MIDDLE EAST CHRONOLOGY

1973

October

- 18 (U) The 15AF (LG) answered a 15AF (DO) letter pertaining to certain logistical support in WRM locations.¹
- 23 (U) 15AF (LG) requested that Hq SAC review 15AF's previous recommendations concerning manning policies of the 456th BMW OMS branch.²
- 24/1943Z (U) Hq SAC authorized certain degrades of alert aircraft beginning 25 October.³
- 25/0430Z (U) ~~(S)~~ JCS initiated worldwide [redacted] with Blue Dot message, followed by Hq SAC message 20 minutes later. A War Actions Group was formed in the COC.⁴
- 25/0607Z [redacted]
25/0612Z [redacted]
- 25/0824Z ~~(S)~~ An RC-135 from the 55th SRW was launched on an operational sortie and recovered at 26/0421Z.⁶
- 25/1135Z (U) ~~(S)~~ Hq SAC directed NCO controller augmentees for Vandenberg.⁷
- 25/1140Z (U) ~~(S)~~ Hq 15AF notified Hq SAC that the 320th BMW, 22nd BMW and 916th AREFS [redacted]
[redacted]⁸
- 25/1524Z [redacted]
- 25/1556Z (U) ~~(S)~~ Hq SAC directed two sorties from 42nd BMW and three Loring KC-135 tankers satellite ASAP to Grand Forks, using weapons already in place at Grand Forks.¹⁰
- 25/1556Z (U) ~~(S)~~ Satellite assignments of two March tankers and two Travis tankers were issued. (These were later canceled).¹¹
- 25/1630Z (U) ~~(S)~~ Hq SAC requested assessment of Giant Lance capabilities.¹²

October (cont)

- 25/1556Z (U) ~~(S)~~ Hq SAC issued instructions on satellite base operations, including 456th BMW. ¹³
- 25/1436Z (U) ~~(S)~~ Hq SAC notified Hq 15AF that when qualified launch crews and missile maintenance teams were in place then RVs could be mated at Vandenberg. ¹⁴
- 25/1649Z (U) ~~(S)~~ Hq 15AF inquired as to assessment of Giant Lance capabilities for 5th, 28th, 319th and 456th BMWs. ¹⁵
- 25/1740Z (U) ~~(S)~~ Hq 15AF directed two 916th AREFS tanker sorties to deploy to Malmstrom to initiate satellite alert. ¹⁶
- 25/1845Z ~~(S)~~ The 319th BMW replied that it could implement Giant Lance. ¹⁷
- 25/1915Z (U) ~~(S)~~ Hq SAC directed those units redeploying and reconstituting the B-52 force to attain alert generation and begin training for EWO matters later. ¹⁸
- 25/1943Z (U) ~~(S)~~ The KC-135s committed to the [redacted] from 2AF units were directed to deploy to [redacted] by Hq SAC. ¹⁹
- 25/2047Z (U) ~~(S)~~ Hq 15AF notified Hq SAC that the 5th and 319th BMWs were capable of assuming Giant Lance ASAP. The 28th BMW needed 24 hours notification, and the 456th BMW needed aircrew augmentation. ²⁰
- 25/2059Z (U) ~~(S)~~ The 5th BMW responded that it was prepared to implement Giant Lance, but needed two tankers to complete requirements for Option Two launch. Beale tankers were used. ²¹
- 26/0130Z (U) ~~(S)~~ Hq SAC directed cancellation of shipment of missiles, weapons and missile components to Vandenberg. ²²
- 26/0454Z (U) ~~(S)~~ Hq SAC changed the planning data for satellite sorties of the 456th, 22nd and 319th BMWs. ²³

[redacted]

- 26/0029Z (U) ~~(S)~~ Hq SAC authorized certain tanker degrades at 916th AREFS to cover redeployment of B-52s, but excluded two sorties that were mated to alert bombers. ²⁵

October (cont)

