaluate the traffic impacts on the adjacent roadway system, **ARRO recommends granting this waiver request.**

7. The applicant is requesting to waive the requirement that the applicant shall make an estimated contribution of the sum necessary to defray the costs of improvements recommended by the Traffic Impact Study [§240-62.B.5]. **After discussion with Borough**

RE: Gatesburg Road Development
Gerberich Payne Shoe Company Land Development
ARRO #10863.39

Dear Stacie:

ARRO Consulting, Inc. (ARRO) reviewed the re-design of the Rain Garden as a condition of waiver approval by the Administration and Finance Committee (Committee), submitted via emails on June 30 and July 2, 2021, by Brian Cooley, ASLA of D.C. Gohn Associates, Inc. The Committee required the 100-year post development discharge flow rate to not exceed the 2-year pre-development discharge flow rate. This condition of waiver approval is more restrictive than the ordinance requirement which is to reduce the 100-year post-development discharge flow rate to the 100-year pre-development discharge flow rate. This change requires the Rain Garden to be larger to provide additional volume to hold the 100-year storm inflow before releasing it at a much slower rate. This design change is not significant on this project because of the small drainage area. However, it will have a significant impact on a project with a very large drainage area because of the increased basin size to accommodate the additional storage volume of the 100-year inflow.

Two designs were submitted to address the re-design. One design used a 3' wide spillway and reduced the 100-year post development discharge flow rate (3.09 cfs) below the 2-year pre-development discharge flow rate (3.10 cfs). The other design used a 10' wide spillway with the 100-year post development discharge flow rate (3.13 cfs) slightly greater than the 2-year pre-development discharge flow rate (3.10 cfs).

It is ARRO's recommendation to accept the re-design of the Rain Garden using the 10' wide spillway even though the 100-year post development storm discharge flow (3.13 cfs) slightly exceeds the 2-year pre-development storm discharge flow. A wider spillway allows the flow to be spread over a larger area and simulate sheet flow rather than a point discharge.

Please call me at 717-560-6065 if you have questions.

Sincerely,

Darrell L. Becker, P.E.
Vice President

To: Becker, Darrell <Darrell.Becker@arroconsulting.com>; Stacie Gibbs <Staci@mountjoypa.org>
Cc: Todd Smeigh <tsmeigh@dcgohn.com>
Subject: RE: Gerberich Payne Dumpster Enclosure, Admin Meeting Update

Darrell – I have revised the rain garden discharge to satisfy the condition of the waiver request for the spillway. Attached is the revised grading plan and below is a summary of the plan revisions:

1. Increased basin storage area
2. Decreased spillway width from 10 feet to 3 feet
3. Increased spillway elevation from 376.50 to 376.95
4. Increased berm elevation from 377.00 to 377.50
5. The undetained area has increased as a result of the larger rain garden area but there is a decrease in the area based on additional grading so the undetained area remains the same.

The revised rain garden discharge, in combination with the undetained areas, meets the condition of the waiver request that the total post development peak flow rate for the 100 year storm (3.99) is less than the total pre development peak flow rate for the 2 year storm (3.10 cfs). **The 100 year combined total post development flow is 3.09 cfs.**

Can you review and let me know if the approach is acceptable? I want to avoid a facility depth over two feet which then involves additional ordinance requirements related to construction and infrastructure.

Thanks,

Brian R. Cooley, ASLA

Subject: RE: Gerberich Payne Dumpster Enclosure, Admin Meeting Update

All – I recalculated the rain garden spillway for a width of 10 feet rather than the 3 feet. The first chart below is the 3 foot wide spillway routing and the second chart is the 10 foot wide spillway. There is a slight increase in the discharge from the 10 wide spillway. **The total 100 year flow for the 3 foot wide spillway is 3.09 cfs and the total 100 year flow for the 10 foot wide spillway is 3.13 cfs.** This difference in flow is nominal. It is our opinion that the wider spillway will sheet flow stormwater from the rain garden, similar to the pre development condition.

These routings take into account the larger footprint and the raised spillway and berm elevation as previously noted.

