A great deal of research is being devoted to new approaches. Generally speaking, these fall into three broad categories: systematic program testing, mathematical proofs of program correctness, and writing programs so that they are known to be correct in the first place. The last of these, writing programs that are known to be correct, appears to be already developed and ready for use. The first, systematic program testing, has reached the computer assisted stage. The extent of its usefulness in this form and the prospects for extending it to a fully automatic technique remain to be seen. The second, mathematical proofs of program correctness, will be restricted in its application to relatively trivial problems until at least one serious fundamental difficulty is overcome—the development of more powerful theorem provers.

18267. Kayser R. F., Jr., Raveché, H. J., Wood, W. W., *Comments on the closure problem in the statistical theory of fluids*, *J. Chem. Phys.* **69**, No. 10, 4617-4620 (Nov. 15, 1978).

Key words: closure; fluids; nonconservative forces; path dependence; potential of mean force; quadruplet correlation.

It is shown that if the BBGKY hierarchy is truncated by the approximation for the quadruplet correlation function $g_{1234} =$

$g_{12}g_{13}g_{14}g_{23}g_{24}g_{34}$, the resulting system of equations yields solutions for g_{12} and g_{123} which are path dependent. This result is consistent with an earlier argument by Raveché and Green that the closure leads to a nonconservative force on a particle in a fixed triplet of particles. The magnitude of the path dependence is investigated and its consequences are discussed.

18268. Pezoldt, V. J., Persensky, J. J., RameySmith, A. M., *Lawnmower safety research*, *Proc. Human Factors Society 22d Annual Meeting, Detroit, MI, October 16-19, 1978*, pp. 659-663 (Human Factors Society, Santa Monica, CA, 1978).

Key words: anthropometry; human factors; lawn mowers; psychophysics; reaction time; safety research.

The Human Factors Group at the National Bureau of Standards (NBS) has supported the Consumer Product Safety Commission (CPSC) during the development and evaluation of a power lawn mower safety standard. This support provided CPSC with data concerning how lawn mower users interact with power mowers. Three studies assisted CPSC in resolving specific questions concerning requirements in the proposed safety regulation based on a report from Consumers Union (Consumers Union, 1975).

18269. Schneeberger, T. J., Linsky, J. L., Worden, S. P., *The helium triplet-to-singlet ratio in T Tauri stars*, *Astron. Astrophys.* **62**, 447-448 (1978).

Key words: helium lines; T Tauri stars.

The He I lines at $\lambda 5876$ and $\lambda 6678$ are used to determine the triplet-to-singlet ratio for T Tauri stars DF Tau and BP Tau. The ratio is approximately 3. Line profiles and absolute intensities are presented.

18270. Van Blerkom, J., Van Blerkom, D., *The effect of an expanding dust cloud on radial velocity measurements*, *Astrophys. J.* **225**, No. 2, 482-487 (Oct. 15, 1978).

Key words: cosmic maser sources; radial velocities; radiation transfer; scattering.

Radial velocities of "supergiant" maser sources, such as VY CMa, do not always agree with what would be expected if the maser emission originates in an expanding spherical shell. It has been proposed that the photospheric absorption lines are shifted to the red by scattering off dust grains in the shell. A Monte Carlo computation of this process is performed here. The results strongly support the scattering hypothesis, although the question of how the redshift can disappear in only a few years is bothersome. In particular, it is shown that if the spectrum of α Her is passed through an expanding dust shell, the emergent spectrum is remarkably close to that of VY CMa.

18271. Alvarez, R., Rook, H. L., *Standard reference materials 1567, Wheat Flour, and 1568, Rice Flour, certified for concentrations of selected trace element nutrients and environmentally important constituents*, *Proc. 10th National Conf. on Wheat Utilization Research, Tucson, AZ, Nov. 16-18, 1977*, pp. 156-162 (U.S. Dept. of Agriculture, Berkeley, CA, Aug. 1978).

Key words: flour, unfortified; NBS standard reference materials 1567; nutrients, wheat and rice flour; rice flour; wheat flour.

The National Bureau of Standards has issued two unfortified flour Standard Reference Materials—a bleached wheat flour and a rice flour. The Certificates of Analysis for SRM 1567, Wheat Flour, and SRM 1568, Rice Flour list concentration values for selected trace element nutrients, environmentally important elements, and other trace elements of undefined func-

tion. These SRM's were developed because of the importance of trace elements, which are present in foods at or below the parts-per-million level and because of the difficulty of determining them reliably. The certified reference materials are intended primarily for evaluating the accuracy of these elemental determinations in flours and other cereal foods. They will be useful for developing reliable trace element methods, for calibrating the instrumentation used in these analyses, and for providing certified values to which experimental data acquired at different times by the same or different laboratories can be compared.

18272. Bowen, R. L., **Adhesive bonding of various materials to hard tooth tissues—Solubility of dentinal smear layer in dilute acid buffers**, *Int. Dent. J.* **28**, No. 2, 97-107 (1978).

Key words: acid; adhesion; buffer; dental materials; dentin; disturbed layer; pH; pK; smear layer; solubility; surface; toxicity.

Adhesion between composite restorative materials and dentin or cementum surfaces of teeth is severely limited by a "smear layer" (a disturbed surface region), which persists on the surface after it has been cut or mechanically disturbed. Clinically feasible means of removing this layer with acidic solutions were studied; the purpose was to find a solution of highest pH that would accomplish this removal, as evidenced by scanning electron microscopy. Buffer solutions were used, at concentrations isosmotic with tissue fluids. Acids were selected on the basis of pK values, covering the range of 5.12 to 0.64. An attempt was made to avoid toxic compounds, those forming chelate complexes, and those that would precipitate solid phases due to the common ion effect. Freshly cut dentin surfaces were exposed to each solution for 30 seconds, rinsed, dried and examined with SEM. The results suggest that the smear layer dentin can be removed by exposure to a 0.16 molar solution (isotonic with tissue fluids) of monobasic acids with pK values in the range of about 3.8 to about 2.5. Solutions having pH values of about 2.5 ± 0.6 should be given further study.

18273. Candela, G. A., Kahn, A. H., Negas, T., McDaniel, C. L., **Magnetic susceptibility of cerium tantalate compounds**, (Proc. 13th Rare Earths Research Conf., Olgebay Park, WV, Oct. 16-20, 1977), Paper in *The Rare Earths in Modern Science and Technology*, pp. 441-446 (Plenum Press, New York, NY, 1978).

Key words: cerium tantalate; magnetic susceptibility; paramagnetism; theoretical.

The cerium oxide-Ta₂O₅ system contains three trivalent Ce compounds, CeTa₃O₉ (perovskite-type), CeTaO₄ (LaTaO₄ structure-type), and CeTa₂O₁₉. Preparation of single crystals, crystallographic properties, and several unusual oxidation-reduction reactions were detailed in the Proceedings of the 12th Rare Earth Research Conference, 1976. These phases have been further characterized by measurement of the paramagnetism of the Ce³⁺. We have measured the magnetic susceptibilities of the compounds over the temperature range 2 K to 265 K. In contrast to previous interpretation, the data can be explained on the basis of noninteracting Ce³⁺ ions under the influence of cubic crystalline field. The Ce³⁺ ion has the ground state ²F_{7/2} with an effective $g = 6/7$. A cubic field splits the ground state into a quartet Γ_8 and a doublet Γ_7 . An analysis of the susceptibility gives a good fit to the data over the complete temperature range. An orbital reduction of the Ce³⁺ magnetic moment of 8 percent was found for the CeTa₃O₉.

18274. Engen, G., **Instrumentation: Six-ports simplify network analysis**, *Microwave Syst. News*, pp. 54-55 (Jan. 1978).

Key words: automatic network analyzer; microwave; microwave measurements; six-port.

The concept of the 6-port microwave measuring system is introduced and placed in the context of the evolution of microwave measurement technique.

18275. Feldman, A., **Measurement of the photoelastic constants of optical materials**, *Opt. Eng.* **17**, No. 5, 453-462 (Sept.-Oct. 1978).

Key words: acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; piezo-optic; strain; stress; stress birefringence; Twyman-Green.

The photoelastic constants describe the effect of stress or strain on the refractive indices of materials. These coefficients are important in several applications. They are required for the computation of stress-induced optical distortion in optical systems such as high-power laser systems and they are needed for computing figures of merit for materials to be used in acousto-optic devices. Interferometric and polarimetric techniques are described for measuring piezo-optic coefficients under static loading conditions. Acousto-optic and Brillouin scattering techniques are described for measuring elasto-optic constants.

18276. Feldman, A., **Ultralinear bistable electro-optic polarization modulator**, *Appl. Phys. Lett.* **33**, No. 3, 243-245 (Aug. 1, 1978).

Key words: differential optical gain; optical bistability; Pockels cell; polarizer; power limiting; ultralinear modulator.

An optical device utilizing optical feedback has been constructed with a Pockels cell and polarizing components. Two modes of operation of the device are demonstrated. Both modes exhibit optical bistability. It is demonstrated that in one mode of operation the nonlinear dependence of the output intensity as a function of an input optical or electrical signal can be made arbitrarily small compared to the linear dependence.

18277. Kim, C. K., Feldman, A., Horowitz, D., Waxler, R. M., **Temperature dependence of Szigeti effective charge of alkali halides**, *Solid State Commun.* **25**, 397-399 (1978).

Key words: alkali halides; deformation dipole model; KBr; KCl; LiF; NaF; Szigeti effective charge.

The second Szigeti relation was used to obtain the temperature dependence of the Szigeti effective charge, e_s . The results are discussed in the framework of the deformation dipole model. Recent experimental data are used to show that the volume derivatives of e_s of most ionic solids are positive, thus providing evidence that the deformation dipole model is qualitatively valid.

18278. Munro, R. G., **Theory of the pressure dependence of a prototype exchange integral**, *Phys. Rev. B* **17**, No. 12, 4660-4665 (June 15, 1978).

Key words: applications; exchange integral; pressure dependence; theory.

The variation of electron exchange integrals in solids subjected to hydrostatic pressures P is considered by examining a prototype exchange integral J . The quantity $(1/J)(dJ/dP)$ is determined within the context of a theory of solids under hydrostatic pressures in which the application of pressure is represented in terms of the crystal compressibility and two parameters which are associated with electronic screening and wave-function-distortion effects. Pressure variations of magnetic-phase boundaries, exchange-enhanced susceptibilities, and exchange interactions of pairs of Cr³⁺ ions in ruby are considered as examples of the applications of the results.

18279. Peterson, R. L., Gayley, R. I., **Multiple magnetic flux entry into superconducting quantum-interference devices (SQUIDS): A general way of examining the $\cos\phi$ conductance**, *Phys. Rev. B* 18, No. 3, 1198-1206 (Aug. 1, 1978).

Key words: magnetic fields; magnetic flux quanta; Josephson junctions; SQUID's; superconductivity.

A new type of experiment is proposed for obtaining information about the $\cos\phi$ conductance of the Josephson effect. Based on measurement of fluxoid entry into a superconducting ring broken by a Josephson junction, the technique is to operate in the low-damping regime for which the voltage excursions associated with fluxoid entry are small. For this case, the constant-voltage expression containing the $\cos\phi$ conductance should be valid. It is shown that the erraticity associated with the low-damping regime has a predictable statistical pattern, which is rather insensitive to noise but quite sensitive to the $\cos\phi$ term. A shunt resistance can be used to vary the average voltage. Statistics can be accumulated over a large number of similar loops, or over one or a few loops at slightly varying bath temperature between runs, or even over one loop at one temperature provided the noise at the junction has appropriate properties. Thus, the technique would appear to be capable of estimating the controversial coefficient of the $\cos\phi$ term as a function of voltage and temperature for any type of junction for which low damping can be achieved.

18280. Rosasco, G. J., Bennett, H. S., **Internal field resonance structure: Implications for optical absorption and scattering by microscopic particles**, *J. Opt. Soc. Am.* 68, No. 9, 1242-1250 (Sept. 1978).

Key words: complex refractive index; efficiency factor for absorption; electric multipole; internal fields; magnetic multipole; Mie scattering theory; Raman scattering; resonances; small particles.

Mie scattering theory is used to calculate the efficiency factors for absorption by microscopic dielectric spheres. Resonances in the efficiency factors for absorption and resonances in the amplitudes of the electric and magnetic multipoles which occur in an expansion of the fields inside the dielectric sphere are discussed. Several trends in the strengths and width of the various resonances as functions of the absorption coefficient of the sphere, size parameter, multipole order, and multipole resonance number are given. A formal solution for elastic (Mie) and inelastic (Raman) scattering by microscopic particles is derived from the extinction theorem. With this background, some implications of the resonances in the interpretation of absorption, fluorescence, and Raman scattering by microscopic particles are discussed.

18281. Unassigned.

18282. Siedle, A. R., Candela, G. A., Finnegan, T. F., Van Duyne, R. P., Cape, T., Kokozska, G. F., Woyciesjes, P. M., Hashmall, J. A., Glick, M., Ilsley, W., **Metal-tetrathiaethylenes**, (Proc. Synthesis and Properties of Low-Dimensional Materials, New York, NY, Sept. 29, 1978), Paper in *Ann. NY Acad. Sci.* 313, 377-381 (1978).

Key words: charge transfer complex; chlorocuprates; coordination compounds; donor-acceptor complex; electron spin resonance; low dimensional materials; tetrahydrotetrathiafulvalene; tetrathiafulvalene.

Recent results describing the chemistry of metal complexes of tetrathiafulvalene (TTF) and tetrahydrotetrathiafulvalene (H_4TTF) are reviewed. Three broad classes of materials have been prepared: crystal complexes, donor-acceptor complexes, and salts.

Crystal complexes include (H_4TTF)($HgCl_2$)₃, characterized by a single crystal x-ray diffraction study, and (TTF) [Pd(acac)₂].

The donor acceptor complexes include (TTF)₂MX₂ (M = Pd, Pt; X = Cl, Br) which have been studied by x-ray photoelectron, electronic, Raman and infrared spectroscopy and by measurement of electrical conductivity. Evidence for sulfur lone pair-metal interaction is presented.

Electron spin resonance and magnetic susceptibility data indicate the presence of three dimensional magnetic exchange fields in the new chlorocuprate salts (TTF)₂CuCl₄ and (TTF)CuCl₄.

18283. Washington, M. A., Genack, A. Z., Cummins, H. Z., Bruce, R. H., Compaan, A., Forman, R. A., **Spectroscopy of excited yellow exciton states in Cu_2O by forbidden resonant Raman scattering**, *Phys. Rev. B* 15, No. 4, 2145-2153 (Feb. 15, 1977).

Key words: band structure; cuprous oxide; exciton; optical spectra; Raman scattering; resonant Raman scattering.

The Raman-scattering spectrum of Cu_2O at 4 °K was measured with a tunable cw dye laser as the exciting source. The dye laser was tuned to several hundred frequencies in the range 17 135-17 600 cm^{-1} which spans the range of the excited states of the yellow exciton series. At each laser frequency, the cross section for normally forbidden Raman scattering from the strongest odd-parity phonons Γ_{12}^- (109 cm^{-1}) and $\Gamma_{15}^{-(1)}$ (LO, 154.5 cm^{-1}) was determined. The Γ_{12}^- cross section increases dramatically when either the laser or the scattered light is resonant with excited S or D, yellow exciton states. The location and polarization of these peaks in the cross section is entirely consistent with the quadrupole-dipole Raman-scattering mechanism which has previously been observed when the laser is resonant with the lowest 1 S yellow exciton state. The dependence of the Γ_{12}^- cross section on incident laser frequency thus provides a new spectroscopic technique for locating dipole-forbidden but quadrupole-permitted excitonic states without the application of symmetry-breaking perturbations such as electric fields. Interpretation of the resonance enhancement of the $\Gamma_{15}^{-(1)}$ phonon feature is considerably more complicated. Extremely large enhancement of the LO (but not the TO) component was observed when the laser was tuned close to states previously identified as $3D_2$ and $4D_2$. We ascribe these resonances to an intraband double resonance mediated by the Fröhlich exciton-lattice interaction. We consider two potential microscopic models for those resonances: (i) optical quadrupole, dipole Fröhlich, optical dipole; (ii) optical dipole, quadrupole Fröhlich, optical dipole. The predicted behavior of these two models is compared with polarization measurements, and with the dependence of the Raman intensity on scattering angle, electric field, and laser frequency. It is found that neither model is consistent with all of the data.

18284. Engen, G. F., **Design considerations for automatic network analyzers based on the six-port concept**, *Proc. Conf. IEE Euromas 77, Sussex, England, Sept. 5-9, 1977*, pp. 110-111 (Institution of Electrical Engineers, London, England, 1977).

Key words: automatic network analyzer; automation; microwave measurements; six-port.

Although the six-port measurement technique is rapidly gaining the attention of the microwave community, the theories developed to date yield but limited insight into the question of how best to design the six-port so as to best exploit the concept.

This paper presents an alternative introduction to the general subject which yields substantially improved insight into the design question.

18285. Crawford, M. L., Workman, J. L., Thomas, C. L., **Expanding the bandwidth of TEM cells for EMC measurements**, *IEEE Trans. Electromagn. Comp.* EMC-20, No. 3, 368-375 (Aug. 1978).

Key words: absorber loaded; expanded bandwidth; TEM cells.

This paper discusses the development of a modified (absorber-loaded) transverse electromagnetic TEM cell with expanded bandwidth for use in accurately characterizing electromagnetic interference (EMI) fields within a shielded environment. The cell is analyzed experimentally, both before and after the modification, to determine its radio-frequency (RF) characteristics, both as an RF transmission line and as an electromagnetic (EM) field simulator or detector. Comparative measurements are given to show the performance of the modified versus the unmodified cell in parameters such as voltage standing-wave ratio (VSWR), insertion loss, test-field uniformity, and reverse-coupling characteristics. The results of these measurements indicate an approximate two-fold increase in the upper useful frequency of the modified cell. An example of using the cell to evaluate the radiated emissions from a common electronic module (microprocessor timing circuit) is given. Finally, the technique of absorber loading is extended to larger cells, specifically a $3 \times 3 \times 6$ -m cell.

18286. Hill, J. E., Jenkins, J. P., Jones, D. E., **Testing of solar collectors according to ASHRAE Standard 93-77**, *ASHRAE Trans.* 84, Part 2, 107-126 (1978).

Key words: heat transfer; measurement; radiation; rating; solar; standards; testing.

A proposed procedure for testing and rating solar collectors based on thermal performance was published by the National Bureau of Standards (NBS) in 1974. The procedure prescribed that a series of outdoor steady-state tests be conducted to determine the near-solar-noon efficiency of the collector over a range of temperature conditions. The American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) has recently adopted ASHRAE Standard 93-77. It is similar to the original NBS procedure but calls for additional tests to determine the collector time constant as well as an incident angle correction factor that can be applied to the near-solar-noon efficiency to determine collector performance both early in the morning and late in the day.

Two test facilities have been built at NBS in accordance with ASHRAE Standard 93-77, one for modular water-cooled collectors and the other for air heaters. The purpose of this paper is to describe the recently adopted test procedure, provide a description of the facility at NBS, and to give results of a complete series of tests made according to the Standard on several commercially available collectors.

18287. Hill, J. E., Richtmyer, T. E., Jenkins, J. P., **Initial test results for a solar-cooled townhouse in the Mid-Atlantic region**, *ASHRAE Trans.* 82, Part II, 389-404 (1976).

Key words: absorption; air-cooling; computer; hot-water; measurement; residential; solar; testing.

A factory-produced four-bedroom townhouse unit equipped with a solar heating, cooling, and domestic hot water supply system is currently under test at the National Bureau of Standards in Gaithersburg, Maryland. The test house has approximately 110^2 (1200 ft²) of floor area. The solar system consists of 45 m² (485 ft²) of double-glazed flat-plate solar collector having a nonselective coating on the absorber, a water-to-air heat exchanger in a forced-air distribution system for space heating, two large water tanks for thermal storage, and a lithium-bromide absorption refrigeration unit. In addition, domestic

hot water is preheated from the solar system through a water-to-water heat exchanger.

Results are given for the first summer's cooling tests conducted in 1975. It was found that approximately 20 percent of the required cooling energy was obtained from the sun and approximately 75 percent of the energy for domestic hot water. The test results were compared with predicted results for the same conditions. It was found that solar collector array thermal output was less than one-half of what had been expected based both on manufacturers' published data and previous tests done on one part of the array at NBS. Due to the poor performance of the collector array, it was found that no effective use could be made of thermal storage.

18288. Kanda, M., **Transients in resistively loaded antennas, and their comparison with conical antennas and TEM horns**, *Proc. 1978 Int. Symp. Digest, Washington, DC, May 15-19, 1978*, pp. 13-16 (IEEE Antennas & Propagation Society, University of MD, College Park, MD, 1978).

Key words: conical antenna; effective length; FFT; moment method; resistively loaded antenna; TEM horn; time domain measurement; transient response.

The receiving and transmitting transient responses for a relatively short linear antenna with continuous resistive loading are investigated theoretically and experimentally. The antenna considered is a nonconducting cylinder with continuously deposited, varying-conductivity, resistive loading.

The current distribution, the corresponding effective length, and the driving point impedance are calculated by use of the method of moments and compared with the Wu-King approximation. The receiving and transmitting transient responses are calculated in the frequency domain using the results of the effective length and the driving point impedance. The final use of FFT then allows the determination of transient fields given a known input waveform. As a comparison, the receiving and transmitting transient responses for a conical antenna and a TEM horn are also investigated theoretically.

Time domain measurements are performed using a time domain antenna range with a time domain automatic network analyzer. The agreements between theory and experiments of the receiving and transmitting transient responses for the resistively loaded antenna, the conical antenna, and the TEM horn are satisfactory.

The receiving transient response of the resistively loaded antenna indicate that the impulse shape of 70 ps duration is well preserved. This provides the unique capability of this antenna to measure fast, time-varying, transient fields with minimal pulse-shape distortion due to nonlinear amplitude or phase characteristics.

18289. Boyle, D. R., **The agonies of automating almost anything**, *Agric. Eng.*, pp. 50-52 (Oct. 1978).

Key words: automation; design; hardware; implementation; laboratory automation; minicomputers; software.

This paper is written to the scientist or engineer who would like to use automation in his laboratory but who is not a computer specialist. The discussion attempts to illuminate some of the major problem areas which are commonly encountered in the development of a minicomputer based automation system, and give suggestions for reducing their adverse impact. Problem areas discussed include: system design, procurement, hardware and software aspects of system integration, and maintenance.

18290. Huie, R. E., Long, N. J. T., Thrush, B. A., **The radiative lifetimes of the first excited states of BO and BO₂**, *J. Chem. Phys. Lett.* 55, No. 3, 404-406 (May 1, 1978).

Key words: BO; BO₂; fluorescence; laser; lifetime; quenching rate.

A pulsed dye laser has been used to study the fluorescence of BO and BO₂ in the gas phase at low pressure. Radiative lifetimes of 87.2 ± 2.6 and 76.3 ± 1.4 ns were obtained for the (000) and (100) levels of BO₂(A ²Π_u) and of 131 ± 15 and 103 ± 6 ns for levels v' = 1 and 2 of BO(A ²Π). Unlike BO₂(A ²Π_u), BO(A ²Π) is strongly quenched by the oxygen carrier.

18291. Huie, R. E., Long, N. J. T., Thrush, B. A., **Laser induced fluorescence of the PH₂ radical**, *J. Chem. Soc. Faraday Trans. II*, **74**, 1253-1262 (1978).

Key words: fluorescence; laser; lifetime; PH₂; quenching rate.

A pulsed dye laser has been used to excite PH₂ radicals from the ²B₁ to the ²A₁ state. The radiative lifetime of the excited state is 4 ± 1 μs for v' = 0-3 and decreases to 0.35 μs for v' = 4. Weak, short lived fluorescence excited at higher frequencies could not be positively assigned to v' = 5. The quenching rate constant for hydrogen increases steadily from 1.24 × 10¹⁰ dm³ mol⁻¹ s⁻¹ for v' = 0 to ≈ 1.6 × 10¹¹ dm³ mol⁻¹ s⁻¹ at v' = 4. Below 22 000 cm⁻¹ the rotational and vibrational structure corresponds to that expected on the basis of the known absorption spectrum of PH₂.

18292. McNall, P. E., Pierce, E. T., Barnett, J. P., **Control strategies for energy conservation in buildings**, *Proc. Symp. Honoring A. Pharo Gage on Energy Conservation Strategies in Buildings: Comfort, Acceptability, and Health*, Hartford, CT, Jan. 25, 1978, pp. 1-12 (J. B. Pierce Foundation Laboratories, Hartford, CT, 1978).

Key words: comfort conditions in buildings; compared comfort control strategies; energy conservation potential; set point controls; temperature controls.

Three control strategies allowing zone temperatures to "drift" between a minimum and a maximum set point, without energy use, were imposed on two example commercial buildings. Each building was simulated on a different computer load program in several locations in the U.S. Comparisons of the energy demands were made for the various cases, showing significant energy saving potentials while maintaining inside thermal conditions which could probably be made acceptable to the occupants.

18293. Brungraber, R. J., Adler, S. C., **Technical support for a slip-resistance standard**, *Am. Soc. Test. Mater. Spec. Tech. Publ.* **649**, pp. 40-48 (1978).

Key words: coefficient of friction; friction; performance standards; safety engineering; slip resistance; test methods.

In the spring of 1975, ASTM Subcommittee F15.03.01 on Specifications and Test Methods for Slip Resistance of Bathing Facilities, requested technical assistance from the Building Safety Section (BSS) of the National Bureau of Standards (NBS) in developing a performance test for establishing quantitatively an acceptable level of slip resistance for bathtubs and shower bases. Close cooperation between the subcommittee members and the BSS staff, coupled with financial support from the Consumer Product Safety Commission (CPSC), resulted in the development of a performance test which approximates the conditions that are likely to occur on bathtub or shower base surfaces, is reliable and repeatable, and discriminates adequately between currently available bathtub and shower base materials.

18294. Ducas, W., Streed, E., Holton, J., Angel, W., **Thermal data requirements and performance evaluation procedures for passive buildings**, *Proc. 2d Natl. Conf. on Passive Solar Heating and Cooling*, Philadelphia, PA, Mar. 16-18, 1978, **2**, 411-430 (Mid-Atlantic Solar Energy Association, Philadelphia, PA, 1978).

Key words: measurement; radiation; rating; solar; standards; testing.

A systematic classification of passive solar buildings and performance factors are proposed to standardize evaluation procedures for these buildings. Two measurement levels are described with appropriate sensors and data acquisition systems to obtain either detailed data for complete component and system evaluation or to obtain "critical" data for evaluating the energy saved at many sites.

18295. Hall, J. H., **Stabilized lasers and precision measurements**, *Science* **202**, 147-156 (Oct. 13, 1978).

Key words: experimental tests of special relativity; high resolution spectroscopy; laser frequency measurements; precision measurements; stabilized lasers.

This article traces the development of stabilized lasers from the Massachusetts Institute of Technology passive-stabilization experiments of the early 1960's up through the current epoch of highly stabilized helium-neon and carbon dioxide and continuous wave dye lasers. The utility, present performance, and limitations of stabilized lasers as standards of length or frequency for precision measurements are discussed. Examples considered of laser applications to physical measurements of outstanding scientific interest include determination of the speed of light, redefinition of the meter, resolution of the photon recoil-induced spectral doubling, use of optical "Ramsey" interference fringes from ultrahigh-resolution spectroscopy, and two improved tests of special relativity.

18296. Hill, J. E., Streed, E. R., **A method of testing for rating solar collectors based on thermal performance**, *Sol. Energy* **18**, 421-429 (1976).

Key words: measurement; radiation; rating; solar; standards; testing.

This paper describes a proposed test method for determining the efficiency of solar collectors under specified outdoor "steady-state" conditions. The prescribed series of tests should provide useful data for the rating of solar collectors based on thermal performance. A study was made of existing theory, measurement practices and a number of collector test procedures in use prior to the publication of the proposed method.

The test apparatuses and major components have been prescribed so a liquid or air can be used as the transfer fluid. The energy of the fluid entering and leaving the collector is determined by making appropriate measurements and these quantities are then compared to the energy incident upon the collector (also determined by measurement) in order to calculate the collector efficiency.

The series of tests to be conducted consists of determining the average efficiency for 15 min periods (integrating the energy quantities) over a range of temperature differences between the average fluid temperature (average of inlet and outlet) and the ambient air. The test apparatuses have been designed so that the temperature of the fluid entering the collector can be controlled to a selected value. This feature is used to obtain the data over the temperature range desired. At least sixteen "data points" are required for a complete test series and they must be taken symmetrical with respect to solar noon (to prevent biased results due to possible transient effects).

Key words: measurement; radiation; rating; solar; standards; testing.

The American Society of Heating, Refrigerating, and Air Conditioning Engineers, (ASHRAE) has recently adopted ASHRAE Standard 93-77 for testing and rating of solar collectors based on thermal performance. Four separate tests are required to be conducted. This paper will briefly explain the tests and indicate how they might be adapted for use with concentrating collectors.

18298. Jones, D. E., **System performance measurements for a packaged solar space heating system equipped with air-heating collectors**, *Proc. Conf. on Performance Monitoring Techniques for Evaluation of Solar Heating and Cooling Systems*, Washington, DC, Apr. 2-5, 1978, pp. 105-114 (U.S. Department of Energy, Conservation and Solar Applications, Solar Heating and Cooling Research and Development Branch, Washington, DC, 1978).

Key words: measurement; radiation; rating; solar; standards; testing.

This paper describes the approach and instrumentation used at the National Bureau of Standards for determining system performance of a packaged solar space heating system equipped with air heating collectors. A method of measuring air flow rate accurately without disturbing system performance through use of the collector as a flow measuring element is the major unique feature of the experimental approach.

18299. Jones, D. E., Hill, J. E., **Testing of flat-plate air heaters according to ASHRAE Standard 93-77**, *Proc. American Section, Int. Solar Energy Society 1977 Annual Meeting, A Solar World*, Orlando, FL, June 6-10, 1977, pp. 2-1-2-4 (American Section of the International Solar Energy Society, Inc., Killeen, TX, 1977).

Key words: measurement; radiation; rating; solar; standards; testing.

A proposed procedure for testing and rating solar collectors was published by the National Bureau of Standards (NBS) in 1975. In early 1977, the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) adopted ASHRAE Standard 93-77 which is a modified version of the NBS procedure. A test facility for air heaters has been built at NBS in accordance with this Standard. The purpose of this paper is to briefly explain the recently adopted test procedure, describe the NBS test facility, and to give typical test results for a commercially available air-cooled solar collector.

18300. Kusuda, T., Bean, J. W., McNall, P. E., Jr., **Potential energy savings using comfort-index controls for building heating and cooling systems**, *Proc. Int. Indoor Climate Symp., Copenhagen, Denmark, Aug. 30-Sept. 1, 1978*,

Key words: computer simulation; energy conservation; heating and cooling load calculation; planned heating and cooling; thermal comfort indices.

Significant energy savings are possible through the use of thermal comfort index controls of building heating and cooling systems. In order to study the potential energy saving by comfort index controls, Fanger's Predicted Mean Vote (PMV) and Predicted Percent Dissatisfied (PPD) indices have been incorporated into NBSLD (National Bureau of Standards Heating and Cooling Load Calculation Program) to determine hourly profiles of indoor thermal comfort conditions under various operating conditions which allow inside control points to vary. Discussed in this paper are the potential applications of this computer program (NBSPMV) for the evaluation of selected energy conservation options, from the standpoint of indoor habitability and energy conservation. These options include increased temperature deadband, natural cooling, nighttime ther-

mostat setback, passive solar heating, evaporative cooling, temperature ramp controls, intermittent heating and cooling, and programmed heating and cooling.

18301. Liu, S. T., Shih, K., Wood, B. D., **Experimental validation of the solar simulation program TRNSYS for a solar domestic hot water heating system**, *Proc. DoE Symp. on Systems Simulation and Economic Analysis for Solar Heating and Cooling*, San Diego, CA, June 27-29, 1978, pp. 193-194 (U.S. Department of Energy, Conservation and Solar Applications, Solar Heating and Cooling Research and Development Branch and Barriers and Incentives Branch, Washington, DC, 1978).

Key words: measurement; radiation; rating; solar; standards; testing.

TRNSYS, a transient simulation program developed by the University of Wisconsin, is currently the most widely used computer simulation program in the solar heating and cooling field. This program has been used to predict system performance of numerous solar heating and cooling systems. Although it is widely used, the accuracy of the prediction has not yet been sufficiently validated with experimental data.

The primary objective of a project currently underway at the National Bureau of Standards is to carry out experiments to validate the TRNSYS program for solar domestic water heating systems. Two approaches are being taken. One is to use the program to predict the performance of six representative solar water heating systems and then to gather long-term experimental data (12 months) on these systems in actual operation at an outdoor test site in Gaithersburg, Maryland. The second approach is to use a laboratory apparatus which has been designed around the typical components simulated in TRNSYS and to gather detailed short-term experimental data on the performance of these components when subjected to closely controlled experiments. The results are then compared with the predictions of TRNSYS for the same experiments.

This paper presents some of the initial results of comparisons obtained using the laboratory apparatus and associated TRNSYS simulation. The specially-designed indoor test configuration will be described. Comparison of test results for several different combinations of hot water use schedule, piping configuration, and assumed solar collector output with those predicted by the applicable component models in TRNSYS under similar conditions will be shown. Emphasis has been placed on comparing the degree of temperature stratification in the storage tanks and heat loss from the tanks.

18302. Richtmyer, T. E., **The use of computer-controlled data acquisition systems in determining solar heating and cooling system performance**, *Proc. Monitoring Techniques for Evaluation of Solar Heating and Cooling Systems*, Washington, DC, Apr. 2-5, 1978, pp. 95-104 (U.S. Department of Energy, Conservation and Solar Applications, Solar Heating and Cooling Research and Development Branch, Washington, DC, 1978).

Key words: measurement; radiation; rating; solar; standards; testing.

For the past few years, NBS has been conducting a number of solar energy related projects. Two, in particular, are solar heated and cooled buildings that use computer controlled data acquisition systems. This paper describes those buildings, their data acquisition systems and discusses problems that have been experienced. Finally, a list of recommendations and suggestions are offered based on those experiences that should help prevent similar problems on future projects.

18303. Santoro, A., Maeland, A., Rush, J. J., **Neutron powder diffraction study of titanium copper deuteride $TiCuD_{0.90}$** , *Acta Cryst. B34*, 3059-3062 (1978).

Key words: deuterium-titanium bond; neutron powder diffraction; profile analysis; rule of reversed stability; structure determination; titanium-copper deuteride.

TiCuD_{0.90}, tetragonal, *P4/nmm*, $a = 3.020$ (1), $c = 6.837$ (3) Å (parameters determined by x-ray powder diffraction), $Z = 2$. The structure has been refined by the method of total-profile analysis of a neutron diffraction powder pattern. The composition obtained from the refinement corresponds to the formula TiCuD_{0.90(1)} (TiCuD_{0.98} by thermal analysis). The D atoms are located at the centers of distorted tetrahedra of Ti atoms, with a Ti—D distance of 1.927 (4) Å.

18304. Streed, E. R., A comparison of flat-plate solar collector thermal performance data obtained indoors and outdoors, *Proc. 1978 Annual Meeting of the International Solar Energy Society, Denver, CO, Aug. 28-31, 1978*, 2.1, 352-361 (American Section of the International Solar Energy Society, Inc., Killeen, TX, 1978).

Key words: measurement; radiation; rating; solar; standards; testing.

Standard test methods for the determination of the thermal performance of flat-plate solar collectors are needed on an international basis to provide consistent and reproducible data for the world market. Indoor and outdoor test methods have been proposed by a task group of the International Energy Agency. The National Bureau of Standards is assisting in the evaluation of these methods. In this paper, a comparison is made of pertinent data obtained within the United States for the thermal efficiency of several state-of-the-art water-heating flat-plate solar collectors. The data was obtained both outdoors as well as indoors using a solar simulator. In addition, the values of the collector heat loss coefficient obtained indoors and outdoors both under nonirradiated conditions is compared with values indicated from the outdoor tests to determine thermal efficiency (irradiated conditions). The comparisons indicate that relatively good agreement is achieved using the various methods but that some of the environmental parameters may require better control and/or simulation during the tests.

18305. Walls, F. L., Stein, S. R., A frequency-lock system for improved quartz crystal oscillator performance, *IEEE Trans. Instrum. Meas.* IM-27, No. 3, 249-252 (Sept. 1978).

Key words: frequency discrimination; frequency lock system; frequency stability; frequency stabilization; oscillator systems; phase modulation; quartz crystal oscillators; quartz crystals.

The intrinsic noise of the best quartz crystal resonators is significantly less than the noise observed in oscillators employing these resonators. Several problem areas common to traditional designs are pointed out and a new approach is suggested for their solution. Two circuits are described which frequency lock a spectrally pure quartz crystal oscillator to an independent quartz crystal resonator. The performance of the composite system is predicted based on the measured performance of its components.

18306. Ayres, T. R., Linsky, J. L., Margon, B., Bowyer, S., Upper limits on extreme ultraviolet radiation from nearby main sequence and subgiant stars, *Astron. Astrophys.* 70, No. 3, 431-434 (Nov. 1978).

Key words: extreme ultraviolet; stellar coronae; x-ray sources.

Flux upper limits for 44-800 Å radiation were measured in a sample of five nearby main sequence stars and one subgiant star using the Apollo-Soyuz grazing incidence telescope. Comparisons of emission measure upper limits with the predictions

of three different methods for estimating coronal properties cannot yet determine which, if any, are valid. Our data do rule out α Centauri A and B having active coronae with emission measures comparable to those of solar plages.

18307. Bedijn, P. J., Habing, H. J., de Jong, T., Model infrared spectra for accreting stars, *Astron. Astrophys.* 69, No. 1, 73-84 (1978).

Key words: accretion; circumstellar shells; star formation.

We have calculated infrared spectra for dusty circumstellar shells that accrete onto stars in free fall. The dust consists of silicate and graphite particles. We solve simultaneously the equation of radiative transfer and the two equations of thermal equilibrium, one for each of the dust species. In four cases (BN object; OMC 2/IRS 3; RCW 57/IRS 1; Mon R 2/IRS 2) model spectra are compared with spectra of observed infrared point sources. In each case good agreement between observation and prediction is obtained for a wide range of models. By using additional criteria (1. radiation pressure does not stop the inflow; 2. A_V/τ_{10} should be larger than 10) we are able to narrow the range of permissible models and to obtain an estimate of the accretion rate \dot{M} . Given the accretion time $M/\dot{M} \geq 10^6$ yr and the number of similar objects known we conclude tentatively, that the four objects are very young early type stars at the end of their accretion phase.

18308. Casinelli, J. P., Castor, J. I., Lamers, H. J. G., Expanding envelopes of early type stars: Current status, *Publ. Astron. Soc. Pac.* 90, No. 537, 496-505 (Oct. 1978).

Key words: early-type stars; stellar winds.

There are currently four theoretical models that have been developed to explain the winds or the origin of the anomalous ionization in the winds of early type stars. This paper reports the results of a workshop on stellar winds that was held at JILA in Boulder, Colorado, from 3 to 6 October 1977. Subsequent work that answered some of the questions raised at the meeting is also presented. The conferees concluded that the winds are probably due to radiation pressure in ultraviolet resonance lines, but that the anomalously high degree of ionization in the winds requires the input of nonthermal energy. Several as yet unexplained observations are mentioned, and areas for future studies are outlined.

18309. Doschek, G. A., Feldman, U., Mariksa, J. T., Linsky, J. L., Electron densities in stellar atmospheres determined from IUE spectra, *Astrophys. J. Lett.* 226, No. 1, L35-L38 (Nov. 15, 1978).

Key words: chromospheres, stars; emission line, stars; late-type, ultraviolet spectra; stars.

An EUV spectroscopic method is described for determining the electron density in solar and stellar plasmas for densities less than $\approx 10^{11}$ cm⁻³ and for temperatures near $\approx 5 \times 10^4$ K. The method is applied to IUE spectra of α Aur, HR 1099, and λ And. Preliminary results give densities of $\approx 10^{10}$ cm⁻³ for Aur and λ And, and $\approx 2 \times 10^9$ cm⁻³ for HR 1099.

18310. Fairchild, C. E., Stone, E. J., Lawrence, G. M., Photofragment spectroscopy of ozone in the uv region 270-310 nm and at 600 nm, *J. Chem. Phys.* 69, No. 8, 3632-3638 (Oct. 15, 1978).

Key words: atom fragments; ozone, photofragment spectroscopy; photofragment spectroscopy of ozone; spectroscopy of ozone, photofragment.

Both O(³P) and O(¹D) atom fragments are observed in the photofragment spectroscopy of O₃ in the Hartley band absorption region 270-300 nm. The quantum yield for O(³P) is 0.1

at 274 nm. The dissociation partner for $O(^3P)$ is $O_2(X^3\Sigma_g^-)$ and that for $O(^1D)$ is $O_2(a^1\Delta_g)$. The $O_2(X^3\Sigma_g^-)$ fragment is populated in a range of vibrational levels, $\nu = 0-10$. For the $O_2(a^1\Delta_g)$ fragment, all energetically accessible vibrational levels are populated at each energy of bombardment. In the Chappuis bands at 600 nm the $O_2(X^3\Sigma_g^-)$ photofragment is produced principally with $\nu = 0, 1$. Photofragment angular distributions are measured in the uv for both O atom dissociation products at each wavelength of bombardment. A theoretical angular distribution for $O(^1D)$ is derived and the resultant prediction is in good agreement with the experimental results.

18311. Geltman, S., **Ionisation dynamics of a model atom in an electrostatic field**, *J. Phys. B*: **11**, No. 19, 3323-3337 (1978).

Key words: dc discharges; dc Stark effect; field emission; ionization theory; spectral density; tunneling.

The time evolution of the ionisation probability of a simple one-dimensional model atom under the influence of an electrostatic field is evaluated by an exact solution of the time-dependent Schrödinger equation. It is shown that in the low-field, long-time limit the decay of the bound state is exponential in time with the decay constant identical to that obtained in the quasiclassical tunnelling theories. For shorter times, however, there are large departures from exponential decay, which lead to ionisation probabilities much higher than expected on the basis of the quasiclassical theories. The potential importance of this in the analysis of DC discharge phenomena is pointed out.

18312. Giampapa, M. S., Linsky, J. L., Schneeberger, T. J., Worden, S. P., **Chromospheric emission lines in the red spectrum of AD Leonis. I. The nonflare spectrum**, *Astrophys. J.* **226**, No. 1, 144-150 (Nov. 15, 1978).

Key words: flare stars; helium; x-ray emission.

High resolution red (5300-7300 Å) spectra of the flare star AD Leonis were obtained with the Kitt peak 4m echelle spectrograph system at a spectral resolution of 0.22 Å at H α . A series of time-trailed plates with 5 hours integration were averaged together to obtain a very deeply exposed representation of the star's nonflaring spectrum. The He I λ 5876 triplet line and λ 6678 singlet line appear in emission with measured equivalent widths of 0.312 ± 0.016 Å and 0.058 ± 0.029 Å, respectively. The corresponding triplet-to-singlet line flux ratio is 3.7, close to the ratio of the level statistical weights. We argue that the He I lines are not produced by recombination and cascade following photoionization by $\lambda < 504$ Å coronal photons, but are instead collisionally excited. We suggest that these lines are formed in a geometrically thin chromospheric layer at 20-50,000 K with a column density $n_e \ell \approx 6 \times 10^{18}$ cm $^{-2}$. The sodium D lines (λ 5890, λ 5896) are found to be stellar in origin, with measured FWHM of 0.7 Å for both lines, and the H α lines has a FWHM of 1.4 Å. A search for other chromospheric emission lines in this spectral region produced negative results.

18313. Linsky, J. L., **IUE observations of cool stars: α Aurigae, HR1099, λ Andromedae, and ϵ Eridani**, *Nature* **275**, 389-394 (Oct. 5, 1978).

Key words: binary stars; chromospheres; stellar spectra; ultraviolet.

Initial IUE observations of four cool stars are reported. Observed fluxes and surface fluxes are given for several UV emission lines in the special range 1,175-2,000 Å, obtained at low and high dispersion with the short-wavelength spectrograph and camera. These lines are formed in the outer atmospheres of these stars, in regions presumably analogous to the solar chromosphere and transition region. The surface fluxes in the lines increase along the sequence: quiet Sun, ϵ Eri, λ And, α

Aur, and HR1099. The 2.8-d RS CVn-type binary HR1099, observed on 1 March 1978 near the end of a major flaring episode, has line surface fluxes ~ 100 times that of the quiet Sun, similar to those seen in solar flares. Line profiles and flux ratios in multiplets for Capella are presented, and comments given on the opacity of the lines and on a tendency of line width to increase with temperature of formation.

18314. Teubner, P. J. O., Buckman, S. J., Noble, C. J., **Differential cross sections for the elastic scattering of intermediate-energy electrons from sodium**, *J. Phys. B*: **11**, No. 13, 2345-2354 (1978).

Key words: differential cross sections; elastic scattering; sodium.

Differential cross sections for the elastic scattering of electrons from sodium have been measured with high angular resolution for incident energies of 54.4, 75, 100 and 150 eV and over an angular range of 12-140°. The experimental data are compared with calculations based on the first Born approximation, the Glauber approximation and a close-coupling impact-parameter calculation. Calculations have been carried out for an optical model using the prescription of Vanderpoorten for localising the absorptive part of the potential. Of the theoretical calculations, the optical model is found to reproduce best the general features of the cross section at all energies.

18315. Gills, T. E., Gallorini, M., Rook, H. L., **The determination of trace elements in new food grain SRM's using neutron activation analysis**, *J. Radioanal. Chem.* **46**, 21-25 (1978).

Key words: accuracy; food grain; instrumental; radiochemical; standard reference materials; toxic elements.

Potentially toxic metals in the food chain that can lead to deleterious effects on human health have been well documented. Because of the toxicity of some metals, levels of 1 ppm or less must be routinely monitored in foods to ensure human safety. To ensure the accuracy of measurement, NBS in a cooperative interagency agreement with the Food and Drug Administration is involved in developing and certifying selected elements in food grain as a part of the Standard Reference Material program. Both instrumental and radiochemical neutron activation analysis were used to analyze two food grain standard reference materials (Rice and Wheat Flours) for trace element certification.

18316. Sheahan, T. P., **Opportunities to apply physics to energy conservation problems in process industries. Examples from textiles and papermaking**, *Proc. Conf. on Physics Careers, Employment and Education, State College, PA, Aug. 1-3, 1977*, pp. 201-206 (American Physical Society, New York, NY, 1978).

Key words: moisture; paper; physics careers; textiles.

The large mills that convert raw materials into finished products are generally thought of as engineering wonders, with no need for physics beyond classical mechanics. However, there are many improvements possible through the application of new measurement concepts that are only now emerging from the research laboratories (laser optics is an obvious example). This paper suggests that there are many such applications, and illustrates the point with two specific cases, both of which deal with means of industrial energy conservation: (1) The process of making paper is predominantly a matter of water removal. Moisture gauges can easily be fooled by impurities in the input pulp, especially where paper is recycled; and thus substantial energy can be wasted by overdrying paper. Application of remarkably simple physical insight helps to overcome this problem. (2) Textiles must be held very straight while being

heat-set in order to lead to good quality clothing, and either discarding or re-setting misaligned cloth wastes labor as well as energy. When combined with properly designed plates, the threads comprising the fabric generate Moire patterns that can be used to observe and regulate textile straightness.

The limitations of the applications of physics are set by limits of imagination, not in training.

18317. Roth, P. F., Gass, S. I., Lemoine, A. J., **Some considerations for improving federal modeling**, *Proc. 1978 Winter Simulation Conf., Miami Beach, FL, Dec. 4-6, 1978*, pp. 213-217 (The Institute of Electrical and Electronics Engineers, New York, NY, Dec. 1978).

Key words: development of models; mathematical models; operations research; prediction models; problem oriented languages; simulation theory; systems research; testing of models.

There is a growing awareness of the need for better communication and management techniques to improve the process of developing computerized models. Modeling is defined as the process of solving complex system problems and making decisions using experimental data generated by a computerized conception of the system. The process is subtle and sophisticated and often misunderstood.

The Government is a large underwriter of models. The Government's modeling process has been criticized by several GAO Reports.

Some critical issues involved in improving the Government modeling process are disclosed, evaluated by expert practitioners, and ranked according to importance: better communication between users and developers of models is important; special bureaucracies to address modeling is unimportant.

The responsibility for sponsorship of research is addressed.

5. LISTING OF NBS PAPERS BY MAJOR SUBJECT AREAS

This section provides a listing of 1978 papers organized by primary subject matter as follows:

Acoustics and Sound
Analytical Chemistry
Atomic and Molecular Studies
Building Technology
Computer Science and Technology
Consumer Information and Protection
Electromagnetic Metrology
Electronic Technology
Energy Conservation and Production
Engineering, Product and Information Standards
Environmental Studies: Pollution Measurement
Failure Analysis
Fire Research
Fluids: Liquids, Gases and Plasmas
General Theoretical Chemistry and Physics
Health and Safety
Instrumentation and Experimental Methods
Lasers and Their Applications
Low Temperature Science and Engineering
Mathematical and Statistical Methods
Measurement Science and Technology:
 Policy and State-of-the-Art Surveys
Measurement Science and Technology:
 Physical Standards and Fundamental Constants
Mechanics: Design, Testing and Measurement
Metrology: Physical Measurements

Nuclear Physics and Radiation Technology
Operations Analysis and Applications
Processing and Performance of Materials
Properties of Materials: Electronic, Magnetic and Optical
Properties of Materials: Structural and Mechanical
Properties of Materials: Thermodynamic and Transport
Standard Reference Data
Standard Reference Materials
Surfaces and Interfaces
Thermodynamics and Chemical Kinetics
Technology Incentives
Other Subjects of General Interest

It permits users of this catalog to scan the Bureau's output by major subject category. The user should bear in mind that a paper is listed once by major subject even though it might well contain other secondary subject matters of interest. The key-word index permits the reader to determine the overall context of a paper, and provides an excellent secondary reference source.

The categories currently in use for classifying NBS publications are listed below and are followed by a listing of each paper by category. Full citations (including key-words and abstracts) will be found under the appropriate publication series, which is included in the paper title. Also of use will be the key-word index (mentioned above) and the author index.

Atomic and Molecular Studies

- The first spectrum of ytterbium (Yb I), W. F. Meggers and J. L. Tech, *J. Res. Nat. Bur. Stand. (U.S.)*, **83**, No. 1, 13-70 (Jan.-Feb. 1978).
- Spectrum and energy levels of triply ionized ytterbium, J. Sugar, V. Kaufman, and N. Spector, *J. Res. Nat. Bur. Stand. (U.S.)*, **83**, No. 3, 233-245 (May-June 1978).
- Pyrolysis of monodisperse poly- α -methylstyrene, L. A. Wall, R. E. Florin, M. H. Aldridge, and L. J. Fetters, *J. Res. Nat. Bur. Stand. (U.S.)*, **83**, No. 4, 371-380 (July-Aug. 1978).
- SP526. 12th informal conference on photochemistry. Proceedings of the 12th Informal Conference on Photochemistry, held at the National Bureau of Standards, Gaithersburg, MD, June 28-July 1, 1976, M. J. Kurylo and W. Braun, Eds., *Nat. Bur. Stand. (U.S.)*, *Spec. Publ.* 526, 411 pages (Oct. 1978) SN003-003-01984-4.
- A modern approach to accurate radiometry, E. Zalewski, SP526, pp. 1-2 (Oct. 1978).
- Temperature dependence of the fluorescence quantum yields of rhodamine derivatives, R. E. Schwerzel and N. E. Klosterman, SP526, pp. 3-4 (Oct. 1978).
- NBS ultraviolet radiometric standards, W. R. Ott, SP526, pp. 5-7 (Oct. 1978).

New methods of measuring light intensities, D. G. Taylor, J. N. Demas, W. D. Bowman, E. W. Harris, and R. P. McBride, *SP526*, pp. 8-10 (Oct. 1978).

Infrared photography at 5 and 10 μm^1 , G. F. Frazier, T. D. Wilkerson, and J. M. Lindsay, *SP526*, pp. 11-13 (Oct. 1978).

Kinetics of the chemiluminescence accompanying metal atom oxidation reactions, W. Felder and A. Fontijn, *SP526*, pp. 14-17 (Oct. 1978).

A study of the chemiluminescence of the $\text{Pb} + \text{O}_3$ reactions, M. J. Kurylo, W. Braun, S. Abramowitz, and M. Krauss, *SP526*, pp. 18-20 (Oct. 1978).

Chemiluminescence in reactions of ozone, S. Toby, F. S. Toby, and B. Kaduk, *SP526*, pp. 21-23 (Oct. 1978).

Dioxetane chemistry in the gas phase UV-visible chemiluminescence from the reactions of $\text{O}_2(^1\Delta_g)$ with olefins, D. J. Bogan and J. L. Durant, Jr., *SP526*, pp. 24-30 (Oct. 1978).

Molecular dissociation by high-intensity infrared laser radiation, K. H. Welge, *SP526*, p. 31 (Oct. 1978).

Photochemistry of formaldehydes: Past and present, E. K. C. Lee, R. S. Lewis, and R. G. Miller, *SP526*, pp. 32-34 (Oct. 1978).

Decomposition of formic acid vapor by infrared laser radiation, R. Corkum, C. Willis, M. H. Back, and R. A. Back, *SP526*, pp. 35-36 (Oct. 1978).

The laser augmented decomposition of D_3B adducts, K. R. Chien and S. H. Bauer, *SP526*, pp. 37-39 (Oct. 1978).

Infrared laser isotope separation, J. L. Lyman and S. D. Rockwood, *SP526*, pp. 40-42 (Oct. 1978).

CO_2 TE laser induced photochemical enrichment of carbon isotopes, J. J. Ritter and S. M. Freund, *SP526*, pp. 43-44 (Oct. 1978).

Measurement of mean lives in atomic uranium, J. Z. Klose, *SP526*, pp. 45-48 (Oct. 1978).

Principles of photochemical separation of isomeric nuclides, G. C. Baldwin, H. M. Clark, D. Hakala, and R. R. Reeves, *SP526*, pp. 49-50 (Oct. 1978).

The early years of photochemistry in the vacuum ultraviolet, W. Groth, *SP526*, pp. 51-52 (Oct. 1978).

Fluorescence and decomposition of tertiary amines in a glow discharge, F. Lahmani and R. Srinivasan, *SP526*, pp. 53-54 (Oct. 1978).

Photochemistry and flash photolysis of 5-nitroquinoline, A. C. Testa and A. Cu, *SP526*, pp. 55-56 (Oct. 1978).

Photochemistry and photophysics of nitrogen heterocycles, M. S. Henry and M. Z. Hoffman, *SP526*, pp. 57-59 (Oct. 1978).

The photophysics of several condensed ring heteroaromatic compounds, F. S. Wettack, R. Klaphor, A. Shedd, M. Koeppel, K. Janda, P. Dwyer, and K. Stratton, *SP526*, pp. 60-62 (Oct. 1978).

Molecular weight dependence of triplet-triplet processes in polyo(2-vinylnaphthalene), N. F. Pasch and S. E. Webber, *SP526*, pp. 63-65 (Oct. 1978).

Singlet and triplet precursors of $\text{O}_2(^1\Delta_g)$, B. Stevens and J. A. Ors, *SP526*, pp. 66-69 (Oct. 1978).

The heavy atom effect on the photochemical cycloaddition processes of acenaphthylene, B. F. Plummer and L. J. Scott, *SP526*, pp. 70-71 (Oct. 1978).

Laser induced fluorescence emission spectroscopy of $\text{H}_2\text{CO}(A,^1A_2)$, K. Y. Tang and E. K. C. Lee, *SP526*, pp. 72-74 (Oct. 1978).

Laser excited NO_2 fluorescence lifetime studies in the 600 NM region, V. M. Donnelly and F. Kaufman, *SP526*, pp. 75-76 (Oct. 1978).

Laser fluorescence studies, including the $\text{B}^3\Pi(\text{O}^+)$ states of BrF , IF and ICl , M. A. A. Clyne, A. H. Curran, and I. S. McDermid, *SP526*, pp. 77-78 (Oct. 1978).

Laser-induced fluorescence of CN radicals produced by photodissociation of RCN, R. J. Cody and M. J. Sabety-Dzvonik, *SP526*, pp. 79-81 (Oct. 1978).

Photofragment spectroscopy of the $A \leftrightarrow X$ transition in CN using two pulsed lasers, A. Baronavski and J. R. McDonald, *SP526*, pp. 82-85 (Oct. 1978).

Spectroscopic and photochemical studies of gaseous ions using tunable dye lasers, J. R. Eyler, *SP526*, pp. 86-87 (Oct. 1978).

Photodissociation spectra of positive ions with time-of-flight analysis, T. F. Thomas and J. F. Paulson, *SP526*, pp. 88-91 (Oct. 1978).

Vibrational states of molecules in the visible region by thermo-optical spectroscopy and the local mode model, A. C. Albrecht, *SP526*, pp. 92-93 (Oct. 1978).

Mechanism of high intensity I.R. photodecomposition of molecules, W. Braun and W. Tsang, *SP526*, pp. 94-98 (Oct. 1978).

The in-situ measurement of atoms and radicals in the upper atmosphere, J. G. Anderson, *SP526*, pp. 99-101 (Oct. 1978).

The $\text{O}(^1\text{S})$ airglow—New laboratory results, T. Slinger and G. Black, *SP526*, pp. 102-104 (Oct. 1978).

A quantum yield determination for $\text{O}(^1\text{D})$ production from ozone via laser flash photolysis, D. L. Philen, R. T. Watson, and D. D. Davis, *SP526*, pp. 105-107 (Oct. 1978).

Absence of N_2O photolysis in the troposphere, D. H. Stedman, R. J. Cicerone, W. L. Chameides, and R. B. Harvey, *SP526*, pp. 108-110 (Oct. 1978).

Temperature dependence of $\text{O}(^1\text{D})$ reactions of atmospheric importance, J. A. Davidson, H. I. Schiff, G. E. Streit, A. L. Schmeltekopf, and C. J. Howard, *SP526*, pp. 111-113 (Oct. 1978).

Modeling stratospheric photochemistry and kinetics, J. McAfee and P. J. Crutzen, *SP526*, p. 114 (Oct. 1978).

The rate constant for $\text{O} + \text{NO} + \text{M}$ from 217-500K in five heat bath gases, J. V. Michael, W. A. Payne, and D. A. Whytock, *SP526*, pp. 115-116 (Oct. 1978).

Determination by the phase shift technique of the temperature dependence of the reactions of $\text{O}(^3\text{P})$ with HCl , HBr , and HI , D. L. Singleton and R. J. Cvetanovic, *SP526*, pp. 117-119 (Oct. 1978).

High energy pulsed laser photolysis of some chromium (III) and cobalt (III) complexes, A. W. Adamson, A. R. Gutierrez, R. E. Wright, and R. T. Walters, *SP526*, pp. 120-125 (Oct. 1978).

Studies using a combination of flash photolysis and pulsed magnetic induction: Application to the NO_3 radical in aqueous acid solution at 25 $^\circ\text{C}$, T. W. Martin and M. V. Stevens, *SP526*, pp. 126-129 (Oct. 1978).

Luminescence of some metal tris(dithioacetate) complexes, M. K. DeArmond and J. T. Merrill, *SP526*, pp. 130-133 (Oct. 1978).

Luminescent transition metal complex photosensitizers, J. N. Demas, J. W. Addington, R. P. McBride, W. E. Harris, and S. Peterson, *SP526*, pp. 134-136 (Oct. 1978).

Picosecond studies of transition metal complexes, P. E. Hoggard, A. D. Kirk, G. B. Porter, M. G. Rockley, and M. W. Windsor, *SP526*, pp. 137-138 (Oct. 1978).

Electron transfer properties of excited states of transition metal complexes, V. Balzani, F. Bolletta, M. Maestri, A. Juris, and N. Serpone, *SP526*, pp. 139-141 (Oct. 1978).

A comparison of the excited-state electron-transfer reactions of $\text{Ru}(\text{BIPY})_3^{2+}$ and $\text{Os}(\text{BIPY})_3^{2+}$, P. Fisher, E. Finkenberg, and H. D. Gafney, *SP526*, pp. 142-144 (Oct. 1978).

Photodissociation of simple polyatomic molecules, J. P. Simons, *SP526*, pp. 145-146 (Oct. 1978).

Energy distribution in the photodissociation of methylketene at 215 NM, M. E. Umstead, R. G. Shortridge, and M. C. Lin, *SP526*, pp. 147-149 (Oct. 1978).

The production and reactions of vibrationally excited 1,1,2,2-tetrachloroethane, M. H. J. Wijnen, *SP526*, pp. 150-151 (Oct. 1978).

Measurement of branching ratios for the $O + CS_2 \rightarrow OCS + S$ reaction, R. E. Graham and D. Gutman, *SP526*, pp. 152-154 (Oct. 1978).

Photodissociation of molecular beams of metallic iodides, M. Kawasaki, H. Litvak, S. J. Lee, and R. Bersohn, *SP526*, pp. 155-156 (Oct. 1978).

The photochemistry of 2-furaldehyde in the gas phase, A. Gandini, P. A. Hackett, J. M. Parsons, and R. A. Back, *SP526*, pp. 157-159 (Oct. 1978).

Photoinitiated decomposition of monosilane, E. R. Austin and F. W. Lampe, *SP526*, pp. 160-162 (Oct. 1978).

Excitation of HNO by $O_2(^1\Delta_g)$, T. Ishiwata, H. Akimoto, and I. Tanaka, *SP526*, pp. 163-166 (Oct. 1978).

Solar photodissociation rates for $ClONO_2$; An estimate of current levels of $ClONO_2$ in the stratosphere, J. P. Jesson, L. C. Glasgow, and P. Meakin, *SP526*, pp. 167-173 (Oct. 1978).

The tropospheric lifetime of $CFCl_3$, J. P. Jesson, P. Meakin, and L. C. Glasgow, *SP526*, pp. 174-175 (Oct. 1978).

The gas kinetic and photochemical degradation of chlorine nitrate, A. R. Ravishankara, G. Smith, G. Tesi, and D. D. Davis, *SP526*, p. 176 (Oct. 1978).

Photogalvanic cells, M. D. Archer, M. I. C. Ferreira, W. J. Albery, and W. R. Bowen, *SP526*, pp. 177-179 (Oct. 1978).

The importance of intermediate partitioning in energy storing photoreactions, G. Jones, II, W. R. Bergmark, and M. Santhanam, *SP526*, pp. 180-182 (Oct. 1978).

Optimization of the iron-thionine photogalvanic cell; Photochemical aspects, P. D. Wildes, N. N. Lichtin, and M. Z. Hoffman, *SP526*, pp. 183-185 (Oct. 1978).

A biometric approach to solar energy conversion, T. R. Janson and J. J. Katz, *SP526*, pp. 186-188 (Oct. 1978).

Light energy conversion via photoredox processes in micellar systems, M. Grätzel, *SP526*, pp. 189-190 (Oct. 1978).

Photoelectrolysis of water by solar energy, D. I. Tcherney, *SP526*, pp. 191-192 (Oct. 1978).

Recent work in exciplex photophysics, D. V. O'Connor and W. R. Ware, *SP526*, pp. 193-195 (Oct. 1978).

Charge transfer and hydrogen atom transfer reactions of excited aromatic hydrocarbon-amine systems, N. Mataga, T. Okada, and T. Mori, *SP526*, pp. 196-198 (Oct. 1978).

Protolysis equilibria of lumichrome (6,7-dimethyl-alloxazine) in the lowest excited singlet state, B. Holmström, S. Bergström, and H. B. Larson, *SP526*, pp. 199-203 (Oct. 1978).

Photochemistry of pheophytins and porphyrins, D. C. Brune, J. Fajer, and S. P. Van, *SP526*, pp. 204-211 (Oct. 1978).

A kinetic study of CH_3O_2 and $(CH_3)_3CO_2$ radical reactions by kinetic flash spectroscopy, M. R. Whitbeck, J. W. Bottenheim, S. Z. Levine, and J. G. Calvert, *SP526*, pp. 212-214 (Oct. 1978).

The reaction of OH radicals with C_3H_8 and C_2H_6 , R. Overend and G. Paraskevopoulos, *SP526*, pp. 215-218 (Oct. 1978).

On the triplet state(s) of sulphur dioxide, J. W. Böttenheim, F. Su, D. L. Thorsell, J. G. Calvert, and E. Damon, *SP526*, pp. 219-223 (Oct. 1978).

The $SO_2(^3B_1)$ photosensitized isomerization of Cis and Trans-1,2-dichloroethylene, F. B. Wampler and J. W. Böttenheim, *SP526*, pp. 224-226 (Oct. 1978).

Gas phase photochemical synthesis of peroxyacyl nitrates via chlorine-aldehyde reaction, B. W. Gay, Jr., R. C. Noonan, J. J. Bufalini, and P. L. Hanst, *SP526*, pp. 227-229 (Oct. 1978).

Chemical control of photochemical smog, J. Hecklen, *SP526*, pp. 230-232 (Oct. 1978).

Photochemically induced free radical reactions in nitrogen dioxide-acetaldehyde mixtures, E. R. Allen, *SP526*, pp. 233-242 (Oct. 1978).

Photo-oxidation of toluene- $NO_2-O_2-N_2$ system in gas phase, H. Akimoto, M. Hoshino, G. Inoue, M. Okuda, and N. Washida, *SP526*, pp. 243-246 (Oct. 1978).

Effects of solar energy distribution on photochemical smog formation, G. Z. Whitten, J. P. Killus, H. Hogo, and M. C. Dodge, *SP526*, pp. 247-250 (Oct. 1978).

Photophysics of bound and dissociative states of small molecules in condensed phases, L. E. Brus and V. E. Bondybey, *SP526*, pp. 251-252 (Oct. 1978).

Spectroscopy and photochemistry of matrix isolated metal hexafluorides, W. F. Coleman, R. T. Paine, R. B. Lewis, R. S. McDowell, L. H. Jones, and L. B. Asprey, *SP526*, pp. 253-255 (Oct. 1978).

Mercury photosensitized production of trapped radicals in organic glasses at < 77 K, N. Bremer, B. J. Brown, G. H. Morine, and J. E. Willard, *SP526*, pp. 256-258 (Oct. 1978).

Magnetic field effects on triplet-triplet annihilation in crystals, S. H. Tedder and S. E. Webber, *SP526*, pp. 259-261 (Oct. 1978).

The contribution of the physical and chemical defects to the photochemistry of crystalline durene at very low temperatures, A. Despres, V. Lejeune, and E. Migirdicyan, *SP526*, pp. 262-266 (Oct. 1978).

Photochemistry of electrons trapped in organic glasses, G. C. Dismukes, S. L. Hager, D. P. Lin, G. H. Morine, and J. E. Willard, *SP526*, pp. 267-270 (Oct. 1978).

Spin labels and the mechanism of the $S_1 \rightarrow T_1$ nonradiative process in duraldehyde; Possible manifestation of pseudo Jahn-Teller forces on nonradiative processes, A. Campion and M. A. El-Sayed, *SP526*, pp. 271-273 (Oct. 1978).

Photodesorption from metals: Measured desorption rates in comparison with a Mo-treatment, N. Trappen, *SP526*, pp. 274-275 (Oct. 1978).

Matrix isolation spectroscopic studies of free radicals and molecular ions produced by collisions of molecules with excited argon atoms, M. E. Jacox, *SP526*, pp. 276-279 (Oct. 1978).

Atmospheric chemistry of chlorofluorocarbons, M. J. Molina, *SP526*, pp. 280-281 (Oct. 1978).

Ultraviolet photoabsorption cross-sections of CF_2Cl_2 and $CFCl_3$ as a function of temperature, A. M. Bass and A. E. Ledford, Jr., *SP526*, pp. 282-284 (Oct. 1978).

Photodissociation of CCl_4 , R. E. Rebbert and P. Ausloos, *SP526*, pp. 285-286 (Oct. 1978).

The photolysis of ClO_2 , S. Jaffe and W. B. DeMore, *SP526*, pp. 287-289 (Oct. 1978).

Stratospheric reactions of chlorofluoromethanes, R. J. Donovan, H. M. Gillespie, J. Wolfrum, and K. Kaufmann, *SP526*, pp. 290-293 (Oct. 1978).

Some fundamental and applied aspects of the atmospheric reactivity of organic molecules, J. N. Pitts, Jr., R. Atkinson, A. M. Winer, K. R. Darnall, A. C. Lloyd, and R. A. Perry, *SP526*, pp. 294-299 (Oct. 1978).

IR Fourier-transform spectroscopic studies of atmospheric reactions, H. Niki, P. Maker, C. Savage, and I. Breitenbach, *SP526*, pp. 300-302 (Oct. 1978).

Photochemically generated ozone from isolated strong point sources, D. D. Davis and W. Keifer, *SP526*, pp. 303-304 (Oct. 1978).

Evidence for alkoxy radical isomerization in C_4 - C_6 alkanes in NO_2 -air systems, W. P. L. Carter, K. R. Darnall, A. C. Lloyd, A. M. Winer, and J. N. Pitts, Jr., *SP526*, pp. 305-308 (Oct. 1978).

Collisional destruction of rovibronic levels in S_1 glyoxal: Electronic, vibrational and rotational state changes, L. G. Anderson, A. E. W. Knight, and C. S. Parmenter, *SP526*, pp. 309-310 (Oct. 1978).

- The vibronic dependence of glyoxal photodissociation, G. H. Atkinson and C. G. Venkatesh, *SP526*, pp. 311-313 (Oct. 1978).
- Behavior of benzene in low vibrational levels, S. A. Lee, J. M. White, and W. A. Noyes, Jr., *SP526*, pp. 314-315 (Oct. 1978).
- Dual lifetime fluorescence from pyrimidine, K. G. Spears and M. El-Manguch, *SP526*, pp. 316-317 (Oct. 1978).
- Time resolved emission spectra of low pressure aromatic molecules, M. D. Swords, A. W. Sloman, and D. P. Phillips, *SP526*, pp. 318-320 (Oct. 1978).
- Studies in the mechanism of radiationless conversion of electronic energy, T. A. Gregory and S. Lipsky, *SP526*, pp. 321-322 (Oct. 1978).
- Photosensitization of the 2-butenes by benzaldehyde in the gas phase, A. J. Yarwood, G. R. De Mare, and M. Termonia, *SP526*, pp. 323-325 (Oct. 1978).
- Near infrared detection of peroxy radicals in mercury photosensitized reactions, H. E. Hunziker, *SP526*, p. 326 (Oct. 1978).
- Reactions of hydrogen atoms with fluorinated ketones, D. W. Grattan and K. O. Kutschke, *SP526*, pp. 327-330 (Oct. 1978).
- The reaction of NH_2 with olefins studied by flash photolysis, R. Lesclaux and P. V. Khè, *SP526*, pp. 331-333 (Oct. 1978).
- Detection and reactions of $\text{NH}(\text{X}^3\Sigma^-)$ radicals in the vacuum UV flash photolysis of HN_3 using resonance fluorescence, I. Hansen, K. Hoinghaus, C. Zetzsch, and F. Stuhl, *SP526*, pp. 334-336 (Oct. 1978).
- Interpretation of the Arrhenius plots for reactions of oxygen atoms with olefins, R. J. Cvetanovic, *SP526*, pp. 337-338 (Oct. 1978).
- Absolute rate of the reaction of $\text{O}(\text{^3P})$ with hydrogen sulphide, D. A. Whytock, R. B. Timmons, J. H. Lee, J. V. Michael, W. A. Payne, and L. J. Stief, *SP526*, pp. 339-341 (Oct. 1978).
- Kinetics of the reaction: $\text{OH} + \text{NO}_2 (+\text{M}) \rightarrow \text{HNO}_3 (+\text{M})$ over a wide range of temperature and pressure, C. Anastasi, I. W. M. Smith, and R. Zellner, *SP526*, pp. 342-344 (Oct. 1978).
- Vacuum UV flash photolysis of phosphine: Rate of the reaction $\text{H} + \text{PH}_3$ and implications for the photochemistry of the atmosphere of Jupiter, J. H. Lee, J. V. Michael, W. A. Payne, D. A. Whytock, and L. J. Stief, *SP526*, pp. 345-347 (Oct. 1978).
- Energy-dependent cross sections for quenching of $\text{Li}(\text{^2P})$ and $\text{Na}(\text{^2P})$, J. R. Barker, S. M. Lin, and R. E. Weston, Jr., *SP526*, pp. 348-350 (Oct. 1978).
- Electronic-to-vibrational energy transfer reactions: $\text{Na}(\text{^3P}) + \text{CO}(\text{X}^1\Sigma^+, v = 0)$, D. S. Y. Hsu and M. C. Lin, *SP526*, pp. 351-353 (Oct. 1978).
- Energy transfer in the collision of metastable excited $\text{Ar}(\text{^3P}_2)$ atoms with ground state H^2S atoms, P. B. Monkhouse, K. D. Bayes, and M. A. A. Clyne, *SP526*, pp. 354-358 (Oct. 1978).
- Quenching rate constants for $\text{Ar}(\text{^3P}_2)$, $\text{Kr}(\text{^3P}_2)$ and $\text{Xe}(\text{^3P}_2)$ by halogen-containing molecules, and branching ratios for XeF and KrF formation, J. E. Velazco, H. E. Kolts, and D. W. Setser, *SP526*, pp. 359-363 (Oct. 1978).
- V-V energy transfer in H_2 -additive gas mixtures using a stimulated Raman excitation technique, R. G. Miller and J. K. Hancock, *SP526*, pp. 364-366 (Oct. 1978).
- Experiments concerning the laser enhanced reaction between O_3 and NO , K. K. Hui and T. A. Cool, *SP526*, pp. 368-369 (Oct. 1978).
- Infrared laser enhanced reactions: Chemistry of $\text{NO}(v = 1)$ with O_3 , J. C. Stephenson and S. M. Freund, *SP526*, pp. 370-372 (Oct. 1978).
- Kinetic energy—and internal state dependence of the $\text{NO} + \text{O}_3 \rightarrow \text{NO}_2^* + \text{O}_2$ reaction, A. E. Rcdpath and M. Mensinger, *SP526*, pp. 373-375 (Oct. 1978).
- The effect of infrared laser excitation on reaction dynamics: $\text{O} + \text{C}_2\text{H}_4$ and $\text{O} + \text{OCS}$, R. G. Manning, W. Braun, and M. J. Kurylo, *SP526*, pp. 376-379 (Oct. 1978).
- Reaction of flash photolytically produced $\text{CN}(\text{X}^2\Sigma^+, v)$ radicals with $\text{O}(\text{^3P})$ atoms, K. J. Schmatjko and J. Wolfrum, *SP526*, pp. 380-383 (Oct. 1978).
- Vibrational photochemistry: The relaxation of $\text{HCl}(v = 1)$ and $\text{DCI}(v = 1)$ by bromine atoms, R. D. H. Brown, I. W. M. Smith, and S. W. J. Van der Merwe, *SP526*, pp. 384-387 (Oct. 1978).
- Vibrational relaxation of $\text{HF}(v = 1,2,3)$ in the presence of H_2 , N_2 , and CO_2 , J. F. Bott, *SP526*, pp. 388-389 (Oct. 1978).
- Quenching of $\text{NO}(\text{B}^2\Pi, v' = 0)$ produced by the reaction of $\text{N}(\text{^2D})$ with N_2O , G. Black, R. L. Sharpless, and T. G. Slinger, *SP526*, pp. 390-394 (Oct. 1978).
- CW infrared laser isotope separation: $\text{Cl} + \text{CH}_3\text{Br}(v_0) \rightarrow \text{HCl} + \text{CH}_2\text{Br}$, T. J. Manuccia, M. D. Clark, and E. R. Lory, *SP526*, pp. 395-396 (Oct. 1978).

Impact of State mandated thermal efficiency standards on counties, S. Guenther and A. Twitchell, *SP518*, pp. 323-358 (Aug. 1978).

Building Technology

SP457-2. Building technology publications 1977—Supplement 2, J. R. Debelius, Ed., *Nat. Bur. Stand. (U.S.), Spec. Publ.* 457-2, 113 pages (Aug. 1978) SN003-003-01962-3.

SP504. Metric dimensional coordination—The issues and precedent. Proceedings of Joint Conference, Washington, DC, June 6, 1977, S. A. Berry and H. J. Milton, Eds., *Nat. Bur. Stand. (U.S.), Spec. Publ.* 504, 77 pages (Feb. 1978) SN003-003-01887-2.

Dimensional coordination—An industrial management tool, L. Bergvall, *SP504*, pp. 5-16 (Feb. 1978).

Building standards development in Sweden and in the metric building world, H. Orlando, *SP504*, pp. 19-30 (Feb. 1978).

Metrication—The opportunity for an industry-wide system of dimensional coordination: Precedent and issues, H. Milton, *SP504*, pp. 33-48 (Feb. 1978).

- Regulatory administration: A function of perceived priorities, costs and benefits**, N. S. Remmer, *SP518*, pp. 359-369 (Aug. 1978).
- Development of interface between the regulator and the manufacturer's quality control personnel**, E. Starostovic, *SP518*, pp. 369-379 (Aug. 1978).
- Legal aspects of the building regulatory process**, P. J. Moriarty, *SP518*, pp. 381-390 (Aug. 1978).
- SP523. Wind and seismic effects**. Proceedings of the Ninth Joint Panel Conference of the U.S.-Japan Cooperative Program in Natural Resources, May 24-27, 1977, Tokyo, Japan, H. S. Lew, Ed., *Nat. Bur. Stand. (U.S.), Spec. Publ. 523*, 518 pages (Sept. 1978) SN003-003-01979-8.
- Distribution models of pressure and wind over stationary typhoon fields**, S. Fujiwhara and K. Kurashige, *SP523*, pp. 1-1-1-9 (Sept. 1978).
- Extreme winds in the United States**, T. D. Potter and M. Changery, *SP523*, pp. 1-10-1-15 (Sept. 1978).
- Aerodynamic stability of a long-span suspension bridge at construction stage**, T. Kunihiko, N. Narita, and K. Yokoyama, *SP523*, pp. 11-1-11-19 (Sept. 1978).
- Present situation of earthquake prediction research in Japan**, K. Hamada, H. Takahashi, H. Sato, and A. Suwa, *SP523*, pp. 111-1-111-19 (Sept. 1978).
- The complementary importance of earthquake prediction and structural response estimation in seismic design and planning decisions**, R. K. McGuire, *SP523*, pp. 111-20-111-29 (Sept. 1978).
- Research and development of permanent ocean-bottom seismograph observation system off the Pacific Coast to central Honshu, Japan**, A. Suwa, N. Yamakawa, and T. Inuma, *SP523*, pp. 111-30-111-43 (Sept. 1978).
- Vertical distribution of the seismic S-wave velocities at the site of the Iwatsuki Deep Borehole Observatory of Crustal Activities**, F. Yamamizu and H. Takahashi, *SP523*, pp. 111-44-111-54 (Sept. 1978).
- Research on active faults in the metropolitan area**, H. Sato and T. Kakimi, *SP523*, pp. 111-55-111-62 (Sept. 1978).
- Characteristics of vertical components of strong-motion accelerograms**, T. Uwabe, S. Noda, E. Kurata, and S. Hayashi, *SP523*, pp. 111-1-111-19 (Sept. 1978).
- Developments in strong-motion data management**, A. G. Brady, *SP523*, pp. 111-20-111-27 (Sept. 1978).
- On a method for synthesizing the artificial earthquake waves by using the prediction error filter**, K. Ohtani and S. Kinoshita, *SP523*, pp. 111-28-111-47 (Sept. 1978).
- Statistical analysis of strong-motion acceleration records**, M. Ohashi, T. Iwasaki, S. Wakabayashi, and K. Takida, *SP523*, pp. 111-48-111-77 (Sept. 1978).
- Research on design earthquake**, M. Watabe, *SP523*, pp. 111-78-111-95 (Sept. 1978).
- Determination of wave propagation velocities in subsurface soil layers**, Y. Shioi and T. Iwasaki, *SP523*, pp. 111-96-111-114 (Sept. 1978).
- Studies on soil liquefaction related to earthquake resistant design of structures**, M. Ohashi, T. Iwasaki, and F. Tatsuoka, *SP523*, pp. 111-115-111-157 (Sept. 1978).
- Earthquake resistant design based on ground motions at base-rock**, E. Kuribayashi and K. Kawashima, *SP523*, pp. 111-158-111-179 (Sept. 1978).
- Basic earthquake for dam design**, J. S. Dodd, *SP523*, pp. 111-1-111-13 (Sept. 1978).
- Study on regional distribution of maximum earthquake motions in Japan**, M. Ozaki, Y. Kitagawa, and S. Hattori, *SP523*, pp. 111-14-111-44 (Sept. 1978).
- Treatments on seismic force in designing earth structures**, K. Sawada, *SP523*, pp. 111-45-111-52 (Sept. 1978).
- Studies on the aseismic properties of underground pipes**, K. Ohtani, N. Ogawa, and C. Minowa, *SP523*, pp. 111-53-111-68 (Sept. 1978).
- Observation of dynamic behavior of Kinuura Submerged Tunnel during earthquakes**, S. Nakayama, O. Kiyomiya, and H. Tsuchida, *SP523*, pp. V-69-V-79 (Sept. 1978).
- A proposal for earthquake resistant design methods**, K. Nakano and M. Ohashi, *SP523*, pp. V-80-V-101 (Sept. 1978).
- The earthquake response of hysteretic structures**, W. D. Iwan and N. C. Gates, *SP523*, pp. VI-1-VI-14 (Sept. 1978).
- On the object postulate for earthquake-resistant code**, K. Nakano, Y. Ishiyama, Y. Aoki, and K. Watanabe, *SP523*, pp. V-102-V-116 (Sept. 1978).
- Earthquake resistant design of high-rise buildings in Japan**, K. Ohtani, *SP523*, pp. VI-15-VI-24 (Sept. 1978).
- Racking strength of wood-frame walls**, R. L. Tuomi, *SP523*, pp. VI-25-VI-34 (Sept. 1978).
- Examination for an evaluation method of damage to existing wooden houses caused by earthquakes**, K. Ichihara, E. Kuribayashi, T. Tazaki, and T. Hadate, *SP523*, pp. VII-1-VII-15 (Sept. 1978).
- Relationship between modified Mercalli intensity and wood frame dwelling earthquake insurance**, K. V. Steinbrugge and S. T. Algermissen, *SP523*, pp. VII-16-VII-28 (Sept. 1978).
- Warrants for retrofitting highway bridges**, A. Longinow, E. Bergmann, and J. D. Cooper, *SP523*, pp. VIII-1-VIII-21 (Sept. 1978).
- Criterion on the evaluation of seismic safety of existing reinforced concrete buildings**, K. Nakano, M. Hirokawa, and S. Okamoto, *SP523*, pp. VIII-22-VIII-41 (Sept. 1978).
- Transferring the technology for wind-resistant buildings to developing countries**, N. J. Raufaste, Jr., *SP523*, pp. VIII-42-VIII-46 (Sept. 1978).
- SP524. Assessment of current building regulatory methods as applied to the needs of historic preservation projects**, R. V. Keune, *Nat. Bur. Stand. (U.S.), Spec. Publ. 524*, 87 pages (Oct. 1978) SN003-003-01990-9.
- SP530. Metrication in building design, production, and construction—A compendium of 10 papers**, H. J. Milton, *Nat. Bur. Stand. (U.S.), Spec. Publ. 530*, 188 pages (Sept. 1978) SN003-003-01971-2.
- More efficient technology, research, industry and commerce—The metric opportunity**, H. J. Milton, *SP530*, pp. 1-9 (Sept. 1978).
- Metrication in the construction community—The role of the Federal agencies and the public construction sector**, H. J. Milton, *SP530*, pp. 11-20 (Sept. 1978).
- The principal management considerations in metrication of construction standards and codes**, H. J. Milton, *SP530*, pp. 21-37 (Sept. 1978).
- Managerial and economic considerations in the change to a metric production environment**, H. J. Milton, *SP530*, pp. 39-60 (Sept. 1978).
- Metrication and the contracting community**, H. J. Milton, *SP530*, pp. 61-80 (Sept. 1978).
- Metrication—A concrete opportunity**, H. J. Milton, *SP530*, pp. 81-99 (Sept. 1978).
- Metric sizes for building lumber and other wood products: The issues, international precedent, and suggestions for the U.S. wood products industry**, H. J. Milton, *SP530*, pp. 101-133 (Sept. 1978).
- New measures in graphic design and publications—The advance of the metric system**, H. J. Milton, *SP530*, pp. 135-146 (Sept. 1978).
- Metric training and familiarization of personnel**, H. J. Milton, *SP530*, pp. 147-163 (Sept. 1978).
- Guidelines for the metric transitional period in building design and construction**, H. J. Milton, *SP530*, pp. 165-181 (Sept. 1978).
- BSS110. Reliability basis of load and resistance factors for reinforced concrete design**, B. Ellingwood, *Nat. Bur. Stand.*

- Energy models and large-scale systems optimization, G. B. Dantzig and S. C. Parikh, *SP502*, pp. 4-10 (Feb. 1978).
- The challenge of analytic use of computers for global problems, W. Orchard-Hays, *SP502*, pp. 11-20 (Feb. 1978).

Implementation and application of a nested decomposition algorithm, J. K. Ho, *SP502*, pp. 21-30 (Feb. 1978).

A stepping-stone parallel-cut method for integer programming, T. Cheung, *SP502*, pp. 31-37 (Feb. 1978).

Monomial programming, T. L. Shaftef, G. L. Thompson, and Y. Smeers, *SP502*, pp. 38-50 (Feb. 1978).

Implementation and use of nonlinear cost multicommodity flow subroutines, H. H. Hoc, *SP502*, pp. 51-58 (Feb. 1978).

Implicit representation of triangularity constraints in linear programming, G. Gunawardane and L. Schrage, *SP502*, pp. 59-64 (Feb. 1978).

An efficient general algorithm for the computation of linear decision rules, S. F. Thomas, *SP502*, pp. 65-72 (Feb. 1978).

The structure and solution techniques of the project independence evaluation system, F. Murphy, *SP502*, pp. 73-85 (Feb. 1978).

National and interregional programming models of land and water use and the environment, E. O. Heady, K. J. Nicol, and D. Dvoskin, *SP502*, pp. 86-96 (Feb. 1978).

A nonlinear programming approach to preference maximized menu plans, J. L. Balintfy and P. Sinha, *SP502*, pp. 97-105 (Feb. 1978).

On the analysis and comparison of mathematical programming algorithms and software, R. S. Dembo and J. M. Mulvey, *SP502*, pp. 106-116 (Feb. 1978).

The evaluation of unconstrained optimization routines, L. Nazareth and F. Schlick, *SP502*, pp. 117-133 (Feb. 1978).

Large scale mathematical programming: A total system approach, T. Prabhakar, *SP502*, p. 143 (Feb. 1978).

A search enumeration algorithm for a multiplant multiproduct scheduling algorithm, S. Morito and H. M. Salkin, *SP502*, pp. 144-151 (Feb. 1978).

An IMS-gamma 3 database editor, E. B. Brunner, *SP502*, pp. 152-164 (Feb. 1978).

Software tools for combining linear programming with econometric models, M. J. Harrison, *SP502*, pp. 165-170 (Feb. 1978).

Database management techniques for mathematical programming, R. H. Bonczek, C. W. Holsapple, and A. B. Whinston, *SP502*, pp. 171-179 (Feb. 1978).

Convergence of the diagonalized method of multipliers, R. H. Byrd, *SP502*, pp. 180-183 (Feb. 1978).

Direct approaches for the minimax problem, A. R. Conn, *SP502*, pp. 184-193 (Feb. 1978).

Numerical aspects of trajectory algorithms for nonlinearly constrained optimization, W. Murray and M. H. Wright, *SP502*, pp. 194-204 (Feb. 1978).

Optimization algorithms derived from nonquadratic models, J. S. Kowalik, *SP502*, pp. 205-209 (Feb. 1978).

Algorithms for a class of "convex" nonlinear integer programs, R. R. Meyer and M. L. Smith, *SP502*, pp. 210-215 (Feb. 1978).

Extreme point ranking algorithms: A computational survey, P. G. McKeown, *SP502*, pp. 216-222 (Feb. 1978).

A new alternating basis algorithm for semi-assignment networks, R. Barr, F. Glover, and D. Klingman, *SP502*, pp. 223-232 (Feb. 1978).

Recent developments in vehicle routing, B. L. Golden, *SP502*, pp. 233-240 (Feb. 1978).

Balasian-based enumeration procedures: A study in computational efficiency, J. H. Patterson, *SP502*, pp. 241-250 (Feb. 1978).

A study of the effect of LP parameters on algorithm performance, C. H. Layman and R. P. O'Neill, *SP502*, pp. 251-260 (Feb. 1978).

Sensitivity analysis for parametric nonlinear programming using penalty methods, R. L. Armacost and A. V. Fiacco, *SP502*, pp. 261-269 (Feb. 1978).

The generalized inverse in nonlinear programming—Equivalence of the Kuhn-Tucker, Rosen and generalized simplex necessary conditions, L. D. Pyle, *SP502*, pp. 270-274 (Feb. 1978).

Teaching mathematical programming to the consumer, M. L. Fisher, *SP502*, pp. 275-278 (Feb. 1978).

On teaching linear programming fundamentals, J. M. Mulvey and R. D. Shapiro, *SP502*, pp. 279-285 (Feb. 1978).

Experiments with computer aided self paced instruction for mathematical programming education, A. Ravindran, A. Sinensky, and T. Ho, *SP502*, pp. 286-293 (Feb. 1978).

Importance of modelling for interpretation of linear programming models, L. W. Swanson, *SP502*, pp. 294-301 (Feb. 1978).

Interactive computer codes for mathematical programming education, R. P. Davis and J. W. Chrissis, *SP502*, pp. 302-309 (Feb. 1978).

A problem solving system for nonlinear least squares, B. A. Arnoldy and K. Brown, *SP502*, pp. 310-318 (Feb. 1978).

An iteratively reweighted least squares system, V. Klema, *SP502*, pp. 319-327 (Feb. 1978).

An experimental interactive system for integer programming, M. Guignard and K. Spielberg, *SP502*, pp. 328-337 (Feb. 1978).

An accelerated technique for ridge following using conjugate directions, E. H. Neave and T. L. Shaftef, *SP502*, pp. 338-353 (Feb. 1978).

Experiences in the development of a large scale linear programming system, R. Sjoquist, *SP502*, pp. 358-361 (Feb. 1978).

Math programming users vs. the computer center (A personal perspective as seen from a foxhole), J. R. Ellison, *SP502*, pp. 362-363 (Feb. 1978).

Operational management of mathematical programming based planning systems, E. G. Kammerer, *SP502*, pp. 364-367 (Feb. 1978).

Managing a large scale production and distribution scheduling system, K. Goldfisher, *SP502*, p. 368 (Feb. 1978).

SP503. Computer science and statistics: Tenth annual symposium on the interface. Proceedings of the 10th Annual Symposium held at the National Bureau of Standards, Gaithersburg, MD, Apr. 14-15, 1977, D. Hogben and D. W. Fife, Eds., *Nat. Bur. Stand. (U.S.), Spec. Publ. 503*, 467 pages (Mar. 1978) SN003-003-01908-9.

An interactive statistical processor for the Unix time-sharing system, P. Bloomfield, *SP503*, pp. 2-8 (Mar. 1978).

MiniBMD: A minicomputer statistical system, R. Buchness and L. Engelman, *SP503*, pp. 9-13 (Mar. 1978).

Experience and recommended principles for the development of software for processing statistical data in the third world, H. Elkins, V. Matthews, and J. Pomeranz, *SP503*, pp. 14-18 (Mar. 1978).

XTALLY—A multi-dimensional cross tabulation package in RPG-2, M. R. Lackner, *SP503*, pp. 19-25 (Mar. 1978).

Constraints in the design and implementation of interactive statistical systems for minicomputers, R. F. Ling, *SP503*, pp. 26-34 (Mar. 1978).

Invited contribution to the discussion statistical program packages for small computers, J. H. Maindonald, *SP503*, pp. 35-36 (Mar. 1978).

Computing approaches to the analysis of variance for unbalanced data, R. M. Heiberger and L. L. Laster, *SP503*, pp. 37-39 (Mar. 1978).

BMD and BMDP approaches to unbalanced data, J. W. Frane, *SP503*, pp. 40-47 (Mar. 1978).

Hypothesis testing in multi-way ANOVA models, J. H. Goodnight, *SP503*, pp. 48-53 (Mar. 1978).

Analyses of variance of unbalanced data from 3-way and higher-order classifications, S. R. Searle, *SP503*, pp. 54-57 (Mar. 1978).

ANOVA for non-orthogonal data, G. N. Wilkinson, *SP503*, pp. 58-65 (Mar. 1978).

The analysis of linear models with unbalanced data, R. R. Hocking, O. P. Hackney, and F. M. Speed, *SP503*, pp. 66-70 (Mar. 1978).

Discussion from workshop on analysis of variance for unbalanced data, R. M. Heiberger, Ed., *SP503*, pp. 71-75 (Mar. 1978).

Nonlinear statistical data analysis, R. E. Welsch, *SP503*, pp. 77-86 (Mar. 1978).

MLP, a maximum likelihood program, G. J. S. Ross, *SP503*, pp. 87-91 (Mar. 1978).

Computer graphics available to statisticians, B. F. Ryan, *SP503*, pp. 93-100 (Mar. 1978).

Portable graphics, J. E. George, *SP503*, pp. 101-106 (Mar. 1978).

Terminal and computer independence for interactive graphics applications software, H. G. Bown, C. D. O'Brien, G. Thorgeirson, and W. Sawchuk, *SP503*, pp. 107-116 (Mar. 1978).

Dialogue considerations in interactive statistical graphics, J. F. Gentleman, *SP503*, pp. 117-121 (Mar. 1978).

Human factors at the graphics interface, A. Simanis, *SP503*, pp. 122-130 (Mar. 1978).

Large scale clinical trials or how do we answer this, G. R. Cutter, *SP503*, pp. 132-136 (Mar. 1978).

Salvaging experiments: Interpreting least squares in non-random samples, A. E. Beaton, *SP503*, pp. 137-145 (Mar. 1978).

Record linkage by bit pattern matching, D. Blaxell, *SP503*, pp. 146-156 (Mar. 1978).

A Clinical Information System (ACIS) and its application to clinical trials, M. A. Fox, *SP503*, pp. 157-164 (Mar. 1978).

Relational database models and social science computing, R. F. Teitel, *SP503*, pp. 165-177 (Mar. 1978).

Karl Pearson was right, D. W. Scott, R. A. Tapia, and J. R. Thompson, *SP503*, pp. 179-183 (Mar. 1978).

Some problems in approximation and estimation, M. Rosenblatt, *SP503*, pp. 184-188 (Mar. 1978).

Orthogonal transformations in regression calculations, G. W. Stewart, *SP503*, pp. 189-190 (Mar. 1978).

An approach to time series prediction, M. Pagano, *SP503*, pp. 191-198 (Mar. 1978).