- 26/0100Z (U) ~~(S)~~ Hq SAC directed satellite operations for 2AF units to deploy to Ellsworth, and the 92nd BMW to generate eight sorties at Fairchild.²⁶
- 26/0150Z (U) ~~(S)~~ Hq SAC Recon Center canceled launch of remaining KC-135Q aircraft dispersal.²⁷
- 26/0214Z (U) ~~(S)~~ Hq SAC canceled generation activity on Vandenberg's L-Cap missile sorties.²⁸
- 26/0221Z (U) ~~(S)~~ Hq SAC requested a generation schedule for each re-deployed aircraft until [] sorties were generated.²⁹
- 26/0348Z (U) ~~(S)~~ 15AF (LG/DP) recommended that those excess 92nd BMW TDY augmentees who were assigned to Castle be returned to Fairchild.³⁰
- 26/0425Z (U) ~~(S)~~ Hq SAC established generation priorities for Alfa sorties.³¹
- 26/0441Z (U) ~~(S)~~ Hq 15AF recommended those 320th BMW TDY augmentees to the 93rd BMW be returned to Mather.³²
- 26/0454Z (U) ~~(S)~~ Hq SAC revised the satellite operations with four 456th BMW sorties generated at Beale, two 22nd BMW tankers to satellite to Hill, and two 916th AREFS sorties to satellite to Grand Forks.³³
- 26/0543Z (U) ~~(S)~~ Hq SAC notified Hq 15AF that there was a refueling capability limit at Fairchild, and warned MAC aircraft not to expect to be refueled at Fairchild when passengers and equipment were being unloaded.³⁴
- 26/0735Z (U) ~~(S)~~ Hq SAC deleted all movement of weapons to Hill from Beale, but retained movement of weapons from Loring to Grand Forks.³⁵
- 26/0940Z (U) ~~(S)~~ A report was furnished Hq 15AF []^{36 x}
- 26/1134Z (U) ~~(S)~~ Hq SAC initiated actions to attain a "G/H" swap of B-52 aircraft designed to improve alert posture.³⁷
- 26/1339Z (U) ~~(S)~~ Hq SAC did not recommend returning 92nd BMW TDY personnel from Castle to Fairchild.³⁸

October (cont)

- 26/1404Z (U) ~~(S)~~ The 28th BMW notified 15AF that it would assume one alert sortie (0020 at 1800Z).³⁹
- 26/1631Z (U) ~~(S)~~ Hq SAC reiterated the priorities of generation of aircraft.⁴⁰
- 26/2024Z (U) ~~(S)~~ Hq SAC directed that [] sorties generated during [] be retained on alert.⁴¹
- 26/2041Z (U) ~~(S)~~ Hq SAC directed all B-52 units to maintain all [] sorties on alert.⁴²
- 26/2245Z (U) ~~(S)~~ Hq SAC directed that B-52C units reconstitute according to plan, with training matters preceding generation for alert.⁴³
- 26/2316Z (U) ~~(S)~~ Hq SAC issued additional guidance on [] sorties for alert.⁴⁴
- 27/0037Z (U) ~~(S)~~ Hq SAC directed that all KC-135 alert sorties on alert without a bomber mate be degraded from 27 October until the bomber mate returned.⁴⁵
- 27/0558Z (U) ~~(S)~~ The 5th BMW reported one of its aircraft was off alert beginning at 0515Z. The aircraft went back on alert at 1415Z.⁴⁶
- 28/1000Z (U) ~~(S)~~ There were 24 B-52 and 26 KC-135 aircraft on alert in 15AF.⁴⁷
- 29/0119Z (U) ~~(S)~~ Hq SAC realigned the tanker alert degrades within 15AF units because of bomber degrades.⁴⁸
- 30/2339Z (U) ~~(S)~~ Hq SAC again realigned the alert degrades, primarily due to crew shortages.⁴⁹

November

- 02/0030Z (U) Hq 15AF requested that Hq SAC readdress the maintenance manning inadequacies of the KC-135Q unit at Beale. The utilization of 456th BMW personnel for Bullet Shot and Giant Reach missions caused an adverse effect on the wing.⁵⁰
- 02/0055Z (U) ~~(S)~~ Hq 15AF provided reconstitution timing for alert aircraft redeploying from Bullet Shot.⁵¹

98 BMW Briefing

15AF/DO

The following is submitted as pertains to your letter, 15 Oct 1973:

Question 1 - What equipment and consumable supplies are available at the WRM locations?