Re: Proposed Ordinance to Amend Zoning Ordinance
Our File No. 16724-3

Dear Stacie:

In accordance Council's authorization at its meeting on May 3, 2021, I forwarded the proposed ordinance to amend the Zoning Ordinance to regulate personal expression signs to the Lancaster County Planning Commision for review and recommendation as required by the Pennsylvania Municipalities Planning Code ("MPC"). The first meeting of Council after the expiration of the 45 day review period is the meeting on July 12, 2021. I have advertised the public hearing on and consideration for enactment of the proposed ordinance for that meeting. Attached please find a copy of the summary legal advertisement together with a copy of our letter to LNP Media Group, Inc., requesting that the advertisement be published in accordance with the requirements of the MPC.

Enclosed please find the original and two (2) copies of the proposed ordinance. If the ordinance is enacted by Borough Council, please ensure that the ordinance number is inserted on page 1 of the original and both copies. Please also ensure that the ordinance is properly signed by the President or Vice President of Borough Council and the Mayor. You should ensure that the Borough Secretary attests to these signatures and affixes the Borough Seal on the last page of the ordinance. Please have her complete the certification pages for both copies and return them to me. Because only a summary of the ordinance was advertised, the MPC requires that a certified copy be filed at the Lancaster County Courthouse, and we will file one of the certified copies following receipt thereof from the Borough. We will then retain this copy for our files. In accordance with the requirements of Section 609(g) of the MPC, a copy of all amendments to zoning ordinances must be forwarded to the Lancaster County Planning Commission, and we will send one certified copy to them.

If you have any questions, please contact me.

Very truly yours,

Josele Cleary

cc: Mount Joy Borough (w/enclosures)

Notice is hereby given that Mount Joy Borough Council at its meeting on Monday, July 12, 2021, at 7:00 p.m., at the Mount Joy Borough Municipal Building, 21 East Main Street, Mount Joy, Pennsylvania, shall conduct a public hearing on and, at the conclusion of the public hearing or a subsequent meeting held within 60 days of the date of second publication of this advertisement, if appropriate, shall enact an ordinance, the caption of which is as follows:

AN ORDINANCE TO AMEND THE MOUNT JOY BOROUGH CODE OF ORDINANCES, CHAPTER 270, ZONING, TO REVISE SIGN REGULATIONS AND CLARIFY REGULATIONS CONCERNING SPECIAL EXCEPTIONS.

The proposed ordinance may be summarized as follows. Section 1 amends Chapter 270, Zoning, of the Code of Ordinances ("Chapter 270") to revise general regulations governing special exception uses. Sections 2 – 5 revise provisions of Chapter 270 governing signs, including signs exempt from permit requirements and personal expression signs. Sections 6 – 8 reaffirm all other parts and provisions of the Code of Ordinances, provide for severability of any invalid provisions, and set forth the effective date. A copy may be examined without charge at the offices of this newspaper and at the Mount Joy Borough Municipal Building, 21 East Main Street, Mount Joy, Pennsylvania, Mondays through Fridays from 7:00 a.m. until 4:00 p.m. A copy of the proposed ordinance may be obtained for the cost of reproduction at the Mount Joy Borough Municipal Building during the above hours.

BOROUGH OF MOUNT JOY

Lancaster County, Pennsylvania

ORDINANCE NO. 8-21

AN ORDINANCE TO AMEND THE MOUNT JOY BOROUGH CODE OF ORDINANCES, CHAPTER 270, ZONING, TO REVISE SIGN REGULATIONS AND CLARIFY REGULATIONS CONCERNING SPECIAL EXCEPTIONS.

BE AND IT IS HEREBY ORDAINED AND ENACTED by Borough Council of the Borough of Mount Joy, Lancaster County, Pennsylvania, as follows:

Section 1. The Mount Joy Borough Code of Ordinances, Chapter 270, Zoning, Article I, Administration and Enforcement, §270-16, Special Exceptions, shall be amended by adding a new Subsection E which shall provide as follows:

E. Expansion of preexisting uses authorized by special exception. When a use which was established prior to the enactment of this chapter or any amendment thereto is located in a zoning district where such use is permitted by special exception, such preexisting use shall be permitted to continue as of right. Any expansion or alteration of such preexisting use shall require the granting of a special exception by the Zoning Hearing Board, and the applicant for such special exception shall demonstrate compliance with all of the standards set forth in this chapter for the granting of a special exception for such use, if any, and with all of the general standards set forth in this chapter for all special exceptions.