Some examples of the interface between statistics and numerical analysis, C. P. Tsokos and J. J. Higgins, *SP503*, pp. 199-203 (Mar. 1978).

Maintenance and distribution of statistical software: Satisfying diverse needs, M. E. Muller, *SP503*, pp. 205-210 (Mar. 1978).

Some testing and maintenance considerations in package design and implementation, J. R. Allen, *SP503*, pp. 211-214 (Mar. 1978).

The distribution and maintenance of SAS, A. J. Barr, *SP503*, pp. 215-220 (Mar. 1978).

Recent developments in the maintenance and distribution of BMDP, J. W. Franc, *SP503*, pp. 221-224 (Mar. 1978).

Portable statistical software—In COBOL, J. M. Hewitt, *SP503*, pp. 225-232 (Mar. 1978).

Discussion: Workshop on maintenance and distribution of statistical software, W. J. Hemmerle, *SP503*, pp. 233-234 (Mar. 1978).

Plotting binary trees, K. J. Schmucker, *SP503*, pp. 236-240 (Mar. 1978).

The statistical analyses of Monte Carlo simulation data using the techniques of discrete multivariate analysis, J. J. McArdle, *SP503*, pp. 241-246 (Mar. 1978).

Design and analysis techniques for large data files: The CODAP system, E. N. Siguel and S. F. Sand, *SP503*, pp. 247-251 (Mar. 1978).

Vehicle routing with probabilistic demands, B. L. Golden and W. Stewart, Jr., *SP503*, pp. 252-259 (Mar. 1978).

Differences between P-STAT and SPSS, as perceived by the authors of P-STAT, S. Buhler and R. Buhler, *SP503*, pp. 260-264 (Mar. 1978).

Instructional use of statistical program packages: BMD, IMP, OMNITAB II, and SPSS, R. E. Wyllys, *SP503*, pp. 265-270 (Mar. 1978).

A robust procedure for estimating the trend-cycle component of an economic time series, E. L. Frome and R. D. Armstrong, *SP503*, pp. 271-275 (Mar. 1978).

Solving the general linear model with linear programming, S. R. Borbash, Jr., *SP503*, pp. 276-282 (Mar. 1978).

Analysis of variance incorporating trend analysis, M. H. Kutner, *SP503*, pp. 283-287 (Mar. 1978).

Computerized analysis of quality control for radioimmunoassays, P. J. Munson and D. Rodbard, *SP503*, pp. 288-291 (Mar. 1978).

An interactive graphic program for simulating the distribution of transformations of several independent random variables, C. F. Chung, S. R. Divi, and A. G. Fabbri, *SP503*, pp. 292-296 (Mar. 1978).

Multiple incomplete beta integrals in Bayes subset selection procedure for binomial probability parameters, P. N. Bhalla, *SP503*, pp. 297-301 (Mar. 1978).

Numerical solutions of the incomplete Gamma function, H. Bouver, *SP503*, pp. 302-307 (Mar. 1978).

The OPCS Longitudinal Study, T. J. Orchard, *SP503*, pp. 308-311 (Mar. 1978).

Derivative-free nonlinear regression, M. L. Ralston and R. I. Jennrich, *SP503*, pp. 312-322 (Mar. 1978).

Improving the apparent randomness of pseudorandom numbers generated by the mixed congruential method, P. Peskun, *SP503*, pp. 323-328 (Mar. 1978).

Advanced SPSS CROSSTABS: Fitting models to categorical data, E. H. Young, *SP503*, pp. 329-338 (Mar. 1978).

General criteria and considerations for the evaluation of time series program packages and libraries, H. T. Davis, *SP503*, pp. 339-341 (Mar. 1978).

Comparison of statistical packages: A features matrix approach, K. A. Hardy, W. C. Reynolds, and D. R. Kniefel, *SP503*, pp. 342-351 (Mar. 1978).

Interactive plotting with the ST package, R. M. Dunn and J. F. Gentleman, *SP503*, pp. 352-356 (Mar. 1978).

Generalizing the function call to statistical routines: An application from the DATATRAN language, J. Brode, *SP503*, pp. 357-361 (Mar. 1978).

Integer programming with a computer: A statistical approach, W. Conley and D. S. Tracy, *SP503*, pp. 362-366 (Mar. 1978).

A system for dictionary-driven data entry using an intelligent terminal, B. A. Blumenstein and R. K. O'Day, *SP503*, pp. 367-372 (Mar. 1978).

Comparisons of algorithms for minimum L_p norm linear regression, W. J. Kennedy and J. E. Gentle, *SP503*, pp. 373-378 (Mar. 1978).

The method of midpoints, F. Yu Lu, *SP503*, pp. 379-383 (Mar. 1978).

Criteria for evaluation of interactive statistical programs and packages, R. A. Plattsmeier, *SP503*, pp. 384-388 (Mar. 1978).

Two conceptualizations of discriminant analysis and their implementation in computer programs, J. Hohwald and R. M. Heiberger, *SP503*, pp. 389-394 (Mar. 1978).

Significance arithmetic—A Fortran approach, M. J. Tretter and G. W. Walster, *SP503*, pp. 395-399 (Mar. 1978).

Development of a computer terminal based interactive statistical analysis package, R. E. Lund, *SP503*, pp. 400-403 (Mar. 1978).

- Minitab II, 1977**, T. A. Ryan, Jr., B. F. Ryan, and B. L. Joiner, *SP503*, pp. 404-408 (Mar. 1978).
- GR-Z: A system of graphical subroutines for data analysis**, R. A. Becker and J. M. Chambers, *SP503*, pp. 409-415 (Mar. 1978).
- An application of a record linkage theory in constructing a list sampling frame**, R. W. Coulter and J. W. Mergerson, *SP503*, pp. 416-420 (Mar. 1978).
- Long Range Planning Models LRPM2, LRPM3, and LRPM4/PDM**, J. Quinn, R. Bove, and T. L. Liau, *SP503*, pp. 421-425 (Mar. 1978).
- A new approach to accessing large statistical data files**, G. L. Hill, *SP503*, pp. 426-430 (Mar. 1978).
- Evaluation of nonparametric tests in SPSS and BMDP**, F. K. Kuiper and D. L. Nelson, *SP503*, pp. 431-436 (Mar. 1978).
- Current use of computers in the teaching of statistics**, G. W. Tubb and L. J. Ringer, *SP503*, pp. 437-441 (Mar. 1978).
- SP522. Control systems readiness for munitions plants: A first pass**. Proceedings of the Workshop on Control Systems Readiness for Munitions Plants held at Purdue University, West Lafayette, IN, Sept. 19-20, 1977, T. J. Williams, Ed., *Nat. Bur. Stand. (U.S.), Spec. Publ. 522*, 192 pages (Oct. 1978) SN003-003-01981-0.
- Past experience in the reactivation of army ammunition plants**, A. J. Zahatko, *SP522*, pp. 1-10 (Oct. 1978).
- Current procedures and problems in the layaway and reactivation of process control systems**, F. T. Beiwel, *SP522*, pp. 11-17 (Oct. 1978).
- An overview of the performance characteristics of sensory transducers**, P. S. Lederer, *SP522*, pp. 18-28 (Oct. 1978).
- Production base response required to meet mobilization requirements**, J. Nemanich, *SP522*, pp. 29-35 (Oct. 1978).
- Layaway, standby and reactivation procedures for computer magnetic media**, S. B. Geller, *SP522*, pp. 36-47 (Oct. 1978).
- Environmental effects on electrical and electronic devices and equipment under long storage conditions**, A. J. Graf and L. W. Doremus, *SP522*, pp. 48-53 (Oct. 1978).
- A layaway program for control valves**, J. Van Damme, *SP522*, pp. 54-62 (Oct. 1978).
- The independent testing and proving of hardware and software elements of plant computer control systems on reactivation of munitions plants**, D. Zobrist, *SP522*, pp. 63-72 (Oct. 1978).
- The layaway and reactivation problems of beet sugar mills for their annual campaigns including management, manpower and training aspects**, T. J. Williams and D. D. Lesser, *SP522*, pp. 73-83 (Oct. 1978).
- High reliability design techniques for distributed digital systems**, M. P. Lukas and J. J. Steinkirchner, *SP522*, pp. 85-105 (Oct. 1978).
- Use of simulation and other related techniques for the training of startup crews for reactivation of laid-away plants**, W. B. Field, *SP522*, pp. 106-123 (Oct. 1978).
- Operarting today's plant design tomorrow**, M. C. Beaverstock, *SP522*, pp. 124-152 (Oct. 1978).
- NBSIR 76-1189. Report of the workshop on estimation of significant advances in computer technology**, P. Meissner, 34 pages (Dec. 1976). Order from NTIS as PB279373.
- NBSIR 77-1301. Interface standards for automated coal mining equipment**, B. M. Smith, R. W. Markley, L. Costrell, G. E. Clark, I. W. Cotton, and J. M. Bakshi, 81 pages (July 1977). Order from NTIS as PB279218.
- NBSIR 78-1425. Institute for Computer Sciences and Technology publications, 1966-1976**, A. G. Chatic, 140 pages (Apr. 1978). Order from NTIS as PB280361.
- NBSIR 78-1426. Comparison of the performance of three algorithms for use in an automated transit information system (ATIS)**, J. F. Gilsinn, E. L. Leyendecker, and D. R. Shier, 164 pages (Mar. 1978). Order from NTIS as PB279066.
- NBSIR 78-1435. A decision model for U.S. computer export administration, a preliminary investigation**, P. L. Eagan, 24 pages (Feb. 1978). Order from NTIS as PB277539.
- NBSIR 78-1446. Management of data elements in information processing**. Proceedings of the Third National Symposium, held at NBS on 1977 September 28-30, H. E. McEwen, Ed., 154 pages (Apr. 1978). Order from NTIS as PB279661.
- Energy information—Top priority for today**, T. M. Albert, *NBSIR 78-1446*, pp. 1-5 (Apr. 1978).
- Standardization of data elements and machine-readable symbol to facilitate blood banking**, E. Brodheim, *NBSIR 78-1446*, pp. 7-18 (Apr. 1978).
- A technical profile of representative government developed data element dictionary/directory systems**, P. K. Brown, *NBSIR 78-1446*, pp. 19-23 (Apr. 1978).
- Cargo Data Interchange System (CARDIS)**, R. J. Cavanaugh, *NBSIR 78-1446*, pp. 25-33 (Apr. 1978).
- American National Standards Institute (ANSI)**, W. Duell, *NBSIR 78-1446*, pp. 35-37 (Apr. 1978).
- Management of data elements in information processing. (Needs for standards in the health care field and a sampling of current applications)**, G. J. Duffy, *NBSIR 78-1446*, pp. 39-41 (Apr. 1978).
- Data processing in natural history museums**, T. G. Gautier, S. G. Shetler, and C. Black, *NBSIR 78-1446*, pp. 47-57 (Apr. 1978).
- Standards for electronic data interchange**, E. A. Guilbert, *NBSIR 78-1446*, pp. 67-70 (Apr. 1978).
- General concept of a data resource directory system**, C. E. Hankerson, *NBSIR 78-1446*, pp. 71-89 (Apr. 1978).
- International standards activities of the Economic Commission for Europe**, E. A. Hemley, *NBSIR 78-1446*, pp. 91-95 (Apr. 1978).
- The Federal Information Locator System**, F. W. Horton, Jr., *NBSIR 78-1446*, pp. 97-112 (Apr. 1978).
- The urgent need for energy information standards. (To "Btu" or not to "Btu")**, R. W. Kline, Jr., *NBSIR 78-1446*, pp. 113-118 (Apr. 1978).
- Criteria for the selection of data dictionary/directory systems**, B. K. Plagman, *NBSIR 78-1446*, pp. 119-134 (Apr. 1978).
- Some history of traditional trade documents**, R. J. Porter, *NBSIR 78-1446*, pp. 135-137 (Apr. 1978).
- Data resource management**, D. B. Schneider, *NBSIR 78-1446*, pp. 139-140 (Apr. 1978).
- NBSIR 78-1487. A cost benefit analysis of proposed Federal input/output channel level computer interface standards**, T. Pyke, Ed., 37 pages (June 1978). Order from NTIS as PB282406.

- NBSIR 77-1387. **Evaluation of a test method for measuring microwave oven cooking efficiency**, O. B. Laug, 34 pages (Sept. 1977). Order from NTIS as PB284704.
- NBSIR 77-1405. **Determination and verification of thermal response factors for thermal conduction applications**, B. A. Peavy, 33 pages (Apr. 1978). Order from NTIS as PB283011.
- NBSIR 78-1143A. **Plan for the development and implementation of standards for solar heating and cooling applications**, D. Waksman, J. H. Pielert, R. D. Dikkers, E. R. Streed, and W. J. Niessing, 58 pages (June 1978). Order from NTIS as PB283237.
- NBSIR 78-1305A. **Provisional flat plate solar collector testing procedures: First revision**, D. Waksman, E. R. Streed, T. W. Reichard, and L. E. Cattaneo, 65 pages (June 1978). Supersedes NBSIR 77-1305. Order from NTIS as PB283721.
- NBSIR 78-1395. **Performance guidelines for a modular integrated utility system**, D. J. Mitchell, 92 pages (Nov. 1978). Order from NTIS as PB289783.
- NBSIR 77-1437. **Solar energy systems—Standards for rubber seals**, R. D. Stiehler, A. Hockman, E. J. Embrec, and L. W. Masters, 64 pages (Mar. 1978). Order from NTIS as PB280114.
- NBSIR 78-1460. **The degradation of gas-fired water heaters**, G. F. Sushinsky, 45 pages (June 1978). Order from NTIS as PB284491.
- NBSIR 78-1468-1. **Committee on the challenges of modern society rational use of energy pilot study modular integrated utility systems project, Vol. 1: Description, activities and products**, M. H. Nimmo and C. W. Phillips, 101 pages (June 1978). Order from NTIS as PB283428.
- NBSIR 78-1468-2. **Committee on the challenges of modern society rational use of energy pilot study modular integrated utility systems project, Vol. 2: Minutes of project meetings**, M. H. Nimmo and C. W. Phillips, 144 pages (June 1978). Order from NTIS as PB283429.
- NBSIR 78-1471. **The role of economic analysis in the development of energy standards for new buildings**, S. R. Petersen, 48 pages (July 1978). Order from NTIS as PB284044.
- NBSIR 78-1472. **Materials for fuel cells**, L. H. Bennett, M. I. Cohen, A. L. Dragoo, A. D. Franklin, A. J. McAlister, and K. F. Young, 133 pages (July 1978). Order from NTIS as PB285360.
- NBSIR 78-1475. **Air leakage measurements in three apartment houses in the Chicago area**, C. M. Hunt, J. M. Porterfield, and P. Ondris, 27 pages (June 1978). Order from NTIS as PB283722.

- NBSIR 78-1479. **Thermodynamic data for waste incineration**, E. S. Domalski, W. H. Evans, and T. L. Jobe, Jr., 165 pages (Aug. 1978). Order from NTIS as PB284659.
- NBSIR 78-1486 (DOE). **Development of in-situ techniques for the detection and measurement of corrosion of copper concentric neutrals in underground environments**, J. Kruger, U. Bertocci, E. Escalante, and J. L. Mullen, 60 pages (June 1978). Order from NTIS as PB283708.
- NBSIR 78-1525. **Climate data abbreviation for the computerized calculation of heating and cooling requirements in buildings**, E. A. Arens and D. H. Nall, 67 pages (Dec. 1978). Order from NTIS as PB289927.
- NBSIR 78-1532. **Environmental and safety considerations for solar heating and cooling applications**, D. Waksman and J. Holton, 35 pages (Sept. 1978). Order from NTIS as PB287772.
- NBSIR 78-1535. **Laboratories technically qualified to test solar collectors in accordance with ASHRAE Standard 93-77: A summary report**, W. J. Niessing, 39 pages (Nov. 1978). Order from NTIS as PB289729.
- NBSIR 78-1542. **State-of-the-art study of heat exchangers used with solar assisted domestic hot water systems (Potential contamination of potable water supply)**, F. E. Metz and M. J. Orloski, 82 pages (July 1978). Order from NTIS as PB287410.
- NBSIR 78-1543. **Recommended testing and calculation procedures for determining the seasonal performance of residential central furnaces and boilers**, G. E. Kelly, J. Chi, and M. E. Kuklewicz, 110 pages (Oct. 1978). Order from NTIS as PB289484.
- NBSIR 78-1548. **An evaluation of ASHRAE Standard 94-77 for testing water tanks for thermal storage**, B. J. Hunt, T. E. Richtmyer, and J. E. Hill, 75 pages (Oct. 1978). Order from NTIS as PB288793.
- NBSIR 78-1549. **Plan for the assessment and implementation of seismic design provisions for buildings**, C. G. Culver, R. E. Chapman, P. W. Cooke, B. R. Ellingwood, S. G. Fattal, J. R. Harris, and E. V. Leyendecker, 31 pages (Nov. 1978). Order from NTIS as PB288762.
- NBSIR 78-1562. **Interim performance criteria for solar heating and cooling systems in residential buildings**, J. K. Holton, 114 pages (Nov. 1978). Order from NTIS as PB289967.
- NBSIR 78-1563. **Guidelines for evaluation of a MIUS demonstration**, R. A. Grot, D. J. Mitchell, J. R. Schafgen, A. C. Chao, M. E. Kuklewicz, and S. F. Weber, 46 pages (Dec. 1978). Order from NTIS as PB291441.
- NBSIR 78-1568. **Economic analysis of the Norris Cotton Federal Office Building**, P. T. Chen, 61 pages (Nov. 1978). Order from NTIS as PB289813.
- NBS-GCR-77-109. **Analysis of data and results for the round-robin flat-plate collector test program**, W. C. Thomas and A. G. Dawson, 86 pages (Aug. 31, 1977). Order from NTIS as PB275576.
- NBS-GCR-78-125. **Report on organization of certification program for solar collectors**, G. R. Munger, R. J. Evans, 99 pages (Nov. 30, 1977). Order from NTIS as PB280025.

SP506. Proceedings of workshop on asbestos: Definitions and measurement methods. Proceedings of a Workshop on Asbestos held at the National Bureau of Standards, Gaithersburg, MD, July 18-20, 1977, C. C. Gravatt, P. D. LaFleur, and K. F. J. Heinrich, Eds., *Nat. Bur. Stand. (U.S.), Spec. Publ. 506*, 490 pages (Nov. 1978) SN003-003-01994-1.

History of asbestos-related mineralogical terminology, T. Zoltai, *SP506*, pp. 1-18 (Nov. 1978).

Fibrous and asbestiform minerals, J. R. Kramcr, *SP506*, pp. 19-33 (Nov. 1978).

The crystal structures of amphibole and serpentine minerals, J. Zussman, *SP506*, pp. 35-48 (Nov. 1978).

The "asbestos" minerals: Definitions, description, modes of formation, physical and chemical properties, and health risk to the mining community, M. Ross, *SP506*, pp. 49-70 (Nov. 1978).

Epidemiological evidence on asbestos, W. J. Nicholson, A. M. Langer, and I. J. Selikoff, *SP506*, pp. 71-93 (Nov. 1978).

Measurement of asbestos retention in the human respiratory system related to health effects, J. Bignon, P. Sebastian, and A. Gaudichet, *SP506*, pp. 95-118 (Nov. 1978).

Epidemiologic evidence of the effect of type of asbestos and fiber dimensions on the production of disease in man, W. C. Cooper, *SP506*, pp. 121-131 (Nov. 1978).

- Pathophysiology in relation to the chemical and physical properties of fibers**, P. Kotin, *SP506*, pp. 133-140 (Nov. 1978).
- The carcinogenicity of fibrous minerals**, M. F. Stanton and M. Layard, *SP506*, pp. 143-150 (Nov. 1978).
- NIEHS oral asbestos studies**, J. A. Moore, *SP506*, pp. 153-158 (Nov. 1978).
- EPA study of biological effects of asbestos-like mineral fibers**, D. L. Coffin and L. D. Palekar, *SP506*, pp. 163-174 (Nov. 1978).
- A study of airborne asbestos fibers in Connecticut**, L. Bruckman, *SP506*, pp. 179-190 (Nov. 1978).
- Identification of selected silicate minerals and their asbestiform varieties**, W. J. Campbell, *SP506*, pp. 201-220 (Nov. 1978).
- An overview of electron microscopy methods**, C. O. Ruud, *SP506*, pp. 221-233 (Nov. 1978).
- Identification of asbestos by polarized light microscopy**, W. C. McCrone, *SP506*, pp. 235-247 (Nov. 1978).
- Mineral fiber identification using the analytical transmission electron microscope**, D. R. Beaman and H. J. Walker, *SP506*, pp. 249-269 (Nov. 1978).
- Transmission electron microscopical methods for the determination of asbestos**, I. M. Stewart, *SP506*, pp. 271-280 (Nov. 1978).
- Statistics and the significance of asbestos fiber analyses**, J. P. Leineweber, *SP506*, pp. 281-294 (Nov. 1978).
- Selection and characterization of fibrous and nonfibrous amphiboles for analytical methods development**, J. C. Haartz, B. A. Lange, R. G. Draftz, and R. F. Scholl, *SP506*, pp. 295-312 (Nov. 1978).
- Asbestiform minerals in industrial talcs: Commercial definitions versus industrial hygiene reality**, J. M. Dement, *SP506*, pp. 313-323 (Nov. 1978).
- The detection and identification of asbestos and asbestiform minerals in talc**, H. D. Stanley, *SP506*, pp. 325-337 (Nov. 1978).
- Misidentification of asbestos in talc**, J. B. Krause and W. H. Ashton, *SP506*, pp. 339-352 (Nov. 1978).
- Ambient air monitoring for chrysotile in the United States**, R. J. Thompson, *SP506*, pp. 355-362 (Nov. 1978).
- Environmental Protection Agency interim method for determining asbestos in water**, C. H. Anderson, *SP506*, pp. 365-372 (Nov. 1978).
- Inter-laboratory measurements of amphibole and chrysotile fiber concentration in water**, K. S. Chopra, *SP506*, pp. 377-380 (Nov. 1978).
- The standard for occupational exposure to asbestos being considered by ASTM Committee E-34**, M. Cossette and A. A. Winer, *SP506*, pp. 381-386 (Nov. 1978).
- Identification and counting of mineral fragments**, R. J. Lee, J. S. Lally, and R. M. Fisher, *SP506*, pp. 387-402 (Nov. 1978).
- Practical aspects of talc and asbestos**, C. J. Parmentier and G. J. Gill, *SP506*, pp. 403-411 (Nov. 1978).
- The Mining Enforcement and Safety Administration—Regulations and methods**, A. Goodwin, *SP506*, pp. 423-429 (Nov. 1978).
- Occupational Safety and Health Administration methods**, W. C. Dixon, *SP506*, pp. 431-439 (Nov. 1978).
- FDA projects and methods**, J. A. Wenninger, I. M. Asher, and P. McGrath, *SP506*, pp. 441-449 (Nov. 1978).
- CPSC regulation of non-occupational exposure to asbestos in consumer products**, R. M. Hehir, S. P. Bayard, and J. Thompson, *SP506*, pp. 451-459 (Nov. 1978).
- Impact of asbestos regulations on the mining industry**, C. S. Thompson, *SP506*, pp. 461-469 (Nov. 1978).
- SP529. Interagency comparison of ultraviolet photometric standards for measuring ozone concentrations**, J. Wendt, J. Kowalski, A. M. Bass, C. Ellis, and M. Patapoff, *Nat. Bur. Stand. (U.S.)*, *Spec. Publ.* 529, 25 pages (Dec. 1978) SN003-003-02002-8.
- TN963. Air and water pollution—Annual report, FY 74-76**, W. H. Kirchoff and E. Myers, *Nat. Bur. Stand. (U.S.)*, *Tech. Note* 963, 387 pages (Oct. 1978) SN003-003-01983-6.
- NBSIR 77-1211. Evaluation of x-ray fluorescence analysis for the determination of arsenic, vanadium, cadmium, lead and mercury in various matrices**, P. A. Pella, R. L. Myklebust, M. M. Darr, and K. F. J. Heinrich, 31 pages (June 1977). Order from NTIS as PB285452.
- NBSIR 78-1428. Survey of the occurrence of mercury, lead, and cadmium in the Washington, D.C. area**, E. P. Scheide, J. J. Filliben, and J. K. Taylor, 98 pages (Sept. 1977). Order from NTIS as PB281725.
- NBSIR 78-1466. Evaluation of new portable x-ray fluorescent lead analyzers for measuring lead in paint**, A. P. Cramp and H. W. Berger, 59 pages (May 1978). Order from NTIS as PB282254.
- NBS-GCR-77-104. Exhaust emission evaluation of three caterpillar tractor D-398 diesel-electric sets**, C. E. Kitson and R. S. Egdall, 73 pages (Nov. 1977). Order from NTIS as PB276102.

Fire Research

TN710-10. **Building research translation: The behavior of concrete structures in fire—A method for prediction by calculation**, S. G. Weber, Translation Ed., *Nat. Bur. Stand. (U.S.), Tech. Note 710-10*, 83 pages (Mar. 1978) SN003-003-01896-1.

TN964. **Fire alarm and communication systems**, R. W. Bukowski, R. L. P. Custer, and R. G. Bright, *Nat. Bur. Stand. (U.S.), Tech. Note 964*, 49 pages (Apr. 1978) SN003-003-01914-3.

TN973. **Smoke detector design and smoke properties**, R. W. Bukowski and G. W. Mulholland, *Nat. Bur. Stand. (U.S.), Tech. Note 973*, 51 pages (Nov. 1978) SN003-003-01991-7.

TN981. **The calibration of a burn room for fire tests on furnishings**, K. Tu and V. Babrauskas, *Nat. Bur. Stand. (U.S.), Tech. Note 981*, 59 pages (Dec. 1978) SN003-003-01999-2.

- NBSIR 77-1273. **Directions to improve application of systems approach to fire protection requirements for buildings**, H. E. Nelson, 38 pages (July 1977). Order from NTIS as PB276004.
- NBSIR 78-1415. **Fire endurance tests of residential walls containing branch circuit wiring—Preliminary findings**, L. A. Issen, 66 pages (Feb. 1978). Order from NTIS as PB277536.
- NBSIR 78-1422. **Development of a data base for assessing plastics fire hazards**, J. A. Slater, 38 pages (Apr. 1978). Order from NTIS as PB280027.
- NBSIR 78-1430. **An instrument to evaluate installed smoke detectors**, T. G. K. Lee, 37 pages (Feb. 1978). Order from NTIS as PB278633.
- NBSIR 78-1436. **Flammability testing for carpet**, I. A. Benjamin and S. Davis, 14 pages (Apr. 1978). Order from NTIS as PB279372.
- NBSIR 78-1438. **Back-up report for the proposed standard for the flammability (cigarette ignition resistance) of upholstered furniture, PFF 6-76**, J. J. Loftus, 240 pages (June 1978). Order from NTIS as PB285173.
- NBSIR 78-1440. **A literature review of fire and live load surveys in residences**, L. A. Issen, 28 pages (May 1978). Order from NTIS as PB281464.
- NBSIR 78-1448. **Full-scale burning behavior of curtains and draperies**, L. D. Moore, 44 pages (Mar. 1978). Order from NTIS as PB281537.
- NBSIR 78-1497. **A preliminary study of the fire safety of thermal insulation for use in attics or enclosed spaces in residential housing**, D. Gross, 48 pages (July 1978) Order from NTIS as PB285186.
- NBSIR 78-1502. **Smoke measurements in large and small scale fire testing**, R. W. Bukowski, 40 pages (Oct. 1978). Order from NTIS as PB278870.
- NBSIR 78-1504. **Fire research publications, 1977**, N. H. Jason, 13 pages (July 1978). Order from NTIS as PB284462.
- NBSIR 78-1508. **Human response to fire: Three designs for research**, F. I. Stahl, 33 pages (Mar. 20, 1978). Order from NTIS as PB284959.
- NBSIR 78-1512. **Some theoretical aspects of fire induced flows through doorways in a room-corridor scale model**, J. G. Quintiere and K. DenBraven, 37 pages (Oct. 1978). Order from NTIS as PB287510.
- NBSIR 78-1522. **Characteristics of incidental fires in the living room of a mobile home**, D. P. Klein, 69 pages (Sept. 1978). Order from NTIS as PB291426.
- NBSIR 78-1530. **Mobile home living room fire studies: The role of interior finish**, E. K. Budnick, 163 pages (Sept. 1978). Order from NTIS as PB291844.
- NBSIR 78-1531. **Mobile home bedroom fire studies: The role of interior finish**, E. K. Budnick, D. P. Klein, and R. J. O'Laughlin, 107 pages (Sept. 1978). Order from NTIS as PB291444.
- NBS-GCR-77-98. **An experimental investigation of the heat transfer from a buoyant gas plume to a horizontal ceiling—Part 2. Effects of ceiling layer**, E. E. Zukoski and T. Kubota, 78 pages (May 1978). Order from NTIS as PB280746.
- NBS-GCR-77-100. **A numerical procedure for calculating temperature in hollow structures exposed to fire**, U. Wickstrom, 62 pages (Aug. 1977). Order from NTIS as PB284517.
- NBS-GCR-77-101. **Experimental and modeling studies of smoldering in flexible polyurethanes**, T. J. Ohlemiller, F. E. Rogers, A. Kurtz, J. Bellan, and M. Summerfield, 125 pages (July 1977). Order from NTIS as PB284500.
- NBS-GCR-77-105. **Effect of selected variables on the distribution of water from automatic sprinklers**, C. L. Beyler, 70 pages (June 1977). Order from NTIS as PB275083.
- NBS-GCR-77-106. **People in fires: A manual for mapping**, L. Lerup, 47 pages (1977). Order from NTIS as PB275155.
- NBS-GCR-77-108. **Fire development in a room—A bibliography**, T. Waterman, 293 pages (Aug. 1976). Order from NTIS as PB278634.
- NBS-GCR-77-110. **A study of the development of room fires**, T. E. Waterman and R. Pape, 92 pages (Sept. 1976). Order from NTIS as PB278648.
- NBS-GCR-77-111. **Semistochastic approach to predicting the development of a fire in a room from ignition to flashover. Program documentation and users guide**, T. Waterman, 86 pages (June 1976). Order from NTIS as PB278643.
- NBS-GCR-77-112. **Semistochastic approach to predicting the development of a fire in a room from ignition to flashover. Program documentation and users guide (Addendum)**, R. Pape and T. Waterman, 20 pages (Aug. 1976). Order from NTIS as PB278644.
- NBS-GCR-77-116. **Investigation of the properties of the combustion products generated by building fires**, B. T. Zinn, R. A. Cassanova, C. P. Bankston, R. F. Browner, E. A. Powell, J. U. Rhee, K. Kailasanath, 101 pages (Jan. 1978). Order from NTIS as PB276549.
- NBS-GCR-78-114. **Fire response of reinforced concrete slabs**, Z. Nizamuddin and B. Bresler, 42 pages (Mar. 1977). Order from NTIS as PB284502.
- NBS-GCR-78-115. **FIRES-RC II. A computer program for the fire response of structures—Reinforced concrete frames (Revised version)**, R. H. Iding, B. Bresler, and Z. Nizamuddin, 249 pages (July 1977). Order from NTIS as PB278661.
- NBS-GCR-78-117. **An experimental investigation of flame spread over condensed combustibles: Gas phase interactions**, A. C. Fernandez-Pello, 28 pages (Dec. 1977). Order from NTIS as PB275999.
- NBS-GCR-78-118. **Toward a performance approach to life safety from fire in building codes and regulations**, D. S. Haviland, 191 pages (Jan. 1978). Order from NTIS as PB276926.
- NBS-GCR-78-119. **Development of engineering models and design aids to predict flame movement and fire severity within a room**, R. W. Fitzgerald, 98 pages (Dec. 1977). Order from NTIS as PB276865.
- NBS-GCR-78-120. **A model of human behavior in a fire emergency**, L. Bickman, P. Edelman, and M. A. McDaniel, 33 pages (Dec. 1977). Order from NTIS as PB277773.
- NBS-GCR-78-121. **The interaction of fire and sprinklers**, C. L. Beyler, 80 pages (Sept. 1977). Order from NTIS as PB278605.
- NBS-GCR-78-126. **Effects of ignition sources and fire retardants on material ignition**, P. Durbetaki, W. C. Tincher, H. Chang, C. C. Ndubizu, M. L. Teague, and V. L. Wolfe, Jr., 230 pages (Mar. 31, 1978). Order from NTIS as PB281451.
17376. Manka, M. J., Pierce, H., Huggett, C., **Studies of the flash fire potential of aircraft cabin interior materials, DOT Report No. FAA-RD-77-47**, 33 pages (U.S. Department of Transportation, Federal Aviation Administration, Systems Research & Development Service, Washington, DC, Dec. 1977).

Lasers and Their Applications

- TEA laser induced multiphoton dissociation of ethylene in a collisional regime: Model and experiment, N. C. Peterson, R. G. Manning, and W. Braun, *J. Res. Nat. Bur. Stand. (U.S.)*, 83, No. 2, 117-125 (Mar.-Apr. 1978).
- SP509. **Laser induced damage in optical materials: 1977**. Proceedings of a Symposium sponsored by: National Bureau of Standards, American Society for Testing and Materials, Office of Naval Research, Energy Research and Development Administration, Defense Advanced Research Project Agency,

NBS Boulder, CO, Oct. 4-6, 1977. A. J. Glass and A. H. Guenther, Eds., *Nat. Bur. Stand. (U.S.), Spec. Publ. 509*, 561 pages (Dec. 1977) SN003-003-01911-9.

Extrinsic absorption in infrared laser-window materials, M. Flannery and M. Sparks, *SP509*, pp. 5-23 (Dec. 1977).

Possible processes of laser window degradation, W. J. Fredericks, *SP509*, pp. 24-35 (Dec. 1977).

Purification of potassium bromide and alkaline earth fluorides for laser components, W. J. Fredericks, *SP509*, pp. 37-55 (Dec. 1977).

Frequency and temperature dependence of residual infrared absorption in mixed fluoride crystals, H. G. Lipson, A. Hordvik, B. Bendow, S. S. Mitra, and J. J. Martin, *SP509*, pp. 56-61 (Dec. 1977).

Bulk laser absorption homogeneity, T. J. Moravec and E. G. Bernal, *SP509*, pp. 62-73 (Dec. 1977).

Refractive properties of infrared window materials, A. Feldman, D. Horowitz, and R. M. Waxler, *SP509*, pp. 74-82 (Dec. 1977).

Refractive properties of CVD zinc sulfide, M. J. Dodge, *SP509*, pp. 83-88 (Dec. 1977).

Critical orientations for eliminating stress-induced depolarization in crystalline windows and rods, R. E. Joiner, J. H. Marburger, and W. H. Steier, *SP509*, pp. 89-94 (Dec. 1977).

Lattice defect equilibrium in KCl:Eu, J. B. Wolfenstine and T. G. Stoebe, *SP509*, pp. 96-104 (Dec. 1977).

Detection of oxygen in calcium fluoride laser window materials by XPS, T. N. Wittberg, J. R. Hoenigman, W. E. Moddeman, and C. L. Strecker, *SP509*, pp. 105-110 (Dec. 1978).

Internal-reflection-spectroscopy study of water adsorbed on CaF₂, J. W. Gibson, R. T. Holm, and E. D. Palik, *SP509*, pp. 112-116 (Dec. 1977).

Pulsed HF/DF laser damage in window materials, E. W. Van Stryland, M. Bass, M. J. Soileau, and C. C. Tang, *SP509*, pp. 118-125 (Dec. 1977).

Optical absorption in UV laser window materials, J. A. Harrington, B. L. Bobbs, M. Braunstein, R. Braunstein, R. Y. Kim, and R. Stearns, *SP509*, pp. 127-131 (Dec. 1977).

UV reflectance, transmission, and photoluminescence of LiYF₄, and the bulk loss coefficient in CaF₂, V. Rehn, D. L. Burdick, and V. O. Jones, *SP509*, pp. 132-136 (Dec. 1977).

Fluence dependence of the absorptance of some alkaline earth fluorides at 0.36 μm , P. A. Temple and D. L. Decker, *SP509*, pp. 137-140 (Dec. 1977).

Surface statistics of selected optical materials, J. M. Bennett and J. M. Elson, *SP509*, pp. 142-155 (Dec. 1977).

Surface roughness statistics of fused silica as a function of surface preparation and treatment, R. A. House, A. H. Guenther, and J. M. Bennett, *SP509*, pp. 157-165 (Dec. 1977).

The effects of surface roughness on 1064-nm, 150-ps laser damage, D. Milam, W. L. Smith, M. J. Weber, A. H. Guenther, R. A. House, and J. R. Bettis, *SP509*, pp. 166-173 (Dec. 1977).

Low scatter finishing of aspheric optics, W. P. Barnes, Jr. and R. R. McDonough, *SP509*, pp. 174-182 (Dec. 1977).

Measurement of mirror and window characteristics for use with 10.6 μm lasers, S. Sharma, R. M. Wood, and R. C. C. Ward, *SP509*, pp. 183-194 (Dec. 1977).

Polishing single point diamond turned mirrors, R. E. Parks, R. E. Sumner, and R. E. Strittmatter, *SP509*, pp. 196-203 (Dec. 1977).

Pulsed-laser stress phenomena on highly reflecting metal and alloy surfaces, J. O. Porteus, C. W. Fountain, J. L. Jernigan, W. N. Faith, and H. E. Bennett, *SP509*, pp. 204-214 (Dec. 1977).

Low-expansion laser mirrors, P. Pirooz, G. Dubé and N. L. Boling, *SP509*, pp. 215-221 (Dec. 1977).

A new chalcogenide-glass antireflection coating for KCl, A. D. McLachlan and W. E. K. Gibbs, *SP509*, pp. 222-228 (Dec. 1977).

Intrinsic and thermal stress modeling for thin-film multilayers, A. M. Ledger and R. C. Bastien, *SP509*, pp. 230-242 (Dec. 1977).

Hydroxyl influence and refractive index dependence in picosecond thin-film damage, W. L. Smith, D. Milam, M. J. Weber, A. H. Guenther, J. R. Bettis, and R. A. House, *SP509*, pp. 244-250 (Dec. 1977).

Further studies of the role of electric field strength in laser damage of dielectric layers, J. H. Apfel, *SP509*, pp. 251-254 (Dec. 1977).

The effects of barrier layers and surface smoothness on 150-ps, 1.064- μm laser damage of AR coatings on glass, J. H. Apfel, E. A. Enemark, D. Milam, W. L. Smith, and M. J. Weber, *SP509*, pp. 255-259 (Dec. 1977).

Use of non-quarter-wave designs to increase the damage resistance of reflectors at 532 and 1064 nanometers, D. H. Gill, B. E. Newnam and J. McLeod, *SP509*, pp. 260-270 (Dec. 1977).

Characteristics of R. F. sputter-deposited zinc selenide films on calcium fluoride, D. A. Walsh and R. V. Bertke, *SP509*, pp. 271-275 (Dec. 1977).

A study of infrared absorption in zinc selenide thin films, D. F. O'Brien, *SP509*, pp. 276-280 (Dec. 1977).

The design and operation of a precise, high sensitivity adiabatic laser calorimeter for window and mirror material evaluation, D. L. Decker and P. A. Temple, *SP509*, pp. 281-285 (Dec. 1977).

Modulated light ellipsometer measurements of strain-induced anisotropy in the refractive index of As₂S₃ and As₂S₃ films on KCl substrates at 10.6 μm , M. E. Pedinoff, M. Braunstein, and O. M. Stafstudd, *SP509*, pp. 286-296 (Dec. 1977).

Damage resistance of Ar-coated germanium surfaces for nanosecond CO₂ laser pulses, B. E. Newnam and D. H. Gill, *SP509*, pp. 298-315 (Dec. 1977).

10.6 μm laser damage in coatings containing As₂S₃ and As₂Se₃, C. C. Tang, M. Bass, M. J. Soileau, and E. W. Van Stryland, *SP509*, pp. 316-323 (Dec. 1977).

Large-spot DF laser damage of dielectric-enhanced mirrors, D. B. Nichols, R. B. Hall, and R. A. House II, *SP509*, pp. 325-341 (Dec. 1977).

Defects and impurities in As₂S₃, As₂Se₃, As₂Se₃, and NaF coatings, T. M. Donovan, A. D. Baer, J. H. Dancy, and J. O. Porteus, *SP509*, pp. 342-351 (Dec. 1977).

Optical constants of As₂S₃ by a wedged-film technique, D. L. Burdick, *SP509*, pp. 352-357 (Dec. 1977).

Dielectric coatings for deformable mirrors, J. M. Rowe, *SP509*, pp. 358-361 (Dec. 1977).

Quantitative characterization of coatings: Part I: Adhesion, S. R. Scheele and J. W. Bergstrom, *SP509*, pp. 363-377 (Mar. 1978).

Quantitative characterization of coatings: Part II: Abrasion resistance, R. A. West and C. W. Nichols, *SP509*, pp. 378-383 (Dec. 1977).

Dielectric enhanced mirrors for the 2-6 μm region, S. J. Holmes, *SP509*, pp. 385-398 (Dec. 1977).

Temperature and concentration dependence of laser bulk damage to reodymium glass, J. G. Sliney, Jr., and L. G. DeShazer, *SP509*, pp. 399-409 (Dec. 1977).

Direct measurement of inversion density in silicate and phosphate laser glass, J. A. Abate, D. C. Brown, C. Cromer, S. D. Jacobs, J. Kelly, and J. Rinefield, *SP509*, pp. 409-414 (Dec. 1977).

Figures of merit and correlations of physical and optical properties in laser glasses, D. C. Brown, S. D. Jacobs, J. A. Abate, O. Lewis, and J. Rinefield, *SP509*, pp. 416-433 (Dec. 1977).

Low Temperature Science and Engineering

SP508. Applications of closed-cycle cryocoolers to small superconducting devices. Proceedings of a Conference held at the National Bureau of Standards, Boulder, CO, Oct. 3-4, 1977, J. E. Zimmerman and T. M. Flynn, Eds., *Nat. Bur. Stand. (U.S.), Spec. Publ. 508*, 238 pages (Apr. 1978) SN003-003-01910-1.

Refrigeration fundamentals: A view toward new refrigeration systems, R. Radebaugh, *SP508*, pp. 7-43 (Apr. 1978).

Concepts for cooling small superconducting devices using closed-cycle regenerative refrigerators, R. C. Longworth, *SP508*, pp. 45-57 (Apr. 1978).

Operation of a SQUID in a very low-power cryocooler, J. E. Zimmerman and R. Radebaugh, *SP508*, pp. 59-65 (Apr. 1978).

Shuttle heat transfer in plastic displacers at low speeds, R. Radebaugh and J. E. Zimmerman, *SP508*, pp. 67-73 (Apr. 1978).

Scaling of miniature cryocoolers to microminiature size, W. A. Little, *SP508*, pp. 75-80 (Apr. 1978).

Small magnetic refrigerators to pump heat from helium temperatures to above 10 K, W. A. Steyert, *SP508*, pp. 81-91 (Apr. 1978).

Electrocaloric refrigeration for the 4-20 K temperature range, R. Radebaugh, *SP508*, pp. 93-97 (Apr. 1978).

One million hours at 4.5 Kelvin, W. H. Higa and E. Wiebe, *SP508*, pp. 99-107 (Apr. 1978).

Design compromises in the selection of closed-cycle cryocoolers, F. F. Chellis, *SP508*, pp. 109-122 (Apr. 1978).

Magnetic and vibrational characteristics of a closed cycle refrigerator, J. E. Cox and S. A. Wolf, *SP508*, pp. 123-129 (Apr. 1978).

Closed-cycle refrigerator for a superconducting susceptometer, D. A. Vincent, *SP508*, pp. 131-133 (Apr. 1978).

Cryogenic applications of closed-cycle mechanical and adsorption refrigeration, W. H. Hartwig, *SP508*, pp. 135-151 (Apr. 1978).

Cryogenic cooling requirements of photoconductive infrared detectors for orbiting astronomical telescopes, J. W. Vorreiter and C. R. McCreight, *SP508*, pp. 153-157 (Apr. 1978).

Cooling of Josephson mm- and submm-wave systems: Requirements, results and applications, J. Edrich, *SP508*, pp. 159-165 (Apr. 1978).

Progress report on high- T_c superconducting devices, M. R. Beasley, *SP508*, pp. 167-175 (Apr. 1978).

Application of SQUID detectors in biomagnetism, S. J. Williamson and L. Kaufman, *SP508*, pp. 177-204 (Apr. 1978).

Cryogenic techniques and geophysical measurements, W. D. Stanley, *SP508*, pp. 205-206 (Apr. 1978).

Cryocoolers for use with superconducting instruments: Some estimates of requirements, M. B. Simmonds, *SP508*, pp. 207-211 (Apr. 1978).

Refrigerator requirements for potential Josephson data processing systems, B. J. C. van der Hoeven, Jr. and W. Anacker, *SP508*, pp. 213-219 (Apr. 1978).

Liters, kilograms, watts and seconds: Design goals for a refrigerator for use with superconductive systems, M. Nisenoff, *SP508*, pp. 221-225 (Apr. 1978).

Potential scientific uses of cryogenics in space in the temperature range from 1 mK to 10 K, E. Tward and P. V. Mason, *SP508*, pp. 227-241 (Apr. 1978).

Josephson Voltage Standards—An application for cryocoolers?, L. B. Holdeman and C. C. Chang, *SP508*, pp. 243-245 (Apr. 1978).

TN1002. Measurements of combined axial mass and heat transport in He II, W. W. Johnson and M. C. Jones, *Nat. Bur. Stand. (U.S.), Tech. Note 1002*, 84 pages (Feb. 1978) SN003-003-01889-9.

Processing and Performance of Materials

SP496, Vols. 1 and 2. Applications of phase diagrams in metallurgy and ceramics. Proceedings of a Workshop held at the National Bureau of Standards, Gaithersburg, MD, Jan. 10-12, 1977, G. C. Carter, Ed., *Nat. Bur. Stand. (U.S.), Spec. Publ.* **496/1**, 767 pages; **496/2**, 847 pages (Mar. 1978) SN003-003-01895-3.

Phase diagram compilation activities in ceramics, R. S. Roth, L. P. Cook, T. Negas, G. W. Cleek, and J. B. Wachtman, Jr., *SP496/1*, pp. 1-22 (Mar. 1978).

Present status of phase diagram compilation activity for semiconductors, C. D. Thurmond, *SP496/1*, pp. 23-35 (Mar. 1978).

Phase diagram compilations for metallic systems—An assessment of ongoing activities, G. C. Carter, *SP496/1*, pp. 36-89 (Mar. 1978).

Organization of phase diagram information in the Soviet Union, N. V. Ageev, D. L. Ageeva, T. P. Kolesnikova, and L. A. Petrova, *SP496/1*, pp. 90-99 (Mar. 1978).

A survey of high pressure phases of materials, L. Merrill, *SP496/1*, pp. 100-120 (Mar. 1978).

Phase diagram information from computer banks, I. Anzara, *SP496/1*, pp. 123-141 (Mar. 1978).

An overview of the determination of phase diagrams, F. N. Rhines, *SP496/1*, pp. 142-163 (Mar. 1978).

Proposal for a comprehensive handbook on "Ternary Phase Diagrams of Metals," F. Aldinger, E. T. Henig, H. L. Lukas, and G. Petzow, *SP496/1*, p. 164 (Mar. 1978).

Phases and phase relations in the binary oxide systems containing WO_3 , L. L. Y. Chang, *SP496/1*, pp. 165-225 (Mar. 1978).

RIC in phase with rare-earth constitutional diagrams, K. A. Gshneider, Jr., M. E. Verkade, and B. L. Evans, *SP496/1*, pp. 226-228 (Mar. 1978).

Evaluations of phase diagrams and thermodynamic properties of ternary copper alloy systems, Y. A. Chang, J. P. Neumann, and U. V. Choudary, *SP496/1*, pp. 229-250 (Mar. 1978).

Phase equilibria in variable valence oxide systems, W. B. White, *SP496/1*, pp. 251-256 (Mar. 1978).

Phase diagrams for ceramists, L. P. Cook, R. S. Roth, T. Negas, and G. W. Cleek, *SP496/1*, pp. 257-258 (Mar. 1978).

NBS Crystal-Data Center, A. Mighell, H. Ondik, J. Stalick, and R. Boreni, *SP496/1*, pp. 259-260 (Mar. 1978).

The NBS Alloy Data Center, G. C. Carter, D. J. Kahan, and L. H. Bennett, *SP496/1*, pp. 261-271 (Mar. 1978).

A review of phase equilibria in the $\text{Na}_3\text{AlF}_6\text{-LiF-CaF}_2\text{-AlF}_3\text{-Al}_2\text{O}_3$ system, D. F. Craig, R. T. Cassidy, and J. J. Brown, Jr., *SP496/1*, pp. 272-345 (Mar. 1978).

Methods of compiling and editing "Structure and Properties of Binary Metallic Systems," A. E. Vol and I. K. Kagan, *SP496/1*, pp. 346-350 (Mar. 1978).

English Translation, *SP496/1*, pp. 351-354 (Mar. 1978).

The determination of phase diagrams for liquid oxides and metallurgical slags by hot-wire microscopy, H. A. Fine, *SP496/1*, pp. 355-374 (Mar. 1978).

Experimental techniques in phase diagram determination of superconducting compounds containing volatile components at temperatures up to 2200 °C, R. Flükiger and J. L. Jorda, *SP496/1*, pp. 375-406 (Mar. 1978).

Application of experimental techniques and the critical determination of phase equilibria in oxide systems, F. P. Glasser, *SP496/1*, pp. 407-422 (Mar. 1978).

Protective coatings for superalloys and the use of phase diagrams, M. R. Jackson and J. R. Rairden, *SP496/1*, pp. 423-439 (Mar. 1978).

Application of the scanning electron microscope to the study of high temperature oxide phase equilibria, L. P. Cook and D. B. Minor, *SP496/1*, pp. 440-449 (Mar. 1978).

Hyperfine techniques and the determination of phase diagrams, R. C. Reno, L. J. Swartzendruber, G. C. Carter, and L. H. Bennett, *SP496/1*, pp. 450-461 (Mar. 1978).

Experimental determination of phase diagrams with the electron microprobe and scanning transmission electron microscope, A. D. Romig, Jr. and J. I. Goldstein, *SP496/1*, pp. 462-482 (Mar. 1978).

Interrelations between phase diagrams and hydriding properties for alloys based on the intermetallic compound FeTi, G. D. Sandrock, J. J. Reilly, and J. R. Johnson, *SP496/1*, pp. 483-507 (Mar. 1978).

Phase equilibria in the system MgO-RCI (R=Li, Na and K) solution under hydrothermal conditions by means of a capsule bursting method, S. Somiya, K. Nakamura, S. Hirano, and S. Saito, *SP496/1*, pp. 508-515 (Mar. 1978).

High-energy ion beams in phase diagram determination, J. E. Smugeresky and S. M. Myers, *SP496/1*, pp. 516-544 (Mar. 1978).

Phase equilibrium diagrams in terms of electronic structure, F. E. Wang, *SP496/1*, pp. 545-549 (Mar. 1978).

Use of segregation phenomena in solid solutions as a method for determining solidification diagrams. Application to some $\text{Sc}_2\text{O}_3\text{-Ho}_2\text{O}_3$ and $\text{Sc}_2\text{O}_3\text{-Dy}_2\text{O}_3$ systems, J. M. Badie, *SP496/1*, pp. 550-565 (Mar. 1978).

Studies of the Fe-C-B phase diagram by autoradiography, T. B. Cameron and J. E. Morral, *SP496/1*, p. 566 (Mar. 1978).

User needs for phase diagrams, P. J. Fopiano, *SP496/1*, pp. 567-574 (Mar. 1978).

Phase diagram of a specimen at high temperatures under external tensile or shear stress or both, K. M. Khanna, *SP496/1*, pp. 575-577 (Mar. 1978).

Phase diagram of a metal-gas system, V. K. Sinha, *SP496/1*, pp. 578-591 (Mar. 1978).

Theory of alloy phases, R. E. Watson, H. Ehrenreich, and L. H. Bennett, *SP496/1*, pp. 592-623 (Mar. 1978).

Estimation of conjugate γ and γ' compositions in Ni-base superalloys, R. L. Dreshfield, *SP496/1*, pp. 624-657 (Mar. 1978).

The representation of phase equilibria, A. Prince, *SP496/1*, pp. 660-702 (Mar. 1978).

Phase-diagram compilations—A user's view, J. D. Livingston, *SP496/1*, pp. 703-708 (Mar. 1978).

Some thoughts on the distribution of reference data, H. J. White, Jr., *SP496/1*, pp. 709-719 (Mar. 1978).

Remarks on producing and publishing critically evaluated data, W. B. Pearson, *SP496/1*, pp. 720-724 (Mar. 1978).

Computerized characterization of the Au-Cu-Ni ternary system, S. K. Tarby, C. J. Van Tyne, and M. L. Boyle, *SP496/2*, pp. 726-743 (Mar. 1978).

Correlations and predictions of metal-boron phase equilibria, K. E. Spear, *SP496/2*, pp. 744-762 (Mar. 1978).

A valence bond test for the validity of intermetallic and semiconducting structures, F. L. Carter, *SP496/2*, pp. 763-773 (Mar. 1978).

Computation of the component activities from ternary miscibility gap data: The Cu-Ag-S and Cu-Ag-Se systems, U. V. Choudary and Y. A. Chang, *SP496/2*, pp. 774-802 (Mar. 1978).

The mathematical representation of activity data in three component systems, I. Eliezer and R. A. Howald, *SP496/2*, pp. 803-845 (Mar. 1978).

A program for binary phase equilibria using the Redlich-Kister equations, I. Eliezer and R. A. Howald, *SP496/2*, pp. 846-906 (Mar. 1978).

Polynomial representation of the excess free energy of multicomponent systems and their use in phase diagram calculations, H. Gaye and C. H. P. Lupis, *SP496/2*, pp. 907-908 (Mar. 1978).

Thermodynamic data for the Fe-O system evaluated using a new computer-aided strategy, J. L. Haas, Jr. and J. R. Fisher, *SP496/2*, pp. 909-910 (Mar. 1978).

Analysis and synthesis of phase diagrams of the Fe-Cr-Ni, Fe-Cu-Mn and Fe-Cu-Ni systems, M. Hasebe and T. Nishizawa, *SP496/2*, pp. 911-954 (Mar. 1978).

Optimization of phase diagrams by a least squares method using simultaneously different types of data, E. T. Henig, H. L. Lukas, B. Zimmermann, and G. Petzow, *SP496/2*, pp. 955-966 (Mar. 1978).

Theoretical calculation of phase diagrams using the cluster variation method, R. Kikuchi and D. de Fontaine, *SP496/2*, pp. 967-998 (Mar. 1978).

Fundamental calculations of coherent phase diagrams, D. de Fontaine and R. Kikuchi, *SP496/2*, pp. 999-1026 (Mar. 1978).

Generation of self-consistent Gibbs energy functions for binary systems: The Fe-Cu system as an example, J. F. Smith, D. M. Bailey, and O. Kubaschewski, *SP496/2*, pp. 1027-1046 (Mar. 1978).

Characteristics and calculation of stability diagrams, S. McCormick and Y. Bilimoria, *SP496/2*, pp. 1047-1064 (Mar. 1978).

The effect of irradiation on phase stability, L. Kaufman, J. S. Watkin, J. H. Gittus, and A. P. Miodownik, *SP496/2*, pp. 1065-1076 (Mar. 1978).

Facility for the analysis of chemical thermodynamics (F*A*C*T)—A computerized Canadian thermodynamic data treatment centre, A. D. Pelton, C. W. Bale, and W. T. Thompson, *SP496/2*, pp. 1077-1089 (Mar. 1978).

The calculation of Pourbaix diagrams using a modified linear programming technique, B. H. Rosof, *SP496/2*, pp. 1090-1092 (Mar. 1978).

Theoretical concepts useful in the calculation or storage of phase diagrams of ionic systems, M. L. Saboungi and M. Blander, *SP496/2*, pp. 1093-1108 (Mar. 1978).

Estimation of isothermal sections of ternary phase diagrams of lithium containing systems: The Al-Li-Mg system, M. L. Saboungi and C. C. Hsu, *SP496/2*, pp. 1109-1138 (Mar. 1978).

Cybernetic prediction of the formation of chemical compounds in uninvestigated systems, E. M. Savitskii, V. P. Gribulya, and N. N. Kiselyeva, *SP496/2*, pp. 1139-1150 (Mar. 1978).

English Translation, *SP496/2*, pp. 1151-1160 (Mar. 1978).

The determination and representation of metastable phase diagram features and other thermal characteristics of metastable alloys, especially amorphous metals, B. C. Giessen, *SP496/2*, pp. 1161-1185 (Mar. 1978).

The calculation of multicomponent alloy phase diagrams at the National Physical Laboratory, T. G. Chart, *SP496/2*, pp. 1186-1199 (Mar. 1978).

Synthesis of binary metallic systems I. Isomorphous Systems II. Simple Eutectic Systems, S. S. Balakrishna and A. K. Mallik, *SP496/2*, pp. 1200-1219 (Mar. 1978).

Quantitative fits to phase lines and high temperature thermodynamic data for systems forming semiconductor compounds, R. F. Brebrick, *SP496/2*, pp. 1220-1236 (Mar. 1978).

Table of contents and cumulative subject index for "Phase diagrams of metallic systems," N. V. Ageev, editor, Volumes 1-19, C. M. Scheuermann, *SP496/2*, pp. 1237-1306 (Mar. 1978).

Standards for publication of phase equilibrium studies, E. R. Kreidler, *SP496/2*, pp. 1307-1324 (Mar. 1978).

Formatting and distributing evaluated reference data: The Office of Standard Reference Data at the National Bureau of Standards, S. P. Fivozinsky and G. B. Sherwood, *SP496/2*, pp. 1325-1331 (Mar. 1978).

Needs for phase diagram information in nonferrous industry, P. R. Ammann, *SP496/2*, pp. 1334-1352 (Mar. 1978).

Primary metals production, H. R. Larson, *SP496/2*, pp. 1354-1359 (Mar. 1978).

Use of phase diagrams in iron and steelmaking, R. D. Pehlke, *SP496/2*, pp. 1360-1370 (Mar. 1978).

User needs for phase diagrams for materials processing: Glasses, R. C. Doman and R. N. McNally, *SP496/2*, pp. 1378-1381 (Mar. 1978).

Equilibrium diagrams in nonferrous alloys, L. F. Mondolfo, *SP496/2*, pp. 1382-1408 (Mar. 1978).

Phase equilibria in the development of high temperature structural ceramics, S. Prochazka, *SP496/2*, pp. 1409-1410 (Mar. 1978).

Phase diagram information for processing of superconductors, D. Dew-Hughes, *SP496/2*, pp. 1411-1417 (Mar. 1978).

Importance of phase diagrams in the electric power industry, R. I. Jaffee, *SP496/2*, pp. 1420-1425 (Mar. 1978).

Summary of presentation on user needs of phase diagrams: The solar energy field, A. I. Mlavsky, *SP496/2*, p. 1426 (Mar. 1978).

The use of phase equilibria in the manufacture of spinel ferrites, P. Slick, *SP496/2*, p. 1427 (Mar. 1978).

The application of the phase diagram to thermal energy storage technology, J. E. Beam and J. E. Davison, *SP496/2*, pp. 1428-1439 (Mar. 1978).

The needs for phase equilibria data in the development of magnetohydrodynamics, R. A. Howald and I. Eliezer, *SP496/2*, pp. 1440-1450 (Mar. 1978).

Summary remarks, J. F. Elliott, *SP496/2*, pp. 1453-1469 (Mar. 1978).

Evaluation of conference, R. A. Howald and J. E. Selle, *SP496/2*, pp. 1470-1471 (Mar. 1978).

Comments on the phase diagram workshop, D. de Fontaine, *SP496/2*, pp. 1472-1478 (Mar. 1978).

The relation between bond length and crystal structures in metals, A. P. Miodownik, *SP496/2*, pp. 1479-1505 (Mar. 1978).

On computerized construction of multidimensional phase diagrams in a factographic IRS, I. V. Tulupova and V. S. Stein, *SP496/2*, pp. 1506-1519 (Mar. 1978).

NBSIR 77-1286. Characterizing the interfiber bond strength of paper pulps in terms of a breaking energy: Effect of beating, J. C. Smith and E. L. Graminski, 18 pages (Dec. 15, 1976). Order from NTIS as PB276473.

Other Subjects of General Interest

- SP305. Supplement 9. Publications of the National Bureau of Standards 1977 catalog. A compilation of abstracts and key word and author indexes, B. L. Burris, Ed., *Nat. Bur. Stand. (U.S.)*, *Spec. Publ. 305 Suppl. 9*, 601 pages (June 1978) SN003-003-01951-8.
- SP516. Color in the health care environment. Proceedings of a Special Workshop held at the National Bureau of Standards,

- Gaithersburg, MD, Nov. 16, 1976, B. C. Pierman, Ed., *Nat. Bur. Stand. (U.S.)*, *Spec. Publ. 516*, 35 pages (Sept. 1978) SN003-003-01957-7.
- Overview of the Center for Building Technology**, NBS, R. N. Wright, *SP516*, pp. 1-3 (Sept. 1978).
- Hospital light and color from the physician's standpoint**, W. C. Beck, *SP516*, pp. 5-7 (Sept. 1978).
- Health facilities: Color them caring**, M. Graham, *SP516*, pp. 9-12 (Sept. 1978).
- Studies of the subjective influence of light and color**, J. E. Flynn, *SP516*, pp. 13-18 (Sept. 1978).
- Some relationships of color and light to patient care**, T. R. C. Sisson, *SP516*, pp. 19-24 (Sept. 1978).
- The relationship of color planning in designing a pediatric oncology unit to the symbolic meaning of colors as seen in patients' graphic productions**, S. Castelluccio, *SP516*, pp. 25-26 (Sept. 1978).
- Lighting and color in health care facilities—From a designer's viewpoint**, A. F. Styne, *SP516*, pp. 27-28 (Sept. 1978).
- SP520. Applications of space flight in materials science and technology.** Proceedings of a Conference held at the National Bureau of Standards, Gaithersburg, MD, Apr. 20-21, 1977, S. Silverman and E. Passaglia, Eds., *Nat. Bur. Stand. (U.S.)*, *Spec. Publ. 520*, 128 pages (Sept. 1978) SN003-003-01973-9.
- Uses of space flight for materials research**, J. E. Naugle, *SP520*, pp. 3-6 (Sept. 1978).
- The National Research Council study**, W. P. Slichter, *SP520*, pp. 7-9 (Sept. 1978).
- Materials processing experiment capabilities in space**, E. C. McKannan, *SP520*, pp. 10-13 (Sept. 1978).
- Metallurgical studies in Skylab & Apollo-Soyuz flights**, D. J. Duquette, *SP520*, pp. 14-16 (Sept. 1978).
- Fluid behavior in a microgravity environment**, J. R. Caruthers, *SP520*, pp. 17-24 (Sept. 1978).
- Crystal growth in micro-gravity—An overview**, H. Wiedemeier, *SP520*, pp. 25-39 (Sept. 1978).
- Direct observation of dendrite remelting and macrosegregation in low-gravity**, M. H. Johnston, *SP520*, pp. 40-43 (Sept. 1978).
- Thermal migration of bubbles and their interaction with solidification interfaces**, J. M. Papazian and W. R. Wilcox, *SP520*, pp. 44-48 (Sept. 1978).
- Space processing rocket experiment 74-5 space solidification of Pb-Sb eutectic**, R. B. Pond, Sr., *SP520*, p. 50 (Sept. 1978).
- Agglomeration in immiscible liquids**, S. H. Gelles and A. M. Markworth, *SP520*, pp. 51-58 (Sept. 1978).
- Containerless processing of beryllium**, G. Wouch, *SP520*, pp. 59-66 (Sept. 1978).
- Implications of metal foam experiments for fluid flow effects on materials systems processed in zero gravity**, J. W. Patten, *SP520*, pp. 67-68 (Sept. 1978).
- Materials processing in space experimental capabilities in the space shuttle/space lab**, R. Adams, *SP520*, pp. 70-74 (Sept. 1978).
- Materials applications of space flight—Metals**, R. A. Oriani, *SP520*, pp. 76-77 (Sept. 1978).
- Applications of space flight in materials science and technology—Ceramics and glasses**, G. E. Rindone, *SP520*, pp. 78-79 (Sept. 1978).
- Electronic materials**, A. Witt, *SP520*, pp. 80-82 (Sept. 1978).
- Applications of space flight in materials science and technology. The future—Biological materials applications**, G. V. F. Scaman, *SP520*, pp. 83-88 (Sept. 1978).
- Critical phenomena and condensation**, P. H. E. Meijer, *SP520*, pp. 89-93 (Sept. 1978).
- Thermodynamics and purification**, J. Margrave, *SP520*, pp. 94-96 (Sept. 1978).
- Future research applications in crystal growth**, M. E. Glicksman, *SP520*, pp. 98-99 (Sept. 1978).
- Comments on solidification in space**, R. F. Sekerka, *SP520*, pp. 100-101 (Sept. 1978).
- Transport properties in fluids**, J. R. Manning, *SP520*, pp. 102-103 (Sept. 1978).
- Fluid and combustion dynamics**, A. L. Berlad, *SP520*, pp. 105-107 (Sept. 1978).
- The future fluid flow research applications**, S. Ostrach, *SP520*, p. 108 (Sept. 1978).
- SP535, Vol. 1, Pts. 1 and 2. Catalog of National Bureau of Standards Publications 1966-1976. Citations and abstracts**, B. L. Burris and R. J. Morehouse, Eds., *Nat. Bur. Stand. (U.S.)*, *Spec. Publ. 535, Vol. 1, Pts. 1 and 2*, 1908 pages (1978) SN003-003-02010-9.
- SP535, Vol. 2, A-L and M-Z. Catalog of National Bureau of Standards Publications 1966-1976. Key word index**, B. L. Burris and R. J. Morehouse, Eds., *Nat. Bur. Stand. (U.S.)*, *Spec. Publ. 535, Vol. 2, A-L and M-Z*, 1569 pages (1978) SN003-003-02011-7.
- TN969. NBS Reactor: Summary of activities July 1976 to June 1977**, F. J. Shorten, Ed., *Nat. Bur. Stand. (U.S.)*, *Tech. Note 969*, 188 pages (Apr. 1978) SN003-003-01907-1.

A

- A values; collisional relaxation; electronic transition rates; mercury fluorescence; optical excitation; 18056.
- Ab initio quantum chemistry; elastic scattering; energy transfer; excited states; hydrogen atoms; hydrogen molecules; H₂; inelastic collisions; long-range forces; potential energy surfaces; semiempirical valence-bond theory; transport properties; 17358.
- Abatement; building materials; cost; economics; housing; lead-based paint; lead poisoning; 17500.
- Aberration coefficients; crossed-field energy analyzer; electron optics; Wien filter; 18043.
- Abrasion; adhesion; optical coating testing; peel test; plug-pull test; topple test; SP509, pp. 363-377 (Mar. 1978).
- Abrasion; Federal Specification CCC-W-408A; fungus resistance; stain resistance; surface roughness; vinyl wall-coverings; wallcovering materials; washability; TN984.
- Abrasion resistance; coating degradation; coatings; hardness; transmittance degradation; SP509, pp. 378-383 (Dec. 1977).
- Abrasion resistance; coatings; color and gloss change; impact resistance; industrial cladding; moisture resistance; salt spray resistance; 17943.
- Abrasive wear; accelerated wear testing; contaminant tolerance; contaminant wear; hydraulic pump wear; service life; SP514, pp. 66-75 (May 1978).
- Absolute; fission cross section; integral fission measurement; spontaneous fission spectrum; ²³⁵U(n,f); ²³⁸U(n,f); ²³⁹U(n,f); ²⁵²Cf; 17809.
- Absolute cross sections; crossed beams; C³⁺; electron impact; excitation (2s-2p); 17388.
- Absolute cross sections; C³⁺; crossed beams; electron impact; excitation (2s-2p); 17366.
- Absolute isotope ratios; atomic/molecular vaporization; atomic weights; calcium; fractionation; isotopes; multiple filament; potassium; strontium; thermal ionization; 17940.
- Absolute measurement; intensity standard; paramagnetic resonance; ruby; spin concentration; standard reference material (SRM); J. Res. 83, No. 2, 133-164 (1978).
- Absolute measurement; intensity standard; paramagnetic resonance; ruby; spin concentration; standard reference material (SRM); SP260-59.
- Absolute radiometry; detector; electrically calibrated detectors; laser power measurements; pyroelectric detectors; radiometry; silicon cell; silicon detector; silicon photodetector; 17535.
- Absolute thermometry below 10 K; ac Josephson effect; Josephson junctions; noise thermometry; 18055.
- Absolute x-ray detector; electron excitations; monoenergetic x rays; pulsed x-ray source; x-ray detector calibration; 1.5-8 keV x rays; 17771.
- Absorbed dose; absorbed-dose calibration; calorimeter; dissemination; exposure calibration; ionization chamber; primary standard; unit; 17440.
- Absorbed dose; calorimeter comparisons; cobalt-60; graphite; phantom size; NBSIR 77-1203.
- Absorbed dose; calorimeters; comparison; national standards; ⁶⁰Co; 18233.
- Absorbed dose; central axis depth dose; collimation; electrons; radial dose profile; scattering foil; NBSIR 78-1552.
- Absorbed dose; cobalt-60; radiation therapy; random uncertainty; systematic uncertainty; uncertainty; 17446.
- Absorbed dose; cobalt-60 gamma radiation; computation check; dose interpretation; mailings; survey; teletherapy; thermoluminescence dosimeters; water phantom; TN978.
- Absorbed dose; cross linking; dose distributions; dosimetry; electron beams; nylon; plastic tubing; polyethylene; polymer improvement; polyvinylchloride; radiation processing; wire insulation; 17451.
- Absorbed-dose calibration; calorimeter; dissemination; exposure calibration; ionization chamber; primary standard; unit; absorbed dose; 17440.
- Absorber coatings; absorber plates; cover plates; enclosure; insulation; materials performance; reflective surfaces; seals; selection of materials; solar energy systems; standards; NBSIR 77-1314.
- Absorber loaded; expanded bandwidth; TEM cells; 18285.
- Absorber plates; cover plates; enclosure; insulation; materials performance; reflective surfaces; seals; selection of materials; solar energy systems; standards; absorber coatings; NBSIR 77-1314.
- Absorbance; antireflection coatings; chalcogenide glasses; laser damage; potassium chloride; 10.6- μ m lasers; SP509, pp. 222-228 (Dec. 1977).
- Absorbance; cleaning procedures; coating materials; deposition parameters; dielectric enhanced mirrors; reflectance; SP509, pp. 385-398 (Dec. 1977).
- Absorbance; dielectric coated mirror; infrared laser windows; laser mirrors; pulsed CO₂ laser damage; reflectance; 10.6 μ m optical components; SP509, pp. 183-194 (Dec. 1977).
- Absorption; air-cooling; computer; hot-water; measurement; residential; solar; testing; 18287.
- Absorption; calorimeter; laser; scattering; SP509, pp. 281-285 (Dec. 1977).
- Absorption; cavitation; choking flow; desorption; phase equilibrium; two phase flow; 17971.
- Absorption; dielectric coatings; thin films; zinc selenide; SP509, pp. 276-280 (Dec. 1977).
- Absorption of x-rays; polarization; rotation of polarization; silicon single crystal; x-ray optical activity; x-ray scattering; 17950.
- Absorption spectra; automation; chemical analysis; colorimetry; heat transfer; reflectance; remote sensing; retroreflectance; spectrophotometry; transmittance; NBSIR 75-940.
- Absorption temperature dependence; infrared absorption; intrinsic multiphonon absorption; magnesium fluoride; potassium magnesium fluoride; SP509, pp. 56-61 (Dec. 1977).
- Abstract data types; access control; operating systems; programming languages; protection; reliable software; 18071.
- Abstract data types; hidden functions; program specification; restricted specification; semantic specification; syntactic specification; type; type restriction; 17682.
- Abstracts; annotated compilation; electrical usage; government contractor's report; information sources; nonindustrial; NBS-GCR-78-130.
- Abstracts; Center for Building Technology; key words; publications; SP457-2.
- Abstracts, NBS publications; key words; publications; SP305. Supplement 9.
- Ac Josephson effect; Josephson junction; low temperature; superconductivity; voltage calibration; voltage standard; SP508, pp. 243-245 (Apr. 1978).
- Ac Josephson effect; Josephson junctions; noise thermometry; absolute thermometry below 10 K; 18055.
- Ac Stark shift; adiabatic approximation; dissociation; harmonic generation; ionization; laser bandwidth; multiphoton absorption; multiphoton dynamics; nonresonant processes; n-photon Bloch equations; pole approximation; 3-photon Bloch equations; 17750.
- Ac voltage calibrator; infrasonic voltage measurements; rms measurements; rms voltmeter; vibration measurements; ac/dc difference; 18216.
- Accelerated aging; alkali solubility; fiber degradation; paper degradation; paper permanence; wet strength; NBSIR 78-1443.
- Accelerated aging; complex reactions; decomposition; degradation; heating rates; initial rates; kinetics; life-time prediction; oxidation; polymers; polyurethanes; pyrolysis; stability; thermal analysis; thermogravimetry; 17897.

- Accelerated aging tests; building components and materials; degradation; methodology; predictive service life tests; service life; 17592.
- Accelerated laboratory testing; performance criteria; stone decay; stone preservatives; 17852.
- Accelerated stone decay; performance criteria; stone preservatives; 17944.
- Accelerated wear testing; contaminant tolerance; contaminant wear; hydraulic pump wear; service life; abrasive wear; *SP514*, pp. 66-75 (May 1978).
- Acceleration; humidity; LC oscillators; linear motion; nuclear magnetic resonance; pressure; temperature; transducer; tunnel diode oscillators; 17777.
- Acceleration insensitive oscillator; ammonia microwave absorption; atomic clock; digital demodulator; frequency-lock servo; frequency standard; precision oscillator; 17992.
- Accelerator; adhesion; amines; anionic catalyst; chelation; composite resins; cyanoacrylates; epoxy resin; *N*-methyl-*p*-toluidine; *N*-phenylglycine; pit and fissure sealants; polymerization; 17394.
- Accelerogram; artificial earthquake; covariance; filter; finite Fourier expansion; prediction error; random variables; synthesis; wave; *SP523*, pp. IV-28—IV-47 (Sept. 1978).
- Accelerograms; digitization; high frequencies; low frequencies; *SP523*, pp. IV-20—IV-27 (Sept. 1978).
- Accelerograph; codes; design criteria; disaster; earthquake hazards; earthquakes; ground failures; seismicity; solids; standards; structural engineering; structural responses; wind loads; winds; *SP523*.
- Accelerometer; axial force; bar stress transducer; bending moment; displacement meter; dynamic behavior of tunnel; power spectrum; strain meter; submerged tunnel; *SP523*, pp. V-69—V-79 (Sept. 1978).
- Acceptable level of human risk; construction costs; earthquake resistant code; expected seismic force; object postulate; reliability theory; social utility; *SP523*, pp. V-102—V-116 (Sept. 1978).
- Acceptable limits of uncertainty; beta particles; criteria; Health Physics Society Standards Committee; neutrons, performance; personnel dosimetry; photons; standard; 18190.
- Access authorization; access control; authentication; computer network security; cryptography; end-to-end encryption; inter-computer network; internetting; NBS Data Encryption Standard; Network Cryptographic Devices; Network Security Center; *SP500-21*, Vol. 2.
- Access control; authentication; communication; computer networks; cryptography; encryption; security; *SP500-21*, Vol. 1.
- Access control; authentication; computer network security; cryptography; end-to-end encryption; inter-computer network; internetting; NBS Data Encryption Standard; Network Cryptographic Devices; Network Security Center; access authorization; *SP500-21*, Vol. 2.
- Access control; operating systems; programming languages; protection; reliable software; abstract data types; 18071.
- Access procedures; computer networks; network access assistance; network resource acquisition; network service selection; protocols; 17601.
- Accident analyses; fire hazards assessment; flammability tests; hazard analysis; human behavior; plastic fires; plastics; product safety; residential fires; *NBSIR 78-1422*.
- Accident investigation; fluting pattern; forensic science; headlight glass; hit-and-run accidents; sealed beam headlights; visual classifications; *SP480-17*.
- Accidents; architectural psychology; consumer products; environmental factors; home safety; occupant behavior; survey technique; *BSS108*.
- Accountability; analyses; plutonium; remote; safeguards; uranium; *SP528*, p. 19 (Nov. 1978).
- Accountability; analysis; gamma-ray; neutron; nuclear safeguards; special nuclear materials; x ray; *SP528*.
- Accountability bulk measurements; nuclear material control; Nuclear Regulatory Commission; reference mass standards; uranium hexafluoride; 17761.
- Accounting/computer charges; CPU time; elapsed time; metering; system performance; tuning programs; variations in CPU charges; varying workloads; *SP500-41*, pp. 243-253 (Oct. 1978).
- Accredited organization method; American National Standards Committee method; American National Standards Institute; ANSI; canvass method; standardization; *NBSIR 78-1446*, pp. 35-37 (Apr. 1978).
- Accretion; circumstellar shells; star formation; 18307.
- Accretive; eigenvalues; positive definite; set product; 17846.
- Accuracy; analytical chemistry; calibration; precision; sensitivity; statistics; 18140.
- Accuracy; beam tube; cavity phase error; Doppler shift; envelope defection; frequency standards; 17938.
- Accuracy; bias detection; chemical analysis; chemical measurement process; data reporting; detection limits; exploratory techniques; patterns; performance characteristics; precision; random error; standards; systematic error; testing of assumptions; validation; 18152.
- Accuracy; blank; Cerenkov counting; figure of merit; liquid scintillation counting; Poisson errors; precision; quenching; random error; reduced activity; systematic error; ^3H ; ^{32}P ; 17510.
- Accuracy; calcium; chromium; measurement compatibility; mercury; nitrogen dioxide; precision; reference materials; reference methods; 17928.
- Accuracy; calibration; evaluation; lead; paint; poisoning; portable; precision; radiation; references; substrates; x-ray fluorescent; *NBSIR 78-1466*.
- Accuracy; calibration; evaluation; lead; paint; poisoning; portable; precision; radiation; references; substrates; x-ray fluorescent; 17996.
- Accuracy; chromatography; fluorescence detection; mass spectrometry; trace organic analysis; 17641.
- Accuracy; confidence intervals; control chart; diagnostic tests; experimental error; linear regression; precision; tolerance intervals; 17591.
- Accuracy; dimensional measurement; electron microscope; integrated circuit; linespacing; linewidth; metrology; microelectronics; optical microscope; photomask; precision; principles of measurement; 17415.
- Accuracy; food grain; instrumental; radiochemical; standard reference materials; toxic elements; 18315.
- Accuracy; measurement systems; standard reference materials; 18263.
- Accuracy; nuclear quadrupole resonance; precision; thermometry; 50 K-473 K; 17776.
- Accuracy and precision; efficiency of detectors; gamma-ray detectors; Ge(Li) detectors; geometry of counting; semiconductor detectors; 17737.
- Acetone; acetyl ion; heat of formation; ketene; proton affinity; proton transfer; 17696.
- Acetonitrile dimers; far infrared spectrum; intermolecular interactions; matrix isolations; methyl formate; torsion vibrations; 17563.
- Acetyl ion; heat of formation; ketene; proton affinity; proton transfer; acetone; 17696.

Appliances, household; household appliance cost considerations; household appliances; life-cycle costing; purchase of household appliances; service lives of household appliances; appliances; 17631.

Application; chemistry; industry; malononitrile; mechanism; methods; organic; review; synthetic; 17863.

Application; computer; displays; graphics; independence; interactive; language; portability; software; standards; terminal; *SP503*, pp. 107-116 (Mar. 1978).

Application; cost; database management; GDMS; life cycle; methodology; 18037.

Application guidelines; elastomeric; materials; membranes; performance factors; review; roofing; *TN972*.

Application-level protocol; bibliographic services network; book vendors network; computer communications; computer network protocol; computer-to-computer protocol; control header structure; control messages; highest level protocol; interlibrary computer communications; 18226.

Applications; computer aided manufacturing; industrial robots; numerically controlled machine tools; sensors; 18061.

Applications; exchange integral; pressure dependence; theory; 18278.

Applications of surface-characterization measurements; atomic motions on surfaces; status of surface-characterization methods; surface analysis; surface atomic structure; surface characterization; surface composition; surface electronic structure; surface properties; 17579.

Applied analysis; electron probe microanalysis; energy-dispersive analysis; lithium-drifted silicon detector; scanning electron microscope; x-ray spectrometry; 17545.

Applied superconductivity; cryogenic engineering; cryogenic materials research; cryogenic systems; LNG, storage and transportation; low-temperature materials research; 17416.

Approximation; curve-fitting; least-squares; L_p problems; minimization; norm; residuals; statistic; *J. Res.* **83**, No. 1, 71-74 (1978).

Aqueous; critical evaluation; electrolytes; equilibrium constants; free energy; Gibbs energy; ionic; solutions; thermodynamic properties; activities; alkaline earth salts; 17772.

Aqueous electrolytes, thermochemistry of; biothermodynamics; data compilations for biological thermodynamics; electrolyte thermodynamics; thermochemistry of biochemicals; 17478.

Aqueous solubility of polynuclear aromatic hydrocarbons; coupled columns liquid chromatography; heat of solution; polynuclear aromatic hydrocarbons; salting out effect; 17746.

Aqueous solution; chemical kinetics; complex ions; electron transfer; metal ions; radiation chemistry; rates; transients; *NSRDS-NBS62*.

Architectural acoustics; building acoustics; environmental noise; noise; noise control; sound; transportation system noise; acoustics; *BSS84*.

Architectural analysis; architectural evaluation; architectural process; architectural research; building evaluation; building research; man and environment relations; people and buildings; post-construction evaluation; *NBSIR 77-1402*.

Architectural design; design considerations; dimensional relationships; environmental design; safety; stairs; user needs; *NBSIR 78-1554*.

Architectural evaluation; architectural process; architectural research; building evaluation; building research; man and environment relations; people and buildings; post-construction evaluation; architectural analysis; architectural research; building evaluation; building research; man and environment relations; people and buildings; post-construction evaluation; architectural analysis; architectural evaluation; *NBSIR 77-1402*.

Architectural psychology; architectural research; building fires; computer-aided design; fire computer program; fire research; fire safety; human performance; model documentation; modeling technique; programming; simulation; *NBSIR 78-1514*.

Architectural psychology; consumer products; environmental factors; home safety; occupant behavior; survey technique; accidents; *BSS108*.

Architectural psychology; environmental psychology; fire escape; fire safety; human research; research design; *NBSIR 78-1508*.

Architectural research; building evaluation; building research; man and environment relations; people and buildings; post-construction evaluation; architectural analysis; architectural evaluation; architectural process; *NBSIR 77-1402*.

Architectural research; building fires; computer-aided design; fire computer program; fire research; fire safety; human performance; model documentation; modeling technique; programming; simulation; architectural psychology; *NBSIR 78-1514*.

Architecture; building regulatory system; codes; health and safety; historic buildings; historic preservation; impacts; performance-based standards; research; *SP524*.

Architecture; buildings; color; design; hospitals; light; *SP516*.

Archival storage; electron beam recording; kinescope recording; laser scanning; magnetic tape; midfield splice; motion picture film; rapid pulldown; video tape; *SP480-31*.

Argon; benzene; excited electronic state; rotational relaxation; 18158.

Argon; cross sections; ionization; triple-differential cross sections; 17903.

Argon; hydrogen; metastable nitrogen; radiation; rate coefficient; ultraviolet; 18198.

Argon metastables; CCl_2 ; $(\text{CCl}_2)\text{HF}$ anion; electron capture; HCClF anion; HCCl_2F ; hydrogen bonding; infrared spectrum; matrix isolation; ultraviolet spectrum; vacuum ultraviolet photolysis; 17727.

Argus; coated optics; damage; disks; laser; uncoated optics; *SP509*, pp. 440-454 (Dec. 1977).

Aromatic cations; charge transfer; equilibrium constants; ion cyclotron resonance spectrometry; ionization potentials; ion-molecule reactions; 17673.

Aromatic compounds; charge transfer equilibria; entropy; ion cyclotron resonance; ionization potentials; 17734.

Aromatic hydrocarbons (PAH's); fluorescence emission spectroscopy; gas chromatography; high-performance liquid chromatography (HPLC); standard reference materials; 17931.

Aromaticity; coal; cross polarization; NMR; solid; ^{13}C ; 17677.

Aromaticity; coal; NMR; ^{13}C ; 17778.

Arousal; auditory arousal thresholds; emergency signals; fire alarms; sleep research; alarms; *NBSIR 78-1484 (HEW)*.

ARPA computer network; computer network; network security; security, network; switched communications; *SP500-27*, pp. 74-79 (Feb. 1978).

Arrays; power gain; radiation pattern; antennas; 18103.

Arsenic; cadmium; detection limits; lead; mercury; vanadium; x-ray fluorescence spectrometry; *NBSIR 77-1211*.

Arsenic compounds; electronic properties; niobium compounds; silicon compounds; superconductivity; Ti_3P -type compounds; 17541.

Arsenic triselenide; arsenic trisulfide; Auger; damage; defects; electron microscopy; ESCA; optical coatings; thin films; *SP509*, pp. 342-351 (Dec. 1977).

Arsenic trisulfide; Auger; damage; defects; electron microscopy; ESCA; optical coatings; thin films; arsenic triselenide; *SP509*, pp. 342-351 (Dec. 1977).

Arsenic trisulfide; optical constants; visible spectrum; wedged film; *SP509*, pp. 352-357 (Dec. 1977).

Artificial earthquake; covariance; filter; finite Fourier expansion; prediction error; random variables; synthesis; wave; accelerometer; *SP523*, pp. 1V-28—1V-47 (Sept. 1978).

- Artificial fireplace ash; consumer exposure; Consumer Product Safety Act (CPSA); Consumer Product Safety Commission (CPSC); emberizing material; free-form asbestos; patching compounds; risk assessment; *SP506*, pp. 451-459 (Nov. 1978).
- Artificial illumination; buildings; criteria; energy conservation; energy consumption; environmental design; lighting levels; standards; *SP518*, pp. 77-94 (Aug. 1978).
- Artificial intelligence; image analysis; morphological analysis; paper fibers; pattern recognition; pulp characterization; algorithms; *NBSIR 78-1442*.

- Atmospheric chemistry; chemical kinetics; data evaluation; gas phase; photoabsorption cross section; photochemistry; quantum yield; rate constant; air pollution; *SP513*.
- Atmospheric contaminants; calcium fluoride coatings; laser window; oxygen contaminants; x-ray photoelectron spectroscopy (XPS); zinc selenide; adsorption; *SP509*, pp. 105-110 (Dec. 1978).
- Atmospheric monitoring; calibration; ozone; ultraviolet photometry; air pollution; *SP529*.
- Atmospheric monitoring; calibration, ozone; UV photometry; air pollution; 17656.
- Atmospheric pollutants; counting statistics; detection limits; energy vs. wavelength dispersion; imprecision; merit; quantitation limits; reporting of data; systematic error; x-ray fluorescence analysis; 17507.
- Atmospheric pollution; chemistry of the atmosphere; chlorine nitrate; electric dipole moment; fluorocarbon destruction of stratospheric ozone; microwave spectrum; structure; 17621.
- Atmospheric pollution; microprobe analysis; molecular composition; Raman spectroscopy; vibrational spectrum; airborne particles; 17668.
- Atom flux; cadmium; chemical interdiffusion; experiments; interdiffusion coefficients; intrinsic diffusion coefficients; Kirkendall shift; Matano analysis; silver; single crystals; vacancy wind; alloys; 18081.
- Atom fragments; ozone, photofragment spectroscopy; photofragment spectroscopy of ozone; spectroscopy of ozone, photofragment; 18310.
- Atomic; discrete; forbidden; intensity; lifetime; line strength; oscillator strength; transition probability; allowed; *SP505*.
- Atomic; instrumental broadening; line shapes; line shifts; pressure broadening; resonance broadening; Stark broadening; van der Waals broadening; *SP366. Supplement 3*.
- Atomic and molecular beam spectroscopy; atomic frequency standard; cavity phase shift; Ramsey cavity; two-frequency interrogation; 18160.
- Atomic aspects of fracture; brittle fracture; crack growth; ductile fracture; ductile to brittle fracture; fracture; 18012.
- Atomic clock; cesium beam frequency standard; Millman effect; molecular and atomic beam magnetic resonance; 17380.

Atomic clock; digital demodulator; frequency-lock servo; frequency standard; precision oscillator; acceleration insensitive oscillator; ammonia microwave absorption; 17992.

Atomic data; data center; National Standard Reference Data System; numerical data; rearrangement of data; thermonuclear fusion; 17781.

Atomic electron binding energies; binding energies; core electron binding energies; heavy elements; transuranic elements; *JPCRD* 7, No. 4, 1267-1284 (1978).

Atomic emission; barium; beryllium; copper; graphite furnace; manganese; molybdenum; nickel; aluminum; 17895.

Atomic energy levels; atomic spectra; vanadium; *JPCRD* 7, No. 3, 1191-1262 (1978).

Atomic energy levels; atomic spectroscopy; electron configurations; ionization potentials; lanthanides; rare earths; spectra; Zeeman effect; *NSRDS-NBS60*.

Atomic energy levels; elements, rare earth; rare earth elements; 17639.

Atomic frequency standard; cavity phase shift; Ramsey cavity; two-frequency interrogation; atomic and molecular beam spectroscopy; 18160.

Atomic lifetimes; atomic transition probabilities; beam foil experiment; cascade analysis; copper isoelectronic sequence; radiative decay simulation; 17973.

Atomic line shapes; collision induced radiation; radiation; 17386.

Atomic motions on surfaces; status of surface-characterization methods; surface analysis; surface atomic structure; surface characterization; surface composition; surface electronic structure; surface properties; surface standards; 17579.

Atomic parity mixing; charged currents; fermi theory; neutral currents; neutrino scattering; weak interaction; 17997.

Atomic properties; economics; electrical quantities; ionizing radiation; mechanical quantities; national measurement system; optical quantities; surface properties; thermal quantities; time and frequency; acoustics; *NBSIR 75-947 (Revised December 1977)*.

Atomic screening corrections; Coulomb corrections; pair production; photonuclear data; total photon absorption cross section; triplet production; *NBSIR 78-1456*.

Atomic spectra; infrared spectra; optical spectra; *JPCRD* 7, No. 1, 1-262 (1978).

Atomic spectra; vanadium; atomic energy levels; *JPCRD* 7, No. 3, 1191-1262 (1978).

Atomic spectroscopy; Doppler narrowing; Doppler shifts; frequency standards; high-resolution spectroscopy; ion storage; laser spectroscopy; Penning trap; radiation pressure; 18148.

Atomic spectroscopy; double stars; dynamical parallax; Hertzsprung-Russell Diagram; historical review; H. N. Russell; masses of stars; moon's position; solar composition; solar spectra; 17689.

Atomic spectroscopy; electron configurations; ionization potentials; lanthanides; rare earths; spectra; Zeeman effect; atomic energy levels; *NSRDS-NBS60*.

Atomic time; Loran C; portable clocks; time comparison; universal coordinated time; 18181.

Atomic time algorithm; clock behavior modeling; clock behavior simulation; clock error detection; clock noise characterization; frequency control voltage correlation; frequency deviation; optimum time prediction; 18058.

Atomic transition probabilities; beam foil experiment; cascade analysis; copper isoelectronic sequence; radiative decay simulation; atomic lifetimes; 17973.

Atomic weights; calcium; fractionation; isotopes; multiple filament; potassium; strontium; thermal ionization; absolute isotope ratios; atomic/molecular vaporization; 17940.

Atomic-spectroscopy; autoionization; laser-excited; laser-ionization; lithium; photoabsorption; 17747.

Atomic/molecular vaporization; atomic weights; calcium; fractionation; isotopes; multiple filament; potassium; strontium; thermal ionization; absolute isotope ratios; 17940.

Attenuation; bandwidth; coupling; fiber optics; power; 18179.

Attic ventilation; chemical kinetics; computers; fusion reactors; gas flow; microwaves; smoke detectors; spectroscopic tool; stainless steel; standards; telescope; time and frequency; *DIM/NBS 62*, No. 4, 1-32 (1978).

Attics; Federal specifications; fire test; flame spread; loose-fill; mineral fiber; residences; smoldering; thermal insulation; *NBSIR 78-1497*.

Auditing; authorization; computer security; cryptography; device identification; distributed processing; identification; personal identification; security; surveillance; *SP500-33*.

Auditory arousal thresholds; emergency signals; fire alarms; sleep research; alarms; arousal; *NBSIR 78-1484 (HEW)*.

Auger; damage; defects; electron microscopy; ESCA; optical coatings; thin films; arsenic triselenide; arsenic trisulfide; *SP509*, pp. 342-351 (Dec. 1977).

Auger analysis; bias-sputtering; calcium fluoride; Rutherford backscattering; sputter-etching; zinc selenide; *SP509*, pp. 271-275 (Dec. 1977).

Auger electron spectroscopy; capacitance-voltage methods; dew-point sensing; dragging-stylus probe; electrical properties; electronics; four-probe method; hermeticity; hole mobility; infrared reflectance; ion implantation; ion microprobe mass analysis; *SP400-36*.

Auger electron spectroscopy; standards; surface analysis; ASTM; 17459.

Auger-electron spectra; copper; density of states; electronic band structure; gold; silver; 17977.

Auger-electron spectroscopy; Auger-electron yields; surface analysis; aluminum; 17578.

Auger-electron spectroscopy; characterization of particles; spectroscopy, Auger-electron; x-ray photoelectron spectroscopy; 18146.

Auger-electron spectroscopy; copper; density of electronic states; electronic structure; gold; silver; 18147.

Auger-electron spectroscopy; electron spectroscopy; surface analysis; x-ray photoelectron spectroscopy; analysis; 18007.

Auger-electron spectroscopy; ESCA; quantitative surface analysis; reference materials; x-ray photoelectron spectroscopy; analytical methods; 17856.

Auger-electron yields; surface analysis; aluminum; Auger-electron spectroscopy; 17578.

Authentication; communication; computer networks; cryptography; encryption; security; access control; *SP500-21, Vol. 1*.

Authentication; computer network security; cryptography; end-to-end encryption; inter-computer network; internetting; NBS Data Encryption Standard; Network Cryptographic Devices; Network Security Center; access authorization; access control; *SP500-21, Vol. 2*.