Answer - WRM levels are established by HQ AFPC and the using major command based on requirements needed to effectively support wartime additive missions. When SAC is a tenant, the host base is responsible for all actions concerned with WRM. A monthly report of authorized/on hand consumable WRM is submitted by each base to their NAF. These reports are consolidated and forwarded to HQ AFPC with a copy furnished to the NAF's major command. This procedure only pertains to consumable assets; equipment reports are forwarded directly from base to major command and HQ AFPC. Under these reporting procedures, the 98th WRM reports go to USAFE and HQ AFPC.

Question 2 - How are vehicles in WRM treated - are they used and inspected; by whom?

Answer - WRM vehicles are USAFE assets, and as such are governed by USAFE directives with regards to inspection, usage and storage. They are coded as joint use and in-service at present.

Question 3 - What is the status of the JP-7 fuel? What is the fuel flushing procedure, and who conducts it?

Answer - There are no facilities for storage and handling of JP-7 at Torrejon. One R-5 refueler (5000 gal) has been shipped from McCoy to provide some storage and transfer capability. It left Dover AFB by airlift this last weekend, 13 and 14 Oct 73. The flushing procedure is accomplished by OMS and Fuels. Fuels provides equipment, fuel and sampling. The OMS crew chief supervises the entire operation. Procedures are covered in T.O. 42B-1-16 and T.O. 1C-135(K)Q-2-13. When JP-4 has been on a Q model tanker, it is necessary to drain the contents of the fuel and flush 25,000 - 30,000 pounds of JP-7 fuel through the system until the flash point and color of the fuel is within limits. This takes 5 - 6 hours. Partial flushing can be accomplished in flight by leaving about 3,000 lbs of JP-7 in the upper deck tanks and allowing it to drain into the tanks that contained JP-4. The aircraft can maneuver in such a way to partially flush the system. Thus, the ground flushing is easier, and about 3 hours are saved. The contaminated fuel from the operation is downgraded to JP-4 and blended in that system.

Question 8 - Why don't we make WRM inspections no-notice? Work through USAFE for approval.

Answer - AFM 67-1, Vol I, Part One, Chap 14, Para 18(a)(8) states that major air commands will make periodic staff visits (at least annually) to each base to ascertain that responsibilities for WRM are properly carried out. During SAC/MAF IG visits, WRM reporting and storage procedures are inspected.

Question 9 - Are fuels experts coming to be in place with Q aircraft? How will the timing be met?

Answer - Fuels experts are normally deployed with Q aircraft when operating out of a base without proper facilities. Presently, two fuels personnel are deployed to Torrejon from Beale with a field test kit for sample analysis. Timing is not a problem when fuel personnel are deployed with aircraft.

Question 10 - WRM Inspections - include the admin package for support as well as facilities.

Answer - If a unit is authorized a station set, housekeeping set, etc., these will be inspected by the I.G. This holds true even if the I.G. is visiting a unit that is tenant on a base owned by another command.

The SAC IG conducts WRM inspections on an annual basis. As the 98th Strat Wing is responsible directly to SAC no inspections are conducted nor are the results forwarded to the 15AF IG.

KC-135Q Maintenance Manning, 456 OMS

CV

1. Problem: The KC-135Q Tanker Branch in the 456 OMS is levied with a heavy TDY commitment in support of 9SRW operations. SAC treats the organization as any other tanker organization and tasks it for BULLET SHOT support. The recent GIANT REACH mission has pointed out this policy spreads the manning too thin and jeopardizes the 456 OMS's capability to support 9SRW contingencies such as GIANT REACH.