Section 2. The Mount Joy Borough Code of Ordinances, Chapter 270, Zoning, Article VII, Signs, §270-91, Purpose; permit requirements; changes on signs, Subsection B, Paragraph (1), Subparagraph (a) shall be amended to provide as follows:

(a) Signs meeting the requirements of §270-93 and §270-103.

Section 3. The Mount Joy Borough Code of Ordinances, Chapter 270, Zoning, Article VII, Signs, §270-93, Miscellaneous Signs Not Requiring Permits, Subsection A, 270 Attachment 6 table entitled Miscellaneous Signs Not Requiring Permits, shall be amended as follows:

ZONING

270 Attachment 6

Borough of Mount Joy

Miscellaneous Signs Not Requiring Permits

Type and Definition of Signs Not Requiring Permits	Maximum Number of Signs Per Lot	Maximum Sign Area Per Sign on Residential Lots (square feet)	Maximum Sign Area Per Sign on Nonresidential Lots (square feet)	Other Requirements
		* * *		
Flag A banner or pennant made of fabric or materials with a similar appearance that is hung in such a way to flow in the wind and that includes some type of message	2	See §270-103	50	Government flags and flags without messages are not regulated by this chapter

* * *

Section 4. The Mount Joy Borough Code of Ordinances, Chapter 270, Zoning, Article VII, Signs, §270-93, Miscellaneous Signs Not Requiring Permits, Subsection A, 270 Attachment 6 table entitled Miscellaneous Signs Not Requiring Permits, shall be amended to delete the entry for "Political Sign" in its entirety.

Section 5. The Mount Joy Borough Code of Ordinances, Chapter 270, Zoning, Article VII, Signs, shall be amended by adding a new §270-103, Personal Expression Signs, which shall provide as follows:

§270-103. Personal Expression Signs.

A. As used in this section, the following term shall have the meaning indicated:

SIGN, PERSONAL EXPRESSION — A sign expressing or communicating a noncommercial message, opinion, feeling, interest, or point of view, including, but not limited to, ideological, religious, political, or social messages. A personal expression sign may convey such message through text, symbols and/or logos (such as for a sporting team or club). A flag governed by the American, Commonwealth, and Military Flag Act, Act of July 7, 2006, P.L. 609, No. 93, 44 P.S. §50.1 et seq., or Section 1202(3) of the Borough Code shall not be considered a personal expression sign and shall not be subject to limitations concerning personal expression signs. Holiday or seasonal decorations shall not be considered personal expression signs.

B. Within all zoning districts the occupant of any lot containing a dwelling unit shall be permitted to erect personal expression signs in accordance with the following requirements:

(1) All personal expression signs shall comply with §270-100 and §270-101.

(2) The total square footage of personal expression signs on the lot shall not exceed 36 square feet.

(3) No personal expression sign other than a personal expression sign made of fabric (i.e. flag) displayed on a flag pole may exceed 5 feet in height.

(4) No single personal expression sign may exceed 12 square feet.

(5) No personal expression sign may be located within a required side yard or rear yard setback.

(6) No permanent structure may be installed to serve as a base or mount for a personal expression sign other than a flagpole meeting all setback requirements.

(7) All personal expression signs shall be set back at least 5 feet from the public street right-of-way.

(8) No personal expression sign may be located within the clear sight triangle for any driveway serving an adjoining lot.

Section 6. All other sections, parts and provisions of the Mount Joy Borough Code of Ordinances shall remain in full force and effect as previously enacted and amended.

Section 7. In the event any provision, section, sentence, clause or part of this Ordinance shall be held to be invalid, illegal or unconstitutional by a court of competent jurisdiction, such invalidity, illegality or unconstitutionality shall not affect or impair the remaining provisions, sections, sentences, clauses or parts of this Ordinance, it being the intent of Borough Council that the remainder of the Ordinance shall be and shall remain in full force and effect.

Section 8. This Ordinance shall take effect and be in force from and after its enactment as provided by law.