BaF₂; CdF₂; MgF₂; NaCl; SrF₂; linear thermal expansion; photo-elastic constants, CaF₂; piezo-optic constants; thermal coefficient of refractive index; thermo-optic constant; NBSIR 78-1473.
Balancing; building code official; code requirements; energy conservation; performance specifications; testing; verification; SP518, pp. 135-144 (Aug. 1978).
BALLOTS; BEST/1TM; bibliographic retrieval system; capacity planning; computer performance analysis; computer system modeling; library automation; response time; throughput; SP500-41, pp. 127-141 (Oct. 1978).
Balmer lines; mass loss; P Cygni; radiation transfer; 17826.
Band structure; cuprous oxide; exciton; optical spectra; Raman scattering; resonant Raman scattering; 18283.
Bandwidth; coupling; fiber optics; power; attenuation; 18179.
Bar stress transducer; bending moment; displacement meter; dynamic behavior of tunnel; power spectrum; strain meter; submerged tunnel; accelerometer; axial force; SP523, pp. V-69—V-79 (Sept. 1978).
Barium; beryllium; copper; graphite furnace; manganese; molybdenum; nickel; aluminum; atomic emission; 17895.
Barium; cerium; cesium; lanthanum; praseodymium; samarium; spectra; 17389.
Barium fluoride; ion exchange purification; potassium bromide; reactive gas purification; selective ion filters; strontium fluoride; SP509, pp. 37-55 (Dec. 1977).
Barnes integral; Bessel functions; Legendre functions; Meijer G-function; Airy functions; asymptotic approximation; 17712.
Barrier analysis; fire severity; fire spread; fuel load; models; probabilistic analysis; room fires; systems analysis; ventilation; NBS-GCR-78-119.
Barrier layer; damage thresholds; glass substrate; optical coating design; optical coating materials; substrate smoothness; antireflection coatings; SP509, pp. 255-259 (Dec. 1977).
Barrier shape; fission; nuclear reactions; photofission bremsstrahlung; threshold; track counting; 17698.
Barriers; imperfections; policy; resource allocation; technology; venture capital; 17377.

BART; fire accidents; fire hazards; fire safety; fire scenarios; mass transportation; material fire performance; rail vehicles; subway car design; UMTA; NBSIR 78-1421.
Base; decibel; derived; dimension; logarithm; neper; radian; SI; supplementary; units; 17401.
Base; environmental conditions; freshwater systems; hydrolysis; organic compounds; rate constants; acid; JPCRD 7, No. 2, 383-416 (1978).
Base, detector measurement; coupling, detector; measurement base, detector; 17637.
Base metal; composites; dental alloy; dental materials; polymerization; resins; restorative materials; wear; adhesive; NBSIR 77-1397.
Base station antenna; fixed antenna; law enforcement; performance standard; antenna; 17392.
Baseline estimation; counting statistics; gamma-ray spectrometry; Lagrange multiplier; numerical analysis; spectrum analysis; x-ray fluorescence spectrometry; 17509.
Base-rock; bridge foundations; deconvolution procedure; earthquake records; ground conditions; ground transfer functions; shear wave; analytical method; SP523, pp. IV-158—IV-179 (Sept. 1978).
Basic copolymer; copolymer, solvent; phase equilibria; ternary systems; acidic copolymer; 17364.
Basic principles; computer calculations; computer modeling; experimental methods; smoke control methods; smoke movement; smoke simulation; state-of-the-art review; 17949.
Basic research; building technology; computer technology; energy conservation and research; fire research; radiation safety; standard reference data; standard reference materials; standards development; technology transfer; weights and measures; SP498.
Batch manufacturing; control systems; industrial robots; numerically controlled machine tools; productivity; sensors; 17953.
Battelle Columbus Labs; corrosion; cost of corrosion; economic effects; I/O Model; metallic corrosion; SP511-1.
Bayes; correct selection; expected size; incomplete integral; parameters; subset; SP503, pp. 297-301 (Mar. 1978).
Bayesian methods; interface; robust estimation; statistical analysis; statistics and numerical analysis; SP503, pp. 199-203 (Mar. 1978).
Bead and spring; polymer dynamics; polymer on surface; surface dynamics; 17516.
Bead-spring model; BKZ fluid; Capelli's identity; continuum physics; isotropic tensor; matrix method; nonlinear viscoelasticity; piezoelectricity; polymer physics; Schur's lemma; symmetric matrix; 17445.
Bead-spring model; block copolymers; dilute polymer solutions; limiting viscosity number; Mandelkern-Flory-Scherage equation; molecular weight determination; sedimentation coefficient; translational diffusion coefficient; Zimm theory; 17929.
Beam divergence; beam profile; lasers; optical propagation; TN1001.
Beam foil experiment; cascade analysis; copper isoelectronic sequence; radiative decay simulation; atomic lifetimes; atomic transition probabilities; 17973.
Beam profile; lasers; optical propagation; beam divergence; TN1001.
Beam profile measurement; insulator surfaces; ion and electron beam interaction; ion beams; surface conductivity; surfaces; 17793.
Beam tube; cavity phase error; Doppler shift; envelope deflection; frequency standards; accuracy; 17938.
Behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; states-transition; system's approach; "and" gate; NBSIR 77-1273.

- Behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; state's-transition; system; systems approach; "and" gate; 17967.

- Building economics; economic analysis; energy conservation; engineering economics; housing; insulation; life-cycle cost analysis; *17574*.
- Building economics; economic efficiency; economics; energy; energy conservation; life-cycle cost; optimization; performance standards; resource impact factors; resources; social optimum; standards; *BSS114*.
- Building energy conservation; climatic effects on building energy consumption; computer modeling of building energy consumption; energy conservation; geographical variation of building consumption; residential energy consumption; *BSS116*.
- Building energy conservation; energy management; evaluation and monitoring; survey of buildings; Air Force facilities; *NBSIR 77-1238*.
- Building envelope; building regulations; data collection; energy budget; energy conservation; heat loss; thermal performance; ASHRAE standards; *SP518*, pp. 219-250 (Aug. 1978).
- Building envelope; energy conservation; fenestration; passive solar; windows; *18020*.
- Building evaluation; building research; man and environment relations; people and buildings; post-construction evaluation; architectural analysis; architectural evaluation; architectural process; architectural research; *NBSIR 77-1402*.
- Building fire; combustible contents; fire endurance; fire load; fire protection; fire severity; fire test; *17808*.
- Building fires; carpets; compartment fires; fire detection systems; fire suppression; fire tests; flame research; flammability tests; smoke; smoke detectors; standards; toxicity; bibliographies; *NBSIR 78-1504*.
- Building fires; case histories; critical incidents; decision making; escape; fire behavior; human factors; mapping; methodology; performance (human); reaction (psychology); stress (psychology); *NBS-GCR-77-106*.
- Building fires; ceilings; computer programs; concrete slabs; construction materials; convection; heat transfer; radiation; slabs (members); steel beams; structural members; ASTM E-119; *NBS-GCR-77-100*.
- Building fires; combustion products; optical density; particle size; polypropylene; polyvinyl chloride; smoke; *NBS-GCR-77-116*.
- Building fires; computer programs; concretes; creep; fire models; slabs (members); steels; stresses; structural materials; thermal analysis; *NBS-GCR-78-114*.
- Building fires; computer programs; concretes; creeps; failure analysis; fire models; steels; structural failure; structural materials; thermal degradation; *NBS-GCR-78-115*.
- Building fires; computer-aided design; fire computer program; fire research; fire safety; human performance; model documentation; modeling technique; programming; simulation; architectural psychology; architectural research; *NBSIR 78-1514*.
- Building heating system; computer simulation; DEPAF; energy conservation; furnaces; operating cost; seasonal performance; *18088*.
- Building height limitation; building volume limitation; earthquake resistant design; flexural-shear model; high-rise buildings; histogram for building uses; shear model; *SP523*, pp. VI-15—VI-24 (Sept. 1978).
- Building materials; cost; economics; housing; lead-based paint; lead poisoning; abatement; *17500*.
- Building official; building regulations; code enforcement; construction; court decisions; disasters; economics; legal approach; regulatory process; violations; *SP518*, pp. 381-390 (Aug. 1978).
- Building performance simulation; building regulations; computer applications; energy conservation; thermal comfort; thermal performance of buildings; *SP518*, pp. 95-134 (Aug. 1978).
- Building practices; building research; codes and standards; housing; international cooperation; technology transfer; *NBSIR 77-1411*.

- Building regulation; construction; enforcement; inspection; legislation; manufactured building; rules and regulations; standards; *NBSIR 78-1503*.
- Building regulations; building regulatory systems; model building codes; standards; building codes; *NBSIR 78-1490*.
- Building regulations; building safety; economic analysis; economics of safety; electric shock; ground fault circuit interrupters; benefit-cost analysis; benefit-risk analysis; building codes and standards; *NBSIR 78-1528*.
- Building regulations; buildings; economic impacts; environmental considerations; innovative practices; regulatory research; standards development; administrative procedures; building codes; *SP518*.
- Building regulations; code enforcement; construction; court decisions; disasters; economics; legal approach; regulatory process; violations; building official; *SP518*, pp. 381-390 (Aug. 1978).
- Building regulations; computer applications; energy conservation; thermal comfort; thermal performance of buildings; building performance simulation; *SP518*, pp. 95-134 (Aug. 1978).
- Building regulations; data collection; demonstration program; dissemination; information needs; residential construction; solar energy; space heating; technology; *SP518*, pp. 1-8 (Aug. 1978).
- Building regulations; data collection; energy budget; energy conservation; heat loss; thermal performance; ASHRAE standards; building envelope; *SP518*, pp. 219-250 (Aug. 1978).
- Building regulations; enforcement; energy conservation; legislation; standards development; survey findings; training; *SP518*, pp. 297-312 (Aug. 1978).
- Building regulations; innovation; international standards; metrification; performance standards; research; technological trends; *SP518*, pp. 177-190 (Aug. 1978).
- Building regulatory system; codes; health and safety; historic buildings; historic preservation; impacts; performance-based standards; research; architecture; *SP524*.
- Building regulatory system; decision processes; hazards-related phenomena; innovations; research findings; scientific methods; socio-political system; technical expertise; building design; *SP518*, pp. 25-47 (Aug. 1978).
- Building regulatory systems; model building codes; standards; building codes; building regulations; *NBSIR 78-1490*.
- Building research; code enforcement; construction; existing buildings; rehabilitation; renovation; building codes; *NBS-GCR-78-139*.
- Building research; codes and standards; housing; international cooperation; technology transfer; building practices; *NBSIR 77-1411*.
- Building research; man and environment relations; people and buildings; post-construction evaluation; architectural analysis; architectural evaluation; architectural process; architectural research; building evaluation; *NBSIR 77-1402*.
- Building safety; economic analysis; economics of safety; electric shock; ground fault circuit interrupters; benefit-cost analysis; benefit-risk analysis; building codes and standards; building regulations; *NBSIR 78-1528*.
- Building service systems; codes; earthquake; hospitals; standards; aseismic design; *TN970*.
- Building standards; energy conservation; life-cycle building costs; performance standards; benefit-cost analysis; building economics; *NBSIR 78-1471*.
- Building standards; energy conservation; performance standards; alternatives; ASHRAE 90-75; *SP518*, pp. 191-204 (Aug. 1978).
- Building technology; computer technology; energy conservation and research; fire research; radiation safety; standard reference data; standard reference materials; standards development; technology transfer; weights and measures; basic research; *SP498*.
- Building ventilation rates; sulfur hexafluoride tracer; air infiltration instrumentation; air infiltration measurement; *17407*.
- Building volume limitation; earthquake resistant design; flexural-shear model; high-rise buildings; histogram for building uses; shear model; building height limitation; *SP523*, pp. VI-15—VI-24 (Sept. 1978).
- Buildings; color; design; hospitals; light; architecture; *SP516*.
- Buildings; construction methods; fire prevention; fire protection; fire safety; life safety; standards; building codes; building design; *NBS-GCR-78-118*.
- Buildings; cooling; heating; hot water; performance criteria; solar energy; standards; *NBSIR 78-1562*.
- Buildings; cooling; heating; performance criteria; solar collectors; solar energy; standards; *17552*.
- Buildings; counties; energy conservation; enforcement; insulation; regulations; standards; State legislation; thermal efficiency; *SP518*, pp. 323-358 (Aug. 1978).
- Buildings; criteria; energy conservation; energy consumption; environmental design; lighting levels; standards; artificial illumination; *SP518*, pp. 77-94 (Aug. 1978).
- Buildings; deflections; dynamic response; gust factors; structural engineering; wind loads; building codes; *17365*.
- Buildings; design; test methods; walls and windows; *17947*.
- Buildings; design criteria; developing countries; technology transfer; windloads; *SP523*, pp. VIII-42—VIII-46 (Sept. 1978).
- Buildings; economic impacts; environmental considerations; innovative practices; regulatory research; standards development; administrative procedures; building codes; building regulations; *SP518*.
- Buildings; education level; energy conservation; evaluations; upgrading, certification; building code official; *SP518*, pp. 9-15 (Aug. 1978).
- Buildings; fire loads; load surveys; *17506*.
- Buildings; solar energy; standards; *NBSIR 78-1143A*.
- Buildings costs; economic evaluation; energy conservation; exterior walls; life-cycle costing; windows; *17942*.
- Buildings (codes); concrete (reinforced); design (criteria); loads; probability theory; reliability; statistical analysis; structural engineering; *BSS110*.
- Buildings (codes); dynamic response; gust loads; structural engineering; tall buildings; wind forces; wind pressure; *17767*.
- Built environment; education and training; energy conservation; enforcement; legislation; promulgation; regulation; standards; *SP518*, pp. 17-24 (Aug. 1978).
- Built-up roofing; coal-tar pitch; roofing; sag; slip; asphalt; bitumen; *17857*.
- Built-up roofs; moisture; moisture dissipation; nondestructive detection of moisture; performance criteria; roofing moisture; bituminous roof membranes; *TN965*.
- Bulk loss coefficient; CaF_2 ; Ce^{3+} ; LiYF_4 ; photoluminescence; prism technique; reflectance; transmission; *SP509*, pp. 132-136 (Dec. 1977).
- Bulk modulus; composite; compressibility; copper; cryogenic temperatures; elastic constants; niobium-titanium; Poisson's ratio; shear modulus; Young's modulus; *17919*.
- Bulk modulus; compressibility; iron alloy; maraging steel; nickel alloy; Poisson ratio; shear modulus; sound velocity; Young's modulus; *17428*.
- Bulk samples; dispersion staining; membrane filter; optical microscope; phase contrast; airborne fiber; asbestos; *SP506*, pp. 431-439 (Nov. 1978).
- Bulk viscosity coefficient; kinetic theory; modified Enskog theory; numerical integration; *18202*.
- Buoyancy flows; compartment fires; corridor; experiment; flow coefficients; room; scale-model; theory; *NBSIR 78-1512*.
- Buoyancy of air; density; mass comparisons in vacuo; precise weighing; vacuum; vacuum weighing; *J. Res. 83*, No. 5, 407-413 (1978).

Buoyant flow; fire research; gravity-driven flows; model equations; nonadiabatic flow; *J. Res.* **83**, No. 3, 297-308 (1978).

Buoyant plumes; ceilings; compartment fires; fire plumes; heat transfer; room fires; scale models; *NBS-GCR-77-98*.

Buoyant plumes; convection; fire tests; flammability; furnishings; heat transfer; radiation; *TN981*.

Bureau of Product Safety; children; experimental studies; injury potential; lacerations; mechanical force; mechanical properties; NBS; punctures; sampling; sharp edges; simulation; skin; TIPS Thesaurus; adults; *NBSIR 73-123*.

Burgers vector; compatibility; continuum mechanics; defect; disclination; dislocation; distortion; dynamics; elasticity; Green's tensor; incompatibility; loop; plasticity; strain; Volterra; 17435.

Burglar alarm; detector; intrusion alarm; metallic window foil; test method; window foil; alarm; *SP480-34*.

Burglary; catalogs; crimes of opportunity; intrusion detectors; physical security; robbery; security equipment; target hardening equipment; theft; alarms; *SP480-35*.

Buried cables; copper concentric neutral wires (CCN); corrosion detection methods; current-potential measurements; underground corrosion; *NBSIR 78-1486 (DOE)*.

Burnett method; low pressures; PVT; ultra-pure air; 298.15 K; *J. Res.* **83**, No. 5, 415-418 (1978).

Burnup calculations; isotope correlation ratios; reactor history deduction; reactor history verification; safeguards; *SP528*, pp. 170-200 (Nov. 1978).

Butane; decomposition; ethyl; heats of formation; hexamethylethane; isopropyl; pre-exponential factor; radical buffer; radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; 18110.

Butane; electron; energy-loss spectra; ethane; ethylene; isobutane; isobutylene; propane; propylene; 1-butene; 1,3-butadiene; acetylene; 17620.

B213 NW; cloud dynamics; contour maps; formaldehyde; interstellar gas; radio astronomy; 17700.

C

Ca II emission; stars, chromospheres; stars, emission line; stars, late-type; 17585.

Ca II emission, stars; chromospheres, stars; emission-line, stars; late-type, ultraviolet; spectra; 17812.

Cable assembly; coaxial cable; insertion loss; mobile antenna; mobile transceiver; transmission; 18204.

Cables; development of submarine equipment; earthquake prediction; ocean-bottom seismograph; *SP523*, pp. III-30—III-43 (Sept. 1978).

Cadmium; chemical interdiffusion; experiments; interdiffusion coefficients; intrinsic diffusion coefficients; Kirkendall shift; Matano analysis; silver; single crystals; vacancy wind; alloys; atom flux; 18081.

Cadmium; computer techniques for environmental data; environmental data; environmental surveys; mercury; toxic materials; *NBSIR 78-1428*.

Cadmium; decay rates; excimer; spectra; 18017.

Cadmium; detection limits; lead; mercury; vanadium; x-ray fluorescence spectrometry; arsenic; *NBSIR 77-1211*.

Cadmium; environmental materials, isotope dilution; lead; mass spectrometry; zinc; biological materials; 18192.

CaF₂; Ce³⁺; LiYF₄; photoluminescence; prism technique; reflectance; transmission; bulk loss coefficient; *SP509*, pp. 132-136 (Dec. 1977).

CaF₂; crystalline windows and rods; depolarization; optical distortion; photo-elastic constants; stress-induced birefringence; BaF₂; *SP509*, pp. 89-94 (Dec. 1977).

CaF₂; KBr; KCl; LiF; NaF; refractive index; SrF₂; thermal coefficient of refractive index; ZnSe; BaF₂; *SP509*, pp. 74-82 (Dec. 1977).

CaF₂ surfaces; infrared spectrum; internal reflection; optical constants; water absorption; adsorbed water; *SP509*, pp. 112-116 (Dec. 1977).

Calcite; KDP; multiphoton absorption; sapphire; silica; transparency; two-photon absorption; ultraviolet windows; alkali-halides; avalanche ionization; breakdown; *SP509*, pp. 489-495 (Dec. 1977).

Calcium; CAP survey results 1975; clinical accuracy; clinical precision; interlaboratory tests; potassium; blood urea nitrogen; 18156.

Calcium; chromium; measurement compatibility; mercury; nitrogen dioxide; precision; reference materials; reference methods; accuracy; 17928.

Calcium; fractionation; isotopes; multiple filament; potassium; strontium; thermal ionization; absolute isotope ratios; atomic/molecular vaporization; atomic weights; 17940.

Calcium atomic beam; optical frequency/wavelength standard; Rydberg constant; stabilized dye laser; 17886.

Calcium diphosphate; calcium pyrophosphate; chondrocalcinosis; pseudogout; solubility; solubility product; synovial fluid; 17492.

Calcium fluoride; dicalcium phosphate dihydrate; fluorapatite; topical fluoride; acidulated phosphate fluoride; 17501.

Calcium fluoride; equilibrium; free energy; Gibbs-Duhem equation; nonstoichiometry; point defects; solubility product; 17489.

Calcium fluoride; Rutherford backscattering; sputter-etching; zinc selenide; Auger analysis; bias-sputtering; *SP509*, pp. 271-275 (Dec. 1977).

Calcium fluoride coatings; laser window; oxygen contaminants; x-ray photoelectron spectroscopy (XPS); zinc selenide; adsorption; atmospheric contaminants; *SP509*, pp. 105-110 (Dec. 1978).

Calcium oxide; elastic moduli; pressure derivatives; pulse superposition technique; temperature derivatives; Born model; 17703.

Calcium phosphate; crystal structure; hydrogen bonding; pyrophosphate; 17355.

Calcium pyrophosphate; chondrocalcinosis; pseudogout; solubility; solubility product; synovial fluid; calcium diphosphate; 17492.

Calculating concrete fire resistance; codes; concrete fire resistance; CSTB; fire; fire codes; France; translations; *TN710-10*.

Calibration; calibrators; electric fields; electric field strength; electric power transmission; field strength; magnetic fields; 17420.

Calibration; characterization; reference materials; traceability standards; uranyl nitrate solution; *SP528*, pp. 133-148 (Nov. 1978).

Calibration; coal gasification; corrosion; EMI; heating and cooling; radio frequency; solar heating; weights and measures; *DIM/NBS 62*, No. 12, 1-32 (1978).

Calibration; comparator; deformation; gage blocks; length; metrology; *TN962*.

Calibration; current; impedance; network analyzer; power; reflection coefficient; reflectometer; scattering parameters; six-port; voltage; *TN1004*.

Calibration; deuterium; irradiance; lamp; radiance; radiometry; source; spectroscopy; standard; ultraviolet; 17606.

Calibration; dissemination; gamma-ray calibration; measurement assurance; medical dosimetry; radiation dosimetry; radiation standards; x-ray calibration; brachytherapy sources; 18199.

Calibration; electromagnetic field intensity; field strength measurement; radar; rf probe; antenna; 17813.

- Calibration; evaluation; lead; paint; poisoning; portable; precision; radiation; references; substrates; x-ray fluorescent; accuracy; *NBSIR 78-1466*.
- Calibration; evaluation; lead; paint; poisoning; portable; precision; radiation; references; substrates; x-ray fluorescent; accuracy; *17996*.
- Calibration; measurement assurance; measurement services; standards; traceability; *SP250, 1978 Edition*.
- Calibration; nondestructive evaluation; reference blocks; search units; specifications; transducers; ultrasonics; ASTM standards; *NBSIR 78-1454*.
- Calibration; ozone; ultraviolet photometry; air pollution; atmospheric monitoring; *SP529*.
- Calibration; precision; sensitivity; statistics; accuracy; analytical chemistry; *18140*.
- Calibration; response time; temperature; thermal response; thermometer; time response function; *TN959*.
- Calibration drift; chemical analyses; nickel-base alloys; nickel-chromium alloys; nickel-silicon alloys; oxidation; temperature; thermal electromotive force; thermocouple reference tables; thermocouples; thermoelements; thermometry; *Monogr. 161*.
- Calibration of instruments; diocetylphthalate aerosol; Doppler shift spectrometer; heterodyne laser light scattering; light scattering; Mie scattering; particle size; size distribution of particles; Stokes law velocity; aerosols; *17499*.
- Calibration of transducers; medical ultrasonics; modulated radiation pressure; nondestructive evaluation; radiation pressure; transducers; ultrasonic transducers; *NBSIR 78-1520*.
- Calibration of transducers; medical ultrasonics; modulated radiation pressure; nondestructive evaluation; radiation pressure; transducers; ultrasonic transducers; *17987*.
- Calibration, ozone; UV photometry; air pollution; atmospheric monitoring; *17656*.
- Calibration procedures; depth profiling; ion microprobe mass analysis; quantitation; secondary; sputtering; *18022*.
- Calibration procedures; electric field measurements; instrumentation; magnetic field measurements; measurement procedures; power transmission lines; *18072*.
- Calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; integrated circuits; linewidths; microelectronics; optical microscopes; *17669*.
- Calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; integrated circuits; linewidths; microelectronics; optical microscopes; *17851*.
- Calibration standards; efficiency; international comparisons; neutron detectors; neutron flux; *J. Res. 83, No. 6, 555-561 (1978)*.
- Calibrations; electric field measurement; low frequency; miniature electric field probe; nonuniform field; biological experiments; *17975*.
- Calibrations; instrumentation; national measurement system; pressure measurements; *17547*.
- Calibrations; measurements; nondestructive testing; radiography; reproducibility; standards; *18186*.
- Calibrations; nondestructive evaluation; radiography; reference blocks; standards; transducers; acoustic emission; *17369*.
- Calibrations; nondestructive evaluation; reference blocks; spectral response; standards; transducers; ultrasonics; acoustic emission; *18177*.
- Calibrators; electric fields; electric field strength; electric power transmission; field strength; magnetic fields; calibration; *17420*.
- Californium-252; gaging; inspection; neutron radiography; neutron source; nondestructive evaluation; *18080*.
- Calomel; crystal structure; mercurous chloride; phase transition; Raman spectroscopy; x-ray powder diffraction; *17598*.
- Calorimeter; dissemination; exposure calibration; ionization chamber; primary standard; unit; absorbed dose; absorbed-dose calibration; *17440*.
- Calorimeter; four point method; inequivalence; laser energy; laser power; NBS laser standard; *18170*.
- Calorimeter; laser; measurement; Nd-YAG; *17899*.
- Calorimeter; laser; scattering; absorption; *SP509, pp. 281-285 (Dec. 1977)*.
- Calorimeter; ultrasonic calorimeter; ultrasonic power measurements; *18175*.
- Calorimeter comparisons; cobalt-60; graphite; phantom size.; absorbed dose; *NBSIR 77-1203*.
- Calorimeters; comparison; national standards; ^{60}Co ; absorbed dose; *18233*.
- Calorimetry; cytosine; density, enthalpy of solution, entropy of solution; nucleic acid bases; thermochemistry; 4-amino-2(1H)-pyrimidinone; *J. Res. 83, No. 6, 539-546 (1978)*.
- Calorimetry; density; enthalpy of solution; nucleic acid bases; thermochemistry; thymine; 5-methyl-uracil; 5-methyl-2,4(1H, 3H)-pyrimidinedione; *J. Res. 83, No. 6, 529-537 (1978)*.
- Calorimetry; density, enthalpy of solution, entropy of formation; nucleic acid bases; thermochemistry; 6-amino purine; adenine; *J. Res. 83, No. 4, 347-370 (1978)*.
- Calorimetry; density, enthalpy of solution, entropy of solution; nucleic acid bases; thermochemistry; uracil; 2,4-dioxopyrimidine; 2,4(1H, 3H)-pyrimidinedione; *J. Res. 83, No. 6, 547-554 (1978)*.
- Calorimetry; Doppler interferometry; laser absorption uniformity; automated calorimetry; *SP509, pp. 62-73 (Dec. 1977)*.
- Cancer; epidemiology; fibers; asbestos; bowel cancer; *SP506, pp. 153-158 (Nov. 1978)*.
- Cancer; epidemiology; fibers; mesothelioma; occupational exposure; asbestos; *SP506, pp. 71-93 (Nov. 1978)*.
- Cancer; nuclear; phosphorus-31; protons; spin-lattice relaxation; *18117*.
- Canonical variate analysis; classification analysis; discriminant analysis; evaluation of statistical software; *SP503, pp. 389-394 (Mar. 1978)*.

- Chlorinated rubber traffic paint; hot thermoplastic coatings; lead chromate; organic yellow pigments; yellow traffic paint; alkyl traffic paint; 18115.
- Chlorine atoms; chlorine nitrate; chlorofluorocarbons; rate constant; resonance fluorescence; stratosphere; 17666.
- Chlorine nitrate; chlorofluorocarbons; rate constant; resonance fluorescence; stratosphere; chlorine atoms; 17666.
- Chlorine nitrate; electric dipole moment; fluorocarbon destruction of stratospheric ozone; microwave spectrum; structure; atmospheric pollution; chemistry of the atmosphere; 17621.
- Chlorite; electron microscopy; fiber; morphology; optical microscopy; talc; x-ray diffraction; amphiboles; asbestos; *SP506*, pp. 339-352 (Nov. 1978).
- Chlorocuprates; coordination compounds; donor-acceptor complex; electron spin resonance; low dimensional materials; tetrahydrotetrafulvalene; tetrathiafulvalene; charge transfer complex; 18282.
- Chlorocuprates; copper; electron spin resonance; low dimensional materials; magnetic susceptibility; tetrathiafulvalene; 17426.
- Chlorofluorocarbons; rate constant; resonance fluorescence; stratosphere; chlorine atoms; chlorine nitrate; 17666.
- Chloromethane; free radical reactions; lasers; photochemistry; quantum yields; carbenes; 17584.
- Chlorotoluenes; fluorescence; fluorobenzenes; fluorotoluenes; liquid; nonradiative; quantum yields; radiative; substituent effect; 17613.
- Choking flow; desorption; phase equilibrium; two phase flow; absorption; cavitation; 17971.
- Chondrocalcinosis; pseudogout; solubility; solubility product; synovial fluid; calcium diphosphate; calcium pyrophosphate; 17492.
- Chopping; disc analysis; error analysis; floating-point arithmetic; inner products; interval analysis; polynomial evaluation; relative error; rounding error; software; 17815.
- Chromatographic analysis; coulometry; electron probe microanalysis; ion-selective electrodes; mass spectrometry; polarography; spectrochemical analysis; thermal analysis; wet chemistry; x-ray fluorescence; activation analysis; characterization; chemical composition; 17595.
- Chromatography; fluorescence detection; mass spectrometry; trace organic analysis; accuracy; 17641.
- Chromatography on DEAE-cellulose; high-performance liquid chromatography; lactate dehydrogenase inhibitor; 17691.
- Chromium; *f*-values; isoelectronic sequence; line strengths; manganese; oscillator strengths; systematic trends; transition probabilities; vanadium; allowed transitions; *JPCRD* 7, No. 2, 495-630 (1978).
- Chromium; isotope dilution; mass spectrometry; volatile chromium compounds; analytical blank; biological materials; 18189.
- Chromium; measurement compatibility; mercury; nitrogen dioxide; precision; reference materials; reference methods; accuracy; calcium; 17928.
- Chromium; volatile trace elements; activation analysis; brewers yeast; 17764.
- Chromosphere, sun; corona; spectra, sun; spectra, ultraviolet; sun; transition region, sun; 18000.
- Chromospheres; cool stars; Copernicus satellite; emission line profiles; flux variability; stars, chromospheres; stars, circumstellar shells; stars, late type; ultraviolet observations; ultraviolet spectra; 18050.
- Chromospheres; stellar spectra; ultraviolet; binary stars; 18261.
- Chromospheres; stellar spectra; ultraviolet; binary stars; 18313.
- Chromospheres, stars; emission line, stars; late-type, ultraviolet spectra; stars; 18309.
- Chromospheres, stars; emission-line, stars; late-type, ultraviolet spectra; Ca II emission, stars; 17812.
- Chrysotile; chrysotile emissions; chrysotile mining; crocidolite; cummingtonite; dust levels; grunerite; health risk; Homestake Mines, S.D.; hornblende; Hunting Hill Quarry, Rockville, Md.; lung cancer; mesothelioma; *SP506*, pp. 49-70 (Nov. 1978).
- Chrysotile; detection; fiber; identification; light microscopy; selected area electron diffraction; talc; transmission electron microscopy; tremolite; x-ray diffraction; asbestiform; asbestos; *SP506*, pp. 325-337 (Nov. 1978).
- Chrysotile; electron diffraction; energy-dispersive x-ray spectroscopy; mineral microfibers; scanning electron microscopy; selected-area electron diffraction; transmission electron microscopy; amphibole asbestos; asbestos; *SP506*, pp. 221-233 (Nov. 1978).
- Chrysotile; filters; airborne particulate; air monitoring; asbestos; *SP506*, pp. 355-362 (Nov. 1978).
- Chrysotile asbestos; differential thermoanalysis; survey method for traces of chrysotile; 17566.
- Chrysotile emissions; chrysotile mining; crocidolite; cummingtonite; dust levels; grunerite; health risk; Homestake Mines, S.D.; hornblende; Hunting Hill Quarry, Rockville, Md.; lung cancer; mesothelioma; *SP506*, pp. 49-70 (Nov. 1978).
- Chrysotile mining; crocidolite; cummingtonite; dust levels; grunerite; health risk; Homestake Mines, S.D.; hornblende; Hunting Hill Quarry, Rockville, Md.; lung cancer; mesothelioma; serpentine, surface chemistry; talcbole; *SP506*, pp. 49-70 (Nov. 1978).
- CH₃-d₂; infrared spectrum; matrix isolation; molecular structure; quartic anharmonicity; rotational energy levels; vibrational band centers; 17723.
- CH₃OH; decomposition; H₂CO; oxygenated hydrocarbon complexes; Ru surfaces; adsorption; 17645.
- CH₃S; dimethyldisulfide; infrared spectrum; matrix isolation; pyrolysis; *s*-trithiane; thioformaldehyde; ultraviolet photolysis; vacuum ultraviolet photolysis; CH₃SH; 17725.
- CH₃SH; CH₃S; dimethyldisulfide; infrared spectrum; matrix isolation; pyrolysis; *s*-trithiane; thioformaldehyde; ultraviolet photolysis; vacuum ultraviolet photolysis; 17725.
- Cigarette ignition; fabric classification; mock-up furniture samples; smoldering; upholstered furniture; upholstery fabrics; *NBSIR* 78-1438.
- Cipher feedback; codebook form; forbidden characters; *SP500-27*, pp. 38-45 (Feb. 1978).
- CIPM report; electrical measurements; energy; hourly solar radiation; ionizing radiation; ion-molecule reactions; metric; molecular structure; perspectives on NBS; solar energy; SRM's; *DIM/NBS* 62, No. 1, 1-32 (1978).
- Circular dichroism; Faraday rotation; Jones calculus; Mueller calculus; optical activity; optics; polarization; Stokes parameters; birefringence; 17680.
- Circumstellar shells; star formation; accretion; 18307.

ry process; violations; building official; building regulations;
code enforcement; construction; *SP518*, pp. 381-390 (Aug.
1978).
- Covalent azide; crystal structure; explosives; lead azide; neutron
diffraction; bond length; 17433.
- Covariance; diagnostics; influence; leverage; nonlinear; regres-
sion; robust; sensitivity analysis; convergence; *SP503*, pp. 77-
86 (Mar. 1978).
- Covariance; filter; finite Fourier expansion; prediction error;
random variables; synthesis; wave; accelerogram; artificial
earthquake; *SP523*, pp. IV-28—IV-47 (Sept. 1978).
- Covariance analysis; expected mean squares; factorial models;
multiple error strata; nonorthogonal ANOVA; *SP503*, pp. 58-
65 (Mar. 1978).
- Cover plates; enclosure; insulation; materials performance;
reflective surfaces; seals; selection of materials; solar energy
systems; standards; absorber coatings; absorber plates;
NBSIR 77-1314.
- $\text{CO}_2\text{-C}_2\text{H}_6$; critical locus; critical point; $\text{C}_4\text{H}_{10}\text{-C}_3\text{H}_8$; equation-of-
state; mixtures; *PVTx*; $\text{SF}_6\text{-C}_3\text{H}_8$; thermodynamic potential;
17751.
- CPEUG; hardware monitoring; on-line system evaluation; pre-
diction methods; queueing models; simulation; software
monitoring; workload definition; ADP life cycle; computer
performance evaluation; computer performance measure-
ment; computer performance prediction; *SP500-41*.
- CPSC; product life; product performance; safety regulations;
consumer product safety; *SP514*, p. 177 (May 1978).
- CPU scheduling; memory management; modeling; operating
systems; performance; queueing theory; resource allocation;
control theory; *SP500-41*, pp. 93-100 (Oct. 1978).
- CPU time; elapsed time; metering; system performance; tuning
programs; variations in CPU charges; varying workloads; ac-
counting/computer charges; *SP500-41*, pp. 243-253 (Oct.
1978).
- CPU time; EXCP counts; IBM OS/MVT; job accounting
systems; resource utilization measurement; System Manage-
ment Facilities; system wait time; computer performance
analysis; computer performance measurement; *SP500-40*.
- Crack; fracture mechanics; plane elasticity; stress; Wester-
gaard method; Airy stress function; 17860.
- Crack growth; ductile fracture; ductile to brittle fracture; frac-
ture; atomic aspects of fracture; brittle fracture; 18012.
- Crack growth; fracture; fracture mechanics; glass-ceramics;
strength; stress corrosion cracking; 17423.
- Crack healing; lattice trapping; nonlinear lattice theory; sub-
critical crack growth; surface energy; brittle fracture; 17530.
- Crack propagation; cryogenics; fatigue; fracture; low tempera-
ture tests; mechanical properties; aluminum alloys; 17430.
- Cracks; electron microscopy; fracture interfaces; plastic defor-
mation; silicon nitride; turbine materials; 18075.
- Creep; creep recovery; force measurement; force transducer;
load cell; pressure sensitivity; spring-dashpot model; 18200.
- Creep; fire models; slabs (members); steels; stresses; structural
materials; thermal analysis; building fires; computer pro-
grams; concretes; *NBS-GCR-78-114*.
- Creep recovery; force measurement; force transducer; load cell;
pressure sensitivity; spring-dashpot model; creep; 18200.
- Creep-fatigue interaction; dissipation; energy approach; fatigue;
hysteresis loop; irreversible thermodynamics; low-cycle
fatigue; mathematical modeling; multi-axial fatigue;
polymethyl-methacrylate; stainless steel; viscoplasticity;
17424.
- Creeps; failure analysis; fire models; steels; structural failure;
structural materials; thermal degradation; building fires; com-
puter programs; concretes; *NBS-GCR-78-115*.
- Crevice corrosion; ellipsometry; optical measurements; pitting;
stress corrosion; corrosion; 17454.
- Crevice corrosion; field ion microscopy; iron; noncrystalline
films; passive films; repassivation; sensitization; stainless steel;
uranium; x-ray photoelectron spectroscopy; *NBSIR 78-1429*
(Navy).
- Crevice corrosion; galvanic corrosion; inhibitors; pitting corro-
sion; rust; stress corrosion; corrosion; *CIS9*.
- Crib fires; fire tests; ignition source; incidental fires; mobile
homes; repeatability; source fires; upholstered furniture;
chairs; compartment fires; *NBSIR 78-1522*.
- Crimes of opportunity; intrusion detectors; physical security;
robbery; security equipment; target hardening equipment;
theft; alarms; burglary; catalogs; *SP480-35*.
- Criminal justice; law enforcement; research centers; associa-
tions; *SP480-20*.
- Criteria; energy conservation; energy consumption; environ-
mental design; lighting levels; standards; artificial illumina-
tion; buildings; *SP518*, pp. 77-94 (Aug. 1978).
- Criteria; fire growth; flammability; flooring radiant panel test;
testing; carpet systems; *NBSIR 78-1436*.
- Criteria; Health Physics Society Standards Committee;
neutrons, performance; personnel dosimetry; photons; stan-
dard; acceptable limits of uncertainty; beta particles; 18190.
- Critical analyses; data; diffusion; electromigration; grain bound-
aries; molten metals; monograph; review; surfaces; ther-
momigration; alloys; copper; 17493.
- Critical channelling angle; C-V profiling; ion beam scanning; ion
channeling; ion implantation; Rutherford backscattering
alignment; silicon crystallographic orientation; profiling; con-
trolled doping profiles; *SP400-49*.
- Critical current; current sharing; current transfer; multifilamen-
tary superconducting wire; superconducting composites; su-
perconductor; 18016.
- Critical current; current transfer; multifilamentary supercon-
ducting wire; superconducting composites; superconductor;
18015.
- Critical current; degradation; stress effects; superconductors;
18127.

- Critical data evaluation; nonmetallic elements; thermal expansion; coefficients of thermal expansion; compilation; compounds; 17370.
- Critical evaluation; data analysis; data compilation; data synthesis; electrical resistivity; metals; recommended values; thermal conductivity; thermoelectric power; conductivity; *JPCRD* 7, No. 3, 959-1178 (1978).
- Critical evaluation; data bases; ergonomics; human engineering; human factors; human performance; information systems; anthropometry; 18264.
- Critical evaluation; electrolyte; excess Gibbs energy; osmotic coefficients; solutions; thermodynamic properties; activity coefficient; alkaline earth metal halides; *JPCRD* 7, No. 1, 263-310 (1978).
- Critical evaluation; electrolytes; equilibrium constants; free energy; Gibbs energy; ionic; solutions; thermodynamic properties; activities; alkaline earth salts; aqueous; 17772.
- Critical evaluations; data compilations; electronic materials; industrial needs; metallurgy; phase diagrams; theory of phase diagrams; thermodynamics; ceramics; computer predictions; *SP496, Vols. 1 and 2*.
- Critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; states-transition; system's approach; "and" gate; behavior; *NBSIR 77-1273*.
- Critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; state's-transition; system; systems approach; "and" gate; behavior; 17967.
- Critical exponent; critical isochore; critical pressure; critical temperature; ethylene; scaling laws; vapor pressure; corrections to scaling; 17989.
- Critical exponent; critical phenomena; deuterated isobutyric acid . heavy water; isobutyric acid . water; liquid density; liquid-liquid critical point; magnetic densimeter; coexistence curve; consolute point; 17449.
- Critical exponents; critical points; fixed points; gravity effects; homogeneity; magnetic densimeter; optical interference; power laws; relevant fields; Renormalization Group; scaling; scattering; universality; 17461.
- Critical fields; critical temperature; crystallographic data; data compilation; low temperature; superconductive materials; superconductivity; bibliography; composition; *TN983*.
- Critical fluctuations; neutron scattering; phase transition; reorientation; ammonium bromide; correlation time; 18215.
- Critical incidents; decision making; escape; fire behavior; human factors; mapping; methodology; performance (human); reaction (psychology); stress (psychology); building fires; case histories; *NBS-GCR-77-106*.
- Critical isochore; critical pressure; critical temperature; ethylene; scaling laws; vapor pressure; corrections to scaling; critical exponent; 17989.
- Critical locus; critical point; $C_8H_{18}-C_3H_8$; equation-of-state; mixtures; *PVTx*; $SF_6-C_3H_8$; thermodynamic potential; $CO_2-C_2H_6$; 17751.
- Critical parameters; definitions; flux phenomena; Josephson phenomena; stabilization; superconductors; terminology; 17819.
- Critical parameters; definitions; flux phenomena; Josephson phenomena; stabilization; superconductors; terminology; 17916.
- Critical phenomena; critical region parameters; equation of state; scaling laws; steam; universality of critical behavior; 18078.
- Critical phenomena; critical-point universality; equation of state; internal energy; steam; thermodynamic potential; critical phenomena; 17480.
- Cross linking; dose distributions; dosimetry; electron beams; nylon; plastic tubing; polyethylene; polymer improvement;
- Critical phenomena; deuterated isobutyric acid . heavy water; isobutyric acid . water; liquid density; liquid-liquid critical point; magnetic densimeter; coexistence curve; consolute point; critical exponent; 17449.
- Critical phenomena; equation of state; fluid mixtures; fluids; lattice gas; scaling laws; universality; correlation function; correlation length; 17664.
- Critical phenomena; fluids; gravity effects; materials science; phase transitions; spacelab experiments; 17875.
- Critical point; $C_8H_{18}-C_3H_8$; equation-of-state; mixtures; *PVTx*; $SF_6-C_3H_8$; thermodynamic potential; $CO_2-C_2H_6$; critical locus; 17751.
- Critical point; equation of state; ethane; fluids; orthobaric densities; specific heats; vapor pressures; coexistence boundary; 17458.
- Critical point; equation of state; scaling equation of state; *J. Res.* 83, No. 4, 329-334 (1978).
- Critical point; internal degrees of freedom; mixtures; prediction technique; thermal conductivity coefficient; corresponding states; 18193.
- Critical point; methane; Rayleigh light scattering; thermal conductivity; thermal diffusivity; 17881.
- Critical point; methane; Rayleigh scattering; thermal conductivity; thermal diffusivity; coexistence curve; 18168.
- Critical point of fluids; fluids, critical point; two-scale factor, critical point of fluids; correlation of fluids; 17822.
- Critical points; fixed points; gravity effects; homogeneity; magnetic densimeter; optical interference; power laws; relevant fields; Renormalization Group; scaling; scattering; universality; critical exponents; 17461.
- Critical pressure; critical temperature; ethylene; scaling laws; vapor pressure; corrections to scaling; critical exponent; critical isochore; 17989.
- Critical region parameters; equation of state; scaling laws; steam; universality of critical behavior; critical phenomena; 18078.
- Critical review; data compilation; liquid water; viscosity; critically evaluated data; *JPCRD* 7, No. 3, 941-948 (1978).
- Critical stress intensity; cryogenic temperature; fracture toughness; *J*-integral; subcritical crack extension; aluminum alloys; 17427.
- Critical temperature; crystallographic data; data compilation; low temperature; superconductive materials; superconductivity; bibliography; composition; critical fields; *TN983*.
- Critical temperature; ethylene; scaling laws; vapor pressure; corrections to scaling; critical exponent; critical isochore; critical pressure; 17989.
- Critically evaluated data; critical review; data compilation; liquid water; viscosity; *JPCRD* 7, No. 3, 941-948 (1978).
- Critically evaluated data; enthalpy, entropy; equilibrium constant of formation; free energy of formation; Gibbs energy function; heat capacity; heat of formation; thermochemical tables; *JPCRD* 7, No. 3, 793-940 (1978).
- Critically evaluated data; estimated enthalpies of formation; estimated molecular parameters; ideal gas thermodynamic properties; mixed halomethanes; *JPCRD* 7, No. 4, 1285-1308 (1978).
- Critically evaluated data; halomethanes; liquid density; *JPCRD* 7, No. 2, 425-440 (1978).
- Critical-point universality; equation of state; internal energy; steam; thermodynamic potential; critical phenomena; 17480.
- Crocidolite; cummingtonite; dust levels; grunerite; health risk; Homestake Mines, S.D.; hornblende; Hunting Hill Quarry, Rockville, Md.; lung cancer; mesothelioma; serpentinite, surface chemistry; talcboles; *SP506*, pp. 49-70 (Nov. 1978).
- Croconates; derivatives; dianions; dicyanomethylene; esters; plonar; salts; structure; bond-delocalized; 17864.

- polyvinylchloride; radiation processing; wire insulation; absorbed dose; 17451.
- Cross polarization; NMR; solid; ^{13}C ; aromaticity; coal; 17677.
- Cross section; fission; high resolution; keV energies; structure; ^{235}U ; averages; 17486.
- Cross section; fission; neutron; uranium-235; 17828.
- Cross section decrease; intense laser field; optical collisions; strontium; 17926.
- Cross sections; dissociation; electron impact; NH_4^+ -ammonium; recombination; trapped ions; 17806.
- Cross sections; electron; gases; magnetohydrodynamics; conductivity; 17463.
- Cross sections; ionization; triple-differential cross sections; argon; 17903.
- Cross structure; diffused layer; line width; process control; sheet resistance; sheet resistor; silicon; test pattern; test structure; van der Pauw structure; bridge structure; cross-bridge structure; 17800.
- Cross structure; diffused layer; process control; sheet resistance; sheet resistor; silicon; test pattern; test structure; van der Pauw structure; 17801.
- Cross tabulations; hierarchical order; RPG-2; XTALLY; SP503, pp. 19-25 (Mar. 1978).
- Cross-bridge structure; cross structure; diffused layer; line width; process control; sheet resistance; sheet resistor; silicon; test pattern; test structure; van der Pauw structure; bridge structure; 17800.
- Crossed beams; C^{3+} ; electron impact; excitation ($2s-2p$); absolute cross sections; 17388.
- Crossed beams; electron impact; excitation ($2s-2p$); absolute cross sections; C^{3+} ; 17366.
- Crossed-field energy analyzer; electron optics; Wien filter; aberration coefficients; 18043.
- Cross-polarization; C-13; macerals; NMR; solids; coal; 18236.
- Crushed stone; fiber; iron; minerals; mining; quarrying; solid waste; amphibole; copper; SP506, pp. 461-469 (Nov. 1978).
- Cryocooler; heat exchanger design; Joule-Thomson cycle; refrigerator; SP508, pp. 75-80 (Apr. 1978).
- Cryocooler; helium refrigerator; refrigeration, helium; SQUID refrigeration; SP508, pp. 131-133 (Apr. 1978).
- Cryocooler; infrared; Josephson junction; satellite communications; SQUID; SP508, pp. 109-122 (Apr. 1978).
- Cryocooler; mechanical refrigeration; superconducting instrument; SP508, pp. 207-211 (Apr. 1978).
- Cryocoolers; refrigeration; superconducting devices; SP508.
- Cryogenic; density; flowmetering; instrumentation; liquids; measurement; natural gas; 17432.
- Cryogenic cooling; IR detectors; orbiting telescopes; SP508, pp. 153-157 (Apr. 1978).
- Cryogenic engineering; cryogenic materials research; cryogenic systems; LNG, storage and transportation; low-temperature materials research; applied superconductivity; 17416.
- Cryogenic flow control; flow control; liquid helium pressure regulator; pressure regulator; 17892.
- Cryogenic flow measurements; flow measurement, cryogenics; fluids, flow measurements; 18178.
- Cryogenic heat exchangers; fixed J-T valve; Gifford McMahon; masers; cooling capacity monitor; SP508, pp. 99-107 (Apr. 1978).
- Cryogenic helium supply system; cryogenic storage; helium; helium supply system; high density helium storage; liquid helium storage; supercritical helium; 18188.
- Cryogenic materials research; cryogenic systems; LNG, storage and transportation; low-temperature materials research; applied superconductivity; cryogenic engineering; 17416.

- Data compilation; data synthesis; electrical resistivity; metals; recommended values; thermal conductivity; thermoelectric power; conductivity; critical evaluation; data analysis; *JPCRD 7*, No. 3, 959-1178 (1978).

Data compilation; eutectic; eutectic composition; eutectic data; eutectic temperature; inorganic compound; melting point; molten salt; phase diagrams; *NSRDS-NBS61, Part 1*.

Data compilation; liquid water; viscosity; critically evaluated data; critical review; *JPCRD 7, No. 3, 941-948 (1978)*.

Data compilation; low temperature; superconductive materials; superconductivity; bibliography; composition; critical fields; critical temperature; crystallographic data; *TN983*.

Data compilation; low temperatures; mechanical properties; physical properties; stainless steel; welding; *NBSIR 78-884*.

Data compilations; electronic materials; industrial needs; metallurgy; phase diagrams; theory of phase diagrams; thermodynamics; ceramics; computer predictions; critical evaluations; *SP496, Vols. 1 and 2*.

Data compilations for biological thermodynamics; electrolyte thermodynamics; thermochemistry of biochemicals; aqueous electrolytes, thermochemistry of; biothermodynamics; *17478*.

Data dependent formats; general purpose statistical computing system; Minitab development; Minitab II; regression output; *SP503, pp. 404-408 (Mar. 1978)*.

Data dictionary/directory system; DD/DS; evaluation and selection process; evaluation of DD/DS packages; data base management systems; *NBSIR 78-1446, pp. 119-134 (Apr. 1978)*.

Data directories; data resource management; management; records keeping; *NBSIR 78-1446, pp. 139-140 (Apr. 1978)*.

Data display and analysis; graphics interface; human factors; interactive computer graphics; man-computer interface; allocation of tasks; *SP503, pp. 122-130 (Mar. 1978)*.

Data editing; data entry; data independence; data management; distributed processing; intelligent terminal; statistical data systems; data base dictionary; *SP503, pp. 367-372 (Mar. 1978)*.

Data element dictionary; data element directory; data element dictionary/directory; data resource management; requirements definition; software selection; *NBSIR 78-1446, pp. 19-23 (Apr. 1978)*.

Data element dictionary/directory; data resource management; requirements definition; software selection; data element dictionary; data element directory; *NBSIR 78-1446, pp. 19-23 (Apr. 1978)*.

Data element dictionary/directory (DED/D); computer software; database administration; database administrator (DBA); database management system (DBMS); *SP500-28*.

Data element directory; data element dictionary/directory; data resource management; requirements definition; software selection; data element dictionary; *NBSIR 78-1446, pp. 19-23 (Apr. 1978)*.

Data elements; data management; data processing; Federal Information Processing Standards; information interchange; information processing; information systems; American National Standards; American National Standards Institute; data; *NBSIR 78-1446*.

Data elements; data problems; data standardization; museums; natural history; networks; collections; *NBSIR 78-1446, pp. 47-57 (Apr. 1978)*.

Data Encryption Standard; encryption; key management; network security; computer security; cryptography; *SP500-27*.

Data entry; data independence; data management; distributed processing; intelligent terminal; statistical data systems; data base dictionary; data editing; *SP503, pp. 367-372 (Mar. 1978)*.

Data evaluation; demand terminal; digital data; NIRA programs; Photonuclear Data Center; central computer; chaining programs; *17536*.

Data evaluation; detectors; errors; microanalysis; standard materials; background; *18024*.

Data evaluation; gas phase; photoabsorption cross section; photochemistry; quantum yield; rate constant; air pollution; atmospheric chemistry; chemical kinetics; *SP513*.

Data evaluation; least squares (L2); least sums (L1); chemical thermodynamics; computer techniques; *17533*.

Data evaluation; models; ozone; rate constant; atmospheric chemistry; chemical kinetics; compilation; data base; *17542*.

Data file; data processing; demography; geographic areas; geographic coding; geography; information systems; named places; standard location codes; towns; cities; *FIPS PUB 55, Vols. 1 and 2*.

Data independence; data management; distributed processing; intelligent terminal; statistical data systems; data base dictionary; data editing; data entry; *SP503, pp. 367-372 (Mar. 1978)*.

Data index; elements; isotopes; nuclear physics; photonuclear reactions; bibliography; *SP380, Supplement 1*.

Data integrity; data processing; error correcting; high integrity; performance assurance; best practice; *SP500-24*.

Data management; data processing; Federal Information Processing Standards; information interchange; information processing; information systems; American National Standards; American National Standards Institute; data; data base systems; *NBSIR 78-1446*.

Data management; distributed processing; intelligent terminal; statistical data systems; data base dictionary; data editing; data entry; data independence; *SP503, pp. 367-372 (Mar. 1978)*.

Data manipulation; group resolution; identical match; linkage group; linkage model; list sampling frame; record linkage; reformat; address match; blocking; *SP503, pp. 416-420 (Mar. 1978)*.

Data problems; data standardization; museums; natural history; networks; collections; data elements; *NBSIR 78-1446, pp. 47-57 (Apr. 1978)*.

Data processing; data processing equipment; information systems; magnetic tape recording; magnetic tapes; magnetic tape transports; standards; communications; computers; computer system hardware; *FIPS PUB 50*.

Data processing; data processing equipment; information systems; magnetic tape recording; magnetic tapes; magnetic tape transports; standards; communications; computers; computer system hardware; *FIPS PUB 51*.

Data processing; data processing equipment; information systems; microfiche; microfilm; standards; COM formats and reduction ratios; communications; computer output microform; computer system hardware; computers; *FIPS PUB 54*.

Data processing; demography; geographic areas; geographic coding; geography; information systems; named places; standard location codes; towns; cities; data file; *FIPS PUB 55, Vols. 1 and 2*.

Data processing; error correcting; high integrity; performance assurance; best practice; data integrity; *SP500-24*.

Data processing; Federal Information Processing Standards; information processing; computer magnetic tape file properties; computers; *FIPS PUB 53*.

Data processing; Federal Information Processing Standards; information interchange; information processing; information systems; American National Standards; American National Standards Institute; data; data base systems; data elements; *NBSIR 78-1446*.

Data processing; Josephson; refrigerators; cryogenics; *SP508, pp. 213-219 (Apr. 1978)*.

Data processing; quality control; radioimmunoassay; RIA; clinical chemistry; competitive protein binding assay; *SP503, pp. 288-291 (Mar. 1978)*.

Data processing equipment; information systems; magnetic tape recording; magnetic tapes; magnetic tape transports; standards; communications; computers; computer system hardware; data processing; *FIPS PUB 50*.

- Decomposition; decyclization; heat of formation; isomerization; shock tube; trimethylene; 1-pentene; biradical; concerted; cyclopentane; cyclopropane; *18111*.
- Decomposition; degradation; heating rates; initial rates; kinetics; life-time prediction; oxidation; polymers; polyurethanes; pyrolysis; stability; thermal analysis; thermogravimetry; accelerated aging; complex reactions; *17897*.
- Decomposition; ethyl; heats of formation; hexamethylethane; isopropyl; pre-exponential factor; radical buffer; radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; *18110*.
- Decomposition; formaldehyde; oxygen; x-ray photoelectron spectroscopy; adsorption; carbon dioxide; carbon monoxide; chemisorption; *17783*.
- Decomposition; heat of formation; hexyne-1; methyl propargyl; propargyl; resonance energy; shock tube; thermal properties; 4-methylheptyne; 4-methylhexyne-1; 5-methylhexyne-1; acetylenic; *18112*.
- Decomposition; H_2CO ; oxygenated hydrocarbon complexes; Ru surfaces; adsorption; CH_3OH ; *17645*.
- Deconvolution; dielectric spectroscopy; homomorphic transformation; modeling of sampling gates; signal processing; time domain measurements; time domain reflectometry; antenna scattering; *NBSIR 78-881*.
- Deconvolution procedure; earthquake records; ground conditions; ground transfer functions; shear wave; analytical method; base-rock; bridge foundations; *SP523*, pp. IV-158-IV-179 (Sept. 1978).
- Decyclization; heat of formation; isomerization; shock tube; trimethylene; 1-pentene; biradical; concerted; cyclopentane; cyclopropane; decomposition; *18111*.
- Dedekind rings; integral domains; matrix; matrix semigroups; multiplicative maps; *17576*.
- Deduced rms charge radius; measured $\sigma(E)$ at $\theta = 75^\circ$; nuclear reactions; ${}^3He(e,e')$, $E = 28.8-95.0$ MeV; *17623*.
- Deep borehole; earthquake, in-situ velocity measurement; S-wave; vertical distribution of seismic wave; *SP523*, pp. III-44-III-54 (Sept. 1978).
- Deep level measurements; defect distribution; power semiconductor materials; power thyristors; semiconductor measurements; thermally stimulated measurements; *J. Res.* **83**, No. 3, 273-281 (1978).
- Deep level measurements; energy conservation; measurement methods; photovoltaic method; power-device grade silicon; resistivity variations; silicon; spreading resistance measurements; thermally stimulated measurements; thyristor materials measurements; *NBSIR 78-1474*.
- Deep level studies; ion implantation; isothermal transient capacitance method; isotope shift; thermally stimulated capacitance measurement; vibronic coupling; *17966*.
- Default decisions; hypothesis testing; interactions; orthogonal contrasts; unbalanced data; automatic interaction procedures; *SP503*, pp. 54-57 (Mar. 1978).
- Defect; disclination; dislocation; distortion; dynamics; elasticity; Green's tensor; incompatibility; loop; plasticity; strain; Volterra; Burgers vector; compatibility; continuum mechanics; *17435*.
- Defect crystal structures; inelastic neutron scattering; lattice dynamics; metal-hydrogen systems; palladium-deuteride ($PdD_{0.63}$); phonon lineshapes; *17452*.
- Defect distribution; power semiconductor materials; power thyristors; semiconductor measurements; thermally stimulated measurements; deep level measurements; *J. Res.* **83**, No. 3, 273-281 (1978).
- Defects; dusts; environment; fibers; morphology; serpentine; structure; amphibole; asbestos; chemistry; cleavage; *SP506*, pp. 35-48 (Nov. 1978).
- Defects; electron microscopy; ESCA; optical coatings; thin films; arsenic triselenide; arsenic trisulfide; Auger; damage; *SP509*, pp. 342-351 (Dec. 1977).
- Defects; laser damage; As_2S_3 ; As_2Se_3 ; coating damage; coating design; *SP509*, pp. 316-323 (Dec. 1977).
- Defined solid angle spectrometer; standardization; ${}^{55}Fe$, ${}^{85}Sr$, ${}^{109}Cd$, ${}^{125}I$; *17785*.
- Definition of meter; laser; *18091*.
- Definitions; exposure limits; monitoring; occupational exposure; record keeping; asbestos; ASTM; consensus; *SP506*, pp. 381-386 (Nov. 1978).
- Definitions; flux phenomena; Josephson phenomena; stabilization; superconductors; terminology; critical parameters; *17819*.
- Definitions; flux phenomena; Josephson phenomena; stabilization; superconductors; terminology; critical parameters; *17916*.
- Definitive method; electrolytes; flame atomic emission spectroscopy; reference method; semiautomated pipetting; serum sodium analysis; clinical analysis; clinical chemistry; *SP260-60*.
- Deflections; dynamic response; gust factors; structural engineering; wind loads; building codes; buildings; *17365*.
- Deformable mirrors; dielectric enhanced reflectors; laser mirror coatings; stress cycling of coatings; thin films; coating stress; *SP509*, pp. 358-361 (Dec. 1977).
- Deformation; gage blocks; length; metrology; calibration; comparator; *TN962*.
- Deformation dipole model; KBr; KCl; LiF; NaF; Sziget effective charge; alkali halides; *18277*.
- Degradation; deuterated poly- α -methylstyrene; molecular weight; poly- α -methylstyrene; pyrolysis; termination; transfer; zip length; *J. Res.* **83**, No. 4, 371-380 (1978).
- Degradation; dielectric constant; dielectric relaxation time; electric birefringence; electric dichroism; intrinsic viscosity;

- light scattering; polymerization; poly(n-alkyl isocyanate); rodlike molecule; conformational energy calculations; 17661.
- Degradation; differential scanning calorimetry; differential thermal analysis; nonisothermal kinetics; polymers; review; stability; thermogravimetry; aging; 17525.
- Degradation; energy efficiency; mineral deposits; performance degradation; test methods; water heaters (gas-fired); *NBSIR 78-1460*.
- Degradation; heating rates; initial rates; kinetics; life-time prediction; oxidation; polymers; polyurethanes; pyrolysis; stability; thermal analysis; thermogravimetry; accelerated aging; complex reactions; decomposition; 17897.
- Degradation; herbicide; historic structures; masonry; acidic; alkaline; *NBSIR 78-1449*.
- Degradation; methodology; predictive service life tests; service life; accelerated aging tests; building components and materials; 17592.
- Degradation; photodegradation; poly(methyl methacrylate); UV; *NBSIR 78-1463*.
- Degradation; stress effects; superconductors; critical current; 18127.
- Delay correction; microprocessor; satellite; scientific calculations; time of year; broadcast; *TN1003*.
- Delayed neutrons; enriched uranium; neutron interrogation; nondestructive assay; U-235; Cf-252; *SP528*, pp. 41-48 (Nov. 1978).
- Delphi Forecast; industrial robots; robot applications; robotics research; sensors; control systems; *SP500-29*.
- Delphi Study; national measurement system; position location; technological assessment; technological forecasting; time and frequency; communications; 17980.
- Delta rays; electrons; heavy charged particles; range-energy relations; stopping power; straggling; charged-particle tracks; collision cross section; 17497.
- Demand terminal; digital data; NIRA programs; Photonuclear Data Center; central computer; chaining programs; data evaluation; 17536.
- Demographic projections; developing countries; economic projections; long range; planning models; social services; *SP503*, pp. 421-425 (Mar. 1978).
- Demography; geographic areas; geographic coding; geography; information systems; named places; standard location codes; towns; cities; data file; data processing; *FIPS PUB 55, Vols. 1 and 2*.
- Demolition; housing needs; physical condition rehabilitation; decision criteria; *SP518*, pp. 251-257 (Aug. 1978).
- Demonstration program; dissemination; information needs; residential construction; solar energy; space heating; technology; building regulations; data collection; *SP518*, pp. 1-8 (Aug. 1978).
- Demonstration projects; Experimental Technology Incentives Program; federal funding of civilian R&D; federal policies; guidelines; policies; R&D; technological change; technology; *NBS-GCR-ETIP 76-07*.
- Demonstrational statistical methods; simulation; statistical, computer texts; statistical content; statistical instruction; statistical interactive packages; statistical noninteractive packages; teaching statistics; *SP503*, pp. 437-441 (Mar. 1978).
- Densimeter; density; liquefied natural gas; mathematical model; custody transfer; 17431.
- Densities; excess volumes; liquid mixtures; LNG components; orthobaric; binary systems; 17439.
- Densitometry; edge objects; microdensitometry; photographic edges; photographic process; *NBSIR 76-1129*.
- Density; distribution patterns; flow rate; mapping; spray patterns; sprinkler heads; sprinkler systems; superposition; collection arrays; *NBS-GCR-77-105*.
- Density; empirical; liquid; oligomer; polymer; alkane; carboxylic esters; 17759.
- Density; enthalpy; entropy; equation of state; oxygen; property computer program; PVT; saturation properties; specific heat; *NBSIR 78-882*.
- Density; enthalpy; entropy; oxygen; properties of fluids; specific heat; velocity of sound; 18255.
- Density; enthalpy of solution; nucleic acid bases; thermochemistry; thymine; 5-methyl-uracil; 5-methyl-2,4 (1H, 3H)-pyrimidinedione; calorimetry; *J. Res. 83*, No. 6, 529-537 (1978).
- Density; equation of state; hard spheres model; liquefied natural gas; magnetic suspension densimeter; measurements; mixture data; pure fluid data; saturated liquid; cell model; corresponding states model; custody transfer; 17867.
- Density; equation of state; LNG; mixtures; PVTx; computer program; *NBSIR 77-867*.
- Density; experimental; gas; glow; liquid; LNG; measurement; comparison; 17798.
- Density; flowmetering; instrumentation; liquids; measurement; natural gas; cryogenic; 17432.
- Density; glass; phase separation; refractive index; relaxation processes; borosilicate glass; 17615.
- Density; liquefied natural gas; mathematical model; custody transfer; densimeter; 17431.
- Density; mass comparisons in vacuo; precise weighing; vacuum; vacuum weighing; buoyancy of air; *J. Res. 83*, No. 5, 407-413 (1978).
- Density; molar volume; oxygen; phase transition; solid; *JPCRD 7*, No. 3, 949-958 (1978).
- Density dependence of the PVT surface; liquids; melting; PVT data, range of densities; PVT, simple liquids; 17470.
- Density, enthalpy of solution, entropy of formation; nucleic acid bases; thermochemistry; 6-amino purine; adenine; calorimetry; *J. Res. 83*, No. 4, 347-370 (1978).
- Density, enthalpy of solution, entropy of solution; nucleic acid bases; thermochemistry; 4-amino-2(1H)-pyrimidinone; calorimetry; cytosine; *J. Res. 83*, No. 6, 539-546 (1978).
- Density, enthalpy of solution, entropy of solution; nucleic acid bases; thermochemistry; uracil; 2,4-dioxypyrimidine; 2,4(1H, 3H)-pyrimidinedione; calorimetry; *J. Res. 83*, No. 6, 547-554 (1978).
- Density fluctuations; fluctuations; generalized hydrodynamics; kinetic theory; liquids; neutron scattering; collective modes in liquids; 17752.
- Density function estimate; turbulence; variance; bias; bispectra; cubic spline; *SP503*, pp. 184-188 (Mar. 1978).
- Density matrix equations; Heisenberg equations; laser bandwidth; multiphoton absorption; multiphoton ionization; partially coherent lasers; power broadening; two laser absorption; Bloch equations; coherence; coherent multiphoton effects; 17462.
- Density matrix equations; Heisenberg equations; laser bandwidth; multiphoton ionization; multiphoton saturation effects; partially coherent laser; power broadening; rate approximation; two photon absorption; two photon ionization; Bloch equations; 17805.
- Density measurements; mass measurements; National Measurement System; volume measurements; *NBSIR 75-928*.
- Density of electronic states; electronic structure; gold; silver; Auger-electron spectroscopy; copper; 18147.
- Density of states; electronic band structure; gold; silver; Auger-electron spectra; copper; 17977.
- Density prediction; excess volume model; LNG components; molar volumes; multicomponent systems; orthobaric liquid; 18169.
- Dental; enamel; ESCA; mordant; adhesion; analysis; bonding; chemistry; 18150.
- Dental; filler; glass; microporous; radiopacity; composite; 18083.

- Dental adhesives; dental composites; dental polymer; polymerization coupler; tensile strength; coupling agent; 18153.
- Dental alloy; dental materials; polymerization; resins; restorative materials; wear; adhesive; base metal; composites; *NBSIR 77-1397*.
- Dental composites; dental polymer; polymerization coupler; tensile strength; coupling agent; dental adhesives; 18153.
- Dental materials; dentin; disturbed layer; pH; pK; smear layer; solubility; surface; toxicity; acid; adhesion; buffer; 18272.
- Dental materials; ion exchange; mordant; neutron activation; adhesion; adsorption; 18222.
- Dental materials; polymerization; resins; restorative materials; wear; adhesive; base metal; composites; dental alloy; *NBSIR 77-1397*.
- Dental materials; test method for adhesion; adhesion; adhesive test; bonding agent comparison; coupling agent; 17660.
- Dental polymer; polymerization coupler; tensile strength; coupling agent; dental adhesives; dental composites; 18153.
- Dental resins; pit and fissure sealants; preventive dental materials; protective coatings; sealant, evaluation; sealant, formulation; sealants; sealant testing procedures; Bis-GMA; 18151.
- Dentin; disturbed layer; pH; pK; smear layer; solubility; surface; toxicity; acid; adhesion; buffer; dental materials; 18272.
- Dentin; functional monomers; hydroxybenzaldehydes; isomers; polymerization; synthesis; adhesion; aldehyde methacrylate; collagen; condensation reactions; copolymerization; coupling agents; 18149.
- Dentitions; duration of sustained maximum biting force; hardness of enamel; occlusal area; bite opening; biting force; biting strength; cusps; *NBSIR 78-1452*.
- DEPAB; energy conservation; heating systems; part-load performance; seasonal efficiency; boiler; computer simulation; 18059.
- DEPAF; energy conservation; furnaces; operating cost; seasonal performance; building heating system; computer simulation; 18088.
- Department of Transportation; documentation standardization; Economic Commission for Europe; export documents; import documents; legal questions; National Committee on International Trade Documentation (NCITD); *NBSIR 78-1446*, pp. 91-95 (Apr. 1978).
- Depolarization; optical distortion; photo-elastic constants; stress-induced birefringence; BaF₂; CaF₂; crystalline windows and rods; *SP509*, pp. 89-94 (Dec. 1977).
- Deposition parameters; dielectric enhanced mirrors; reflectance; absorptance; cleaning procedures; coating materials; *SP509*, pp. 385-398 (Dec. 1977).
- Depth profiling; ion microprobe mass analysis; quantitation; secondary; sputtering; calibration procedures; 18022.
- Depth profiling; ion microprobe mass analysis; microanalysis; particle analysis; secondary ion mass spectrometry; sputtering; 18053.
- Depth sensitivity; image formation; resolution; scanning electron microscopy; specimen current; contrast mechanisms; 17836.
- Derivative-free; fitting differential equations; nonlinear least squares; *SP503*, pp. 312-322 (Mar. 1978).
- Derivatives; dianions; dicyanomethylene; esters; planar; salts; structure; bond-delocalized; croconates; 17864.
- Derived; dimension; logarithm; neper; radian; SI; supplementary; units; base; decibel; 17401.
- Design; earthquake magnitude; epicentral distance; statistical analysis; strong-motion acceleration records; *SP523*, pp. IV-48—IV-77 (Sept. 1978).
- Design; hardware; implementation; laboratory automation; minicomputers; software; automation; 18289.
- Design; horizontal acceleration; seismic coefficients; stability; strong-motion accelerogram; structures; vertical acceleration; *SP523*, pp. IV-1—IV-19 (Sept. 1978).
- Design; hospitals; light; architecture; buildings; color; *SP516*.
- Design; performance concept; building; center for building technology; *NBS-GCR-77-107*.
- Design; test methods; walls and windows; buildings; 17947.
- Design analysis; electronic field data collection program; vehicle service life; automobile durability; automobile testing; *SP514*, pp. 107-120 (May 1978).
- Design considerations; dimensional relationships; environmental design; safety; stairs; user needs; architectural design; *NBSIR 78-1554*.
- Design criteria; developing countries; technology transfer; windloads; buildings; *SP523*, pp. VIII-42—VIII-46 (Sept. 1978).
- Design criteria; disaster; earthquake hazards; earthquakes; ground failures; seismicity; solids; standards; structural engineering; structural responses; wind loads; winds; accelerograph; codes; *SP523*.
- Design decisions; minimum cost; seismic risk; *SP523*, pp. III-20—III-29 (Sept. 1978).
- Design earthquake; deterministic intensity function; historical data; maximum values; random characteristics; seismic zoning; spectral shapes; theoretical analysis; *SP523*, pp. IV-78—IV-95 (Sept. 1978).
- Design loads; fire; fire loads; household surveys; live loads; residential surveys; statistics of extremes; *NBSIR 78-1440*.
- Design method; proposed earthquake resistant design method; seismic hazard zoning map; coefficients in aseismic design; *SP523*, pp. V-80—V-101 (Sept. 1978).
- Design of experiments; evaluation, calibration; leached hull monitor; nondestructive assay; *SP528*, pp. 71-77 (Nov. 1978).
- Design of hull monitor; nuclear fuel; nuclear waste; plutonium; *SP528*, pp. 284-288 (Nov. 1978).
- Design principle; earth structure; earthwork manual; fill slope; priority; retaining wall; seismic forces; culverts; *SP523*, pp. V-45—V-52 (Sept. 1978).
- Design quality; durability; durability technology; materials conservation; product life; product performance; product testing; wear analysis; *SP514*.
- Design requirements; design standards; extreme winds; hurricanes; property damage; *SP523*, pp. I-10—I-15 (Sept. 1978).
- Design standards; extreme winds; hurricanes; property damage; design requirements; *SP523*, pp. I-10—I-15. (Sept. 1978).
- Design (criteria); loads; probability theory; reliability; statistical analysis; structural engineering; buildings (codes); concrete (reinforced); *BSS110*.
- Desorption; diffusion constants; Henry's law constants; poly(vinyl chloride); sorption; vinyl chloride; 17371.
- Desorption; electron stimulated desorption; oxygen; single crystal; tungsten; angular distribution; 17702.
- Desorption; electron stimulated desorption; hydrogen; ion desorption; oxygen; tungsten; adsorption; angular distribution; chemisorption; 17739.
- Desorption; phase equilibrium; two phase flow; absorption; cavitation; choking flow; 17971.
- Detectability; diagnosis of bias; reporting of results; systematic; chemical analysis; chemical measurement process; 17508.
- Detection; fiber; identification; light microscopy; selected area electron diffraction; talc; transmission electron microscopy; tremolite; x-ray diffraction; asbestiform; asbestos; chrysotile; *SP506*, pp. 325-337 (Nov. 1978).
- Detection limits; energy vs. wavelength dispersion; imprecision; merit; quantitation limits; reporting of data; systematic error; x-ray fluorescence analysis; atmospheric pollutants; counting statistics; 17507.
- Detection limits; exploratory techniques; patterns; performance characteristics; precision; random error; standards; systematic error; testing of assumptions; validation; accuracy; bias detection; chemical analysis; chemical measurement process; data reporting; 18152.

- Detection limits; gamma rays; germanium detector; in-situ analysis; plutonium; x rays; americium; *SP528*, pp. 201-206 (Nov. 1978).
- Detection limits; lead; mercury; vanadium; x-ray fluorescence spectrometry; arsenic; cadmium; *NBSIR 77-1211*.
- Detection of active faults; earthquake prediction; research on active fault; *SP523*, pp. III-55—III-62 (Sept. 1978).
- Detector; detector radiometry; detector spectral comparator; detector spectral response; filter transmittance test; photodetector; photometer; radiometer; spectral responsivity; *TN988*.
- Detector; distributed Ramsey cavity phase shift; frequency drift; frequency stability degradation; long-term frequency instabilities; microwave power; cavity phase shift; cesium atom; cesium beam velocity distribution; cesium standards; *17985*.
- Detector; electrically calibrated detectors; laser power measurements; pyroelectric detectors; radiometry; silicon cell; silicon detector; silicon photodetector; absolute radiometry; *17535*.
- Detector; fluorimeter; liquid chromatography; photometer; polynuclear aromatic hydrocarbon; selectivity; sensitivity; spectrofluorimeter; *17858*.
- Detector; frequency response; high modulation frequency; laser modes; photodiode; saturation; *17932*.
- Detector; intrusion alarm; metallic window foil; test method; window foil; alarm; burglar alarm; *SP480-34*.
- Detector efficiency calibration; gamma-ray measurement; data analysis; *17718*.
- Detector physics; radiometric applications; silicon detector physics; *17608*.
- Detector radiometry; detector spectral comparator; detector spectral response; filter transmittance test; photodetector; photometer; radiometer; spectral responsivity; detector; *TN988*.
- Detector responsivity; electro-optic modulator; high accuracy radiometer; silicon detector; temperature controlled silicon cell; *17527*.
- Detector responsivity measurement; interlaboratory photodetector measurement comparison; laser power measurement; photodetectors; radiant power measurement; radiometric instrument characterization; radiometric measurement accuracy; *17638*.
- Detector sensitivity; detector testers; light obscuration; particle size distribution; polydisperse aerosol; smoke detector; aerosol generators; *NBSIR 78-1430*.
- Detector spectral comparator; detector spectral response; filter transmittance test; photodetector; photometer; radiometer; spectral responsivity; detector; detector radiometry; *TN988*.
- Detector spectral response; filter transmittance test; photodetector; photometer; radiometer; spectral responsivity; detector; detector radiometry; detector spectral comparator; *TN988*.
- Detector testers; fire detectors; ionization detectors; light-scattering detectors; particle size distribution; smoke; smoke detectors; aerosol generators; *TN973*.
- Detector testers; light obscuration; particle size distribution; polydisperse aerosol; smoke detector; aerosol generators; detector sensitivity; *NBSIR 78-1430*.
- Detectors; electrical measurements; Hall measurements; optical measurements; semiconductors; silicon; *18259*.
- Detectors; errors; microanalysis; standard materials; background; data evaluation; *18024*.
- Detectors; frequency response; helium-neon lasers; lasers; mode beating; spectral modes; axial modes; *17939*.
- Detectors; Josephson effect; low-noise and broadband communications; millimeter and submillimeter receivers; mixers; radiometry; thermography; amplifiers; closed cycle refrigerators; *SP508*, pp. 159-165 (Apr. 1978).
- Deterioration; diffusion; enhanced diffusion; impurity reactions; laser window; precipitate; clusters; *SP509*, pp. 24-35 (Dec. 1977).
- Determinant; invariants; matrices; multilinear function; rank; spectrum; *18030*.
- Deterministic intensity function; historical data; maximum values; random characteristics; seismic zoning; spectral shapes; theoretical analysis; design earthquake; *SP523*, pp. IV-78—IV-95 (Sept. 1978).
- Deuterated isobutyric acid + heavy water; isobutyric acid + water; liquid density; liquid-liquid critical point; magnetic densimeter; coexistence curve; consolute point; critical exponent; critical phenomena; *17449*.
- Deuterated poly- α -methylstyrene; molecular weight; poly- α -methylstyrene; pyrolysis; termination; transfer; zip length; degradation; *J. Res.* **83**, No. 4, 371-380 (1978).
- Deuteride; hydride; neutron diffraction; octahedral sites; tetrahedral sites; titanium; *17692*.
- Deuterium; dust clouds; emission lines; formyl ion; radio astronomy; chemical fractionation; *17719*.
- Deuterium; hydrocarbon; hydrogen; isotope dilution; microwave plasma detector; *17969*.
- Deuterium; interstellar, abundances; interstellar, matter; ultraviolet, spectra; *18250*.
- Deuterium; irradiance; lamp; radiance; radiometry; source; spectroscopy; standard; ultraviolet; calibration; *17606*.
- Deuterium peroxide; force model; group theory; lattice dynamics; neutron scattering; phonon; *17927*.
- Deuterium-titanium bond; neutron powder diffraction; profile analysis; rule of reversed stability; structure determination; titanium-copper deuteride; *18303*.
- Developing countries; economic projections; long range; planning models; social services; demographic projections; *SP503*, pp. 421-425 (Mar. 1978).
- Developing countries; engineering standards; industrialization; Latin America; National Bureau of Standards (NBS); quality control; standards; surveys; U.N. Conference on Science and Technology for Development; workshops; Africa; *SP507*.
- Developing countries; instrumentation; measurement; procurement; purchasing; technical specifications; *NBSIR 78-891*.
- Developing countries; technology transfer; windloads; buildings; design criteria; *SP523*, pp. VIII-42—VIII-46 (Sept. 1978).
- Developing economies; foreign relations; industrializing nations; international relations; LDC's; measurement services; standardization; AID; assistance; *NBSIR 77-1385*.
- Development; documentation; implementation; maintenance; package design; reliability; reporting errors; statistical package; STATJOB; testing; *SP503*, pp. 211-214 (Mar. 1978).
- Development assistance; industrialization; industry survey; Korea south; metrology; questionnaire; standards institute; survey; *NBSIR 77-1382*.
- Development of models; mathematical models; operations research; prediction models; problem oriented languages; simulation theory; systems research; testing of models; *18317*.
- Development of submarine equipment; earthquake prediction; ocean-bottom seismograph; cables; *SP523*, pp. III-30—III-43 (Sept. 1978).
- Device identification; distributed processing; identification; personal identification; security; surveillance; auditing; authorization; computer security; cryptography; *SP500-33*.
- Device independence; graphics; graphic software; portability; *SP503*, pp. 101-106 (Mar. 1978).
- Device measurements; laser scanning; light-biasing; metallization; ohmic contacts; reliability; semiconductor measurement; sheet resistance; solar cells; solar cell stability; *NBSIR 78-1488*.
- Device measurements; laser scanning; light-biasing; metallization; ohmic contacts; reliability; semiconductor measurements; sheet resistance; solar cells; solar cell stability; *NBSIR 78-1513*.

- Dew-point sensing; dragging-stylus probe; electrical properties; electronics; four-probe method; hermeticity; hole mobility; infrared reflectance; ion implantation; ion microprobe mass analysis; line-width measurements; nuclear-track technique; *SP400-36*.
- DF; electric breakdown; HF; laser damage; quartz; sapphire; spinel; ZnSe; alkali-halides; alkaline earth fluorides; As_2S_3 ; *SP509*, pp. 118-125 (Dec. 1977).
- Diagnosis of bias; reporting of results; systematic; chemical analysis; chemical measurement process; detectability; *17508*.
- Diagnostic tests; experimental error; linear regression; precision; tolerance intervals; accuracy; confidence intervals; control chart; *17591*.
- Diagnostics; distribution; installation parameters; load modules; maintenance; portability; versions; dated software; *SP503*, pp. 215-220 (Mar. 1978).
- Diagnostics; influence; leverage; nonlinear; regression; robust; sensitivity analysis; convergence; covariance; *SP503*, pp. 77-86 (Mar. 1978).
- Diagnostics; program specifications; program testing; program verification; structured programming; correctness proof; *18266*.
- Dialogue; human factors engineering; interactive statistical computer graphics; *SP503*, pp. 117-121 (Mar. 1978).
- Diamond; index of diamond; pressure variation; refractive index; refractive index of diamond; *17936*.
- Diamond anvil cell; high pressure; polytetrafluoroethylene; Raman spectroscopy; TFE-HFP copolymer; crystallinity; *18207*.
- Diamond cell; electrical resistance measurements; fixed points; high pressure; ruby pressure scale; semiconductor; *17797*.
- Diamond cell; glass transition; high pressure; hydrostaticity; liquids; viscosity; *18085*.
- Dianions; dicyanomethylene; esters; planar; salts; structure; bond-delocalized; croconates; derivatives; *17864*.
- Diatomic lithium; ejected-electron spectroscopy; photoabsorption spectroscopy; autoionization; configuration interaction calculations; core-excited molecular states; *17766*.
- Dicalcium phosphate dihydrate; fluorapatite; topical fluoride; acidulated phosphate fluoride; calcium fluoride; *17501*.
- Dicyanomethylene; esters; planar; salts; structure; bond-delocalized; croconates; derivatives; dianions; *17864*.
- Dielectric; piezoelectric; plasma; polarization; poling; poly(vinylidene fluoride); pyroelectric; *17589*.
- Dielectric breakdown voltages; dielectric withstand voltage tests; residential wiring; surge voltages; *NBSIR 78-1537*.
- Dielectric coated mirror; infrared laser windows; laser mirrors; pulsed CO_2 laser damage; reflectance; $10.6 \mu m$ optical components; absorptance; *SP509*, pp. 183-194 (Dec. 1977).
- Dielectric coatings; thin films; zinc selenide; absorption; *SP509*, pp. 276-280 (Dec. 1977).
- Dielectric constant; dielectric relaxation time; electric birefringence; electric dichroism; intrinsic viscosity; light scattering; polymerization; poly(n-alkyl isocyanate); rodlike molecule; conformational energy calculations; degradation; *17661*.
- Dielectric constant; energy; microwave measurement; non-destructive testing; thickness of coal layer; automation; coal; coal mine safety; *18180*.
- Dielectric constant; mean field approximation; proton ordered state; pseudo spin; sublattice; cluster variation technique; cumulant expansion; *17679*.
- Dielectric enhanced mirrors; reflectance; absorptance; cleaning procedures; coating materials; deposition parameters; *SP509*, pp. 385-398 (Dec. 1977).
- Dielectric enhanced reflectors; laser mirror coatings; stress cycling of coatings; thin films; coating stress; deformable mirrors; *SP509*, pp. 358-361 (Dec. 1977).
- Dielectric films; electric fields; laser damage; nonlinear absorption; optical coatings; antireflection coatings; *SP509*, pp. 251-254 (Dec. 1977).
- Dielectric measurements; dielectric relaxation time; time-domain; transmission lines; *17884*.
- Dielectric measurements; electrical measurements; electrical properties of materials; precise measurements; 2-terminal; 3-terminal; *17890*.
- Dielectric relaxation time; electric birefringence; electric dichroism; intrinsic viscosity; light scattering; polymerization; poly(n-alkyl isocyanate); rodlike molecule; conformational energy calculations; degradation; dielectric constant; *17661*.
- Dielectric relaxation time; time-domain; transmission lines; dielectric measurements; *17884*.
- Dielectric spectroscopy; homomorphic transformation; modeling of sampling gates; signal processing; time domain measurements; time domain reflectometry; antenna scattering; deconvolution; *NBSIR 78-881*.
- Dielectric withstand voltage tests; residential wiring; surge voltages; dielectric breakdown voltages; *NBSIR 78-1537*.
- Dielectric-enhanced mirrors; large-spot laser damage; pulsed DF laser damage; substrate dependence; spot size dependence; surface plasmas; damage thresholds; *SP509*, pp. 325-341 (Dec. 1977).
- Dielectrics; free carrier; laser damage; lifetime; multiphoton; ultraviolet; window materials; *SP509*, pp. 481-487 (Dec. 1977).
- Diesel engines; exhaust emissions; MIUS; total energy systems; *NBS-GCR-77-104*.
- Differential cross sections; elastic scattering; sodium; *18314*.
- Differential equations; mathematical software; nonlinear oscillations; analytical solutions; *J. Res.* **83**, No. 6, 593-601 (1978).
- Differential optical gain; optical bistability; Pockels cell; polarizer; power limiting; ultralinear modulator; *18276*.
- Differential scanning calorimetry; differential thermal analysis; nonisothermal kinetics; polymers; review; stability; thermogravimetry; aging; degradation; *17525*.
- Differential thermal analysis; nonisothermal kinetics; polymers; review; stability; thermogravimetry; aging; degradation; differential scanning calorimetry; *17525*.
- Differential thermoanalysis; survey method for traces of chrysotile; chrysotile asbestos; *17566*.
- Diffraction; direct-methods; explosives; single-crystal; x rays; bicyclononane system; *17699*.
- Diffraction; isotopes; molecular dynamics; neutron; neutron radiography; nondestructive evaluation; nuclear reactor; radiation; activation analysis; crystal structure; *TN969*.
- Diffraction; lithium location; lithium tantalate; neutron; powder sample; profile analysis; *17688*.
- Diffraction; neutron scattering; phase transition; soft mode; antiferroelectric; cyanides; *17390*.
- Diffraction geometry; diffractometer; flat cone; neutron diffraction; position sensitive detector; x-ray diffraction; *18251*.
- Diffractometer; flat cone; neutron diffraction; position sensitive detector; x-ray diffraction; diffraction geometry; *18251*.
- Diffractometer; neutron activation analysis; SRM; surface science; weights and measures; x-ray powder diffraction; *DIM/NBS 62*, No. 11, 1-24, (1978).
- Diffuse sound field; reverberation room; reverberation time; spatial variance; analysis of variance; decaying sound fields; *18079*.
- Diffused layer; line width; process control; sheet resistance; sheet resistor; silicon; test pattern; test structure; van der Pauw structure; bridge structure; cross-bridge structure; cross structure; *17800*.
- Diffused layer; process control; sheet resistance; sheet resistor; silicon; test pattern; test structure; van der Pauw structure; cross structure; *17801*.
- Diffusion; electromigration; grain boundaries; molten metals; monograph; review; surfaces; thermomigration; alloys; copper; critical analyses; data; *17493*.