2. Discussion: The manning problem in the 456 OMS Tanker Branch has been a source of concern for this headquarters since February 1972 when General Carlton sent a message to CINCSAC LG/DP/DO (Atch 5) describing inadequacies in manning and low morale. When an additional TDY commitment of three airplanes and nine people was programmed to begin in July 1973, we sent a letter to SAC LG/PO/OP (Atch 4) stating the adverse effect on mission capability this commitment would have. SAC delayed implementing this new levy. In September SAC began tasking the 456 OMS for BULLET SHOT. The program sends Mather replacements TDY to Beale on a one for one basis. However, SAC stipulated Mather personnel could not go TDY out of Beale (Atch 3). This policy affected the Tanker Branch by reducing personnel available to fill normal KC-135Q TDY lines. Recognizing this we sent a message to SAC (Atch 2) recommending cessation of BULLET SHOT tasking against the 456 OMS Tanker Branch. SAC disapproved our recommendation (Atch 1). During the recent GIANT REACH mission, the 456 OMS Tanker Branch was barely able to fulfill all TDY requirements without using Mather personnel. Beale managers were significantly constrained by SAC guidance and the requirements to TDY tanker branch personnel to [redacted] Spain, BULLET SHOT, and finally GIANT REACH.

3. Recommendation: We are asking SAC to review our previous recommendations in light of GIANT REACH and to consider the 456 OMS Tanker Branch as a Recon unit for purposes of BULLET SHOT manning.

6SW EIELSON AFB, ALASKA

Additionally,

the 6SW is required to generate three (3) RC135Ds. 

 one aircraft at Eielson was flying, one was TDY to Mildenhall and flying, and the other aircraft at Eielson was out for throttle alignment with an ETIC of 251000Z. The two aircraft which were flying recovered from their operational sorties as scheduled. The Eielson aircraft recovered at Eielson, at 250816Z, the TDY aircraft recovered at Mildenhall at 251546Z. At 251839Z all  aircraft were combat-ready.

9SRW BEALE AFB, CA

The 9SRW had a total of five reconnaissance aircraft TDY to operating locations when  Two of these aircraft continued the TDY requirement as directed by higher headquarters. Three aircraft were at  two of which were operational ready, and one NORM for left generator with an ETOR of 251500Z. The committed aircraft at Beale was in-commission. All 9SRW EWO committed aircraft were combat-ready at 251500Z Oct.

UNCLASSIFIED

All redacted information is exempt from automatic downgrading and declassification under E.O. 12958, E.O. 13526, and E.O. 13526, except where indicated under exemption (b)(3) and (b)(6)

The 55SRW has a total of five aircraft committed to EWO. [REDACTED]

[REDACTED] three aircraft were in-commission and two were NORM with an ETOR of 251200Z and 261500Z. At 250842Z, one aircraft was launched on an operational sortie and recovered at 260421Z. At 251839Z, the 55SRW had five aircraft combat-ready and one airborne on a higher headquarters directed mission.

100SRW DAVIS-MONTHAN AFB, AZ

The 100SRW has a total of six reconnaissance aircraft committed to EWO requirements. [REDACTED] three were in-commission at Davis-Monthan and three TDY to [REDACTED]. Of the three aircraft TDY, one was operational ready, one NORM, landing gear, with an ETOR of 250900Z and the other NORS for face heat resistors with an ETOR of parts +6 hours. At 252210Z, one aircraft at the OL was launched on an operational sortie recovering at 260810Z. This aircraft was in maintenance recovery until 261430Z. The other two aircraft were in-commission at the estimated times. One aircraft at Davis-Monthan developed a hydraulic leak and was back in-commission at 261100Z. Therefore, all 100SRW EWO committed aircraft were combat-ready at 261100Z.

PASS TO USAF/DO/DOX/XP

0
+01 1. THE 5RW IS PREPARED TO IMPLEMENT GIANT LANCE IMMEDIATELY AS DIRECTED. WE ANTICIPATE BEING ABLE TO SUSTAIN A BASIC GIANT LANCED CYCLE FOR AS LONG A PERIOD AS REQUIRED.