DULY ORDAINED AND ENACTED this _____ day of _____, 2021, by Borough Council of the Borough of Mount Joy, Lancaster County, Pennsylvania, in lawful session duly assembled.

BOROUGH OF MOUNT JOY
Lancaster County, Pennsylvania

Attest:_____
(Assistant) Secretary

By:_____
(Vice) President
Borough Council

[BOROUGH SEAL]

Examined and approved as an Ordinance this _____ day of _____, 2021.

By:_____
Mayor

CERTIFICATE

I, the undersigned, (Assistant) Secretary of the Borough of Mount Joy, Lancaster County, Pennsylvania ("Borough") certify that: The foregoing is a true and correct copy of an Ordinance of Borough Council of the Borough which duly was enacted by affirmative vote of a majority of the members of Borough Council of the Borough of Mount Joy at a meeting duly held on the _____ day of _____, _____; and was examined and approved by the Mayor; such Ordinance has been duly recorded in the Ordinance Book of the Borough; such Ordinance has been duly published as required by law; and such Ordinance remains in effect, unaltered and unamended, as of the date of this Certificate.

I further certify that Borough Council of the Borough of Mount Joy met the advance notice and public comment requirements of the Sunshine Act, 65 Pa. C.S.§701 et seq., as amended, by advertising the date of said meeting, by posting prominently a notice of said meeting at the principal office of the Borough of Mount Joy or at the public building in which said meeting was held, and by providing a reasonable opportunity for public comment at said meeting prior to enacting such Ordinance.

IN WITNESS WHEREOF, I set my hand and affix the official seal of the Borough of Mount Joy, this _____ day of _____, _____.

_____
(Assistant) Secretary

Hi Stacie,

Attached is the Letter of Amendment for the Complete Streets Implementation Guide Book. **Please have the appropriate Borough officials sign and date two copies of Exhibit B Page 1 of 2.** The signatures must be **original** and in **blue** ink. Stamped signatures are not acceptable.

A resolution authorizing the Borough official to sign the Letter of Amendment on behalf of the Borough is also required. **Please provide two (2) original copies of the resolution, containing the impressed seal of the Borough.**

The Letter of Amendment provides for 81.4% reimbursement of the Borough's costs up to a maximum of $89,000.00. Any additional costs are 100% the responsibility of the Borough.

Please return two (2) copies of the Letter of Amendment and the two (2) copies of the Resolution to Nexa Castro's attention.

Nexa M. Castro | Senior Project Manager
PA Department of Transportation | District 8-0
Highway Design Unit
2140 Herr Street | Harrisburg PA 17103

She will return one (1) fully executed copy of the Letter of Amendment once it has been signed by PennDOT.

Please return the Letter of Amendment as soon as possible as PennDOT requires that agreements be fully executed within 60 days of the first signature.

If you have any questions, please contact me.

Thanks,

Juli Wolfe, PE, MBA

BOROUGH OF MOUNT JOY

Lancaster County, Pennsylvania

RESOLUTION NO. 10-20

A RESOLUTION OF MOUNT JOY BOROUGH COUNCIL PURSUANT TO ARTICLE 10A OF THE BOROUGH CODE TO EXTEND THE STATE OF EMERGENCY PROCLAMATION OF THE BOROUGH ISSUED MARCH 17, 2020, AND TO FURTHER DECLARE A DISASTER EMERGENCY UNDER THE PENNSYLVANIA EMERGENCY MANAGEMENT CODE.

WHEREAS, in addition to all powers granted to mayors by the Pennsylvania Emergency Management Code and in order to enable the Mayor to effectively preserve public peace, health, safety and welfare, Mayor Timothy D. Bradley, Jr., issued a State of Emergency Proclamation on March 17, 2020; and

WHEREAS, pursuant to Section 10A06(b)(4) of the Borough Code, such state of emergency shall not exceed seven (7) days unless sooner rescinded, modified, ratified or extended by resolution of Council; and

WHEREAS, Council desires to extend the State of Emergency Proclamation of the Mayor issued March 17, 2020; and

WHEREAS, Council further desires to exercise the authorization of Section 7501 of the Pennsylvania Emergency Management Code to declare a disaster emergency as a result of the COVID-19 virus.