- Diffusion; enhanced diffusion; impurity reactions; laser window; precipitate; clusters; deterioration; *SP509*, pp. 24-35 (Dec. 1977).
- Diffusion; food additives; indirect additives; migration; models; regulation; additives; *NBSIR 78-1499*.
- Diffusion; galvanostatic charging; hydrogen; mathematical model; palladium; single and multiple charging transients; ambient-temperature; 18082.
- Diffusion; metallization; oxidation; photolithography; silicon; transistors; *SP400-53*.
- Diffusion approximation; extent of cilium; polymer chains; random flight chains; adsorption; constrained Hollingsworth radius; 18211.
- Diffusion constants; Henry's law constants; poly(vinyl chloride); sorption; vinyl chloride; desorption; 17371.
- Diffusion in glass; fracture; glass; lattice trapping; mechanisms of fracture; plastic deformation of glass; reaction rate theory; subcritical crack growth; tunnelling; 17468.
- Difluorocarbene; direct isotope specific synthesis; isotope enrichment; laser induced chemical reactions; olefins; TE laser; 17763.
- Digital communication; electrical communication; local digital communication; multidrop; optical communication; packet communication; 17494.
- Digital data; NIRA programs; Photonuclear Data Center; central computer; chaining programs; data evaluation; demand terminal; 17536.
- Digital demodulator; frequency-lock servo; frequency standard; precision oscillator; acceleration insensitive oscillator; ammonia microwave absorption; atomic clock; 17992.
- Digital electronics; gravitational studies; high-Q cavities; infrared detectors; magnetometers; magnets; microwave detectors; space; superconductivity; computers; *NBSIR 78-885*.
- Digital periodic integrator; electron microscope; homogeneity; standard reference materials; standards; 17869.
- Digital plotting; plotting; type fonts; type setting; vectorized characters; alphabets; COM; computer graphics; computerized typesetting; *SP500-32*.
- Digital-cosine; information resources; insulation; ion metal; metric; standard reference data; computers; *DIM/NBS 62*, No. 10, 1-32 (1978).
- Digitization; high frequencies; low frequencies; accelerograms; *SP523*, pp. IV-20—IV-27 (Sept. 1978).
- Dilute polymer solutions; limiting viscosity number; Mandelkern-Flory-Scheraga equation; molecular weight determination; sedimentation coefficient; translational diffusion coefficient; Zimm theory; bead-spring model; block copolymers; 17929.
- Dimension; logarithm; neper; radian; SI; supplementary; units; base; decibel; derived; 17401.
- Dimensional coordination in building; international standards for building; metrication; preferred dimensions and sizes; *SP504*.
- Dimensional inspection; flying-spot scanner; microdensitometer; optical overlay; photomask; spatial filtering; TV-microscope; visual defect inspection; alignment tolerance; automated photomask inspection; *SP400-46*.
- Dimensional measurement; electron microscope; integrated circuit; linespacing; linewidth; metrology; microelectronics; optical microscope; photomask; precision; principles of measurement; accuracy; 17415.
- Dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; integrated circuits; linewidths; microelectronics; optical microscopes; calibration standards; closed-circuit TV systems; 17669.
- Dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; integrated circuits; linewidths; microelectronics; optical microscopes; calibration standards; closed-circuit TV systems; 17851.
- Dimensional relationships; environmental design; safety; stairs; user needs; architectural design; design considerations; *NBSIR 78-1554*.
- Dimer; enthalpy; entropy; equilibrium constant of formation; ethanoic (acetic) acid; Gibbs energy of formation; heat capacity; ideal gas thermodynamic properties; internal rotational barrier height; methanoic (formic) acid; *JPCRD 7*, No. 1, 363-378 (1978).
- Dimer and trimer formation; fluorescence bands; kinetic rates; mercury vapor; optical pumping; decay measurements; 17925.
- Dimers; discharge; f-values; mercury; oscillator strengths; radiation probabilities; spectra; transition probabilities; 17460.
- Dimethyl sulfide; ozone; rate constant; air pollution; chemical kinetics; 17832.
- Dimethylaminogluthethimide; dimethylaminophenylacetic acid and esters; properties of composites; tertiary aromatic amines; amine accelerators; composite restorative resins; 18157.
- Dimethylaminophenylacetic acid and esters; properties of composites; tertiary aromatic amines; amine accelerators; composite restorative resins; dimethylaminogluthethimide; 18157.
- Dimethyldisulfide; infrared spectrum; matrix isolation; pyrolysis; s-trithiane; thioformaldehyde; ultraviolet photolysis; vacuum ultraviolet photolysis; CH₃SH; CH₃S; 17725.
- Dimpled rupture; ductile failure; embrittlement; impact energy; plastic failure; secondary hardening; strain aging; temper embrittlement; carbon-manganese steel; 17974.
- Diocetylphthalate aerosol; Doppler shift spectrometer; heterodyne laser light scattering; light scattering; Mie scattering; particle size; size distribution of particles; Stokes law velocity; aerosols; calibration of instruments; 17499.
- Diophantine equation; Dirichlet; Pell equation; 17754.
- Dioxirane; microwave spectra; olefins; ozone reactions; rotational constants; spectra; chemistry; 17378.
- Diphenyl hydantoin assay; enzyme-multiplied immunoassay technique carbamazepine assay; phenobarbital assay; primidone assay; antiepileptic drug assays; 18108.
- Dipolar; NMR; polyethylene; structure; ¹³C; 17674.
- Dipole moment; ethyl hypochlorite; hyperfine structure; microwave spectrum; molecules; rotational spectra; 17622.
- Dipole moments; hyperfine structure; internuclear distance; microwave spectra; rotational constants; rotational spectral lines; triatomic molecules; *JPCRD 7*, No. 4, 1445-1750 (1978).
- Dipole resonance; electron scattering; energy weighted sum rule; enriched gas target; giant resonance; Neon 20; quadrupole resonance; 17624.
- Dipoles; piezoelectric; polarization; polymer; polyvinylidene fluoride; pyroelectric; space charge; 18239.
- Dipoles; piezoelectric; polarization; polymer; polyvinylidene fluoride; pyroelectric; space charge; 18240.
- Direct electron bombardment; L_γ valence-band spectrum; tellurium metal; x-ray emission spectrum; 18099.
- Direct imaging; electronic radiography; ionography process; neutron radiographs; radiography; thermal neutrons; 18208.
- Direct isotope specific synthesis; isotope enrichment; laser induced chemical reactions; olefins; TE laser; difluorocarbene; 17763.
- Direct satellite communication; disaster warning; statistical analysis; statistics; ultra-high frequency; building attenuation; 17780.
- Directional siren; loudspeaker array; phased array; siren; sound; warning device; acoustics; broadside array; *SP480-28*.
- Direct-methods; explosives; single-crystal; x rays; bicyclononane system; diffraction; 17699.
- Dirichlet; Pell equation; diophantine equation; 17754.
- Disaster; earthquake hazards; earthquakes; ground failures; seismicity; solids; standards; structural engineering; structural

- responses; wind loads; winds; accelerograph; codes; design criteria; *SP523*.
- Disaster mitigation; earthquakes; engineering; standards; building; building codes; building design; *SP510*.
- Disaster mitigation; earthquakes; engineering; implementation; standards; assessment; building codes; building design; *NBSIR 78-1549*.
- Disaster mitigation; probability theory; ratio of razed houses; wooden houses; damages of structure by earthquake; *SP523*, pp. VII-1—VII-15 (Sept. 1978).
- Disaster warning; statistical analysis; statistics; ultra-high frequency; building attenuation; direct satellite communication; *17780*.
- Disasters; economics; legal approach; regulatory process; violations; building official; building regulations; code enforcement; construction; court decisions; *SP518*, pp. 381-390 (Aug. 1978).
- Disc analysis; error analysis; floating-point arithmetic; inner products; interval analysis; polynomial evaluation; relative error; rounding error; software; chopping; *17815*.
- Discharge; f-values; mercury; oscillator strengths; radiation probabilities; spectra; transition probabilities; dimers; *17460*.
- Discharge; sodium; xenon; *18124*.
- Discharges; ionization; laser; neon; opto-galvanic; collision; *17946*.
- Disclination; dislocation; distortion; dynamics; elasticity; Green's tensor; incompatibility; loop; plasticity; strain; Volterra; Burgers vector; compatibility; continuum mechanics; defect; *17435*.
- Discomfort, wind; France; translations; wind discomfort; wind flow around buildings; air flow; CSTB; *TN710-9*.
- Discounted cash flow; financial analysis; product durability; product life; tax effects; *SP514*, pp. 12-18 (May 1978).
- Discounted payback period; economic analysis; economic evaluation; energy conservation; life-cycle costing; present value analysis; building; construction cost estimation; *NBSIR 78-1568*.
- Discrete; forbidden; intensity; lifetime; line strength; oscillator strength; transition probability; allowed; atomic; *SP505*.
- Discrete Markov models; manpower planning models; simple Markov models; data analysis; *NBSIR 78-1458*.
- Discrete part batch manufacturing; dynamic measurement; numerically controlled machine tools; productivity; automation; computer control; *18063*.
- Discrete part batch manufacturing; integrated manufacturing systems; productivity; shipbuilding; automation; computer aided manufacturing; *18060*.
- Discriminant analysis; evaluation of statistical software; canonical variate analysis; classification analysis; *SP503*, pp. 389-394 (Mar. 1978).
- Dishwasher; freezer; kitchen range; refrigerator; service-life expectancy; television set; washing machine; actuarial table; clothes dryer; consumer appliance retention; *SP514*, pp. 131-138 (May 1978).
- Disks; laser; uncoated optics; Argus; coated optics; damage; *SP509*, pp. 440-454 (Dec. 1977).
- Dislocation; distortion; dynamics; elasticity; Green's tensor; incompatibility; loop; plasticity; strain; Volterra; Burgers vector; compatibility; continuum mechanics; defect; disclination; *17435*.
- Dislocation density; magnetic domains; x-ray dynamical diffraction; anomalous transmission; asymmetric crystal topography; crystal growth; crystal perfection; Czochralski growth; *17732*.
- Dislocations; heat transfer; helium 3; helium 4; impurities; Kapitza resistance; annealing; copper; cryogenics; *17917*.
- Dislocations; laser-induced stress; melt threshold; Mo mirrors; plasma scrubbing; plasma shielding; slip; surface preparation; Ti-6Al-4V; Al 7050; crystalline disorder; Cu mirrors; *SP509*, pp. 204-214 (Dec. 1977).
- Dislocations; nondestructive evaluation; spectra; acoustic emission; *17768*.
- Disordered chain; glass; heat capacity; one-dimension; thermodynamic bounds; thermodynamics; thermodynamics of disordered systems; *J. Res.* 83, No. 3, 283-295 (1978).
- Dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; photoelasticity; piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; *17354*.
- Dispersion; refractive index; temperature coefficient of refractive index; zinc sulfide; *SP509*, pp. 83-88 (Dec. 1977).
- Dispersion staining; membrane filter; optical microscope; phase contrast; airborne fiber; asbestos; bulk samples; *SP506*, pp. 431-439 (Nov. 1978).
- Dispersion staining; microscopy; amphiboles; asbestos; *SP506*, pp. 235-247 (Nov. 1978).
- Displacement meter; dynamic behavior of tunnel; power spectrum; strain meter; submerged tunnel; accelerometer; axial force; bar stress transducer; bending moment; *SP523*, pp. V-69—V-79 (Sept. 1978).
- Displacer; refrigerators; shuttle heat experimental data; shuttle heat transfer; thermal penetration; *SP508*, pp. 67-73 (Apr. 1978).
- Displays; graphics; independence; interactive; language; portability; software; standards; terminal; application; computer; *SP503*, pp. 107-116 (Mar. 1978).
- Dissemination; frequency standard; time standard; cost-benefit; cost-effectiveness; *NBSIR 78-874*.
- Dissemination; exposure calibration; ionization chamber; primary standard; unit; absorbed dose; absorbed-dose calibration; calorimeter; *17440*.
- Dissemination; gamma-ray calibration; measurement assurance; medical dosimetry; radiation dosimetry; radiation standards; x-ray calibration; brachytherapy sources; calibration; *18199*.
- Dissemination; information needs; residential construction; solar energy; space heating; technology; building regulations; data collection; demonstration program; *SP518*, pp. 1-8 (Aug. 1978).
- Dissemination; ionizing radiation; measurement assurance; National Measurement System; standards; users of radiation; *NBSIR 75-946*.
- Dissipation; energy approach; fatigue; hysteresis loop; irreversible thermodynamics; low-cycle fatigue; mathematical modeling; multi-axial fatigue; polymethyl-methacrylate; stainless steel; viscoplasticity; creep-fatigue interaction; *17424*.
- Dissociation; electron impact; NH_4^+ -ammonium; recombination; trapped ions; cross sections; *17806*.
- Dissociation; harmonic generation; ionization; laser bandwidth; multiphoton absorption; multiphoton dynamics; nonresonant processes; n-photon Bloch equations; pole approximation; 3-photon Bloch equations; ac Stark shift; adiabatic approximation; *17750*.
- Dissociative attachment; drift tube-mass spectrometer; Cl^-HCl cluster ions; *17995*.
- Dissolution; isotopic analysis; plutonium assay; quality assurance programs; thorium assay; uranium assay; automation; chemical analysis; chemical separations; *SP528*, pp. 1-18 (Nov. 1978).
- Distortion; dynamics; elasticity; Green's tensor; incompatibility; loop; plasticity; strain; Volterra; Burgers vector; compatibility; continuum mechanics; defect; disclination; dislocation; *17435*.
- Distributed cracks; distributed dislocations; fatigue; fracture; microstructural analysis; multi-axial analysis; nondestructive evaluation; reliability analysis; safety factors; statistical modeling; stochastic theory of fracture; computer simulation; *17528*.

- Distributed dislocations; fatigue; fracture; microstructural analysis; multi-axial analysis; nondestructive evaluation; reliability analysis; safety factors; statistical modeling; stochastic theory of fracture; computer simulation; distributed cracks; 17528.
- Distributed processing; identification; personal identification; security; surveillance; auditing; authorization; computer security; cryptography; device identification; SP500-33.
- Distributed processing; intelligent terminal; statistical data systems; data base dictionary; data editing; data entry; data independence; data management; SP503, pp. 367-372 (Mar. 1978).
- Distributed Ramsey cavity phase shift; frequency drift; frequency stability degradation; long-term frequency instabilities; microwave power; cavity phase shift; cesium atom; cesium beam velocity distribution; cesium standards; detector; 17985.
- Distribution; installation parameters; load modules; maintenance; portability; versions; dated software; diagnostics; SP503, pp. 215-220 (Mar. 1978).
- Distribution analysis; graphical analysis; in control; measurement process; predictability; probability plots; randomness; statistics; testing assumptions; 4-plot analysis; assumptions; data analysis; 17935.
- Distribution models; pressures; sea surface; stationary typhoon; SP523, pp. 1-1—I-9 (Sept. 1978).
- Distribution patterns; drops (liquid); drop size; fire models; fire plumes; sensitivity analysis; spray; sprinkler heads; vaporizing; NBS-GCR-78-121.
- Distribution patterns; flow rate; mapping; spray patterns; sprinkler heads; sprinkler systems; superposition; collection arrays; density; NBS-GCR-77-105.
- Distributions; extremes; interactive graphic program; Monte Carlo technique; simulation; transformations; SP503, pp. 292-296 (Mar. 1978).
- Disturbed layer; pH; pK; smear layer; solubility; surface; toxicity; acid; adhesion; buffer; dental materials; dentin; 18272.
- Divergent series; limits; summability; transforms; convergence; counterexamples; 18121.
- DNO; force constants; HNO; infrared spectrum; matrix isolation; NOCl; reaction of H with NO; vacuum-ultraviolet photolysis; 17556.
- Documentation; implementation; maintenance; package design; reliability; reporting errors; statistical package; STATJOB; testing; development; SP503, pp. 211-214 (Mar. 1978).
- Documentation standardization; Economic Commission for Europe; export documents; import documents; legal questions; National Committee on International Trade Documentation (NCITD); Office of Facilitation; NBSIR 78-1446, pp. 91-95 (Apr. 1978).
- Dollar flow; economics; input/output; interindustry; replacement; resources; transactions; capital; corrosion costs; SP511-2.
- Domain effects; dysprosium; magnetism; magnetostriction; rare earths; anisotropy; 17745.
- Dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; states-transition; system's approach; "and" gate; behavior; critical events; decision; decision tree; NBSIR 77-1273.
- Dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; state's-transition; system; systems approach; "and" gate; behavior; critical events; decision; decision tree; 17967.
- Dominating set; facility location; graph; k -basis; tree; computational complexity; 18031.
- Donor-acceptor complex; electron spin resonance; low dimensional materials; tetrahydrotetrafulvalene; tetrathiafulvalene; charge transfer complex; chlorocuprates; coordination compounds; 18282.
- Dopant density; microelectronics; MOS capacitors; n - p - n transistor fabrication; p - n junctions; resistivity; semiconductor electronics; sheet resistors; silicon; test pattern; test structures; SP400-32.
- Dopant density; nuclear track technique; resistivity; silicon; alpha track; boron; 17825.
- Doppler broadening; laser bandwidth effects; multiphoton absorption; multiphoton resonance; two-level model; 18243.
- Doppler effect; phonon exchange; temperature dependence; capture; 17487.
- Doppler interferometry; laser absorption uniformity; automated calorimetry; calorimetry; SP509, pp. 62-73 (Dec. 1977).
- Doppler narrowing; Doppler shifts; frequency standards; high-resolution spectroscopy; ion storage; laser spectroscopy; Penning trap; radiation pressure; atomic spectroscopy; 18148.
- Doppler shift; envelope deflection; frequency standards; accuracy; beam tuber; cavity phase error; 17938.
- Doppler shift spectrometer; heterodyne laser light scattering; light scattering; Mie scattering; particle size; size distribution of particles; Stokes law velocity; aerosols; calibration of instruments; dioctylphthalate aerosol; 17499.
- Doppler shift spectroscopy; microfibers; microRaman spectrometer; Mie scattering; Raman spectroscopy; sulfate in particulates; aerosol size distribution; 17404.
- Doppler shifts; frequency standards; high-resolution spectroscopy; ion storage; laser spectroscopy; Penning trap; radiation pressure; atomic spectroscopy; Doppler narrowing; 18148.
- Dormant storage; layaway; magnetic tape; reactivation; readiness; reliability; sensors; simulation; standby; automatic control systems; SP522.
- Dose calibrator measurement errors; quality control of radioactive material; radioactive tracer; radioactivity, tracer; administered tracer; 17662.
- Dose distributions; dosimetry; electron beams; nylon; plastic tubing; polyethylene; polymer improvement; polyvinylchloride; radiation processing; wire insulation; absorbed dose; cross linking; 17451.
- Dose interpretation; mailings; survey; teletherapy; thermoluminescence dosimeters; water phantom; absorbed dose; cobalt-60 gamma radiation; computation check; TN978.
- Dosimetry; electron beams; nylon; plastic tubing; polyethylene; polymer improvement; polyvinylchloride; radiation processing; wire insulation; absorbed dose; cross linking; dose distributions; 17451.
- Double exponential population; joint density of sample mean and variance; nonnormality; robustness; t -statistic density; 17604.
- Double groups; group theory; Hamilton's rotations; icosahedral group; octahedral group; rotation algebra; spinors; two-level system; 17651.
- Double stars; dynamical parallax; Hertzsprung-Russell Diagram; historical review; H. N. Russell; masses of stars; moon's position; solar composition; solar spectra; atomic spectroscopy; 17689.
- Double vacancy states; Hartree-Fock calculation; monolithic double crystal spectrometer; relative strengths; x-ray emission; Cu $K\alpha_{1,2}$; 17665.
- Double-wall oxidation tube; dry oxidation; mobile-ion contamination; MOS device processing; MOS devices; oxidation ambient control; oxide growth; semiconductor device processing; silicon dioxide; thermal silicon dioxide films; NBSIR 77-1404.
- Downlink carrier-to-noise density ratio (C/kT); earth-terminal gain-to-noise-temperature ratio (G/T); error analysis; refraction angle; satellite communications; satellite effective isotropic radiated power (EIRP); transmission coefficient; atmosphere; NBSIR 78-883.

- Drafts; general average; inventory records; letters of credit; Shipper's Export Declaration; trade data; trade documents; bill of lading; CARDIS; commercial invoice; computerized international documentation system; data; *NBSIR 78-1446*, pp. 135-137 (Apr. 1978).
- Dragging-stylus probe; electrical properties; electronics; four-probe method; hermeticity; hole mobility; infrared reflectance; ion implantation; ion microprobe mass analysis; line-width measurements; nuclear-track technique; particle-impact noise detection; *SP400-36*.
- Draperies; flammable fabrics; full-scale fires; curtains; *NBSIR 78-1448*.
- DRDS; functional requirements; hierarchy of functions; records management; Data Resource Directory System; data resource management; *NBSIR 78-1446*, pp. 71-89 (Apr. 1978).
- Dressed atom; fluorescence spectrum; Heisenberg equations; laser excitation; Liouvillian; multiphoton; polarization; resonance fluorescence; spontaneous emission; strong field; *17840*.
- Drift tube-mass spectrometer; Cl⁻-HCl cluster ions; dissociative attachment; *17995*.
- Drill bit; drill press; dynamic; force; load; machine tool; measurement; on-line; tool wear; torque; transducer; cutting force; *NBSIR 78-1423*.
- Drill press; dynamic; force; load; machine tool; measurement; on-line; tool wear; torque; transducer; cutting force; drill bit; *NBSIR 78-1423*.
- Drop size; fire models; fire plumes; sensitivity analysis; spray; sprinkler heads; vaporizing; distribution patterns; drops (liquid); *NBS-GCR-78-121*.
- Drops (liquid); drop size; fire models; fire plumes; sensitivity analysis; spray; sprinkler heads; vaporizing; distribution patterns; *NBS-GCR-78-121*.
- Dry oxidation; mobile-ion contamination; MOS device processing; MOS devices; oxidation ambient control; oxide growth; semiconductor device processing; silicon dioxide; thermal silicon dioxide films; double-wall oxidation tube; *NBSIR 77-1404*.
- Ductile and brittle fracture; fracture; hydrogen embrittlement; plastic zone of fracture; *17824*.
- Ductile cast-iron; statistical analysis; underground; carbon steel; corrosion; *17790*.
- Ductile failure; embrittlement; impact energy; plastic failure; secondary hardening; strain aging; temper embrittlement; carbon-manganese steel; dimpled rupture; *17974*.
- Ductile fracture; ductile to brittle fracture; fracture; atomic aspects of fracture; brittle fracture; crack growth; *18012*.
- Ductile to brittle fracture; fracture; atomic aspects of fracture; brittle fracture; crack growth; ductile fracture; *18012*.
- Ductility; earthquake response; empirical formula; hysteretic structures; inelastic response spectra; *SP523*, pp. VI-1—VI-14 (Sept. 1978).
- Duplex receptacles; electrical connections; power loss; temperatures; thermocouples; wire; branch circuits; *NBSIR 77-1380*.
- Duplication study; Federal Information Locator System; Federal Reports Act; information directory; information processing standards; *NBSIR 78-1446*, pp. 97-112 (Apr. 1978).
- Durability; durability technology; materials conservation; product life; product performance; product testing; wear analysis; design quality; *SP514*.
- Durability; labeling products; Performance Life Disclosure Act; congressional action; consumer product testing; *SP514*, pp. 19-28 (May 1978).
- Durability; product lifetime; second-hand markets; small household electrical appliances; solid waste management; waste reduction; consumers; *SP514*, pp. 82-89 (May 1978).
- Durability; rubber seals; solar energy systems; standards; test methods; *18102*.
- Durability; testing; consumer product life; *SP514*, pp. 54-65 (May 1978).
- Durability technology; materials conservation; product life; product performance; product testing; wear analysis; design quality; durability; *SP514*.
- Durability/reliability; fire safety; rating criteria; solar collectors; structural performance; testing procedures; thermal performance; *NBSIR 78-1305A*.
- Duration of sustained maximum biting force; hardness of enamel; occlusal area; bite opening; biting force; biting strength; cusps; dentitions; *NBSIR 78-1452*.
- Dust; fiber; metal and nonmetal mines; optical microscopy; phase contrast; asbestos; *SP506*, pp. 423-429 (Nov. 1978).
- Dust clouds; emission lines; formyl ion; radio astronomy; chemical fractionation; deuterium; *17719*.
- Dust levels; grunerite; health risk; Homestake Mines, S.D.; hornblende; Hunting Hill Quarry, Rockville, Md.; lung cancer; mesothelioma; serpentinite, surface chemistry; talc-bole; Thetford Mines, Quebec, Canada; *SP506*, pp. 49-70 (Nov. 1978).
- Dusts; environment; fibers; morphology; serpentine; structure; amphibole; asbestos; chemistry; cleavage; defects; *SP506*, pp. 35-48 (Nov. 1978).
- Dyadic Green's function; electromagnetic theory; principal values; source region; *TN1000*.
- Dye laser; xenon-ion laser; *17998*.
- Dye laser spectroscopy; rubidium atoms; two-photon spectroscopy; wavelength reference; *18260*.
- Dynamic; fatigue; fracture; grain-size; Krebs-Ringer solution; microstructure; alumina; biaxial tension; bioceramics; bovine serum; *17421*.
- Dynamic; force; load; machine tool; measurement; on-line; tool wear; torque; transducer; cutting force; drill bit; drill press; *NBSIR 78-1423*.
- Dynamic; force; load; machine tool; measurement; review; tool wear; torque; adaptive control; bibliography; control; cutting force; *NBSIR 78-1424*.
- Dynamic analysis; earthquakes; dams; *SP523*, pp. V-1—V-13 (Sept. 1978).
- Dynamic behavior of tunnel; power spectrum; strain meter; submerged tunnel; accelerometer; axial force; bar stress transducer; bending moment; displacement meter; *SP523*, pp. V-69—V-79 (Sept. 1978).
- Dynamic conduction heat transfer; heat transfer; thermal response factor; verification; *NBSIR 77-1405*.
- Dynamic headspace sampling; gas chromatography; liquid chromatography; mass spectrometry; petroleum analysis; weathering factor; *17876*.
- Dynamic heat transfer; energy analysis; heating and cooling loads; heat loss and heat gain; multi-room problems; air leakage; *18070*.
- Dynamic loads; dynamic response; structural engineering; tall buildings; wind pressure; wind tunnel tests; aerodynamics; *17941*.
- Dynamic materials accounting; in-line analysis; nuclear fuel reprocessing; nuclear safeguards; *SP528*, pp. 208-220 (Nov. 1978).
- Dynamic measurement; inspection; measurement science; quality control; automatic inspection; automation; *18062*.
- Dynamic measurement; noise spectrum; piezoelectric polymers; pyroelectric polymers; sensors; sound measurement; transducers; *17792*.
- Dynamic measurement; numerically controlled machine tools; productivity; automation; computer control; discrete part batch manufacturing; *18063*.
- Dynamic programming; economic analysis; energy conservation; equipment maintenance; Markov decision process; policy improvement algorithm; *17814*.
- Dynamic response; gust factors; structural engineering; wind loads; building codes; buildings; deflections; *17365*.

Dynamic response; gust loads; structural engineering; tall buildings; wind forces; wind pressure; buildings (codes); 17767.

Dynamic response; structural engineering; tall buildings; wind pressure; wind tunnel tests; aerodynamics; dynamic loads; 17941.

Dynamic triaxial tests; liquefaction; model tests; pile foundations; sand; shake table; standard penetration test; bridge foundations; *SP523*, pp. IV-115—IV-157 (Sept. 1978).

Dynamic water pressure; shaking table; underground pipes; vibration experiments; *SP523*, pp. V-53—V-68 (Sept. 1978).

Dynamical parallax; Hertzsprung-Russell Diagram; historical review; H. N. Russell; masses of stars; moon's position; solar composition; solar spectra; atomic spectroscopy; double stars; 17689.

Dynamics; elasticity; Green's tensor; incompatibility; loop; plasticity; strain; Volterra; Burgers vector; compatibility; continuum mechanics; defect; disclination; dislocation; distortion; 17435.

Dynamics; hydrides; metals; neutron scattering; phonons; coherent; 18253.

Dysprosium; magnetism; magnetostriction; rare earths; anisotropy; domain effects; 17745.

E

Early-type stars; stellar winds; 18308.

Earth structure; earthwork manual; fill slope; priority; retaining wall; seismic forces; culverts; design principle; *SP523*, pp. V-45—V-52 (Sept. 1978).

Earth terminal; effective isotropic radiated power; figure of merit; measurement procedure; noise temperature; satellite communication; *NBSIR 78-879*.

Earth terminal measurement system; effective isotropic radiated power; figure of merit; noise temperature; satellite communication; *NBSIR 78-895*.

Earthquake; hospitals; standards; aseismic design; building service systems; codes; *TN970*.

Earthquake; retrofit decision; bridges; *SP523*, pp. VIII-1—VIII-21 (Sept. 1978).

Earthquake danger; Gumbel's theory of extremes, literature review; regional seismic coefficient map; statistical analysis; *SP523*, pp. V-14—V-44 (Sept. 1978).

Earthquake hazards; earthquakes; ground failures; seismicity; solids; standards; structural engineering; structural responses; wind loads; winds; accelerograph; codes; design criteria; disaster; *SP523*.

Earthquake, in-situ velocity measurement; S-wave; vertical distribution of seismic wave; deep borehole; *SP523*, pp. III-44—III-54 (Sept. 1978).

Earthquake insurance; earthquake losses; intensity-loss relationships; loss simulation; *SP523*, pp. VII-16—VII-28 (Sept. 1978).

Earthquake losses; intensity-loss relationships; loss simulation; earthquake insurance; *SP523*, pp. VII-16—VII-28 (Sept. 1978).

Earthquake magnitude; epicentral distance; statistical analysis; strong-motion acceleration records; design; *SP523*, pp. IV-48—IV-77 (Sept. 1978).

Earthquake prediction; Japan National Program; present state; *SP523*, pp. III-1—III-19 (Sept. 1978).

Earthquake prediction; ocean-bottom seismograph; cables; development of submarine equipment; *SP523*, pp. III-30—III-43 (Sept. 1978).

Earthquake prediction; research on active fault; detection of active faults; *SP523*, pp. III-55—III-62 (Sept. 1978).

Earthquake records; ground conditions; ground transfer functions; shear wave; analytical method; base-rock; bridge foundations; deconvolution procedure; *SP523*, pp. IV-158—IV-179 (Sept. 1978).

Earthquake resistant code; expected seismic force; object postulate; reliability theory; social utility; acceptable level of human risk; construction costs; *SP523*, pp. V-102—V-116 (Sept. 1978).

Earthquake resistant design; flexural-shear model; high-rise buildings; histogram for building uses; shear model; building height limitation; building volume limitation; *SP523*, pp. VI-15—VI-24 (Sept. 1978).

Earthquake response; empirical formula; hysteretic structures; inelastic response spectra; ductility; *SP523*, pp. VI-1—VI-14 (Sept. 1978).

Earthquakes; dams; dynamic analysis; *SP523*, pp. V-1—V-13 (Sept. 1978).

Earthquakes; engineering; implementation; standards; assessment; building codes; building design; disaster mitigation; *NBSIR 78-1549*.

Earthquakes; engineering; standards; building; building codes; building design; disaster mitigation; *SP510*.

Earthquakes; ground failures; seismicity; solids; standards; structural engineering; structural responses; wind loads; winds; accelerograph; codes; design criteria; disaster; earthquake hazards; *SP523*.

Earthquakes; structural engineering; building codes; 17505.

Earth's magnetic micropulsation field; geophysical measurements; remnant magnetization of rock; SQUID's; cryogenic techniques; *SP508*, pp. 205-206 (Apr. 1978).

Earth-terminal gain-to-noise-temperature ratio (G/T); error analysis; refraction angle; satellite communications; satellite effective isotropic radiated power (EIRP); transmission coefficient; atmosphere; downlink carrier-to-noise density ratio (C/kT); *NBSIR 78-883*.

Earthwork manual; fill slope; priority; retaining wall; seismic forces; culverts; design principle; earth structure; *SP523*, pp. V-45—V-52 (Sept. 1978).

Ease of removal; graffiti; graffiti-resistant coatings; performance; color retention; *NBSIR 75-789*.

Economic; research designs; surveys; typewriters; automatic typewriters; cost-effective; 17571.

Economic analysis; economic evaluation; energy conservation; life-cycle costing; present value analysis; building; construction cost estimation; discounted payback period; *NBSIR 78-1568*.

Economic analysis; economics of safety; electric shock; ground fault circuit interrupters; benefit-cost analysis; benefit-risk analysis; building codes and standards; building regulations; building safety; *NBSIR 78-1528*.

Economic analysis; energy conservation; engineering economics; investment analysis; life-cycle cost analysis; building economics; *BSS113*.

Economic analysis; energy conservation; engineering economics; housing; insulation; life-cycle cost analysis; building economics; 17574.

Economic analysis; energy conservation; equipment maintenance; Markov decision process; policy improvement algorithm; dynamic programming; 17814.

Economic Commission for Europe; export documents; import documents; legal questions; National Committee on International Trade Documentation (NCITD); Office of Facilitation; United Nations; *NBSIR 78-1446*, pp. 91-95 (Apr. 1978).

Economic effects; I/O Model; metallic corrosion; Battelle Columbus Labs; corrosion; cost of corrosion; *SP511-1*.

Economic efficiency; economics; energy; energy conservation; life-cycle cost; optimization; performance standards; resource impact factors; resources; social optimum; standards; building economics; *BSS114*.

Economic evaluation; energy conservation; exterior walls; life-cycle costing; windows; buildings costs; 17942.

- Economic evaluation; energy conservation; life-cycle costing; present value analysis; building; construction cost estimation; discounted payback period; economic analysis; *NBSIR 78-1568*.
- Economic impact; energy; energy problems; information gathering; oil embargo; *NBSIR 78-1446*, pp. 1-5 (Apr. 1978).
- Economic impacts; environmental considerations; innovative practices; regulatory research; standards development; administrative procedures; building codes; building regulations; buildings; *SP518*.
- Economic projections; long range; planning models; social services; demographic projections; developing countries; *SP503*, pp. 421-425 (Mar. 1978).
- Economics; electrical quantities; ionizing radiation; mechanical quantities; national measurement system; optical quantities; surface properties; thermal quantities; time and frequency; acoustics; atomic properties; *NBSIR 75-947 (Revised December 1977)*.
- Economics; energy; energy conservation; life-cycle cost; optimization; performance standards; resource impact factors; resources; social optimum; standards; building economics; economic efficiency; *BSS114*.
- Economics; formulation; innovation; market aggregation; performance requirements; prescriptive standards; standards development; *SP518*, pp. 161-164 (Aug. 1978).
- Economics; housing; lead-based paint; lead poisoning; abatement; building materials; cost; *17500*.
- Economics; input/output; interindustry; replacement; resources; transactions; capital; corrosion costs; dollar flow; *SP511-2*.
- Economics; interactive systems; performance evaluation; analysis; cost-benefit; cost-effectiveness; *17360*.
- Economics; legal approach; regulatory process; violations; building official; building regulations; code enforcement; construction; court decisions; disasters; *SP518*, pp. 381-390 (Aug. 1978).
- Economics of measurement; electrical quantities; electromagnetic quantities; ionizing radiation; measurement needs; measurement system structure; mechanical quantities; National Measurement System; optical quantities; thermal quantities; time and frequency; *NBSIR 75-925*.
- Economics of metric conversion; harmonization; management of change; metrication; metric familiarization; rationalization; SI; standardization; transitional period; *SP530*.
- Economics of safety; electric shock; ground fault circuit interrupters; benefit-cost analysis; benefit-risk analysis; building codes and standards; building regulations; building safety; economic analysis; *NBSIR 78-1528*.
- Eddy currents; index; National Bureau of Standards; non-destructive evaluation; publications; radiography; ultrasonics; acoustic emission; bibliography; *NBSIR 78-1557*.
- Eddy currents; magnetic particles; microwaves; nondestructive testing; penetrants; radiography; standards; thermal; ultrasonics; visual; wear debris; acoustic emission; *17933*.
- Edge; force; injury; pig skin; plastic; velocity; cut; *NBSIR 78-1493*.
- Edge objects; microdensitometry; photographic edges; photographic process; densitometry; *NBSIR 76-1129*.
- Education; electronic devices; enforcement; Grain Standards Act; International Organization of Legal Metrology; labeling insulation and polyethylene products; metrication; model laws and regulations; national type approval; specifications and tolerances; *SP517*.
- Education; engineering; programming methods; software engineering; software reliability; software requirements; *17794*.
- Education and training; energy conservation; enforcement; legislation; promulgation; regulation; standards; built environment; *SP518*, pp. 17-24 (Aug. 1978).
- Education for metric; laws and regulations; metrication; metric system; National Conference on Weights and Measures; weights and measures; *17756*.
- Education level; energy conservation; evaluations; upgrading, certification; building code official; buildings; *SP518*, pp. 9-15 (Aug. 1978).
- EDXA; fibers; food; parenteral drugs; SEM; asbestos; cosmetic talc; *SP506*, pp. 441-449 (Nov. 1978).
- Effect of imperfections; high purity platinum; high temperature thermoelectric measurements; low temperature thermoelectric measurements; platinum; Pt 67; residual resistivity ratio; standard reference material; temperature coefficient of resistors; thermocouple; *SP260-56*.
- Effective incoherence; image scanning; microdensitometry; optical linearity; overfilled optics; sample scanning; underfilled optics; coherence theory; *17456*.
- Effective isotropic radiated power; figure of merit; measurement procedure; noise temperature; satellite communication; earth terminal; *NBSIR 78-879*.
- Effective isotropic radiated power; figure of merit, noise temperature; satellite communication; earth terminal measurement system; *NBSIR 78-895*.
- Effective length; FFT; moment method; resistively loaded antenna; TEM horn; time domain measurement; transient response; conical antenna; *18288*.
- Effective "U" values; energy conservation; implementation; professional competence; training program; building code; code officials; *SP518*, pp. 313-322 (Aug. 1978).
- Effectiveness; graffiti; graffiti removers; materials; paint; removal; remover-substrate compatibility; spray paints; substrate; *NBSIR 75-914*.
- Efficiency; heat transfer; helium; pressure measurement; refrigeration; stability; superconducting magnets; transient heat transfer; *NBSIR 78-877*.
- Efficiency; international comparisons; neutron detectors; neutron flux; calibration standards; *J. Res.* **83**, No. 6, 555-561 (1978).
- Efficiency factor for absorption; electric multipole; internal fields; magnetic multipole; Mie scattering theory; Raman scattering; resonances; small particles; complex refractive index; *18280*.
- Efficiency of detectors; gamma-ray detectors; Ge(Li) detectors; geometry of counting; semiconductor detectors; accuracy and precision; *17737*.
- Effluents; measurement; monitoring; SRM's; water pollution; *17676*.
- Egress; emergencies; fires; human behavior; human performance; life safety; panic; decision making; *NBS-GCR-78-120*.
- Eigenvalues; parabolic cylinder functions; resonance; rotating disks; singular perturbations; turning-point; viscous flow; Weber's equation; boundary-value problem; *17816*.
- Eigenvalues; positive definite; set product; accretive; *17846*.
- EIRP; error analysis; G/T; precision measurements; radio star; satellite communications; C/kT; *17894*.
- EIRP; G/T; metrology for satellite communications; antenna gain; antenna measurements; antenna pattern; antenna sidelobes; *NBSIR 78-886*.
- Ejected-electron spectroscopy; photoabsorption spectroscopy; autoionization; configuration interaction calculations; core-excited molecular states; diatomic lithium; *17766*.
- Elapsed time; metering; system performance; tuning programs; variations in CPU charges; varying workloads; accounting/computer charges; CPU time; *SP500-41*, pp. 243-253 (Oct. 1978).
- Elastic; electrical and magnetic; fatigue and fracture; low-temperature; specific heat; superconducting machinery; tensile; thermal and magnetothermal conductivity; thermal expansion; *17419*.
- Elastic constant; hydrogen; lattice modes; PdD_{0.83}; alloy; Debye temperature; *17399*.
- Elastic constant; KCN; lattice dynamics; neutron scattering; phase transition; reorientation; *17765*.

- Elastic constants; niobium-titanium; Poisson's ratio; shear modulus; Young's modulus; bulk modulus; composite; compressibility; copper; cryogenic temperatures; 17919.
- Elastic moduli; longitudinal acoustic modes; normal mode calculation; perfluoro n-alkanes; polytetrafluoroethylene-hexafluoropropylene copolymer; Raman spectroscopy; conformation in melt; 17383.
- Elastic moduli; pressure derivatives; pulse superposition technique; temperature derivatives; Born model; calcium oxide; 17703.
- Elastic scattering; energy transfer; excited states; hydrogen atoms; hydrogen molecules; H₂; inelastic collisions; long-range forces; potential energy surfaces; semiempirical valence-bond theory; transport properties; ab initio quantum chemistry; 17358.
- Elastic scattering; sodium; differential cross sections; 18314.
- Elasticity; elasticity of transit demand; pricing; transit planning; transit pricing; *NBSIR 78-1462*.
- Elasticity; Green's tensor; incompatibility; loop; plasticity; strain; Volterra; Burgers vector; compatibility; continuum mechanics; defect; disclination; dislocation; distortion; dynamics; 17435.
- Elasticity of transit demand; pricing; transit planning; transit pricing; elasticity; *NBSIR 78-1462*.
- Elastomeric; materials; membranes; performance factors; review; roofing; application guidelines; *TN972*.
- Elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; piezo-optic; strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; 18275.
- Elasto-optic; figure of merit; germanium; photoelasticity; piezobirefringence; piezo-optic; pressure; refractive index; stress; acoustic-optic; birefringence; 17706.
- Elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; photoelasticity; piezobirefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; dispersion; 17354.
- Election administration; public administration; state and local government; systems analysis; technology utilization; vote-tallying; computer security; computing technology; *SP500-30*.
- Electret; piezoelectric; polarization; polymer; polyvinylidene fluoride; pyroelectric; 17893.
- Electric birefringence; electric dichroism; intrinsic viscosity; light scattering; polymerization; poly(n-alkyl isocyanate); rodlike molecule; conformational energy calculations; degradation; dielectric constant; dielectric relaxation time; 17661.
- Electric breakdown; HF; laser damage; quartz; sapphire; spinel; ZnSe; alkali-halides; alkaline earth fluorides; As₂S₃; DF; *SP509*, pp. 118-125 (Dec. 1977).
- Electric clothes dryer; frequency of failure; life cycle costing; repair cost analysis; *SP514*, 139-155 (May 1978).
- Electric dichroism; intrinsic viscosity; light scattering; polymerization; poly(n-alkyl isocyanate); rodlike molecule; conformational energy calculations; degradation; dielectric constant; dielectric relaxation time; electric birefringence; 17661.
- Electric dipole moment; fluorocarbon destruction of stratospheric ozone; microwave spectrum; structure; atmospheric pollution; chemistry of the atmosphere; chlorine nitrate; 17621.
- Electric field; Kerr effect; liquid insulants; nitrobenzene; space charge; transformer oil; treeing; water; electrical breakdown; 18209.
- Electric field measurement; low frequency; miniature electric field probe; nonuniform field; biological experiments; calibrations; 17975.
- Electric field measurements; instrumentation; magnetic field measurements; measurement procedures; power transmission lines; calibration procedures; 18072.
- Electric field strength; electric power transmission; field strength; magnetic fields; calibration; calibrators; electric fields; 17420.
- Electric fields; electric field strength; electric power transmission; field strength; magnetic fields; calibration; calibrators; 17420.
- Electric fields; electric power transmission; electro-optics; Faraday effect; high voltage measurement; impulse measurement; Kerr effect; magnetic fields; magneto-optics; Pockels effect; waveform measurements; current measurement; 17868.
- Electric fields; laser damage; nonlinear absorption; optical coatings; antireflection coatings; dielectric films; *SP509*, pp. 251-254 (Dec. 1977).
- Electric fields; laser damage; non-quarter-wave designs; picosecond pulses; standing waves; thin films; damage thresholds; *SP509*, pp. 260-270 (Dec. 1977).
- Electric multipole; internal fields; magnetic multipole; Mie scattering theory; Raman scattering; resonances; small particles; complex refractive index; efficiency factor for absorption; 18280.
- Electric power transmission; electro-optics; Faraday effect; high voltage measurement; impulse measurement; Kerr effect; magnetic fields; magneto-optics; Pockels effect; waveform measurements; current measurement; electric fields; 17868.
- Electric power transmission; field strength; magnetic fields; calibration; calibrators; electric fields; electric field strength; 17420.
- Electric shock; ground fault circuit interrupters; benefit-cost analysis; benefit-risk analysis; building codes and standards; building regulations; building safety; economic analysis; economics of safety; *NBSIR 78-1528*.
- Electrical; measurements; metrology; optical; pulse; waveform signal; 18184.
- Electrical; measurements; optical; picosecond techniques; pulse; 17914.
- Electrical and magnetic; fatigue and fracture; low-temperature; specific heat; superconducting machinery; tensile; thermal and magnetothermal conductivity; thermal expansion; elastic; 17419.
- Electrical breakdown; electric field; Kerr effect; liquid insulants; nitrobenzene; space charge; transformer oil; treeing; water; 18209.
- Electrical codes; fire endurance; fire tests; PVC; smoke; walls; wiring; branch circuits; *NBSIR 78-1415*.
- Electrical communication; local digital communication; multiplex; optical communication; packet communication; digital communication; 17494.
- Electrical conductivity; microchemical; microstructural; yttria; ceramics; 17517.
- Electrical connections; power loss; temperatures; thermocouples; wire; branch circuits; duplex receptacles; *NBSIR 77-1380*.
- Electrical fires; heat generation in receptacles; insulated buildings; overheating conductors; residential branch circuit wiring; thermal insulation and electrical wiring; branch circuit wiring; *NBSIR 78-1477*.
- Electrical measurements; electrical properties of materials; precise measurements; 2-terminal; 3-terminal; dielectric measurements; 17890.
- Electrical measurements; energy; hourly solar radiation; ionizing radiation; ion-molecule reactions; metric; molecular structure; perspectives on NBS; solar energy; SRM's; CIPM report; *DIM/NBS 62*, No. 1, 1-32 (1978).
- Electrical measurements; Hall measurements; optical measurements; semiconductors; silicon; detectors; 18259.

- Electrical polarization; electrocaloric refrigeration; refrigeration; temperature range 4-20 K; theoretical models; *SP508*, pp. 93-97 (Apr. 1978).
- Electrical properties; electronics; four-probe method; hermeticity; hole mobility; infrared reflectance; ion implantation; ion microprobe mass analysis; line-width measurements; nuclear-track technique; particle-impact noise detection; photolithography; photovoltaic method; *SP400-36*.
- Electrical properties of materials; precise measurements; 2-terminal; 3-terminal; dielectric measurements; electrical measurements; *17890*.
- Electrical property; impurity; oxidation; resistance ratio; resistivity; copper; *17821*.
- Electrical quantities; electromagnetic quantities; ionizing radiation; measurement needs; measurement system structure; mechanical quantities; National Measurement System; optical quantities; thermal quantities; time and frequency; acoustics; *NBSIR 75-925*.
- Electrical quantities; ionizing radiation; mechanical quantities; national measurement system; optical quantities; surface properties; thermal quantities; time and frequency; acoustics; atomic properties; economics; *NBSIR 75-947 (Revised December 1977)*.
- Electrical resistance measurements; fixed points; high pressure; ruby pressure scale; semiconductor; diamond cell; *17797*.
- Electrical resistivity; electron-phonon interaction; low temperature properties; specific heat; superconductivity; Ti_3P compounds; *17782*.
- Electrical resistivity; emittance; heat capacity; high-speed measurements; high temperature; titanium; *17450*.
- Electrical resistivity; high-speed measurements; high temperature; solid-solid phase transformation; thermodynamics; titanium; transformation energy; transformation temperature; *J. Res.* **83**, No. 2, 127-132 (1978).
- Electrical resistivity; metals; recommended values; thermal conductivity; thermoelectric power; conductivity; critical evaluation; data analysis; data compilation; data synthesis; *JPCRD 7*, No. 3, 959-1178 (1978).
- Electrical usage; government contractor's report; information sources; nonindustrial; abstracts; annotated compilation; *NBS-GCR-78-130*.
- Electrically calibrated detector; optical radiation measurements; primary standards; standard source; *17534*.
- Electrically calibrated detectors; laser power measurements; pyroelectric detectors; radiometry; silicon cell; silicon detector; silicon photodetector; absolute radiometry; detector; *17535*.
- Electrically calibrated laser meter; intercomparison of laser meters; laser beam calorimeter; laser beam overspill monitor; laser beam power and energy measurement; laser calorimeter backscatter monitor; water-stirred calorimeter; CW high energy laser; *17891*.
- Electrically calibrated radiometer; gold-black, pyroelectric detector; *17877*.
- Electrocaloric refrigeration; refrigeration; temperature range 4-20 K; theoretical models; electrical polarization; *SP508*, pp. 93-97 (Apr. 1978).
- Electrocatalysis; electrochemical measurements; fuel cells; phosphoric acid; polarization; refractory hard metals; sodium beta alumina; solid electrolytes; cerium dioxide; *NBSIR 78-1472*.
- Electrochemical measurements; fuel cells; phosphoric acid; polarization; refractory hard metals; sodium beta alumina; solid electrolytes; cerium dioxide; electrocatalysis; *NBSIR 78-1472*.
- Electrochemical measurements; microcomputer; microprocessor; potentiostat; control; converter (digital and analog); *J. Res.* **83**, No. 5, 429-443 (1978).
- Electrode materials; materials characterization; MHD (magnetohydrodynamics); U.S.-U.S.S.R. program; 100 endurance test; *17464*.
- Electrodeposited metal layers; gold-nickel layers; micrometer scale; scanning electron microscope scale; *U.S. Patent 4,068,381*.
- Electrolyte; excess Gibbs energy; osmotic coefficients; solutions; thermodynamic properties; activity coefficient; alkaline earth metal halides; critical evaluation; *JPCRD 7*, No. 1, 263-310 (1978).
- Electrolyte thermodynamics; thermochemistry of biochemicals; aqueous electrolytes, thermochemistry of; biothermodynamics; data compilations for biological thermodynamics; *17478*.
- Electrolytes; equilibrium constants; free energy; Gibbs energy; ionic; solutions; thermodynamic properties; activities; alkaline earth salts; aqueous; critical evaluation; *17772*.
- Electrolytes; flame atomic emission spectroscopy; reference method; semiautomated pipetting; serum sodium analysis; clinical analysis; clinical chemistry; definitive method; *SP260-60*.
- Electromagnetic compatibility; field strength measurements; mobile communication systems; vehicular electronic systems; biological hazard; *17356*.
- Electromagnetic field intensity; field strength measurement; radar; rf probe; antenna; calibration; *17813*.
- Electromagnetic field strength measurement; fiber optics; light-coupled antenna-receiver; light emitting diodes; *U.S. Patent 4,091,327*.
- Electromagnetic fields; field measurement; multi-component fields; multi-path propagation; radio holography; standing wave patterns; *18097*.
- Electromagnetic interference; fire behavior; flow measurement; metric; radar; spectroscopy; time; universe; Congress; *DIM/NBS 62*, No. 5, 1-28 (1978).
- Electromagnetic interference; firing ranges; flow measurement; fluorescence; laser-raman; measurements; metric myth; metric speakers; oxygen; phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; *DIM/NBS 62*, No. 3, 1-28 (1978).
- Electromagnetic interference; high voltage; impulse; pulse measurement; step response; cavity resonance; *18162*.
- Electromagnetic interference measurements; shielded enclosure; transverse electromagnetic transmission cell; *17361*.
- Electromagnetic properties; future needs; glass; molecular engineering; processing strength; research opportunities; ceramics; *17779*.
- Electromagnetic quantities; ionizing radiation; measurement needs; measurement system structure; mechanical quantities; National Measurement System; optical quantities; thermal quantities; time and frequency; acoustics; economics of measurement; *NBSIR 75-925*.
- Electromagnetic theory; principal values; source region; dyadic Green's function; *TNI000*.
- Electromigration; grain boundaries; molten metals; monograph; review; surfaces; thermomigration; alloys; copper; critical analyses; data; diffusion; *17493*.
- Electron; electron photon showers; energy deposition; Monte Carlo method; photon; straggling; transport theory; *NBSIR 78-1534*.
- Electron; energy-loss spectra; ethane; ethylene; isobutane; isobutylene; propane; propylene; 1-butene; 1,3-butadiene; acetylene; butane; *17620*.
- Electron; excitation; helium; lifetimes; optical; radiation; *18196*.
- Electron; gases; magnetohydrodynamics; conductivity; cross sections; *17463*.
- Electron beam induced currents; metal-oxide-silicon capacitor; oxidation-induced stacking faults; scanning electron microscope; *18123*.

- Electron beam microprobe; lithium-drifted silicon detector; scanning electron microscope; simplex; x-ray spectrometry; curve fitting; 18040.
- Electron beam recording; kinescope recording; laser scanning; magnetic tape; midfield splice; motion picture film; rapid pulldown; video tape; archival storage; *SP480-31*.
- Electron beams; insulators; ion beams; phosphors; surface conductivity; surfaces; visual images; charge storage; 17522.
- Electron beams; insulators; ion beams; phosphors; surfaces; visual images; 17707.
- Electron beams; ion beams; laser-Raman spectroscopy; microanalysis; microprobes; x-ray spectrometry; 18023.
- Electron beams; nylon; plastic tubing; polyethylene; polymer improvement; polyvinylchloride; radiation processing; wire insulation; absorbed dose; cross linking; dose distributions; dosimetry; 17451.
- Electron capture; excited argon atom reactions; exciton diffusion; HCClF_2 ; HCClF_2^- ; HCF_2^- ; infrared spectrum; matrix isolation; molecular structure; ultraviolet spectrum; vacuum ultraviolet photolysis; chemiionization; 17726.
- Electron capture; HCClF anion; HCCl_2F ; hydrogen bonding; infrared spectrum; matrix isolation; ultraviolet spectrum; vacuum ultraviolet photolysis; argon metastables; CCl_2 ; $(\text{CCl}_2)\text{HF}$ anion; 17727.
- Electron channeling; metals; plastic deformation; surfaces; wear; copper; 17465.
- Electron channelling; erosive wear; scanning electron microscopy; solid particle impact; transmission electron microscopy; 310 stainless steel; 17467.
- Electron collisions; potassium; rubidium; alkalis; cesium; 17447.
- Electron configurations; ionization potentials; lanthanides; rare earths; spectra; Zeeman effect; atomic energy levels; atomic spectroscopy; *NSRDS-NBS60*.
- Electron diffraction; electron microscopy; fibers; transmission electron microscopy; x-ray energy analysis; amphibole; analysis; asbestos; *SP506*, pp. 271-280 (Nov. 1978).
- Electron diffraction; energy-dispersive x-ray spectroscopy; mineral microfibers; scanning electron microscopy; selected-area electron diffraction; transmission electron microscopy; amphibole asbestos; asbestos; chrysotile; *SP506*, pp. 221-233 (Nov. 1978).
- Electron diffraction; fibrous; grunerite; mineral identification; nonfibrous; amosite; amphibole; asbestos; *SP506*, pp. 387-402 (Nov. 1978).
- Electron diffraction; mineral fibers; transmission electron microscope; x-ray spectroscopy; carbon contamination; *SP506*, pp. 249-269 (Nov. 1978).
- Electron energy loss; mercury vapor; oscillator strengths; photoabsorption; 18143.
- Electron energy loss; oscillator strengths; photoabsorption; water; 18139.
- Electron excitations; monoenergetic x rays; pulsed x-ray source; x-ray detector calibration; 1.5-8 keV x rays; absolute x-ray detector; 17771.
- Electron impact; excitation cross sections; Li^+ ; positive ion; 18252.
- Electron impact; excitation ($2s-2p$); absolute cross sections; C^{3+} ; crossed beams; 17366.

- Enforcement; inspection; legislation; manufactured building; rules and regulations; standards; building regulation; construction; *NBSIR 78-1503*.
- Enforcement; insulation; regulations; standards; State legislation; thermal efficiency; buildings; counties; energy conservation; *SP518*, pp. 323-358 (Aug. 1978).
- Enforcement; legislation; promulgation; regulation; standards; built environment; education and training; energy conservation; *SP518*, pp. 17-24 (Aug. 1978).
- Engine-driven heat pump; heat engine; heat pump; residential heating; Stirling engine; Stirling engine heat pump; air-to-air heat pump; energy conservation heating; 18098.
- Engineering; implementation; standards; assessment; building codes; building design; disaster mitigation; earthquakes; *NBSIR 78-1549*.
- Engineering; programming methods; software engineering; software reliability; software requirements; education; 17794.
- Engineering; standards; building; building codes; building design; disaster mitigation; earthquakes; *SP510*.
- Engineering economics; housing; insulation; life-cycle cost analysis; building economics; economic analysis; energy conservation; 17574.
- Engineering economics; investment analysis; life-cycle cost analysis; building economics; economic analysis; energy conservation; *BSS113*.
- Engineering psychology; ergonomics; human engineering; human factors; human performance; product safety; standard reference data; anthropometry; consumer product technology; *NBSIR 77-1403*.
- Engineering standards; industrialization; Latin America; National Bureau of Standards (NBS); quality control; standards; surveys; U.N. Conference on Science and Technology for Development; workshops; Africa; *SP507*.
- Engineering standards; information center; scientific and technical information; standardization; 17616.
- Enhanced diffusion; impurity reactions; laser window; precipitate; clusters; deterioration; diffusion; *SP509*, pp. 24-35 (Dec. 1977).

- Enriched gas target; giant resonance; Neon 20; quadrupole resonance; dipole resonance; electron scattering; energy weighted sum rule; 17624.
- Enriched uranium; neutron interrogation; nondestructive assay; U-235; Cf-252; delayed neutrons; *SP528*, pp. 41-48 (Nov. 1978).
- Enriched ^{36}Ar target; measured $\sigma(E, \theta)$; nuclear reactions $^{36,40}\text{Ar}(e, e')$, $E = 65$ to 115 MeV; 17523.
- Enthalpy; entropy; equation of state; oxygen; property computer program; PVT; saturation properties; specific heat; density; *NBSIR 78-882*.
- Enthalpy; entropy; equilibrium constant of formation; ethanoic (acetic) acid; Gibbs energy of formation; heat capacity; ideal gas thermodynamic properties; internal rotational barrier height; methanoic (formic) acid; *JPCRD 7*, No. 1, 363-378 (1978).
- Enthalpy; entropy; gas oligomers; Gibbs energy; ion fragmentation; molybdenum pentafluoride; saturated vapor; thermodynamic properties; vapor association; 17395.
- Enthalpy; entropy; oxygen; properties of fluids; specific heat; velocity of sound; density; 18255.
- Enthalpy, entropy; equilibrium constant of formation; free energy of formation; Gibbs energy function; heat capacity; heat of formation; thermochemical tables; critically evaluated data; *JPCRD 7*, No. 3, 793-940 (1978).
- Enthalpy of solution; nucleic acid bases; thermochemistry; thymine; 5-methyl-uracil; 5-methyl-2,4 (1H, 3H)-pyrimidinedione; calorimetry; density; *J. Res.* **83**, No. 6, 529-537 (1978).
- Entire functions; linear differential equations; bounded index; C^r -valued functions; *J. Res.* **83**, No. 1, 75-80 (1978).
- Entropy; equation of state; oxygen; property computer program; PVT; saturation properties; specific heat; density; enthalpy; *NBSIR 78-882*.
- Entropy; equilibrium constant; heat of formation; ion cyclotron resonance; proton transfer; t-alkyl ions; t-butyl ion; alkene; 17695.
- Entropy; equilibrium constant of formation; ethanoic (acetic) acid; Gibbs energy of formation; heat capacity; ideal gas thermodynamic properties; internal rotational barrier height; methanoic (formic) acid; monomer; *JPCRD 7*, No. 1, 363-378 (1978).
- Entropy; ferroelectrics; pyroelectrics; thermodynamics; cryogenics; 17820.
- Entropy; gas oligomers; Gibbs energy; ion fragmentation; molybdenum pentafluoride; saturated vapor; thermodynamic properties; vapor association; enthalpy; 17395.
- Entropy; hydride; PdD_{0.63}; site occupation; thermodynamics; acoustic modes; 17853.
- Entropy; ion cyclotron resonance; ionization potentials; aromatic compounds; charge transfer equilibria; 17734.
- Entropy; oxygen; properties of fluids; specific heat; velocity of sound; density; enthalpy; 18255.
- Entropy measure; system organization; computer system performance; *SP500-41*, pp. 259-262 (Oct. 1978).
- Entropy systems; gas-liquid-solid systems; refrigeration cycles; refrigeration systems; thermodynamic fundamentals; available entropy; *SP508*, pp. 7-43 (Apr. 1978).
- Entropy theory of glasses; glasses; kinetics of glasses; order parameters; 17515.
- Envelope deflection; frequency standards; accuracy; beam tuber; cavity phase error; Doppler shift; 17938.
- Environment; fibers; morphology; serpentine; structure; amphibole; asbestos; chemistry; cleavage; defects; dusts; *SP506*, pp. 35-48 (Nov. 1978).
- Environmental carbon; laser effects; microanalysis; Raman microprobe; Raman spectroscopy; air particulates; 18135.
- Environmental conditions; freshwater systems; hydrolysis; organic compounds; rate constants; acid; base; *JPCRD 7*, No. 2, 383-416 (1978).
- Environmental conditions; noise measurement; noise (sound); transportation noise; truck; acoustics; 17558.
- Environmental considerations; innovative practices; regulatory research; standards development; administrative procedures; building codes; building regulations; buildings; economic impacts; *SP518*.
- Environmental data; environmental surveys; mercury; toxic materials; cadmium; computer techniques for environmental data; *NBSIR 78-1428*.
- Environmental design; lighting levels; standards; artificial illumination; buildings; criteria; energy conservation; energy consumption; *SP518*, pp. 77-94 (Aug. 1978).
- Environmental design; safety; stairs; user needs; architectural design; design considerations; dimensional relationships; *NBSIR 78-1554*.
- Environmental factors; home safety; occupant behavior; survey technique; accidents; architectural psychology; consumer products; *BSS108*.
- Environmental impact; tire durability; appliance durability; *SP514*, pp. 156-161 (May 1978).
- Environmental materials, isotope dilution; lead; mass spectrometry; zinc; biological materials; cadmium; 18192.
- Environmental noise; noise; noise control; sound; transportation system noise; acoustics; architectural acoustics; building acoustics; *BSS84*.
- Environmental pollutants; water; analytical chemistry; asbestos; *SP506*, pp. 365-372 (Nov. 1978).
- Environmental psychology; fire escape; fire safety; human research; research design; architectural psychology; *NBSIR 78-1508*.
- Environmental samples; fly ash; urban particulate; borate fusion; energy-dispersive x-ray spectrometry; 18109.
- Environmental samples; microanalysis; particles; Raman; air pollution; analytical spectroscopy; 17667.
- Environmental sampling; intercalibration; petroleum hydrocarbons; water pollution; 17964.
- Environmental surveys; mercury; toxic materials; cadmium; computer techniques for environmental data; environmental data; *NBSIR 78-1428*.
- Enzyme-multiplied immunoassay technique carbamazepine assay; phenobarbital assay; primidone assay; antiepileptic drug assays; diphenyl hydantoin assay; 18108.
- Ephemeris Time; International Atomic Time (TAI); legal time; standard time; time; Consultative Committee for the Definition of the Second (CCDS); Coordinated Universal Time; 17453.
- Epicentral distance; statistical analysis; strong-motion acceleration records; design; earthquake magnitude; *SP523*, pp. IV-48-IV-77 (Sept. 1978).
- Epidemiology; fibers; asbestos; bowel cancer; cancer; *SP506*, pp. 153-158 (Nov. 1978).
- Epidemiology; fibers; mesothelioma; occupational exposure; asbestos; cancer; *SP506*, pp. 71-93 (Nov. 1978).
- Epidemiology; fine particles; mesothelioma; asbestos; asbestosis; carcinoma; *SP506*, pp. 121-131 (Nov. 1978).
- Episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; states-transition; system's approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; *NBSIR 77-1273*.
- Episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; state's-transition; system; systems approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; 17967.
- Epitaxial growth; Hall measurements; indium-doped silicon; p-n junction isolation; two-layer structures; *NBSIR 78-1553*.
- Epoxy matrix; expansivity; glass fiber; graphite fibers; mechanical properties; aluminum matrix; boron fiber; composites; cryogenics; 17429.

- Epoxy resin; *N*-methyl-*p*-toluidine; *N*-phenylglycine; pit and fissure sealants; polymerization; accelerator; adhesion; amines; anionic catalyst; chelation; composite resins; cyanoacrylates; 17394.
- Equation of state; ethane; fluids; orthobaric densities; specific heats; vapor pressures; coexistence boundary; critical point; 17458.
- Equation of state; ethylene; internal energy; saturated vapor densities; thermodynamic properties; vapor pressures; *J. Res.* 83, No. 4, 325-327 (1978).
- Equation of state; fluid mixtures; fluids; lattice gas; scaling laws; universality; correlation function; correlation length; critical phenomena; 17664.
- Equation of state; free energy; isotropic-nematic transition; Onsager model; orientational distribution function; bifurcation; 17908.
- Equation of state; gas; liquid; phase equilibria; thermodynamic properties; ammonia; correlation; *JPCRD* 7, No. 3, 635-792 (1978).
- Equation of state; hard spheres model; liquefied natural gas; magnetic suspension densimeter; measurements; mixture data; pure fluid data; saturated liquid; cell model; corresponding states model; custody transfer; density; 17867.
- Equation of state; internal energy; steam; thermodynamic potential; critical phenomena; critical-point universality; 17480.
- Equation of state; liquid metal; Monte Carlo; potassium; pseudopotential; sodium; 17911.
- Equation of state; LNG; mixtures; PVTx; computer program; density; *NBSIR* 77-867.
- Equation of state; oxygen; property computer program; PVT; saturation properties; specific heat; density; enthalpy; entropy; *NBSIR* 78-882.
- Equation of state; scaling equation of state; critical point; *J. Res.* 83, No. 4, 329-334 (1978).
- Equation of state; scaling laws; steam; universality of critical behavior; critical phenomena; critical region parameters; 18078.
- Equation of state for propane; propane; thermodynamic properties; 18191.
- Equation-of-state; mixtures; PVTx; SF₆-C₃H₈; thermodynamic potential; CO₂-C₂H₆; critical locus; critical point; C₈H₁₈-C₃H₈; 17751.
- Equilibrium; free energy; Gibbs-Duhem equation; non-stoichiometry; point defects; solubility product; calcium fluoride; 17489.
- Equilibrium constant; heat of formation; ion cyclotron resonance; proton transfer; *t*-alkyl ions; *t*-butyl ion; alkene; entropy; 17695.
- Equilibrium constant of formation; ethanoic (acetic) acid; Gibbs energy of formation; heat capacity; ideal gas thermodynamic properties; internal rotational barrier height; methanoic (formic) acid; monomer; *JPCRD* 7, No. 1, 363-378 (1978).
- Equilibrium constant of formation; free energy of formation; Gibbs energy function; heat capacity; heat of formation; thermochemical tables; critically evaluated data; enthalpy, entropy; *JPCRD* 7, No. 3, 793-940 (1978).
- Equilibrium constants; free energy; Gibbs energy; ionic solutions; thermodynamic properties; activities; alkaline earth salts; aqueous; critical evaluation; electrolytes; 17772.
- Equilibrium constants; ion cyclotron resonance spectrometry; ionization potentials; ion-molecule reactions; aromatic cations; charge transfer; 17673.
- Equipment; manufacturing; materials; measurements; practical measurements; semiconductor technology; electronic technology; 17865.
- Equipment maintenance; Markov decision process; policy improvement algorithm; dynamic programming; economic analysis; energy conservation; 17814.
- Equipment management; management analysis; problem definition; problem solving; 17990.
- ERDA; heat recovery; hot water distribution systems; integrated appliances; utility systems; appliance combinations; energy conservation in dwellings; 17540.
- Ergonomics; human engineering; human factors; human performance; product safety; standard reference data; anthropometry; consumer product technology; engineering psychology; *NBSIR* 77-1403.
- Ergonomics; human engineering; human factors; human performance; information systems; anthropometry; critical evaluation; data bases; 18264.
- Ergonomics; human factors; human reliability; physical security; physiological psychology; threat analysis; terrorism; training; adversary characteristics; animal research; behavioral science; collusion; *SP*480-32.
- Erosion; fracture; fracture mechanics; glass; mechanics strength; 17839.
- Erosion; fracture; plastic flow; solid particle impact; transmission electron microscopy; ceramics; 17904.
- Erosive wear; scanning electron microscopy; solid particle impact; transmission electron microscopy; 310 stainless steel; electron channelling; 17467.
- Error analysis; floating-point arithmetic; inner products; interval analysis; polynomial evaluation; relative error; rounding error; software; chopping; disc analysis; 17815.
- Error analysis; friction, brake; friction, tire/pavement; kinetics, bicycle; measurements, bicycle braking; road tests; standards, bicycle safety; test methods, bicycle; wet braking; bicycles, brakes, bicycle; braking, wet; *NBSIR* 78-1416.
- Error analysis; G/T; precision measurements; radio star; satellite communications; C/kT; EIRP; 17894.
- Error analysis; refraction angle; satellite communications; satellite effective isotropic radiated power (EIRP); transmission coefficient; atmosphere; downlink carrier-to-noise density ratio (C/kT); earth-terminal gain-to-noise-temperature ratio (G/T); *NBSIR* 78-883.
- Error bounds; JWKB approximation; Liouville-Green approximation; optical potential; ordinary differential equations; principal curves; scattering problems; Stokes lines; transition point; turning point; wave transmission; wave trapping; asymptotic approximations; 18142.
- Error correcting; high integrity; performance assurance; best practice; data integrity; data processing; *SP*500-24.
- Error of sound power measurement; microphone array; noise; noise measure; reverberation room; sound power measurement; standard test procedures for sound power measurement; 17721.
- Errors; fiber; statistics; analysis; asbestos; electron microscope; *SP*506, pp. 281-294 (Nov. 1978).
- Errors; improvements; installation; portability; testing; *SP*503, pp. 221-224 (Mar. 1978).
- Errors; microanalysis; standard materials; background; data evaluation; detectors; 18024.
- ESCA; mordant; adhesion; analysis; bonding; chemistry; dental; enamel; 18150.
- ESCA; optical coatings; thin films; arsenic triselenide; arsenic trisulfide; Auger; damage; defects; electron microscopy; *SP*509, pp. 342-351 (Dec. 1977).
- ESCA; physical adsorption; ruthenium; sulphur hexafluoride; x-ray photoelectron spectroscopy; adsorption; 17708.
- ESCA; quantitative surface analysis; reference materials; x-ray photoelectron spectroscopy; analytical methods; Auger-electron spectroscopy; 17856.
- Escape; fire behavior; human factors; mapping; methodology; performance (human); reaction (psychology); stress (psychology); building fires; case histories; critical incidents; decision making; *NBS-GCR*-77-106.
- Escape-probability method; radiative transfer; Sobolev approximation; spectral line formation; stellar atmosphere; 17438.

- Establish legal limits; tolerance level differences; awakening to problems; deceptive sounds; *SP518*, pp. 285-295 (Aug. 1978).
- Esters; planar; salts; structure; bond-delocalized; croconates; derivatives; dianions; dicyanomethylene; *17864*.
- Estimated enthalpies of formation; estimated molecular parameters; ideal gas thermodynamic properties; mixed halomethanes; critically evaluated data; *JPCRD 7*, No. 4, 1285-1308 (1978).
- Estimated molecular parameters; ideal gas thermodynamic properties; mixed halomethanes; critically evaluated data; estimated enthalpies of formation; *JPCRD 7*, No. 4, 1285-1308 (1978).
- Estimated rate constants; hydrogen abstraction; methane combustion; *JPCRD 7*, No. 3, pp. 1179-1190 (1978).
- Estimated regression equation; estimated regression line; Fact(N) subroutine; least-squares prediction equation; Mathematical Model; midpoints; midpoints prediction equation; binomial coefficients; COMBINATION subroutine; *SP503*, pp. 379-383 (Mar. 1978).
- Estimated regression line; Fact(N) subroutine; least-squares prediction equation; Mathematical Model; midpoints; midpoints prediction equation; binomial coefficients; COMBINATION subroutine; estimated regression equation; *SP503*, pp. 379-383 (Mar. 1978).
- Estimation; gradient; Newton-Raphson; perturbation methods; quasi-Newton; simplex method; variable metric method; computer timings; curve fitting; *SP503*, pp. 373-378 (Mar. 1978).
- Estuarine system; heavy metals; metal transport; methylation; petroleum; pollution; sediment; sulfur cycle; bacterial transformations; bimetallic pathways; chemical transformations; Chesapeake Bay; *17670*.
- Ethane; ethylene; isobutane; isobutylene; propane; propylene; 1-butene; 1,3-butadiene; acetylene; butane; electron; energy-loss spectra; *17620*.
- Ethane; excess pressures; excess volumes; methane; molar volumes; orthobaric liquid; total vapor pressures; binary system; *18194*.

- Expected mean squares; factorial models; multiple error strata; nonorthogonal ANOVA; covariance analysis; *SP503*, pp. 58-65 (Mar. 1978).
- Expected seismic force; object postulate; reliability theory; social utility; acceptable level of human risk; construction costs; earthquake resistant code; *SP523*, pp. V-102-V-116 (Sept. 1978).
- Expected size; incomplete integral; parameters; subset; Bayes; correct selection; *SP503*, pp. 297-301 (Mar. 1978).
- Experiment; flow coefficients; room; scale-model; theory; buoyancy flows; compartment fires; corridor; *NBSIR 78-1512*.
- Experimental; fire induced flow; flow rate; flow visualization; prediction; smoke layer; corridor; *17583*.
- Experimental; gas; glow; liquid; LNG; measurement; comparison; density; *17798*.
- Experimental; oxygen; saturated liquid; saturated vapor; tables; torsional crystal viscometer; viscosity; compressed gas; compressed liquid; *17901*.
- Experimental error; linear regression; precision; tolerance intervals; accuracy; confidence intervals; control chart; diagnostic tests; *17591*.

- Experimental method; exposure reduction; grid performance; radiography; x-ray grids; anti-scatter grids; contrast improvement; 17648.
- Experimental methods; smoke control methods; smoke movement; smoke simulation; state-of-the-art review; basic principles; computer calculations; computer modeling; 17949.
- Experimental studies; injury potential; lacerations; mechanical force; mechanical properties; NBS; punctures; sampling; sharp edges; simulation; skin; TIPS Thesaurus; adults; Bureau of Product Safety; children; *NBSIR 73-123*.
- Experimental Technology Incentives Program; federal funding of civilian R&D; federal policies; guidelines; policies; R&D; technological change; technology; demonstration projects; *NBS-GCR-ETIP 76-07*.
- Experimental tests of special relativity; high resolution spectroscopy; laser frequency measurements; precision measurements; stabilized lasers; 18295.
- Experiments; interdiffusion coefficients; intrinsic diffusion coefficients; Kirkendall shift; Matano analysis; silver; single crystals; vacancy wind; alloys; atom flux; cadmium; chemical interdiffusion; 18081.
- Exploratory techniques; patterns; performance characteristics; precision; random error; standards; systematic error; testing of assumptions; validation; accuracy; bias detection; chemical analysis; chemical measurement process; data reporting; detection limits; 18152.
- Explosion; fire; fuel; gasoline; hydrogen; methane; safety; 18130.
- Explosives; lead azide; neutron diffraction; bond length; covalent azide; crystal structure; 17433.
- Explosives; single-crystal; x rays; bicyclononane system; diffraction; direct-methods; 17699.
- Export administration; export model; model; Soviet Union; U.S.S.R.; computer export model; computer model; decision model; *NBSIR 78-1435*.
- Export documents; import documents; legal questions; National Committee on International Trade Documentation (NCITD); Office of Facilitation; United Nations; *NBSIR 78-1446*, pp. 91-95 (Apr. 1978).
- Export model; model; Soviet Union; U.S.S.R.; computer export model; computer model; decision model; export administration; *NBSIR 78-1435*.
- Exposure; gamma radiation; measurement standards; national standards; units; cavity chambers; cobalt-60; 17443.
- Exposure calibration; ionization chamber; primary standard; unit; absorbed dose; absorbed-dose calibration; calorimeter; dissemination; 17440.
- Exposure limits; monitoring; occupational exposure; record keeping; asbestos; ASTM; consensus; definitions; *SP506*, pp. 381-386 (Nov. 1978).
- Exposure reduction; grid performance; radiography; x-ray grids; anti-scatter grids; contrast improvement; experimental method; 17648.
- Extent of cilium; polymer chains; random flight chains; adsorption; constrained Hollingsworth radius; diffusion approximation; 18211.
- Exterior walls; life-cycle costing; windows; buildings costs; economic evaluation; energy conservation; 17942.
- External vibrations; far infrared; lattice dynamics; optical constants; reststrahlen spectra; alkali azides; 17368.
- Extreme ultraviolet; stellar coronae; x-ray sources; 18306.
- Extreme winds; hurricanes; property damage; design requirements; design standards; *SP523*, pp. 1-10—1-15 (Sept. 1978).
- Extremes; interactive graphic program; Monte Carlo technique; simulation; transformations; distributions; *SP503*, pp. 292-296 (Mar. 1978).
- Extrinsic uv absorption; laser calorimetry; laser windows; Urbach tail; uv laser components; wavelength modulation spectroscopy; *SP509*, pp. 127-131 (Dec. 1977).
- Eye injury; impact; mathematical model; ocular contusion; propelled objects; tolerance; 17986.

F

- Fabric classification; mock-up furniture samples; smoldering; upholstered furniture; upholstery fabrics; cigarette ignition; *NBSIR 78-1438*.
- Fabric flammability; fire safety; flexible foams; furniture; polyurethanes; small scale fire tests; smoldering; upholstery; chairs; char; combustion; *NBS-GCR-77-101*.
- Fabrication problems; nonprecious alloys; porcelain fused to metal restorations; ceramic casting alloys; 17848.
- Fabrics; fire; flame resistant materials; flight attendants; garments; heat flux; protection; standards; tests; aircraft; 17788.
- Fabrics; fire retardant materials; flame resistant fabrics; flame retardants; heat sources; ignition; ignition time; polyesters; pyrolysis; textiles; cellulosic materials; cotton fabrics; *NBS-GCR-78-126*.
- Fabrics as screening gunshot burns; negative/positive superposition; powder burns; scorching of fabrics by gunfire; typescript identification; wood, identification of boards; 17607.
- Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; piezo-optic; strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; 18275.
- Facility location; graph; *k*-basis; tree; computational complexity; dominating set; 18031.
- Factorial models; multiple error strata; nonorthogonal ANOVA; covariance analysis; expected mean squares; *SP503*, pp. 58-65 (Mar. 1978).
- Fact(N) subroutine; least-squares prediction equation; Mathematical Model; midpoints; midpoints prediction equation; binomial coefficients; COMBINATION subroutine; estimated regression equation; estimated regression line; *SP503*, pp. 379-383 (Mar. 1978).
- Failure analysis; fire models; steels; structural failure; structural materials; thermal degradation; building fires; computer programs; concretes; creeps; *NBS-GCR-78-115*.
- Failure analysis; flammable fluids; gasoline; hazards; kerosene; safety; standards; children; containers; *NBSIR 78-1414 (CPS)*.
- Failure modes; laser-optical components; Mo mirrors; optical coatings; pitting; ripples; standard sample Au mirrors; surface characterization; surface uniformity; threshold estimation; windows; damage thresholds; *SP509*, pp. 507-515 (Dec. 1977).
- Failure prediction; fracture; oxidation; silicon nitride; strength; ceramic turbines; 18086.
- Failure predictions; fracture; fracture mechanics; glass; static fatigue; strength; 17636.
- Fall-off behavior; heats of formation; hydrazine; recombination; single pulse shock tube; t-amyl amine; unimolecular decompositions; alkyl amines; alkyl-amino radicals; amino radical; bond energies; 18113.
- False detectors; fire; fire alarms; Japan-U.S. cooperation; smoke aging; smoke detectors; smoke measurement; smoke properties; 17962.
- Far infrared; lattice dynamics; optical constants; reststrahlen spectra; alkali azides; external vibrations; 17368.
- Far infrared; low temperature; water dimer; atmosphere; 17887.
- Far infrared spectrum; intermolecular interactions; matrix isolations; methyl formate; torsion vibrations; acetonitrile dimers; 17563.
- Faraday effect; high voltage measurement; impulse measurement; Kerr effect; magnetic fields; magneto-optics; Pockels effect; waveform measurements; current measurement; electric fields; electric power transmission; electro-optics; 17868.

- Faraday rotation; Jones calculus; Mueller calculus; optical activity; optics; polarization; Stokes parameters; birefringence; circular dichroism; 17680.
- Far-infrared absorption; H₂ and H₂-He mixtures; collision induced absorption; 17382.
- Far-infrared laser; frequency modulation; frequency multiplication; frequency synthesis; phase-lock loop; Stark effect; 18166.
- Far-infrared spectra; multipole moments; potential functions; collision induced absorption; 17379.
- Fast Fourier transform; pulse generator; pulse measurements; sampling oscilloscope; scattering parameters; spectrum amplitude; automated measurements; 17883.
- Fast neutron flux density; intercomparisons; neutron absorbed dose; neutron-induced reaction rates; neutron kerma; neutron source emission rate; statistical analysis; thermal neutron flux density; 17498.
- Faster counting; in-line; nuclear fuel assay; x-ray spectrometer; automation; energy dispersion; *SP528*, pp. 20-36 (Nov. 1978).
- Fatigue; fracture; grain-size; Krebs-Ringer solution; microstructure; alumina; biaxial tension; bioceramics; bovine serum; dynamic; 17421.
- Fatigue; fracture; low temperature tests; maraging steels; mechanical properties; nickel alloys; 17981.
- Fatigue; fracture; low temperature tests; mechanical properties; aluminum alloys; crack propagation; cryogenics; 17430.
- Fatigue; fracture; microstructural analysis; multi-axial analysis; nondestructive evaluation; reliability analysis; safety factors; statistical modeling; stochastic theory of fracture; computer simulation; distributed cracks; distributed dislocations; 17528.
- Fatigue; hysteresis loop; irreversible thermodynamics; low-cycle fatigue; mathematical modeling; multi-axial fatigue; polymethyl-methacrylate; stainless steel; viscoplasticity; creep-fatigue interaction; dissipation; energy approach; 17424.
- Fatigue; microstructures; titanium; transmission electron microscopy; 17905.
- Fatigue and fracture; low-temperature; specific heat; superconducting machinery; tensile; thermal and magnetothermal conductivity; thermal expansion; elastic; electrical and magnetic; 17419.
- Fatigue tests; modulus of elasticity; structural composites; tensile strength; aluminum; boron; composite materials; cryogenics; 17557.
- Feature description; GDMS; generalized database management systems; product characteristics; software; acquisition sources; 18036.
- Features matrix; OMITAB; OSIRIS; SAS; SOUPAC; SPSS; statistical package; TSAR; BMDP; DATA-TEXT; *SP503*, pp. 342-351 (Mar. 1978).
- FeBr₂; hessian; internal fields; Ising model; meta magnet; molecular field theory; random phase approximation; bicritical end point; constant coupling approximation; Curie point; 17748.
- Federal ADP standards; programming languages; software testing; validation; COBOL; 17479.
- Federal funding of civilian R&D; federal policies; guidelines; policies; R&D; technological change; technology; demonstration projects; Experimental Technology Incentives Program; *NBS-GCR-ETIP 76-07*.
- Federal Information Locator System; Federal Reports Act; information directory; information processing standards; duplication study; *NBSIR 78-1446*, pp. 97-112 (Apr. 1978).
- Federal Information Processing Standards; information interchange; information processing; information systems; American National Standards; American National Standards Institute; data; data base systems; data elements; data management; *NBSIR 78-1446*.
- Federal Interagency Council on Energy Information; National Energy Information System; energy information standards; energy programs; *NBSIR 78-1446*, pp. 113-118 (Apr. 1978).

- Fire hazard; market; regulation safety standards; upholstered furniture; consumer; cost-benefit; *J. Res. 83*, No. 5, 459-483 (1978).

Fire hazards; fire protection; National Fire Data Center; regulation; reporting system; scenarios; system design; building codes; data collection; *SP518*, pp. 259-283 (Aug. 1978).

Fire hazards; fire safety; fire scenarios; mass transportation; material fire performance; rail vehicles; subway car design; UMTA; BART; fire accidents; *NBSIR 78-1421*.

Fire hazards assessment; flammability tests; hazard analysis; human behavior; plastic fires; plastics; product safety; residential fires; accident analyses; *NBSIR 78-1422*.

Fire induced flow; flow rate; flow visualization; prediction; smoke layer; corridor; experimental; *17583*.

Fire load; fire protection; fire severity; fire test; building fire; combustible contents; fire endurance; *17808*.

Fire loads; household surveys; live loads; residential surveys; statistics of extremes; design loads; fire; *NBSIR 78-1440*.

Fire loads; load surveys; buildings; *17506*.

Fire models; fire plumes; sensitivity analysis; spray; sprinkler heads; vaporizing; distribution patterns; drops (liquid); drop size; *NBS-GCR-78-121*.

Fire models; slabs (members); steels; stresses; structural materials; thermal analysis; building fires; computer programs; concretes; creep; *NBS-GCR-78-114*.

Fire models; steels; structural failure; structural materials; thermal degradation; building fires; computer programs; concretes; creeps; failure analysis; *NBS-GCR-78-115*.

Fire performance (plumbing piping); plumbing performance evaluation (piping); structural performance (thermoplastic plumbing piping); thermoplastic pipe usage (residential plumbing); acoustical performance (plumbing piping); *BSS111*.

Fire plume; flashover; ignition; room fires; rooms; thermodynamics; ventilation; computer programs; *NBS-GCR-77-111*.

Fire plumes; heat transfer; room fires; scale models; buoyant plumes; ceilings; compartment fires; *NBS-GCR-77-98*.

Fire plumes; sensitivity analysis; spray; sprinkler heads; vaporizing; distribution patterns; drops (liquid); drop size; fire models; *NBS-GCR-78-121*.

Fire prevention; fire protection; fire safety; life safety; standards; building codes; building design; buildings; construction methods; *NBS-GCR-78-118*.

Fire protection; fire safety; life safety; standards; building codes; building design; buildings; construction methods; fire prevention; *NBS-GCR-78-118*.

Fire protection; fire severity; fire test; building fire; combustible contents; fire endurance; fire load; *17808*.

Fire protection; National Fire Data Center; regulation; reporting system; scenarios; system design; building codes; data collection; fire hazards; *SP518*, pp. 259-283 (Aug. 1978).

Fire research; fire retardants; fire tests; flammable materials; heat flux; heat transfer; *17672*.

Fire research; fire safety; human performance; model documentation; modeling technique; programming; simulation; architectural psychology; architectural research; building fires; computer-aided design; fire computer program; *NBSIR 78-1514*.

Fire research; gravity-driven flows; model equations; nonadiabatic flow; buoyant flow; *J. Res.* **83**, No. 3, 297-308 (1978).

Fire research; radiation safety; standard reference data; standard reference materials; standards development; technology transfer; weights and measures; basic research; building technology; computer technology; energy conservation and research; *SP498*.

Fire retardant materials; flame resistant fabrics; flame retardants; heat sources; ignition; ignition time; polyesters; pyrolysis; textiles; cellulosic materials; cotton fabrics; fabrics; *NBS-GCR-78-126*.

Fire retardants; fire tests; flammable materials; heat flux; heat transfer; fire research; *17672*.

Fire retardants; flame inhibition; flame radicals; mass spectrometry; antimony chlorides; *17715*.

Fire safety; aircraft cabin fires; fire growth; fire growth model; fire hazard; *17957*.

Fire safety; fire scenarios; mass transportation; material fire performance; rail vehicles; subway car design; UMTA; BART; fire accidents; fire hazards; *NBSIR 78-1421*.

Fire safety; flexible foams; furniture; polyurethanes; small scale fire tests; smoldering; upholstery; chairs; char; combustion; fabric flammability; *NBS-GCR-77-101*.

Fire safety; governmental actions; life safety; regulation; risk assessment; societal goals; building codes; control measures; fire codes; *SP518*, pp. 165-176 (Aug. 1978).

Fire safety; health; physical hazards; safety; solar heating and cooling; structural performance; toxicity; *NBSIR 78-1532*.

Fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; states-transition; system's approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; *NBSIR 77-1273*.

Fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; state's-transition; system; systems approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; *17967*.

Fire safety; human performance; model documentation; modeling technique; programming; simulation; architectural psychology; architectural research; building fires; computer-aided design; fire computer program; fire research; *NBSIR 78-1514*.

Fire safety; human research; research design; architectural psychology; environmental psychology; fire escape; *NBSIR 78-1508*.

Fire safety; lasers; microcircuit fabrication; nickel standard; rheology; time signals; cereal foods; computers; cryogenic measurements; electronics standards; encryption standard; *DIM/NBS 62*, No. 7/8, 1-32 (1978).

Fire safety; life safety; standards; building codes; building design; buildings; construction methods; fire prevention; fire protection; *NBS-GCR-78-118*.

Fire safety; rating criteria; solar collectors; structural performance; testing procedures; thermal performance; durability/reliability; *NBSIR 78-1305A*.

Fire scenarios; mass transportation; material fire performance; rail vehicles; subway car design; UMTA; BART; fire accidents; fire hazards; fire safety; *NBSIR 78-1421*.

Fire severity; fire spread; fuel load; models; probabilistic analysis; room fires; systems analysis; ventilation; barrier analysis; *NBS-GCR-78-119*.

Fire severity; fire test; building fire; combustible contents; fire endurance; fire load; fire protection; *17808*.

Fire spread; fuel load; models; probabilistic analysis; room fires; systems analysis; ventilation; barrier analysis; fire severity; *NBS-GCR-78-119*.

Fire suppression; fire tests; flame research; flammability tests; smoke; smoke detectors; standards; toxicity; bibliographies; building fires; carpets; compartment fires; fire detection systems; *NBSIR 78-1504*.

Fire test; building fire; combustible contents; fire endurance; fire load; fire protection; fire severity; *17808*.

Fire test; flame spread; loose-fill; mineral fiber; residences; smoldering; thermal insulation; attics; Federal specifications; *NBSIR 78-1497*.

Fire test design; fire test variables; large scale fire tests; room fire tests; *17796*.

Fire test variables; large scale fire tests; room fire tests; fire test design; *17796*.

Fire testing; ionization chamber; light extinction; light scattering; Mie scattering; Rayleigh scattering; smoke measurements; *NBSIR 78-1502*.

- Fire tests; flame research; flammability tests; smoke; smoke detectors; standards; toxicity; bibliographies; building fires; carpets; compartment fires; fire detection systems; fire suppression; *NBSIR 78-1504*.
- Fire tests; flame spread; flashover; incidental fire; interior finish; life safety; mattress; mobile home; radiant heat flux; room fires; upholstered chairs; ASTM E-84 Tunnel Test; fire growth; *NBSIR 78-1531*.
- Fire tests; flame spread; flashover; interior finishes; life safety; mobile homes; radiant heat flux; room fires; ASTM E-84 Tunnel Test; carbon dioxide; carbon monoxide; fire growth; *NBSIR 78-1530*.
- Fire tests; flammability; furnishings; heat transfer; radiation; buoyant plumes; convection; *TN981*.
- Fire tests; flammable materials; heat flux; heat transfer; fire research; fire retardants; *17672*.
- Fire tests; flashover; ignition; probabilities; room fires; computer programs; *NBS-GCR-77-112*.
- Fire tests; gases; room fires flashover; smoke; standards; test procedures; bibliographies; fire dynamics; *NBS-GCR-77-108*.
- Fire tests; ignition source; incidental fires; mobile homes; repeatability; source fires; upholstered furniture; chairs; compartment fires; crib fires; *NBSIR 78-1522*.
- Fires; human behavior; human performance; life safety; panic; decision making; egress; emergencies; *NBS-GCR-78-120*.
- Firing ranges; flow measurement; fluorescence; laser-raman; measurements; metric myth; metric speakers; oxygen; phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; electromagnetic interference; *DIM/NBS 62, No. 3, 1-28 (1978)*.
- First excited states for $0.5 < q_{eff} < 1.2 \text{ fm}^{-1}$; measured-cross sections for ground state; *17701*.
- First normal stress difference; polyisobutylene solution; rheological relations; shear flow; BKZ fluid; *17684*.
- First normal stress difference; polymer solutions; rheological relations; shear flow; BKZ fluid; *17685*.
- First-order kinetics; flow reactor; gas phase kinetics; laminar flow reactor; reactor; wall reactions; *J. Res. 83, No. 1, 1-8 (1978)*.
- Fission; high resolution; keV energies; structure; ^{235}U ; averages; cross section; *17486*.
- Fission; neutron; uranium-235; cross section; *17828*.
- Fission; neutron detection; neutron multiplicity; resonance; time-of-flight; ν ; ^{235}U ; *17810*.
- Fission; neutron reactions; reactor fuels; reactor materials; *18001*.
- Fission; nuclear reactions; photofission bremsstrahlung; threshold; track counting; barrier shape; *17698*.
- Fission cross section; integral fission measurement; spontaneous fission spectrum; $^{235}\text{U}(n,f)$; $^{238}\text{U}(n,f)$; $^{239}\text{U}(n,f)$; ^{252}Cf ; absolute; *17809*.
- Fitting differential equations; nonlinear least squares; derivative-free; *SP503*, pp. 312-322 (Mar. 1978).
- Fixed antenna; law enforcement; performance standard; antenna; base station antenna; *17392*.
- Fixed J-T valve; Gifford McMahon; masers; cooling capacity monitor; cryogenic heat exchangers; *SP508*, pp. 99-107 (Apr. 1978).
- Fixed points; gravity effects; homogeneity; magnetic densimeter; optical interference; power laws; relevant fields; Renormalization Group; scaling; scattering; universality; critical exponents; critical points; *17461*.
- Fixed points; high pressure; ruby pressure scale; semiconductor; diamond cell; electrical resistance measurements; *17797*.
- Fixed points; IPTS; low temperature scales; thermometry; *18138*.
- Fixed-length continued fraction and series; Gamma distribution; Hermite polynomials; probability density function; statistical computation; Taylor series; Wilson-Hilferty approximation; asymptotic expansion; *SP503*, pp. 302-307 (Mar. 1978).
- Fireau; interferometer; photoelastic; piezobirefringence; piezo-optic; strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; *18275*.
- Flame; free radical; heterogeneous reaction; oxidation; promotion; retardant; smolder; thermal analysis; catalysis; char; combustion; *17587*.
- Flame atomic emission spectroscopy; reference method; semiautomated pipetting; serum sodium analysis; clinical analysis; clinical chemistry; definitive method; electrolytes; *SP260-60*.
- Flame inhibition; flame radicals; mass spectrometry; antimony chlorides; fire retardants; *17715*.
- Flame inhibition; microgravity; solidification; solutal convection; surface tensions; convection; corrosive reactions; crystal perfection; *NBSIR 78-1483*.
- Flame radicals; mass spectrometry; antimony chlorides; fire retardants; flame inhibition; *17715*.
- Flame research; flammability tests; smoke; smoke detectors; standards; toxicity; bibliographies; building fires; carpets; compartment fires; fire detection systems; fire suppression; fire tests; *NBSIR 78-1504*.
- Flame resistant fabrics; flame retardants; heat sources; ignition; ignition time; polyesters; pyrolysis; textiles; cellulosic materials; cotton fabrics; fabrics; fire retardant materials; *NBS-GCR-78-126*.
- Flame resistant materials; flight attendants; garments; heat flux; protection; standards; tests; aircraft; fabrics; fire; *17788*.
- Flame retardants; heat sources; ignition; ignition time; polyesters; pyrolysis; textiles; cellulosic materials; cotton fabrics; fabrics; fire retardant materials; flame resistant fabrics; *NBS-GCR-78-126*.
- Flame spread; flame velocity; gaseous phase; heat transfer; Laser Doppler Velocimeter; liquid fuels; combustible materials; convection; *NBS-GCR-78-117*.
- Flame spread; flashover; incidental fire; interior finish; life safety; mattress; mobile home; radiant heat flux; room fires; upholstered chairs; ASTM E-84 Tunnel Test; fire growth; fire tests; *NBSIR 78-1531*.
- Flame spread; flashover; interior finishes; life safety; mobile homes; radiant heat flux; room fires; ASTM E-84 Tunnel Test; carbon dioxide; carbon monoxide; fire growth; fire tests; *NBSIR 78-1530*.
- Flame spread; loose-fill; mineral fiber; residences; smoldering; thermal insulation; attics; Federal specifications; fire test; *NBSIR 78-1497*.
- Flame velocity; gaseous phase; heat transfer; Laser Doppler Velocimeter; liquid fuels; combustible materials; convection; flame spread; *NBS-GCR-78-117*.
- Flammability; flooring radiant panel test; testing; carpet systems; criteria; fire growth; *NBSIR 78-1436*.
- Flammability; furnishings; heat transfer; radiation; buoyant plumes; convection; fire tests; *TN981*.
- Flammability tests; hazard analysis; human behavior; plastic fires; plastics; product safety; residential fires; accident analyses; fire hazards assessment; *NBSIR 78-1422*.
- Flammability tests; smoke; smoke detectors; standards; toxicity; bibliographies; building fires; carpets; compartment fires; fire detection systems; fire suppression; fire tests; flame research; *NBSIR 78-1504*.
- Flammable fabrics; full-scale fires; curtains; draperies; *NBSIR 78-1448*.
- Flammable fluids; gasoline; hazards; kerosene; safety; standards; children; containers; failure analysis; *NBSIR 78-1414 (CPSC)*.
- Flammable materials; heat flux; heat transfer; fire research; fire retardants; fire tests; *17672*.
- Flare stars; helium; x-ray emission; *18312*.
- Flare-stellar; optical flare emission; radio emission; soft x ray; *18218*.