+02 2. I FORESEE NO DIFFICULTY IN BEGINNING AN OPTION ONE (CASAR LAUNCH) AND CONTINUING FROM OPTION ONE TO OPTION TWO. THIS INVOLVES MINOT

+03 TANKERS 101, 102, 109, AND 110. UNDER PRESENT CIRCUMSTANCES WE CANNOT IMPLEMENT AN INITIAL LAUNCH UNDER OPTION TWO. THIS LATTER OPTION

+04 UTILIZES TANKERS 114, 118, AND 109. OUR LIMITING FACTOR IS AVAILABLE KC-135 AIRFRAMES. WE POSSESS 13 AIRFRAMES AT MINOT, TWO OF WHICH

+05 ARE NOT CURRENTLY EWO CAPABLE. WE CANNOT GENERATE A TANKER SORTIE 114.0

+06 3. WE CAN CYCLE B-55 AND KC-135 FLIGHT CREWS THROUGH A GROUND AIR GROUND ALERT CYCLE WITHOUT EXHAUSTING OUR RESOURCES ON AN

+07 ENDURING BASIS. THIS ASSUMES NO REQUIREMENT TO LAUNCH BEALE TWO OR BEALE ONE NOW RECONSTITUTED AT MINOT. ADDITIONALLY, WE ARE CREW

+08 LIMITED FOR B-52 GROUND SPARES IF NON-ALERT GROUND SPARING IS REQUIRED. 4. SUCCINCTLY:

A. WE ARE READY TO GO WHENEVER DIRECTED.0

+09 10 MINOT F35 10252059Z
05JUN58 FAF01/FAFPL*SACPL

B. WE CAN USE ALPHA AND CHARLIE SORTIES ONLY; TANKER AIRFRAMES ARE THE LIMITING FACTOR FOR EMPLOYMENT OPTIONS.0

+11 C. WE ARE B-52 CREW LIMITED IF REQUIRED TO GROUND SPARE WITH NON-ALERT AIRCRAFT WHILE MAINTAINING A GROUND ALERT ROTATIONAL CREW CYCLE.0

+12 WE HAVE THE ABILITY TO GROUND SPARE USING OTHER HARD ALERT SORTIES ON A REPLACEMENT BASIS.0

QUOTE:

REFERENCE: SACM 55-7, VOL 1.

0

+02

1. GENERATION PRIORITIES IN RESPONSE TO AN [] AS STATED IN REFERENCED MANUAL ARE CATEGORY CHARLIE, GIANT LANCE BACK UP REQUIREMENTS, CATEGORY FOXTROT, AND DEGRADED ALFA SORTIES.0

+03

SIMILARLY, IN RESPONSE TO A 'P' HOUR THE LAST SORTIES TO GENERATE ARE DEGRADED ALFAS.

THIS SEQUENCE WAS DEVELOPED FOR A RELATIVELY SMALL NUMBER OF DEGRADED ALERT SORTIES.0

+04

MAJOR DEGRADES IN THE B-52 D/G UNITS REQUIRE REVISION TO THESE P0

+05

PRIORITIES. THIS MESSAGE ESTABLISHES NEW GENERATION PRIORITIES FOR B-52 D/G AND MATED TANKER UNITS. THESE PRIORITIES WILL REMAIN IN EFFECT UNTIL TERMINATED BY THIS HEADQUARTERS.0

+06

2. B-52 D/G UNITS WILL GENERATE CATEGORY ALFA SORTIES FIRST. THE UNIT PRIORITY LIST WILL BE USED TO ESTABLISH PRIORITY FOR GENERATION.0

+07

IF THE FIRST SORTIE ON THE PRIORITY LIST IS AN AGM-28 SORTIE (EARLIEST GENERATION 8 HOURS) AND THE UNIT HAS A NON-AGM SORTIE THE NON-AGM SORTIE WILL GENERATE FIRST.0

+08

CATEGORY CHARLIE AND FOXTROT SORTIES WILL BE GENERATED IN NORMAL SEQUENCE FOLLOWING THE ALFA FORCE. IF GIANT LANCE IS IMPLEMENTED CHARLIE/FOXTROT SORTIES WILL BE DEGRADED AS NECESSARY TO PROVIDE0

SUBJ: KC-135Q MAINTENANCE MANNING.