NOW, THEREFORE, BE AND IT IS HEREBY RESOLVED by Borough Council of the Borough of Mount Joy, Lancaster County, Pennsylvania, as follows:

Section 1. The State of Emergency Proclamation issued by Mayor Timothy D. Bradley. Jr., on March 17, 2020, attached hereto and incorporated herein as Exhibit A is hereby extended indefinitely. Recognizing the uncertainties caused by the presence and spread of the COVID-19 virus, Council has determined that the State of Emergency Proclamation should remain in effect until Council takes further action to rescind the State of Emergency Proclamation.

Section 2. Council hereby declares a disaster emergency pursuant to Section 7501 of the Pennsylvania Emergency Management Code, 35 Pa. C.S. §7501, and authorizes the President of Council to sign the Borough of Mount Joy Declaration of Disaster Emergency attached hereto as Exhibit B and incorporated herein. Council authorizes the Council President and the Borough

Manager to provide the Declaration of Emergency to the news media and to post the Declaration of Emergency on the Borough's web site.

Section 3. BE IT FURTHER RESOLVED, that we authorize the Borough Manager to further act as necessary to protect the health of the Borough employees by implementing measures including, but not limited to, reducing hours the Borough offices are open to the public, installing facilities so that persons may deposit payments, applications, and similar items without interacting with Borough staff, and taking similar matters; and

Section 4.BE IT FURTHER RESOLVED, the we authorize the Borough Police Chief to further act as necessary to protect the health of Borough Police Officers by implementing measures including, but not limited to, implementing policies limiting or suspending walk-in services.

DULY ADOPTED this 23 day of March, 2020, by Borough Council of the Borough of Mount Joy, Lancaster County, Pennsylvania, in lawful session duly assembled.

BOROUGH OF MOUNT JOY
Lancaster County, Pennsylvania

Attest: _____
(Assistant) Secretary

By: _____
(Vice) President
Borough Council

[BOROUGH SEAL]

Part-Time Officers

326.1 PURPOSE AND SCOPE

This policy establishes the guidelines for Mount Joy Borough Police Department part-time officers to supplement and assist regular full-time police officers in their duties. These officers provide professional and special functions and part-time services that can augment regular staffing levels.

326.1.1 DEFINITIONS

Definitions related to this policy include:

Part-time officer- A person who is a certified police officer and anticipated to work less than 1,000 hours in a 12-month period and the same for the subsequent 12-month period.

326.2 POLICY

The Mount Joy Borough Police Department shall ensure that part-time officers are properly appointed, trained and supervised and that they maintain the appropriate certifications and readiness to carry out their assigned duties.

326.3 RECRUITMENT AND SELECTION

The Mount Joy Borough Police Department shall endeavor to recruit and appoint only those applicants who meet the high ethical, moral and professional standards set forth by this department.

All applicants shall be required to meet and pass the same pre-employment procedures as regular full-time police officers before appointment.

326.3.1 APPOINTMENT

Applicants who are selected for appointment as part-time officers shall, on the recommendation of the Chief of Police, be sworn in and take the Oath of Office in accordance with the Oath of Office Policy and as required for the position.

Part-time officers are considered at-will employees and may be dismissed at the discretion of the Chief of Police, with or without cause. Part-time officers shall have no property interest in continued appointment. However, if a part-time officer is removed for alleged misconduct, the part-time officer will be afforded an opportunity solely to clear his/her name through a liberty interest hearing, which shall be limited to a single appearance before the Chief of Police or the authorized designee.

326.4 IDENTIFICATION AND UNIFORMS

Part-time officers will be issued Mount Joy Borough Police Department uniforms, badges and identification cards. The uniforms and badges shall be the same as those worn by regular full-time police officers. The identification cards will be the standard Mount Joy Borough Police Department identification cards, with the exception that "Part-time" will be indicated on the cards.

326.5 AUTHORITY

Part-time officers shall perform peace officer duties within the scope of their approved training (53 Pa.C.S. § 2167). Part-time officers:

(a) Perform law enforcement functions and have the authority to arrest on behalf of this department (42 Pa.C.S. § 8952).

(b) Shall not exercise peace officer duties when off-duty.