- Flash fires; pyrolysis products; aircraft cabin materials; aircraft impact accidents; *17376*.
- Flash radiography; high energy radiography; image quality; neutron radiography; nondestructive testing; radiography; signal processing; *18033*.
- Flashing light; lights; motor vehicle; photometry; signal light; standards; vehicle, emergency; vision, peripheral; warning signal; color; conspicuity; emergency vehicle; *SP480-16*.
- Flashover; furniture; ignition; room fires; thermodynamics; ventilation; computer program; *NBS-GCR-77-110*.
- Flashover; ignition; probabilities; room fires; computer programs; fire tests; *NBS-GCR-77-112*.
- Flashover; ignition; room fires; rooms; thermodynamics; ventilation; computer programs; fire plume; *NBS-GCR-77-111*.
- Flashover; incidental fire; interior finish; life safety; mattress; mobile home; radiant heat flux; room fires; upholstered chairs; ASTM E-84 Tunnel Test; fire growth; fire tests; flame spread; *NBSIR 78-1531*.
- Flashover; interior finishes; life safety; mobile homes; radiant heat flux; room fires; ASTM E-84 Tunnel Test; carbon dioxide; carbon monoxide; fire growth; fire tests; flame spread; *NBSIR 78-1530*.
- Flat cone; neutron diffraction; position sensitive detector; x-ray diffraction; diffraction geometry; diffractometer; *18251*.
- Flat-plate collectors; measurement; modeling; solar; standards; testing; *NBS-GCR-77-109*.
- Flat-plate collectors; roundrobin test; solar collector; thermal performance testing; *17823*.
- Fleet management; life cycle costing; patrol cars; police fleets; vehicle leasing; vehicle management; *SP480-15*.
- Flexible foams; furniture; polyurethanes; small scale fire tests; smoldering; upholstery; chairs; char; combustion; fabric flammability; fire safety; *NBS-GCR-77-101*.
- Flexural-shear model; high-rise buildings; histogram for building uses; shear model; building height limitation; building volume limitation; earthquake resistant design; *SP523*, pp. VI-15—VI-24 (Sept. 1978).
- Flicker noise; frequency; frequency stability; measurement; noise; spectrum analysis; two-sample variance; *18014*.
- Flicker noise; frequency accuracy; frequency instabilities; long-term instability; microwave frequency; passive hydrogen maser; quartz crystal standards; rubidium gas cell; short-term stability; time standards; cesium standards; *17984*.
- Flight attendants; garments; heat flux; protection; standards; tests; aircraft; fabrics; fire; flame resistant materials; *17788*.
- Floating-point arithmetic; inner products; interval analysis; polynomial evaluation; relative error; rounding error; software; chopping; disc analysis; error analysis; *17815*.
- Flocculation and stabilization; quasielastic light scattering; conformation of adsorbed γ -globulin; *18131*.
- Flooring radiant panel test; testing; carpet systems; criteria; fire growth; flammability; *NBSIR 78-1436*.
- Flour, unfortified; NBS standard reference materials 1567; nutrients, wheat and rice flour; rice flour; wheat flour; *18271*.
- Flow; instrumentation; liquefied natural gas; measurement; tank gauging; *17889*.
- Flow coefficients; room; scale-model; theory. ; buoyancy flows; compartment fires; corridor; experiment; *NBSIR 78-1512*.
- Flow control; liquid helium pressure regulator; pressure regulator; cryogenic flow control; *17892*.
- Flow measurement; fluorescence; laser-raman; measurements; metric myth; metric speakers; oxygen; phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; electromagnetic interference; firing ranges; *DIM/NBS 62*, No. 3, 1-28 (1978).
- Flow measurement; metric; radar; spectroscopy; time; universe; Congress; electromagnetic interference; fire behavior; *DIM/NBS 62*, No. 5, 1-28 (1978).
- Flow measurement, cryogenics; fluids, flow measurements; cryogenic flow measurements; *18178*.
- Flow rate; flow visualization; prediction; smoke layer; corridor; experimental; fire induced flow; *17583*.
- Flow rate; mapping; spray patterns; sprinkler heads; sprinkler systems; superposition; collection arrays; density; distribution patterns; *NBS-GCR-77-105*.
- Flow reactor; gas phase kinetics; laminar flow reactor; reactor; wall reactions; first-order kinetics; *J. Res.* **83**, No. 1, 1-8 (1978).
- Flow visualization; prediction; smoke layer; corridor; experimental; fire induced flow; flow rate; *17583*.
- Flowmetering; instrumentation; liquids; measurement; natural gas; cryogenic; density; *17432*.
- Fluctuations; generalized hydrodynamics; kinetic theory; liquids; neutron scattering; collective modes in liquids; density fluctuations; *17752*.
- Fluctuations; lattice model; Maier-Saupe model; Monte Carlo; order parameter; phase transition; *17753*.
- Fluctuations in liquids; generalized hydrodynamics; liquid state; molecular dynamics; statistical mechanics; coherent neutron scattering; *17912*.
- Fluid mechanics; hydraulic engineering; hydraulic research; hydraulics; hydrodynamics; model studies; research summaries; *SP497*.
- Fluid mixtures; fluids; lattice gas; scaling laws; universality; correlation function; correlation length; critical phenomena; equation of state; *17664*.
- Fluidic device; hot wire anemometer; ion deflection device; laser Doppler anemometer; Reynolds number; angular insensitivity; *17586*.
- Fluids; gravity effects; materials science; phase transitions; spacelab experiments; critical phenomena; *17875*.
- Fluids; lattice gas; scaling laws; universality; correlation function; correlation length; critical phenomena; equation of state; fluid mixtures; *17664*.
- Fluids; mixtures; review; theory; transport properties; corresponding states; *17988*.
- Fluids; nonconservative forces; path dependence; potential of mean force; quadruplet correlation; closure; *18267*.
- Fluids; orthobaric densities; specific heats; vapor pressures; coexistence boundary; critical point; equation of state; ethane; *17458*.
- Fluids, critical point; two-scale factor, critical point of fluids; correlation of fluids; critical point of fluids; *17822*.
- Fluids, flow measurements; cryogenic flow measurements; flow measurement, cryogenics; *18178*.
- Fluorapatite; topical fluoride; acidulated phosphate fluoride; calcium fluoride; dicalcium phosphate dihydrate; *17501*.
- Fluorescence; fluorobenzenes; fluorotoluenes; liquid; nonradiative; quantum yields; radiative; substituent effect; chlorotoluenes; *17613*.
- Fluorescence; laser; lifetime; PH_2 ; quenching rate; *18291*.
- Fluorescence; laser; lifetime; quenching rate; BO ; BO_2 ; *18290*.
- Fluorescence; laser-raman; measurements; metric myth; metric speakers; oxygen; phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; electromagnetic interference; firing ranges; flow measurement; *DIM/NBS 62*, No. 3, 1-28 (1978).
- Fluorescence; lasers; photochemistry; solar energy; spectra; chemical kinetics; energy transfer; *SP526*.
- Fluorescence bands; kinetic rates; mercury vapor; optical pumping; decay measurements; dimer and trimer formation; *17925*.
- Fluorescence detection; mass spectrometry; trace organic analysis; accuracy; chromatography; *17641*.
- Fluorescence emission spectroscopy; gas chromatography; high-performance liquid chromatography (HPLC); standard reference materials; aromatic hydrocarbons (PAH's); *17931*.

- Fluorescence spectrum; Heisenberg equations; laser excitation; Liouvilian; multiphoton; polarization; resonance fluorescence; spontaneous emission; strong field; dressed atom; 17840.
- Fluorescent screens; intensifier screen standards; radiographic intensifier screen efficiency; screen evaluations; sensitivity of screens; spectro-radiometry of screens; x-radiation of intensifier screens; 17577.
- Fluoride transfer; halogenated methyl ions; halomethanes; heats of formation; ion cyclotron resonance; ion-molecule reaction; proton transfer; chloride transfer; 17736.
- Fluorides; nuclear magnetic resonance; stereochemistry; tungsten; alkoxy; aryloxy; bonding; chemical shifts; 17543.
- Fluorides; nuclear magnetic resonance; tungsten; alkoxy; bonding; chemical shifts; 17491.
- Fluorimeter; liquid chromatography; photometer; polynuclear aromatic hydrocarbon; selectivity; sensitivity; spectrofluorimeter; detector; 17858.
- Fluorinated ions; fluorocarbons; ion-molecule reactions; mass spectrometry; rate constants; thermochemistry; 17735.
- Fluorobenzenes; fluorotoluenes; liquid; nonradiative; quantum yields; radiative; substituent effect; chlorotoluenes; fluorescence; 17613.
- Fluorocarbon destruction of stratospheric ozone; microwave spectrum; structure; atmospheric pollution; chemistry of the atmosphere; chlorine nitrate; electric dipole moment; 17621.
- Fluorocarbons; ion-molecule reactions; mass spectrometry; rate constants; thermochemistry; fluorinated ions; 17735.
- Fluorogenic assay of free amino acids in plasma; Standard Reference Materials; bovine serum albumin; 17855.
- Fluorophosphate laser glass; glass cladding; laser fusion; microstructure; parasitic oscillation; refractive index; residual stress; SP509, pp. 434-439 (Dec. 1977).
- Fluorophosphate laser glass; glass density; nonlinear refractive index; phosphate laser glass; physical-optical properties; rupture strength; silicate laser glass; thermo-optic distortion; Young's modulus; birefringence; SP509, pp. 416-433 (Dec. 1977).
- Fluoroscopy; image system; motion-response; neutron radiography; nondestructive evaluation; real-time; television; 17842.
- Fluorotoluenes; liquid; nonradiative; quantum yields; radiative; substituent effect; chlorotoluenes; fluorescence; fluorobenzenes; 17613.
- Fluting pattern; forensic science; headlight glass; hit-and-run accidents; sealed beam headlights; visual classifications; accident investigation; SP480-17.
- Flux measurement; H(n,p); neutrons; standards; time-of-flight; ${}^6\text{Li}(n,\alpha)\text{T}$; 18225.
- Flux phenomena; Josephson phenomena; stabilization; superconductors; terminology; critical parameters; definitions; 17819.
- Flux phenomena; Josephson phenomena; stabilization; superconductors; terminology; critical parameters; definitions; 17916.
- Flux transporter; gradiometer; magnetocardiogram; magnetoencephalogram; magnetomyogram; magneto-oculogram; medical applications; neuromagnetism; pneumomagnetism; studies in perceptual psychology; superconducting quantum interference device; SP508, pp. 177-204 (Apr. 1978).
- Flux variability; stars, chromospheres; stars, circumstellar shells; stars, late type; ultraviolet observations; ultraviolet spectra; chromospheres; cool stars; Copernicus satellite; emission line profiles; 18050.
- Fly ash; urban particulate; borate fusion; energy-dispersive x-ray spectrometry; environmental samples; 18109.
- Flying-spot scanner; microdensitometer; optical overlay; photomask; spatial filtering; TV-microscope; visual defect inspection; alignment tolerance; automated photomask inspection; dimensional inspection; SP400-46.
- FM repeater; law enforcement; mobile communications equipment; NILECJ standard; relay station; repeater station; 17393.
- Food; parenteral drugs; SEM; asbestos; cosmetic talc; EDXA; fibers; SP506, pp. 441-449 (Nov. 1978).
- Food additives; indirect additives; migration; models; regulation; additives; diffusion; NBSIR 78-1499.
- Food grain; instrumental; radiochemical; standard reference materials; toxic elements; accuracy; 18315.
- Forbidden; intensity; lifetime; line strength; oscillator strength; transition probability; allowed; atomic; discrete; SP505.
- Forbidden characters; cipher feedback; codebook form; SP500-27, pp. 38-45 (Feb. 1978).
- Force; injury; pig skin; plastic; velocity; cut; edge; NBSIR 78-1493.
- Force; load; machine tool; measurement; on-line; tool wear; torque; transducer; cutting force; drill bit; drill press; dynamic; NBSIR 78-1423.
- Force; load; machine tool; measurement; review; tool wear; torque; adaptive control; bibliography; control; cutting force; dynamic; NBSIR 78-1424.
- Force constants; fundamental frequencies; infrared spectra; normal vibrations; polyatomic molecules; Raman spectra; vibrational frequencies; JPCRD 7, No. 4, 1323-1444 (1978).
- Force constants; HNO; infrared spectrum; matrix isolation; NOCl; reaction of H with NO; vacuum-ultraviolet photolysis; DNO; 17556.
- Force field; microwave spectra; centrifugal distortion; 17561.
- Force field refinement; lattice dynamics; n-alkanes; nonbonded potential functions; polyethylene; vibrational data; JPCRD 7, No. 4, 1309-1322 (1978).
- Force measurement; force transducer; load cell; pressure sensitivity; spring-dashpot model; creep; creep recovery; 18200.
- Force model; group theory; lattice dynamics; neutron scattering; phonon; deuterium peroxide; 17927.
- Force transducer; load cell; pressure sensitivity; spring-dashpot model; creep; creep recovery; force measurement; 18200.
- Forced convection; helium II; measurements; pressure drop; 1.4-2.1 K; axial heat transport; TN1002.
- Foreign competition; integrated circuits; semiconductor technology; VLSI; cooperative technology; electronics; NBSIR 78-1482.
- Foreign relations; industrializing nations; international relations; LDC's; measurement services; standardization; AID; assistance; developing economies; NBSIR 77-1385.
- Forensic science; headlight glass; hit-and-run accidents; sealed beam headlights; visual classifications; accident investigation; fluting pattern; SP480-17.
- Formal modeling; message sequence; message transfer expression; modeling language; MTE; performance evaluation; PPML; system analysis; SP500-41, pp. 67-82 (Oct. 1978).
- Formaldehyde; hydrogen; ruthenium; carbon monoxide; chemisorption; 17713.
- Formaldehyde; interstellar gas; radio astronomy; B213 NW; cloud dynamics; contour maps; 17700.
- Formaldehyde; oxygen; x-ray photoelectron spectroscopy; adsorption; carbon dioxide; carbon monoxide; chemisorption; decomposition; 17783.
- Formulation; innovation; market aggregation; performance requirements; prescriptive standards; standards development; economics; SP518, pp. 161-164 (Aug. 1978).
- Formyl ion; radio astronomy; chemical fractionation; deuterium; dust clouds; emission lines; 17719.
- Fortran; Fortran subroutine set; package; portable; software; stand-alone subroutine; statistics; subroutine set; computer package; data analysis; data analysis package; DATAPAC; 17398.
- Fortran error analysis; rounding error; significance arithmetic; significant digit algorithms; automatic error monitoring; computer calculations; SP503, pp. 395-399 (Mar. 1978).

- Fortran minicomputers; software; statistics; biomedical; *SP503*, pp. 9-13 (Mar. 1978).
- Fortran subroutine set; package; portable; software; stand-alone subroutine; statistics; subroutine set; computer package; data analysis; data analysis package; DATAPAC; Fortran; *17398*.
- Fossil fuel heating systems; furnaces; part load performance; rating procedures; seasonal efficiency; annual operating cost; boilers; *NBSIR 78-1543*.
- Four point method; inequivalence; laser energy; laser power; NBS laser standard; calorimeter; *18170*.
- Fourier optics; micrometrology; microscopy; optical imagery; partial coherence; photomasks; *18163*.
- Fourier transform NMR; nitrogen-15 NMR; proton NMR; quantitative analysis; spin-lattice relaxation times; stereochemistry; amino sugars; carbon-13 NMR; coupling constants; *17678*.

- Free radical; heterogeneous reaction; oxidation; promotion; retardant; smolder; thermal analysis; catalysis; char; combustion; flame; *17587*.

Free radical reactions; lasers; photochemistry; quantum yields; carbenes; chloromethane; 17584.

Free radicals; mechanochemistry; vinylidene chloride polymer; chloranil; 18223.

Free-form asbestos; patching compounds; risk assessment; artificial fireplace ash; consumer exposure; Consumer Product Safety Act (CPSA); Consumer Product Safety Commission (CPSC); emberizing material; *SP506*, pp. 451-459 (Nov. 1978).

Freeze dried; gravimetric standards; high accuracy; particle size effects; radioactive samples; x-ray fluorescence analysis; actinides; *SP528*, pp. 149-155 (Nov. 1978).

Freezer; kitchen range; refrigerator; service-life expectancy; television set; washing machine; actuarial table; clothes dryer; consumer appliance retention; dishwasher; *SP514*, pp. 131-138 (May 1978).

Freezing; local density; phase transition; bifurcation; crystalline symmetry; 17918.

Freezing point; mercury triple point; thermometric standard; triple point; 17410.

French compliance techniques; translations; acoustics; codes; CSTB; *TN710-8*.

Frequency; frequency stability; measurement; noise; spectrum analysis; two-sample variance; flicker noise; 18014.

Frequency accuracy; frequency instabilities; long-term instability; microwave frequency; passive hydrogen maser; quartz crystal standards; rubidium gas cell; short-term stability; time standards; cesium standards; flicker noise; 17984.

Frequency calibration; frequency transfer standard; microprocessor; television; time transfer standard; 17363.

Frequency control voltage correlation; frequency deviation; optimum time prediction; atomic time algorithm; clock behavior modeling; clock behavior simulation; clock error detection; clock noise characterization; 18058.

Frequency dependence; intrinsic laser damage; linear and non-linear refractive indices; multiphoton absorption; polaron; pulse length dependence; breakdown flux and field strength; *SP509*, pp. 465-472 (Dec. 1977).

Frequency deviation; optimum time prediction; atomic time algorithm; clock behavior modeling; clock behavior simulation; clock error detection; clock noise characterization; frequency control voltage correlation; 18058.

Frequency discrimination; frequency lock system; frequency stability; frequency stabilization; oscillator systems; phase modulation; quartz crystal oscillators; quartz crystals; 18305.

Frequency drift; frequency stability degradation; long-term frequency instabilities; microwave power; cavity phase shift; cesium atom; cesium beam velocity distribution; cesium standards; detector; distributed Ramsey cavity phase shift; 17985.

Frequency instabilities; long-term instability; microwave frequency; passive hydrogen maser; quartz crystal standards; rubidium gas cell; short-term stability; time standards; cesium standards; flicker noise; frequency accuracy; 17984.

Frequency lock servo; frequency multiplier; frequency standard; microwave absorption cell; strip line oscillator; 18076.

Frequency lock system; frequency stability; frequency stabilization; oscillator systems; phase modulation; quartz crystal oscillators; quartz crystals; frequency discrimination; 18305.

Frequency measurement; nuclear magnetic resonance; reentrant cavity resonator; static magnetic susceptibility measurements; tunnel diode oscillator; *U.S. Patent 4,087,738*.

Frequency metrology; Josephson junctions; lasers; molecular spectroscopy; 18101.

Frequency mixing; frequency multiplication; heating effects; high frequency limitations; I-V curve; point-contact Josephson junction; spectrum spreading; capacitance effects; energy-gap effects; 17991.

Frequency modulation; frequency multiplication; frequency synthesis; phase-lock loop; Stark effect; far-infrared laser; 18166.

Frequency multiplication; frequency synthesis; phase-lock loop; Stark effect; far-infrared laser; frequency modulation; 18166.

Stark effect; far-infrared laser; frequency modulation; 18166.

Frequency multiplication; heating effects; high frequency limitations; I-V curve; point-contact Josephson junction; spectrum spreading; capacitance effects; energy-gap effects; 17991.

Frequency multiplication; Josephson junction; analog computer; computer analog; 17968.

Frequency multiplier; frequency standard; microwave absorption cell; strip line oscillator; frequency lock servo; 18076.

Frequency of failure; life cycle costing; repair cost analysis; electric clothes dryer; *SP514*, 139-155 (May 1978).

Frequency response; helium-neon lasers; lasers; mode beating; spectral modes; axial modes; detectors; 17939.

Frequency response; high modulation frequency; laser modes; photodiode; saturation; detector; 17932.

Frequency response; mode-beating; modulation frequency; optical detector; responsivity; saturation; 18167.

Frequency spectrum; power spectrum; radar; radar clutter; radio holography; radar resolution; spectral analysis; 18096.

Frequency stability; chemical laser; 17913.

Frequency stability; frequency stabilization; oscillator systems; phase modulation; quartz crystal oscillators; quartz crystals; frequency discrimination; frequency lock system; 18305.

Frequency stability; measurement; noise; spectrum analysis; two-sample variance; flicker noise; frequency; 18014.

Frequency stability degradation; long-term frequency instabilities; microwave power; cavity phase shift; cesium atom; cesium beam velocity distribution; cesium standards; detector; distributed Ramsey cavity phase shift; frequency drift; 17985.

Frequency stabilization; hydrogen frequency standard; multiple modulation; *U.S. Patent 4,122,408*.

Frequency stabilization; oscillator systems; phase modulation; quartz crystal oscillators; quartz crystals; frequency discrimination; frequency lock system; frequency stability; 18305.

Frequency standard; microwave absorption cell; strip line oscillator; frequency lock servo; frequency multiplier; 18076.

Frequency standard; precision oscillator; acceleration insensitive oscillator; ammonia microwave absorption; atomic clock; digital demodulator; frequency-lock servo; 17992.

Frequency standards; accuracy; beam tube; cavity phase error; Doppler shift; envelope deflection; 17938.

Frequency standards; high-resolution spectroscopy; ion storage; laser spectroscopy; Penning trap; radiation pressure; atomic spectroscopy; Doppler narrowing; Doppler shifts; 18148.

Frequency synthesis; phase-lock loop; Stark effect; far-infrared laser; frequency modulation; frequency multiplication; 18166.

Frequency transfer standard; microprocessor; television; time transfer standard; frequency calibration; 17363.

Frequency-lock servo; frequency standard; precision oscillator; acceleration insensitive oscillator; ammonia microwave absorption; atomic clock; digital demodulator; 17992.

Freshwater systems; hydrolysis; organic compounds; rate constants; acid; base; environmental conditions; *JPCRD 7*, No. 2, 383-416 (1978).

Friction; performance standards; safety engineering; slip resistance; test methods; coefficient of friction; 18293.

Friction, brake; friction, tire/pavement; kinetics, bicycle; measurements, bicycle braking; road tests; standards, bicycle safety; test methods, bicycle; wet braking; bicycles; brakes, bicycle; braking, wet; error analysis; *NBSIR 78-1416*.

Friction factor; hydraulic resistance; liquid helium; near-critical helium flow; near-critical helium pressure drop; supercritical helium pressure drop; 18089.

Friction material test methods; wear equation; wear mechanisms; automotive friction materials; brake wear; friction materials wear; *SP514*, pp. 93-98 (May 1978).

- Friction materials wear; friction material test methods; wear equation; wear mechanisms; automotive friction materials; brake wear; *SP514*, pp. 93-98 (May 1978).
- Friction, tire/pavement; kinetics, bicycle; measurements, bicycle braking; road tests; standards, bicycle safety; test methods, bicycle; wet braking; bicycles; brakes, bicycle; braking, wet; error analysis; friction, brake; *NBSIR 78-1416*.

- Griffith criteria; lattice models; lattice trapping; quantum tunneling; stress activation; subcritical crack growth; surface energy; activated processes; cohesive bond; fracture; *17469*.
- Ground conditions; ground transfer functions; shear wave; analytical method; base-rock; bridge foundations; deconvolution procedure; earthquake records; *SP523*, pp. IV-158-IV-179 (Sept. 1978).
- Ground failures; seismicity; solids; standards; structural engineering; structural responses; wind loads; winds; accelerograph; codes; design criteria; disaster; earthquake hazards; earthquakes; *SP523*.
- Ground fault circuit interrupters; benefit-cost analysis; benefit-risk analysis; building codes and standards; building regulations; building safety; economic analysis; economics of safety; electric shock; *NBSIR 78-1528*.
- Ground transfer functions; shear wave; analytical method; base-rock; bridge foundations; deconvolution procedure; earthquake records; ground conditions; *SP523*, pp. IV-158-IV-179 (Sept. 1978).
- Group II metal atoms; neutral helium beam; optical polarization; *17518*.
- Group resolution; identical match; linkage group; linkage model; list sampling frame; record linkage; reformat; address match; blocking; data manipulation; *SP503*, pp. 416-420 (Mar. 1978).

Group theory; Hamilton's rotations; icosahedral group; octahedral group; rotation algebra; spinors; two-level system; double groups; 17651.

Group theory; inversion symmetry; Lambda (Λ) coupling; level clusters; multipole transitions; quantum rotor; rovibronic transitions; spherical top molecules; symmetry analysis; Born-Oppenheimer Approximations; Coriolis interactions; 17937.

Group theory; lattice dynamics; neutron scattering; phonon; deuterium peroxide; force model; 17927.

Group theory; lattice modes; neutron; scattering; selection rules; sodium nitrate; 17628.

Grüneisen parameter; liquid state; liquid structure factor; Monte Carlo; pseudopotential; rubidium, liquid; 18141.

Grunerite; health risk; Homestake Mines, S.D.; hornblende; Hunting Hill Quarry, Rockville, Md.; lung cancer; mesothelioma; serpentinite, surface chemistry; talc; Thetford Mines, Quebec, Canada; tremolite; Urals; *SP506*, pp. 49-70 (Nov. 1978).

Grunerite; mineral identification; nonfibrous; amosite; amphibole; asbestos; electron diffraction; fibrous; *SP506*, pp. 387-402 (Nov. 1978).

Grunerite; thermal analysis; tremolite; x-ray diffraction; amphibole asbestos; cummingtonite; *SP506*, pp. 295-312 (Nov. 1978).

GR-Z; graphical methods; histograms; statistical graphical subroutines; time-series plots; data analysis; *SP503*, pp. 409-415 (Mar. 1978).

Guidelines; policies; R&D; technological change; technology; demonstration projects; Experimental Technology Incentives Program; federal funding of civilian R&D; federal policies; *NBS-GCR-ETIP 76-07*.

Gumbel's theory of extremes, literature review; regional seismic coefficient map; statistical analysis; earthquake danger; *SP523*, pp. V-14—V-44 (Sept. 1978).

Gust factors; structural engineering; wind loads; building codes; buildings; deflections; dynamic response; 17365.

Gust loads; structural engineering; tall buildings; wind forces; wind pressure; buildings (codes); dynamic response; 17767.

Guttman-Lingoes Program Series; IMP; linked lists; multidimensional scaling; PEP-1; plotting algorithms; cluster analysis; *SP503*, pp. 236-240 (Mar. 1978).

G/T; metrology for satellite communications; antenna gain; antenna measurements; antenna pattern; antenna sidelobes; EIRP; *NBSIR 78-886*.

G/T; precision measurements; radio star; satellite communications; C/kT; EIRP; error analysis; 17894.

H

H. N. Russell; masses of stars; moon's position; solar composition; solar spectra; atomic spectroscopy; double stars; dynamical parallax; Hertzsprung-Russell Diagram; historical review; 17689.

Hadamard product; inversion; matrix inequality; partitioned matrix; positive semi-definite; *J. Res.* **83**, No. 6, 585-591 (1978).

Hair dryers; instrumented usage data; life cycle costing; repair data; small appliances; field data collection techniques; *NBSIR 78-1500*.

Half-wave films; hydroxyl content; MgF_2 ; refractive index; SiO_2 ; ThF_4 ; thin-films; ZrO_2 ; damage thresholds; *SP509*, pp. 244-250 (Dec. 1977).

Hall measurements; indium-doped silicon; p-n junction isolation; two-layer structures; epitaxial growth; *NBSIR 78-1553*.

Hall measurements; optical measurements; semiconductors; silicon; detectors; electrical measurements; 18259.

Halogenated methyl ions; halomethanes; heats of formation; ion cyclotron resonance; ion-molecule reaction; proton transfer; chloride transfer; fluoride transfer; 17736.

Halogens; interhalogens; laser excitation; quenching; $Br^*(^2P_{1/2})$; collisional deactivation; 17687.

Halomethanes; heats of formation; ion cyclotron resonance; ion-molecule reaction; proton transfer; chloride transfer; fluoride transfer; halogenated methyl ions; 17736.

Halomethanes; liquid density; critically evaluated data; *JPCRD* **7**, No. 2, 425-440 (1978).

Hamilton's rotations; icosahedral group; octahedral group; rotation algebra; spinors; two-level system; double groups; group theory; 17651.

Handling radioactive materials; transporting radioactive samples; x-ray diffraction; analysis of radioactive materials; *SP528*, pp. 121-124 (Nov. 1978).

Hard spheres model; liquefied natural gas; magnetic suspension densimeter; measurements; mixture data; pure fluid data; saturated liquid; cell model; corresponding states model; custody transfer; density; equation of state; 17867.

Hard tissue; surface modification; wettability; bone; chemical grafting; copolymerization; 17490.

Hardness; modulus; rubber; spherical indentors; standard ISO 48; vulcanizate; 17619.

Hardness; transmittance degradation; abrasion resistance; coating degradation; coatings; *SP509*, pp. 378-383 (Dec. 1977).

Hardness assurance; ionizing radiation effects; radiation dose; radiation testing; scanning electron microscopy; semiconductor devices; total dose screening; 17532.

Hardness of enamel; occlusal area; bite opening; biting force; biting strength; cusps; dentitions; duration of sustained maximum biting force; *NBSIR 78-1452*.

Hardware; implementation; laboratory automation; minicomputers; software; automation; design; 18289.

Hardware availability; multiprocessing; present discounted value; software availability; technological matrix; throughput; *SP500-41*, pp. 285-291 (Oct. 1978).

Hardware monitoring; on-line system evaluation; prediction methods; queueing models; simulation; software monitoring; workload definition; ADP life cycle; computer performance evaluation; computer performance measurement; computer performance prediction; *SP500-41*.

Harmonic generation; ionization; laser bandwidth; multiphoton absorption; multiphoton dynamics; nonresonant processes; n-photon Bloch equations; pole approximation; 3-photon Bloch equations; ac Stark shift; adiabatic approximation; dissociation; 17750.

Harmonic oscillator; nitrogen-argon mixture; projection operator; Raman line shape; Van Hove limit; collective modes; condensed state; correlation functions; 18126.

Harmonic wave; Love waves; model structure; Rayleigh waves; soil-structure interaction; vibrator; *SP523*, pp. IV-96—IV-114 (Sept. 1978).

Harmonization; management of change; metrication; metric familiarization; rationalization; SI; standardization; transitional period; economics of metric conversion; *SP530*.

Hartree-Fock calculation; monolithic double crystal spectrometer; relative strengths; x-ray emission; $Cu K\alpha_{1,2}$; double vacancy states; 17665.

Hashing; linear probing; nonuniform frequencies; open addressing; optimal packing; retrieval improvement; *J. Res.* **83**, No. 5, 445-447 (1978).

Hashing; open addressing; recursion; scatter table rearrangements; assignment problem; backtrack programming; 18227.

Hashing; resource allocation; scatter tables; 18005.

Hazard analysis; human behavior; plastic fires; plastics; product safety; residential fires; accident analyses; fire hazards assessment; flammability tests; *NBSIR 78-1422*.

- Hazards; kerosene; safety; standards; children; containers; failure analysis; flammable fluids; gasoline; *NBSIR 78-1414 (CPCSC)*.
- Hazards-related phenomena; innovations; research findings; scientific methods; socio-political system; technical expertise; building design; building regulatory system; decision processes; *SP518*, pp. 25-47 (Aug. 1978).
- HCCIF anion; HCCl_2F ; hydrogen bonding; infrared spectrum; matrix isolation; ultraviolet spectrum; vacuum ultraviolet photolysis; argon metastables; CCl_2 ; $(\text{CCl}_2)\text{HF}$ anion; electron capture; 17727.
- HCCIF₂; HCCIF₂⁻; HCF₂⁻; infrared spectrum; matrix isolation; molecular structure; ultraviolet spectrum; vacuum ultraviolet photolysis; chemiionization; electron capture; excited argon atom reactions; exciton diffusion; 17726.
- HCCIF₂⁻; HCF₂⁻; infrared spectrum; matrix isolation; molecular structure; ultraviolet spectrum; vacuum ultraviolet photolysis; chemiionization; electron capture; excited argon atom reactions; exciton diffusion; HCCIF₂; HCCIF₂⁻; 17726.
- HCCl₂F; hydrogen bonding; infrared spectrum; matrix isolation; ultraviolet spectrum; vacuum ultraviolet photolysis; argon metastables; CCl_2 ; $(\text{CCl}_2)\text{HF}$ anion; electron capture; HCCIF anion; 17727.
- HCF₂⁻; infrared spectrum; matrix isolation; molecular structure; ultraviolet spectrum; vacuum ultraviolet photolysis; chemiionization; electron capture; excited argon atom reactions; exciton diffusion; HCCIF₂; HCCIF₂⁻; 17726.
- HCN far-infrared; infrared lasers; laser; molecular lasers; spectra; energy transfer; 17436.
- HCO; hydrocarbon flame bands; matrix isolation; molecular orbitals; ultraviolet absorption spectrum; emission spectrum; 17959.
- HDFP; hypertension; large data files; post-stratification; truncation; cooperative trials; *SP503*, pp. 132-136 (Mar. 1978).
- He plus noble gases; intermolecular forces; binary deviation parameters; combining rules; 18025.
- Headlight glass; hit-and-run accidents; sealed beam headlights; visual classifications; accident investigation; fluting pattern; forensic science; *SP480-17*.
- Headspace analysis; hydrocarbon analysis; liquid chromatography; marine biota; petroleum analysis; trace analysis; gas chromatography; 17804.
- Health; physical hazards; safety; solar heating and cooling; structural performance; toxicity; fire safety; *NBSIR 78-1532*.
- Health and safety; historic buildings; historic preservation; impacts; performance-based standards; research; architecture; building regulatory system; codes; *SP524*.
- Health care; information processing; management of data elements; standards for health care; *NBSIR 78-1446*, pp. 39-41 (Apr. 1978).
- Health effects; toxic substances; air pollution; air quality data; air quality monitoring; air quality standards; asbestos; *SP506*, pp. 179-190 (Nov. 1978).
- Health physics; high energy neutrons; monitoring; neutrons; radiation safety; activation; carbon-11; 17550.
- Health Physics Society Standards Committee; neutrons, performance; personnel dosimetry; photons; standard; acceptable limits of uncertainty; beta particles; criteria; 18190.
- Health risk; Homestake Mines, S.D.; hornblende; Hunting Hill Quarry, Rockville, Md.; lung cancer; mesothelioma; serpentine, surface chemistry; talcbole; Thetford Mines, Quebec, Canada; tremolite; Urals; *SP506*, pp. 49-70 (Nov. 1978).
- Hearing conservation; in-cab locomotive noise; noise measurement; noise (sound); transportation noise; acoustics; 17502.
- Heat balance; industrial energy conservation; kilns, energy conservation; ovens, energy conservation; energy conservation, industrial; furnaces, energy conservation; *H124*.
- Heat capacities; liquid; propane; saturated liquid; specific heats; constant volume; *J. Res.* 83, No. 5, 449-458 (1978).
- Heat capacity; heat of formation; thermochemical tables; critically evaluated data; enthalpy, entropy; equilibrium constant of formation; free energy of formation; Gibbs energy function; *JPCRD* 7, No. 3, 793-940 (1978).
- Heat capacity; high-speed measurements; high temperature; titanium; electrical resistivity; emittance; 17450.
- Heat capacity; ideal gas thermodynamic properties; internal rotational barrier height; methanoic (formic) acid; monomer; torsional frequencies; dimer; enthalpy; entropy; equilibrium constant of formation; *JPCRD* 7, No. 1, 363-378 (1978).
- Heat capacity; one-dimension; thermodynamic bounds; thermodynamics; thermodynamics of disordered systems; disordered chain; glass; *J. Res.* 83, No. 3, 283-295 (1978).
- Heat conduction; laser beam; microscopic particle; Mie scattering; optical path length change; Raman; thermal diffusion; change of index of refraction with temperature; 17697.
- Heat conduction; laser beam, microscopic particle; Mie scattering; optical path length change; Raman; thermal diffusion; change of index of refraction with temperature; 17483.
- Heat engine; heat pump; residential heating; Stirling engine; Stirling engine heat pump; air-to-air heat pump; energy conservation heating; engine-driven heat pump; 18098.
- Heat exchanger; heat transfer fluids; potable water; solar energy; standards; toxicity; contamination; corrosion; *NBSIR 78-1542*.
- Heat exchanger design; Joule-Thomson cycle; refrigerator; cryocooler; *SP508*, pp. 75-80 (Apr. 1978).
- Heat flow; micro-explosion; preheat; combustion; emulsified fuel droplet; fuel droplet; 17482.
- Heat flux; heat transfer; fire research; fire retardants; fire tests; flammable materials; 17672.
- Heat flux; protection; standards; tests; aircraft; fabrics; fire; flame resistant materials; flight attendants; garments; 17788.
- Heat generation in receptacles; insulated buildings; overheating conductors; residential branch circuit wiring; thermal insulation and electrical wiring; branch circuit wiring; electrical fires; *NBSIR 78-1477*.
- Heat loss; thermal performance; ASHRAE standards; building envelope; building regulations; data collection; energy budget; energy conservation; *SP518*, pp. 219-250 (Aug. 1978).
- Heat loss and heat gain; multi-room problems; air leakage; dynamic heat transfer; energy analysis; heating and cooling loads; 18070.
- Heat of combustion; heat of explosion; miscellaneous materials; specific heat; vapor pressure; *NBSIR 78-1479*.
- Heat of explosion; miscellaneous materials; specific heat; vapor pressure; heat of combustion; *NBSIR 78-1479*.
- Heat of formation; hexyne-1; methyl propargyl; propargyl; resonance energy; shock tube; thermal properties; 4-methylheptyne; 4-methylhexyne-1; 5-methylhexyne-1; acetylenic; decomposition; 18112.
- Heat of formation; ion cyclotron resonance; proton transfer; t-alkyl ions; t-butyl ion; alkene; entropy; equilibrium constant; 17695.
- Heat of formation; isomerization; shock tube; trimethylene; 1-pentene; biradical; concerted; cyclopentane; cyclopropane; decomposition; decyclization; 18111.
- Heat of formation; ketene; proton affinity; proton transfer; acetone; acetyl ion; 17696.
- Heat of formation; thermochemical tables; critically evaluated data; enthalpy, entropy; equilibrium constant of formation; free energy of formation; Gibbs energy function; heat capacity; *JPCRD* 7, No. 3, 793-940 (1978).
- Heat of solution; polynuclear aromatic hydrocarbons; salting out effect; aqueous solubility of polynuclear aromatic hydrocarbons; coupled columns liquid chromatography; 17746.

- Heat pulse; high pressure; high temperature; molecular dynamics; second sound; shockwave; thermal diffusion; thermal relaxation; crystals; 17738.
- Heat pulse propagation; molecular dynamics; one-, two-, three-dimensional lattice models; second sound; shock wave propagation; solitons; thermal conductivity; thermal diffusivity; thermal equilibrium; 18154.
- Heat pump; residential heating; Stirling engine; Stirling engine heat pump; air-to-air heat pump; energy conservation heating; engine-driven heat pump; heat engine; 18098.
- Heat pumps; rating procedure; seasonal cost of operation; test method; central air conditioners; *NBSIR 77-1271*.
- Heat recovery; hot water distribution systems; integrated appliances; utility systems; appliance combinations; energy conservation in dwellings; ERDA; 17540.
- Heat sources; ignition; ignition time; polyesters; pyrolysis; textiles; cellulosic materials; cotton fabrics; fabrics; fire retardant materials; flame resistant fabrics; flame retardants; *NBS-GCR-78-126*.
- Heat transfer; fire research; fire retardants; fire tests; flammable materials; heat flux; 17672.
- Heat transfer; helium; pressure measurement; refrigeration; stability; superconducting magnets; transient heat transfer; efficiency; *NBSIR 78-877*.
- Heat transfer; helium 3; helium 4; impurities; Kapitza resistance; annealing; copper; cryogenics; dislocations; 17917.
- Heat transfer; insulation standards; U-values; ASHRAE Standard; climatic conditions; energy conservation; glass area; *SP518*, pp. 205-218 (Aug. 1978).
- Heat transfer; Laser Doppler Velocimeter; liquid fuels; combustible materials; convection; flame spread; flame velocity; gaseous phase; *NBS-GCR-78-117*.
- Heat transfer; measurement; radiation; rating; solar; standards; testing; 18286.
- Heat transfer; radiation; buoyant plumes; convection; fire tests; flammability; furnishings; *TN981*.
- Heat transfer; radiation; slabs (members); steel beams; structural members; ASTM E-119; building fires; ceilings; computer programs; concrete slabs; construction materials; convection; *NBS-GCR-77-100*.
- Heat transfer; reflectance; remote sensing; retroreflectance; spectrophotometry; transmittance; absorption spectra; automation; chemical analysis; colorimetry; *NBSIR 75-940*.
- Heat transfer; room fire; scaling; temperature; velocity; corridor; 17582.
- Heat transfer; room fires; scale models; buoyant plumes; ceilings; compartment fires; fire plumes; *NBS-GCR-77-98*.
- Heat transfer; thermal response factor; verification; dynamic conduction heat transfer; *NBSIR 77-1405*.
- Heat transfer fluids; potable water; solar energy; standards; toxicity; contamination; corrosion; heat exchanger; *NBSIR 78-1542*.
- Heating; hot water; performance criteria; solar energy; standards; buildings; cooling; *NBSIR 78-1562*.
- Heating; performance criteria; solar collectors; solar energy; standards; buildings; cooling; 17552.
- Heating and cooling; radio frequency; solar heating; weights and measures; calibration; coal gasification; corrosion; EMI; *DIM/NBS 62*, No. 12, 1-32 (1978).
- Heating and cooling load calculation; planned heating and cooling; thermal comfort indices; computer simulation; energy conservation; 18300.
- Heating and cooling loads; heat loss and heat gain; multi-room problems; air leakage; dynamic heat transfer; energy analysis; 18070.
- Heating effects; high frequency limitations; I-V curve; point-contact Josephson junction; spectrum spreading; capacitance effects; energy-gap effects; frequency mixing; frequency multiplication; 17991.
- Heating efficiency; oil-fired furnaces; overfiring of oil-burners; 17581.
- Heating rates; initial rates; kinetics; life-time prediction; oxidation; polymers; polyurethanes; pyrolysis; stability; thermal analysis; thermogravimetry; accelerated aging; complex reactions; decomposition; degradation; 17897.
- Heating systems; part-load performance; seasonal efficiency; boiler; computer simulation; DEPAB; energy conservation; 18059.
- Heating value; hydrocarbon; liquefied natural gas; sampling; custody transfer; 18029.
- Heat-loss reduction; insulation properties; residential heat loss; retrofitting houses; thermal conductivity; thermal insulation; thermography; air infiltration; condensation in buildings; energy conservation; energy measurements; fuel savings; *BSS105*.
- Heats of formation; hexamethylethane; isopropyl; pre-exponential factor; radical buffer; radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; decomposition; ethyl; 18110.
- Heats of formation; hydrazine; recombination; single pulse shock tube; t-amyl amine; unimolecular decompositions; alkyl amines; alkyl-amino radicals; amino radical; bond energies; fall-off behavior; 18113.
- Heats of formation; ion cyclotron resonance; ion-molecule reaction; proton transfer; chloride transfer; fluoride transfer; halogenated methyl ions; halomethanes; 17736.
- Heavy charged particles; range-energy relations; stopping power; straggling; charged-particle tracks; collision cross section; delta rays; electrons; 17497.
- Heavy elements; transuranic elements; atomic electron binding energies; binding energies; core electron binding energies; *JPCRD 7*, No. 4, 1267-1284 (1978).
- Heavy metals; metal transport; methylation; petroleum; pollution; sediment; sulfur cycle; bacterial transformations; bimetallic pathways; chemical transformations; Chesapeake Bay; estuarine system; 17670.
- Height measurement; measurement units; metric; standardization; vertical separation; altimetry; altitude; aviation; *NBSIR 77-1386*.
- Heisenberg equations; laser bandwidth; multiphoton absorption; multiphoton ionization; partially coherent lasers; power broadening; two laser absorption; Bloch equations; coherence; coherent multiphoton effects; density matrix equations; 17462.
- Heisenberg equations; laser bandwidth; multiphoton ionization; multiphoton saturation effects; partially coherent laser; power broadening; rate approximation; two photon absorption; two photon ionization; Bloch equations; density matrix equations; 17805.
- Heisenberg equations; laser excitation; Liouvilian; multiphoton; polarization; resonance fluorescence; spontaneous emission; strong field; dressed atom; fluorescence spectrum; 17840.
- Helium; electron monochromator; electron scattering; 17827.
- Helium; helium supply system; high density helium storage; liquid helium storage; supercritical helium; cryogenic helium supply system; cryogenic storage; 18188.
- Helium; helium-krypton mixture; interaction second virial coefficients; krypton; virial coefficients; volumetric data; 18232.
- Helium; ionization; triple-differential cross section; 17849.
- Helium; lifetimes; optical; radiation; electron; excitation; 18196.
- Helium; magnetic; three-body; tritium; Coulomb; electron scattering; 17381.
- Helium; pressure measurement; refrigeration; stability; superconducting magnets; transient heat transfer; efficiency; heat transfer; *NBSIR 78-877*.
- Helium; x-ray emission; flare stars; 18312.

- Helium cooling of superconductors; helium heat transfer; helium transient heat transfer; pulsed superconductor cooling; pulse heating; cooling of pulsed superconductors; 18133.
- Helium dewar; JT loop, regenerative cryocooler; temperature control; three stages; two stages; vibration isolation; *SP508*, pp. 45-57 (Apr. 1978).
- Helium heat transfer; helium transient heat transfer; pulsed superconductor cooling; pulse heating; cooling of pulsed superconductors; helium cooling of superconductors; 18133.
- Helium II; measurements; pressure drop; 1.4-2.1 K; axial heat transport; forced convection; *TN1002*.
- Helium lines; T Tauri stars; 18269.
- Helium refrigerator; refrigeration, helium; SQUID refrigeration; cryocooler; *SP508*, pp. 131-133 (Apr. 1978).
- Helium supply system; high density helium storage; liquid helium storage; supercritical helium; cryogenic helium supply system; cryogenic storage; helium; 18188.
- Helium transient heat transfer; pulsed superconductor cooling; pulse heating; cooling of pulsed superconductors; helium cooling of superconductors; helium heat transfer; 18133.
- Helium 3; helium 4; impurities; Kapitza resistance; annealing; copper; cryogenics; dislocations; heat transfer; 17917.
- Helium 4; impurities; Kapitza resistance; annealing; copper; cryogenics; dislocations; heat transfer; helium 3; 17917.
- Helium-cooled current leads; power transmission; superconducting power transmission; transmission power; 18093.
- Helium-krypton mixture; interaction second virial coefficients; krypton; virial coefficients; volumetric data; helium; 18232.
- Helium-neon lasers; lasers; mode beating; spectral modes; axial modes; detectors; frequency response; 17939.
- Hemolysis; intrapleural injections; intratracheal instillation; multinucleated giant cell; PMP I; PMP II; polyp; alveolar macrophages; *SP506*, pp. 163-174 (Nov. 1978).
- Henry's law constants; poly(vinyl chloride); sorption; vinyl chloride; desorption; diffusion constants; 17371.
- Herbicide; historic structures; masonry; acidic; alkaline; degradation; *NBSIR 78-1449*.
- Hermitecity; hole mobility; infrared reflectance; ion implantation; ion microprobe mass analysis; line-width measurements; nuclear-track technique; particle-impact noise detection; photolithography; photovoltaic method; *p-n* junction; power-device grade silicon; *SP400-36*.
- Hermite polynomials; probability density function; statistical computation; Taylor series; Wilson-Hilferty approximation; asymptotic expansion; cumulative density function; fixed-length continued fraction and series; *SP503*, pp. 302-307 (Mar. 1978).
- Hertzprung-Russell Diagram; historical review; H. N. Russell; masses of stars; moon's position; solar composition; solar spectra; atomic spectroscopy; double stars; dynamical parallax; 17689.
- Hessian; internal fields; Ising model; meta magnet; molecular field theory; random phase approximation; bicritical end point; constant coupling approximation; Curie point; FeBr_2 ; 17748.
- Heterodyne laser light scattering; light scattering; Mie scattering; particle size; size distribution of particles; Stokes law velocity; aerosols; calibration of instruments; dioctylphthalate aerosol; Doppler shift spectrometer; 17499.
- Heterogeneous catalysis; catalysis; chemisorption; 17740.
- Heterogeneous reaction; oxidation; promotion; retardant; smolder; thermal analysis; catalysis; char; combustion; flame; free radical; 17587.
- Hexakis(imidazole)nickel(II) chloride tetrahydrate; hydrate; hydrogen bonding; imidazole; transition metal complex; x-ray structure determination; 17731.
- Hexamethylethane; isopropyl; pre-exponential factor; radical buffer; radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; decomposition; ethyl; heats of formation; 18110.
- Hexyne-1; methyl propargyl; propargyl; resonance energy; shock tube; thermal properties; 4-methylheptyne; 4-methylhexyne-1; 5-methylhexyne-1; acetylenic; decomposition; heat of formation; 18112.
- He^3 and He^4 in space; relativity in space; astronomical research in space; cryogenics for space; *SP508*, pp. 227-241 (Apr. 1978).
- HF; laser damage; quartz; sapphire; spinel; ZnSe; alkali-halides; alkaline earth fluorides; As_2S_3 ; DF; electric breakdown; *SP509*, pp. 118-125 (Dec. 1977).
- Hidden corrosion detection with neutron beams; neutron radiography; aircraft corrosion; corrosion; corrosion characterization; corrosion detection; corrosion quantification; *NBSIR 78-1434*.
- Hidden functions; program specification; restricted specification; semantic specification; syntactic specification; type; type restriction; abstract data types; 17682.
- Hierarchical; large; software; statistical; survey; tabulation; generalized; *SP503*, pp. 426-430 (Mar. 1978).
- Hierarchical abstract computers; program complexity; structured programming; computational models; data abstraction; 18013.
- Hierarchical control; microcomputer control; proximity sensors; sensory feedback control; automation systems; computer control; 17847.
- Hierarchical control; robots; sensory feedback; task decomposition; computer-aided manufacturing; goal-directed systems; 17882.
- Hierarchical order; RPG-2; XTALLY; cross tabulations; *SP503*, pp. 19-25 (Mar. 1978).
- Hierarchy of functions; records management; Data Resource Directory System; data resource management; DRDS; functional requirements; *NBSIR 78-1446*, pp. 71-89 (Apr. 1978).
- High accuracy; modular capacitive divider; portable system; truck-mounted; CCVT; compact; field calibration; 17902.
- High accuracy; particle size effects; radioactive samples; x-ray fluorescence analysis; actinides; freeze dried; gravimetric standards; *SP528*, pp. 149-155 (Nov. 1978).
- High accuracy radiometer; silicon detector; temperature controlled silicon cell; detector responsivity; electro-optic modulator; 17527.
- High current switches; high voltage switches; SCR; semiconductor devices; semiconductor measurements; silicon controlled rectifiers; silicon devices; solid-state switches; technology assessment; thyristors; *NBSIR 78-1559*.
- High density helium storage; liquid helium storage; supercritical helium; cryogenic helium supply system; cryogenic storage; helium; helium supply system; 18188.
- High energy neutrons; monitoring; neutrons; radiation safety; activation; carbon-11; health physics; 17550.
- High energy radiography; image quality; neutron radiography; nondestructive testing; radiography; signal processing; flash radiography; 18033.
- High flux source; neutral helium atoms; 17704.
- High frequencies; low frequencies; accelerograms; digitization; *SP523*, pp. IV-20-IV-27 (Sept. 1978).
- High frequency limitations; I-V curve; point-contact Josephson junction; spectrum spreading; capacitance effects; energy-gap effects; frequency mixing; frequency multiplication; heating effects; 17991.
- High integrity; performance assurance; best practice; data integrity; data processing; error correcting; *SP500-24*.
- High level language; relational model; social science computing; statistical systems; complex data structures; database systems; *SP503*, pp. 165-177 (Mar. 1978).
- High modulation frequency; laser modes; photodiode; saturation; detector; frequency response; 17932.

- High pressure; high temperature; molecular dynamics; second sound; shockwave; thermal diffusion; thermal relaxation; crystals; heat pulse; 17738.
- High pressure; hydrostaticity; liquids; viscosity; diamond cell; glass transition; 18085.
- High pressure; polytetrafluoroethylene; Raman spectroscopy; TFE-HFP copolymer; crystallinity; diamond anvil cell; 18207.
- High pressure; ruby pressure scale; semiconductor; diamond cell; electrical resistance measurements; fixed points; 17797.
- High pressure; surface analysis; x-ray photoelectron spectroscopy; appearance-potential spectroscopy; electron spectroscopy; 17978.
- High purity platinum; high temperature thermoelectric measurements; low temperature thermoelectric measurements; platinum; Pt 67; residual resistivity ratio; standard reference material; temperature coefficient of resistors; thermocouple; thermoelectric standard; SP260-56.
- High resolution; keV energies; structure; ²³⁵U; averages; cross section; fission; 17486.
- High resolution spectroscopy; laser frequency measurements; precision measurements; stabilized lasers; experimental tests of special relativity; 18295.
- High speed; non-overloading; tunnel diode discriminator; wide dynamic range; 17922.
- High temperature; laser machining; platinum; resistance thermometry; temperature scale; thermometer; 17412.
- High temperature; molecular dynamics; second sound; shockwave; thermal diffusion; thermal relaxation; crystals; heat pulse; high pressure; 17738.
- High temperature; normal spectral emittance; radiation; thermal radiation properties; titanium; high-speed measurements; 18145.
- High temperature; solid-solid phase transformation; thermodynamics; titanium; transformation energy; transformation temperature; electrical resistivity; high-speed measurements; *J. Res.* 83, No. 2, 127-132 (1978).
- High temperature; titanium; electrical resistivity; emittance; heat capacity; high-speed measurements; 17450.
- High temperature chemistry; measurement techniques; reaction rate constants; assessment of needs; chemical kinetics; combustion; SP531.
- High temperature thermoelectric measurements; low temperature thermoelectric measurements; platinum; Pt 67; residual resistivity ratio; standard reference material; temperature coefficient of resistors; thermocouple; thermoelectric standard; thermo-electric voltage; SP260-56.
- High temperatures; Johnson noise; process instrumentation; thermocouples; thermometry; coal conversion; 17611.
- High traffic areas; laboratory findings; maintenance engineers; service conditions; solvent-thinned polyurethane system; vinyl tile; water-thinned polyurethane system; field demonstration; NBSIR 77-1399.
- High transition temperature superconductors; superconducting devices; SP508, pp. 167-175 (Apr. 1978).
- High voltage; impulse; pulse measurement; step response; cavity resonance; electromagnetic interference; 18162.
- High voltage; impulse; pulse measurement; transient digitizer; automation; data acquisition system; 18161.
- High voltage measurement; impulse measurement; Kerr effect; magnetic fields; magneto-optics; Pockels effect; waveform measurements; current measurement; electric fields; electric power transmission; electro-optics; Faraday effect; 17868.
- High voltage switches; SCR; semiconductor devices; semiconductor measurements; silicon controlled rectifiers; silicon devices; solid-state switches; technology assessment; thyristors; high current switches; NBSIR 78-1559.
- Highest level protocol; interlibrary computer communications; library computer network; protocol; application-level protocol; bibliographic services network; book vendors network; computer communications; computer network protocol; computer-to-computer protocol; 18226.
- High-intensity lasers; interactions with high-intensity lasers; collisions; collisions in the presence of lasers; 18248.
- High-performance liquid chromatography; lactate dehydrogenase inhibitor; chromatography on DEAE-cellulose; 17691.
- High-performance liquid chromatography (HPLC); standard reference materials; aromatic hydrocarbons (PAH's); fluorescence emission spectroscopy; gas chromatography; 17931.
- High-precision, wavelength dispersive x-ray spectrometer; nuclear safeguards; rotating target x-ray tube; x-ray fluorescence analysis; x-ray liquid and slurry sample cell; x-ray monochromator; analysis of solutions and slurries; SP528, pp. 125-132 (Nov. 1978).
- High-pressure phases; metastable structure; niobium-silicon alloys; recrystallization; sputtered films; superconductivity; 17633.
- High-Q cavities; infrared detectors; magnetometers; magnets; microwave detectors; space; superconductivity; computers; digital electronics; gravitational studies; NBSIR 78-885.
- High-resolution spectroscopy; ion storage; laser spectroscopy; Penning trap; radiation pressure; atomic spectroscopy; Doppler narrowing; Doppler shifts; frequency standards; 18148.
- High-rise buildings; histogram for building uses; shear model; building height limitation; building volume limitation; earthquake resistant design; flexural-shear model; SP523, pp. VI-15—VI-24 (Sept. 1978).
- High-rise communication systems; multiplex systems; NFPA standards; residential fire detector; sprinkler supervisory devices; control units; fire alarm systems; fire detectors; TN964.
- High-speed measurements; high temperature; normal spectral emittance; radiation; thermal radiation properties; titanium; 18145.
- High-speed measurements; high temperature; solid-solid phase transformation; thermodynamics; titanium; transformation energy; transformation temperature; electrical resistivity; *J. Res.* 83, No. 2, 127-132 (1978).
- High-speed measurements; high temperature; titanium; electrical resistivity; emittance; heat capacity; 17450.

- Hydrogen; mathematical model; palladium; single and multiple charging transients; ambient-temperature; diffusion; galvanostatic charging; *18082*.
- Hydrogen; metastable nitrogen; radiation; rate coefficient; ultraviolet; argon; *18198*.
- Hydrogen; methane; safety; explosion; fire; fuel; gasoline; *18130*.
- Hydrogen; plasma; spin; stark; broadening; fine-structure; *18105*.
- Hydrogen; ruthenium; carbon monoxide; chemisorption; formaldehyde; *17713*.
- Hydrogen abstraction; methane combustion; estimated rate constants; *JPCRD 7*, No. 3, pp. 1179-1190 (1978).

Hydrogen atoms; hydrogen molecules; H_2 ; inelastic collisions; long-range forces; potential energy surfaces; semiempirical valence-bond theory; transport properties; ab initio quantum chemistry; elastic scattering; energy transfer; excited states; 17358.

Hydrogen bonding; imidazole; transition metal complex; x-ray structure determination; hexakis(imidazole)nickel(II) chloride tetrahydrate; hydrate; 17731.

Hydrogen bonding; infrared spectrum; matrix isolation; ultraviolet spectrum; vacuum ultraviolet photolysis; argon metastables; CCl_2 ; $(CCl_2)HF$ anion; electron capture; $HCClF$ anion; $HCCL_2F$; 17727.

Hydrogen bonding; pyrophosphate; calcium phosphate; crystal structure; 17355.

Hydrogen cyanide; methylene; nitrogen; photolysis; rate constant; combustion; 17833.

Hydrogen embrittlement; plastic zone of fracture; ductile and brittle fracture; fracture; 17824.

Hydrogen embrittlement; steels; temper embrittlement; fractography; fracture properties; 18106.

Hydrogen frequency standard; multiple modulation; frequency stabilization; U.S. Patent 4,122,408.

Hydrogen gas proportional counter; ion pair defect; neutron flux monitor; neutron standards; 18229.

Hydrogen halides; isotopes; TEA laser; vibrational relaxation; energy transfer; 18002.

Hydrogen halides; molecular spectra; vacuum ultraviolet; electronic states; electronic structure; 17807.

Hydrogen molecules; H_2 ; inelastic collisions; long-range forces; potential energy surfaces; semiempirical valence-bond theory; transport properties; ab initio quantum chemistry; elastic scattering; energy transfer; excited states; hydrogen atoms; 17358.

Hydrolysis; organic compounds; rate constants; acid; base; environmental conditions; freshwater systems; JPCRD 7, No. 2, 383-416 (1978).

Hydrostaticity; liquids; viscosity; diamond cell; glass transition; high pressure; 18085.

Hydroxyapatite or bone-mineral; ion-exchange adsorption; Langmuir-adsorption rate equation; mordanting and adhesion; polymer bonding with hard tooth tissues; rates of Ni(II) and Cu(II) ion-exchange; 18155.

Hydroxybenzaldehydes; isomers; polymerization; synthesis; adhesion; aldehyde methacrylate; collagen; condensation reactions; copolymerization; coupling agents; dentin; functional monomers; 18149.

Hydroxyl content; MgF_2 ; refractive index; SiO_2 ; ThF_4 ; thin-films; ZrO_2 ; damage thresholds; half-wave films; SP509, pp. 244-250 (Dec. 1977).

Hydroxyl radical; interstellar molecules; line strengths; microwave spectra; molecular properties; radio astronomy; JPCRD 7, No. 1, 311-362 (1978).

Hyperfine structure; internuclear distance; microwave spectra; rotational constants; rotational spectral lines; triatomic molecules; dipole moments; JPCRD 7, No. 4, 1445-1750 (1978).

Hyperfine structure; laser spectroscopy; lifetime; energy levels; 18214.

Hyperfine structure; microwave spectrum; molecules; rotational spectra; dipole moment; ethyl hypochlorite; 17622.

Hypertension; large data files; post-stratification; truncation; cooperative trials; HDFP; SP503, pp. 132-136 (Mar. 1978).

Hypothesis; mixed model; repeated measures; unbalanced; ANOVA; contrast; SP503, pp. 40-47 (Mar. 1978).

Hypothesis testing; interactions; orthogonal contrasts; unbalanced data; automatic interaction procedures; default decisions; SP503, pp. 54-57 (Mar. 1978).

Hypothesis testing; missing cells; unbalanced data; ANOVA; SP503, pp. 48-53 (Mar. 1978).

Hysteresis loop; irreversible thermodynamics; low-cycle fatigue; mathematical modeling; multi-axial fatigue; polymethylmethacrylate; stainless steel; viscoplasticity; creep-fatigue interaction; dissipation; energy approach; fatigue; 17424.

Hysteretic structures; inelastic response spectra; ductility; earthquake response; empirical formula; SP523, pp. VI-1—VI-14 (Sept. 1978).

H_2 and H_2 -He mixtures; collision induced absorption; far-infrared absorption; 17382.

H_2CO ; oxygenated hydrocarbon complexes; Ru surfaces; adsorption; CH_3OH ; decomposition; 17645.

H_2 ; inelastic collisions; long-range forces; potential energy surfaces; semiempirical valence-bond theory; transport properties; ab initio quantum chemistry; elastic scattering; energy transfer; excited states; hydrogen atoms; hydrogen molecules; 17358.

$H(n,p)$; neutrons; standards; time-of-flight; ${}^6Li(n,\alpha)T$; flux measurement; 18225.

I

IBM OS/MVT; job accounting systems; resource utilization measurement; System Management Facilities; system wait time; computer performance analysis; computer performance measurement; CPU time; EXCP counts; SP500-40.

Icosahedral group; octahedral group; rotation algebra; spinors; two-level system; double groups; group theory; Hamilton's rotations; 17651.

Ideal gas thermodynamic properties; internal rotational barrier height; methanoic (formic) acid; monomer; torsional frequencies; dimer; enthalpy; entropy; equilibrium constant of formation; ethanoic (acetic) acid; JPCRD 7, No. 1, 363-378 (1978).

Ideal gas thermodynamic properties; internal rotation; *m*-cresol; *o*-cresol; *p*-cresol; phenol; potential barrier heights; rotational isomers; torsional frequencies; JPCRD 7, No. 2, 417-424 (1978).

Ideal gas thermodynamic properties; mixed halomethanes; critically evaluated data; estimated enthalpies of formation; estimated molecular parameters; JPCRD 7, No. 4, 1285-1308 (1978).

Identical match; linkage group; linkage model; list sampling frame; record linkage; reformat; address match; blocking; data manipulation; group resolution; SP503, pp. 416-420 (Mar. 1978).

Identification; light microscopy; selected area electron diffraction; talc; transmission electron microscopy; tremolite; x-ray diffraction; asbestiform; asbestos; chrysotile; detection; fiber; SP506, pp. 325-337 (Nov. 1978).

Identification; personal identification; security; surveillance; auditing; authorization; computer security; cryptography; device identification; distributed processing; SP500-33.

Identification; reduced cell; classification; crystal data; crystal-line material; evaluation; 17749.

Ignition; ignition time; polyesters; pyrolysis; textiles; cellulosic materials; cotton fabrics; fabrics; fire retardant materials; flame resistant fabrics; flame retardants; heat sources; NBS-GCR-78-126.

Ignition; probabilities; room fires; computer programs; fire tests; flashover; NBS-GCR-77-112.

Ignition; room fires; rooms; thermodynamics; ventilation; computer programs; fire plume; flashover; NBS-GCR-77-111.

Ignition; room fires; thermodynamics; ventilation; computer program; flashover; furniture; NBS-GCR-77-110.

Ignition source; incidental fires; mobile homes; repeatability; source fires; upholstered furniture; chairs; compartment fires; crib fires; fire tests; NBSIR 78-1522.

Ignition time; polyesters; pyrolysis; textiles; cellulosic materials; cotton fabrics; fabrics; fire retardant materials; flame re-

- sistant fabrics; flame retardants; heat sources; ignition; *NBS-GCR-78-126*.
- Illumination; illumination levels; lighting; task lighting; vision; 18230.
- Illumination levels; lighting; lighting design; task lighting; energy conservation; *NBSIR 77-1306*.
- Illumination levels; lighting; task lighting; vision; illumination; 18230.
- Image analysis; morphological analysis; paper fibers; pattern recognition; pulp characterization; algorithms; artificial intelligence; *NBSIR 78-1442*.
- Image contrast; image information content; image processing; patient exposures; signal-to-noise ratio; statistical noise; antiscatter grid; 17437.
- Image formation; resolution; scanning electron microscopy; specimen current; contrast mechanisms; depth sensitivity; 17836.
- Image information content; image processing; patient exposures; signal-to-noise ratio; statistical noise; antiscatter grid; image contrast; 17437.
- Image processing; patient exposures; signal-to-noise ratio; statistical noise; antiscatter grid; image contrast; image information content; 17437.
- Image quality; neutron radiography; nondestructive testing; radiography; signal processing; flash radiography; high energy radiography; 18033.
- Image scanning; microdensitometry; optical linearity; overfilled optics; sample scanning; underfilled optics; coherence theory; effective incoherence; 17456.
- Image shearing eyepiece; integrated circuits; linewidths; microelectronics; optical microscopes; calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; 17669.
- Image shearing eyepiece; integrated circuits; linewidths; microelectronics; optical microscopes; calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; 17851.
- Image system; motion-response; neutron radiography; non-destructive evaluation; real-time; television; fluoroscopy; 17842.
- Imidazole; transition metal complex; x-ray structure determination; hexakis(imidazole)nickel(II) chloride tetrahydrate; hydrate; hydrogen bonding; 17731.
- Immuno-marker; markers; silica spheres; DDS; electron-microscopy; 18201.
- IMP; linked lists; multidimensional scaling; PEP-I; plotting algorithms; cluster analysis; Guttman-Lingoes Program Series; *SP503*, pp. 236-240 (Mar. 1978).
- IMP; OMNITAB II; SPSS; statistical program package; statistics, teaching of; BMD; *SP503*, pp. 265-270 (Mar. 1978).
- Impact; mathematical model; ocular contusion; propelled objects; tolerance; eye injury; 17986.
- Impact energy; plastic failure; secondary hardening; strain aging; temper embrittlement; carbon-manganese steel; dimpled rupture; ductile failure; embrittlement; 17974.
- Impact resistance; industrial cladding; moisture resistance; salt spray resistance; abrasion resistance; coatings; color and gloss change; 17943.
- Impacts; performance-based standards; research; architecture; building regulatory system; codes; health and safety; historic buildings; historic preservation; *SP524*.
- Impedance; microwaves; network analyzer; reflection coefficient; reflectometer; scattering parameters; self-calibration techniques; six-port junction; 18046.
- Impedance; network analyzer; power; reflection coefficient; reflectometer; scattering parameters; six-port; voltage; calibration; current; *TN1004*.
- Impedance, acoustic, measurement of; impedance, acoustic, of asphalt; noise measurement, truck passby; sound propagation, in wind gradients; sound propagation over impedance surface; wind gradients, effect on sound propagation; acoustic impedance of asphalt; acoustics; *NBSIR 78-1541*.
- Impedance, acoustic, of asphalt; noise measurement, truck passby; sound propagation, in wind gradients; sound propagation over impedance surface; wind gradients, effect on sound propagation; acoustic impedance of asphalt; acoustics; *NBSIR 78-1541*.
- Impenetrable coil; intrinsic viscosity; necklace model; free draining coil; hydrodynamic interaction; 17573.
- Imperfect geometry; interferometry; methods divergence; step-height measurement; stylus instrument; surface texture; uncertainties; 17625.
- Imperfections; policy; resource allocation; technology; venture capital; barriers; 17377.
- Implementation; laboratory automation; minicomputers; software; automation; design; hardware; 18289.
- Implementation; maintenance; package design; reliability; reporting errors; statistical package; STATJOB; testing; development; documentation; *SP503*, pp. 211-214 (Mar. 1978).
- Implementation; management analysis; management science; organization change; planned change; program evaluation; evaluation; evaluative research; 18095.
- Implementation; modularization; PL/I and PLUM; testing; assertions; data abstractions; 18087.
- Implementation; professional competence; training program; building code; code officials; effective "U" values; energy conservation; *SP518*, pp. 313-322 (Aug. 1978).
- Implementation; standards; assessment; building codes; building design; disaster mitigation; earthquakes; engineering; *NBSIR 78-1549*.
- Import documents; legal questions; National Committee on International Trade Documentation (NCITD); Office of Facilitation; United Nations; Working Party on Facilitation of International Trade Procedures; *NBSIR 78-1446*, pp. 91-95 (Apr. 1978).
- Imprecision; merit; quantitation limits; reporting of data; systematic error; x-ray fluorescence analysis; atmospheric pollutants; counting statistics; detection limits; energy vs. wavelength dispersion; 17507.
- Improvements; installation; portability; testing; errors; *SP503*, pp. 221-224 (Mar. 1978).
- Impulse; impulse generator; pulse generator; spectrum; spectrum amplitude; avalanche transistor; *NBSIR 78-880*.
- Impulse; pulse measurement; step response; cavity resonance; electromagnetic interference; high voltage; 18162.
- Impulse; pulse measurement; transient digitizer; automation; data acquisition system; high voltage; 18161.
- Impulse; standard; TEM horn; antenna; conical; fields; 18182.
- Impulse generator; J band; microwave; picosecond; spectrum amplitude; step recovery diode; time domain; avalanche transistor; *NBSIR 78-888*.
- Impulse generator; pulse generator; spectrum; spectrum amplitude; avalanche transistor; impulse; *NBSIR 78-880*.
- Impulse measurement; Kerr effect; magnetic fields; magneto-optics; Pockels effect; waveform measurements; current measurement; electric fields; electric power transmission; electro-optics; Faraday effect; high voltage measurement; 17868.
- Impurities; Kapitza resistance; annealing; copper; cryogenics; dislocations; heat transfer; helium 3; helium 4; 17917.
- Impurity; oxidation; resistance ratio; resistivity; copper; electrical property; 17821.
- Impurity reactions; laser window; precipitate; clusters; deterioration; diffusion; enhanced diffusion; *SP509*, pp. 24-35 (Dec. 1977).

- IMS information retrieval; KWOC indexing; least-squares; linear regression; MIS; plotting; statistical analysis; Boolean search system; computer programs; curve fitting; data analysis; data base management; data retrieval; file handling; graphic analysis; *H125*.
- In control; measurement process; predictability; probability plots; randomness; statistics; testing assumptions; 4-plot analysis; assumptions; data analysis; distribution analysis; graphical analysis; *17935*.

- In-line analysis; nuclear fuel reprocessing; nuclear safeguards; dynamic materials accounting; *SP528*, pp. 208-220 (Nov. 1978).
- Inner products; interval analysis; polynomial evaluation; relative error; rounding error; software; chopping; disc analysis; error analysis; floating-point arithmetic; *17815*.
- Innovation; international standards; metrication; performance standards; research; technological trends; building regulations; *SP518*, pp. 177-190 (Aug. 1978).
- Innovation; life cycle costing; local government; performance specifications; procurement policy; state government; test methods; value incentive clauses; Veterans Administration; ETIP; Federal Supply Service; *17485*.
- Innovation; life cycle costing; local government; procurement policy; state government; test methods; value incentive clauses; ETIP; Federal Supply Service; *17862*.
- Innovation; life cycle costing; National Association of State Purchasing Officials; National Institute of Government Purchasing; policy research; procurement; technological change; ETIP; Federal Supply Service; *17861*.
- Innovation; market aggregation; performance requirements; prescriptive standards; standards development; economics; formulation; *SP518*, pp. 161-164 (Aug. 1978).
- Innovation, technological; technological innovation; contracting, expanded areas; incentives, performance; *17553*.
- Innovations; log homes; minimum property standards; model code agencies; regulations; building codes; code changes; incentives; *SP518*, pp. 49-66 (Aug. 1978).
- Innovations; research findings; scientific methods; socio-political system; technical expertise; building design; building regulatory system; decision processes; hazards-related phenomena; *SP518*, pp. 25-47 (Aug. 1978).
- Innovative practices; regulatory research; standards development; administrative procedures; building codes; building regulations; buildings; economic impacts; environmental considerations; *SP518*.
- Inorganic compound; melting point; molten salt; phase diagrams; data compilation; eutectic; eutectic composition; eutectic data; eutectic temperature; *NSRDS-NBS61, Part 1*.
- Inplane shear forces; racking stiffness; racking strength; windloads; corner brace; *SP523*, pp. VI-25—VI-34 (Sept. 1978).
- Input-output devices; one-body wear; tribological problems; two-body wear; wear analysis of business machines; gear-type transmissions; *SP514*, pp. 121-127 (May 1978).
- Input/output; interindustry; replacement; resources; transactions; capital; corrosion costs; dollar flow; economics; *SP511-2*.
- Insertion loss; mobile antenna; mobile transceiver; transmission; cable assembly; coaxial cable; *18204*.
- In-situ analysis; plutonium; x rays; americium; detection limits; gamma rays; germanium detector; *SP528*, pp. 201-206 (Nov. 1978).
- Inspection; legislation; manufactured building; rules and regulations; standards; building regulation; construction; enforcement; *NBSIR 78-1503*.
- Inspection; measurement science; quality control; automatic inspection; automation; dynamic measurement; *18062*.
- Inspection; neutron interrogation; neutron radiograph; non-destructive evaluation; nondestructive inspection; radiography; *17710*.
- Inspection; neutron radiography; neutron source; nondestructive evaluation; Californium-252; gaging; *18080*.
- Inspection; personnel qualifications; quality control manual; regulations; third party agencies; training; certification; compliance assurance programs; industrialized building construction; *SP518*, pp. 369-379 (Aug. 1978).
- Inspection; theory of games; *17817*.
- Inspection by neutron radiography; neutron radiography; non-destructive evaluation by neutron radiography; nondestructive testing by neutron radiography; radiography-neutron; *17850*.
- Instabilities; star formation; hydrodynamics; *17387*.
- Installation; portability; testing; errors; improvements; *SP503*, pp. 221-224 (Mar. 1978).
- Installation parameters; load modules; maintenance; portability; versions; dated software; diagnostics; distribution; *SP503*, pp. 215-220 (Mar. 1978).
- Institute for Computer Sciences and Technology publications; bibliography; computer literature; computer science publications; *NBSIR 78-1425*.
- Institutional factors; social value; energy sources; fuel selection; *18069*.
- Instrumental; radiochemical; standard reference materials; toxic elements; accuracy; food grain; *18315*.
- Instrumental broadening; line shapes; line shifts; pressure broadening; resonance broadening; Stark broadening; van der Waals broadening; atomic; *SP366, Supplement 3*.
- Instrumentation; liquefied natural gas; measurement; tank gauging; flow; *17889*.
- Instrumentation; liquids; measurement; natural gas; cryogenic; density; flowmetering; *17432*.
- Instrumentation; magnetic field measurements; measurement procedures; power transmission lines; calibration procedures; electric field measurements; *18072*.
- Instrumentation; measurement; procurement; purchasing; technical specifications; developing countries; *NBSIR 78-891*.
- Instrumentation; national measurement system; pressure measurements; calibrations; *17547*.
- Instrumented usage data; life cycle costing; repair data; small appliances; field data collection techniques; hair dryers; *NBSIR 78-1500*.
- Insulated buildings; overheating conductors; residential branch circuit wiring; thermal insulation and electrical wiring; branch circuit wiring; electrical fires; heat generation in receptacles; *NBSIR 78-1477*.
- Insulation; ion metal; metric; standard reference data; computers; digital-cosine; information resources; *DIM/NBS 62*, No. 10, 1-32 (1978).
- Insulation; life-cycle cost analysis; building economics; economic analysis; energy conservation; engineering economics; housing; *17574*.
- Insulation; materials performance; reflective surfaces; seals; selection of materials; solar energy systems; standards; absorber coatings; absorber plates; cover plates; enclosure; *NBSIR 77-1314*.
- Insulation; National Measurement System; nuclear safeguards; plastics migration; SRM's-metals; SRM's-steel; temperature scale; corrosion; electronics industry; *DIM/NBS 62*, No. 9, 1-32 (1978).

- Insulation; regulations; standards; State legislation; thermal efficiency; buildings; counties; energy conservation; enforcement; *SP518*, pp. 323-358 (Aug. 1978).
- Insulation; replacement windows; retrofitting; storm doors; storm windows; vapor barriers; weatherization; weatherstripping; caulks and sealants; clock thermostats; energy conservation; *TN982*.
- Insulation properties; residential heat loss; retrofitting houses; thermal conductivity; thermal insulation; thermography; air infiltration; condensation in buildings; energy conservation; energy measurements; fuel savings; heat-loss reduction; *BSS105*.
- Insulation standards; U-values; ASHRAE Standard; climatic conditions; energy conservation; glass area; heat transfer; *SP518*, pp. 205-218 (Aug. 1978).
- Insulator surfaces; ion and electron beam interaction; ion beams; surface conductivity; surfaces; beam profile measurement; *17793*.
- Insulators; ion beams; phosphors; surface conductivity; surfaces; visual images; charge storage; electron beams; *17522*.
- Insulator; ion beams; phosphors; surfaces; visual images; electron beams; *17707*.
- Integer programming; Monte Carlo techniques; optimum solution; random sample of feasible solutions; statistical approach and justification; computer; *SP503*, pp. 362-366 (Mar. 1978).
- Integral domains; matrix; matrix semigroups; multiplicative maps; Dedekind rings; *17576*.
- Integral fission measurement; spontaneous fission spectrum; $^{235}\text{U}(n,f)$; $^{238}\text{U}(n,f)$; $^{239}\text{U}(n,f)$; ^{252}Cf ; absolute; fission cross section; *17809*.
- Integrated appliances; utility systems; appliance combinations; energy conservation in dwellings; ERDA; heat recovery; hot water distribution systems; *17540*.
- Integrated circuit; line width; sheet resistance; silicon; test patterns; TTL; *17799*.
- Integrated circuit; linespacing; linewidth; metrology; microelectronics; optical microscope; photomask; precision; principles of measurement; accuracy; dimensional measurement; electron microscope; *17415*.
- Integrated circuits; Josephson junctions; pulses; superconductivity; electronics; *17910*.
- Integrated circuits; linewidth measurements; microelectronics; micrometrology; optical microscope; photomask; scanning electron microscope; semiconductor technology; *17811*.
- Integrated circuits; linewidths; microelectronics; optical microscopes; calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; *17669*.
- Integrated circuits; linewidths; microelectronics; optical microscopes; calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; *17851*.
- Integrated circuits; measurement technology; microelectronics; semiconductor devices; semiconductor materials; semiconductor process control; silicon; electronics; *NBSIR 78-1444*.
- Integrated circuits; measurement technology; microelectronics; semiconductor devices; semiconductor materials; semiconductor process control; silicon; electronics; *NBSIR 78-1444-2*.
- Integrated circuits; micrometrology; microscopy; optical imaging; partial coherence; photolithography; *17795*.
- Integrated circuits; probe card; probe pads; probing; test pattern; wafer testing; automated measurements; *18249*.
- Integrated circuits; semiconductor technology; VLSI; cooperative technology; electronics; foreign competition; *NBSIR 78-1482*.
- Integrated intensities; lattice constants; peak intensities; powder patterns; reference intensities; standard; x-ray diffraction; crystal structure; *Monogr. 25, Section 15*.
- Integrated manufacturing systems; productivity; shipbuilding; automation; computer aided manufacturing; discrete part batch manufacturing; *18060*.
- Integrated safeguards systems; safeguards and nonproliferation; active and passive fuel cycle safeguards concepts; *SP528*, pp. 78-82 (Nov. 1978).
- Integrated utilities; performance guidelines; residential utilities; total energy; utilities; conservation; *NBSIR 78-1395*.
- Integrated utility systems; international information exchange; MIUS; report to CCMS plenary; CCMS; CCMS-MIUS project; information exchange; *NBSIR 78-1468-1*.
- Integrated utility systems; international information exchange; MIUS; report to CCMS plenary; CCMS; CCMS-MIUS project; information exchange; *NBSIR 78-1468-2*.
- Integrated utility systems; solid waste management; thermal systems; total energy; wastewater treatment; co-generation; *NBSIR 78-1563*.
- Intelligent terminal; statistical data systems; data base dictionary; data editing; data entry; data independence; data management; distributed processing; *SP503*, pp. 367-372 (Mar. 1978).
- Intelligent terminals; minicomputers; protocols; command languages; communications; computer access; computer networks; *SP500-35*.
- Intense laser; multiphoton absorption; Rabi oscillations; time dependent populations; coherent excitation; finite-level atom; finite-level molecule; *18010*.
- Intense laser field; optical collisions; strontium; cross section decrease; *17926*.
- Intensifier screen standards; radiographic intensifier screen efficiency; screen evaluations; sensitivity of screens; spectroradiometry of screens; x-radiation of intensifier screens; fluorescent screens; *17577*.
- Intensity; lifetime; line strength; oscillator strength; transition probability; allowed; atomic; discrete; forbidden; *SP505*.
- Intensity standard; paramagnetic resonance; ruby; spin concentration; standard reference material (SRM); absolute measurement; *J. Res.* **83**, No. 2, 133-164 (1978).
- Intensity standard; paramagnetic resonance; ruby; spin concentration; standard reference material (SRM); absolute measurement; *SP260-59*.
- Intensity-loss relationships; loss simulation; earthquake insurance; earthquake losses; *SP523*, pp. VII-16—VII-28 (Sept. 1978).
- Interaction second virial coefficients; krypton; virial coefficients; volumetric data; helium; helium-krypton mixture; *18232*.
- Interactions; orthogonal contrasts; unbalanced data; automatic interaction procedures; default decisions; hypothesis testing; *SP503*, pp. 54-57 (Mar. 1978).
- Interactions with high-intensity lasers; collisions; collisions in the presence of lasers; high-intensity lasers; *18248*.
- Interactive; language; portability; software; standards; terminal; application; computer; displays; graphics; independence; *SP503*, pp. 107-116 (Mar. 1978).
- Interactive; measurement; performance evaluation; performance measurement; remote terminal emulation; remote terminal emulator; teleprocessing; evaluation; *17634*.
- Interactive; measurement; response time; selection; service; turnaround time; evaluation; *FIPS PUB 57*.
- Interactive; program; statistical analysis; *SP503*, pp. 400-403 (Mar. 1978).
- Interactive computer graphics; man-computer interface; allocation of tasks; data display and analysis; graphics interface; human factors; *SP503*, pp. 122-130 (Mar. 1978).
- Interactive computing; on-line computing; statistical programs; conversational computing; *SP503*, pp. 384-388 (Mar. 1978).
- Interactive computing; plots; graphics; *SP503*, pp. 352-356 (Mar. 1978).

- Interactive data analysis; data analysis on minicomputers; *SP503*, pp. 2-8 (Mar. 1978).
- Interactive graphic program; Monte Carlo technique; simulation; transformations; distributions; extremes; *SP503*, pp. 292-296 (Mar. 1978).
- Interactive statistical computer graphics; dialogue; human factors engineering; *SP503*, pp. 117-121 (Mar. 1978).
- Interactive statistical systems; minicomputer; statistical software design; *SP503*, pp. 26-34 (Mar. 1978).
- Interactive systems; performance evaluation; analysis; cost-benefit; cost-effectiveness; economics; *17360*.
- Interatomic interactions; long range perturbation theory; rare gas oxides; rare gas selenides; rare gas sulfides; collision-induced emission; *17396*.
- Intercalibration; internal standard; marker compounds; petroleum; reference materials; SRM; trace organic analysis; *17653*.
- Intercalibration; liquid chromatography; marine sediment; polynuclear aromatic hydrocarbons; gas chromatography; gas chromatography-mass spectrometry; hydrocarbons; *17549*.
- Intercalibration; petroleum hydrocarbons; water pollution; environmental sampling; *17964*.
- Intercomparative measurements; measurements; radioactivity standards; traceability; activity; *17743*.
- Intercomparison of laser meters; laser beam calorimeter; laser beam overspill monitor; laser beam power and energy measurement; laser calorimeter backscatter monitor; water-stirred calorimeter; CW high energy laser; electrically calibrated laser meter; *17891*.
- Intercomparisons; neutron absorbed dose; neutron-induced reaction rates; neutron kerma; neutron source emission rate; statistical analysis; thermal neutron flux density; fast neutron flux density; *17498*.
- Inter-computer network; internetting; NBS Data Encryption Standard; Network Cryptographic Devices; Network Security Center; access authorization; access control; authentication; computer network security; cryptography; end-to-end encryption; *SP500-21, Vol. 2*.
- Interdiffusion coefficients; intrinsic diffusion coefficients; Kirkendall shift; Matano analysis; silver; single crystals; vacancy wind; alloys; atom flux; cadmium; chemical interdiffusion; experiments; *18081*.
- Interface; robust estimation; statistical analysis; statistics and numerical analysis; Bayesian methods; *SP503*, pp. 199-203 (Mar. 1978).
- Interface standards; computer peripherals; computer standards; computer systems; *NBSIR 78-1487*.
- Interface standards; manufacturing systems; numerical control; productivity; computer aided manufacturing; computers; *18118*.
- Interface standards; microcomputers; standards; coal mining; computers; control systems; industrial equipment; *NBSIR 77-1301*.
- Interface standards; performance evaluation; programming languages; robot classification; control systems; industrial robots; *17885*.
- Interface standards; standards; automation; computer aided design; computer aided manufacturing; communications; *18120*.
- Interfaces; motivation for standardization; standards; automation; computer aided manufacturing systems; computer integrated manufacturing systems; *18119*.
- Interfacing capabilities; P-STAT; SPSS; social science statistical systems; statistical design decisions; statistical systems; *SP503*, pp. 260-264 (Mar. 1978).
- Interfering signal; Nb SQUID; self-generated interference spectrum; SQUID; very low-power cryocooler; *SP508*, pp. 59-65 (Apr. 1978).
- Interferometer; laser; laser interferometer; laser meter; laser wavelength; *17659*.
- Interferometer; maser; nitrogen; refractive; submillimeter; water vapor; index; *17888*.
- Interferometer; photoelastic; piezobirefringence; piezo-optic; strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; *18275*.
- Interferometer, fractions; exact fractions; fractions; *17548*.
- Interferometry; laser materials; photoelasticity; piezo-optic constants; refractive index; stress birefringence; thermal coefficient of refractive index; thermal expansion; *17520*.
- Interferometry; lattice absorption; photoelastic constants; photoelasticity; piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; dispersion; elasto-optic constants; electronic absorption; *17354*.
- Interferometry; methods divergence; step-height measurement; stylus instrument; surface texture; uncertainties; imperfect geometry; *17625*.
- Interhalogens; laser excitation; quenching; $\text{Br}^*(^2\text{P}_{1/2})$; collisional deactivation; halogens; *17687*.
- Interindustry; replacement; resources; transactions; capital; corrosion costs; dollar flow; economics; input/output; *SP511-2*.
- Interior finish; life safety; mattress; mobile home; radiant heat flux; room fires; upholstered chairs; ASTM E-84 Tunnel Test; fire growth; fire tests; flame spread; flashover; incidental fire; *NBSIR 78-1531*.
- Interior finishes; life safety; mobile homes; radiant heat flux; room fires; ASTM E-84 Tunnel Test; carbon dioxide; carbon monoxide; fire growth; fire tests; flame spread; flashover; *NBSIR 78-1530*.
- Interlaboratory comparison; microelectronic; pull test; ultrasonic bond; wire bond; bond; *18245*.
- Interlaboratory photodetector measurement comparison; laser power measurement; photodetectors; radiant power measurement; radiometric instrument characterization; radiometric measurement accuracy; detector responsivity measurement; *17638*.
- Interlaboratory tests; potassium; blood urea nitrogen; calcium; CAP survey results 1975; clinical accuracy; clinical precision; *18156*.
- Interlibrary computer communications; library computer network; protocol; application-level protocol; bibliographic services network; book vendors network; computer communications; computer network protocol; computer-to-computer protocol; control header structure; *18226*.
- Interlibrary loan; library cost-effectiveness analysis; CONTU guidelines; copyright law; *NBSIR 78-1427*.
- Intermolecular forces; binary deviation parameters; combining rules; He plus noble gases; *18025*.
- Intermolecular interactions; matrix isolations; methyl formate; torsion vibrations; acetonitrile dimers; far infrared spectrum; *17563*.
- Internal degrees of freedom; mixtures; prediction technique; thermal conductivity coefficient; corresponding states; critical point; *18193*.
- Internal energy; saturated vapor densities; thermodynamic properties; vapor pressures; equation of state; ethylene; *J. Res. 83, No. 4, 325-327 (1978)*.
- Internal energy; steam; thermodynamic potential; critical phenomena; critical-point universality; equation of state; *17480*.
- Internal fields; Ising model; meta magnet; molecular field theory; random phase approximation; bicritical end point; constant coupling approximation; Curie point; FeBr_2 ; hessian; *17748*.
- Internal fields; magnetic multipole; Mie scattering theory; Raman scattering; resonances; small particles; complex refractive index; efficiency factor for absorption; electric multipole; *18280*.

- Internal reflection; optical constants; water absorption; adsorbed water; CaF_2 surfaces; infrared spectrum; *SP509*, pp. 112-116 (Dec. 1977).
- Internal rotation; *m*-cresol; *o*-cresol; *p*-cresol; phenol; potential barrier heights; rotational isomers; torsional frequencies; ideal gas thermodynamic properties; *JPCRD 7*, No. 2, 417-424 (1978).
- Internal rotational barrier height; methanoic (formic) acid; monomer; torsional frequencies; dimer; enthalpy; entropy; equilibrium constant of formation; ethanoic (acetic) acid; Gibbs energy of formation; heat capacity; *JPCRD 7*, No. 1, 363-378 (1978).
- Internal rotations; nuclear magnetic resonance; proton second moments; proton spin-lattice relaxation times; tetramethylammonium cadmium chloride; crystallographic phase transformations; *17775*.
- Internal standard; marker compounds; petroleum; reference materials; SRM; trace organic analysis; intercalibration; *17653*.
- Internal viscosity; intrinsic birefringence; intrinsic viscosity; necklace model; hydrodynamic interaction; *17758*.
- International Atomic Time (TAI); legal time; standard time; time; Consultative Committee for the Definition of the Second (CCDS); Coordinated Universal Time; Ephemeris Time; *17453*.

- Ion and electron beam interaction; ion beams; surface conductivity; surfaces; beam profile measurement; insulator surfaces; 17793.
- Ion angular distribution; water; ammonia; bonding; chemisorption; electron stimulated desorption; 17590.
- Ion beam scanning; ion channeling; ion implantation; Rutherford backscattering alignment; silicon crystallographic orientation; profiling; controlled doping profiles; critical channelling angle; C-V profiling; *SP400-49*.
- Ion beams; laser-Raman spectroscopy; microanalysis; microprobes; x-ray spectrometry; electron beams; 18023.
- Ion beams; phosphors; surface conductivity; surfaces; visual images; charge storage; electron beams; insulators; 17522.
- Ion beams; phosphors; surfaces; visual images; electron beams; insulators; 17707.
- Ion beams; surface conductivity; surfaces; beam profile measurement; insulator surfaces; ion and electron beam interaction; 17793.
- Ion channeling; ion implantation; Rutherford backscattering alignment; silicon crystallographic orientation; profiling; controlled doping profiles; critical channelling angle; C-V profiling; ion beam scanning; *SP400-49*.
- Ion cyclotron resonance; ion molecule rate constants; ion structures; isomerization; tropylium ions; benzyl ions; hydride ion transfer; 17722.
- Ion cyclotron resonance; ionization potentials; aromatic compounds; charge transfer equilibria; entropy; 17734.
- Ion cyclotron resonance; ion-molecule reaction; proton transfer; chloride transfer; fluoride transfer; halogenated methyl ions; halomethanes; heats of formation; 17736.
- Ion cyclotron resonance; proton transfer; t-alkyl ions; t-butyl ion; alkene; entropy; equilibrium constant; heat of formation; 17695.
- Ion cyclotron resonance spectrometry; ionization potentials; ion-molecule reactions; aromatic cations; charge transfer; equilibrium constants; 17673.
- Ion deflection device; laser Doppler anemometer; Reynolds number; angular insensitivity; fluidic device; hot wire anemometer; 17586.
- Ion desorption; oxygen; tungsten; adsorption; angular distribution; chemisorption; desorption; electron stimulated desorption; hydrogen; 17739.
- Ion exchange; mordant; neutron activation; adhesion; adsorption; dental materials; 18222.
- Ion exchange; polymorphism; potassium aluminum silicate; rubidium aluminum silicate; x-ray diffraction; crystal chemistry; 18027.
- Ion exchange purification; potassium bromide; reactive gas purification; selective ion filters; strontium fluoride; barium fluoride; *SP509*, pp. 37-55 (Dec. 1977).
- Ion fragmentation; molybdenum pentafluoride; saturated vapor; thermodynamic properties; vapor association; enthalpy; entropy; gas oligomers; Gibbs energy; 17395.
- Ion implantation; ion microprobe mass analysis; line-width measurements; nuclear-track technique; particle-impact noise detection; photolithography; photovoltaic method; p-n junction; power-device grade silicon; resistivity; resistivity variations; *SP400-36*.
- Ion implantation; isothermal transient capacitance method; isotope shift; thermally stimulated capacitance measurement; vibronic coupling; deep level studies; 17966.
- Ion implantation; Rutherford backscattering alignment; silicon crystallographic orientation; profiling; controlled doping profiles; critical channelling angle; C-V profiling; ion beam scanning; ion channeling; *SP400-49*.
- Ion metal; metric; standard reference data; computers; digital-cosine; information resources; insulation; *DIM/NBS 62*, No. 10, 1-32 (1978).
- Ion microprobe analysis; Si-containing materials; alpha-SiC; 18137.
- Ion microprobe mass analysis; line-width measurements; nuclear-track technique; particle-impact noise detection; photolithography; photovoltaic method; p-n junction; power-device grade silicon; resistivity; resistivity variations; resistors; sheet; *SP400-36*.
- Ion microprobe mass analysis; local thermal equilibrium model; microanalysis; quantitative analysis; secondary ion mass spectrometry; surface analysis; 17837.
- Ion microprobe mass analysis; microanalysis; quantitative analysis; relative elemental sensitivity factors; round robin analysis; secondary ion mass spectrometry; 18052.
- Ion microprobe mass analysis; microanalysis; particle analysis; secondary ion mass spectrometry; sputtering; depth profiling; 18053.
- Ion microprobe mass analysis; quantitation; secondary; sputtering; calibration procedures; depth profiling; 18022.
- Ion microprobe mass analyzer; microanalysis; particulate analysis; quantitative analysis; secondary ion mass spectrometry; surface analysis; 18028.
- Ion molecule rate constants; ion structures; isomerization; tropylium ions; benzyl ions; hydride ion transfer; ion cyclotron resonance; 17722.