1. IN VIEW OF THE RECENT GIANT REACH MISSION, IT IS APPROPRIATE TO RE-ADDRESS THE KC-135Q MAINTENANCE MANNING INADEQUACIES AT THE 456 OMS. THE PERTINENT RAMIFICATIONS OF THIS PROBLEM HAVE BEEN PROVIDED TO YOUR STAFF ON THREE OCCASIONS SINCE FEBRUARY 1972. OUR MOST RECENT MESSAGE LG281700Z SEP 73 TO SAC DPR/DPX/LGM/LOK DISCUSSES THE ADVERSE EFFECT OF LEVYING BULLET SHOT TDY REQUIREMENTS ON THE TANKER BRANCH WHILE SENDING MATHER AFB PERSONNEL TDY TO BEALE. BEALE MANAGEMENT WAS FURTHER CONSTRAINED BY THE PROHIBITION THAT MATHER PERSONNEL COULD NOT BE SENT TDY FROM BEALE (SAC PRAB2, 191500Z SEP 73). THE ANSWER TO OUR LG MESSAGE ABOVE WAS SAC DPR 031500Z OCT 73 WHICH DISAPPROVED OUR MAJOR RECOMMENDATIONS.

2. DURING THE INITIAL PHASE OF GIANT REACH, 456 OMS MANAGEMENT WAS PLACED IN A NEAR UNTENABLE POSITION DUE TO EXISTING TDY COMMITMENTS AND THE CONSTRAINT IMPOSED BY THE ABOVE DPMR2 MESSAGE. ALTHOUGH THIS CONSTRAINT WAS MODIFIED BY SAC LGHM MSG 111934Z OCT 73, THE CHANGE CAME TOO LATE TO BENEFIT THE UNIT. FORTUNATELY, THE UNIT WAS ABLE TO ACCOMPLISH THE MISSION WITHOUT SENDING MATHER PERSONNEL TDY; HOWEVER, THIS SUCCESS WAS PRIMARILY ATTRIBUTABLE TO THE TENACITY, PROFESSIONALISM, AND SOUND LOGIC DISPLAYED BY MEMBERS OF THE 456 BW.

3. WE FEEL THE GIANT REACH MISSION CLEARLY DEMONSTRATES THAT 456 BW KC-135Q AIRCRAFT ARE TIED DIRECTLY AND INSEPARABLY TO THE 9SKW OPERATIONS. SIMILARLY, WE DEEM IMPERATIVE THE NEED TO PROVIDE THE TANKER BRANCH THE SAME STABILITY AND FLEXIBILITY ENJOYED BY THE 9SKW. THEREFORE, TO ASSURE THE 456 BW'S FUTURE CAPABILITY TO ACCOMPLISH ITS VERY IMPORTANT RECON SUPPORT MISSION, WE MAKE THE FOLLOWING RECOMMENDATIONS:

A. CEASE BULLET SHOT AND OTHER TDY LEVIES AGAINST THE 456TH

Capt Peterschmidt 1/2M/4438

EX47

TANKER BRANCH EXCEPT THOSE ASSOCIATED WITH THE KC-135Q MISSION. PROVIDE THIS BRANCH THE SAME STATUS AS THE 9SRW AND ONLY TASK FOR BULLET SHOT SUPPORT BASED ON MANNING IN EXCESS OF 100 PERCENT AUTHORIZED.

B. RE-EVALUATE THE RECOMMENDATIONS IN OUR 15 JUN 73 G LETTER TO CINCUSAC LG/IO/DP, SUBJ: TDY COMMITMENT - 456 BOMB WG, AND OUR 281700Z SEP 73 MESSAGE.

4. THIS IS A SERIOUS PROBLEM REQUIRING PROMPT RESOLUTION. THE 9SRW GLOBAL CONTINGENCY RESPONSE IS AFFECTED. IF THE KC-135Q FLEET IS TO BE RESPONSIVE, THEN WE MUST AFFORD THE TANKER BRANCH PERSONNEL THE SAME DEGREE OF STABILITY AND PROTECTION AS WE DO THE 9SRW. MY STAFF STANDS READY TO PROVIDE ANY ASSISTANCE OR FURTHER AID REQUIRED.