326.6 COMPENSATION

Compensation for part-time officers is provided as follows:

(a) Part-time officers shall work as specified in the collective bargaining agreement or as contracted with the Mount Joy Borough Police Department.

(b) Part-time officers are issued two sets of uniforms and all designated attire and safety equipment, as applicable to their positions. All property issued to part-time officers shall be returned to this department upon termination or resignation.

(c) Part-time officers that separate from the agency for any reason within one year of their employment shall be responsible for compensating the Borough the full replacement cost of their ballistic vest, if so provided.

326.7 COMPLIANCE

Part-time officers shall be required to adhere to all department policies and procedures. A copy of the policies and procedures will be made available to each part-time officer upon appointment. The officers shall become thoroughly familiar with these policies.

Whenever a rule, regulation or guideline in this Policy Manual refers to a regular full-time police officer, it shall also apply to a part-time officer, unless by its nature it is inapplicable.

Part-time officers are required by this department to meet department-approved training requirements.

All part-time officers are required to attend Court hearings and other scheduled meetings. Any absences must be satisfactorily explained to the part-time officer coordinator.

326.8 FIREARMS

Part-time officers shall successfully complete department-authorized training in the use of firearms. Their appointments must be approved by the Borough prior to being issued firearms by this department or otherwise acting as part-time officers on behalf of the Mount Joy Borough Police Department.

Part-time officers will be issued duty firearms as specified in the Firearms Policy. Any part-time officer who is permitted to carry a firearm other than the assigned duty weapon or any optional firearm may do so only in compliance with the Firearms Policy.

Part-time officers are required to maintain proficiency with firearms used in the course of their assignments. Part-time officers shall comply with all training and qualification requirements set forth in the Firearms Policy and the Use of Force Policy.

326.8.1 CONCEALED FIREARMS

A part-time officer may carry a concealed firearm while in an off-duty capacity provided:

(a) He/she is exempt pursuant to 18 Pa.C.S. § 6106(b)(1).

(b) The State Police Lethal Weapons Unit has granted authorization. Authorization is obtained by completion of a Lethal Weapons Act application including:

1. Eight hours firearms training, if required.
2. An Act 120 Academy Graduate Waiver, if required.
3. A Physical Examination Lethal Weapons Training Act Form - determination as fit, if required.
4. A Psychological Examination Lethal Weapons Training Act Form - determination as fit, if required.
5. A Police Officer Exemption Application signed by the Chief of Police.

Any part-time officer who is permitted to carry a firearm other than the assigned duty weapon may do so only after verifying that the weapon conforms to department standards. The weapon must be inspected and certified as fit for service by the department Firearms Instructor. The weapon shall comply with all the requirements set forth in the Firearms Policy.

Before being allowed to carry any optional firearm during an assigned tour of duty, the part-time officer shall demonstrate his/her proficiency with the weapon.

326.9 PART-TIME OFFICER COORDINATOR

The Chief of Police shall delegate certain responsibilities to a part-time officer coordinator. The coordinator shall be appointed by and directly responsible to the Uniform Patrol Sergeant or the authorized designee.

The responsibilities of the coordinator or the authorized designee include, but are not limited to:

(a) Assigning part-time officers.

(b) Conducting part-time officer meetings.

(c) Establishing and maintaining a part-time officer callout roster.

(d) Maintaining and ensuring performance evaluations are completed.

(e) Monitoring the field training progress of part-time officers.

(f) Monitoring individual part-time officer performance.

(g) Monitoring overall part-time officer activities.

(h) Maintaining a liaison with other agency part-time officer coordinators.

326.10 FIELD TRAINING

All part-time officers shall complete the same department-specified field training as regular full-time police officers, as described in the Field Training Policy.

326.11 SUPERVISION

Part-time officers may perform the same duties as regular full-time officers of this department provided they are under the direct or indirect supervision of a supervisor or officer in charge. Part-time officers should not supervise a regular full-time officer.

326.11.1 EVALUATIONS

While in training, part-time officers should be continuously evaluated using standardized daily and weekly observation reports. The part-time officer will be considered a trainee until he/she has satisfactorily completed training. Part-time officers who have completed their field training should be evaluated annually using performance dimensions applicable to the duties and authorities granted to that part-time officer.