- Ion pair defect; neutron flux monitor; neutron standards; hydrogen gas proportional counter; 18229.
- Ion storage; laser spectroscopy; Penning trap; radiation pressure; atomic spectroscopy; Doppler narrowing; Doppler shifts; frequency standards; high-resolution spectroscopy; 18148.
- Ion structures; isomerization; tropylium ions; benzyl ions; hydride ion transfer; ion cyclotron resonance; ion molecule rate constants; 17722.
- Ion structures; nitronium ion; toluene ions; charge transfer; ion-molecule reactions; 17693.
- Ion-exchange adsorption; Langmuir-adsorption rate equation; mordanting and adhesion; polymer bonding with hard tooth tissues; rates of Ni(II) and Cu(II) ion-exchange; hydroxyapatite or bone-mineral; 18155.
- Ionic solutions; thermodynamic properties; activities; alkaline earth salts; aqueous; critical evaluation; electrolytes; equilibrium constants; free energy; Gibbs energy; 17772.
- Ionic conductivity; KCl; laser window materials; optical absorption; Eu impurity; *SP509*, pp. 96-104 (Dec. 1977).
- Ionic conductors; single crystals; solid electrolytes; Bridgman growth; crystal growth; 18011.
- Ionic crystals; neutron scattering; phonons; 17417.
- Ionic recombination; rare-gas fluorine lasers; charge transfer; 17650.
- Ionic recombination; rare-gas fluorine lasers; charge transfer; 17652.
- Ionic/electronic conductors; phase equilibria; thermogravimetric; cerium niobate; cerium oxide; cerium tantalate; 17994.
- Ionic/electronic conductors; phase equilibria; thermogravimetric; cerium niobate; cerium oxide; cerium tantalate; 18073.
- Ion-ion recombination; mercury-halide lasers; 17954.
- Ion-ion recombination; rare gas-halide laser rates; 18217.
- Ionization; laser; neon; opto-galvanic; collision; discharges; 17946.
- Ionization; laser bandwidth; multiphoton absorption; multiphoton dynamics; nonresonant processes; n-photon Bloch equations; pole approximation; 3-photon Bloch equations; ac Stark shift; adiabatic approximation; dissociation; harmonic generation; 17750.
- Ionization; triple-differential cross section; helium; 17849.
- Ionization; triple-differential cross sections; argon; cross sections; 17903.
- Ionization chamber; light extinction; light scattering; Mie scattering; Rayleigh scattering; smoke measurements; fire testing; *NBSIR 78-1502*.
- Ionization chamber; primary standard; unit; absorbed dose; absorbed-dose calibration; calorimeter; dissemination; exposure calibration; 17440.
- Ionization detectors; light-scattering detectors; particle size distribution; smoke; smoke detectors; aerosol generators; detector testers; fire detectors; *TN973*.
- Ionization potentials; aromatic compounds; charge transfer equilibria; entropy; ion cyclotron resonance; 17734.
- Ionization potentials; ion-molecule reactions; aromatic cations; charge transfer; equilibrium constants; ion cyclotron resonance spectrometry; 17673.
- Ionization potentials; lanthanides; rare earths; spectra; Zeeman effect; atomic energy levels; atomic spectroscopy; electron configurations; *NSRDS-NBS60*.
- Ionization theory; spectral density; tunneling; dc discharges; dc Stark effect; field emission; 18311.
- Ionizing radiation; ion-molecule reactions; metric; molecular structure; perspectives on NBS; solar energy; SRM's; CIPM report; electrical measurements; energy; hourly solar radiation; *DIM/NBS 62*, No. 1, 1-32 (1978).
- Ionizing radiation; measurement assurance; National Measurement System; standards; users of radiation; dissemination; *NBSIR 75-946*.
- Ionizing radiation; measurement needs; measurement system structure; mechanical quantities; National Measurement System; optical quantities; thermal quantities; time and frequency; acoustics; economics of measurement; electrical quantities; *NBSIR 75-925*.
- Ionizing radiation; mechanical quantities; national measurement system; optical quantities; surface properties; thermal quantities; time and frequency; acoustics; atomic properties; economics; electrical quantities; *NBSIR 75-947 (Revised December 1977)*.
- Ionizing radiation effects; radiation dose; radiation testing; scanning electron microscopy; semiconductor devices; total dose screening; hardness assurance; 17532.
- Ion-molecule equilibria; isotope effects; proton affinity; proton transfer; p-xylene; toluene; 17694.
- Ion-molecule reaction; proton transfer; chloride transfer; fluoride transfer; halogenated methyl ions; halomethanes; heats of formation; ion cyclotron resonance; 17736.
- Ion-molecule reactions; aromatic cations; charge transfer; equilibrium constants; ion cyclotron resonance spectrometry; ionization potentials; 17673.
- Ion-molecule reactions; ion structures; nitronium ion; toluene ions; charge transfer; 17693.
- Ion-molecule reactions; mass spectrometry; rate constants; thermochemistry; fluorinated ions; fluorocarbons; 17735.
- Ion-molecule reactions; metric; molecular structure; perspectives on NBS; solar energy; SRM's; CIPM report; electrical measurements; energy; hourly solar radiation; ionizing radiation; *DIM/NBS 62*, No. 1, 1-32 (1978).
- Ionography process; neutron radiographs; radiography; thermal neutrons; direct imaging; electronic radiography; 18208.
- Ions; ketene; mass spectrometry; methane; methane- d_4 ; photoionization; threshold photoelectron spectroscopy; time of flight mass spectrometry; coincidence; fragmentation; 17774.
- Ions; microwave spectra; molecular lines; radio astronomy; rotational spectra; interstellar sources; 17720.
- Ions; molybdenum; spectra; structure; ultraviolet; 17375.
- Ion-selective electrode; silver cyanide indicator; silver electrode; cyanide; cyanide analyzer; gas dialysis; 17406.
- Ion-selective electrode; silver cyanide indicator; silver electrode; cyanide analyzer; cyanide gas diffusion; 18104.
- Ion-selective electrodes; mass spectrometry; polarography; spectrochemical analysis; thermal analysis; wet chemistry; x-ray fluorescence; activation analysis; characterization; chemical composition; chromatographic analysis; coulometry; electron probe microanalysis; 17595.
- IPTS; low temperature scales; thermometry; fixed points; 18138.
- IPTS-68; radiation temperature; resistance thermometer; standard thermocouple; temperature scale; thermodynamic temperature; interpolation equation; 17374.
- IR detectors; orbiting telescopes; cryogenic cooling; *SP508*, pp. 153-157 (Apr. 1978).
- IR reflectance; laser mirrors; low-expansion materials; copper film; film adhesion; glass-ceramics; *SP509*, pp. 215-221 (Dec. 1977).
- Iron; minerals; mining; quarrying; solid waste; amphibole; copper; crushed stone; fiber; *SP506*, pp. 461-469 (Nov. 1978).
- Iron; noncrystalline films; passive films; repassivation; sensitization; stainless steel; uranium; x-ray photoelectron spectroscopy; crevice corrosion; field ion microscopy; *NBSIR 78-1429 (Navy)*.
- Iron alloy; maraging steel; nickel alloy; Poisson ratio; shear modulus; sound velocity; Young's modulus; bulk modulus; compressibility; 17428.
- Iron concentrations; isotope dilution; nanogram per gram; thermal ionization mass spectrometry; 17681.

- Irradiance; lamp; radiance; radiometry; source; spectroscopy; standard; ultraviolet; calibration; deuterium; 17606.
- Irradiation; irradiator; national standard; radiation safety; radiation source; safety standard; gamma radiation; H127.
- Irradiation; SRM's; standard reference materials; biological standard reference materials; gas phase separation; iodine; 17854.
- Irradiator; national standard; radiation safety; radiation source; safety standard; gamma radiation; irradiation; H127.
- Irreversible thermodynamics; low-cycle fatigue; mathematical modeling; multi-axial fatigue; polymethyl-methacrylate; stainless steel; viscoplasticity; creep-fatigue interaction; dissipation; energy approach; fatigue; hysteresis loop; 17424.
- Ising model; meta magnet; molecular field theory; random phase approximation; bicritical end point; constant coupling approximation; Curie point; FeBr_2 ; hessian; internal fields; 17748.
- Isobutane; isobutylene; propane; propylene; 1-butene; 1,3-butadiene; acetylene; butane; electron; energy-loss spectra; ethane; ethylene; 17620.
- Isobutene; mass spectrometer; mechanism; ozone; propene; reaction; gas; 18224.
- Isobutylene; propane; propylene; 1-butene; 1,3-butadiene; acetylene; butane; electron; energy-loss spectra; ethane; ethylene; isobutane; 17620.
- Isobutyric acid + water; liquid density; liquid-liquid critical point; magnetic densimeter; coexistence curve; consolute point; critical exponent; critical phenomena; deuterated isobutyric acid + heavy water; 17449.
- Isobutyric anhydride; mass spectrometry; nuclear magnetic resonance; uric acid; ^{13}C chemical shifts; ^{13}C and ^{15}N coupling constants; ^{14}C and ^{15}N labeled derivatives; acylation; 17351.
- Isoelectronic sequence; line strengths; manganese; oscillator strengths; systematic trends; transition probabilities; vanadium; allowed transitions; chromium; *f*-values; JPCRD 7, No. 2, 495-630 (1978).
- Isolation; noise; noise criteria; rating scheme; sound transmission; building acoustics; building codes; SP499.
- Isomer; Mossbauer effect; shift; transition metals; volume corrections; charge flow; electronegativity; 17983.
- Isomerization; shock tube; trimethylene; 1-pentene; biradical; concerted; cyclopentane; cyclopropane; decomposition; decyclization; heat of formation; 18111.
- Isomerization; tropylium ions; benzyl ions; hydride ion transfer; ion cyclotron resonance; ion molecule rate constants; ion structures; 17722.
- Isomers; polymerization; synthesis; adhesion; aldehyde methacrylate; collagen; condensation reactions; copolymerization; coupling agents; dentin; functional monomers; hydroxybenzaldehydes; 18149.
- Isopropyl; pre-exponential factor; radical buffer; radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; decomposition; ethyl; heats of formation; hexamethylethane; 18110.
- Isothermal transient capacitance method; isotope shift; thermally stimulated capacitance measurement; vibronic coupling; deep level studies; ion implantation; 17966.
- Isotope correlation ratios; reactor history deduction; reactor history verification; safeguards; burnup calculations; SP528, pp. 170-200 (Nov. 1978).
- Isotope dilution; mass spectrometry; volatile chromium compounds; analytical blank; biological materials; chromium; 18189.
- Isotope dilution; microwave plasma detector; deuterium; hydrocarbon; hydrogen; 17969.
- Isotope dilution; nanogram per gram; thermal ionization mass spectrometry; iron concentrations; 17681.
- Isotope effects; proton affinity; proton transfer; p-xylene; toluene; ion-molecule equilibria; 17694.
- Isotope enrichment; laser induced chemical reactions; olefins; TE laser; difluorocarbene; direct isotope specific synthesis; 17763.
- Isotope shift; thermally stimulated capacitance measurement; vibronic coupling; deep level studies; ion implantation; isothermal transient capacitance method; 17966.
- Isotopes; molecular dynamics; neutron; neutron radiography; nondestructive evaluation; nuclear reactor; radiation; activation analysis; crystal structure; diffraction; TN969.
- Isotopes; multiple filament; potassium; strontium; thermal ionization; absolute isotope ratios; atomic/molecular vaporization; atomic weights; calcium; fractionation; 17940.
- Isotopes; nuclear physics; photonuclear reactions; bibliography; data index; elements; SP380, Supplement 1.
- Isotopes; TEA laser; vibrational relaxation; energy transfer; hydrogen halides; 18002.
- Isotopic analysis; plutonium assay; quality assurance programs; thorium assay; uranium assay; automation; chemical analysis; chemical separations; dissolution; SP528, pp. 1-18 (Nov. 1978).
- Isotopic verification; nondestructive analysis; sodium iodide detection; ^{235}U enrichment; gamma spectrometry; SP528, pp. 221-246 (Nov. 1978).
- Isotropic tensor; matrix method; nonlinear viscoelasticity; piezoelectricity; polymer physics; Schur's lemma; symmetric matrix; bead-spring model; BKZ fluid; Capelli's identity; continuum physics; 17445.
- Isotropic-nematic transition; Onsager model; orientational distribution function; bifurcation; equation of state; free energy; 17908.
- Iteration of functions; modular arithmetic; functional equation; 17481.
- Iterative A.O.V. algorithms; statistical software maintenance and distribution; algorithms for statistics; analytical aids; SP503, pp. 233-234 (Mar. 1978).
- I-V curve; point-contact Josephson junction; spectrum spreading; capacitance effects; energy-gap effects; frequency mixing; frequency multiplication; heating effects; high frequency limitations; 17991.
- I/O Model; metallic corrosion; Battelle Columbus Labs; corrosion; cost of corrosion; economic effects; SP511-1.

J

- J band; microwave; picosecond; spectrum amplitude; step recovery diode; time domain; avalanche transistor; impulse generator; NBSIR 78-888.
- Japan National Program; present state; earthquake prediction; SP523, pp. III-1—III-19 (Sept. 1978).
- Japan-U.S. cooperation; smoke aging; smoke detectors; smoke measurement; smoke properties; false detectors; fire; fire alarms; 17962.
- J-integral; subcritical crack extension; aluminum alloys; critical stress intensity; cryogenic temperature; fracture toughness; 17427.
- Job accounting systems; Logger system; resource utilization measurement; standard unit of processing; SUP; UNIVAC 1100 Series Operating System; computer performance analysis; computer performance measurement; EXEC-8; SP500-43.
- Job accounting systems; resource utilization measurement; System Management Facilities; system wait time; computer performance analysis; computer performance measurement; CPU time; EXCP counts; IBM OS/MVT; SP500-40.
- Job initiation; job selection; multivariate regression analysis; multivariate stochastic process; performance measures; remote terminal emulator; scenario; steady state; system

- under test; workload characterization; benchmark; clustering; *SP500-41*, pp. 37-61 (Oct. 1978).
- Job selection; multivariate regression analysis; multivariate stochastic process; performance measures; remote terminal emulator; scenario; steady state; system under test; workload characterization; benchmark; clustering; job initiation; *SP500-41*, pp. 37-61 (Oct. 1978).

Laminar flow reactor; reactor; wall reactions; first-order kinetics; flow reactor; gas phase kinetics; *J. Res.* **83**, No. 1, 1-8 (1978).

Lamp; radiance; radiometry; source; spectroscopy; standard; ultraviolet; calibration; deuterium; irradiance; *17606*.

Langmuir-adsorption rate equation; mordanting and adhesion; polymer bonding with hard tooth tissues; rates of Ni(II) and Cu(II) ion-exchange; hydroxyapatite or bone-mineral; ion-exchange adsorption; *18155*.

Language; portability; software; standards; terminal; application; computer; displays; graphics; independence; interactive; *SP503*, pp. 107-116 (Mar. 1978).

Lanthanides; rare earths; spectra; Zeeman effect; atomic energy levels; atomic spectroscopy; electron configurations; ionization potentials; *NBSIR-NBS60*.

Lanthanum; praseodymium; samarium; spectra; barium; cerium; cesium; *17389*.

Large; software; statistical; survey; tabulation; generalized; hierarchical; *SP503*, pp. 426-430 (Mar. 1978).

- Large data files; maintenance and distribution; nonlinear models; numerical analysis; small computers; software; statistical program packages; statistics; analysis of variance; computer science; evaluation; graphics; *SP503*.
- Large data files; post-stratification; truncation; cooperative trials; HDFP; hypertension; *SP503*, pp. 132-136 (Mar. 1978).
- Large data files; statistical analysis; statistical issues; systems design; Client Oriented Data Acquisition Process; CODAP; data collection; *SP503*, pp. 247-251 (Mar. 1978).
- Large files; portable software; program generator; publication-quality tabulations; software distribution; software maintenance; tabulation system; Census tabulations; COBOL; COCENTS; *SP503*, pp. 225-232 (Mar. 1978).
- Large scale fire tests; room fire tests; fire test design; fire test variables; *17796*.
- Large scale integrated circuits; measurement methods; semiconducting materials; semiconductor devices; semiconductor processing; electronics; *17802*.
- Large-spot laser damage; pulsed DF laser damage; substrate dependence; spot size dependence; surface plasmas; damage thresholds; dielectric-enhanced mirrors; *SP509*, pp. 325-341 (Dec. 1977).
- Laser; definition of meter; *18091*.
- Laser; laser enhanced chemical reactions; nitric oxide reactions; ozone reactions; reaction kinetics; chemical reaction; *17709*.
- Laser; laser interferometer; laser meter; laser wavelength; wavelength; interferometer; *17659*.
- Laser; lifetime; PH_2 ; quenching rate; fluorescence; *18291*.
- Laser; lifetime; quenching rate; BO ; BO_2 ; fluorescence; *18290*.
- Laser; measurement; Nd-YAG; calorimeter; *17899*.
- Laser; molecular lasers; spectra; energy transfer; HCN far-infrared; infrared lasers; *17436*.
- Laser; neon; opto-galvanic; collision; discharges; ionization; *17946*.
- Laser; oscilloscope; picosecond; pulse terms and definitions; risetime; sampling; streak camera; time domain measurements; transition duration; *18183*.
- Laser; scattering; absorption; calorimeter; *SP509*, pp. 281-285 (Dec. 1977).
- Laser; uncoated optics; Argus; coated optics; damage; disks; *SP509*, pp. 440-454 (Dec. 1977).
- Laser absorption uniformity; automated calorimetry; calorimetry; Doppler interferometry; *SP509*, pp. 62-73 (Dec. 1977).
- Laser bandwidth; multiphoton absorption; multiphoton ionization; partially coherent lasers; power broadening; two laser absorption; Bloch equations; coherence; coherent multiphoton effects; density matrix equations; Heisenberg equations; *17462*.
- Laser bandwidth; multiphoton absorption; multiphoton dynamics; nonresonant processes; n-photon Bloch equations; pole approximation; 3-photon Bloch equations; ac Stark shift; adiabatic approximation; dissociation; harmonic generation; ionization; *17750*.
- Laser bandwidth; multiphoton ionization; multiphoton saturation effects; partially coherent laser; power broadening; rate approximation; two photon absorption; two photon ionization; Bloch equations; density matrix equations; Heisenberg equations; *17805*.
- Laser bandwidth effects; multiphoton absorption; multiphoton resonance; two-level model; Doppler broadening; *18243*.
- Laser beam; microscopic particle; Mie scattering; optical path length change; Raman; thermal diffusion; change of index of refraction with temperature; heat conduction; *17697*.
- Laser beam calorimeter; laser beam overspill monitor; laser beam power and energy measurement; laser calorimeter backscatter monitor; water-stirred calorimeter; CW high energy laser; electrically calibrated laser meter; intercomparison of laser meters; *17891*.
- Laser beam power and energy measurement; laser calorimeter backscatter monitor; water-stirred calorimeter; CW high energy laser; electrically calibrated laser meter; intercomparison of laser meters; laser beam calorimeter; laser beam overspill monitor; *17891*.
- Laser calorimeter backscatter monitor; water-stirred calorimeter; CW high energy laser; electrically calibrated laser meter; intercomparison of laser meters; laser beam calorimeter; laser beam overspill monitor; *17891*.
- Laser calorimetry; laser windows; Urbach tail; uv laser components; wavelength modulation spectroscopy; extrinsic uv absorption; *SP509*, pp. 127-131 (Dec. 1977).
- Laser calorimetry; photochromic; polymer films; alkaline earth fluorides; color centers; *SP509*, pp. 137-140 (Dec. 1977).
- Laser chemistry; laser enhanced reactions; nitric oxide; nitric oxide, ozone reaction; ozone; infrared laser excitation; *17773*.
- Laser damage; As_2S_3 ; As_2Se_3 ; coating damage; coating design; defects; *SP509*, pp. 316-323 (Dec. 1977).
- Laser damage; laser interaction; optical components; optical fabrication; optical materials and properties; thin film coatings; *SP509*.
- Laser damage; lifetime; multiphoton; ultraviolet; window materials; dielectrics; free carrier; *SP509*, pp. 481-487 (Dec. 1977).
- Laser damage; low scatter; optical fabrication; aspheric optics; *SP509*, pp. 174-182 (Dec. 1977).
- Laser damage; nonlinear absorption; optical coatings; antireflection coatings; dielectric films; electric fields; *SP509*, pp. 251-254 (Dec. 1977).
- Laser damage; non-quarter-wave designs; picosecond pulses; standing waves; thin films; damage thresholds; electric fields; *SP509*, pp. 260-270 (Dec. 1977).
- Laser damage; optical materials; temperature dependence of damage thresholds; avalanche ionization; damage thresholds; *SP509*, pp. 455-463 (Dec. 1977).
- Laser damage; potassium chloride; 10.6- μm lasers; absorptance; antireflection coatings; chalcogenide glasses; *SP509*, pp. 222-228 (Dec. 1977).
- Laser damage; quartz; sapphire; spinel; ZnSe; alkali-halides; alkaline earth fluorides; As_2S_3 ; DF; electric breakdown; HF; *SP509*, pp. 118-125 (Dec. 1977).
- Laser damage; saturable absorber; standing-wave electric field; antireflection coatings; germanium; *SP509*, pp. 298-315 (Dec. 1977).
- Laser damage; semiconductor damage; time dependence; wavelength dependence; carrier diffusion; *SP509*, 473-479 (Dec. 1977).
- Laser damage testing; probit analysis; sensitivity testing; statistics; up and down method; *SP509*, pp. 496-505 (Dec. 1977).
- Laser Doppler anemometer; Reynolds number; angular insensitivity; fluidic device; hot wire anemometer; ion deflection device; *17586*.
- Laser Doppler Velocimeter; liquid fuels; combustible materials; convection; flame spread; flame velocity; gaseous phase; heat transfer; *NBS-GCR-78-117*.
- Laser effects; luminescence; metal combustion; spectroscopy; titanium alloys; *17474*.
- Laser effects; microanalysis; Raman microprobe; Raman spectroscopy; air particulates; environmental carbon; *18135*.

- Laser energy; laser power; measurement assurance program; measurements; quality control; 17924.
- Laser energy; laser power; NBS laser standard; calorimeter; four point method; inequivalence; 18170.
- Laser enhanced chemical reactions; nitric oxide reactions; ozone reactions; reaction kinetics; chemical reaction; laser; 17709.
- Laser enhanced reactions; nitric oxide; nitric oxide, ozone reaction; ozone; infrared laser excitation; laser chemistry; 17773.
- Laser excitation; Liouvillian; multiphoton; polarization; resonance fluorescence; spontaneous emission; strong field; dressed atom; fluorescence spectrum; Heisenberg equations; 17840.
- Laser excitation; quenching; Br*($^2P_{1/2}$); collisional deactivation; halogens; interhalogens; 17687.
- Laser frequency measurements; precision measurements; stabilized lasers; experimental tests of special relativity; high resolution spectroscopy; 18295.
- Laser fusion; microstructure; parasitic oscillation; refractive index; residual stress; fluorophosphate laser glass; glass cladding; SP509, pp. 434-439 (Dec. 1977).
- Laser induced chemical reactions; olefins; TE laser; difluorocarbene; direct isotope specific synthesis; isotope enrichment; 17763.
- Laser interaction; optical components; optical fabrication; optical materials and properties; thin film coatings; laser damage; SP509.
- Laser interferometer; laser meter; laser wavelength; wavelength; interferometer; laser; 17659.
- Laser machining; platinum; resistance thermometry; temperature scale; thermometer; high temperature; 17412.
- Laser magnetic resonance; spectroscopy; gaseous free radicals; 18034.
- Laser MAP; laser Measurement Assurance Program; laser power and energy measurement; laser power and energy standards; MAP; measurement assurance program; 1 mW HeNe MAP; 17603.
- Laser materials; photoelasticity; piezo-optic constants; refractive index; stress birefringence; thermal coefficient of refractive index; thermal expansion; interferometry; 17520.
- Laser Measurement Assurance Program; laser power and energy measurement; laser power and energy standards; MAP; measurement assurance program; 1 mW HeNe MAP; laser MAP; 17603.
- Laser measurements; measurement; measurement assurance programs; 17923.
- Laser meter; laser wavelength; wavelength; interferometer; laser; laser interferometer; 17659.
- Laser mirror coatings; stress cycling of coatings; thin films; coating stress; deformable mirrors; dielectric enhanced reflectors; SP509, pp. 358-361 (Dec. 1977).
- Laser mirrors; pulsed CO₂ laser damage; reflectance; 10.6 μ m optical components; absorbance; dielectric coated mirror; infrared laser windows; SP509, pp. 183-194 (Dec. 1977).
- Laser mirrors; low-expansion materials; copper film; film adhesion; glass-ceramics; IR reflectance; SP509, pp. 215-221 (Dec. 1977).
- Laser modes; photodiode; saturation; detector; frequency response; high modulation frequency; 17932.
- Laser photolysis; reaction dynamics; vibrational partitioning; chain mechanism; infrared chemiluminescence; 18212.
- Laser power; measurement assurance program; measurements; quality control; laser energy; 17924.
- Laser power; NBS laser standard; calorimeter; four point method; inequivalence; laser energy; 18170.
- Laser power and energy measurement; laser power and energy standards; MAP; measurement assurance program; 1 mW HeNe MAP; laser MAP; laser Measurement Assurance Program; 17603.
- Laser power and energy standards; MAP; measurement assurance program; 1 mW HeNe MAP; laser MAP; laser Measurement Assurance Program; laser power and energy measurement; 17603.
- Laser power measurement; photodetectors; radiant power measurement; radiometric instrument characterization; radiometric measurement accuracy; detector responsivity measurement; interlaboratory photodetector measurement comparison; 17638.
- Laser power measurements; pyroelectric detectors; radiometry; silicon cell; silicon detector; silicon photodetector; absolute radiometry; detector; electrically calibrated detectors; 17535.
- Laser scanning; light-biasing; metallization; ohmic contacts; reliability; semiconductor measurement; sheet resistance; solar cells; solar cell stability; device measurements; NBSIR 78-1488.
- Laser scanning; light-biasing; metallization; ohmic contacts; reliability; semiconductor measurements; sheet resistance; solar cells; solar cell stability; device measurements; NBSIR 78-1513.
- Laser scanning; magnetic tape; midfield splice; motion picture film; rapid pulldown; video tape; archival storage; electron beam recording; kinescope recording; SP480-31.
- Laser spectroscopy; lifetime; energy levels; hyperfine structure; 18214.
- Laser spectroscopy; Penning trap; radiation pressure; atomic spectroscopy; Doppler narrowing; Doppler shifts; frequency standards; high-resolution spectroscopy; ion storage; 18148.
- Laser stabilization; opto-galvanic effect; opto-galvanic spectroscopy; 17539.
- Laser velocimeter; low velocity; mine ventilation; performance; vane anemometer; wind tunnel; airflow; anemometer; NBSIR 78-1524.
- Laser velocimeter; low velocity; performance; vane anemometer; wind tunnel; airflow; anemometer; NBSIR 78-1485.
- Laser velocimeter; low velocity; performance; wind tunnel; airflow; anemometer; NBSIR 78-1544.
- Laser wavelength; wavelength; interferometer; laser; laser interferometer; laser meter; 17659.
- Laser window; oxygen contaminants; x-ray photoelectron spectroscopy (XPS); zinc selenide; adsorption; atmospheric contaminants; calcium fluoride coatings; SP509, pp. 105-110 (Dec. 1978).
- Laser window; precipitate; clusters; deterioration; diffusion; enhanced diffusion; impurity reactions; SP509, pp. 24-35 (Dec. 1977).
- Laser window materials; optical absorption; Eu impurity; ionic conductivity; KCl; SP509, pp. 96-104 (Dec. 1977).
- Laser windows; molecular impurities; molecular ions; molecular spectra; optical materials; surface absorption; infrared absorption; SP509, pp. 5-23 (Dec. 1977).
- Laser windows; Urbach tail; uv laser components; wavelength modulation spectroscopy; extrinsic uv absorption; laser calorimetry; SP509, pp. 127-131 (Dec. 1977).
- Laser-excited; laser-ionization; lithium; photoabsorption; atomic-spectroscopy; autoionization; 17747.
- Laser-induced stress; melt threshold; Mo mirrors; plasma scrubbing; plasma shielding; slip; surface preparation; Ti-6Al-4V; Al 7050; crystalline disorder; Cu mirrors; dislocations; SP509, pp. 204-214 (Dec. 1977).
- Laser-ionization; lithium; photoabsorption; atomic-spectroscopy; autoionization; laser-excited; 17747.
- Laser-optical components; Mo mirrors; optical coatings; pitting; ripples; standard sample Au mirrors; surface characterization; surface uniformity; threshold estimation; windows; damage thresholds; failure modes; SP509, pp. 507-515 (Dec. 1977).
- Laser-raman; measurements; metric myth; metric speakers; oxygen; phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; electromagnetic inter-

- ference; firing ranges; flow measurement; fluorescence; *DIM/NBS 62*, No. 3, 1-28 (1978).

- Low frequencies; accelerograms; digitization; high frequencies; *SP523*, pp. IV-20-IV-27 (Sept. 1978).
- Low frequency; miniature electric field probe; nonuniform field; biological experiments; calibrations; electric field measurement; 17975.
- Low income housing; sulfur hexafluoride tracer; air infiltration; air leakage; *NBSIR 78-1475*.

Low pressures; PVT; ultra-pure air; 298.15 K; Burnett method; *J. Res.* **83**, No. 5, 415-418 (1978).

Low scatter; optical fabrication; spheric optics; laser damage; *SP509*, pp. 174-182 (Dec. 1977).

Low temperature; superconductive materials; superconductivity; bibliography; composition; critical fields; critical temperature; crystallographic data; data compilation; *TN983*.

Low temperature; superconductivity; voltage calibration; voltage standard; ac Josephson effect; Josephson junction; *SP508*, pp. 243-245 (Apr. 1978).

Low temperature; water dimer; atmosphere; far infrared; *17887*.

Low temperature physics; cryogenics; history of science; *17455*.

Low temperature properties; specific heat; superconductivity; Ti_3P compounds; electrical resistivity; electron-phonon interaction; *17782*.

Low temperature scales; thermometry; fixed points; IPTS; *18138*.

Low temperature tests; maraging steels; mechanical properties; nickel alloys; fatigue; fracture; *17981*.

Low temperature tests; mechanical properties; aluminum alloys; crack propagation; cryogenics; fatigue; fracture; *17430*.

Low temperature thermoelectric measurements; platinum; Pt 67; residual resistivity ratio; standard reference material; temperature coefficient of resistors; thermocouple; thermoelectric standard; thermo-electric voltage; chemical composition; effect of imperfections; *SP260-56*.

Low temperature thermometers; stability of germanium resistors; thermal cycling to 20.275 K; thermometers reproducibility; germanium resistors; *17646*.

Low temperature thermometry; magnetic thermometry; neodymium ethylsulfate; rare earths at low temperatures; low temperatures; *17413*.

Low temperatures; low temperature thermometry; magnetic thermometry; neodymium ethylsulfate; rare earths at low temperatures; *17413*.

Low temperatures; mechanical properties; physical properties; stainless steel; welding; data compilation; *NBSIR 78-884*.

Low velocity; mine ventilation; performance; vane anemometer; wind tunnel; airflow; anemometer; laser velocimeter; *NBSIR 78-1524*.

Low velocity; performance; vane anemometer; wind tunnel; airflow; anemometer; laser velocimeter; *NBSIR 78-1485*.

Low velocity; performance; wind tunnel; airflow; anemometer; laser velocimeter; *NBSIR 78-1544*.

Low-cycle fatigue; mathematical modeling; multi-axial fatigue; polymethyl-methacrylate; stainless steel; viscoplasticity; creep-fatigue interaction; dissipation; energy approach; fatigue; hysteresis loop; irreversible thermodynamics; *17424*.

Low-dimensional materials; mercury; Raman spectroscopy; tetrathiafulvalene; x-ray crystallography; *17562*.

Low-expansion materials; copper film; film adhesion; glass-ceramics; IR reflectance; laser mirrors; *SP509*, pp. 215-221 (Dec. 1977).

Low-level; natural matrix; radioactivity; spiking; traceability; *17958*.

Low-level analyses; uranium determination; computer controlled titration; *SP528*, pp. 247-252 (Nov. 1978).

Low-noise and broadband communications; millimeter and sub-millimeter receivers; mixers; radiometry; thermography; amplifiers; closed cycle refrigerators; detectors; Josephson effect; *SP508*, pp. 159-165 (Apr. 1978).

Low-temperature; specific heat; superconducting machinery; tensile; thermal and magnetothermal conductivity; thermal expansion; elastic; electrical and magnetic; fatigue and fracture; *17419*.

Low-temperature materials research; applied superconductivity; cryogenic engineering; cryogenic materials research; cryogenic systems; LNG, storage and transportation; *17416*.

L_p problems; minimization; norm; residuals; statistic; approximation; curve-fitting; least-squares; *J. Res.* **83**, No. 1, 71-74 (1978).

LSI; microprocessor; MOS; communication; encryption; *SP500-27*, pp. 107-115 (Feb. 1978).

LSI; MOS; security; encryption; *SP500-27*, pp. 97-106 (Feb. 1978).

Lucas numbers; spanning tree; Fibonacci numbers; labelled graph; labelled multigraph; *18032*.

Luminance; photometry; spectroradiometry; vision; brightness; human observers; *18220*.

Luminescence; metal combustion; spectroscopy; titanium alloys; laser effects; *17474*.

Luminescence, chemisorptive; Ba and Mg films; chemisorptive luminescence; films, Ba and Mg; *17503*.

Lunar; unfolding; x ray; Apollo; data analysis; gamma-ray; *17948*.

Lunar ranging relativity; Apollo; geophysics; history; lasers; *17705*.

Lung cancer; mesothelioma; serpentinite, surface chemistry; talcbole; Thetford Mines, Quebec, Canada; tremolite; Urals; U.S.S.R.; Wadsley defects; actinolite; ambient air; amosite; amphibole; amphibolite; anthophyllite; *SP506*, pp. 49-70 (Nov. 1978).

Lung cancer; mesotheliomas; pathophysiology; toxicology; asbestosis; fibers; *SP506*, pp. 133-140 (Nov. 1978).

Lyapunov's theorem; multiple market; stable equilibrium; Gergorin's theorem; *17871*.

L_1 norm; least absolute values; linear programming; robust; time series; trend-cycle; cubic spline; data analysis; *SP503*, pp. 271-275 (Mar. 1978).

L^2 discretization; moments; photoabsorption, atomic; photoabsorption, molecular; *18066*.

M

Macerals; NMR; solids; coal; cross-polarization; C-13; *18236*.

Machine tool; measurement; on-line; tool wear; torque; transducer; cutting force; drill bit; drill press; dynamic; force; load; *NBSIR 78-1423*.

Machine tool; measurement; review; tool wear; torque; adaptive control; bibliography; control; cutting force; dynamic; force; load; *NBSIR 78-1424*.

Machine-readable symbols; optical bar codes; standardization; blood banking; *NBSIR 78-1446*, pp. 7-18 (Apr. 1978).

Macros; network access; network job execution; network operating systems; command language; computer network; file manipulation; *SP500-37*.

Magnesium fluoride; potassium magnesium fluoride; absorption temperature dependence; infrared absorption; intrinsic multiphonon absorption; *SP509*, pp. 56-61 (Dec. 1977).

Magnesium phosphate; phosphate hydration; crystal structure; hydrate; *18237*.

Magnetic; three-body; tritium; Coulomb; electron scattering; helium; *17381*.

Magnetic auditory; ozone calibration; piezoelectric polymer; pressure; ultraviolet photometer; bottle safety; catalytic activity; computer performance; crystal growth; information systems; LNG; *DIM/NBS 62*, No. 2, 1-28 (1978).

Magnetic clusters; rare earth materials; small angle scattering; amorphous alloys; amorphous magnetism; *17760*.

Magnetic densimeter; coexistence curve; consolute point; critical exponent; critical phenomena; deuterated isobutyric acid + heavy water; isobutyric acid + water; liquid density; liquid-liquid critical point; *17449*.

Magnetic densimeter; optical interference; power laws; relevant fields; Renormalization Group; scaling; scattering; universality; critical exponents; critical points; fixed points; gravity effects; homogeneity; *17461*.

- Magnetic domains; x-ray dynamical diffraction; anomalous transmission; asymmetric crystal topography; crystal growth; crystal perfection; Czochralski growth; dislocation density; 17732.
- Magnetic evoked response; magnetoencephalography; magneto-oculogram; biomagnetism; 17979.
- Magnetic excitations; neutron scattering; rare earth compounds; spin waves; crystal fields; exchange coupling; 17762.
- Magnetic field measurements; measurement procedures; power transmission lines; calibration procedures; electric field measurements; instrumentation; 18072.
- Magnetic fields; calibration; calibrators; electric fields; electric field strength; electric power transmission; field strength; 17420.
- Magnetic fields; magnetic flux quanta; Josephson junctions; SQUID's; superconductivity; 18279.
- Magnetic fields; magneto-optics; Pockels effect; waveform measurements; current measurement; electric fields; electric power transmission; electro-optics; Faraday effect; high voltage measurement; impulse measurement; Kerr effect; 17868.
- Magnetic flux quanta; Josephson junctions; SQUID's; superconductivity; magnetic fields; 18279.
- Magnetic multipole; Mie scattering theory; Raman scattering; resonances; small particles; complex refractive index; efficiency factor for absorption; electric multipole; internal fields; 18280.
- Magnetic neutron scattering; magnetic properties; rare earths; sublattice magnetization; Curie temperature; hydrides; 18008.
- Magnetic particles; microwaves; nondestructive testing; penetrants; radiography; standards; thermal; ultrasonics; visual; wear debris; acoustic emission; eddy currents; 17933.
- Magnetic properties; rare earths; sublattice magnetization; Curie temperature; hydrides; magnetic neutron scattering; 18008.
- Magnetic refrigeration; paramagnetic materials; *SP508*, pp. 81-91 (Apr. 1978).

- Measurement assurance; medical dosimetry; radiation dosimetry; radiation standards; x-ray calibration; brachytherapy sources; calibration; dissemination; gamma-ray calibration; 18199.
- Measurement assurance; National Measurement System; standards; users of radiation; dissemination; ionizing radiation; NBSIR 75-946.
- Measurement assurance program; measurements; quality control; laser energy; laser power; 17924.
- Measurement assurance program; mechanical stability; thermal stability; capacitance; 17658.
- Measurement assurance program; pulse; pulse generator; risetime; transfer standard; transition duration; transition time; 18176.
- Measurement assurance program; 1 mW HeNe MAP; laser MAP; laser Measurement Assurance Program; laser power and energy measurement; laser power and energy standards; MAP; 17603.
- Measurement assurance programs; laser measurements; measurement; 17923.
- Measurement base, detector; base, detector measurement; coupling, detector; 17637.
- Measurement compatibility; mercury; nitrogen dioxide; precision; reference materials; reference methods; accuracy; calcium; chromium; 17928.
- Measurement equation; optical radiation measurement; photometry; radiometry; spectroradiometry; TN910-2.
- Measurement method; photovoltage, bulk; power semiconductor materials; resistivity; semiconductors; silicon; thyristors; transistors, power; automation; computer control; homogeneity; *J. Res.* 83, No. 3, 265-271 (1978).

Measurement methods; photovoltaic method; power-device grade silicon; resistivity variations; silicon; spreading resistance measurements; thermally stimulated measurements; thyristor materials measurements; thyristor measurements; d-c transmission; *NBSIR 78-1474*.

Measurement methods; semiconducting materials; semiconductor devices; semiconductor processing; electronics; large scale integrated circuits; *17802*.

Measurement methods; standard reference materials; statistical model for measuring processes; statistical techniques; testing methods; evaluation of testing methods; *17741*.

Measurement needs; measurement system structure; mechanical quantities; National Measurement System; optical quantities; thermal quantities; time and frequency; acoustics; economics of measurement; electrical quantities; electromagnetic quantities; *NBSIR 75-925*.

Measurement, optical radiation; optical radiation measurements; radiation measurements, optical; electro-optical modulating; *17789*.

Measurement procedure; noise temperature; satellite communication; earth terminal; effective isotropic radiated power; figure of merit; *NBSIR 78-879*.

Measurement procedures; power transmission lines; calibration procedures; electric field measurements; instrumentation; magnetic field measurements; *18072*.

Measurement procedures; radiated power; emergency transmitters; *18185*.

Measurement process; predictability; probability plots; randomness; statistics; testing assumptions; 4-plot analysis; assumptions; data analysis; distribution analysis; graphical analysis; in control; *17935*.

Measurement quality control; realtime quality control; reliability; replicates; standards; assurance; *SP528*, pp. 98-111 (Nov. 1978).

Measurement science; quality control; automatic inspection; automation; dynamic measurement; inspection; *18062*.

Measurement services; standardization; AID; assistance; developing economies; foreign relations; industrializing nations; international relations; LDC's; *NBSIR 77-1385*.

Measurement services; standards; traceability; calibration; measurement assurance; *SP250, 1978 Edition*.

Measurement standards; national standards; units; cavity chambers; cobalt-60; exposure; gamma radiation; *17443*.

Measurement system structure; mechanical quantities; National Measurement System; optical quantities; thermal quantities; time and frequency; acoustics; economics of measurement; electrical quantities; electromagnetic quantities; ionizing radiation; *NBSIR 75-925*.

Measurement systems; standard reference materials; accuracy; *18263*.

Measurement technique; nondestructive testing; safe-operating-area limits; second breakdown; thermal instability; transistors, power; hot spots; *17600*.

Measurement techniques; reaction rate constants; assessment of needs; chemical kinetics; combustion; high temperature chemistry; *SP531*.

Measurement technology; microelectronics; semiconductor devices; semiconductor materials; semiconductor process control; silicon; electronics; integrated circuits; *NBSIR 78-1444*.

Measurement technology; microelectronics; semiconductor devices; semiconductor materials; semiconductor process control; silicon; electronics; integrated circuits; *NBSIR 78-1444-2*.

Measurement tools; operating system performance; performance guidelines; performance measurement; tuning guides; UNIVAC 1108; computer performance management; *SP500-34*.

Measurement units; metric; standardization; vertical separation; altimetry; altitude; aviation; height measurement; *NBSIR 77-1386*.

Measurements; metric myth; metric speakers; oxygen; phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; electromagnetic interference; firing ranges; flow measurement; fluorescence; laser-raman; *DIM/NBS 62, No. 3, 1-28 (1978)*.

Measurements; metrology; optical; pulse; waveform signal; electrical; *18184*.

Measurements; microwave; scattering parameters; snow; characterization; *18090*.

Measurements; mixture data; pure fluid data; saturated liquid; cell model; corresponding states model; custody transfer; density; equation of state; hard spheres model; liquefied natural gas; magnetic suspension densimeter; *17867*.

Measurements; nondestructive testing; radiography; reproducibility; standards; calibrations; *18186*.

Measurements; nuclear safeguards; standards; *SP528*, pp. 37-40 (Nov. 1978).

Measurements; optical; picosecond techniques; pulse; electrical; *17914*.

Measurements; picosecond pulse; resistive loading; the method of moments; broadband antenna; *18171*.

Measurements; practical measurements; semiconductor technology; electronic technology; equipment; manufacturing; materials; *17865*.

Measurements; pressure drop; 1.4-2.1 K; axial heat transport; forced convection; helium II; *TN1002*.

Measurements; quality control; laser energy; laser power; measurement assurance program; *17924*.

Measurements; radioactivity standards; traceability; activity; intercomparative measurements; *17743*.

Measurements, bicycle braking; riding tests; safety, bicycle; standards, bicycle safety; test methods, bicycle; wet braking; bicycles; braking, bicycle; braking, wet; consumer product safety; *NBSIR 78-1467*.

Measurements, bicycle braking; road tests; standards, bicycle safety; test methods, bicycle; wet braking; bicycles; brakes, bicycle; braking, wet; error analysis; friction, brake; friction, tire/pavement; kinetics, bicycle; *NBSIR 78-1416*.

Measuring machines; multiple redundancy; three dimensional; algorithm metrology; *17551*.

Mechanical factors; skin injury research; threshold values; Consumer Product Safety Commission; *17644*.

Mechanical force; mechanical properties; NBS; punctures; sampling; sharp edges; simulation; skin; TIPS Thesaurus; adults; Bureau of Product Safety; children; experimental studies; injury potential; lacerations; *NBSIR 73-123*.

Mechanical integrity; nondestructive evaluation; normal modes; orthopedic implants; piezoelectric polymer; plastics; vibrations; *17596*.

Mechanical properties; aluminum alloys; crack propagation; cryogenics; fatigue; fracture; low temperature tests; *17430*.

Mechanical properties; aluminum matrix; boron fiber; composites; cryogenics; epoxy matrix; expansivity; glass fiber; graphite fibers; *17429*.

Mechanical properties; NBS; punctures; sampling; sharp edges; simulation; skin; TIPS Thesaurus; adults; Bureau of Product Safety; children; experimental studies; injury potential; lacerations; mechanical force; *NBSIR 73-123*.

Mechanical properties; nickel alloys; fatigue; fracture; low temperature tests; maraging steels; *17981*.

Mechanical properties; physical properties; stainless steel; welding; data compilation; low temperatures; *NBSIR 78-884*.

Mechanical properties; physical properties; pure metals; review; stainless steel; composite materials; *17896*.

Mechanical properties; physical properties; stress analysis; superconducting magnet; coil composite; *18128*.

- Midfield splice; motion picture film; rapid pull-down; video tape; archival storage; electron beam recording; kinescope recording; laser scanning; magnetic tape; *SP480-31*.
- Midpoints; midpoints prediction equation; binomial coefficients; COMBINATION subroutine; estimated regression equation; estimated regression line; Fact(N) subroutine; least-squares prediction equation; Mathematical Model; *SP503*, pp. 379-383 (Mar. 1978).
- Midpoints prediction equation; binomial coefficients; COMBINATION subroutine; estimated regression equation; estimated regression line; Fact(N) subroutine; least-squares prediction equation; Mathematical Model; midpoints; *SP503*, pp. 379-383 (Mar. 1978).
- Mie scattering; optical path length change; Raman; thermal diffusion; change of index of refraction with temperature; heat conduction; laser beam; microscopic particle; 17483.
- Mie scattering; optical path length change; Raman; thermal diffusion; change of index of refraction with temperature; heat conduction; laser beam; microscopic particle; 17697.
- Mie scattering; particle size; size distribution of particles; Stokes law velocity; aerosols; calibration of instruments; dioctylphthalate aerosol; Doppler shift spectrometer; heterodyne laser light scattering; light scattering; 17499.
- Mie scattering; Raman spectroscopy; sulfate in particulates; aerosol size distribution; Doppler shift spectroscopy; microfibers; microRaman spectrometer; 17404.
- Mie scattering; Rayleigh scattering; smoke measurements; fire testing; ionization chamber; light extinction; light scattering; *NBSIR 78-1502*.

Mie scattering theory; Raman scattering; resonances; small particles; complex refractive index; efficiency factor for absorption; electric multipole; internal fields; magnetic multipole; 18280.

Migration; models; regulation; additives; diffusion; food additives; indirect additives; *NBSIR 78-1499*.

Millimeter and submillimeter receivers; mixers; radiometry; thermography; amplifiers; closed cycle refrigerators; detectors; Josephson effect; low-noise and broadband communications; *SP508*, pp. 159-165 (Apr. 1978).

Millimeter wave; orion; radio astronomy; vibrational states; cyanoacetylene; interstellar molecules; 17643.

Millimeter wave; power measurement; reflection measurement; six port; automation; 18057.

Millman effect; molecular and atomic beam magnetic resonance; atomic clock; cesium beam frequency standard; 17380.

Mine ventilation; performance; vane anemometer; wind tunnel; airflow; anemometer; laser velocimeter; low velocity; *NBSIR 78-1524*.

Mineral deposits; performance degradation; test methods; water heaters (gas-fired); degradation; energy efficiency; *NBSIR 78-1460*.

Mineral fiber; residences; smoldering; thermal insulation; attics; Federal specifications; fire test; flame spread; loose-fill; *NBSIR 78-1497*.

Mineral fibers; transmission electron microscope; x-ray spectroscopy; carbon contamination; electron diffraction; *SP506*, pp. 249-269 (Nov. 1978).

Mineral identification; nonfibrous; amosite; amphibole; asbestos; electron diffraction; fibrous; grunerite; *SP506*, pp. 387-402 (Nov. 1978).

Mineral microfibers; scanning electron microscopy; selected-area electron diffraction; transmission electron microscopy; amphibole asbestos; asbestos; chrysotile; electron diffraction; energy-dispersive x-ray spectroscopy; *SP506*, pp. 221-233 (Nov. 1978).

Mineralogical; serpentine; terminology; acicular; amphibole; asbestiform; asbestos; fiber; fibrous; fragments; *SP506*, pp. 1-18 (Nov. 1978).

Mineralogical analysis; particle size distribution; pH; plastic and liquid limits; soluble salts; adobe building materials; adobe soil; color determination; microfabric analysis; *TN977*.

Mineralogical terminology; scanning electron microscopy; serpentine; talc; transmission electron microscopy; amphibole; asbestos; fibers; light microscopy; *SP506*.

Mineralogy; Raman microprobe; Raman spectroscopy; sheet and chain silicates; 18134.

Minerals; mining; quarrying; solid waste; amphibole; copper; crushed stone; fiber; iron; *SP506*, pp. 461-469 (Nov. 1978).

Miniature electric field probe; nonuniform field; biological experiments; calibrations; electric field measurement; low frequency; 17975.

Minicomputer; statistical software design; interactive statistical systems; *SP503*, pp. 26-34 (Mar. 1978).

Minicomputer system; performance measurement; response time; time-sharing; workload; *SP500-41*, pp. 275-283 (Oct. 1978).

Minicomputers; protocols; command languages; communications; computer access; computer networks; intelligent terminals; *SP500-35*.

Minicomputers; software; automation; design; hardware; implementation; laboratory automation; 18289.

Minimal model; two way classification; unbalanced data; analysis of variance; *SP503*, pp. 71-75 (Mar. 1978).

Minimal model; two way classification; unbalanced data; analysis of variance; *SP503*, pp. 87-91 (Mar. 1978).

Minimization; norm; residuals; statistic; approximation; curve-fitting; least-squares; L_p problems; *J. Res.* 83, No. 1, 71-74 (1978).

Minimum cost; seismic risk; design decisions; *SP523*, pp. III-20—III-29 (Sept. 1978).

Minimum property standards; model code agencies; regulations; building codes; code changes; incentives; innovations; log homes; *SP518*, pp. 49-66 (Aug. 1978).

Mining; quarrying; solid waste; amphibole; copper; crushed stone; fiber; iron; minerals; *SP506*, pp. 461-469 (Nov. 1978).

Minitab development; Minitab II; regression output; data dependent formats; general purpose statistical computing system; *SP503*, pp. 404-408 (Mar. 1978).

Minitab II; regression output; data dependent formats; general purpose statistical computing system; Minitab development; *SP503*, pp. 404-408 (Mar. 1978).

Min-max; network; tree; center; graph; location problems; 17655.

Minutiae; pattern recognition; computerized fingerprint matching; fingerprint readers, semiautomatic; fingerprints; latents; 17568.

Mirrors; scattering; surface roughness; surface statistics; *SP509*, pp. 142-155 (Dec. 1977).

MIS; plotting; statistical analysis; Boolean search system; computer programs; curve fitting; data analysis; data base management; data retrieval; file handling; graphic analysis; IMS information retrieval; KWOC indexing; least-squares; linear regression; *H125*.

Miscellaneous materials; specific heat; vapor pressure; heat of combustion; heat of explosion; *NBSIR 78-1479*.

Missing cells; unbalanced data; ANOVA; hypothesis testing; *SP503*, pp. 48-53 (Mar. 1978).

MIUS; report to CCMS plenary; CCMS; CCMS-MIUS project; information exchange; integrated utility systems; international information exchange; *NBSIR 78-1468-1*.

MIUS; report to CCMS plenary; CCMS; CCMS-MIUS project; information exchange; integrated utility systems; international information exchange; *NBSIR 78-1468-2*.

MIUS; total energy systems; diesel engines; exhaust emissions; *NBS-GCR-77-104*.

Mixed congruential method; mutually statistically independent random variables; pseudorandom numbers; serial correlation; *SP503*, pp. 323-328 (Mar. 1978).

Mixed halomethanes; critically evaluated data; estimated enthalpies of formation; estimated molecular parameters; ideal gas thermodynamic properties; *JPCRD 7*, No. 4, 1285-1308 (1978).

Mixed model; repeated measures; unbalanced; ANOVA; contrast; hypothesis; *SP503*, pp. 40-47 (Mar. 1978).

Mixed waste paper; paper, interfiber bonding; paper, low-density handsheets; paper, pulp characterization; paper recycling; paper, tensile testing; *NBSIR 78-1459*.

Mixers; radiometry; thermography; amplifiers; closed cycle refrigerators; detectors; Josephson effect; low-noise and broadband communications; millimeter and submillimeter receivers; *SP508*, pp. 159-165 (Apr. 1978).

Mixture data; pure fluid data; saturated liquid; cell model; corresponding states model; custody transfer; density; equation of state; hard spheres model; liquefied natural gas; magnetic suspension densimeter; measurements; 17867.

Mixtures; prediction technique; thermal conductivity coefficient; corresponding states; critical point; internal degrees of freedom; 18193.

Mixtures; PVTx; computer program; density; equation of state; LNG; *NBSIR 77-867*.

Mixtures; PVTx; $SF_6-C_3H_8$; thermodynamic potential; $CO_2-C_2H_6$; critical locus; critical point; $C_6H_{18}-C_3H_8$; equation-of-state; 17751.

Mixtures; review; theory; transport properties; corresponding states; fluids; 17988.

Mnemonics; random number generation; statistical routines; time-sharing; algorithm, attributes; computer; Consistent

- System; data; DATATRAN; linguistic expression; *SP503*, pp. 357-361 (Mar. 1978).
- Mo mirrors; optical coatings; pitting; ripples; standard sample Au mirrors; surface characterization; surface uniformity; threshold estimation; windows; damage thresholds; failure modes; laser-optical components; *SP509*, pp. 507-515 (Dec. 1977).
- Mo mirrors; plasma scrubbing; plasma shielding; slip; surface preparation; Ti-6Al-4V; Al 7050; crystalline disorder; Cu mirrors; dislocations; laser-induced stress; melt threshold; *SP509*, pp. 204-214 (Dec. 1977).
- Mobile antenna; mobile transceiver; transmission; cable assembly; coaxial cable; insertion loss; *18204*.
- Mobile communication systems; vehicular electronic systems; biological hazard; electromagnetic compatibility; field strength measurements; *17356*.
- Mobile communications equipment; NILECJ standard; relay station; repeater station; FM repeater; law enforcement; *17393*.
- Mobile home; part-load efficiency; thermography; air infiltration; energy conservation; *BSS102*.
- Mobile home; radiant heat flux; room fires; upholstered chairs; ASTM E-84 Tunnel Test; fire growth; fire tests; flame spread; flashover; incidental fire; interior finish; life safety; mattress; *NBSIR 78-1531*.
- Mobile homes; National Conference of States on Building Codes and Standards; NCSBCS; proceedings; 8th Annual Conference; ASHRAE 90-P; building codes; *NBSIR 77-1413*.
- Mobile homes; radiant heat flux; room fires; ASTM E-84 Tunnel Test; carbon dioxide; carbon monoxide; fire growth; fire tests; flame spread; flashover; interior finishes; life safety; *NBSIR 78-1530*.
- Mobile homes; repeatability; source fires; upholstered furniture; chairs; compartment fires; crib fires; fire tests; ignition source; incidental fires; *NBSIR 78-1522*.
- Mobile transceiver; transmission; cable assembly; coaxial cable; insertion loss; mobile antenna; *18204*.
- Mobile-ion contamination; MOS device processing; MOS devices; oxidation ambient control; oxide growth; semiconductor device processing; silicon dioxide; thermal silicon dioxide films; double-wall oxidation tube; dry oxidation; *NBSIR 77-1404*.
- Mock-up furniture samples; smoldering; upholstered furniture; upholstery fabrics; cigarette ignition; fabric classification; *NBSIR 78-1438*.
- Mode beating; spectral modes; axial modes; detectors; frequency response; helium-neon lasers; lasers; *17939*.
- Mode-beating; modulation frequency; optical detector; responsiveness; saturation; frequency response; *18167*.

- Neutron scattering; phase transition; reorientation; elastic constant; KCN; lattice dynamics; *17765*.

Neutron scattering; phase transition; reorientation; ammonium bromide; correlation time; critical fluctuations; 18215.

Neutron scattering; phase transition; soft mode; antiferroelectric; cyanides; diffraction; 17390.

Neutron scattering; phonon; deuterium peroxide; force model; group theory; lattice dynamics; 17927.

Neutron scattering; phonons; coherent; dynamics; hydrides; metals; 18253.

Neutron scattering; phonons; ionic crystals; 17417.

Neutron scattering; rare earth compounds; spin waves; crystal fields; exchange coupling; magnetic excitations; 17762.

Neutron source; nondestructive evaluation; Californium-252; gaging; inspection; neutron radiography; 18080.

Neutron source emission rate; statistical analysis; thermal neutron flux density; fast neutron flux density; intercomparisons; neutron absorbed dose; neutron-induced reaction rates; neutron kerma; 17498.

Neutron standards; hydrogen gas proportional counter; ion pair defect; neutron flux monitor; 18229.

Neutron standards; reactor; trace analysis; materials characterization, neutron; neutron radiography; neutron scattering; 17495.

Neutron-induced reaction rates; neutron kerma; neutron source emission rate; statistical analysis; thermal neutron flux density; fast neutron flux density; intercomparisons; neutron absorbed dose; 17498.

Neutrons; radiation safety; activation; carbon-11; health physics; high energy neutrons; monitoring; 17550.

Neutrons; standards; time-of-flight; ${}^6\text{Li}(n,\alpha)\text{T}$; flux measurement; $\text{H}(n,p)$; 18225.

Neutrons, performance; personnel dosimetry; photons; standard; acceptable limits of uncertainty; beta particles; criteria; Health Physics Society Standards Committee; 18190.

New data needs; solid state; chemical and physical properties; existing data compilations; materials science and engineering; 17529.

Newton-Raphson; perturbation methods; quasi-Newton; simplex method; variable metric method; computer timings; curve fitting; estimation; gradient; *SP503*, pp. 373-378 (Mar. 1978).

NFPA standards; residential fire detector; sprinkler supervisory devices; control units; fire alarm systems; fire detectors; high-rise communication systems; multiplex systems; *TN964*.

NH_4^+ -ammonium; recombination; trapped ions; cross sections; dissociation; electron impact; 17806.

Nickel; aluminum; atomic emission; barium; beryllium; copper; graphite furnace; manganese; molybdenum; 17895.

Nickel; surface chemistry; catalysis; kinetics; methanation; 17729.

Nickel alloy; Poisson ratio; shear modulus; sound velocity; Young's modulus; bulk modulus; compressibility; iron alloy; maraging steel; 17428.

Nickel alloys; fatigue; fracture; low temperature tests; maraging steels; mechanical properties; 17981.

Nickel standard; rheology; time signals; cereal foods; computers; cryogenic measurements; electronics standards; encryption standard; fire safety; lasers; microcircuit fabrication; *DIM/NBS 62*, No. 7/8, 1-32 (1978).

Nickel-base alloys; nickel-chromium alloys; nickel-silicon alloys; oxidation; temperature; thermal electromotive force; thermocouple reference tables; thermocouples; thermoelements; thermometry; calibration drift; chemical analyses; *Monogr. 161*.

Nickel-chromium alloys; nickel-silicon alloys; oxidation; temperature; thermal electromotive force; thermocouple reference tables; thermocouples; thermoelements; thermometry; calibration drift; chemical analyses; nickel-base alloys; *Monogr. 161*.

Nickel-silicon alloys; oxidation; temperature; thermal electromotive force; thermocouple reference tables; thermocouples; thermoelements; chemical analyses; nickel-base alloys; nickel-chromium alloys; nickel-chromium alloys; *Monogr. 161*.

NILECJ standard; relay station; repeater station; FM repeater; law enforcement; mobile communications equipment; 17393.

Niobates; oxide reactions; tantalates; cerium titanates; crystal chemistry; 17422.

Niobium compounds; silicon compounds; superconductivity; Ti_3P -type compounds; arsenic compounds; electronic properties; 17541.

Niobium-silicon alloys; recrystallization; sputtered films; superconductivity; high-pressure phases; metastable structure; 17633.

Niobium-titanium; Poisson's ratio; shear modulus; Young's modulus; bulk modulus; composite; compressibility; copper; cryogenic temperatures; elastic constants; 17919.

NIRA programs; Photonuclear Data Center; central computer; chaining programs; data evaluation; demand terminal; digital data; 17536.

Nitric oxide; nitric oxide, ozone reaction; ozone; infrared laser excitation; laser chemistry; laser enhanced reactions; 17773.

Nitric oxide; nitrogen; oxygen; ruthenium; work function; catalysis; chemisorption; field emission; 17730.

Nitric oxide, ozone reaction; ozone; infrared laser excitation; laser chemistry; laser enhanced reactions; nitric oxide; 17773.

Nitric oxide reactions; ozone reactions; reaction kinetics; chemical reaction; laser; laser enhanced chemical reactions; 17709.

Nitrobenzene; space charge; transformer oil; treeing; water; electrical breakdown; electric field; Kerr effect; liquid insulants; 18209.

Nitrogen; oxygen; ruthenium; work function; catalysis; chemisorption; field emission; nitric oxide; 17730.

Nitrogen; photoemission; CO; condensed gases; 17570.

Nitrogen; photolysis; rate constant; combustion; hydrogen cyanide; methylene; 17833.

Nitrogen; refractive; submillimeter; water vapor; index; interferometer; maser; 17888.

Nitrogen ceramics; oxidation; silicon nitride; slow crack growth; electron microscopy; fracture interfaces; microstructure; 17626.

Nitrogen dioxide; precision; reference materials; reference methods; accuracy; calcium; chromium; measurement compatibility; mercury; 17843.

Nitrogen dioxide; precision; reference materials; reference methods; accuracy; calcium; chromium; measurement compatibility; mercury; 17928.

Nitrogen, molecular; photoabsorption in molecular nitrogen; molecular nitrogen; 18144.

Nitrogen-argon mixture; projection operator; Raman line shape; Van Hove limit; collective modes; condensed state; correlation functions; harmonic oscillator; 18126.

Nitrogen-15 NMR; proton NMR; quantitative analysis; spin-lattice relaxation times; stereochemistry; amino sugars; carbon-13 NMR; coupling constants; Fourier transform NMR; 17678.

Nitronium ion; toluene ions; charge transfer; ion-molecule reactions; ion structures; 17693.

N-methyl-*p*-toluidine; *N*-phenylglycine; pit and fissure sealants; polymerization; accelerator; adhesion; amines; anionic catalyst; chelation; composite resins; cyanoacrylates; epoxy resin; 17394.

NMR; polyethylene; structure; ${}^{13}\text{C}$; dipolar; 17674.

NMR; solid; ${}^{13}\text{C}$; aromaticity; coal; cross polarization; 17677.

NMR; solids; coal; cross-polarization; C-13; macerals; 18236.

NMR; ${}^{13}\text{C}$; aromaticity; coal; 17778.

- Nuclear magnetic resonance; reentrant cavity resonator; static magnetic susceptibility measurements; tunnel diode oscillator; frequency measurement; *U.S. Patent 4,087,738*.
- Nuclear magnetic resonance; stereochemistry; tungsten; alkoxy; aryloxy; bonding; chemical shifts; fluorides; 17543.
- Nuclear magnetic resonance; tungsten; alkoxy; bonding; chemical shifts; fluorides; 17491.
- Nuclear magnetic resonance; uric acid; ^{13}C chemical shifts; ^{13}C and ^{15}N coupling constants; ^{14}C and ^{15}N labeled derivatives; acylation; isobutyric anhydride; mass spectrometry; 17351.
- Nuclear magnetic resonance; 1,2-Dicarba-*closo*-dodecarborane; 1,7-Dicarba-*closo*-dodecarborane; boron hydride; carborane; 17441.
- Nuclear material control; Nuclear Regulatory Commission; reference mass standards; uranium hexafluoride; accountability bulk measurements; 17761.
- Nuclear physics; photonuclear reactions; bibliography; data index; elements; isotopes; *SP380, Supplement 1*.
- Nuclear quadrupole resonance; precision; thermometry; 50 K-473 K; accuracy; 17776.
- Nuclear reactions; photofission bremsstrahlung; threshold; track counting; barrier shape; fission; 17698.
- Nuclear reactions; $^3\text{He}(e,e')$, $E = 28.8-95.0$ MeV; deduced rms charge radius; measured $\sigma(E)$ at $\theta = 75^\circ$; 17623.
- Nuclear reactions $\text{H}(n,n)p$, $E = 27$ MeV; measured $\sigma(\theta)$ from 34.2° to 116.3° c.m.; 18114.
- Nuclear reactions $^{36,40}\text{Ar}(e, e')$, $E = 65$ to 115 MeV; $^{36,40}\text{Ar}$ deduced levels J, π, Γ ; enriched ^{36}Ar target; 17523.
- Nuclear reactor; radiation; activation analysis; crystal structure; diffraction; isotopes; molecular dynamics; neutron; neutron radiography; nondestructive evaluation; *TN969*.
- Nuclear reformation; pion cross sections; proton and neutron form factors; ^{165}Ho ; nuclear alignment; 17647.
- Nuclear Regulatory Commission; reference mass standards; uranium hexafluoride; accountability bulk measurements; nuclear material control; 17761.
- Nuclear safeguards; dynamic materials accounting; in-line analysis; nuclear fuel reprocessing; *SP528*, pp. 208-220 (Nov. 1978).
- Nuclear safeguards; fuel-cycle regulation; material control and accounting; *SP528*, pp. 161-169 (Nov. 1978).
- Nuclear safeguards; plastics migration; SRM's-metals; SRM's-steel; temperature scale; corrosion; electronics industry; insulation; National Measurement System; *DIM/NBS 62*, No. 9, 1-32 (1978).
- Nuclear safeguards; plutonium nitrate-to-oxide conversion; alarm-sequence chart; CUSUM; decision analysis; Kalman filter; materials accounting; *SP528*, pp. 83-97 (Nov. 1978).
- Nuclear safeguards; rotating target x-ray tube; x-ray fluorescence analysis; x-ray liquid and slurry sample cell; x-ray monochromator; analysis of solutions and slurries; high-precision, wavelength dispersive x-ray spectrometer; *SP528*, pp. 125-132 (Nov. 1978).
- Nuclear safeguards; special nuclear materials; x ray; accountability; analysis; gamma-ray; neutron; *SP528*.
- Nuclear safeguards; standards; measurements; *SP528*, pp. 37-40 (Nov. 1978).
- Nuclear structure; pions; virtual photons; ^6He ; ^6Li ; electroproduction; 17627.
- Nuclear track technique; oxygen-17; stable isotopes; alpha tracking; micromapping; neurotransmitting compounds; 17632.
- Nuclear track technique; resistivity; silicon; alpha track; boron; dopant density; 17825.
- Nuclear waste; plutonium; design of hull monitor; nuclear fuel; *SP528*, pp. 284-288 (Nov. 1978).
- Nuclear-track technique; particle-impact noise detection; photolithography; photovoltaic method; *p-n* junction; power-device grade silicon; resistivity; resistivity variations; resistors, sheet; safe operating area, transistor; scanning, acoustic microscope; *SP400-36*.
- Nucleic acid bases; thermochemistry; thymine; 5-methyl-uracil; 5-methyl-2,4 (1H, 3H)-pyrimidinedione; calorimetry; density; enthalpy of solution; *J. Res. 83*, No. 6, 529-537 (1978).
- Nucleic acid bases; thermochemistry; uracil; 2,4-dioxypyrimidine; 2,4(1H, 3H)-pyrimidinedione; calorimetry; density, enthalpy of solution, entropy of solution; *J. Res. 83*, No. 6, 547-554 (1978).
- Nucleic acid bases; thermochemistry; 4-amino-2(1H)-pyrimidinone; calorimetry; cytosine; density, enthalpy of solution, entropy of solution; *J. Res. 83*, No. 6, 539-546 (1978).
- Nucleic acid bases; thermochemistry; 6-amino purine; adenine; calorimetry; density, enthalpy of solution, entropy of formation; *J. Res. 83*, No. 4, 347-370 (1978).
- Number systems; preferred numbers; rationalization; selection of metric values; series of numbers; SI; convenient numbers; metrication; *TN990*.
- Number-average molecular weight; polyethylene; standard reference material; weight-average molecular weight; fraction; limiting viscosity number; narrow molecular weight distribution; *J. Res. 83*, No. 2, 169-177 (1978).
- Number-average molecular weight; polyethylene; standard reference material; weight-average molecular weight; frac-

tion; limiting viscosity number; membrane osmometry; narrow molecular weight distribution; *J. Res.* 83, No. 2, 179-184 (1978).

Number-average molecular weight; polyethylene; standard reference material; weight-average molecular weight; fraction; light scattering; limiting viscosity number; narrow molecular weight distribution; *J. Res.* 83, No. 2, 185-193 (1978).

Number-average molecular weight; polyethylene; standard reference material; weight-average molecular weight; capillary viscometry; fraction; limiting viscosity number; narrow molecular weight distribution; *J. Res.* 83, No. 2, 195-201 (1978).

Number-average molecular weight; polyethylene; standard reference material; weight-average molecular weight; capillary viscometry; fraction; light scattering; limiting viscosity number; membrane osmometry; narrow molecular weight distribution; *SP260-61*.

Numerical analysis; small computers; software; statistical program packages; statistics; analysis of variance; computer science; evaluation; graphics; large data files; maintenance and distribution; nonlinear models; *SP503*.

Numerical analysis; spectrum analysis; x-ray fluorescence spectrometry; baseline estimation; counting statistics; gamma-ray spectrometry; Lagrange multiplier; *17509*.

Numerical control; productivity; computer aided manufacturing; computers; interface standards; manufacturing systems; *18118*.

Numerical control; standards; computer aided manufacturing; *17870*.

Numerical data; rearrangement of data; thermonuclear fusion; atomic data; data center; National Standard Reference Data System; *17781*.

Numerical integration; bulk viscosity coefficient; kinetic theory; modified Enskog theory; *18202*.

Numerical methods; hydrodynamics; *18003*.

Numerical stability; QR decomposition; regression; sweep methods; computational methods; least squares; *SP503*, pp. 189-190 (Mar. 1978).

Numerically controlled machine tools; productivity; sensors; batch manufacturing; control systems; industrial robots; *17953*.

Numerically controlled machine tools; productivity; automation; computer control; discrete part batch manufacturing; dynamic measurement; *18063*.

Numerically controlled machine tools; sensors; applications; computer aided manufacturing; industrial robots; *18061*.

Nutrients, wheat and rice flour; rice flour; wheat flour; flour, unfortified; NBS standard reference materials 1567; *18271*.

Nylon; plastic tubing; polyethylene; polymer improvement; polyvinylchloride; radiation processing; wire insulation; absorbed dose; cross linking; dose distributions; dosimetry; electron beams; *17451*.

O

Object postulate; reliability theory; social utility; acceptable level of human risk; construction costs; earthquake resistant code; expected seismic force; *SP523*, pp. V-102-V-116 (Sept. 1978).

Occlusal area; bite opening; biting force; biting strength; cusps; dentitions; duration of sustained maximum biting force; hardness of enamel; *NBSIR 78-1452*.

Occupant behavior; survey technique; accidents; architectural psychology; consumer products; environmental factors; home safety; *BSS108*.

Occupational exposure; asbestos; cancer; epidemiology; fibers; mesothelioma; *SP506*, pp. 71-93 (Nov. 1978).

Occupational exposure; record keeping; asbestos; ASTM; consensus; definitions; exposure limits; monitoring; *SP506*, pp. 381-386 (Nov. 1978).

Occupational health; tremolite; amphiboles; anthophyllite; asbestiform minerals; industrial talc; *SP506*, pp. 313-323 (Nov. 1978).

Ocean-bottom seismograph; cables; development of submarine equipment; earthquake prediction; *SP523*, pp. III-30-III-43 (Sept. 1978).

o-cresol; *p*-cresol; phenol; potential barrier heights; rotational isomers; torsional frequencies; ideal gas thermodynamic properties; internal rotation; *m*-cresol; *JPCRD 7*, No. 2, 417-424 (1978).

Octahedral group; rotation algebra; spinors; two-level system; double groups; group theory; Hamilton's rotations; icosahedral group; *17651*.

Octahedral sites; tetrahedral sites; titanium; deuteride; hydride; neutron diffraction; *17692*.

Ocular contusion; propelled objects; tolerance; eye injury; impact; mathematical model; *17986*.

Office buildings; orientation; photographic method; season; venetian blinds; view; windows; window usage; energy conservation; *BSS112*.

Office of Facilitation; United Nations; Working Party on Facilitation of International Trade Procedures; alignment; automatic data processing; common access reference number; dangerous goods; data requirements; *NBSIR 78-1446*, pp. 91-95 (Apr. 1978).

OH radical; resonance fluorescence; sulfur cycle; atmospheric; kinetics; *18257*.

OH radicals; resonance fluorescence; sulfur cycle; atmospheric; kinetics; *18258*.

Ohmic contacts; reliability; semiconductor measurement; sheet resistance; solar cells; solar cell stability; device measurements; laser scanning; light-biasing; metallization; *NBSIR 78-1488*.

Ohmic contacts; reliability; semiconductor measurements; sheet resistance; solar cells; solar cell stability; device measurements; laser scanning; light-biasing; metallization; *NBSIR 78-1513*.

Oil embargo; economic impact; energy; energy problems; information gathering; *NBSIR 78-1446*, pp. 1-5 (Apr. 1978).

Oil-fired furnaces; overfiring of oil-burners; heating efficiency; *17581*.

Olefins; ozone reactions; rotational constants; spectra; chemistry; dioxirane; microwave spectra; *17378*.

Olefins; TE laser; difluorocarbene; direct isotope specific synthesis; isotope enrichment; laser induced chemical reactions; *17763*.

Oligomer; polymer; alkane; carboxylic esters; density; empirical; liquid; *17759*.

OMITAB; OSIRIS; SAS; SOUPAC; SPSS; statistical package; TSAR; BMDP; DATA-TEXT; features matrix; *SP503*, pp. 342-351 (Mar. 1978).

OMNITAB II; SPSS; statistical program package; statistics, teaching of; BMD; IMP; *SP503*, pp. 265-270 (Mar. 1978).

One-, two-, three-dimensional lattice models; second sound; shock wave propagation; solitons; thermal conductivity; thermal diffusivity; thermal equilibrium; heat pulse propagation; molecular dynamics; *18154*.

One-body wear; tribological problems; two-body wear; wear analysis of business machines; gear-type transmissions; input-output devices; *SP514*, pp. 121-127 (May 1978).

One-dimension; thermodynamic bounds; thermodynamics; thermodynamics of disordered systems; disordered chain; glass; heat capacity; *J. Res.* 83, No. 3, 283-295 (1978).

One-dimensional hard spheres; solution of BBGKY hierarchy; uniqueness; correlation functions; *17402*.

- Ones population count; similarity evaluation; unary numbers; unit hypercube; best matches; bit pattern matching; bit sum; boolean arithmetic compatibility; interpretation; name searching; *SP503*, pp. 146-156 (Mar. 1978).
- On-line; tool wear; torque; transducer; cutting force; drill bit; drill press; dynamic; force; load; machine tool; measurement; *NBSIR 78-1423*.
- On-line computing; statistical programs; conversational computing; interactive computing; *SP503*, pp. 384-388 (Mar. 1978).
- On-line system evaluation; prediction methods; queueing models; simulation; software monitoring; workload definition; ADP life cycle; computer performance evaluation; computer performance measurement; computer performance prediction; computer system acquisition; *SP500-41*.
- Onsager model; orientational distribution function; bifurcation; equation of state; free energy; isotropic-nematic transition; *17908*.
- Open addressing; optimal packing; retrieval improvement; hashing; linear probing; nonuniform frequencies; *J. Res.* **83**, No. 5, 445-447 (1978).
- Open addressing; recursion; scatter table rearrangements; assignment problem; backtrack programming; hashing; *18227*.
- Open-cycle MHD; potassium silicates; seed recovery; seed-slag interaction; K₂O-silica solutions; MHD; *17818*.
- Operating conditions; reliability tests; temperature effects; compressor failures; compressor testing; *SP514*, pp. 99-106 (May 1978).
- Operating cost; seasonal performance; building heating system; computer simulation; DEPAF; energy conservation; furnaces; *18088*.
- Operating system performance; performance guidelines; performance measurement; tuning guides; UNIVAC 1108; computer performance management; measurement tools; *SP500-34*.
- Operating systems; performance; queueing theory; resource allocation; control theory; CPU scheduling; memory management; modeling; *SP500-41*, pp. 93-100 (Oct. 1978).
- Operating systems; performance evaluation; protocols; computer communications; computer networks; data communications; *SP500-31*.
- Operating systems; programming languages; protection; reliable software; abstract data types; access control; *18071*.
- Operational manual; rating standard; solar collectors; certification program; *NBS-GCR-78-125*.
- Operations research; prediction models; problem oriented languages; simulation theory; systems research; testing of models; development of models; mathematical models; *18317*.
- Operations research; software development; algorithm evaluation; computer science; computer software; databases; linear programming; management science; mathematical programming; mathematical programming education; nonlinear programming; *SP502*.
- Optical; picosecond techniques; pulse; electrical; measurements; *17914*.
- Optical; pulse; waveform signal; electrical; measurements; metrology; *18184*.
- Optical; radiation; electron; excitation; helium; lifetimes; *18196*.
- Optical absorption; Eu impurity; ionic conductivity; KCl; laser window materials; *SP509*, pp. 96-104 (Dec. 1977).
- Optical activity; optics; polarization; Stokes parameters; birefringence; circular dichroism; Faraday rotation; Jones calculus; Mueller calculus; *17680*.
- Optical arrays; optics; telescopes; astronomy; light buckets; *17671*.
- Optical bar codes; standardization; blood banking; machine-readable symbols; *NBSIR 78-1446*, pp. 7-18 (Apr. 1978).
- Optical bistability; Pockels cell; polarizer; power limiting; ultralinear modulator; differential optical gain; *18276*.
- Optical character recognition; Universal Product Code; computerized banking; computerized checkout; computerized retail checkout; computers; electronic funds transfer; *CIS10*.
- Optical coating design; optical coating materials; substrate smoothness; antireflection coatings; barrier layer; damage thresholds; glass substrate; *SP509*, pp. 255-259 (Dec. 1977).
- Optical coating materials; substrate smoothness; antireflection coatings; barrier layer; damage thresholds; glass substrate; optical coating design; *SP509*, pp. 255-259 (Dec. 1977).
- Optical coating testing; peel test; plug-pull test; topple test; abrasion; adhesion; *SP509*, pp. 363-377 (Mar. 1978).
- Optical coatings; antireflection coatings; dielectric films; electric fields; laser damage; nonlinear absorption; *SP509*, pp. 251-254 (Dec. 1977).
- Optical coatings; pitting; ripples; standard sample Au mirrors; surface characterization; surface uniformity; threshold estimation; windows; damage thresholds; failure modes; laser-optical components; Mo mirrors; *SP509*, pp. 507-515 (Dec. 1977).
- Optical coatings; thin films; arsenic triselenide; arsenic trisulfide; Auger; damage; defects; electron microscopy; ESCA; *SP509*, pp. 342-351 (Dec. 1977).
- Optical collisions; strontium; cross section decrease; intense laser field; *17926*.
- Optical communication; packet communication; digital communication; electrical communication; local digital communication; multidrop; *17494*.
- Optical components; optical fabrication; optical materials and properties; thin film coatings; laser damage; laser interaction; *SP509*.
- Optical constants; reststrahlen spectra; alkali azides; external vibrations; far infrared; lattice dynamics; *17368*.
- Optical constants; visible spectrum; wedged film; arsenic trisulfide; *SP509*, pp. 352-357 (Dec. 1977).
- Optical constants; water absorption; adsorbed water; CaF₂ surfaces; infrared spectrum; internal reflection; *SP509*, pp. 112-116 (Dec. 1977).
- Optical density; particle size; polypropylene; polyvinyl chloride; smoke; building fires; combustion products; *NBS-GCR-77-116*.
- Optical detector; responsivity; saturation; frequency response; mode-beating; modulation frequency; *18167*.
- Optical distortion; photo-elastic constants; stress-induced birefringence; BaF₂; CaF₂; crystalline windows and rods; depolarization; *SP509*, pp. 89-94 (Dec. 1977).
- Optical double-resonance; Rabi-splitting experiment; sodium atom laser; theoretical; nonlinear ionization; *18092*.
- Optical efficiency; reflectance; reflection losses; reradiation losses; selective solar absorbers; solar absorptance; solar reflectance; coatings; emittance; *17475*.
- Optical excitation; *A* values; collisional relaxation; electronic transition rates; mercury fluorescence; *18056*.
- Optical fabrication; aspheric optics; laser damage; low scatter; *SP509*, pp. 174-182 (Dec. 1977).
- Optical fabrication; optical materials and properties; thin film coatings; laser damage; laser interaction; optical components; *SP509*.
- Optical flare emission; radio emission; soft x ray; flare-stellar; *18218*.
- Optical frequency/wavelength standard; Rydberg constant; stabilized dye laser; calcium atomic beam; *17886*.
- Optical imagery; partial coherence; photomasks; Fourier optics; micrometrology; microscopy; *18163*.
- Optical imaging; Optical Transfer Function; orthogonal series expansions; recurrence relations; Bessel functions; generalized hypergeometric series; *17560*.
- Optical imaging; partial coherence; photolithography; integrated circuits; micrometrology; microscopy; *17795*.

- Optical imaging; partially coherent imaging; photomask linewidth measurement; photometric image scanning; linewidth measurement; microscopical; 17755.
- Optical interference; power laws; relevant fields; Renormalization Group; scaling; scattering; universality; critical exponents; critical points; fixed points; gravity effects; homogeneity; magnetic densimeter; 17461.
- Optical linearity; overfilled optics; sample scanning; underfilled optics; coherence theory; effective incoherence; image scanning; microdensitometry; 17456.
- Optical materials; surface absorption; infrared absorption; laser windows; molecular impurities; molecular ions; molecular spectra; *SP509*, pp. 5-23 (Dec. 1977).
- Optical materials; temperature dependence of damage thresholds; avalanche ionization; damage thresholds; laser damage; *SP509*, pp. 455-463 (Dec. 1977).
- Optical materials and properties; thin film coatings; laser damage; laser interaction; optical components; optical fabrication; *SP509*.
- Optical measurements; pitting; stress corrosion; corrosion; crevice corrosion; ellipsometry; 17454.
- Optical measurements; semiconductors; silicon; detectors; electrical measurements; Hall measurements; 18259.
- Optical microscope; phase contrast; airborne fiber; asbestos; bulk samples; dispersion staining; membrane filter; *SP506*, pp. 431-439 (Nov. 1978).
- Optical microscope; photomask; precision; principles of measurement; accuracy; dimensional measurement; electron microscope; integrated circuit; linespacing; linewidth; metrology; microelectronics; 17415.
- Optical microscope; photomask; scanning electron microscope; semiconductor technology; integrated circuits; linewidth measurements; microelectronics; micrometrology; 17811.
- Optical microscope; spatial filtering; coherent illumination; linewidth measurement; microscope objective; 17457.
- Optical microscopes; calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; integrated circuits; linewidths; microelectronics; 17669.
- Optical microscopes; calibration standards; closed-circuit TV systems; dimensional metrology; electron microscope; filar eyepiece; image shearing eyepiece; integrated circuits; linewidths; microelectronics; 17851.
- Optical microscopes; photomasks; semiconductor technology; linewidth measurements; microelectronics; micrometrology; 17728.
- Optical microscopy; phase contrast; asbestos; dust; fiber; metal and nonmetal mines; *SP506*, pp. 423-429 (Nov. 1978).
- Optical microscopy; talc; x-ray diffraction; amphiboles; asbestos; chlorite; electron microscopy; fiber; morphology; *SP506*, pp. 339-352 (Nov. 1978).
- Optical overlay; photomask; spatial filtering; TV-microscope; visual defect inspection; alignment tolerance; automated photomask inspection; dimensional inspection; flying-spot scanner; microdensitometer; *SP400-46*.
- Optical path length change; Raman; thermal diffusion; change of index of refraction with temperature; heat conduction; laser beam; microscopic particle; Mie scattering; 17483.
- Optical path length change; Raman; thermal diffusion; change of index of refraction with temperature; heat conduction; laser beam; microscopic particle; Mie scattering; 17697.
- Optical polarization; group II metal atoms; neutral helium beam; 17518.
- Optical potential; ordinary differential equations; principal curves; scattering problems; Stokes lines; transition point; turning point; wave transmission; wave trapping; asymptotic approximations; Bessel functions; connection formulae; error bounds; JWKB approximation; 18142.
- Optical propagation; beam divergence; beam profile; lasers; *TN1001*.
- Optical pumping; decay measurements; dimer and trimer formation; fluorescence bands; kinetic rates; mercury vapor; 17925.
- Optical quantities; surface properties; thermal quantities; time and frequency; acoustics; atomic properties; economics; electrical quantities; ionizing radiation; mechanical quantities; national measurement system; *NBSIR 75-947 (Revised December 1977)*.
- Optical quantities; thermal quantities; time and frequency; acoustics; economics of measurement; electrical quantities; electromagnetic quantities; ionizing radiation; measurement needs; measurement system structure; mechanical quantities; *NBSIR 75-925*.

- Outline; standards; systems engineering; building codes; classification; index; organization; *SP518*, pp. 145-160 (Aug. 1978).
- Ovens, energy conservation; energy conservation, industrial; furnaces, energy conservation; heat balance; industrial energy conservation; kilns, energy conservation; *H124*.
- Overfilled optics; sample scanning; underfilled optics; coherence theory; effective incoherence; image scanning; microdensitometry; optical linearity; 17456.
- Overfiring of oil-burners; heating efficiency; oil-fired furnaces; 17581.
- Overheating conductors; residential branch circuit wiring; thermal insulation and electrical wiring; branch circuit wiring; electrical fires; heat generation in receptacles; insulated buildings; *NBSIR* 78-1477.
- Overlapping analog-to-digital converters; priority encoder; sample and hold; scaling amplifiers; analog-to-digital converter; expanded range analog-to-digital conversion; *U.S. Patent* 4,069,479.
- Overload; peakload; queue length; waiting time; concurrency; bottlenecks; *SP500-41*, pp. 83-92 (Oct. 1978).
- Oxidation; photolithography; silicon; transistors; diffusion; metallization; *SP400-53*.
- Oxidation; polymers; polyurethanes; pyrolysis; stability; thermal analysis; thermogravimetry; accelerated aging; complex reactions; decomposition; degradation; heating rates; initial rates; kinetics; life-time prediction; 17897.
- Oxidation; promotion; retardant; smolder; thermal analysis; catalysis; char; combustion; flame; free radical; heterogeneous reaction; 17587.
- Oxidation; resistance ratio; resistivity; copper; electrical property; impurity; 17821.
- Oxidation; silicon nitride; slow crack growth; electron microscopy; fracture interfaces; microstructure; nitrogen ceramics; 17626.
- Oxidation; silicon nitride; strength; ceramic turbines; failure prediction; fracture; 18086.
- Oxidation; temperature; thermal electromotive force; thermocouple reference tables; thermocouples; thermoelements; thermometry; calibration drift; chemical analyses; nickel-base alloys; nickel-chromium alloys; nickel-silicon alloys; *Monogr.* 161.
- Oxidation ambient control; oxide growth; semiconductor device processing; silicon dioxide; thermal silicon dioxide films; double-wall oxidation tube; dry oxidation; mobile-ion contamination; MOS device processing; MOS devices; *NBSIR* 77-1404.
- Oxidation atmosphere; silicon dioxide; silicon oxidation tube; sodium impurity; alkali contamination; clean SiO₂-film; microelectronic device preparation; MOS-structures; 17594.
- Oxidation-induced stacking faults; scanning electron microscope; electron beam induced currents; metal-oxide-silicon capacitor; 18123.
- Oxidation-reduction reactions; phase equilibrium methods; powder x-ray diffraction; CeMO_{4+z}; cerium oxide; 17425.
- Oxide growth; semiconductor device processing; silicon dioxide; thermal silicon dioxide films; double-wall oxidation tube; dry oxidation; mobile-ion contamination; MOS device processing; MOS devices; oxidation ambient control; *NBSIR* 77-1404.
- Oxide reactions; tantalates; cerium titanates; crystal chemistry; niobates; 17422.

Oxide uniformity; scanning low-energy electron probe; semiconductor defect density; semiconductor resistivity; semiconductor wafer diagnostics; automated scanning low-energy electron probe; lateral inhomogeneity; *SP400-30*.

Oxygen; phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; electromagnetic interference; firing ranges; flow measurement; fluorescence; laser-raman; measurements; metric myth; metric speakers; *DIM/NBS 62, No. 3, 1-28 (1978)*.

Oxygen; phase transition; solid; density; molar volume; *JPCRD 7, No. 3, 949-958 (1978)*.

Oxygen; properties of fluids; specific heat; velocity of sound; density; enthalpy; entropy; *18255*.

Oxygen; property computer program; PVT; saturation properties; specific heat; density; enthalpy; entropy; equation of state; *NBSIR 78-882*.

Oxygen; rate coefficient; electrons; excitation; metastable; molecule; *18164*.

Oxygen; ruthenium; work function; catalysis; chemisorption; field emission; nitric oxide; nitrogen; *17730*.

Oxygen; saturated liquid; saturated vapor; tables; torsional crystal viscometer; viscosity; compressed gas; compressed liquid; experimental; *17901*.

Oxygen; single crystal; tungsten; angular distribution; desorption; electron stimulated desorption; *17702*.

Oxygen; tungsten; adsorption; angular distribution; chemisorption; desorption; electron stimulated desorption; hydrogen; ion desorption; *17739*.

Oxygen; x-ray photoelectron spectroscopy; adsorption; carbon dioxide; carbon monoxide; chemisorption; decomposition; formaldehyde; *17783*.

Oxygen contaminants; x-ray photoelectron spectroscopy (XPS); zinc selenide; adsorption; atmospheric contaminants; calcium fluoride coatings; laser window; *SP509, pp. 105-110 (Dec. 1978)*.

Oxygenated hydrocarbon complexes; Ru surfaces; adsorption; CH_3OH ; decomposition; H_2CO ; *17645*.

Oxygen-17; stable isotopes; alpha tracking; micromapping; neurotransmitting compounds; nuclear track technique; *17632*.

Ozone; infrared laser excitation; laser chemistry; laser enhanced reactions; nitric oxide; nitric oxide, ozone reaction; *17773*.

Ozone; propene; reaction; gas; isobutene; mass spectrometer; mechanism; *18224*.

Ozone; rate constant; air pollution; chemical kinetics; dimethyl sulfide; *17832*.

Ozone; rate constant; atmospheric chemistry; chemical kinetics; compilation; data base; data evaluation; models; *17542*.

Ozone; ultraviolet photometry; air pollution; atmospheric monitoring; calibration; *SP529*.

Ozone calibration; piezoelectric polymer; pressure; ultraviolet photometer; bottle safety; catalytic activity; computer performance; crystal growth; information systems; LNG; magnetic auditory; *DIM/NBS 62, No. 2, 1-28 (1978)*.

Ozone, photofragment spectroscopy; photofragment spectroscopy of ozone; spectroscopy of ozone, photofragment; atom fragments; *18310*.

Ozone reactions; reaction kinetics; chemical reaction; laser; laser enhanced chemical reactions; nitric oxide reactions; *17709*.

Ozone reactions; rotational constants; spectra; chemistry; dioxirane; microwave spectra; olefins; *17378*.

Ozone-alkene reactions in the gas-phase; alkene reactions; ethylene; gas-phase; *17716*.

Package; portable; software; stand-alone subroutine; statistics; subroutine set; computer package; data analysis; data analysis package; DATAPAC; Fortran; Fortran subroutine set; *17398*.

Package design; reliability; reporting errors; statistical package; STATJOB; testing; development; documentation; implementation; maintenance; *SP503, pp. 211-214 (Mar. 1978)*.

Packet communication; digital communication; electrical communication; local digital communication; multidrop; optical communication; *17494*.

Paint; poisoning; portable; precision; radiation; references; substrates; x-ray fluorescent; accuracy; calibration; evaluation; lead; *NBSIR 78-1466*.

Paint; poisoning; portable; precision; radiation; references; substrates; x-ray fluorescent; accuracy; calibration; evaluation; lead; *17996*.

Paint; removal; remover-substrate compatibility; spray paints; substrate; effectiveness; graffiti; graffiti removers; materials; *NBSIR 75-914*.

Pair production; photonuclear data; total photon absorption cross section; triplet production; atomic screening corrections; Coulomb corrections; *NBSIR 78-1456*.

Pair production cross section; screening corrections; total photon absorption cross section; total photonuclear absorption cross section; triplet production cross section; Coulomb corrections; *TN968*.

Palladium; single and multiple charging transients; ambient-temperature; diffusion; galvanostatic charging; hydrogen; mathematical model; *18082*.

Palladium-deuteride ($\text{PdD}_{0.43}$); phonon lineshapes; defect crystal structures; inelastic neutron scattering; lattice dynamics; metal-hydrogen systems; *17452*.

Panic; decision making; egress; emergencies; fires; human behavior; human performance; life safety; *NBS-GCR-78-120*.

Paper; paper fibers; paper pulps; paper tensile tests; adhesion of paper; bonding; bonding of paper fibers; characterization; *17642*.

Paper; paper fibers, bonding; paper pulps, characterization; paper, tensile tests; adhesion of paper fibers; bonding of paper fibers; *NBSIR 77-1286*.

Paper; physics careers; textiles; moisture; *18316*.

Paper degradation; paper permanence; wet strength; accelerated aging; alkali solubility; fiber degradation; *NBSIR 78-1443*.

Paper fibers; paper pulps; paper tensile tests; adhesion of paper; bonding; bonding of paper fibers; characterization; paper; *17642*.

Paper fibers; pattern recognition; pulp characterization; algorithms; artificial intelligence; image analysis; morphological analysis; *NBSIR 78-1442*.

Paper fibers, bonding; paper pulps, characterization; paper, tensile tests; adhesion of paper fibers; bonding of paper fibers; paper; *NBSIR 77-1286*.

Paper, interfiber bonding; paper, low-density handsheets; paper, pulp characterization; paper recycling; paper, tensile testing; mixed waste paper; *NBSIR 78-1459*.

Paper, low-density handsheets; paper, pulp characterization; paper recycling; paper, tensile testing; mixed waste paper; paper, interfiber bonding; *NBSIR 78-1459*.

Paper permanence; wet strength; accelerated aging; alkali solubility; fiber degradation; paper degradation; *NBSIR 78-1443*.

Paper, pulp characterization; paper recycling; paper, tensile testing; mixed waste paper; paper, interfiber bonding; paper, low-density handsheets; *NBSIR 78-1459*.

Paper pulps; paper tensile tests; adhesion of paper; bonding; bonding of paper fibers; characterization; paper; paper fibers; *17642*.

Paper pulps, characterization; paper, tensile tests; adhesion of paper fibers; bonding of paper fibers; paper; paper fibers, bonding; *NBSIR 77-1286*.

P

P Cygni; radiation transfer; Balmer lines; mass loss; *17826*.

P Cygni; radiation transfer; stellar envelopes; mass loss from stars; *18197*.