WORKING PAPER

'ASSUME DEF CON THREE'

UNCLASSIFIED

All redacted information denied under exemption (b) (1) and (b) (7)(C) and FOIA 2008 except where indicated under exemption (b) (3) and (b) (6)

It was when a sepulchral voice cut in on a regular program of American Forces Radio: "This is a recall announcement," it said, "for the 909th Air Refueling Squadron, 378th Field Maintenance Squadron, 378th Strategic Air Wing and 82nd Strategic Reconnaissance Squadron. I repeat, this is a recall announcement for..." At U.S. military bases around the world and on American ships at sea, the dramatic orders came in last week over coded Teletype circuits and scrambler telephones: all American forces were to go to "Defense Condition Three." The Defense Department, in vintage Pentagonese, said that meant "an increase in force readiness above that required for normal readiness." In fact it meant that the 2,231,000 U.S. military men deployed at home and abroad were put on alert and ordered to be ready to move at the drop of a command.

The first alert message clacked out of the war room at 12:10 a.m. under the signature of Defense Secretary James R. Schlesinger. "All commands," read the order. "Assume Def Con Three." The move was the first worldwide alert since Lyndon Johnson braced all American forces on the day that President Kennedy was assassinated in 1963. (The 1968 Pueblo incident, for example, merited only a partial alert.) The Mideast alert rekindled memories of the last time Washington and Moscow stood eyeball-to-eyeball—the Cuban missile crisis which, by ironic coincidence, came eleven years ago to the week. Officials

was nothing more than a "precautionary" measure.

The U.S. has five different "defense readiness conditions." Def Con Five is normal peacetime readiness in which forces are not expected to be ready for combat—a luxury denied America's global forces for more than a decade. Def Con Four—the state in which troops have been kept since the start of the Vietnam fighting—is defined by the Pentagon as an "increased intelligence watch and strengthened security measures." After Def Con Three, Def Con Two establishes "a further increase in force readiness but less than maximum readiness." Finally, there comes Def Con One—"maximum force readiness," in Defense Department terms; in the language of the common man, the nation is poised on the brink of war.

Sabotage: Although all U.S. forces were placed on Def Con Three status, some commands were ordered to be more alert than others. Units in West Germany were warned that Arab terrorists might try to sabotage U.S. communications. And the Army's elite 82nd Airborne Division based at Fort Bragg, N.C., was thrown into a frenzy of action. "The scene at the base," reported NEWSWEEK's Vorn E. Smith, "looked like a shot from a World War II movie. At dawn, speeding cars were streaking along Bragg's streets with returning GI's. Long lines of troops filed quickly through hastily set up tents for inoculations. There were stacks of machine guns and missile launchers piled up to await load-

UPI
Bragg: Command performance

ing. Red-hatted parachute riggers—the men who pack the chutes used to float heavy machinery down from transport planes—were hurrying across the lawns with packaged parachutes in their hands. And at adjoining Pope Air Force Base, an armada of huge C-141 cargo jets stood lined up, wing tip to wing tip, waiting to take on the machinery of war."

Other special precautions were taken as well. The Pentagon ordered 70 B-52 bombers based on Guam to fly to U.S. bases and take up position for the assignments they would have in case of nuclear war. And the aircraft carrier John F. Kennedy and its warship escorts cruising in the eastern Atlantic were ordered to join the Mediterranean-based Sixth Fleet for swift movement to the Mideast if necessary. But such brink-of-war posture was by no means universal. "Everything here is the same as usual," said an official at one large U.S. air base, and that was true of many posts—even bases in West Germany, whose government had already complained bitterly over the use of its territory for the shipment of U.S. military hardware to Israel. In fact, for the majority of bases, when the alert began to taper off late in the week it was difficult to see what the difference had been between standard operating procedures and the ones breathlessly ordered during the nation's brief fling with Def Con Three.