326.11.2 INVESTIGATIONS AND COMPLAINTS

If a part-time officer has a personnel complaint made against him/her or becomes involved in an internal investigation, the matter shall be investigated in compliance with the Personnel Complaints Policy.

Payroll Records

1019.1 PURPOSE AND SCOPE

This policy provides the guidelines for completing and submitting payroll records of department members who are eligible for the payment of wages.

1019.2 POLICY

The Mount Joy Borough Police Department maintains timely and accurate payroll records.

1019.3 RESPONSIBILITIES

Members are responsible for the accurate completion and timely submission of their payroll records for the payment of wages.

The Chief of Police or designee is responsible for approving the payroll records for those under their commands.

1019.4 TIME REQUIREMENTS

Members who are eligible for the payment of wages are paid on a scheduled, periodic basis, generally on the same day or date each period, with certain exceptions, such as holidays. Payroll records shall be completed and submitted to Administration as established by the Borough payroll procedures.

1019.5 RECORDS

The Borough accountant shall ensure that accurate and timely payroll records are maintained as required by 29 CFR 516.2 for a minimum of three years (29 CFR 516.5).

Overtime Compensation

1020.1 PURPOSE AND SCOPE

This policy establishes guidelines and procedures regarding overtime for employees, in conformance with the Fair Labor Standards Act (FLSA) (29 USC § 201 et seq.).

1020.2 POLICY

The Mount Joy Borough Police Department will compensate nonexempt employees who work authorized overtime either by payment of wages or by the accrual of compensatory time (29 CFR 553.22). Employees who are salary exempt from FLSA are not compensated for overtime worked.

1020.3 COMPENSATION

Payment of wages to nonexempt employees for overtime, or accrual of compensatory time in lieu of compensation for overtime worked, shall be at the rate of not less than one and one-half hours for each hour of employment for which overtime compensation is required (29 USC § 207(k)(2); 29 USC § 207(o)(1)).

Short periods of overtime worked at the end of the normal duty day (e.g., less than one hour in duration) may be handled informally by an agreement between the supervisor and the employee. In such cases, the supervisor shall document the overtime worked and schedule a subsequent shift adjustment within the same work period that the overtime was worked, rather than submit a request for overtime compensation (29 USC § 207(k)).

Salary exempt employees may be eligible for administrative leave, which may be granted at the discretion of the exempt employee's immediate supervisor.

1020.4 REQUESTS FOR OVERTIME COMPENSATION

1020.4.1 EMPLOYEE RESPONSIBILITIES

Generally, no employee is authorized to work overtime without the prior approval of a supervisor. If circumstances do not permit prior approval, approval shall be sought as soon as practicable during the overtime shift and in no case later than the end of the shift in which the overtime is worked.

Nonexempt employees shall:

(a) Obtain supervisory approval, verbal or written.

(b) Not work in excess of 18 hours, including regularly scheduled work time, overtime and extra-duty time, in any consecutive 24-hour period without supervisory approval.

(c) Record the time worked in an overtime status using the department-approved form or method. Reported hours may be rounded up to the nearest half-hour. Informal notations on reports, logs or other forms not approved for overtime recording are not acceptable.

(d) Submit the request for overtime compensation via the approved method by the end of shift or no later than the next calendar day.

1020.4.2 SUPERVISOR RESPONSIBILITIES

Supervisors shall:

(a) Prior to authorizing an employee to work overtime, evaluate the need for the overtime.

1. Supervisors should not authorize any request to work overtime if the overtime would not be an appropriate use of department resources.

(b) Upon receipt of a request for overtime compensation, confirm that the overtime was authorized and then verify the actual time worked.

1. Supervisors identifying any unauthorized overtime or discrepancy shall initiate an investigation consistent with the Personnel Complaints Policy.

Supervisors may not authorize or approve their own overtime.

1020.5 ACCOUNTING FOR PORTIONS OF AN HOUR

Authorized overtime work shall be accounted in the increments as listed:

TIME WORKED	INDICATE ON CARD
Up to 30 minutes	.50 hour
31 to 60 minutes	1 hour

1020.5.1 VARIATION IN TIME REPORTED

When two or more employees are assigned to the same activity, case or court trial, and the amount of time for which overtime compensation is requested varies among the officers, the Shift Sergeant or other approving supervisor may require each employee to include the reason for the variation on the overtime compensation request.