- Paper recycling; paper, tensile testing; mixed waste paper; paper, interfiber bonding; paper, low-density handsheets; paper, pulp characterization; *NBSIR 78-1459*.
- Paper, tensile testing; mixed waste paper; paper, interfiber bonding; paper, low-density handsheets; paper, pulp characterization; paper recycling; *NBSIR 78-1459*.
- Paper tensile tests; adhesion of paper; bonding; bonding of paper fibers; characterization; paper; paper fibers; paper pulps; *17642*.
- Paper, tensile tests; adhesion of paper fibers; bonding of paper fibers; paper; paper fibers, bonding; paper pulps, characterization; *NBSIR 77-1286*.
- Parabolic cylinder functions; resonance; rotating disks; singular perturbations; turning-point; viscous flow; Weber's equation; boundary-value problem; eigenvalues; *17816*.
- Parabolic cylinder functions; Schrodinger equations; turning points; asymptotic approximations; connection formulae; JWKB approximations; Liouville-Green approximations; *18206*.
- Parabolic rate law; water sorption; interphase bonding; metal-resin composites; organo-functional coupling agents; *17357*.
- Paramagnetic materials; magnetic refrigeration; *SP508*, pp. 81-91 (Apr. 1978).
- Paramagnetic resonance; ruby; spin concentration; standard reference material (SRM); absolute measurement; intensity standard; *J. Res. 83*, No. 2, 133-164 (1978).
- Paramagnetic resonance; ruby; spin concentration; standard reference material (SRM); absolute measurement; intensity standard; *SP260-59*.
- Paramagnetism; theoretical; cerium tantalate; magnetic susceptibility; *18273*.
- Parameters; subset; Bayes; correct selection; expected size; incomplete integral; *SP503*, pp. 297-301 (Mar. 1978).
- Parametric calculations; resonance lines; spectrum analysis; ytterbium; energy levels; *J. Res. 83*, No. 3, 233-245 (1978).
- Parasitic oscillation; phosphate laser glass; silicate laser glass; stored energy profiles; inversion density; *SP509*, pp. 409-414 (Dec. 1977).
- Parasitic oscillation; refractive index; residual stress; fluorophosphate laser glass; glass cladding; laser fusion; microstructure; *SP509*, pp. 434-439 (Dec. 1977).
- Paraxial ray analysis; retroreflector, cat's-eye; cat's-eye reflector; *17786*.
- Parenteral drugs; SEM; asbestos; cosmetic talc; EDXA; fibers; food; *SP506*, pp. 441-449 (Nov. 1978).
- Part load performance; rating procedures; seasonal efficiency; annual operating cost; boilers; fossil fuel heating systems; furnaces; *NBSIR 78-1543*.
- Partial coherence; photolithography; integrated circuits; micrometrology; microscopy; optical imaging; *17795*.
- Partial coherence; photomasks; Fourier optics; micrometrology; microscopy; optical imagery; *18163*.
- Partially coherent imaging; photomask linewidth measurement; photometric image scanning; linewidth measurement; microscopic; optical imaging; *17755*.
- Partially coherent laser; power broadening; rate approximation; two photon absorption; two photon ionization; Bloch equations; density matrix equations; Heisenberg equations; laser bandwidth; multiphoton ionization; multiphoton saturation effects; *17805*.
- Partially coherent lasers; power broadening; two laser absorption; Bloch equations; coherence; coherent multiphoton effects; density matrix equations; Heisenberg equations; laser bandwidth; multiphoton absorption; multiphoton ionization; *17462*.
- Particle analysis; scanning electron microscopy; x-ray microanalysis; electron probe microanalysis; electron scattering; Monte Carlo calculations; *18051*.
- Particle analysis; secondary ion mass spectrometry; sputtering; depth profiling; ion microprobe mass analysis; microanalysis; *18053*.
- Particle analysis; wear; wear debris; x-ray analysis; electron microscope; *17466*.
- Particle size; polypropylene; polyvinyl chloride; smoke; building fires; combustion products; optical density; *NBS-GCR-77-116*.
- Particle size; size distribution of particles; Stokes law velocity; aerosols; calibration of instruments; dioctylphthalate aerosol; Doppler shift spectrometer; heterodyne laser light scattering; light scattering; Mie scattering; *17499*.
- Particle size distribution; pH; plastic and liquid limits; soluble salts; adobe building materials; adobe soil; color determination; microfabric analysis; mineralogical analysis; *TN977*.
- Particle size distribution; polydisperse aerosol; smoke detector; aerosol generators; detector sensitivity; detector testers; light obscuration; *NBSIR 78-1430*.
- Particle size distribution; smoke; smoke detectors; aerosol generators; detector testers; fire detectors; ionization detectors; light-scattering detectors; *TN973*.
- Particle size distribution; soluble salt analysis; weathering; x-ray analysis; adobe; clay; *NBSIR 78-1495*.
- Particle size effects; radioactive samples; x-ray fluorescence analysis; actinides; freeze dried; gravimetric standards; high accuracy; *SP528*, pp. 149-155 (Nov. 1978).
- Particle-impact noise detection; photolithography; photovoltaic method; *p-n* junction; power-device grade silicon; resistivity; resistivity variations; resistors, sheet; safe operating area, transistor; scanning, acoustic microscope; second breakdown; *SP400-36*.
- Particles; Raman; air pollution; analytical spectroscopy; environmental samples; microanalysis; *17667*.
- Particles; Raman spectroscopy; sulfates; vanadium oxides; air pollution; chemical analysis; *18244*.
- Particulate analysis; quantitative analysis; secondary ion mass spectrometry; surface analysis; ion microprobe mass analyzer; microanalysis; *18028*.
- Particulate analysis; trajectory calculations; electron interactions; electron probe microanalysis; electron scattering; Monte Carlo calculations; *18021*.
- Particulates; SRM's; air pollution; energy; measurement; monitoring; *17675*.
- Partition coefficient; photon counting; polycyclic aromatics; spectrofluorimetry; water; carcinogenic compounds; *17612*.
- Partitioned matrix; positive semi-definite; Hadamard product; inversion; matrix inequality; *J. Res. 83*, No. 6, 585-591 (1978).
- Part-load efficiency; thermography; air infiltration; energy conservation; mobile home; *BSS102*.
- Part-load performance; seasonal efficiency; boiler; computer simulation; DEPAB; energy conservation; heating systems; *18059*.
- Partons; quarks; reconciliation; scattering; (V-A)-currents; GIM model; neutrinos; *17496*.
- Pascal; PL/1; pointer variables; data abstraction; information hiding; *17391*.
- Passive films; repassivation; sensitization; stainless steel; uranium; x-ray photoelectron spectroscopy; crevice corrosion; field ion microscopy; iron; noncrystalline films; *NBSIR 78-1429 (Navy)*.
- Passive hydrogen maser; quartz crystal standards; rubidium gas cell; short-term stability; time standards; cesium standards; flicker noise; frequency accuracy; frequency instabilities; long-term instability; microwave frequency; *17984*.
- Passive solar; windows; building envelope; energy conservation; fenestration; *18020*.
- Passive solar systems; performance standards; system classification; *18234*.

- Password; personal identification; terminals; verification; ADP security; computer networks; controlled accessibility; encryption; evaluation criteria; key; *17565*.
- Patching compounds; risk assessment; artificial fireplace ash; consumer exposure; Consumer Product Safety Act (CPSA); Consumer Product Safety Commission (CPSC); emberizing material; free-form asbestos; *SP506*, pp. 451-459 (Nov. 1978).
- Path dependence; potential of mean force; quadruplet correlation; closure; fluids; nonconservative forces; *18267*.

Phase; self-calibration; complex ratios; magnitude; *18077*.

Phase alloy; reorganization; thermal expansion; computer network; fuel economy; graphite; metallic corrosion; metric; *DIM/NBS 62*, No. 6, 1-32 (1978).

Phase contrast; airborne fiber; asbestos; bulk samples; dispersion staining; membrane filter; optical microscope; *SP506*, pp. 431-439 (Nov. 1978).

Phase contrast; asbestos; dust; fiber; metal and nonmetal mines; optical microscopy; *SP506*, pp. 423-429 (Nov. 1978).

Phase diagrams; alloys; compilations; *17484*.

Phase diagrams; data compilation; eutectic; eutectic composition; eutectic data; eutectic temperature; inorganic compound; melting point; molten salt; *NSRDS-NBS61, Part 1*.

- Phase diagrams; polymorphism; ceramists; melting points; 17733.
- Phase diagrams; theory of phase diagrams; thermodynamics; ceramics; computer predictions; critical evaluations; data compilations; electronic materials; industrial needs; metallurgy; *SP496, Vols. 1 and 2*.
- Phase equilibria; ternary systems; acidic copolymer; basic copolymer; copolymer, solvent; 17364.
- Phase equilibria; thermodynamic properties; ammonia; correlation; equation of state; gas; liquid; *JPCRD 7, No. 3, 635-792 (1978)*.
- Phase equilibria; thermogravimetric; cerium niobate; cerium oxide; cerium tantalate; ionic/electronic conductors; 17994.
- Phase equilibria; thermogravimetric; cerium niobate; cerium oxide; cerium tantalate; ionic/electronic conductors; 18073.
- Phase equilibrium; two phase flow; absorption; cavitation; choking flow; desorption; 17971.
- Phase equilibrium methods; powder x-ray diffraction; CeMO_{4+x} ; cerium oxide; oxidation-reduction reactions; 17425.
- Phase modulation; quartz crystal oscillators; quartz crystals; frequency discrimination; frequency lock system; frequency stability; frequency stabilization; oscillator systems; 18305.
- Phase separation; refractive index; relaxation processes; borosilicate glass; density; glass; 17615.
- Phase transition; bifurcation; crystalline symmetry; freezing; local density; 17918.
- Phase transition; fluctuations; lattice model; Maier-Saupe model; Monte Carlo; order parameter; 17753.
- Phase transition; radiologic imaging; solar energy; space shuttle; biological tissue; computers; electromagnetic interference; firing ranges; flow measurement; fluorescence; laser-raman; measurements; metric myth; metric speakers; oxygen; *DIM/NBS 62, No. 3, 1-28 (1978)*.
- Phase transition; Raman spectroscopy; x-ray powder diffraction; Calomel; crystal structure; mercurous chloride; 17598.
- Phase transition; rare earth; amorphous; Curie temperature; magnetism; molecular field; 17663.
- Phase transition; reorientation; ammonium bromide; correlation time; critical fluctuations; neutron scattering; 18215.
- Phase transition; reorientation; elastic constant; KCN; lattice dynamics; neutron scattering; 17765.
- Phase transition; single crystal; system $\text{K}_2\text{O}-\text{Al}_2\text{O}_3-\text{SiO}_2$; kalsilite; KAlSiO_4 ; nonstoichiometric phases; 17444.
- Phase transition; soft mode; antiferroelectric; cyanides; diffraction; neutron scattering; 17390.
- Phase transition; solid; density; molar volume; oxygen; *JPCRD 7, No. 3, 949-958 (1978)*.
- Phase transitions; spacelab experiments; critical phenomena; fluids; gravity effects; materials science; 17875.
- Phased array; siren; sound; warning device; acoustics; broadside array; directional siren; loudspeaker array; *SP480-28*.
- Phase-lock loop; Stark effect; far-infrared laser; frequency modulation; frequency multiplication; frequency synthesis; 18166.
- Phenobarbital assay; primidone assay; antiepileptic drug assays; diphenyl hydantoin assay; enzyme-multiplied immunoassay technique carbamazepine assay; 18108.
- Phenol; potential barrier heights; rotational isomers; torsional frequencies; ideal gas thermodynamic properties; internal rotation; *m*-cresol; *o*-cresol; *p*-cresol; *JPCRD 7, No. 2, 417-424 (1978)*.
- Phonon; deuterium peroxide; force model; group theory; lattice dynamics; neutron scattering; 17927.
- Phonon exchange; temperature dependence; capture; Doppler effect; 17487.
- Phonon lineshapes; defect crystal structures; inelastic neutron scattering; lattice dynamics; metal-hydrogen systems; palladium-deuteride ($\text{PdD}_{0.43}$); 17452.
- Phonons; coherent; dynamics; hydrides; metals; neutron scattering; 18253.
- Phonons; ionic crystals; neutron scattering; 17417.
- Phosphate hydration; crystal structure; hydrate; magnesium phosphate; 18237.
- Phosphate laser glass; physical-optical properties; rupture strength; silicate laser glass; thermo-optic distortion; Young's modulus; birefringence; fluorophosphate laser glass; glass density; nonlinear refractive index; *SP509, pp. 416-433 (Dec. 1977)*.
- Phosphate laser glass; silicate laser glass; stored energy profiles; inversion density; parasitic oscillation; *SP509, pp. 409-414 (Dec. 1977)*.
- Phosphoric acid; polarization; refractory hard metals; sodium beta alumina; solid electrolytes; cerium dioxide; electrocatalysis; electrochemical measurements; fuel cells; *NBSIR 78-1472*.
- Phosphors; surface conductivity; surfaces; visual images; charge storage; electron beams; insulators; ion beams; 17522.
- Phosphors; surfaces; visual images; electron beams; insulators; ion beams; 17707.
- Phosphorus-31; protons; spin-lattice relaxation; cancer; nuclear; 18117.
- Photoabsorption; atomic-spectroscopy; autoionization; laser-excited; laser-ionization; lithium; 17747.
- Photoabsorption; electron energy loss; mercury vapor; oscillator strengths; 18143.
- Photoabsorption; water; electron energy loss; oscillator strengths; 18139.
- Photoabsorption, atomic; photoabsorption, molecular; L^2 discretization; moments; 18066.
- Photoabsorption cross section; photochemistry; quantum yield; rate constant; air pollution; atmospheric chemistry; chemical kinetics; data evaluation; gas phase; *SP513*.
- Photoabsorption in molecular nitrogen; molecular nitrogen; nitrogen, molecular; 18144.
- Photoabsorption, molecular; L^2 discretization; moments; photoabsorption, atomic; 18066.
- Photoabsorption spectroscopy; autoionization; configuration interaction calculations; core-excited molecular states; diatomic lithium; ejected-electron spectroscopy; 17766.
- Photochemistry; infrared; kinetics; lasers; model; multiphoton; *J. Res. 83, No. 2, 117-125 (1978)*.
- Photochemistry; infrared; kinetics; lasers; mechanisms; multiphoton; 17898.
- Photochemistry; quantum yield; rate constant; air pollution; atmospheric chemistry; chemical kinetics; data evaluation; gas phase; photoabsorption cross section; *SP513*.
- Photochemistry; quantum yields; carbenes; chloromethane; free radical reactions; lasers; 17584.
- Photochemistry; solar energy; spectra; chemical kinetics; energy transfer; fluorescence; lasers; *SP526*.
- Photochromic; polymer films; alkaline earth fluorides; color centers; laser calorimetry; *SP509, pp. 137-140 (Dec. 1977)*.
- Photodegradation; poly(methyl methacrylate); UV; degradation; *NBSIR 78-1463*.
- Photodetachment; threshold behavior; Cs^- ; K^- ; negative ions; 18074.
- Photodetector; photometer; radiometer; spectral responsivity; detector; detector radiometry; detector spectral comparator; detector spectral response; filter transmittance test; *TN988*.
- Photodetectors; radiant power measurement; radiometric instrument characterization; radiometric measurement accuracy; detector responsivity measurement; interlaboratory photodetector measurement comparison; laser power measurement; 17638.
- Photodiode; saturation; detector; frequency response; high modulation frequency; laser modes; 17932.
- Photodissociation; photofragment spectroscopy; quantum yield; tunable laser; mercuric iodide; 18246.

- Photoelastic; piezobirefringence; piezo-optic; strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; 18275.
- Photoelastic constants; photoelasticity; piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; 17354.
- Photo-elastic constants; stress-induced birefringence; BaF₂; CaF₂; crystalline windows and rods; depolarization; optical distortion; SP509, pp. 89-94 (Dec. 1977).
- Photo-elastic constants, CaF₂; piezo-optic constants; thermal coefficient of refractive index; thermo-optic constant; BaF₂; CdF₂; MgF₂; NaCl; SrF₂; linear thermal expansion; NBSIR 78-1473.
- Photoelasticity; piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; 17354.
- Photoelasticity; piezo-birefringence; piezo-optic; pressure; refractive index; stress; acoustic-optic; birefringence; elasto-optic; figure of merit; germanium; 17706.
- Photoelasticity; piezo-optic constants; refractive index; stress birefringence; thermal coefficient of refractive index; thermal expansion; interferometry; laser materials; 17520.
- Photoelectric spectral pyrometer; platinum resistance thermometer; temperature; thermocouple; thermodynamic temperature; thermometry; International Practical Temperature Scale; 17411.

- Photovoltage, bulk; power semiconductor materials; resistivity; semiconductors; silicon; thyristors; transistors, power; automation; computer control; homogeneity; measurement method; J. Res. 83, No. 3, 265-271 (1978).

Photovoltaic method; *p-n* junction; power-device grade silicon; resistivity; resistivity variations; resistors, sheet; safe operating area, transistor; scanning, acoustic microscope; second breakdown; semiconductor materials; semiconductor process control; *SP400-36*.

Photovoltaic method; power-device grade silicon; resistivity variations; silicon; spreading resistance measurements; thermally stimulated measurements; thyristor materials measurements; thyristor measurements; d-c transmission; deep level measurements; *NBSIR 78-1474*.

Physical adsorption; ruthenium; sulphur hexafluoride; x-ray photoelectron spectroscopy; adsorption; ESCA; *17708*.

Physical condition rehabilitation; decision criteria; demolition; housing needs; *SP518*, pp. 251-257 (Aug. 1978).

Physical hazards; safety; solar heating and cooling; structural performance; toxicity; fire safety; health; *NBSIR 78-1532*.

Physical properties; pure metals; review; stainless steel; composite materials; mechanical properties; *17896*.

Physical properties; stainless steel; welding; data compilation; low temperatures; mechanical properties; *NBSIR 78-884*.

Physical properties; stress analysis; superconducting magnet; coil composite; mechanical properties; *18128*.

Physical science research administration; research planning; scientific research abstracts; Special Foreign Currency Program; Yugoslavia science and technology; binational research cooperation; international scientific cooperation; *TN986*.

Physical security; physiological psychology; threat analysis; terrorism; training; adversary characteristics; animal research; behavioral science; collusion; ergonomics; human factors; human reliability; *SP480-32*.

Physical security; robbery; security equipment; target hardening equipment; theft; alarms; burglary; catalogs; crimes of opportunity; intrusion detectors; *SP480-35*.

Physical-optical properties; rupture strength; silicate laser glass; thermo-optic distortion; Young's modulus; birefringence; fluorophosphate laser glass; glass density; nonlinear refractive index; phosphate laser glass; *SP509*, pp. 416-433 (Dec. 1977).

Physics careers; textiles; moisture; paper; *18316*.

Physiological psychology; threat analysis; terrorism; training; adversary characteristics; animal research; behavioral science; collusion; ergonomics; human factors; human reliability; physical security; *SP480-32*.

PH_2 ; quenching rate; fluorescence; laser; lifetime; *18291*.

Picosecond; pulse terms and definitions; risetime; sampling; streak camera; time domain measurements; transition duration; laser; oscilloscope; *18183*.

Picosecond; spectrum amplitude; step recovery diode; time domain; avalanche transistor; impulse generator; J band; microwave; *NBSIR 78-888*.

Picosecond pulse; resistive loading; the method of moments; broadband antenna; measurements; *18171*.

Picosecond pulses; standing waves; thin films; damage thresholds; electric fields; laser damage; non-quarter-wave designs; *SP509*, pp. 260-270 (Dec. 1977).

Picosecond techniques; pulse; electrical; measurements; optical; *17914*.

Piezo-birefringence; piezo-optic; pressure; refractive index; stress; acoustic-optic; birefringence; elasto-optic; figure of merit; germanium; photoelasticity; *17706*.

Piezobirefringence; piezo-optic; strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; *18275*.

Piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; photoelasticity; *17354*.

Piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; photoelasticity; *17354*.

Piezoelastic; plasma; polarization; poling; poly(vinylidene fluoride); pyroelectric; dielectric; *17589*.

Piezoelastic; polarization; polymer; polyvinylidene fluoride; pyroelectric; electret; *17893*.

Piezoelastic; polarization; polymer; polyvinylidene fluoride; pyroelectric; space charge; dipoles; *18239*.

Piezoelastic; polarization; polymer; polyvinylidene fluoride; pyroelectric; space charge; dipoles; *18240*.

Piezoelastic; polarization; polyvinylidene fluoride-tetrafluoroethylene copolymer; pyroelectricity; thermal expansion; compressibility; *17512*.

Piezoelastic; polarization distribution; poling temperature; polyvinylidene fluoride copolymer; pyroelectric; thermal pulse; charge transport; *18256*.

Piezoelastic coefficients; piezoelastic effects; bone; characterization data; Maxwell-Wagner polarization; *17803*.

Piezoelastic effects; bone; characterization data; Maxwell-Wagner polarization; piezoelastic coefficients; *17803*.

Piezoelastic polymer; plastics; vibrations; mechanical integrity; nondestructive evaluation; normal modes; orthopedic implants; *17596*.

Piezoelastic polymer; pressure; ultraviolet photometer; bottle safety; catalytic activity; computer performance; crystal growth; information systems; LNG; magnetic auditory; ozone calibration; *DIM/NBS 62*, No. 2, 1-28 (1978).

Piezoelastic polymer polymer crystal; polarization; poly(vinylidene fluoride); pyroelectric polymer; chain conformation; corona poling; crystal phase transformation; field-induced phase change; *18241*.

Piezoelastic polymers; polarization distribution; poly(vinylidene fluoride); thermal pulse method; charge distribution; copolymer; *17649*.

Piezoelastic polymers; pyroelectric polymers; sensors; sound measurement; transducers; dynamic measurement; noise spectrum; *17792*.

Piezoelastic polymers; road lane markers; road vibration; seismic detection; traffic noise; ceramic transducers; motor vehicle sensing; *NBSIR 77-1241*.

Piezoelasticity; polarization; polyvinylchloride; polyvinylidene fluoride; pyroelectricity; transducers; vinylidene-fluoride-tetrafluoroethylene copolymer; aligned dipoles; *17511*.

Piezoelasticity; polymer physics; Schur's lemma; symmetric matrix; bead-spring model; BKZ fluid; Capelli's identity; continuum physics; isotropic tensor; matrix method; nonlinear viscoelasticity; *17445*.

Piezo-optic; pressure; refractive index; stress; acoustic-optic; birefringence; elasto-optic; figure of merit; germanium; photoelasticity; piezo-birefringence; *17706*.

Piezo-optic; strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; *18275*.

Piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; stress-optical constants; dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; photoelasticity; piezo-birefringence; *17354*.

Piezo-optic constants; refractive index; stress birefringence; thermal coefficient of refractive index; thermal expansion; interferometry; laser materials; photoelasticity; *17520*.

Piezo-optic constants; thermal coefficient of refractive index; thermo-optic constant; BaF_2 ; CdF_2 ; MgF_2 ; NaCl ; SrF_2 ; linear thermal expansion; photo-elastic constants, CaF_2 ; *NBSIR 78-1473*.

Piezoscopic effect; residual stress; *17538*.

Pig skin; plastic; velocity; cut; edge; force; injury; *NBSIR 78-1493*.

Pile foundations; sand; shake table; standard penetration test; bridge foundations; dynamic triaxial tests; liquefaction; model tests; *SP523*, pp. IV-115-IV-157 (Sept. 1978).

Pion cross sections; proton and neutron form factors; ^{165}Ho ; nuclear alignment; nuclear reformation; 17647.

Pions; virtual photons; ^6He ; ^6Li ; electroproduction; nuclear structure; 17627.

Pit and fissure sealants; polymerization; accelerator; adhesion; amines; anionic catalyst; chelation; composite resins; cyanoacrylates; epoxy resin; *N*-methyl-*p*-toluidine; *N*-phenylglycine; 17394.

Pit and fissure sealants; preventive dental materials; protective coatings; sealant, evaluation; sealant, formulation; sealants; sealant testing procedures; Bis-GMA; dental resins; 18151.

Pitting; ripples; standard sample Au mirrors; surface characterization; surface uniformity; threshold estimation; windows; damage thresholds; failure modes; laser-optical components; Mo mirrors; optical coatings; *SP509*, pp. 507-515 (Dec. 1977).

Pitting; stress corrosion; corrosion; crevice corrosion; ellipsometry; optical measurements; 17454.

Pitting corrosion; rust; stress corrosion; corrosion; crevice corrosion; galvanic corrosion; inhibitors; *CIS9*.

PK; smear layer; solubility; surface; toxicity; acid; adhesion; buffer; dental materials; dentin; disturbed layer; pH; 18272.

Plane angle; SI units; torque unit; trigonometric functions; 18132.

Plane elasticity; stress; Westergaard method; Airy stress function; crack; fracture mechanics; 17860.

Planetary nebulae central stars; stellar atmospheres; 17841.

Planned change; program evaluation; evaluation; evaluative research; implementation; management analysis; management science; organization change; 18095.

Planned heating and cooling; thermal comfort indices; computer simulation; energy conservation; heating and cooling load calculation; 18300.

Planning models; social services; demographic projections; developing countries; economic projections; long range; *SP503*, pp. 421-425 (Mar. 1978).

Plasma; polarization; poling; poly(vinylidene fluoride); pyroelectric; dielectric; piezoelectric; 17589.

Plasma; spin; stark; broadening; fine-structure; hydrogen; 18105.

Plasma scrubbing; plasma shielding; slip; surface preparation; Ti-6A-4V; Al 7050; crystalline disorder; Cu mirrors; dislocations; laser-induced stress; melt threshold; Mo mirrors; *SP509*, pp. 204-214 (Dec. 1977).

Plasma shielding; slip; surface preparation; Ti-6A-4V; Al 7050; crystalline disorder; Cu mirrors; dislocations; laser-induced stress; melt threshold; Mo mirrors; plasma scrubbing; *SP509*, pp. 204-214 (Dec. 1977).

Plasmons; relaxation effects; surfaces; many-body effects; photoemission spectroscopy; 17999.

Plastic; velocity; cut; edge; force; injury; pig skin; *NBSIR 78-1493*.

Plastic and liquid limits; soluble salts; adobe building materials; adobe soil; color determination; microfabric analysis; mineralogical analysis; particle size distribution; pH; *TN977*.

Plastic deformation; silicon nitride; turbine materials; cracks; electron microscopy; fracture interfaces; 18075.

Plastic deformation; surfaces; wear; copper; electron channeling; metals; 17465.

Plastic deformation of glass; reaction rate theory; subcritical crack growth; tunnelling; diffusion in glass; fracture; glass; lattice trapping; mechanisms of fracture; 17468.

Plastic failure; secondary hardening; strain aging; temper embrittlement; carbon-manganese steel; dimpled rupture; ductile failure; embrittlement; impact energy; 17974.

Plastic fires; plastics; product safety; residential fires; accident analyses; fire hazards assessment; flammability tests; hazard analysis; human behavior; *NBSIR 78-1422*.

Plastic flow; solid particle impact; transmission electron microscopy; ceramics; erosion; fracture; 17904.

Plastic tubing; polyethylene; polymer improvement; polyvinylchloride; radiation processing; wire insulation; absorbed dose; cross linking; dose distributions; dosimetry; electron beams; nylon; 17451.

Plastic zone of fracture; ductile and brittle fracture; fracture; hydrogen embrittlement; 17824.

Plasticity; strain; Volterra; Burgers vector; compatibility; continuum mechanics; defect; disclination; dislocation; distortion; dynamics; elasticity; Green's tensor; incompatibility; loop; 17435.

Plastics; product safety; residential fires; accident analyses; fire hazards assessment; flammability tests; hazard analysis; human behavior; plastic fires; *NBSIR 78-1422*.

Plastics; vibrations; mechanical integrity; nondestructive evaluation; normal modes; orthopedic implants; piezoelectric polymer; 17596.

Plastics migration; SRM's-metals; SRM's-steel; temperature scale; corrosion; electronics industry; insulation; National Measurement System; nuclear safeguards; *DIM/NBS 62*, No. 9, 1-32 (1978).

Platinum; Pt 67; residual resistivity ratio; standard reference material; temperature coefficient of resistors; thermocouple; thermoelectric standard; thermo-electric voltage; chemical composition; effect of imperfections; high purity platinum; *SP260-56*.

Platinum; resistance thermometry; temperature scale; thermometer; high temperature; laser machining; 17412.

Platinum resistance thermometer; temperature; thermocouple; thermodynamic temperature; thermometry; International Practical Temperature Scale; photoelectric spectral pyrometer; 17411.

Plonar; salts; structure; bond-delocalized; croconates; derivatives; dianions; dicyanomethylene; esters; 17864.

Plots; graphics; interactive computing; *SP503*, pp. 352-356 (Mar. 1978).

Plotting; statistical analysis; Boolean search system; computer programs; curve fitting; data analysis; data base management; data retrieval; file handling; graphic analysis; IMS information retrieval; KWOC indexing; least-squares; linear regression; MIS; *H125*.

Plotting; type fonts; type setting; vectorized characters; alphabets; COM; computer graphics; computerized typesetting; digital plotting; *SP500-32*.

Plotting algorithms; cluster analysis; Guttman-Lingoes Program Series; IMP; linked lists; multidimensional scaling; PEP-1; *SP503*, pp. 236-240 (Mar. 1978).

Plug-compatible systems; procurement regulations; standards; ADP systems; multivendor systems; *FIPS PUB 56*.

Plug-pull test; topple test; abrasion; adhesion; optical coating testing; peel test; *SP509*, pp. 363-377 (Mar. 1978).

Plumbing performance evaluation (piping); structural performance (thermoplastic plumbing piping); thermoplastic pipe usage (residential plumbing); acoustical performance (plumbing piping); fire performance (plumbing piping); *BSS111*.

Plumbing system design; reduced-size vents; trap-seal retention; venting; performance testing; 18084.

Plumbing systems; reduced-size venting; performance; *TN966*.

Plutonium; design of hull monitor; nuclear fuel; nuclear waste; *SP528*, pp. 284-288 (Nov. 1978).

Plutonium; remote; safeguards; uranium; accountability; analyses; *SP528*, p. 19 (Nov. 1978).

Plutonium; waste; analyses; counter; neutron; *SP528*, p. 207 (Nov. 1978).

Plutonium; x rays; americium; detection limits; gamma rays; germanium detector; in-situ analysis; *SP528*, pp. 201-206 (Nov. 1978).

Plutonium analysis; plutonium safeguards; computer analysis; gamma-ray analysis; *SP528*, pp. 49-63 (Nov. 1978).

- Plutonium assay; quality assurance programs; thorium assay; uranium assay; automation; chemical analysis; chemical separations; dissolution; isotopic analysis; *SP528*, pp. 1-18 (Nov. 1978).
- Plutonium isotopes; x-ray spectrometry; gamma-ray spectrometry; nondestructive analysis (NDA); *SP528*, pp. 64-70 (Nov. 1978).

- PPML; system analysis; formal modeling; message sequence; message transfer expression; modeling language; MTE; performance evaluation; *SP500-41, pp. 67-82 (Oct. 1978)*.
- Practical measurements; semiconductor technology; electronic technology; equipment; manufacturing; materials; measurements; 17865.
- Praseodymium; samarium; spectra; barium; cerium; cesium; lanthanum; 17389.
- Precipitate; clusters; deterioration; diffusion; enhanced diffusion; impurity reactions; laser window; *SP509, pp. 24-35 (Dec. 1977)*.
- Precise measurements; superconductivity; electronics; Josephson effect; 17874.
- Precise measurements; 2-terminal; 3-terminal; dielectric measurements; electrical measurements; electrical properties of materials; 17890.
- Precise weighing; vacuum; vacuum weighing; buoyancy of air; density; mass comparisons in vacuo; *J. Res. 83, No. 5, 407-413 (1978)*.
- Precision; principles of measurement; accuracy; dimensional measurement; electron microscope; integrated circuit; linespacing; linewidth; metrology; microelectronics; optical microscope; photomask; 17415.
- Precision; quenching; random error; reduced activity; systematic error; ^3H ; ^{32}P ; accuracy; blank; Cerenkov counting; figure of merit; liquid scintillation counting; Poisson errors; 17510.
- Precision; radiation; references; substrates; x-ray fluorescent; accuracy; calibration; evaluation; lead; paint; poisoning; portable; *NBSIR 78-1466*.
- Precision; radiation; references; substrates; x-ray fluorescent; accuracy; calibration; evaluation; lead; paint; poisoning; portable; 17996.
- Precision; random error; standards; systematic error; testing of assumptions; validation; accuracy; bias detection; chemical analysis; chemical measurement process; data reporting; detection limits; exploratory techniques; patterns; performance characteristics; 18152.
- Precision; reference materials; reference methods; accuracy; calcium; chromium; measurement compatibility; mercury; nitrogen dioxide; 17928.
- Precision; sensitivity; statistics; accuracy; analytical chemistry; calibration; 18140.
- Precision; thermometry; 50 K-473 K; accuracy; nuclear quadrupole resonance; 17776.
- Precision; tolerance intervals; accuracy; confidence intervals; control chart; diagnostic tests; experimental error; linear regression; 17591.
- Precision laboratory weights; precision mass standards; weights; laboratory weights; mass standards; *NBSIR 78-1476*.
- Precision mass standards; weights; laboratory weights; mass standards; precision laboratory weights; *NBSIR 78-1476*.
- Precision measurements; radio star; satellite communications; C/kT; EIRP; error analysis; G/T; 17894.
- Precision measurements; stabilized lasers; experimental tests of special relativity; high resolution spectroscopy; laser frequency measurements; 18295.
- Precision microwave measurements; 6-port junction; automated measurements; bolometer unit calibration; broadband measurement; microwave power measurement; 18067.
- Precision oscillator; acceleration insensitive oscillator; ammonia microwave absorption; atomic clock; digital demodulator; frequency-lock servo; frequency standard; 17992.
- Precision thermometers; temperature; temperature reference points; clinical laboratories; clinical thermometers; 17409.
- Predictability; probability plots; randomness; statistics; testing assumptions; 4-plot analysis; assumptions; data analysis; distribution analysis; graphical analysis; in control; measurement process; 17935.
- Prediction; quantile function; regression function; Bernstein polynomials; *SP503, pp. 191-198 (Mar. 1978)*.
- Prediction; smoke layer; corridor; experimental; fire induced flow; flow rate; flow visualization; 17583.
- Prediction error; random variables; synthesis; wave; accelerogram; artificial earthquake; covariance; filter; finite Fourier expansion; *SP523, pp. 1V-28—1V-47 (Sept. 1978)*.
- Prediction methods; queueing models; simulation; software monitoring; workload definition; ADP life cycle; computer performance evaluation; computer performance measurement; computer performance prediction; computer system acquisition; conference proceedings; CPEUG; *SP500-41*.
- Prediction models; problem oriented languages; simulation theory; systems research; testing of models; development of models; mathematical models; operations research; 18317.
- Prediction technique; thermal conductivity coefficient; corresponding states; critical point; internal degrees of freedom; mixtures; 18193.
- Predictive service life tests; service life; accelerated aging tests; building components and materials; degradation; methodology; 17592.
- Pre-exponential factor; radical buffer; radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane;

- decomposition; ethyl; heats of formation; hexamethylethane; isopropyl; 18110.
- Preferred dimensions and sizes; dimensional coordination in building; international standards for building; metrication; *SP504*.
- Preferred numbers; rationalization; selection of metric values; series of numbers; SI; convenient numbers; metrication; number systems; *TN990*.
- Preheat; combustion; emulsified fuel droplet; fuel droplet; heat flow; micro-explosion; 17482.
- Preliminary crystal data; protein crystallization; tumor regulatory proteins; unit cell data; crystal packing; glutaminase-asparaginase; 17372.
- Prescriptive standards; standards development; economics; formulation; innovation; market aggregation; performance requirements; *SP518*, pp. 161-164 (Aug. 1978).
- Present discounted value; software availability; technological matrix; thruput; hardware availability; multiprocessing; *SP500-41*, pp. 285-291 (Oct. 1978).
- Present state; earthquake prediction; Japan National Program; *SP523*, pp. III-1—III-19 (Sept. 1978).
- Present value analysis; building; construction cost estimation; discounted payback period; economic analysis; economic evaluation; energy conservation; life-cycle costing; *NBSIR 78-1568*.
- Pressure; refractive index; stress; acoustic-optic; birefringence; elasto-optic; figure of merit; germanium; photoelasticity; piezo-birefringence; piezo-optic; 17706.
- Pressure; temperature; transducer; tunnel diode oscillators; acceleration; humidity; LC oscillators; linear motion; nuclear magnetic resonance; 17777.
- Pressure; ultrasonic interferometer; vacuum; manometer; mercury; 17717.
- Pressure; ultraviolet photometer; bottle safety; catalytic activity; computer performance; crystal growth; information systems; LNG; magnetic auditory; ozone calibration; piezoelectric polymer; *DIM/NBS 62*, No. 2, 1-28 (1978).
- Pressure broadening; resonance broadening; Stark broadening; van der Waals broadening; atomic; instrumental broadening; line shapes; line shifts; *SP366. Supplement 3*.
- Pressure calculation; shock wave profile; temperature calculation; crystalline solid; energy relaxation; Hugoniot relations; molecular dynamics; 17844.
- Pressure dependence; theory; applications; exchange integral; 18278.
- Pressure derivatives; pulse superposition technique; temperature derivatives; Born model; calcium oxide; elastic moduli; 17703.
- Pressure drop; 1.4-2.1 K; axial heat transport; forced convection; helium II; measurements; *TN1002*.
- Pressure measurement; refrigeration; stability; superconducting magnets; transient heat transfer; efficiency; heat transfer; helium; *NBSIR 78-877*.
- Pressure measurements; calibrations; instrumentation; national measurement system; 17547.
- Pressure regulator; cryogenic flow control; flow control; liquid helium pressure regulator; 17892.
- Pressure sensitivity; spring-dashpot model; creep; creep recovery; force measurement; force transducer; load cell; 18200.
- Pressure variation; refractive index; refractive index of diamond; diamond; index of diamond; 17936.
- Pressures; sea surface; stationary typhoon; distribution models; *SP523*, pp. 1-1—1-9 (Sept. 1978).
- Preventive dental materials; protective coatings; sealant, evaluation; sealant, formulation; sealants; sealant testing procedures; Bis-GMA; dental resins; pit and fissure sealants; 18151.
- Pricing; transit planning; transit pricing; elasticity; elasticity of transit demand; *NBSIR 78-1462*.
- Primary standard; unit; absorbed dose; absorbed-dose calibration; calorimeter; dissemination; exposure calibration; ionization chamber; 17440.
- Primary standards; standard source; electrically calibrated detector; optical radiation measurements; 17534.
- Primidone assay; antiepileptic drug assays; diphenyl hydantoin assay; enzyme-multiplied immunoassay technique carbamazepine assay; phenobarbital assay; 18108.
- Principal components analysis; workload characterization; clustering; correspondence analysis; data base organization; multidimensional data analysis; *SP500-41*, pp. 149-165 (Oct. 1978).
- Principal curves; scattering problems; Stokes lines; transition point; turning point; wave transmission; wave trapping; asymptotic approximations; Bessel functions; connection formulae; error bounds; JWKB approximation; Liouville-Green approximation; optical potential; 18142.
- Principal values; source region; dyadic Green's function; electromagnetic theory; *TN1000*.
- Principles of measurement; accuracy; dimensional measurement; electron microscope; integrated circuit; linespacing; linewidth; metrology; microelectronics; optical microscope; photomask; precision; 17415.
- Priorities; regulatory agency; resources; risk; building codes; cost-benefit; decision making; *SP518*, pp. 359-369 (Aug. 1978).
- Priority; retaining wall; seismic forces; culverts; design principle; earth structure; earthwork manual; fill slope; *SP523*, pp. V-45—V-52 (Sept. 1978).
- Priority encoder; sample and hold; scaling amplifiers; analog-to-digital converter; expanded range analog-to-digital conversion; overlapping analog-to-digital converters; *U.S. Patent 4,069,479*.
- Prism technique; reflectance; transmission; bulk loss coefficient; CaF_2 ; Ce^{3+} ; LiYF_4 ; photoluminescence; *SP509*, pp. 132-136 (Dec. 1977).
- Privacy; computer crime; computer fraud; computer misuse; computer safeguards; computer security; computer security model; *SP500-25*.
- Probabilistic analysis; room fires; systems analysis; ventilation; barrier analysis; fire severity; fire spread; fuel load; models; *NBS-GCR-78-119*.
- Probabilistic demands; vehicle routing; *SP503*, pp. 252-259 (Mar. 1978).
- Probabilities; room fires; computer programs; fire tests; flashover; ignition; *NBS-GCR-77-112*.
- Probability; rate constant; realm; sequence; state; states-transition; system's approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; *NBSIR 77-1273*.
- Probability; rate constant; realm; sequence; state; state's-transition; system; systems approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; 17967.
- Probability density function; statistical computation; Taylor series; Wilson-Hilferty approximation; asymptotic expansion; cumulative density function; fixed-length continued fraction and series; Gamma distribution; *SP503*, pp. 302-307 (Mar. 1978).
- Probability distribution of polymer near surface; polymer in a wedge; polymer interface; polymer statistics; polymer surface problem; *J. Res. 83*, No. 4, 381-385 (1978).
- Probability of size of usage; rationing; statistical approach to management; time-sharing resource control; usage patterns; management of resources; *SP500-41*, pp. 199-222 (Oct. 1978).

- Probability plots; randomness; statistics; testing assumptions; 4-plot analysis; assumptions; data analysis; distribution analysis; graphical analysis; in control; measurement process; predictability; 17935.
- Probability theory; ratio of razed houses; wooden houses; damages of structure by earthquake; disaster mitigation; *SP523*, pp. VII-1—VII-15 (Sept. 1978).
- Probability theory; reliability; statistical analysis; structural engineering; buildings (codes); concrete (reinforced); design (criteria); loads; *BSS110*.

- Pulse duration; surface damage threshold; surface roughness; breakdown field; coating substrate; damage morphology; fused silica; Normarski micrographs; SP509, pp. 166-173 (Dec. 1977).
- Pulse generator; pulse measurements; sampling oscilloscope; scattering parameters; spectrum amplitude; automated measurements; fast Fourier transform; 17883.
- Pulse generator; risetime; transfer standard; transition duration; transition time; measurement assurance program; pulse; 18176.
- Pulse generator; spectrum; spectrum amplitude; avalanche transistor; impulse; impulse generator; NBSIR 78-880.
- Pulse heating; cooling of pulsed superconductors; helium cooling of superconductors; helium heat transfer; helium transient heat transfer; pulsed superconductor cooling; 18133.
- Pulse length dependence; breakdown flux and field strength; frequency dependence; intrinsic laser damage; linear and nonlinear refractive indices; multiphoton absorption; polaron; SP509, pp. 465-472 (Dec. 1977).
- Pulse measurement; step response; cavity resonance; electromagnetic interference; high voltage; impulse; 18162.
- Pulse measurement; transient digitizer; automation; data acquisition system; high voltage; impulse; 18161.
- Pulse measurements; sampling oscilloscope; scattering parameters; spectrum amplitude; automated measurements; fast Fourier transform; pulse generator; 17883.
- Pulse superposition technique; temperature derivatives; Born model; calcium oxide; elastic moduli; pressure derivatives; 17703.
- Pulse terms and definitions; risetime; sampling; streak camera; time domain measurements; transition duration; laser; oscilloscope; picosecond; 18183.
- Pulsed CO₂ laser damage; reflectance; 10.6 μm optical components; absorptance; dielectric coated mirror; infrared laser windows; laser mirrors; SP509, pp. 183-194 (Dec. 1977).
- Pulsed DF laser damage; substrate dependence; spot size dependence; surface plasmas; damage thresholds; dielectric-enhanced mirrors; large-spot laser damage; SP509, pp. 325-341 (Dec. 1977).
- Pulsed superconductor cooling; pulse heating; cooling of pulsed superconductors; helium cooling of superconductors; helium heat transfer; helium transient heat transfer; 18133.
- Pulsed x-ray source; x-ray detector calibration; 1.5-8 keV x rays; absolute x-ray detector; electron excitations; monoenergetic x rays; 17771.

Pulse-height analysis; radionuclidic impurities; spectral data analysis by computer; gamma-ray spectroscopy; germanium detector characteristics; 17686.

Pulses; superconductivity; electronics; integrated circuits; Josephson junctions; 17910.

Punctures; sampling; sharp edges; simulation; skin; TIPS Thesaurus; adults; Bureau of Product Safety; children; experimental studies; injury potential; lacerations; mechanical force; mechanical properties; NBS; *NBSIR 73-123*.

Purchase of household appliances; service lives of household appliances; appliances; appliances, household; household appliance cost considerations; household appliances; life-cycle costing; 17631.

Purchasing; technical specifications; developing countries; instrumentation; measurement; procurement; *NBSIR 78-891*.

Pure fluid data; saturated liquid; cell model; corresponding states model; custody transfer; density; equation of state; hard spheres model; liquefied natural gas; magnetic suspension densimeter; measurements; mixture data; 17867.

Pure metals; review; stainless steel; composite materials; mechanical properties; physical properties; 17896.

Purification; space processing; convection; crystal growth; crystal perfection; microgravity; 17367.

PVC; smoke; walls; wiring; branch circuits; electrical codes; fire endurance; fire tests; *NBSIR 78-1415*.

PVT; saturation properties; specific heat; density; enthalpy; entropy; equation of state; oxygen; property computer program; *NBSIR 78-882*.

PVT; ultra-pure air; 298.15 K; Burnett method; low pressures; *J. Res.* 83, No. 5, 415-418 (1978).

PVT data, range of densities; PVT, simple liquids; density dependence of the PVT surface; liquids; melting; 17470.

PVT, simple liquids; density dependence of the PVT surface; liquids; melting; PVT data, range of densities; 17470.

PVTx; computer program; density; equation of state; LNG; mixtures; *NBSIR 77-867*.

PVTx; SF₆-C₃H₈; thermodynamic potential; CO₂-C₂H₆; critical locus; critical point; C₈H₁₈-C₃H₈; equation-of-state; mixtures; 17751.

P-xylene; toluene; ion-molecule equilibria; isotope effects; proton affinity; proton transfer; 17694.

Pyrene; singlet oxygen; upper triplet; excimer; naphthalene; 17614.

Pyroelectric; dielectric; piezoelectric; plasma; polarization; poling; poly(vinylidene fluoride); 17589.

Pyroelectric; electret; piezoelectric; polarization; polymer; polyvinylidene fluoride; 17893.

Pyroelectric; space charge; dipoles; piezoelectric; polarization; polymer; polyvinylidene fluoride; 18239.

Pyroelectric; space charge; dipoles; piezoelectric; polarization; polymer; polyvinylidene fluoride; 18240.

Pyroelectric; thermal pulse; charge transport; piezoelectric; polarization distribution; poling temperature; polyvinylidene fluoride copolymer; 18256.

Pyroelectric detectors; radiometry; silicon cell; silicon detector; silicon photodetector; absolute radiometry; detector; electrically calibrated detectors; laser power measurements; 17535.

Pyroelectric polymer; chain conformation; corona poling; crystal phase transformation; field-induced phase change; piezoelectric polymer polar crystal; polarization; poly(vinylidene fluoride); 18241.

Pyroelectric polymers; sensors; sound measurement; transducers; dynamic measurement; noise spectrum; piezoelectric polymers; 17792.

Pyroelectricity; thermal expansion; compressibility; piezoelectric; polarization; polyvinylidene fluoride-tetrafluoroethylene copolymer; 17512.

Pyroelectricity; transducers; vinylidene-fluoride-tetrafluoroethylene copolymer; aligned dipoles; piezoelectricity;

ty; polarization; polyvinylchloride; polyvinylidene fluoride; 17511.

Pyroelectrics; thermodynamics; cryogenics; entropy; ferroelectrics; 17820.

Pyrolysis; sewage treatment plant effluent; water reuse; bacterial identification; gas-liquid chromatography; potable water; 18203.

Pyrolysis; stability; thermal analysis; thermogravimetry; accelerated aging; complex reactions; decomposition; degradation; heating rates; initial rates; kinetics; life-time prediction; oxidation; polymers; polyurethanes; 17897.

Pyrolysis; s-trithiane; thioformaldehyde; ultraviolet photolysis; vacuum ultraviolet photolysis; CH₃SH; CH₃S; dimethyldisulfide; infrared spectrum; matrix isolation; 17725.

Pyrolysis; termination; transfer; zip length; degradation; deuterated poly- α -methylstyrene; molecular weight; poly- α -methylstyrene; *J. Res.* 83, No. 4, 371-380 (1978).

Pyrolysis; textiles; cellulosic materials; cotton fabrics; fabrics; fire retardant materials; flame resistant fabrics; flame retardants; heat sources; ignition; ignition time; polyesters; *NBS-GCR-78-126*.

Pyrolysis gas chromatography; thermal degradation; weak bounds; azobisisobutyronitrile end groups; polystyrene; 17373.

Pyrolysis products; aircraft cabin materials; aircraft impact accidents; flash fires; 17376.

Pyrophosphate; calcium phosphate; crystal structure; hydrogen bonding; 17355.

Q

QR decomposition; regression; sweep methods; computational methods; least squares; numerical stability; *SP503*, pp. 189-190 (Mar. 1978).

Quadruplet correlation; closure; fluids; nonconservative forces; path dependence; potential of mean force; 18267.

Quadrupole resonance; dipole resonance; electron scattering; energy weighted sum rule; enriched gas target; giant resonance; Neon 20; 17624.

Qualification; solar; testing; collector; evaluation; laboratories; *NBSIR 78-1535*.

Quality assurance; quality of testing; significance of testing; testing; concrete; laboratory evaluation; 18242.

Quality assurance programs; thorium assay; uranium assay; automation; chemical analysis; chemical separations; dissolution; isotopic analysis; plutonium assay; *SP528*, pp. 1-18 (Nov. 1978).

Quality control; automatic inspection; automation; dynamic measurement; inspection; measurement science; 18062.

Quality control; laser energy; laser power; measurement assurance program; measurements; 17924.

Quality control; quality of design; reliability; product failure; product testing; *SP514*, pp. 76-81 (May 1978).

Quality control; radioactivity measurements; radiopharmaceuticals; traceability; 17690.

Quality control; radioimmunoassay; RIA; clinical chemistry; competitive protein binding assay; data processing; *SP503*, pp. 288-291 (Mar. 1978).

Quality control; standards; surveys; U.N. Conference on Science and Technology for Development; workshops; Africa; Agency for International Development (AID); Asia; developing countries; engineering standards; industrialization; Latin America; *SP507*.

Quality control manual; regulations; third party agencies; training; certification; compliance assurance programs; industrialized building construction; inspection; personnel qualifications; *SP518*, pp. 369-379 (Aug. 1978).

Quality control of radioactive material; radioactive tracer; radioactivity, tracer; administered tracer; dose calibrator measurement errors; 17662.

Quality of design; reliability; product failure; product testing; quality control; *SP514*, pp. 76-81 (May 1978).

Quality of testing; significance of testing; testing; concrete; laboratory evaluation; quality assurance; 18242.

Quantile function; regression function; Bernstein polynomials; prediction; *SP503*, pp. 191-198 (Mar. 1978).

Quantitation; secondary; sputtering; calibration procedures; depth profiling; ion microprobe mass analysis; 18022.

Quantitation limits; reporting of data; systematic error; x-ray fluorescence analysis; atmospheric pollutants; counting statistics; detection limits; energy vs. wavelength dispersion; imprecision; merit; 17507.

Quantitative analysis; relative elemental sensitivity factors; round robin analysis; secondary ion mass spectrometry; ion microprobe mass analysis; microanalysis; 18052.

Quantitative analysis; secondary ion mass spectrometry; surface analysis; ion microprobe mass analysis; local thermal equilibrium model; microanalysis; 17837.

Quantitative analysis; secondary ion mass spectrometry; surface analysis; elemental sensitivity factors; local thermal equilibrium model; microanalysis; 17838.

Quantitative analysis; secondary ion mass spectrometry; surface analysis; ion microprobe mass analyzer; microanalysis; particulate analysis; 18028.

Quantitative analysis; single-particle analysis; continuous radiation; electron probe; peak-to-background ratios; 18054.

Quantitative analysis; spin-lattice relaxation times; stereochemistry; amino sugars; carbon-13 NMR; coupling constants; Fourier transform NMR; nitrogen-15 NMR; proton NMR; 17678.

Quantitative electron probe microanalysis; x-ray continuum; x-ray spectrum; computer program; energy dispersive detector; multichannel analyzer; peak overlap; 17830.

Quantitative surface analysis; reference materials; x-ray photoelectron spectroscopy; analytical methods; Auger-electron spectroscopy; ESCA; 17856.

Quantum interference; RF attenuation; RF power; RF standards; SQUID; superconductivity; 17972.

Quantum rotor; rovibronic transitions; spherical top molecules; symmetry analysis; Born-Oppenheimer Approximations; Coriolis interactions; frame transformations; group theory; inversion symmetry; Lambda (Λ) coupling; level clusters; 17937.

Quantum tunneling; stress activation; subcritical crack growth; surface energy; activated processes; cohesive bond; fracture; Griffith criteria; lattice models; lattice trapping; 17469.

Quantum yield; rate constant; air pollution; atmospheric chemistry; chemical kinetics; data evaluation; gas phase; photoabsorption cross section; photochemistry; *SP513*.

Quantum yield; tunable laser; mercuric iodide; photodissociation; photofragment spectroscopy; 18246.

Quantum yields; carbenes; chloromethane; free radical reactions; lasers; photochemistry; 17584.

Quantum yields; radiative; substituent effect; chlorotoluenes; fluorescence; fluorobenzenes; fluorotoluenes; liquid; non-radiative; 17613.

Quarks; reconciliation; scattering; (V-A)-currents; GIM model; neutrinos; partons; 17496.

Quarrying; solid waste; amphibole; copper; crushed stone; fiber; iron; minerals; mining; *SP506*, pp. 461-469 (Nov. 1978).

Quartic anharmonicity; rotational energy levels; vibrational band centers; $\text{CH}_3\text{-d}_n$; infrared spectrum; matrix isolation; molecular structure; 17723.

Quartz; sapphire; spinel; ZnSe; alkali-halides; alkaline earth fluorides; As_2S_3 ; DF; electric breakdown; HF; laser damage; *SP509*, pp. 118-125 (Dec. 1977).

Quartz crystal oscillators; quartz crystals; frequency discrimination; frequency lock system; frequency stability; frequency stabilization; oscillator systems; phase modulation; 18305.

Quartz crystal standards; rubidium gas cell; short-term stability; time standards; cesium standards; flicker noise; frequency accuracy; frequency instabilities; long-term instability; microwave frequency; passive hydrogen maser; 17984.

Quartz crystals; frequency discrimination; frequency lock system; frequency stability; frequency stabilization; oscillator systems; phase modulation; quartz crystal oscillators; 18305.

Quasielastic light scattering; conformation of adsorbed γ -globulin; flocculation and stabilization; 18131.

Quasielastic light scattering; Rayleigh spectrometer; correlator; FFT spectrum analyzer; photon counting; 17473.

Quasi-Newton; simplex method; variable metric method; computer timings; curve fitting; estimation; gradient; Newton-Raphson; perturbation methods; *SP503*, pp. 373-378 (Mar. 1978).

Quenching; $\text{Br}^*(^2\text{P}_{1/2})$; collisional deactivation; halogens; inter-halogens; laser excitation; 17687.

Quenching; random error; reduced activity; systematic error; ^3H ; ^{32}P ; accuracy; blank; Cerenkov counting; figure of merit; liquid scintillation counting; Poisson errors; precision; 17510.

Quenching; reactive quenching; spin-orbit excited $\text{I}(^5\text{P}_{1/2})$; deactivation; energy transfer; 18125.

Quenching; sodium; energy transfer; 17909.

Quenching rate; BO ; BO_2 ; fluorescence; laser; lifetime; 18290.

Quenching rate; fluorescence; laser; lifetime; PH_2 ; 18291.

Questionnaire; standards institute; survey; development assistance; industrialization; industry survey; Korea south; metrology; *NBSIR 77-1382*.

Queue length; waiting time; concurrency; bottlenecks; overload; peakload; *SP500-41*, pp. 83-92 (Oct. 1978).

Queueing models; simulation; software monitoring; workload definition; ADP life cycle; computer performance evaluation; computer performance measurement; computer performance prediction; computer system acquisition; conference proceedings; CPEUG; hardware monitoring; *SP500-41*.

Queueing network; analytic modeling; computer systems; performance evaluation; *SP500-41*, pp. 113-116 (Oct. 1978).

Queueing systems; Markov model; network model; *SP500-41*, pp. 103-111 (Oct. 1978).

Queueing theory; resource allocation; control theory; CPU scheduling; memory management; modeling; operating systems; performance; *SP500-41*, pp. 93-100 (Oct. 1978).

R

Rabi oscillations; time dependent populations; coherent excitation; finite-level atom; finite-level molecule; intense laser; multiphoton absorption; 18010.

Rabi-splitting experiment; sodium atom laser; theoretical; non-linear ionization; optical double-resonance; 18092.

Racking stiffness; racking strength; windloads; corner brace; in-plane shear forces; *SP523*, pp. VI-25—VI-34 (Sept. 1978).

Racking strength; windloads; corner brace; inplane shear forces; racking stiffness; *SP523*, pp. VI-25—VI-34 (Sept. 1978).

Radar; radar clutter; radio holography; radar resolution; spectral analysis; frequency spectrum; power spectrum; 18096.

Radar; rf probe; antenna; calibration; electromagnetic field intensity; field strength measurement; 17813.

Radar; spectroscopy; time; universe; Congress; electromagnetic interference; fire behavior; flow measurement; metric; *DIM/NBS 62*, No. 5, 1-28 (1978).

Radar clutter; radio holography; radar resolution; spectral analysis; frequency spectrum; power spectrum; radar; 18096.

Radar resolution; spectral analysis; frequency spectrum; power spectrum; radar; radar clutter; radio holography; 18096.

Radial dose profile; scattering foil; absorbed dose; central axis depth dose; collimation; electrons; *NBSIR 78-1552*.

Radial velocities; radiation transfer; scattering; cosmic maser sources; *18270*.

Radian; SI; supplementary; units; base; decibel; derived; dimension; logarithm; neper; *17401*.

Radiance; radiometry; source; spectroscopy; standard; ultraviolet; calibration; deuterium; irradiance; lamp; *17606*.

Radiant heat flux; room fires; ASTM E-84 Tunnel Test; carbon dioxide; carbon monoxide; fire growth; fire tests; flame spread; flashover; interior finishes; life safety; mobile homes; *NBSIR 78-1530*.

Radiant heat flux; room fires; upholstered chairs; ASTM E-84 Tunnel Test; fire growth; fire tests; flame spread; flashover; incidental fire; interior finish; life safety; mattress; mobile home; *NBSIR 78-1531*.

Radiant power measurement; radiometric instrument characterization; radiometric measurement accuracy; detector responsivity measurement; interlaboratory photodetector measurement comparison; laser power measurement; photodetectors; *17638*.

Radiated power; emergency transmitters; measurement procedures; *18185*.

Radiation; activation analysis; crystal structure; diffraction; isotopes; molecular dynamics; neutron; neutron radiography; nondestructive evaluation; nuclear reactor; *TN969*.

Radiation; atomic line shapes; collision induced radiation; *17386*.

Radiation; buoyant plumes; convection; fire tests; flammability; furnishings; heat transfer; *TN981*.

Radiation; electron; excitation; helium; lifetimes; optical; *18196*.

Radiation; rate coefficient; ultraviolet; argon; hydrogen; metastable nitrogen; *18198*.

Radiation; rating; solar; standards; testing; heat transfer; measurement; *18286*.

Radiation; rating; solar; standards; testing; measurement; *18294*.

Radiation; rating; solar; standards; testing; measurement; *18296*.

Radiation; rating; solar; standards; testing; measurement; *18297*.

Radiation; rating; solar; standards; testing; measurement; *18298*.

Radiation; rating; solar; standards; testing; measurement; *18299*.

Radiation; rating; solar; standards; testing; measurement; *18301*.

Radiation; rating; solar; standards; testing; measurement; *18302*.

Radiation; rating; solar; standards; testing; measurement; *18304*.

Radiation; references; substrates; x-ray fluorescent; accuracy; calibration; evaluation; lead; paint; poisoning; portable; precision; *NBSIR 78-1466*.

Radiation; references; substrates; x-ray fluorescent; accuracy; calibration; evaluation; lead; paint; poisoning; portable; precision; *17996*.

Radiation; slabs (members); steel beams; structural members; ASTM E-119; building fires; ceilings; computer programs; concrete slabs; construction materials; convection; heat transfer; *NBS-GCR-77-100*.

Radiation; thermal radiation properties; titanium; high-speed measurements; high temperature; normal spectral emittance; *18145*.

Radiation chemistry; rates; transients; aqueous solution; chemical kinetics; complex ions; electron transfer; metal ions; *NSRDS-NBS62*.

Radiation damage; semiconductor devices; silicon-on-sapphire; silicon-sapphire interface; x-ray exposure; x-ray lithography; *17955*.

Radiation dose; radiation testing; scanning electron microscopy; semiconductor devices; total dose screening; hardness assurance; ionizing radiation effects; *17532*.

Radiation dose; silicon-on-sapphire; silicon-sapphire interface; electron-beam evaporator; metal evaporation; metallization; microelectronic devices; *17956*.

Radiation dosimetry; radiation standards; x-ray calibration; brachytherapy sources; calibration; dissemination; gamma-ray calibration; measurement assurance; medical dosimetry; *18199*.

Radiation efficiency; radiation pattern; resistively loaded antenna; TEM cell; method of moments; near-field extrapolative range; *17906*.

Radiation measurements, optical; electro-optical modulating; measurement, optical radiation; optical radiation measurements; *17789*.

Radiation pattern; antennas; arrays; power gain; *18103*.

Radiation pattern; resistively loaded antenna; TEM cell; method of moments; near-field extrapolative range; radiation efficiency; *17906*.

Radiation pressure; atomic spectroscopy; Doppler narrowing; Doppler shifts; frequency standards; high-resolution spectroscopy; ion storage; laser spectroscopy; Penning trap; *18148*.

Radiation pressure; transducers; ultrasonic transducers; calibration of transducers; medical ultrasonics; modulated radiation pressure; nondestructive evaluation; *NBSIR 78-1520*.

Radiation pressure; transducers; ultrasonic transducers; calibration of transducers; medical ultrasonics; modulated radiation pressure; nondestructive evaluation; *17987*.

Radiation probabilities; spectra; transition probabilities; dimers; discharge; f-values; mercury; oscillator strengths; *17460*.

Radiation processing; wire insulation; absorbed dose; cross linking; dose distributions; dosimetry; electron beams; nylon; plastic tubing; polyethylene; polymer improvement; polyvinylchloride; *17451*.

Radiation safety; activation; carbon-11; health physics; high energy neutrons; monitoring; neutrons; *17550*.

Radiation safety; radiation source; safety standard; gamma radiation; irradiation; irradiator; national standard; *H127*.

Radiation safety; radiation sources; radioactive sources; radioactivity; sealed sources; standard; classification; leak test; national standard; *H126*.

Radiation safety; standard reference data; standard reference materials; standards development; technology transfer; weights and measures; basic research; building technology; computer technology; energy conservation and research; fire research; *SP498*.

Radiation safety; x-ray equipment; *H111, Revised*.

Radiation source; safety standard; gamma radiation; irradiation; irradiator; national standard; radiation safety; *H127*.

Radiation sources; radioactive sources; radioactivity; sealed sources; standard; classification; leak test; national standard; radiation safety; *H126*.

Radiation standards; x-ray calibration; brachytherapy sources; calibration; dissemination; gamma-ray calibration; measurement assurance; medical dosimetry; radiation dosimetry; *18199*.

Radiation temperature; resistance thermometer; standard thermocouple; temperature scale; thermodynamic temperature; interpolation equation; IPTS-68; *17374*.

Radiation testing; scanning electron microscopy; semiconductor devices; total dose screening; hardness assurance; ionizing radiation effects; radiation dose; *17532*.

Radiation therapy; random uncertainty; systematic uncertainty; uncertainty; absorbed dose; cobalt-60; *17446*.

Radiation transfer; Balmer lines; mass loss; P Cygni; *17826*.

- Radiation transfer; scattering; cosmic maser sources; radial velocities; 18270.
- Radiation transfer; stellar envelopes; mass loss from stars; P Cygni; 18197.
- Radiative; substituent effect; chlorotoluenes; fluorescence; fluorobenzenes; fluorotoluenes; liquid; nonradiative; quantum yields; 17613.
- Radiative decay simulation; atomic lifetimes; atomic transition probabilities; beam foil experiment; cascade analysis; copper isoelectronic sequence; 17973.
- Radiative transfer; Sobolev approximation; spectral line formation; stellar atmosphere; escape-probability method; 17438.
- Radical buffer; radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; decomposition; ethyl; heats of formation; hexamethylethane; isopropyl; pre-exponential factor; 18110.
- Radical combination; rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; decomposition; ethyl; heats of formation; hexamethylethane; isopropyl; pre-exponential factor; radical buffer; 18110.
- Radio astronomy; B213 NW; cloud dynamics; contour maps; formaldehyde; interstellar gas; 17700.
- Radio astronomy; chemical fractionation; deuterium; dust clouds; emission lines; formyl ion; 17719.
- Radio astronomy; hydroxyl radical; interstellar molecules; line strengths; microwave spectra; molecular properties; *JPCRD* 7, No. 1, 311-362 (1978).
- Radio astronomy; rotational spectra; interstellar sources; ions; microwave spectra; molecular lines; 17720.
- Radio astronomy; rotational transitions; cyanoacetylene; interstellar molecules; line strengths; microwave spectra; molecular constants; *JPCRD* 7, No. 2, 441-494 (1978).
- Radio astronomy; vibrational states; cyanoacetylene; interstellar molecules; millimeter wave; orion; 17643.
- Radio emission; soft x ray; flare-stellar; optical flare emission; 18218.
- Radio frequency; solar heating; weights and measures; calibration; coal gasification; corrosion; EMI; heating and cooling; *DIM/NBS* 62, No. 12, 1-32 (1978).
- Radio holography; radar resolution; spectral analysis; frequency spectrum; power spectrum; radar; radar clutter; 18096.
- Radio holography; standing wave patterns; electromagnetic fields; field measurement; multi-component fields; multi-path propagation; 18097.
- Radio star; satellite communications; C/kT; EIRP; error analysis; G/T; precision measurements; 17894.
- Radioactive samples; x-ray fluorescence analysis; actinides; freeze dried; gravimetric standards; high accuracy; particle size effects; *SP528*, pp. 149-155 (Nov. 1978).
- Radioactive sources; radioactivity; sealed sources; standard; classification; leak test; national standard; radiation safety; radiation sources; *H126*.
- Radioactive tracer; radioactivity, tracer; administered tracer; dose calibrator measurement errors; quality control of radioactive material; 17662.
- Radioactive waste disposal; static fatigue; strength; stress corrosion cracking; brittle fracture; fracture; glass; 17879.
- Radioactivity; sealed sources; standard; classification; leak test; national standard; radiation safety; radiation sources; radioactive sources; *H126*.
- Radioactivity; spiking; traceability; low-level; natural matrix; 17958.
- Radioactivity; standard; information exchange; International Committee on Radionuclide Metrology; natural matrix standards; 18004.
- Radioactivity measurements; radiopharmaceuticals; traceability; quality control; 17690.

- Raman; thermal diffusion; change of index of refraction with temperature; heat conduction; laser beam; microscopic particle; Mie scattering; optical path length change; 17483.
- Raman; thermal diffusion; change of index of refraction with temperature; heat conduction; laser beam; microscopic particle; Mie scattering; optical path length change; 17697.
- Raman line shape; Van Hove limit; collective modes; condensed state; correlation functions; harmonic oscillator; nitrogen-argon mixture; projection operator; 18126.
- Raman microprobe; Raman spectra; stack particulates; air particulates; asbestos particles; chemical microanalysis; micro-mineralogy; microparticles; micro-Raman spectroscopy; pollution analysis; 17878.
- Raman microprobe; Raman spectroscopy; air particulates; environmental carbon; laser effects; microanalysis; 18135.
- Raman microprobe; Raman spectroscopy; sheet and chain silicates; mineralogy; 18134.
- Raman microprobe; Raman spectroscopy; sulfate aerosol; trace organics; biological tissues; chemical microanalysis; microparticles; microparticulate pollutants; molecular analysis; 18039.
- Raman scattering; resonances; small particles; complex refractive index; efficiency factor for absorption; electric multipole; internal fields; magnetic multipole; Mie scattering theory; 18280.
- Raman scattering; resonant Raman scattering; band structure; cuprous oxide; exciton; optical spectra; 18283.
- Raman spectra; stack particulates; air particulates; asbestos particles; chemical microanalysis; micro-mineralogy; microparticles; micro-Raman spectroscopy; pollution analysis; Raman microprobe; 17878.
- Raman spectra; vibrational frequencies; force constants; fundamental frequencies; infrared spectra; normal vibrations; polyatomic molecules; *JPCRD 7*, No. 4, 1323-1444 (1978).
- Raman spectroscopy; air particulates; environmental carbon; laser effects; microanalysis; Raman microprobe; 18135.
- Raman spectroscopy; conformation in melt; elastic moduli; longitudinal acoustic modes; normal mode calculation; perfluoro n-alkanes; polytetrafluoroethylene-hexafluoropropylene copolymer; 17383.
- Raman spectroscopy; sheet and chain silicates; mineralogy; Raman microprobe; 18134.
- Raman spectroscopy; sulfate aerosol; trace organics; biological tissues; chemical microanalysis; microparticles; microparticulate pollutants; molecular analysis; Raman microprobe; 18039.
- Raman spectroscopy; sulfate in particulates; aerosol size distribution; Doppler shift spectroscopy; microfibers; microRaman spectrometer; Mie scattering; 17404.
- Raman spectroscopy; sulfates; vanadium oxides; air pollution; chemical analysis; particles; 18244.
- Raman spectroscopy; tetrathiafulvalene; x-ray crystallography; low-dimensional materials; mercury; 17562.
- Raman spectroscopy; TFE-HFP copolymer; crystallinity; diamond anvil cell; high pressure; polytetrafluoroethylene; 18207.
- Raman spectroscopy; vibrational spectrum; airborne particles; atmospheric pollution; microprobe analysis; molecular composition; 17668.
- Raman spectroscopy; x-ray powder diffraction; Calomel; crystal structure; mercurous chloride; phase transition; 17598.
- Ramsey cavity; two-frequency interrogation; atomic and molecular beam spectroscopy; atomic frequency standard; cavity phase shift; 18160.
- Random characteristics; seismic zoning; spectral shapes; theoretical analysis; design earthquake; deterministic intensity function; historical data; maximum values; *SP523*, pp. IV-78-IV-95 (Sept. 1978).
- Random coil; random flight chain; relaxation time; excluded volume; Monte Carlo; polymer chain dynamics; 17629.
- Random error; reduced activity; systematic error; ^3H ; ^{32}P ; accuracy; blank; Cerenkov counting; figure of merit; liquid scintillation counting; Poisson errors; precision; quenching; 17510.
- Random error; standards; systematic error; testing of assumptions; validation; accuracy; bias detection; chemical analysis; chemical measurement process; data reporting; detection limits; exploratory techniques; patterns; performance characteristics; precision; 18152.
- Random flight; span; star-branched molecule; polymer chain; 17599.
- Random flight chain; relaxation time; excluded volume; Monte Carlo; polymer chain dynamics; random coil; 17629.
- Random flight chains; adsorption; constrained Hollingsworth radius; diffusion approximation; extent of cilium; polymer chains; 18211.
- Random number generation; statistical routines; time-sharing; algorithm, attributes; computer; Consistent System; data; DATATRAN; linguistic expression; mnemonics; *SP503*, pp. 357-361 (Mar. 1978).
- Random phase approximation; bicritical end point; constant coupling approximation; Curie point; FeBr_2 ; hessian; internal fields; Ising model; meta magnet; molecular field theory; 17748.
- Random sample of feasible solutions; statistical approach and justification; computer; integer programming; Monte Carlo techniques; optimum solution; *SP503*, pp. 362-366 (Mar. 1978).
- Random uncertainty; systematic uncertainty; uncertainty; absorbed dose; cobalt-60; radiation therapy; 17446.
- Random variables; synthesis; wave; accelerogram; artificial earthquake; covariance; filter; finite Fourier expansion; prediction error; *SP523*, pp. IV-28-IV-47 (Sept. 1978).
- Randomness; statistics; testing assumptions; 4-plot analysis; assumptions; data analysis; distribution analysis; graphical analysis; in control; measurement process; predictability; probability plots; 17935.
- Range energy consumption; appliance research; behavioral laboratory; consumer product studies; human behavior research; human factors laboratory; 17519.

- Range-energy relations; stopping power; straggling; charged-particle tracks; collision cross section; delta rays; electrons; heavy charged particles; 17497.
- Rank; spectrum; determinant; invariants; matrices; multilinear function; 18030.
- Rapid pulldown; video tape; archival storage; electron beam recording; kinescope recording; laser scanning; magnetic tape; midfield splice; motion picture film; *SP480-31*.
- Rare earth; amorphous; Curie temperature; magnetism; molecular field; phase transition; 17663.
- Rare earth compounds; spin waves; crystal fields; exchange coupling; magnetic excitations; neutron scattering; 17762.
- Rare earth elements; atomic energy levels; elements, rare earth; 17639.
- Rare earth materials; small angle scattering; amorphous alloys; amorphous magnetism; magnetic clusters; 17760.
- Rare earths; anisotropy; domain effects; dysprosium; magnetism; magnetostriction; 17745.
- Rare earths; spectra; Zeeman effect; atomic energy levels; atomic spectroscopy; electron configurations; ionization potentials; lanthanides; *NSRDS-NBS60*.
- Rare earths; spin waves; crystal fields; inelastic scattering; Laves phase; magnetism; 17920.
- Rare earths; spin waves; crystal fields; inelastic scattering; Laves phase; magnetism; 17921.
- Rare earths; sublattice magnetization; Curie temperature; hydrides; magnetic neutron scattering; magnetic properties; 18008.
- Rare earths at low temperatures; low temperatures; low temperature thermometry; magnetic thermometry; neodymium ethylsulfate; 17413.
- Rare gas oxides; rare gas selenides; rare gas sulfides; collision-induced emission; interatomic interactions; long range perturbation theory; 17396.
- Rare gas selenides; rare gas sulfides; collision-induced emission; interatomic interactions; long range perturbation theory; rare gas oxides; 17396.
- Rare gas sulfides; collision-induced emission; interatomic interactions; long range perturbation theory; rare gas oxides; rare gas selenides; 17396.
- Rare gas-halide laser rates; ion-ion recombination; 18217.
- Rare-earth; ceria-based electrodes; hot-wall; LaCrO_3 ; 18042.
- Rare-gas fluorine lasers; charge transfer; ionic recombination; 17650.
- Rare-gas fluorine lasers; charge transfer; ionic recombination; 17652.
- Rate approximation; two photon absorption; two photon ionization; Bloch equations; density matrix equations; Heisenberg equations; laser bandwidth; multiphoton ionization; multiphoton saturation effects; partially coherent laser; power broadening; 17805.
- Rate coefficient; electrons; excitation; metastable; molecule; oxygen; 18164.
- Rate coefficient; ultraviolet; argon; hydrogen; metastable nitrogen; radiation; 18198.
- Rate constant; air pollution; atmospheric chemistry; chemical kinetics; data evaluation; gas phase; photoabsorption cross section; photochemistry; quantum yield; *SP513*.
- Rate constant; air pollution; chemical kinetics; dimethyl sulfide; ozone; 17832.
- Rate constant; atmospheric chemistry; chemical kinetics; compilation; data base; data evaluation; models; ozone; 17542.
- Rate constant; combustion; hydrogen cyanide; methylene; nitrogen; photolysis; 17833.
- Rate constant; realm; sequence; state; states-transition; system's approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; *NBSIR 77-1273*.
- Rate constant; realm; sequence; state; state's-transition; system; systems approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; 17967.
- Rate constant; resonance fluorescence; stratosphere; chlorine atoms; chlorine nitrate; chlorofluorocarbons; 17666.
- Rate constants; acid; base; environmental conditions; freshwater systems; hydrolysis; organic compounds; *JPCRD 7*, No. 2, 383-416 (1978).
- Rate constants; thermochemistry; fluorinated ions; fluorocarbons; ion-molecule reactions; mass spectrometry; 17735.
- Rate expressions; shock tube; tert-butyl; very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; decomposition; ethyl; heats of formation; hexamethylethane; isopropyl; pre-exponential factor; radical buffer; radical combination; 18110.
- Rates; transients; aqueous solution; chemical kinetics; complex ions; electron transfer; metal ions; radiation chemistry; *NSRDS-NBS62*.
- Rates of Ni(II) and Cu(II) ion-exchange; hydroxyapatite or bone-mineral; ion-exchange adsorption; Langmuir-adsorption rate equation; mordanting and adhesion; polymer bonding with hard tooth tissues; 18155.
- Rating; solar; standards; testing; heat transfer; measurement; radiation; 18286.

- Robust; sensitivity analysis; convergence; covariance; diagnostics; influence; leverage; nonlinear; regression; *SP503*, pp. 77-86 (Mar. 1978).
- Robust; time series; trend-cycle; cubic spline; data analysis; L_1 norm; least absolute values; linear programming; *SP503*, pp. 271-275 (Mar. 1978).
- Robust estimation; statistical analysis; statistics and numerical analysis; Bayesian methods; interface; *SP503*, pp. 199-203 (Mar. 1978).
- Robustness; t -statistic density; double exponential population; joint density of sample mean and variance; nonnormality; *17604*.
- Rodlike molecule; conformational energy calculations; degradation; dielectric constant; dielectric relaxation time; electric birefringence; electric dichroism; intrinsic viscosity; light scattering; polymerization; poly(n-alkyl isocyanate); *17661*.
- Roofing; application guidelines; elastomeric; materials; membranes; performance factors; review; *TN972*.
- Roofing; sag; slip; asphalt; bitumen; built-up roofing; coal-tar pitch; *17857*.
- Roofing moisture; bituminous roof membranes; built-up roofs; moisture; moisture dissipation; nondestructive detection of moisture; performance criteria; *TN965*.
- Room; scale-model; theory; buoyancy flows; compartment fires; corridor; experiment; flow coefficients; *NBSIR 78-1512*.
- Room fire; scaling; temperature; velocity; corridor; heat transfer; *17582*.
- Room fire tests; fire test design; fire test variables; large scale fire tests; *17796*.

- Room fires; ASTM E-84 Tunnel Test; carbon dioxide; carbon monoxide; fire growth; fire tests; flame spread; flashover; interior finishes; life safety; mobile homes; radiant heat flux; *NBSIR 78-1530*.
- Room fires; computer programs; fire tests; flashover; ignition; probabilities; *NBS-GCR-77-112*.
- Room fires; rooms; thermodynamics; ventilation; computer programs; fire plume; flashover; ignition; *NBS-GCR-77-111*.
- Room fires; scale models; buoyant plumes; ceilings; compartment fires; fire plumes; heat transfer; *NBS-GCR-77-98*.
- Room fires; systems analysis; ventilation; barrier analysis; fire severity; fire spread; fuel load; models; probabilistic analysis; *NBS-GCR-78-119*.
- Room fires; thermodynamics; ventilation; computer program; flashover; furniture; ignition; *NBS-GCR-77-110*.
- Room fires; upholstered chairs; ASTM E-84 Tunnel Test; fire growth; fire tests; flame spread; flashover; incidental fire; interior finish; life safety; mattress; mobile home; radiant heat flux; *NBSIR 78-1531*.
- Room fires flashover; smoke; standards; test procedures; bibliographies; fire dynamics; fire tests; gases; *NBS-GCR-77-108*.
- Rooms; thermodynamics; ventilation; computer programs; fire plume; flashover; ignition; room fires; *NBS-GCR-77-111*.
- Rotating disks; singular perturbations; turning-point; viscous flow; Weber's equation; boundary-value problem; eigenvalues; parabolic cylinder functions; resonance; *17816*.
- Rotating target x-ray tube; x-ray fluorescence analysis; x-ray liquid and slurry sample cell; x-ray monochromator; analysis of solutions and slurries; high-precision, wavelength dispersive x-ray spectrometer; nuclear safeguards; *SP528*, pp. 125-132 (Nov. 1978).
- Rotation; ammonia infrared spectrum; inversion; matrix isolation; *17477*.
- Rotation algebra; spinors; two-level system; double groups; group theory; Hamilton's rotations; icosahedral group; octahedral group; *17651*.
- Rotation of polarization; silicon single crystal; x-ray optical activity; x-ray scattering; absorption of x-rays; polarization; *17950*.
- Rotational constants; rotational spectral lines; triatomic molecules; dipole moments; hyperfine structure; internuclear distance; microwave spectra; *JPCRD 7*, No. 4, 1445-1750 (1978).
- Rotational constants; spectra; chemistry; dioxirane; microwave spectra; olefins; ozone reactions; *17378*.
- Rotational energy levels; vibrational band centers; CH_3d_2 ; infrared spectrum; matrix isolation; molecular structure; quartic anharmonicity; *17723*.
- Rotational isomers; torsional frequencies; ideal gas thermodynamic properties; internal rotation; *m*-cresol; *o*-cresol; *p*-cresol; phenol; potential barrier heights; *JPCRD 7*, No. 2, 417-424 (1978).
- Rotational movement; thermal neutrons; three-dimensional radiography; complex objects; laminagraphy; multiple-film; *17834*.
- Rotational relaxation; argon; benzene; excited electronic state; *18158*.
- Rotational spectra; dipole moment; ethyl hypochlorite; hyperfine structure; microwave spectrum; molecules; *17622*.
- Rotational spectra; interstellar sources; ions; microwave spectra; molecular lines; radio astronomy; *17720*.
- Rotational spectral lines; triatomic molecules; dipole moments; hyperfine structure; internuclear distance; microwave spectra; rotational constants; *JPCRD 7*, No. 4, 1445-1750 (1978).
- Rotational transitions; cyanoacetylene; interstellar molecules; line strengths; microwave spectra; molecular constants; radio astronomy; *JPCRD 7*, No. 2, 441-494 (1978).
- Roughness; slope; surfaces; correlation length; fused silica; polishing; *SP509*, pp. 157-165 (Dec. 1977).
- Round robin analysis; secondary ion mass spectrometry; ion microprobe mass analysis; microanalysis; quantitative analysis; relative elemental sensitivity factors; *18052*.
- Rounding error; significance arithmetic; significant digit algorithms; automatic error monitoring; computer calculations; Fortran error analysis; *SP503*, pp. 395-399 (Mar. 1978).
- Rounding error; software; chopping; disc analysis; error analysis; floating-point arithmetic; inner products; interval analysis; polynomial evaluation; relative error; *17815*.
- Round robin test; solar collector; thermal performance testing; flat-plate collectors; *17823*.
- Routing; shortest paths; transit; transit information systems; transit routing; transportation; urban transportation; algorithms; algorithm testing; mass transit; *NBSIR 78-1426*.
- Rovibronic transitions; spherical top molecules; symmetry analysis; Born-Oppenheimer Approximations; Coriolis interactions; frame transformations; group theory; inversion symmetry; Lambda (Λ) coupling; level clusters; multipole transitions; *17937*.
- RPG-2; XTALLY; cross tabulations; hierarchical order; *SP503*, pp. 19-25 (Mar. 1978).
- Ru surfaces; adsorption; CH_3OH ; decomposition; H_2CO ; oxygenated hydrocarbon complexes; *17645*.
- Rubber; spherical indentors; standard ISO 48; vulcanizate; hardness; modulus; *17619*.
- Rubber seals; solar collectors; solar energy systems; standards; test methods; *NBSIR 77-1437*.
- Rubber seals; solar energy systems; standards; test methods; durability; *18102*.
- Rubidium; alkalis; cesium; electron collisions; potassium; *17447*.
- Rubidium aluminum silicate; x-ray diffraction; crystal chemistry; ion exchange; polymorphism; potassium aluminum silicate; *18027*.
- Rubidium atoms; two-photon spectroscopy; wavelength reference; dye laser spectroscopy; *18260*.
- Rubidium gas cell; short-term stability; time standards; cesium standards; flicker noise; frequency accuracy; frequency instabilities; long-term instability; microwave frequency; passive hydrogen maser; quartz crystal standards; *17984*.
- Rubidium, liquid; Gruneisen parameter; liquid state; liquid structure factor; Monte Carlo; pseudopotential; *18141*.
- Ruby; spin concentration; standard reference material (SRM); absolute measurement; intensity standard; paramagnetic resonance; *J. Res.* **83**, No. 2, 133-164 (1978).
- Ruby; spin concentration; standard reference material (SRM); absolute measurement; intensity standard; paramagnetic resonance; *SP260-59*.
- Ruby pressure scale; semiconductor; diamond cell; electrical resistance measurements; fixed points; high pressure; *17797*.
- Rule of reversed stability; structure determination; titanium-copper deuteride; deuterium-titanium bond; neutron powder diffraction; profile analysis; *18303*.
- Rules and regulations; standards; building regulation; construction; enforcement; inspection; legislation; manufactured building; *NBSIR 78-1503*.
- Run time prediction; signature table analysis; interval estimation; point estimation; *SP500-41*, pp. 183-191 (Oct. 1978).
- Rupture strength; silicate laser glass; thermo-optic distortion; Young's modulus; birefringence; fluorophosphate laser glass; glass density; nonlinear refractive index; phosphate laser glass; physical-optical properties; *SP509*, pp. 416-433 (Dec. 1977).
- Rust; stress corrosion; corrosion; crevice corrosion; galvanic corrosion; inhibitors; pitting corrosion; *C159*.
- Ruthenium; carbon monoxide; chemisorption; formaldehyde; hydrogen; *17713*.
- Ruthenium; catalytic methanation; chemisorption; methanol; *17714*.

Ruthenium; sulphur hexafluoride; x-ray photoelectron spectroscopy; adsorption; ESCA; physical adsorption; 17708.

Ruthenium; surface characterization; tungsten; electron work function; field-electron emission; field-ion emission; 17384.

Ruthenium; surfaces; thermal desorption; ultraviolet photoemission; adsorption; methanol; photoelectron spectroscopy; 17524.

Ruthenium; work function; catalysis; chemisorption; field emission; nitric oxide; nitrogen; oxygen; 17730.

Rutherford backscattering; sputter-etching; zinc selenide; Auger analysis; bias-sputtering; calcium fluoride; *SP509*, pp. 271-275 (Dec. 1977).

Rutherford backscattering alignment; silicon crystallographic orientation; profiling; controlled doping profiles; critical channelling angle; C-V profiling; ion beam scanning; ion channeling; ion implantation; *SP400-49*.

Rydberg constant; stabilized dye laser; calcium atomic beam; optical frequency/wavelength standard; 17886.

R&D; technological change; technology; demonstration projects; Experimental Technology Incentives Program; federal funding of civilian R&D; federal policies; guidelines; policies; *NBS-GCR-ETIP 76-07*.

S

Safe operating area, transistor; scanning, acoustic microscope; second breakdown; semiconductor materials; semiconductor process control; silicon; silicon dioxide; silicon-on-sapphire; spreading resistance; test patterns; test structures; *SP400-36*.

Safeguards; burnup calculations; isotope correlation ratios; reactor history deduction; reactor history verification; *SP528*, pp. 170-200 (Nov. 1978).

Safeguards; uranium; accountability; analyses; plutonium; remote; *SP528*, p. 19 (Nov. 1978).

Safeguards and nonproliferation; active and passive fuel cycle safeguards concepts; integrated safeguards systems; *SP528*, pp. 78-82 (Nov. 1978).

Safe-operating-area; second-breakdown; thermal instability; thermal resistance; transistor, power; hot spots; nondestructive testing; 17564.

Safe-operating-area limits; second breakdown; thermal instability; transistors, power; hot spots; measurement technique; nondestructive testing; 17600.

Safety; appliances; consumer behavior; consumer information; consumer products; energy conservation; government regulations; product design; product performance; product standards; 17353.

Safety; explosion; fire; fuel; gasoline; hydrogen; methane; 18130.

Safety; solar heating and cooling; structural performance; toxicity; fire safety; health; physical hazards; *NBSIR 78-1532*.

Safety; stairs; user needs; architectural design; design considerations; dimensional relationships; environmental design; *NBSIR 78-1554*.

Safety; standards; children; containers; failure analysis; flammable fluids; gasoline; hazards; kerosene; *NBSIR 78-1414 (CPSC)*.

Safety, bicycle; standards, bicycle safety; test methods, bicycle; wet braking; bicycles; braking, bicycle; braking, wet; consumer product safety; measurements, bicycle braking; riding tests; *NBSIR 78-1467*.

Safety engineering; slip resistance; test methods; coefficient of friction; friction; performance standards; 18293.

Safety factors; statistical modeling; stochastic theory of fracture; computer simulation; distributed cracks; distributed dislocations; fatigue; fracture; microstructural analysis; multi-axial analysis; nondestructive evaluation; reliability analysis; 17528.

Safety regulations; consumer product safety; CPSC; product life; product performance; *SP514*, p. 177 (May 1978).

Safety research; anthropometry; human factors; lawn mowers; psychophysics; reaction time; 18268.

Safety standard; gamma radiation; irradiation; irradiator; national standard; radiation safety; radiation source; *H127*.

Sag; slip; asphalt; bitumen; built-up roofing; coal-tar pitch; roofing; 17857.

Salt spray resistance; abrasion resistance; coatings; color and gloss change; impact resistance; industrial cladding; moisture resistance; 17943.

Salting out effect; aqueous solubility of polynuclear aromatic hydrocarbons; coupled columns liquid chromatography; heat of solution; polynuclear aromatic hydrocarbons; 17746.

Salts; structure; bond-delocalized; croconates; derivatives; dianions; dicyanomethylene; esters; planar; 17864.

Samarium; spectra; barium; cerium; cesium; lanthanum; praseodymium; 17389.

Sample and hold; scaling amplifiers; analog-to-digital converter; expanded range analog-to-digital conversion; overlapping analog-to-digital converters; priority encoder; *U.S. Patent 4,069,479*.

Sample bank; analytical; National Environmental Specimen Bank; prototype; research; *SP501*.

Sample scanning; underfilled optics; coherence theory; effective incoherence; image scanning; microdensitometry; optical linearity; overfilled optics; 17456.

Sampling; custody transfer; heating value; hydrocarbon; liquefied natural gas; 18029.

Sampling; sharp edges; simulation; skin; TIPS Thesaurus; adults; Bureau of Product Safety; children; experimental studies; injury potential; lacerations; mechanical force; mechanical properties; NBS; punctures; *NBSIR 73-123*.

Sampling; streak camera; time domain measurements; transition duration; laser; oscilloscope; picosecond; pulse terms and definitions; risetime; 18183.

Sampling and storage; subsampling; National Environmental Banking System; neutron activation analysis; organs and tissue biopsies; radiochemical separation; 17537.

Sampling oscilloscope; scattering parameters; spectrum amplitude; automated measurements; fast Fourier transform; pulse generator; pulse measurements; 17883.

Sand; shake table; standard penetration test; bridge foundations; dynamic triaxial tests; liquefaction; model tests; pile foundations; *SP523*, pp. IV-115-IV-157 (Sept. 1978).

Sapphire; silica; transparency; two-photon absorption; ultraviolet windows; alkali-halides; avalanche ionization; breakdown; calcite; KDP; multiphoton absorption; *SP509*, pp. 489-495 (Dec. 1977).

Sapphire; spinel; ZnSe; alkali-halides; alkaline earth fluorides; As_2S_3 ; DF; electric breakdown; HF; laser damage; quartz; *SP509*, pp. 118-125 (Dec. 1977).

SAS; SOUPAC; SPSS; statistical package; TSAR; BMDP; DATA-TEXT; features matrix; OMITAB; OSIRIS; *SP503*, pp. 342-351 (Mar. 1978).

Satellite; scientific calculations; time of year; broadcast; delay correction; microprocessor; *TN1003*.

Satellite; synchronization; time broadcasts; time code; GOES; 18065.

Satellite communication; earth terminal; effective isotropic radiated power; figure of merit; measurement procedure; noise temperature; *NBSIR 78-879*.

Satellite communication; earth terminal measurement system; effective isotropic radiated power; figure of merit; noise temperature; *NBSIR 78-895*.

Satellite communications; C/kT; EIRP; error analysis; G/T; precision measurements; radio star; 17894.

Satellite communications; satellite effective isotropic radiated power (EIRP); transmission coefficient; atmosphere; downlink carrier-to-noise density ratio (C/kT); earth-terminal gain-to-noise-temperature ratio (G/T); error analysis; refraction angle; *NBSIR 78-883*.

- Satellite communications; SQUID; cryocooler; infrared; Josephson junction; *SP508*, pp. 109-122 (Apr. 1978).
- Satellite effective isotropic radiated power (EIRP); transmission coefficient; atmosphere; downlink carrier-to-noise density ratio (C/N_T); earth-terminal gain-to-noise-temperature ratio (G/T); error analysis; refraction angle; satellite communications; *NBSIR 78-883*.
- Satellites; time; time code; clocks; GOES; *17359*.
- Saturable absorber; standing-wave electric field; antireflection coatings; germanium; laser damage; *SP509*, pp. 298-315 (Dec. 1977).
- Saturated liquid; cell model; corresponding states model; custody transfer; density; equation of state; hard spheres model; liquefied natural gas; magnetic suspension densimeter; measurements; mixture data; pure fluid data; *17867*.
- Saturated liquid; saturated vapor; tables; torsional crystal viscometer; viscosity; compressed gas; compressed liquid; experimental; oxygen; *17901*.
- Saturated liquid; specific heats; constant volume; heat capacities; liquid; propane; *J. Res.* **83**, No. 5, 449-458 (1978).
- Saturated vapor; tables; torsional crystal viscometer; viscosity; compressed gas; compressed liquid; experimental; oxygen; saturated liquid; *17901*.
- Saturated vapor; thermodynamic properties; vapor association; enthalpy; entropy; gas oligomers; Gibbs energy; ion fragmentation; molybdenum pentafluoride; *17395*.
- Saturated vapor densities; thermodynamic properties; vapor pressures; equation of state; ethylene; internal energy; *J. Res.* **83**, No. 4, 325-327 (1978).
- Saturation; detector; frequency response; high modulation frequency; laser modes; photodiode; *17932*.
- Saturation; frequency response; mode-beating; modulation frequency; optical detector; responsivity; *18167*.
- Saturation properties; specific heat; density; enthalpy; entropy; equation of state; oxygen; property computer program; PVT; *NBSIR 78-882*.
- Scale models; buoyant plumes; ceilings; compartment fires; fire plumes; heat transfer; room fires; *NBS-GCR-77-98*.
- Scale-model; theory. ; buoyancy flows; compartment fires; corridor; experiment; flow coefficients; room; *NBSIR 78-1512*.
- Scaling; scattering; universality; critical exponents; critical points; fixed points; gravity effects; homogeneity; magnetic densimeter; optical interference; power laws; relevant fields; Renormalization Group; *17461*.
- Scaling; temperature; velocity; corridor; heat transfer; room fire; *17582*.
- Scaling amplifiers; analog-to-digital converter; expanded range analog-to-digital conversion; overlapping analog-to-digital converters; priority encoder; sample and hold; *U.S. Patent 4,069,479*.
- Scaling equation of state; critical point; equation of state; *J. Res.* **83**, No. 4, 329-334 (1978).
- Scaling laws; steam; universality of critical behavior; critical phenomena; critical region parameters; equation of state; *18078*.
- Scaling laws; universality; correlation function; correlation length; critical phenomena; equation of state; fluid mixtures; fluids; lattice gas; *17664*.
- Scaling laws; vapor pressure; corrections to scaling; critical exponent; critical isochore; critical pressure; critical temperature; ethylene; *17989*.
- Scanning, acoustic microscope; second breakdown; semiconductor materials; semiconductor process control; silicon; silicon dioxide; silicon-on-sapphire; spreading resistance; test patterns; test structures; thermally stimulated current and capacitance; *SP400-36*.
- Scanning electron microscope; electron beam induced currents; metal-oxide-silicon capacitor; oxidation-induced stacking faults; *18123*.
- Scanning electron microscope; semiconductor technology; integrated circuits; linewidth measurements; microelectronics; micrometrology; optical microscope; photomask; *17811*.
- Scanning electron microscope; simplex; x-ray spectrometry; curve fitting; electron beam microprobe; lithium-drifted silicon detector; *18040*.
- Scanning electron microscope; x-ray spectrometry; applied analysis; electron probe microanalysis; energy-dispersive analysis; lithium-drifted silicon detector; *17545*.
- Scanning electron microscope scale; electrodeposited metal layers; gold-nickel layers; micrometer scale; *U.S. Patent 4,068,381*.
- Scanning electron microscopy; selected-area electron diffraction; transmission electron microscopy; amphibole asbestos; asbestos; chrysotile; electron diffraction; energy-dispersive x-ray spectroscopy; mineral microfibers; *SP506*, pp. 221-233 (Nov. 1978).
- Scanning electron microscopy; semiconductor devices; total dose screening; hardness assurance; ionizing radiation effects; radiation dose; radiation testing; *17532*.
- Scanning electron microscopy; serpentine; talc; transmission electron microscopy; amphibole; asbestos; fibers; light microscopy; mineralogical terminology; *SP506*.
- Scanning electron microscopy; solid particle impact; transmission electron microscopy; 310 stainless steel; electron channelling; erosive wear; *17467*.
- Scanning electron microscopy; specimen current; contrast mechanisms; depth sensitivity; image formation; resolution; *17836*.
- Scanning electron microscopy; talc; transmission electron microscopy; asbestos; *SP506*, pp. 403-411 (Nov. 1978).
- Scanning electron microscopy; x-ray microanalysis; electron probe microanalysis; electron scattering; Monte Carlo calculations; particle analysis; *18051*.
- Scanning low-energy electron probe; semiconductor defect density; semiconductor resistivity; semiconductor wafer diagnostics; automated scanning low-energy electron probe; lateral inhomogeneity; oxide uniformity; *SP400-30*.
- Scatter table rearrangements; assignment problem; backtrack programming; hashing; open addressing; recursion; *18227*.
- Scatter tables; hashing; resource allocation; *18005*.
- Scattering; absorption; calorimeter; laser; *SP509*, pp. 281-285 (Dec. 1977).
- Scattering; cosmic maser sources; radial velocities; radiation transfer; *18270*.
- Scattering; selection rules; sodium nitrate; group theory; lattice modes; neutron; *17628*.
- Scattering; single point diamond turned mirrors; metal mirrors; microripple; polishing; *SP509*, pp. 196-203 (Dec. 1977).
- Scattering; surface roughness; surface statistics; mirrors; *SP509*, pp. 142-155 (Dec. 1977).
- Scattering; universality; critical exponents; critical points; fixed points; gravity effects; homogeneity; magnetic densimeter; optical interference; power laws; relevant fields; Renormalization Group; scaling; *17461*.
- Scattering; (V-A)-currents; GIM model; neutrinos; partons; quarks; reconciliation; *17496*.
- Scattering foil; absorbed dose; central axis depth dose; collimation; electrons; radial dose profile; *NBSIR 78-1552*.
- Scattering parameters; self-calibration techniques; six-port junction; impedance; microwaves; network analyzer; reflection coefficient; reflectometer; *18046*.
- Scattering parameters; six-port; voltage; calibration; current; impedance; network analyzer; power; reflection coefficient; reflectometer; *TN1004*.
- Scattering parameters; snow; characterization; measurements; microwave; *18090*.
- Scattering parameters; spectrum amplitude; automated measurements; fast Fourier transform; pulse generator; pulse measurements; sampling oscilloscope; *17883*.