1020.6 REQUESTING USE OF COMPENSATORY TIME

Employees who have accrued compensatory time shall be allowed to use that time for time off within a reasonable period after making a request, if the request does not unduly disrupt department operations.

Compensatory time shall only be used with prior approval in accordance with the current Collective Bargaining Agreement.

Compensatory time may not be used for time off for a date and time when the employee is required to appear in court on department-related matters. Supervisors shall not unreasonably deny employee requests to use compensatory time (29 CFR 553.25).

Work-Related Injury and Occupational Disease Reporting

1022.1 PURPOSE AND SCOPE

The purpose of this policy is to provide guidance regarding timely reporting of work-related injuries, mental health issues and occupational diseases.

1022.1.1 DEFINITIONS

Definitions related to this policy include:

Work-related injury or occupational disease - Any injury arising in the course of the member's employment. The term includes any occupational disease (as defined in 77 P.S. § 27.1) that occurs within the preceding 300 weeks of the member's employment with the Mount Joy Borough Police Department. The term work-related injury does not include an injury caused by the act of a third person intending to injure the member because of personal reasons or reasons unrelated to the member's employment with the Mount Joy Borough Police Department or an injury sustained while the member was operating a vehicle while not otherwise in the course of employment at the time of the injury (77 P.S. § 411).

1022.2 POLICY

The Mount Joy Borough Police Department will address work-related injuries, mental health issues and occupational diseases appropriately, and will comply with applicable state workers' compensation requirements (77 P.S. § 1 et seq.).

1022.3 RESPONSIBILITIES

1022.3.1 MEMBER RESPONSIBILITIES

Any member sustaining any occupational disease or work-related injury shall report such event as soon as practicable, but within 24 hours to a supervisor, and shall seek medical care when appropriate.

1022.3.2 SERGEANT RESPONSIBILITIES

A supervisor learning of any work-related injury or occupational disease should ensure the member receives medical care as appropriate.

Supervisors shall ensure that required documents regarding workers' compensation are completed and forwarded promptly. Any related Borough-wide injury- or disease-reporting protocol shall also be followed.

Supervisors shall determine whether the Major Incident Notification and Illness and Injury Prevention policies apply and take additional action as required.

The Sergeant who receives a report of an occupational disease or work-related injury should review the report for accuracy and determine what additional action should be taken. The report

shall then be forwarded to the Chief of Police to ensure any required reporting is made as required in the disease and injury prevention plan identified in the Illness and Injury Prevention Policy.

1022.3.3 CHIEF OF POLICE RESPONSIBILITIES

The Chief of Police shall review and forward copies of the report to the Borough Administration. Copies of the report and related documents retained by the Department shall be filed in the member's confidential medical file.

1022.4 OTHER DISEASE OR INJURY

Diseases and injuries caused or occurring on-duty that do not qualify for workers' compensation reporting shall be documented on the designated report of injury form, which shall be signed by a supervisor. A copy of the completed form shall be forwarded to the Chief of Police.

Unless the injury is extremely minor, this report shall be signed by the affected member, indicating that he/she desired no medical attention at the time of the report. By signing, the member does not preclude his/her ability to later seek medical attention.

1022.5 SETTLEMENT OFFERS

When a member sustains an occupational disease or work-related injury that is caused by another person and is subsequently contacted by that person, his/her agent, insurance company or attorney and offered a settlement, the member shall take no action other than to submit a written report of this contact to his/her supervisor as soon as possible.

1022.5.1 NO SETTLEMENT WITHOUT PRIOR APPROVAL

No less than 10 days prior to accepting and finalizing the settlement of any third-party claim arising out of or related to an occupational disease or work-related injury, the member shall provide the Chief of Police with written notice of the proposed terms of such settlement. In no case shall the member accept a settlement without first providing written notice to the Chief of Police. The purpose of such notice is to permit the Borough to determine whether the offered settlement will affect any claim the Borough may have regarding payment for damage to equipment or reimbursement for wages against the person who caused the disease or injury, and to protect the Borough's right of subrogation, while ensuring that the member's right to receive compensation is not affected.