- Scattering problems; Stokes lines; transition point; turning point; wave transmission; wave trapping; asymptotic approximations; Bessel functions; connection formulae; error bounds; JWKB approximation; Liouville-Green approximation; optical potential; 18142.
- Scenario; steady state; system under test; workload characterization; benchmark; clustering; job initiation; job selection; multivariate regression analysis; multivariate stochastic process; performance measures; remote terminal emulator; SP500-41, pp. 37-61 (Oct. 1978).
- Scenarios; system design; building codes; data collection; fire hazards; fire protection; National Fire Data Center; regulation; reporting system; SP518, pp. 259-283 (Aug. 1978).
- Schrodinger equations; turning points; asymptotic approximations; connection formulae; JWKB approximations; Liouville-Green approximations; parabolic cylinder functions; 18206.
- Schur's lemma; symmetric matrix; bead-spring model; BKZ fluid; Capelli's identity; continuum physics; isotropic tensor; matrix method; nonlinear viscoelasticity; piezoelectricity; polymer physics; 17445.
- Scientific and technical information; standardization; engineering standards; information center; 17616.
- Scientific calculations; time of year; broadcast; delay correction; microprocessor; satellite; TN1003.
- Scientific methods; socio-political system; technical expertise; building design; building regulatory system; decision processes; hazards-related phenomena; innovations; research findings; SP518, pp. 25-47 (Aug. 1978).
- Scientific research abstracts; Special Foreign Currency Program; Yugoslavia science and technology; binational research cooperation; international scientific cooperation; physical science research administration; research planning; TN986.
- Scorching of fabrics by gunfire; typescript identification; wood; identification of boards; fabrics as screening gunshot burns; negative/positive superposition; powder burns; 17607.
- SCR; semiconductor devices; semiconductor measurements; silicon controlled rectifiers; silicon devices; solid-state switches; technology assessment; thyristors; high current switches; high voltage switches; NBSIR 78-1559.
- Screen evaluations; sensitivity of screens; spectro-radiometry of screens; x-radiation of intensifier screens; fluorescent screens; intensifier screen standards; radiographic intensifier screen efficiency; 17577.
- Screening corrections; total photon absorption cross section; total photonuclear absorption cross section; triplet production cross section; Coulomb corrections; pair production cross section; TN968.
- Sea surface; stationary typhoon; distribution models; pressures; SP523, pp. I-1—I-9 (Sept. 1978).
- Sealant, evaluation; sealant, formulation; sealants; sealant testing procedures; Bis-GMA; dental resins; pit and fissure sealants; preventive dental materials; protective coatings; 18151.
- Sealant, formulation; sealants; sealant testing procedures; Bis-GMA; dental resins; pit and fissure sealants; preventive dental materials; protective coatings; sealant, evaluation; 18151.
- Sealant testing procedures; Bis-GMA; dental resins; pit and fissure sealants; preventive dental materials; protective coatings; sealant, evaluation; sealant, formulation; sealants; 18151.
- Sealants; sealant testing procedures; Bis-GMA; dental resins; pit and fissure sealants; preventive dental materials; protective coatings; sealant, evaluation; sealant, formulation; 18151.
- Sealed beam headlights; visual classifications; accident investigation; fluting pattern; forensic science; headlight glass; hit-and-run accidents; SP480-17.
- Sealed sources; standard; classification; leak test; national standard; radiation safety; radiation sources; radioactive sources; radioactivity; H126.
- Seals; selection of materials; solar energy systems; standards; absorber coatings; absorber plates; cover plates; enclosure; insulation; materials performance; reflective surfaces; NBSIR 77-1314.
- Search units; specifications; transducers; ultrasonics; ASTM standards; calibration; nondestructive evaluation; reference blocks; NBSIR 78-1454.
- Season; venetian blinds; view; windows; window usage; energy conservation; office buildings; orientation; photographic method; BSS112.
- Seasonal cost of operation; test method; central air conditioners; heat pumps; rating procedure; NBSIR 77-1271.
- Seasonal efficiency; annual operating cost; boilers; fossil fuel heating systems; furnaces; part load performance; rating procedures; NBSIR 78-1543.
- Seasonal efficiency; boiler; computer simulation; DEPAB; energy conservation; heating systems; part-load performance; 18059.
- Seasonal performance; building heating system; computer simulation; DEPAF; energy conservation; furnaces; operating cost; 18088.
- Second breakdown; semiconductor materials; semiconductor process control; silicon; silicon dioxide; silicon-on-sapphire; spreading resistance; test patterns; test structures; thermally stimulated current and capacitance; thermal properties, transistor; thermal response; SP400-36.
- Second breakdown; thermal instability; transistors, power; hot spots; measurement technique; nondestructive testing; safe-operating-area limits; 17600.
- Second sound; shock wave propagation; solitons; thermal conductivity; thermal diffusivity; thermal equilibrium; heat pulse propagation; molecular dynamics; one-, two-, three-dimensional lattice models; 18154.
- Second sound; shockwave; thermal diffusion; thermal relaxation; crystals; heat pulse; high pressure; high temperature; molecular dynamics; 17738.
- Secondary; sputtering; calibration procedures; depth profiling; ion microprobe mass analysis; quantitation; 18022.
- Secondary hardening; strain aging; temper embrittlement; carbon-manganese steel; dimpled rupture; ductile failure; embrittlement; impact energy; plastic failure; 17974.
- Secondary ion mass spectrometry; ion microprobe mass analysis; microanalysis; quantitative analysis; relative elemental sensitivity factors; round robin analysis; 18052.
- Secondary ion mass spectrometry; sputtering; depth profiling; ion microprobe mass analysis; microanalysis; particle analysis; 18053.
- Secondary ion mass spectrometry; surface analysis; ion microprobe mass analysis; local thermal equilibrium model; microanalysis; quantitative analysis; 17837.
- Secondary ion mass spectrometry; surface analysis; elemental sensitivity factors; local thermal equilibrium model; microanalysis; quantitative analysis; 17838.
- Secondary ion mass spectrometry; surface analysis; ion microprobe mass analyzer; microanalysis; particulate analysis; quantitative analysis; 18028.
- Second-breakdown; thermal instability; thermal resistance; transistor, power; hot spots; nondestructive testing; safe-operating-area; 17564.
- Second-hand markets; small household electrical appliances; solid waste management; waste reduction; consumers; durability; product lifetime; SP514, pp. 82-89 (May 1978).

- Silicon-sapphire interface; electron-beam evaporator; metal evaporation; metallization; microelectronic devices; radiation dose; silicon-on-sapphire; 17956.
- Silicon-sapphire interface; x-ray exposure; x-ray lithography; radiation damage; semiconductor devices; silicon-on-sapphire; 17955.
- Silver; Auger-electron spectra; copper; density of states; electronic band structure; gold; 17977.
- Silver; Auger-electron spectroscopy; copper; density of electronic states; electronic structure; gold; 18147.
- Silver; single crystals; vacancy wind; alloys; atom flux; cadmium; chemical interdiffusion; experiments; interdiffusion coefficients; intrinsic diffusion coefficients; Kirkendall shift; Matano analysis; 18081.
- Silver cyanide indicator; silver electrode; cyanide; cyanide analyzer; gas dialysis; ion-selective electrode; 17406.
- Silver cyanide indicator; silver electrode; cyanide analyzer; cyanide gas diffusion; ion-selective electrode; 18104.
- Silver electrode; cyanide; cyanide analyzer; gas dialysis; ion-selective electrode; silver cyanide indicator; 17406.
- Silver electrode; cyanide analyzer; cyanide gas diffusion; ion-selective electrode; silver cyanide indicator; 18104.
- Similarity evaluation; unary numbers; unit hypercube; best matches; bit pattern matching; bit sum; boolean arithmetic compatibility; interpretation; name searching; ones population count; *SP503*, pp. 146-156 (Mar. 1978).
- Simple Markov models; data analysis; discrete Markov models; manpower planning models; *NBSIR 78-1458*.
- Simplex; x-ray spectrometry; curve fitting; electron beam microprobe; lithium-drifted silicon detector; scanning electron microscope; 18040.
- Simplex method; variable metric method; computer timings; curve fitting; estimation; gradient; Newton-Raphson; perturbation methods; quasi-Newton; *SP503*, pp. 373-378 (Mar. 1978).
- Simulated service tests; technical durability; technical durability magnitude; product testing; *SP514*, p. 175 (May 1978).
- Simulation; architectural psychology; architectural research; building fires; computer-aided design; fire computer program; fire research; fire safety; human performance; model documentation; modeling technique; programming; *NBSIR 78-1514*.
- Simulation; skin; TIPS Thesaurus; adults; Bureau of Product Safety; children; experimental studies; injury potential; lacerations; mechanical force; mechanical properties; NBS; punctures; sampling; sharp edges; *NBSIR 73-123*.
- Simulation; software monitoring; workload definition; ADP life cycle; computer performance evaluation; computer performance measurement; computer performance prediction; computer system acquisition; conference proceedings; CPEUG; hardware monitoring; *SP500-41*.
- Simulation; standby; automatic control systems; dormant storage; layaway; magnetic tape; reactivation; readiness; reliability; sensors; *SP522*.
- Simulation; statistical, computer texts; statistical content; statistical instruction; statistical interactive packages; statistical noninteractive packages; teaching statistics; computer assisted instruction; computer, statistical texts; *SP503*, pp. 437-441 (Mar. 1978).
- Simulation; superconducting devices; superconductivity theory; tunneling; Josephson junctions; 17866.
- Simulation; transformations; distributions; extremes; interactive graphic program; Monte Carlo technique; *SP503*, pp. 292-296 (Mar. 1978).
- Simulation model; sensitivity analysis; *SP500-41*, pp. 193-197 (Oct. 1978).
- Simulation theory; systems research; testing of models; development of models; mathematical models; operations research; prediction models; problem oriented languages; 18317.

- Single and multiple charging transients; ambient-temperature; diffusion; galvanostatic charging; hydrogen; mathematical model; palladium; 18082.
- Single bead contribution to I.V.; torque on the bead; average gradient; intrinsic viscosity; nonrotating bead; 17791.
- Single crystal; system $K_2O-Al_2O_3-SiO_2$; kalsilite; $KAlSiO_4$; non-stoichiometric phases; phase transition; 17444.
- Single crystal; toxic material; x-ray diffraction; 2,3,7,8-tetrachlorodibenzofuran; inducer of enzymes; industrial contaminant; 18195.
- Single crystal; tungsten; angular distribution; desorption; electron stimulated desorption; oxygen; 17702.
- Single crystals; solid electrolytes; Bridgman growth; crystal growth; ionic conductors; 18011.
- Single crystals; vacancy wind; alloys; atom flux; cadmium; chemical interdiffusion; experiments; interdiffusion coefficients; intrinsic diffusion coefficients; Kirkendall shift; Matano analysis; silver; 18081.
- Single point diamond turned mirrors; metal mirrors; microripple; polishing; scattering; *SP509*, pp. 196-203 (Dec. 1977).
- Single pulse shock tube; t-amyl amine; unimolecular decompositions; alkyl amines; alkyl-amino radicals; amino radical; bond energies; fall-off behavior; heats of formation; hydrazine; recombination; 18113.
- Single-crystal; x rays; bicyclononane system; diffraction; direct-methods; explosives; 17699.
- Single-particle analysis; continuous radiation; electron probe; peak-to-background ratios; quantitative analysis; 18054.
- Single-scattering; backscattered electrons; electron-specimen interaction; energy distribution; Monte Carlo electron trajectory calculation; multiple-scattering; 17835.
- Singlet oxygen; upper triplet; excimer; naphthalene; pyrene; 17614.
- Singular perturbations; turning-point; viscous flow; Weber's equation; boundary-value problem; eigenvalues; parabolic cylinder functions; resonance; rotating disks; 17816.
- SiO_2 ; ThF_4 ; thin-films; ZrO_2 ; damage thresholds; half-wave films; hydroxyl content; MgF_2 ; refractive index; *SP509*, pp. 244-250 (Dec. 1977).
- Siren; sound; warning device; acoustics; broadside array; directional siren; loudspeaker array; phased array; *SP480-28*.
- Site occupation; thermodynamics; acoustic modes; entropy; hydride; $PdD_{0.63}$; 17853.
- Six port; automation; millimeter wave; power measurement; reflection measurement; 18057.
- Six-port; automatic network analyzer; automation; microwave; microwave measurements; reflectometer; 18019.
- Six-port; automatic network analyzer; automation; microwave measurements; 18284.
- Six-port; automatic network analyzer; connector; microwave; microwave measurement; power equations; 17952.
- Six-port; automatic network analyzer; microwave measurements; *U.S. Patent 4,104,583*.
- Six-port; automatic network analyzer; microwave; microwave measurement; 18038.
- Six-port; automatic network analyzer; microwave; microwave measurements; 18274.
- Six-port; voltage; calibration; current; impedance; network analyzer; power; reflection coefficient; reflectometer; scattering parameters; *TN1004*.
- Six-port junction; impedance; microwaves; network analyzer; reflection coefficient; reflectometer; scattering parameters; self-calibration techniques; 18046.
- Size distribution of particles; Stokes law velocity; aerosols; calibration of instruments; dioctylphthalate aerosol; Doppler shift spectrometer; heterodyne laser light scattering; light scattering; Mie scattering; particle size; 17499.
- Sizing techniques; sizing tools; workload; benchmarks; *SP500-41*, pp. 305-330 (Oct. 1978).
- Sizing tools; workload; benchmarks; sizing techniques; *SP500-41*, pp. 305-330 (Oct. 1978).
- Skin; TIPS Thesaurus; adults; Bureau of Product Safety; children; experimental studies; injury potential; lacerations; mechanical force; mechanical properties; NBS; punctures; sampling; sharp edges; simulation; *NBSIR 73-123*.

- Solar energy; standards; buildings; cooling; heating; hot water; performance criteria; *NBSIR 78-1562*.

Solar energy; standards; buildings; cooling; heating; performance criteria; solar collectors; 17552.

Solar energy; standards; buildings; *NBSIR 78-1143A*.

Solar energy; standards; toxicity; contamination; corrosion; heat exchanger; heat transfer fluids; potable water; *NBSIR 78-1542*.

Solar energy; system design; database management; data center; GDMS; software selection; 18035.

Solar energy systems; standards; absorber coatings; absorber plates; cover plates; enclosure; insulation; materials performance; reflective surfaces; seals; selection of materials; *NBSIR 77-1314*.

Solar energy systems; standards; test methods; rubber seals; solar collectors; *NBSIR 77-1437*.

Solar energy systems; standards; test methods; durability; rubber seals; 18102.

Solar heat gain; window; window management; daylighting; energy conservation; life-cycle costs; residential; *NBSIR 77-1388*.

Solar heat gain; window management; daylighting; energy conservation; fenestration design; *BSS109*.

Solar heating; weights and measures; calibration; coal gasification; corrosion; EMI; heating and cooling; radio frequency; *DIM/NBS 62, No. 12, 1-32 (1978)*.

Solar heating and cooling; solar hot water; data requirements; noninstrumented data; solar buildings; Solar energy; *NBSIR 77-1247*.

Solar heating and cooling; structural performance; toxicity; fire safety; health; physical hazards; safety; *NBSIR 78-1532*.

Solar heating components; standard test procedure; thermal storage tests; water tank thermal storage; ASHRAE Standards; evaluation of test procedure; *NBSIR 78-1548*.

Solar hot water; data requirements; noninstrumented data; solar buildings; Solar energy; solar heating and cooling; *NBSIR 77-1247*.

Solar irradiance; spectral atmospheric absorptance; spectral distribution of solar energy; spectral solar irradiance; terrestrial solar spectral irradiance; atmospheric absorption; solar constant; solar energy; 18165.

Solar performance criteria; updating; 18107.

Solar reflectance; coatings; emittance; optical efficiency; reflectance; reflection losses; reradiation losses; selective solar absorbers; solar absorptance; 17475.

Solar simulators; spectroradiometry of solar simulators; UV-B spectral region; 17605.

Solar spectra; atomic spectroscopy; double stars; dynamical parallax; Hertzsprung-Russell Diagram; historical review; H. N. Russell; masses of stars; moon's position; solar composition; 17689.

Solid; density; molar volume; oxygen; phase transition; *JPCRD 7, No. 3, 949-958 (1978)*.

Solid; ^{13}C ; aromaticity; coal; cross polarization; NMR; 17677.

Solid electrolytes; Bridgman growth; crystal growth; ionic conductors; single crystals; 18011.

Solid electrolytes; cerium dioxide; electrocatalysis; electrochemical measurements; fuel cells; phosphoric acid; polarization; refractory hard metals; sodium beta alumina; *NBSIR 78-1472*.

Solid particle impact; transmission electron microscopy; 310 stainless steel; electron channelling; erosive wear; scanning electron microscopy; 17467.

Solid particle impact; transmission electron microscopy; ceramics; erosion; fracture; plastic flow; 17904

Solid state; chemical and physical properties; existing data compilations; materials science and engineering; new data needs; 17529.

Solid state; spectral density; statistical mechanics; electronic properties; Green's function; line shapes; nonequilibrium; 17872.

Solid waste; amphibole; copper; crushed stone; fiber; iron; minerals; mining; quarrying; *SP506*, pp. 461-469 (Nov. 1978).

Solid waste management; thermal systems; total energy; wastewater treatment; co-generation; integrated utility systems; *NBSIR 78-1563*.

Solid waste management; waste reduction; consumers; durability; product lifetime; second-hand markets; small household electrical appliances; *SP514*, pp. 82-89 (May 1978).

Solidification; solutal convection; surface tensions; convection; corrosive reactions; crystal perfection; flame inhibition; microgravity; *NBSIR 78-1483*.

Solids; coal; cross-polarization; C-13; macerals; NMR; 18236.

Solids; standards; structural engineering; structural responses; wind loads; winds; accelerograph; codes; design criteria; disaster; earthquake hazards; earthquakes; ground failures; seismicity; *SP523*.

Solid-solid phase transformation; thermodynamics; titanium; transformation energy; transformation temperature; electrical resistivity; high-speed measurements; high temperature; *J. Res. 83, No. 2, 127-132 (1978)*.

Solid-state switches; technology assessment; thyristors; high current switches; high voltage switches; SCR; semiconductor devices; semiconductor measurements; silicon controlled rectifiers; silicon devices; *NBSIR 78-1559*.

Solitons; thermal conductivity; thermal diffusivity; thermal equilibrium; heat pulse propagation; molecular dynamics; one-, two-, three-dimensional lattice models; second sound; shock wave propagation; 18154.

Solubility; solubility product; synovial fluid; calcium diphosphate; calcium pyrophosphate; chondrocalcinosis; pseudogout; 17492.

Solubility; surface; toxicity; acid; adhesion; buffer; dental materials; dentin; disturbed layer; pH; pK; smear layer; 18272.

Solubility product; calcium fluoride; equilibrium; free energy; Gibbs-Duhem equation; nonstoichiometry; point defects; 17489.

Solubility product; synovial fluid; calcium diphosphate; calcium pyrophosphate; chondrocalcinosis; pseudogout; solubility; 17492.

Soluble salt analysis; weathering; x-ray analysis; adobe; clay; particle size distribution; *NBSIR 78-1495*.

Soluble salts; adobe building materials; adobe soil; color determination; microfabric analysis; mineralogical analysis; particle size distribution; pH; plastic and liquid limits; *TN977*.

Solutal convection; surface tensions; convection; corrosive reactions; crystal perfection; flame inhibition; microgravity; solidification; *NBSIR 78-1483*.

Solution of BBGKY hierarchy; uniqueness; correlation functions; one-dimensional hard spheres; 17402.

Solutions; thermodynamic properties; activity coefficient; alkaline earth metal halides; critical evaluation; electrolyte; excess Gibbs energy; osmotic coefficients; *JPCRD 7, No. 1, 263-310 (1978)*.

Solutions; thermodynamic properties; activities; alkaline earth salts; aqueous; critical evaluation; electrolytes; equilibrium constants; free energy; Gibbs energy; ionic; 17772.

Solvent-thinned polyurethane system; vinyl tile; water-thinned polyurethane system; field demonstration; high traffic areas; laboratory findings; maintenance engineers; service conditions; *NBSIR 77-1399*.

Sorption; vinyl chloride; desorption; diffusion constants; Henry's law constants; poly(vinyl chloride); 17371.

Sound; acoustical measurements; acoustics; national measurement system; noise; noise control; 17572.

Sound; transportation system noise; acoustics; architectural acoustics; building acoustics; environmental noise; noise; noise control; *BSS84*.

- Sound; warning device; acoustics; broadside array; directional siren; loudspeaker array; phased array; siren; *SP480-28*.
- Sound measurement; transducers; dynamic measurement; noise spectrum; piezoelectric polymers; pyroelectric polymers; sensors; *17792*.
- Sound power measurement; acoustics; noise emission; reference sound source; *18210*.
- Sound power measurement; standard test procedures for sound power measurement; error of sound power measurement; microphone array; noise; noise measure; reverberation room; *17721*.
- Sound propagation, in wind gradients; sound propagation over impedance surface; wind gradients, effect on sound propagation; acoustic impedance of asphalt; acoustics; correlation used to measure acoustic impedance; Fermat's principle in acoustics; *NBSIR 78-1541*.
- Sound propagation over impedance surface; wind gradients, effect on sound propagation; acoustic impedance of asphalt; acoustics; correlation used to measure acoustic impedance; Fermat's principle in acoustics; impedance, acoustic, measurement of; *NBSIR 78-1541*.
- Sound transmission; building acoustics; building codes; isolation; noise; noise criteria; rating scheme; *SP499*.
- Sound velocity; Young's modulus; bulk modulus; compressibility; iron alloy; maraging steel; nickel alloy; Poisson ratio; shear modulus; *17428*.
- SOUPAC; SPSS; statistical package; TSAR; BMDP; DATA-TEXT; features matrix; OMITAB; OSIRIS; SAS; *SP503*, pp. 342-351 (Mar. 1978).
- Source; spectroscopy; standard; ultraviolet; calibration; deuterium; irradiance; lamp; radiance; radiometry; *17606*.
- Source fires; upholstered furniture; chairs; compartment fires; crib fires; fire tests; ignition source; incidental fires; mobile homes; repeatability; *NBSIR 78-1522*.
- Source region; dyadic Green's function; electromagnetic theory; principal values; *TN1000*.
- Soviet Union; U.S.S.R.; computer export model; computer model; decision model; export administration; export model; model; *NBSIR 78-1435*.
- Space; superconductivity; computers; digital electronics; gravitational studies; high-Q cavities; infrared detectors; magnetometers; magnets; microwave detectors; *NBSIR 78-885*.
- Space charge; dipoles; piezoelectric; polarization; polymer; polyvinylidene fluoride; pyroelectric; *18239*.
- Space charge; dipoles; piezoelectric; polarization; polymer; polyvinylidene fluoride; pyroelectric; *18240*.
- Space charge; transformer oil; treeing; water; electrical breakdown; electric field; Kerr effect; liquid insulants; nitrobenzene; *18209*.
- Space heating; technology; building regulations; data collection; demonstration program; dissemination; information needs; residential construction; solar energy; *SP518*, pp. 1-8 (Aug. 1978).
- Space processing; convection; crystal growth; crystal perfection; microgravity; purification; *17367*.
- Space processing; space shuttle; containerless processing; materials science; micro-g; skylab; *SP520*.
- Space shuttle; biological tissue; computers; electromagnetic interference; firing ranges; flow measurement; fluorescence; laser-Raman; measurements; metric myth; metric speakers; oxygen; phase transition; radiologic imaging; solar energy; *DIM/NBS 62*, No. 3, 1-28 (1978).
- Space shuttle; containerless processing; materials science; micro-g; skylab; space processing; *SP520*.
- Spacelab experiments; critical phenomena; fluids; gravity effects; materials science; phase transitions; *17875*.
- Span; star-branched molecule; polymer chain; random flight; *17599*.
- Spanning tree; Fibonacci numbers; labelled graph; labelled multigraph; Lucas numbers; *18032*.
- Sparse equations; tree partitions; *J. Res.* **83**, No. 5, 485-487 (1978).
- Spatial filtering; coherent illumination; line-width measurement; microscope objective; optical microscope; *17457*.
- Spatial filtering; TV-microscope; visual defect inspection; alignment tolerance; automated photomask inspection; dimensional inspection; flying-spot scanner; microdensitometer; optical overlay; photomask; *SP400-46*.
- Spatial profiles; mercury trimers; *17965*.
- Spatial variance; analysis of variance; decaying sound fields; diffuse sound field; reverberation room; reverberation time; *18079*.
- Special Foreign Currency Program; Yugoslavia science and technology; binational research cooperation; international scientific cooperation; physical science research administration; research planning; scientific research abstracts; *TN986*.
- Special nuclear materials; x ray; accountability; analysis; gamma-ray; neutron; nuclear safeguards; *SP528*.
- Specific heat; density; enthalpy; entropy; equation of state; oxygen; property computer program; PVT; saturation properties; *NBSIR 78-882*.
- Specific heat; superconducting machinery; tensile; thermal and magnetothermal conductivity; thermal expansion; elastic; electrical and magnetic; fatigue and fracture; low-temperature; *17419*.
- Specific heat; superconductivity; Ti_3P compounds; electrical resistivity; electron-phonon interaction; low temperature properties; *17782*.
- Specific heat; vapor pressure; heat of combustion; heat of explosion; miscellaneous materials; *NBSIR 78-1479*.
- Specific heat; velocity of sound; density; enthalpy; entropy; oxygen; properties of fluids; *18255*.
- Specific heats; constant volume; heat capacities; liquid; propane; saturated liquid; *J. Res.* **83**, No. 5, 449-458 (1978).
- Specific heats; vapor pressures; coexistence boundary; critical point; equation of state; ethane; fluids; orthobaric densities; *17458*.
- Specifications; transducers; ultrasonics; ASTM standards; calibration; nondestructive evaluation; reference blocks; search units; *NBSIR 78-1454*.
- Specifications and tolerances; vapor recovery; weights and measures; consumer affairs; education; electronic devices; enforcement; Grain Standards Act; International Organization of Legal Metrology; labeling insulation and polyethylene products; metrication; *SP517*.
- Specimen current; contrast mechanisms; depth sensitivity; image formation; resolution; scanning electron microscopy; *17836*.
- Spectra; acoustic emission; dislocations; nondestructive evaluation; *17768*.
- Spectra; barium; cerium; cesium; lanthanum; praseodymium; samarium; *17389*.
- Spectra; Ca II emission, stars; chromospheres, stars; emission-line, stars; late-type, ultraviolet; *17812*.
- Spectra; cadmium; decay rates; excimer; *18017*.
- Spectra; chemical kinetics; energy transfer; fluorescence; lasers; photochemistry; solar energy; *SP526*.
- Spectra; chemistry; dioxirane; microwave spectra; olefins; ozone reactions; rotational constants; *17378*.
- Spectra; energy transfer; HCN far-infrared; infrared lasers; laser; molecular lasers; *17436*.
- Spectra; structure; ultraviolet; ions; molybdenum; *17375*.
- Spectra; transition probabilities; dimers; discharge; f-values; mercury; oscillator strengths; radiation probabilities; *17460*.
- Spectra; Zeeman effect; atomic energy levels; atomic spectroscopy; electron configurations; ionization potentials; lanthanides; rare earths; *NSRDS-NBS60*.
- Spectra, sun; spectra, ultraviolet; sun; transition region, sun; chromosphere, sun; corona; *18000*.

- Spectra, ultraviolet; sun; transition region, sun; chromosphere, sun; corona; spectra, sun; 18000.
- Spectral analysis; frequency spectrum; power spectrum; radar; radar clutter; radio holography; radar resolution; 18096.
- Spectral atmospheric absorptance; spectral distribution of solar energy; spectral solar irradiance; terrestrial solar spectral irradiance; atmospheric absorption; solar constant; solar energy; solar irradiance; 18165.
- Spectral data analysis by computer; gamma-ray spectroscopy; germanium detector characteristics; pulse-height analysis; radionuclidic impurities; 17686.
- Spectral density; statistical mechanics; electronic properties; Green's function; line shapes; nonequilibrium; solid state; 17872.
- Spectral density; tunneling; dc discharges; dc Stark effect; field emission; ionization theory; 18311.
- Spectral distribution of solar energy; spectral solar irradiance; terrestrial solar spectral irradiance; atmospheric absorption; solar constant; solar energy; solar irradiance; spectral atmospheric absorptance; 18165.
- Spectral line formation; stellar atmosphere; escape-probability method; radiative transfer; Sobolev approximation; 17438.
- Spectral modes; axial modes; detectors; frequency response; helium-neon lasers; lasers; mode beating; 17939.
- Spectral response; krypton-ion laser; linearity; silicon photodiodes; 17610.
- Spectral response; standards; transducers; ultrasonics; acoustic emission; calibrations; nondestructive evaluation; reference blocks; 18177.
- Spectral responsivity; detector; detector radiometry; detector spectral comparator; detector spectral response; filter transmittance test; photodetector; photometer; radiometer; TN988.
- Spectral shapes; theoretical analysis; design earthquake; deterministic intensity function; historical data; maximum values; random characteristics; seismic zoning; SP523, pp. IV-78-IV-95 (Sept. 1978).
- Spectral solar irradiance; terrestrial solar spectral irradiance; atmospheric absorption; solar constant; solar energy; solar irradiance; spectral atmospheric absorptance; spectral distribution of solar energy; 18165.
- Spectrochemical analysis; thermal analysis; wet chemistry; x-ray fluorescence; activation analysis; characterization; chemical composition; chromatographic analysis; coulometry; electron probe microanalysis; ion-selective electrodes; mass spectrometry; polarography; 17595.
- Spectrofluorimeter; detector; fluorimeter; liquid chromatography; photometer; polynuclear aromatic hydrocarbon; selectivity; sensitivity; 17858.
- Spectrofluorimetry; water; carcinogenic compounds; partition coefficient; photon counting; polycyclic aromatics; 17612.
- Spectrometry; x-ray fluorescence; fusion; gas-burner; lithium tetraborate; 18100.
- Spectrophotometry; transmittance; absorption spectra; automation; chemical analysis; colorimetry; heat transfer; reflectance; remote sensing; retroreflectance; NBSIR 75-940.
- Spectroradiometry; measurement equation; optical radiation measurement; photometry; radiometry; TN910-2.
- Spectroradiometry; vision; brightness; human observers; luminance; photometry; 18220.
- Spectroradiometry of screens; x-radiation of intensifier screens; fluorescent screens; intensifier screen standards; radiographic intensifier screen efficiency; screen evaluations; sensitivity of screens; 17577.
- Spectroradiometry of solar simulators; UV-B spectral region; solar simulators; 17605.
- Spectroscopic tool; stainless steel; standards; telescope; time and frequency; attic ventilation; chemical kinetics; computers; fusion reactors; gas flow; microwaves; smoke detectors; DIM/NBS 62, No. 4, 1-32 (1978).
- Spectroscopy; gaseous free radicals; laser magnetic resonance; 18034.
- Spectroscopy; standard; ultraviolet; calibration; deuterium; irradiance; lamp; radiance; radiometry; source; 17606.
- Spectroscopy; time; universe; Congress; electromagnetic interference; fire behavior; flow measurement; metric; radar; DIM/NBS 62, No. 5, 1-28 (1978).
- Spectroscopy; titanium alloys; laser effects; luminescence; metal combustion; 17474.
- Spectroscopy, Auger-electron; x-ray photoelectron spectroscopy; Auger-electron spectroscopy; characterization of particles; 18146.
- Spectroscopy of ozone, photofragment; atom fragments; ozone, photofragment spectroscopy; photofragment spectroscopy of ozone; 18310.
- Spectrum; determinant; invariants; matrices; multilinear function; rank; 18030.
- Spectrum; spectrum amplitude; avalanche transistor; impulse; impulse generator; pulse generator; NBSIR 78-880.
- Spectrum amplitude; automated measurements; fast Fourier transform; pulse generator; pulse measurements; sampling oscilloscope; scattering parameters; 17883.
- Spectrum amplitude; avalanche transistor; impulse; impulse generator; pulse generator; spectrum; NBSIR 78-880.
- Spectrum amplitude; step recovery diode; time domain; avalanche transistor; impulse generator; J band; microwave; picosecond; NBSIR 78-888.
- Spectrum analysis; two-sample variance; flicker noise; frequency; frequency stability; measurement; noise; 18014.
- Spectrum analysis; x-ray fluorescence spectrometry; baseline estimation; counting statistics; gamma-ray spectrometry; Lagrange multiplier; numerical analysis; 17509.
- Spectrum analysis; ytterbium; energy levels; parametric calculations; resonance lines; J. Res. 83, No. 3, 233-245 (1978).
- Spectrum spreading; capacitance effects; energy-gap effects; frequency mixing; frequency multiplication; heating effects; high frequency limitations; I-V curve; point-contact Josephson junction; 17991.
- Spectrum, Yb I; wavelengths, Yb I; Yb I; ytterbium; Zeeman effect; energy levels, Yb I; J. Res. 83, No. 1, 13-70 (1978).
- Spherical indentors; standard ISO 48; vulcanizate; hardness; modulus; rubber; 17619.
- Spherical top molecules; symmetry analysis; Born-Oppenheimer Approximations; Coriolis interactions; frame transformations; group theory; inversion symmetry; Lambda (Λ) coupling; level clusters; multipole transitions; quantum rotor; 17937.
- Spiking; traceability; low-level; natural matrix; radioactivity; 17958.
- Spin; stark; broadening; fine-structure; hydrogen; plasma; 18105.
- Spin concentration; standard reference material (SRM); absolute measurement; intensity standard; paramagnetic resonance; ruby; J. Res. 83, No. 2, 133-164 (1978).
- Spin concentration; standard reference material (SRM); absolute measurement; intensity standard; paramagnetic resonance; ruby; SP260-59.
- Spin polarization; surface physics; electron scattering; polarized LEED; 17575.
- Spin waves; crystal fields; exchange coupling; magnetic excitations; neutron scattering; rare earth compounds; 17762.
- Spin waves; crystal fields; inelastic scattering; Laves phase; magnetism; rare earths; 17920.
- Spin waves; crystal fields; inelastic scattering; Laves phase; magnetism; rare earths; 17921.
- Spinel; ZnSe; alkali-halides; alkaline earth fluorides; As₂S₃; DF; electric breakdown; HF; laser damage; quartz; sapphire; SP509, pp. 118-125 (Dec. 1977).
- Spin-lattice relaxation; cancer; nuclear; phosphorus-31; protons; 18117.

- Spin-lattice relaxation times; stereochemistry; amino sugars; carbon-13 NMR; coupling constants; Fourier transform NMR; nitrogen-15 NMR; proton NMR; quantitative analysis; 17678.
- Spin-orbit excited $I(5^2P_{1/2})$; deactivation; energy transfer; quenching; reactive quenching; 18125.
- Spinors; two-level system; double groups; group theory; Hamilton's rotations; icosahedral group; octahedral group; rotation algebra; 17651.
- Spontaneous emission; strong field; dressed atom; fluorescence spectrum; Heisenberg equations; laser excitation; Liouvillian; multiphoton; polarization; resonance fluorescence; 17840.
- Spontaneous fission; neutron coincidence counting; neutron correlation counting; plutonium nuclear material assay; SP528, pp. 261-283 (Nov. 1978).
- Spontaneous fission spectrum; $^{235}\text{U}(n,f)$; $^{238}\text{U}(n,f)$; $^{239}\text{U}(n,f)$; ^{252}Cf ; absolute; fission cross section; integral fission measurement; 17809.
- Spot size dependence; surface plasmas; damage thresholds; dielectric-enhanced mirrors; large-spot laser damage; pulsed DF laser damage; substrate dependence; SP509, pp. 325-341 (Dec. 1977).
- Spray; sprinkler heads; vaporizing; distribution patterns; drops (liquid); drop size; fire models; fire plumes; sensitivity analysis; NBS-GCR-78-121.
- Spray paints; substrate; effectiveness; graffiti; graffiti removers; materials; paint; removal; remover-substrate compatibility; NBSIR 75-914.
- Spray patterns; sprinkler heads; sprinkler systems; superposition; collection arrays; density; distribution patterns; flow rate; mapping; NBS-GCR-77-105.
- Spreading resistance; test patterns; test structures; thermally stimulated current and capacitance; thermal properties, transistor; thermal response; thyristors; transistors, power; ultraviolet reflectance; x-ray photoelectron spectroscopy; Auger electron spectroscopy; SP400-36.
- Spreading resistance measurements; thermally stimulated measurements; thyristor materials measurements; thyristor measurements; d-c transmission; deep level measurements; energy conservation; measurement methods; photovoltaic method; power-device grade silicon; NBSIR 78-1474.
- Spring-dashpot model; creep; creep recovery; force measurement; force transducer; load cell; pressure sensitivity; 18200.
- Sprinkler heads; sprinkler systems; superposition; collection arrays; density; distribution patterns; flow rate; mapping; spray patterns; NBS-GCR-77-105.
- Sprinkler heads; vaporizing; distribution patterns; drops (liquid); drop size; fire models; fire plumes; sensitivity analysis; spray; NBS-GCR-78-121.
- Sprinkler supervisory devices; control units; fire alarm systems; fire detectors; high-rise communication systems; multiplex systems; NFPA standards; residential fire detector; TN964.
- Sprinkler systems; superposition; collection arrays; density; distribution patterns; flow rate; mapping; spray patterns; sprinkler heads; NBS-GCR-77-105.

- Standard reference materials; toxic elements; accuracy; food grain; instrumental; radiochemical; *18315*.
- Standard sample Au mirrors; surface characterization; surface uniformity; threshold estimation; windows; damage thresholds; failure modes; laser-optical components; Mo mirrors; optical coatings; pitting; ripples; *SP509*, pp. 507-515 (Dec. 1977).
- Standard source; electrically calibrated detector; optical radiation measurements; primary standards; *17534*.
- Standard test procedure; thermal storage tests; water tank thermal storage; ASHRAE Standards; evaluation of test procedure; solar heating components; *NBSIR 78-1548*.
- Standard test procedures for sound power measurement; error of sound power measurement; microphone array; noise; noise measure; reverberation room; sound power measurement; *17721*.
- Standard thermocouple; temperature scale; thermodynamic temperature; interpolation equation; IPTS-68; radiation temperature; resistance thermometer; *17374*.
- Standard time; time; Consultative Committee for the Definition of the Second (CCDS); Coordinated Universal Time; Ephemeris Time; International Atomic Time (TA1); legal time; *17453*.
- Standard unit of processing; SUP; UNIVAC 1100 Series Operating System; computer performance analysis; computer performance measurement; EXEC-8; job accounting systems; Logger system; resource utilization measurement; *SP500-43*.
- Standard wavelengths; x rays; angle interferometers; crystal lattice spacing; gamma rays; muonic x rays; *17448*.
- Standardization; accredited organization method; American National Standards Committee method; American National Standards Institute; ANSI; canvass method; *NBSIR 78-1446*, pp. 35-37 (Apr. 1978).
- Standardization; AID; assistance; developing economies; foreign relations; industrializing nations; international relations; LDC's; measurement services; *NBSIR 77-1385*.
- Standardization; blood banking; machine-readable symbols; optical bar codes; *NBSIR 78-1446*, pp. 7-18 (Apr. 1978).
- Standardization; engineering standards; information center; scientific and technical information; *17616*.
- Standardization; standard reference materials; measurement; reference materials; *SP260-57*.
- Standardization; transitional period; economics of metric conversion; harmonization; management of change; metrication; metric familiarization; rationalization; SI; *SP530*.
- Standardization; vertical separation; altimetry; altitude; aviation; height measurement; measurement units; metric; *NBSIR 77-1386*.
- Standardization; ⁵⁵Fe, ⁸⁵Sr, ¹⁰⁹Cd, ¹²⁵I; defined solid angle spectrometer; *17785*.
- Standards; absorber coatings; absorber plates; cover plates; enclosure; insulation; materials performance; reflective surfaces; seals; selection of materials; solar energy systems; *NBSIR 77-1314*.
- Standards; ADP systems; multivendor systems; plug-compatible systems; procurement regulations; *FIPS PUB 56*.
- Standards; artificial illumination; buildings; criteria; energy conservation; energy consumption; environmental design; lighting levels; *SP518*, pp. 77-94 (Aug. 1978).
- Standards; aseismic design; building service systems; codes; earthquake; hospitals; *TN970*.
- Standards; assessment; building codes; building design; disaster mitigation; earthquakes; engineering; implementation; *NBSIR 78-1549*.
- Standards; assurance; measurement quality control; realtime quality control; reliability; replicates; *SP528*, pp. 98-111 (Nov. 1978).
- Standards; automation; computer aided design; computer aided manufacturing; communications; interface standards; *18120*.
- Standards; automation; computer aided manufacturing systems; computer integrated manufacturing systems; interfaces; motivation for standardization; *18119*.
- Standards; building; building codes; building design; disaster mitigation; earthquakes; engineering; *SP510*.
- Standards; building codes; building design; buildings; construction methods; fire prevention; fire protection; fire safety; life safety; *NBS-GCR-78-118*.
- Standards; building codes; building regulations; building regulatory systems; model building codes; *NBSIR 78-1490*.
- Standards; building economics; economic efficiency; economics; energy; energy conservation; life-cycle cost; optimization; performance standards; resource impact factors; resources; social optimum; *BSS114*.
- Standards; building regulation; construction; enforcement; inspection; legislation; manufactured building; rules and regulations; *NBSIR 78-1503*.
- Standards; buildings; cooling; heating; hot water; performance criteria; solar energy; *NBSIR 78-1562*.
- Standards; buildings; cooling; heating; performance criteria; solar collectors; solar energy; *17552*.
- Standards; buildings; solar energy; *NBSIR 78-1143A*.
- Standards; built environment; education and training; energy conservation; enforcement; legislation; promulgation; regulation; *SP518*, pp. 17-24 (Aug. 1978).
- Standards; calibrations; measurements; nondestructive testing; radiography; reproducibility; *18186*.
- Standards; cavity phase; cesium beam; cesium beam standards; *17993*.
- Standards; children; containers; failure analysis; flammable fluids; gasoline; hazards; kerosene; safety; *NBSIR 78-1414 (CPSC)*.
- Standards; coal mining; computers; control systems; industrial equipment; interface standards; microcomputers; *NBSIR 77-1301*.
- Standards; COM formats and reduction ratios; communications; computer output microform; computer system hardware; computers; data processing; data processing equipment; information systems; microfiche; microfilm; *FIPS PUB 54*.
- Standards; communications; computers; computer system hardware; data processing; data processing equipment; information systems; magnetic tape recording; magnetic tapes; magnetic tape transports; *FIPS PUB 50*.
- Standards; communications; computers; computer system hardware; data processing; data processing equipment; information systems; magnetic tape recording; magnetic tapes; magnetic tape transports; *FIPS PUB 51*.
- Standards; computer aided manufacturing; numerical control; *17870*.
- Standards; digital periodic integrator; electron microscope; homogeneity; standard reference materials; *17869*.
- Standards; encryption; security devices; *SP500-27*, pp. 84-93 (Feb. 1978).
- Standards; measurements; nuclear safeguards; *SP528*, pp. 37-40 (Nov. 1978).
- Standards; State legislation; thermal efficiency; buildings; counties; energy conservation; enforcement; insulation; regulations; *SP518*, pp. 323-358 (Aug. 1978).
- Standards; structural engineering; structural responses; wind loads; winds; accelerograph; codes; design criteria; disaster; earthquake hazards; earthquakes; ground failures; seismicity; solids; *SP523*.

- Standards; surface analysis; ASTM; Auger electron spectroscopy; 17459.
- Standards; surveys; U.N. Conference on Science and Technology for Development; workshops; Africa; Agency for International Development (AID); Asia; developing countries; engineering standards; industrialization; Latin America; *SP507*.
- Standards; systematic error; testing of assumptions; validation; accuracy; bias detection; chemical analysis; chemical measurement process; data reporting; detection limits; exploratory techniques; patterns; performance characteristics; precision; random error; 18152.
- Standards; systems engineering; building codes; classification; index; organization; outline; *SP518*, pp. 145-160 (Aug. 1978).
- Standards; systems engineering; building codes; computer model; decision table; decision theory; network, specifications; *NBS-GCR-78-123*.
- Standards; TDCC; Transportation Data Coordinating Committee; electronic data exchange; *NBSIR 78-1446*, pp. 67-70 (Apr. 1978).
- Standards; telescope; time and frequency; attic ventilation; chemical kinetics; computers; fusion reactors; gas flow; microwaves; smoke detectors; spectroscopic tool; stainless steel; *DIM/NBS 62*, No. 4, 1-32 (1978).
- Standards; terminal; application; computer; displays; graphics; independence; interactive; language; portability; software; *SP503*, pp. 107-116 (Mar. 1978).
- Standards; test methods; durability; rubber seals; solar energy systems; 18102.
- Standards; test methods; rubber seals; solar collectors; solar energy systems; *NBSIR 77-1437*.
- Standards; test procedures; bibliographies; fire dynamics; fire tests; gases; room fires flashover; smoke; *NBS-GCR-77-108*.
- Standards; testing; flat-plate collectors; measurement; modeling; solar; *NBS-GCR-77-109*.
- Standards; testing; heat transfer; measurement; radiation; rating; solar; 18286.
- Standards; testing; measurement; modeling; solar; *TN975*.
- Standards; testing; measurement; radiation; rating; solar; 18294.
- Standards; testing; measurement; radiation; rating; solar; 18296.
- Standards; testing; measurement; radiation; rating; solar; 18297.
- Standards; testing; measurement; radiation; rating; solar; 18298.
- Standards; testing; measurement; radiation; rating; solar; 18299.
- Standards; testing; measurement; radiation; rating; solar; 18301.
- Standards; testing; measurement; radiation; rating; solar; 18302.
- Standards; testing; measurement; radiation; rating; solar; 18304.
- Standards; tests; aircraft; fabrics; fire; flame resistant materials; flight attendants; garments; heat flux; protection; 17788.
- Standards; thermal; ultrasonics; visual; wear debris; acoustic emission; eddy currents; magnetic particles; microwaves; non-destructive testing; penetrants; radiography; 17933.
- Standards; time-of-flight; ${}^6\text{Li}(n,\alpha)\text{T}$; flux measurement; H(n,p); neutrons; 18225.
- Standards; toxicity; bibliographies; building fires; carpets; compartment fires; fire detection systems; fire suppression; fire tests; flame research; flammability tests; smoke; smoke detectors; *NBSIR 78-1504*.
- Standards; toxicity; contamination; corrosion; heat exchanger; heat transfer fluids; potable water; solar energy; *NBSIR 78-1542*.
- Standards; traceability; calibration; measurement assurance; measurement services; *SP250*, 1978 Edition.
- Standards; transducers; acoustic emission; calibrations; non-destructive evaluation; radiography; reference blocks; 17369.
- Standards; transducers; ultrasonics; acoustic emission; calibrations; nondestructive evaluation; reference blocks; spectral response; 18177.
- Standards; users of radiation; dissemination; ionizing radiation; measurement assurance; National Measurement System; *NBSIR 75-946*.
- Standards; vehicle, emergency; vision, peripheral; warning signal; color; conspicuity; emergency vehicle; flashing light; lights; motor vehicle; photometry; signal light; *SP480-16*.
- Standards, bicycle safety; test methods, bicycle; wet braking; bicycles; brakes, bicycle; braking, wet; error analysis; friction, brake; friction, tire/pavement; kinetics, bicycle; measurements, bicycle braking; road tests; *NBSIR 78-1416*.
- Standards, bicycle safety; test methods, bicycle; wet braking; bicycles; braking, bicycle; braking, wet; consumer product safety; measurements, bicycle braking; riding tests; safety, bicycle; *NBSIR 78-1467*.
- Standards development; administrative procedures; building codes; building regulations; buildings; economic impacts; environmental considerations; innovative practices; regulatory research; *SP518*.
- Standards development; building codes, due process; legislation; model codes; promulgation; regulatory process; *SP518*, pp. 67-76 (Aug. 1978).
- Standards development; economics; formulation; innovation; market aggregation; performance requirements; prescriptive standards; *SP518*, pp. 161-164 (Aug. 1978).
- Standards development; survey findings; training; building regulations; enforcement; energy conservation; legislation; *SP518*, pp. 297-312 (Aug. 1978).
- Standards development; technology transfer; weights and measures; basic research; building technology; computer technology; energy conservation and research; fire research; radiation safety; standard reference data; standard reference materials; *SP498*.
- Standards for health care; health care; information processing; management of data elements; *NBSIR 78-1446*, pp. 39-41 (Apr. 1978).
- Standards information; index of standards; National Bureau of Standards; 17617.
- Standards information; index of standards; National Bureau of Standards; 17618.
- Standards institute; survey; development assistance; industrialization; industry survey; Korea south; metrology; questionnaire; *NBSIR 77-1382*.
- Standby; automatic control systems; dormant storage; layaway; magnetic tape; reactivation; readiness; reliability; sensors; simulation; *SP522*.
- Standing wave patterns; electromagnetic fields; field measurement; multi-component fields; multi-path propagation; radio holography; 18097.
- Standing waves; thin films; damage thresholds; electric fields; laser damage; non-quarter-wave designs; picosecond pulses; *SP509*, pp. 260-270 (Dec. 1977).
- Standing-wave electric field; antireflection coatings; germanium; laser damage; saturable absorber; *SP509*, pp. 298-315 (Dec. 1977).
- Star formation; accretion; circumstellar shells; 18307.
- Star formation; hydrodynamics; instabilities; 17387.
- Star-branched molecule; polymer chain; random flight; span; 17599.
- Stark; broadening; fine-structure; hydrogen; plasma; spin; 18105.
- Stark broadening; van der Waals broadening; atomic; instrumental broadening; line shapes; line shifts; pressure broadening; resonance broadening; *SP366*, Supplement 3.
- Stark effect; far-infrared laser; frequency modulation; frequency multiplication; frequency synthesis; phase-lock loop; 18166.
- Stars; chromospheres, stars; emission line, stars; late-type, ultraviolet spectra; 18309.
- Stars, chromospheres; stars, circumstellar shells; stars, late type; ultraviolet observations; ultraviolet spectra; chromospheres; cool stars; Copernicus satellite; emission line profiles; flux variability; 18050.

- Stars, chromospheres; stars, emission line; stars, late-type; Ca II emission; *17585*.
- Stars, circumstellar shells; stars, late type; ultraviolet observations; ultraviolet spectra; chromospheres; cool stars; Copernicus satellite; emission line profiles; flux variability; stars, chromospheres; *18050*.
- Stars, emission line; stars, late-type; Ca II emission; stars, chromospheres; *17585*.
- Stars, late type; ultraviolet observations; ultraviolet spectra; chromospheres; cool stars; Copernicus satellite; emission line profiles; flux variability; stars, chromospheres; stars, circumstellar shells; *18050*.
- Stars, late-type; Ca II emission; stars, chromospheres; stars, emission line; *17585*.
- State; state's-transition; system; systems approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; *17967*.
- State; states-transition; system's approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; *NBSIR 77-1273*.
- State and local government; systems analysis; technology utilization; vote-tallying; computer security; computing technology; election administration; public administration; *SP500-30*.
- State government; test methods; value incentive clauses; Veterans Administration; ETIP; Federal Supply Service; innovation; life cycle costing; local government; performance specifications; procurement policy; *17485*.
- State government; test methods; value incentive clauses; ETIP; Federal Supply Service; innovation; life cycle costing; local government; procurement policy; *17862*.
- State legislation; thermal efficiency; buildings; counties; energy conservation; enforcement; insulation; regulations; standards; *SP518*, pp. 323-358 (Aug. 1978).
- State metric coordinators; Construction Industries Coordinating Committee; Interstate Metric Committee; metrication; NCSBCS; *NBSIR 78-1441*.
- State-of-the-art review; basic principles; computer calculations; computer modeling; experimental methods; smoke control methods; smoke movement; smoke simulation; *17949*.
- State's-transition; system; systems approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; *17967*.
- States-transition; system's approach; "and" gate; behavior; critical events; decision; decision tree; dominant factors; episode; event; fire; fire behavior; fire growth; fire safety; human behavior; models; phase; probability; rate constant; realm; sequence; state; *NBSIR 77-1273*.
- Static fatigue; strength; failure predictions; fracture; fracture mechanics; glass; *17636*.
- Static fatigue; strength; stress corrosion cracking; brittle fracture; fracture; glass; radioactive waste disposal; *17879*.
- Static magnetic susceptibility measurements; tunnel diode oscillator; frequency measurement; nuclear magnetic resonance; reentrant cavity resonator; *U.S. Patent 4,087,738*.
- Static technique; transpiration; vapor density; vapor pressure; melting point; molybdenum pentafluoride; *17397*.
- Stationary typhoon; distribution models; pressures; sea surface; *SP523*, pp. I-1—I-9 (Sept. 1978).
- Statistic; approximation; curve-fitting; least-squares; L_p problems; minimization; norm; residuals; *J. Res.* **83**, No. 1, 71-74 (1978).
- Statistical; survey; tabulation; generalized; hierarchical; large; software; *SP503*, pp. 426-430 (Mar. 1978).
- Statistical analysis; Boolean search system; computer programs; curve fitting; data analysis; data base management; data retrieval; file handling; graphic analysis; IMS information retrieval; KWOC indexing; least-squares; linear regression; MIS; plotting; *H125*.
- Statistical analysis; earthquake danger; Gumbel's theory of extremes, literature review; regional seismic coefficient map; *SP523*, pp. V-14—V-44 (Sept. 1978).
- Statistical analysis; interactive; program; *SP503*, pp. 400-403 (Mar. 1978).
- Statistical analysis; statistical issues; systems design; Client Oriented Data Acquisition Process; CODAP; data collection; large data files; *SP503*, pp. 247-251 (Mar. 1978).
- Statistical analysis; statistics; ultra-high frequency; building attenuation; direct satellite communication; disaster warning; *17780*.
- Statistical analysis; statistics and numerical analysis; Bayesian methods; interface; robust estimation; *SP503*, pp. 199-203 (Mar. 1978).
- Statistical analysis; strong-motion acceleration records; design; earthquake magnitude; epicentral distance; *SP523*, pp. IV-48—IV-77 (Sept. 1978).
- Statistical analysis; structural engineering; buildings (codes); concrete (reinforced); design (criteria); loads; probability theory; reliability; *BSS110*.
- Statistical analysis; thermal neutron flux density; fast neutron flux density; intercomparisons; neutron absorbed dose; neutron-induced reaction rates; neutron kerma; neutron source emission rate; *17498*.
- Statistical analysis; underground; carbon steel; corrosion; ductile cast-iron; *17790*.
- Statistical approach and justification; computer; integer programming; Monte Carlo techniques; optimum solution; random sample of feasible solutions; *SP503*, pp. 362-366 (Mar. 1978).
- Statistical approach to management; time-sharing resource control; usage patterns; management of resources; probability of size of usage; rationing; *SP500-41*, pp. 199-222 (Oct. 1978).
- Statistical comparison; system performance; t-test; ANOVA; regression; *SP500-41*, pp. 227-238 (Oct. 1978).
- Statistical computation; Taylor series; Wilson-Hilferty approximation; asymptotic expansion; cumulative density function; fixed-length continued fraction and series; Gamma distribution; Hermite polynomials; *SP503*, pp. 302-307 (Mar. 1978).
- Statistical computer packages; statistical programs; algorithms; program flexibility; *SP503*, pp. 35-36 (Mar. 1978).
- Statistical, computer texts; statistical content; statistical instruction; statistical interactive packages; statistical noninteractive packages; teaching statistics; computer assisted instruction; computer, statistical texts; *SP503*, pp. 437-441 (Mar. 1978).
- Statistical computing; computer method; general linear model; linear programming; regression; residuals; *SP503*, pp. 276-282 (Mar. 1978).
- Statistical content; statistical instruction; statistical interactive packages; statistical noninteractive packages; teaching statistics; computer assisted instruction; computer, statistical texts; demonstrational statistical methods; *SP503*, pp. 437-441 (Mar. 1978).
- Statistical data processing; third world; catalog; communications; software; software development; *SP503*, pp. 14-18 (Mar. 1978).
- Statistical data systems; data base dictionary; data editing; data entry; data independence; data management; distributed processing; intelligent terminal; *SP503*, pp. 367-372 (Mar. 1978).
- Statistical design decisions; statistical systems; interfacing capabilities; P-STAT; SPSS; social science statistical systems; *SP503*, pp. 260-264 (Mar. 1978).

- Statistical graphical subroutines; time-series plots; data analysis; GR-Z; graphical methods; histograms; *SP503*, pp. 409-415 (Mar. 1978).
- Statistical inference; statistical theory; goodness of fit; least squares; non-random samples; regression analysis; *SP503*, pp. 137-145 (Mar. 1978).
- Statistical instruction; statistical interactive packages; statistical noninteractive packages; teaching statistics; computer assisted instruction; computer, statistical texts; demonstrational statistical methods; simulation; *SP503*, pp. 437-441 (Mar. 1978).
- Statistical interactive packages; statistical noninteractive packages; teaching statistics; computer assisted instruction; computer, statistical texts; demonstrational statistical methods; simulation; statistical, computer texts; *SP503*, pp. 437-441 (Mar. 1978).
- Statistical interface; statistical software; statistical software maintenance and distribution; computer science; maintenance and distribution; *SP503*, pp. 205-210 (Mar. 1978).
- Statistical issues; systems design; Client Oriented Data Acquisition Process; CODAP; data collection; large data files; statistical analysis; *SP503*, pp. 247-251 (Mar. 1978).
- Statistical mechanics; coherent neutron scattering; fluctuations in liquids; generalized hydrodynamics; liquid state; molecular dynamics; *17912*.
- Statistical mechanics; electronic properties; Green's function; line shapes; nonequilibrium; solid state; spectral density; *17872*.
- Statistical model for measuring processes; statistical techniques; testing methods; evaluation of testing methods; measurement methods; standard reference materials; *17741*.
- Statistical modeling; stochastic theory of fracture; computer simulation; distributed cracks; distributed dislocations; fatigue; fracture; microstructural analysis; multi-axial analysis; nondestructive evaluation; reliability analysis; safety factors; *17528*.
- Statistical noise; antiscatter grid; image contrast; image information content; image processing; patient exposures; signal-to-noise ratio; *17437*.
- Statistical noninteractive packages; teaching statistics; computer assisted instruction; computer, statistical texts; demonstrational statistical methods; simulation; statistical, computer texts; statistical content; statistical instruction; *SP503*, pp. 437-441 (Mar. 1978).
- Statistical package; STATJOB; testing; development; documentation; implementation; maintenance; package design; reliability; reporting errors; *SP503*, pp. 211-214 (Mar. 1978).
- Statistical package; TSAR; BMDP; DATA-TEXT; features matrix; OMITAB; OSIRIS; SAS; SOUPAC; SPSS; *SP503*, pp. 342-351 (Mar. 1978).
- Statistical package; weighted least squares; categorical data; linear models; loglinear models; maximum likelihood; SPSS; *SP503*, pp. 329-338 (Mar. 1978).
- Statistical program package; statistics, teaching of; BMD; IMP; OMNITAB II; SPSS; *SP503*, pp. 265-270 (Mar. 1978).
- Statistical program package evaluation; TALENT data; BMDP; nonparametric statistical tests; SPSS; *SP503*, pp. 431-436 (Mar. 1978).

STATJOB; testing; development; documentation; implementation; maintenance; package design; reliability; reporting errors; statistical package; *SP503*, pp. 211-214 (Mar. 1978).

Status of surface-characterization methods; surface analysis; surface atomic structure; surface characterization; surface composition; surface electronic structure; surface properties; surface standards; applications of surface-characterization measurements; *17579*.

Steady state; system under test; workload characterization; benchmark; clustering; job initiation; job selection; multivariate regression analysis; multivariate stochastic process; performance measures; remote terminal emulator; scenario; *SP500-41*, pp. 37-61 (Oct. 1978).

Steam; thermodynamic potential; critical phenomena; critical-point universality; equation of state; internal energy; *17480*.

Steam; universality of critical behavior; critical phenomena; critical region parameters; equation of state; scaling laws; *18078*.

Steel beams; structural members; ASTM E-119; building fires; ceilings; computer programs; concrete slabs; construction materials; convection; heat transfer; radiation; slabs (members); *NBS-GCR-77-100*.

Steels; stresses; structural materials; thermal analysis; building fires; computer programs; concretes; creep; fire models; slabs (members); *NBS-GCR-78-114*.

Steels; structural failure; structural materials; thermal degradation; building fires; computer programs; concretes; creeps; failure analysis; fire models; *NBS-GCR-78-115*.

Steels; temper embrittlement; fractography; fracture properties; hydrogen embrittlement; *18106*.

Stellar atmosphere; escape-probability method; radiative transfer; Sobolev approximation; spectral line formation; *17438*.

Stellar atmospheres; planetary nebulae central stars; *17841*.

Stellar atmospheres; Wolf-Rayet stars; binary system; mass loss; *18238*.

Stellar coronae; x-ray sources; extreme ultraviolet; *18306*.

Stellar envelopes; mass loss from stars; P Cygni; radiation transfer; *18197*.

Stellar spectra; ultraviolet; binary stars; chromospheres; *18261*.

Stellar spectra; ultraviolet; binary stars; chromospheres; *18313*.

Stellar winds; early-type stars; *18308*.

Step recovery diode; time domain; avalanche transistor; impulse generator; J band; microwave; picosecond; spectrum amplitude; *NBSIR 78-888*.

Step response; cavity resonance; electromagnetic interference; high voltage; impulse; pulse measurement; *18162*.

Step-height measurement; stylus instrument; surface texture; uncertainties; imperfect geometry; interferometry; methods divergence; *17625*.

Stereochemistry; amino sugars; carbon-13 NMR; coupling constants; Fourier transform NMR; nitrogen-15 NMR; proton NMR; quantitative analysis; spin-lattice relaxation times; *17678*.

Stereochemistry; tungsten; alkoxy; aryloxy; bonding; chemical shifts; fluorides; nuclear magnetic resonance; *17543*.

Stirling engine; Stirling engine heat pump; air-to-air heat pump; energy conservation heating; engine-driven heat pump; heat engine; heat pump; residential heating; *18098*.

Stirling engine heat pump; air-to-air heat pump; energy conservation heating; engine-driven heat pump; heat engine; heat pump; residential heating; Stirling engine; *18098*.

Stochastic theory of fracture; computer simulation; distributed cracks; distributed dislocations; fatigue; fracture; microstructural analysis; multi-axial analysis; nondestructive evaluation; reliability analysis; safety factors; statistical modeling; *17528*.

Stokes law velocity; aerosols; calibration of instruments; diocetylphthalate aerosol; Doppler shift spectrometer; heterodyne laser light scattering; light scattering; Mie scattering; particle size; size distribution of particles; *17499*.

Stokes lines; transition point; turning point; wave transmission; wave trapping; asymptotic approximations; Bessel functions; connection formulae; error bounds; JWKB approximation; Liouville-Green approximation; optical potential; ordinary differential equations; *18142*.

Stokes parameters; birefringence; circular dichroism; Faraday rotation; Jones calculus; Mueller calculus; optical activity; optics; polarization; *17680*.

Stone decay; stone preservatives; accelerated laboratory testing; performance criteria; *17852*.

Stone preservatives; accelerated laboratory testing; performance criteria; stone decay; *17852*.

Stone preservatives; accelerated stone decay; performance criteria; *17944*.

Stopping power; straggling; charged-particle tracks; collision cross section; delta rays; electrons; heavy charged particles; range-energy relations; *17497*.

Storage; ACIS; biomedical; clinical information; data base; file generator; retrieval; *SP503*, pp. 157-164 (Mar. 1978).

Storage; trace elements; cleaning; containers; contamination; *17385*.

Stored energy profiles; inversion density; parasitic oscillation; phosphate laser glass; silicate laser glass; *SP509*, pp. 409-414 (Dec. 1977).

Storm doors; storm windows; vapor barriers; weatherization; weatherstripping; caulks and sealants; clock thermostats; energy conservation; insulation; replacement windows; retrofitting; *TN982*.

Storm windows; vapor barriers; weatherization; weatherstripping; caulks and sealants; clock thermostats; energy conservation; insulation; replacement windows; retrofitting; storm doors; *TN982*.

Straggling; charged-particle tracks; collision cross section; delta rays; electrons; heavy charged particles; range-energy relations; stopping power; *17497*.

Straggling; transport theory; electron; electron photon showers; energy deposition; Monte Carlo method; photon; *NBSIR 78-1534*.

Strain; stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; piezo-optic; *18275*.

Strain; Volterra; Burgers vector; compatibility; continuum mechanics; defect; dislocation; dislocation; distortion; dynamics; elasticity; Green's tensor; incompatibility; loop; plasticity; *17435*.

Strain aging; temper embrittlement; carbon-manganese steel; dimpled rupture; ductile failure; embrittlement; impact energy; plastic failure; secondary hardening; *17974*.

Strain meter; submerged tunnel; accelerometer; axial force; bar stress transducer; bending moment; displacement meter; dynamic behavior of tunnel; power spectrum; *SP523*, pp. V-69-V-79 (Sept. 1978).

Stratosphere; chlorine atoms; chlorine nitrate; chlorofluorocarbons; rate constant; resonance fluorescence; *17666*.

Streak camera; time domain measurements; transition duration; laser; oscilloscope; picosecond; pulse terms and definitions; risetime; sampling; *18183*.

Strength; ceramic turbines; failure prediction; fracture; oxidation; silicon nitride; *18086*.

Strength; failure predictions; fracture; fracture mechanics; glass; static fatigue; *17636*.

Strength; stress corrosion cracking; brittle fracture; fracture; glass; radioactive waste disposal; static fatigue; *17879*.

Strength; stress corrosion cracking; crack growth; fracture; fracture mechanics; glass-ceramics; *17423*.

Strength; turbine materials; fracture; nondestructive evaluation; proof testing; silicon nitride; *17880*.

Strength function; analog resonance; k-matrix; line broadening; line structure; *17963*.

- Stress; acoustic-optic; birefringence; elasto-optic; figure of merit; germanium; photoelasticity; piezo-birefringence; piezo-optic; pressure; refractive index; 17706.
- Stress; stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; piezo-optic; strain; 18275.
- Stress; Westergaard method; Airy stress function; crack; fracture mechanics; plane elasticity; 17860.
- Stress activation; subcritical crack growth; surface energy; activated processes; cohesive bond; fracture; Griffith criteria; lattice models; lattice trapping; quantum tunneling; 17469.
- Stress analysis; superconducting magnet; coil composite; mechanical properties; physical properties; 18128.
- Stress birefringence; thermal coefficient of refractive index; thermal expansion; interferometry; laser materials; photoelasticity; piezo-optic constants; refractive index; 17520.
- Stress birefringence; Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; piezo-optic; strain; stress; 18275.
- Stress corrosion; corrosion; crevice corrosion; galvanic corrosion; inhibitors; pitting corrosion; rust; CIS9.
- Stress corrosion; corrosion; crevice corrosion; ellipsometry; optical measurements; pitting; 17454.
- Stress corrosion cracking; brittle fracture; fracture; glass; radioactive waste disposal; static fatigue; strength; 17879.
- Stress corrosion cracking; crack growth; fracture; fracture mechanics; glass-ceramics; strength; 17423.
- Stress cycling of coatings; thin films; coating stress; deformable mirrors; dielectric enhanced reflectors; laser mirror coatings; SP509, pp. 358-361 (Dec. 1977).
- Stress effects; superconductors; critical current; degradation; 18127.
- Stress interferometer; thin film thermal expansion coefficient; Young's modulus; zinc selenide; film stress; infrared interferometer; SP509, pp. 230-242 (Dec. 1977).
- Stress (psychology); building fires; case histories; critical incidents; decision making; escape; fire behavior; human factors; mapping; methodology; performance (human); reaction (psychology); NBS-GCR-77-106.
- Stress-birefringence; stress-optical constants; dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; photoelasticity; piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; 17354.
- Stresses; structural materials; thermal analysis; building fires; computer programs; concretes; creep; fire models; slabs (members); steels; NBS-GCR-78-114.
- Stress-induced birefringence; BaF₂; CaF₂; crystalline windows and rods; depolarization; optical distortion; photo-elastic constants; SP509, pp. 89-94 (Dec. 1977).
- Stress-optical constants; dispersion; elasto-optic constants; electronic absorption; interferometry; lattice absorption; photoelastic constants; photoelasticity; piezo-birefringence; piezo-optic constants; polarimetry; potassium chloride; refractive index; stress-birefringence; 17354.
- Strip line oscillator; frequency lock servo; frequency multiplier; frequency standard; microwave absorption cell; 18076.
- s-trithiane; thioformaldehyde; ultraviolet photolysis; vacuum ultraviolet photolysis; CH₃SH; CH₃S; dimethyldisulfide; infrared spectrum; matrix isolation; pyrolysis; 17725.
- Strong field; dressed atom; fluorescence spectrum; Heisenberg equations; laser excitation; Liouvillian; multiphoton; polarization; resonance fluorescence; spontaneous emission; 17840.
- Strong-motion acceleration records; design; earthquake magnitude; epicentral distance; statistical analysis; SP523, pp. IV-48—IV-77 (Sept. 1978).
- Strong-motion accelerogram; structures; vertical acceleration; design; horizontal acceleration; seismic coefficients; stability; SP523, pp. IV-1—IV-19 (Sept. 1978).
- Strontium; cross section decrease; intense laser field; optical collisions; 17926.
- Strontium; thermal ionization; absolute isotope ratios; atomic/molecular vaporization; atomic weights; calcium; fractionation; isotopes; multiple filament; potassium; 17940.
- Strontium fluoride; barium fluoride; ion exchange purification; potassium bromide; reactive gas purification; selective ion filters; SP509, pp. 37-55 (Dec. 1977).
- Structural composites; tensile strength; aluminum; boron; composite materials; cryogenics; fatigue tests; modulus of elasticity; 17557.
- Structural elements; evaluation method of seismic safety; non-structural elements; reinforced concrete buildings; seismic safety index; SP523, pp. VIII-22—VIII-41 (Sept. 1978).
- Structural engineering; building codes; earthquakes; 17505.
- Structural engineering; buildings (codes); concrete (reinforced); design (criteria); loads; probability theory; reliability; statistical analysis; BSS110.
- Structural engineering; structural responses; wind loads; winds; accelerograph; codes; design criteria; disaster; earthquake hazards; earthquakes; ground failures; seismicity; solids; standards; SP523.
- Structural engineering; tall buildings; wind forces; wind pressure; buildings (codes); dynamic response; gust loads; 17767.
- Structural engineering; tall buildings; wind pressure; wind tunnel tests; aerodynamics; dynamic loads; dynamic response; 17941.
- Structural engineering; wind loads; building codes; buildings; deflections; dynamic response; gust factors; 17365.
- Structural failure; structural materials; thermal degradation; building fires; computer programs; concretes; creeps; failure analysis; fire models; steels; NBS-GCR-78-115.
- Structural materials; thermal analysis; building fires; computer programs; concretes; creep; fire models; slabs (members); steels; stresses; NBS-GCR-78-114.
- Structural materials; thermal degradation; building fires; computer programs; concretes; creeps; failure analysis; fire models; steels; structural failure; NBS-GCR-78-115.
- Structural members; ASTM E-119; building fires; ceilings; computer programs; concrete slabs; construction materials; convection; heat transfer; radiation; slabs (members); steel beams; NBS-GCR-77-100.
- Structural performance; testing procedures; thermal performance; durability/reliability; fire safety; rating criteria; solar collectors; NBSIR 78-1305A.
- Structural performance; toxicity; fire safety; health; physical hazards; safety; solar heating and cooling; NBSIR 78-1532.
- Structural performance (thermoplastic plumbing piping); thermoplastic pipe usage (residential plumbing); acoustical performance (plumbing piping); fire performance (plumbing piping); plumbing performance evaluation (piping); BSS111.
- Structural responses; wind loads; winds; accelerograph; codes; design criteria; disaster; earthquake hazards; earthquakes; ground failures; seismicity; solids; standards; structural engineering; SP523.
- Structure; amphibole; asbestos; chemistry; cleavage; defects; dusts; environment; fibers; morphology; serpentine; SP506, pp. 35-48 (Nov. 1978).
- Structure; atmospheric pollution; chemistry of the atmosphere; chlorine nitrate; electric dipole moment; fluorocarbon destruction of stratospheric ozone; microwave spectrum; 17621.
- Structure; bond-delocalized; croconates; derivatives; dianions; dicyanomethylene; esters; planar; salts; 17864.
- Structure; ultraviolet; ions; molybdenum; spectra; 17375.
- Structure; ¹³C; dipolar; NMR; polyethylene; 17674.

- Structure; ²³⁵U; averages; cross section; fission; high resolution; keV energies; 17486.
- Structure determination; titanium-copper deuteride; deuterium-titanium bond; neutron powder diffraction; profile analysis; rule of reversed stability; 18303.
- Structure refinement; ammonium azide; ammonium compounds; azide compounds; crystal structure; neutron diffraction; 18262.
- Structured programming; computational models; data abstraction; hierarchical abstract computers; program complexity; 18013.
- Structured programming; correctness proof; diagnostics; program specifications; program testing; program verification; 18266.
- Structured programming; PL/I; program measurement; 17442.
- Structures; vertical acceleration; design; horizontal acceleration; seismic coefficients; stability; strong-motion accelerogram; SP523, pp. IV-1—IV-19 (Sept. 1978).

- Thin films; coating stress; deformable mirrors; dielectric enhanced reflectors; laser mirror coatings; stress cycling of coatings; *SP509*, pp. 358-361 (Dec. 1977).
- Thin films; damage thresholds; electric fields; laser damage; non-quarter-wave designs; picosecond pulses; standing waves; *SP509*, pp. 260-270 (Dec. 1977).
- Thin films; transmission lines; superconductivity; 17907.
- Thin films; tunneling junctions; metal-oxide-metal diodes; photolithography; 18044.
- Thin films; zinc selenide; absorption; dielectric coatings; *SP509*, pp. 276-280 (Dec. 1977).
- Thin-films; ZrO_2 ; damage thresholds; half-wave films; hydroxyl content; MgF_2 ; refractive index; SiO_2 ; ThF_4 ; *SP509*, pp. 244-250 (Dec. 1977).
- Thioformaldehyde; ultraviolet photolysis; vacuum ultraviolet photolysis; CH_3SH ; CH_3S ; dimethyldisulfide; infrared spectrum; matrix isolation; pyrolysis; *s*-trithiane; 17725.
- Third party agencies; training; certification; compliance assurance programs; industrialized building construction; inspection; personnel qualifications; quality control manual; regulations; *SP518*, pp. 369-379 (Aug. 1978).
- Third world; catalog; communications; software; software development; statistical data processing; *SP503*, pp. 14-18 (Mar. 1978).
- Third-order aberration coefficients; characteristic function; electron optics; electrostatic lenses; 18048.
- Thorium assay; uranium assay; automation; chemical analysis; chemical separations; dissolution; isotopic analysis; plutonium assay; quality assurance programs; *SP528*, pp. 1-18 (Nov. 1978).
- Threat analysis; terrorism; training; adversary characteristics; animal research; behavioral science; collusion; ergonomics; human factors; human reliability; physical security; physiological psychology; *SP480-32*.
- Three dimensional; algorithm metrology; measuring machines; multiple redundancy; 17551.
- Three stages; two stages; vibration isolation; helium dewar; JT loop, regenerative cryocooler; temperature control; *SP508*, pp. 45-57 (Apr. 1978).
- Three-body; tritium; Coulomb; electron scattering; helium; magnetic; 17381.
- Three-dimensional radiography; complex objects; laminagraphy; multiple-film; rotational movement; thermal neutrons; 17834.
- Threshold; track counting; barrier shape; fission; nuclear reactions; photofission bremsstrahlung; 17698.
- Threshold behavior; Cs^- ; K^- ; negative ions; photodetachment; 18074.
- Threshold estimation; windows; damage thresholds; failure modes; laser-optical components; Mo mirrors; optical coatings; pitting; ripples; standard sample Au mirrors; surface characterization; surface uniformity; *SP509*, pp. 507-515 (Dec. 1977).
- Threshold photoelectron spectroscopy; time of flight mass spectrometry; coincidence; fragmentation; ions; ketene; mass spectrometry; methane; methane- d_4 ; photoionization; 17774.
- Threshold values; Consumer Product Safety Commission; mechanical factors; skin injury research; 17644.
- Throughput; BALLOTS; BEST/1TM; bibliographic retrieval system; capacity planning; computer performance analysis; computer system modeling; library automation; response time; *SP500-41*, pp. 127-141 (Oct. 1978).
- Thruput; hardware availability; multiprocessing; present discounted value; software availability; technological matrix; *SP500-41*, pp. 285-291 (Oct. 1978).
- Thymine; 5-methyl-uracil; 5-methyl-2,4 (1H, 3H)-pyrimidinedione; calorimetry; density; enthalpy of solution; nucleic acid bases; thermochemistry; *J. Res.* 83, No. 6, 529-537 (1978).
- Thyristor materials measurements; thyristor measurements; d-c transmission; deep level measurements; energy conservation; measurement methods; photovoltaic method; power-device grade silicon; resistivity variations; silicon; spreading resistance measurements; *NBSIR 78-1474*.
- Thyristor measurements; d-c transmission; deep level measurements; energy conservation; measurement methods; photovoltaic method; power-device grade silicon; resistivity variations; silicon; spreading resistance measurements; thermally stimulated measurements; *NBSIR 78-1474*.
- Thyristors; high current switches; high voltage switches; SCR; semiconductor devices; semiconductor measurements; silicon controlled rectifiers; silicon devices; solid-state switches; technology assessment; *NBSIR 78-1559*.
- Thyristors; transistors, power; automation; computer control; homogeneity; measurement method; photovoltage, bulk; power semiconductor materials; resistivity; semiconductors; silicon; *J. Res.* 83, No. 3, 265-271 (1978).

Thyristors; transistors, power; ultraviolet reflectance; x-ray photoelectron spectroscopy; Auger electron spectroscopy; capacitance-voltage methods; dew-point sensing; dragging-stylus probe; electrical properties; electronics; four-probe method; hermeticity; *SP400-36*.

Time; Consultative Committee for the Definition of the Second (CCDS); Coordinated Universal Time; Ephemeris Time; International Atomic Time (TAI); legal time; standard time; *17453*.

Time; time code; clocks; GOES; satellites; *17359*.

Time; universe; Congress; electromagnetic interference; fire behavior; flow measurement; metric; radar; spectroscopy; *DIM/NBS 62, No. 5, 1-28 (1978)*.

Time and frequency; acoustics; atomic properties; economics; electrical quantities; ionizing radiation; mechanical quantities; national measurement system; optical quantities; surface properties; thermal quantities; *NBSIR 75-947 (Revised December 1977)*.

Time and frequency; acoustics; economics of measurement; electrical quantities; electromagnetic quantities; ionizing radiation; measurement needs; measurement system structure; mechanical quantities; National Measurement System; optical quantities; *NBSIR 75-925*.

Time and frequency; attic ventilation; chemical kinetics; computers; fusion reactors; gas flow; microwaves; smoke detectors; spectroscopic tool; stainless steel; standards; telescope; *DIM/NBS 62, No. 4, 1-32 (1978)*.

Time and frequency; communications; Delphi Study; national measurement system; position location; technological assessment; technological forecasting; *17980*.

Time broadcasts; time code; GOES; satellite; synchronization; *18065*.

Time code; clocks; GOES; satellites; time; *17359*.

Time code; GOES; satellite; synchronization; time broadcasts; *18065*.

Time comparison; universal coordinated time; atomic time; Loran C; portable clocks; *18181*.

Time dependence; wavelength dependence; carrier diffusion; laser damage; semiconductor damage; *SP509, 473-479 (Dec. 1977)*.

Time dependent populations; coherent excitation; finite-level atom; finite-level molecule; intense laser; multiphoton absorption; Rabi oscillations; *18010*.

Time domain; avalanche transistor; impulse generator; J band; microwave; picosecond; spectrum amplitude; step recovery diode; *NBSIR 78-888*.

Time domain measurement; transient response; conical antenna; effective length; FFT; moment method; resistively loaded antenna; TEM horn; *18288*.

Time domain measurements; broadband antenna; EMI measurements; method of moments; resistively loaded antenna; *18047*.

Time domain measurements; time domain reflectometry; antenna scattering; deconvolution; dielectric spectroscopy; homomorphic transformation; modeling of sampling gates; signal processing; *NBSIR 78-881*.

Time domain measurements; transition duration; laser; oscilloscope; picosecond; pulse terms and definitions; risetime; sampling; streak camera; *18183*.

Time domain reflectometry; antenna scattering; deconvolution; dielectric spectroscopy; homomorphic transformation; modeling of sampling gates; signal processing; time domain measurements; *NBSIR 78-881*.

Time of flight mass spectrometry; coincidence; fragmentation; ions; ketene; niass spectrometry; methane; methane- d_4 ; photoionization; threshold photoelectron spectroscopy; *17774*.

Time of year; broadcast; delay correction; microprocessor; satellite; scientific calculations; *TN1003*.

Time response function; calibration; response time; temperature; thermal response; thermometer; *TN959*.

Time series; trend-cycle; cubic spline; data analysis; L_1 norm; least absolute values; linear programming; robust; *SP503, pp. 271-275 (Mar. 1978)*.

Time series algorithms; time series software; user's documentation; data structures; graphics; statistical software package; *SP503, pp. 339-341 (Mar. 1978)*.

Time series software; user's documentation; data structures; graphics; statistical software package; time series algorithms; *SP503, pp. 339-341 (Mar. 1978)*.

Time signals; cereal foods; computers; cryogenic measurements; electronics standards; encryption standard; fire safety; lasers; microcircuit fabrication; nickel standard; rheology; *DIM/NBS 62, No. 7/8, 1-32 (1978)*.

Time standard; cost-benefit; cost-effectiveness; dissemination; frequency standard; *NBSIR 78-874*.

Time standards; cesium standards; flicker noise; frequency accuracy; frequency instabilities; long-term instability; microwave frequency; passive hydrogen maser; quartz crystal standards; rubidium gas cell; short-term stability; *17984*.

Time transfer standard; frequency calibration; frequency transfer standard; microprocessor; television; *17363*.

Time-domain; transmission lines; dielectric measurements; dielectric relaxation time; *17284*.

Time-of-flight; alpha particle; boron; neutron cross section; neutron flux; standard; *18228*.

Time-of-flight; ν ; ^{235}U ; fission; neutron detection; neutron multiplicity; resonance; *17810*.

Time-of-flight; $^6\text{Li}(n,\alpha)\text{T}$; flux measurement; $\text{H}(n,p)$; neutrons; standards; *18225*.

Time-series plots; data analysis; GR-Z; graphical methods; histograms; statistical graphical subroutines; *SP503, pp. 409-415 (Mar. 1978)*.

Time-sharing; algorithm, attributes; computer; Consistent System; data; DATATRAN; linguistic expression; mnemonics; random number generation; statistical routines; *SP503, pp. 357-361 (Mar. 1978)*.

Timesharing; COBOL; execution monitoring; symbolic debugging; *SP500-26*.

Time-sharing; workload; minicomputer system; performance measurement; response time; *SP500-41, pp. 275-283 (Oct. 1978)*.

Time-sharing resource control; usage patterns; management of resources; probability of size of usage; rationing; statistical approach to management; *SP500-41, pp. 199-222 (Oct. 1978)*.

Timesharing systems; benchmarking; computer system selection; response times; *SP500-41, pp. 27-36 (Oct. 1978)*.

Tin; x-ray emission; iodine; $L_{\gamma_{2,3}}$ spectra; tellurium; *17683*.

TIPS Thesaurus; adults; Bureau of Product Safety; children; experimental studies; injury potential; lacerations; mechanical force; mechanical properties; NBS; punctures; sampling; sharp edges; simulation; skin; *NBSIR 73-123*.

Tire durability; appliance durability; environmental impact; *SP514, pp. 156-161 (May 1978)*.

Tire noise; transportation noise; truck; acoustics; noise measurement; noise (sound); *17504*.

Tire noise; transportation noise; truck; acoustics; noise measurement; noise (sound); *17559*.

Tissue composition; energy absorption coefficients; kerma factors; neutron dosimetry; neutron radiation therapy; radiobiology; *17418*.

Titanium; deuteride; hydride; neutron diffraction; octahedral sites; tetrahedral sites; *17692*.

Titanium; electrical resistivity; emittance; heat capacity; high-speed measurements; high temperature; *17450*.

Titanium; high-speed measurements; high temperature; normal spectral emittance; radiation; thermal radiation properties; *18145*.

- Titanium; transformation energy; transformation temperature; electrical resistivity; high-speed measurements; high temperature; solid-solid phase transformation; thermodynamics; *J. Res.* **83**, No. 2, 127-132 (1978).
- Titanium; transmission electron microscopy; fatigue; microstructures; *17905*.
- Titanium alloys; laser effects; luminescence; metal combustion; spectroscopy; *17474*.
- Titanium-copper deuteride; deuterium-titanium bond; neutron powder diffraction; profile analysis; rule of reversed stability; structure determination; *18303*.
- Ti₃P compounds; electrical resistivity; electron-phonon interaction; low temperature properties; specific heat; superconductivity; *17782*.
- Ti₃P-type compounds; arsenic compounds; electronic properties; niobium compounds; silicon compounds; superconductivity; *17541*.
- Ti-6Al-4V; Al 7050; crystalline disorder; Cu mirrors; dislocations; laser-induced stress; melt threshold; Mo mirrors; plasma scrubbing; plasma shielding; slip; surface preparation; *SP509*, pp. 204-214 (Dec. 1977).
- Tolerance; eye injury; impact; mathematical model; ocular contusion; propelled objects; *17986*.
- Tolerance intervals; accuracy; confidence intervals; control chart; diagnostic tests; experimental error; linear regression; precision; *17591*.
- Tolerance level differences; awakening to problems; deceptive sounds; establish legal limits; *SP518*, pp. 285-295 (Aug. 1978).
- Toluene; ion-molecule equilibria; isotope effects; proton affinity; proton transfer; p-xylene; *17694*.
- Toluene ions; charge transfer; ion-molecule reactions; ion structures; nitronium ion; *17693*.
- Tool wear; torque; adaptive control; bibliography; control; cutting force; dynamic; force; load; machine tool; measurement; review; *NBSIR 78-1424*.
- Tool wear; torque; transducer; cutting force; drill bit; drill press; dynamic; force; load; machine tool; measurement; on-line; *NBSIR 78-1423*.
- Topical fluoride; acidulated phosphate fluoride; calcium fluoride; dicalcium phosphate dihydrate; fluorapatite; *17501*.
- Topple test; abrasion; adhesion; optical coating testing; peel test; plug-pull test; *SP509*, pp. 363-377 (Mar. 1978).
- Torque; adaptive control; bibliography; control; cutting force; dynamic; force; load; machine tool; measurement; review; tool wear; *NBSIR 78-1424*.
- Torque; transducer; cutting force; drill bit; drill press; dynamic; force; load; machine tool; measurement; on-line; tool wear; *NBSIR 78-1423*.

- Tunnel diode oscillator; frequency measurement; nuclear magnetic resonance; reentrant cavity resonator; static magnetic susceptibility measurements; *U.S. Patent 4,087,738*.
- Tunnel diode oscillators; acceleration; humidity; LC oscillators; linear motion; nuclear magnetic resonance; pressure; temperature; transducer; *17777*.
- Tunneling; dc discharges; dc Stark effect; field emission; ionization theory; spectral density; *18311*.
- Tunneling; Josephson junctions; simulation; superconducting devices; superconductivity theory; *17866*.

Tunneling; 1-D conductivity; granular films; superconductivity; 17770.

Tunneling junctions; metal-oxide-metal diodes; photolithography; thin films; 18044.

Tunnelling; diffusion in glass; fracture; glass; lattice trapping; mechanisms of fracture; plastic deformation of glass; reaction rate theory; subcritical crack growth; 17468.

Turbine materials; cracks; electron microscopy; fracture interfaces; plastic deformation; silicon nitride; 18075.

Turbine materials; fracture; nondestructive evaluation; proof testing; silicon nitride; strength; 17880.

Turbulence; variance; bias; bispectra; cubic spline; density function estimate; *SP503*, pp. 184-188 (Mar. 1978).

Turnaround time; evaluation; interactive; measurement; response time; selection; service; *FIPS PUB 57*.

Turnaround time; WWMCCS; computer; Honeywell 6000; performance evaluation; response time; tuning; *SP500-41*, pp. 297-303 (Oct. 1978).

Turning point; wave transmission; wave trapping; asymptotic approximations; Bessel functions; connection formulae; error bounds; JWKB approximation; Liouville-Green approximation; optical potential; ordinary differential equations; principal curves; scattering problems; 18142.

Turning points; asymptotic approximations; connection formulae; JWKB approximations; Liouville-Green approximations; parabolic cylinder functions; Schrodinger equations; 18206.

Turning-point; viscous flow; Weber's equation; boundary-value problem; eigenvalues; parabolic cylinder functions; resonance; rotating disks; singular perturbations; 17816.

TV-microscope; visual defect inspection; alignment tolerance; automated photomask inspection; dimensional inspection; flying-spot scanner; microdensitometer; optical overlay; photomask; spatial filtering; *SP400-46*.

Two laser absorption; Bloch equations; coherence; coherent multiphoton effects; density matrix equations; Heisenberg equations; laser bandwidth; multiphoton absorption; multiphoton ionization; partially coherent lasers; power broadening; 17462.

Two phase flow; absorption; cavitation; choking flow; desorption; phase equilibrium; 17971.

Two photon absorption; two photon ionization; Bloch equations; density matrix equations; Heisenberg equations; laser bandwidth; multiphoton ionization; multiphoton saturation effects; partially coherent laser; power broadening; rate approximation; 17805.

Two photon ionization; Bloch equations; density matrix equations; Heisenberg equations; laser bandwidth; multiphoton ionization; multiphoton saturation effects; partially coherent laser; power broadening; rate approximation; two photon absorption; 17805.

Two stages; vibration isolation; helium dewar; JT loop, regenerative cryocooler; temperature control; three stages; *SP508*, pp. 45-57 (Apr. 1978).

Two way classification; unbalanced data; analysis of variance; minimal model; *SP503*, pp. 71-75 (Mar. 1978).

Two way classification; unbalanced data; analysis of variance; minimal model; *SP503*, pp. 87-91 (Mar. 1978).

Two-body wear; wear analysis of business machines; gear-type transmissions; input-output devices; one-body wear; tribological problems; *SP514*, pp. 121-127 (May 1978).

Two-dimensional calibration; uranium; x-ray fluorescence analysis; non-linear least squares; *SP528*, pp. 156-160 (Nov. 1978).

Two-frequency interrogation; atomic and molecular beam spectroscopy; atomic frequency standard; cavity phase shift; Ramsey cavity; 18160.

Two-layer structures; epitaxial growth; Hall measurements; indium-doped silicon; p-n junction isolation; *NBSIR 78-1553*.

Two-level model; Doppler broadening; laser bandwidth effects; multiphoton absorption; multiphoton resonance; 18243.

Two-level system; double groups; group theory; Hamilton's rotations; icosahedral group; octahedral group; rotation algebra; spinors; 17651.

Two-photon absorption; ultraviolet windows; alkali-halides; avalanche ionization; breakdown; calcite; KDP; multiphoton absorption; sapphire; silica; transparency; *SP509*, pp. 489-495 (Dec. 1977).

Two-photon spectroscopy; wavelength reference; dye laser spectroscopy; rubidium atoms; 18260.

Two's complement analog-to-digital converters; analog-to-digital converter; *U.S. Patent 4,129,864*.

Two-sample variance; flicker noise; frequency; frequency stability; measurement; noise; spectrum analysis; 18014.

Two-scale factor, critical point of fluids; correlation of fluids; critical point of fluids; fluids, critical point; 17822.

Twyman-Green; acousto-optic; Brillouin scattering; elasto-optic; Fabry-Perot; figure of merit; Fizeau; interferometer; photoelastic; piezobirefringence; piezo-optic; strain; stress; stress birefringence; 18275.

Type; type restriction; abstract data types; hidden functions; program specification; restricted specification; semantic specification; syntactic specification; 17682.

Type fonts; type setting; vectorized characters; alphabets; COM; computer graphics; computerized typesetting; digital plotting; plotting; *SP500-32*.

Type restriction; abstract data types; hidden functions; program specification; restricted specification; semantic specification; syntactic specification; type; 17682.

Type setting; vectorized characters; alphabets; COM; computer graphics; computerized typesetting; digital plotting; plotting; type fonts; *SP500-32*.

Typescript identification; wood, identification of boards; fabrics as screening gunshot burns; negative/positive superposition; powder burns; scorching of fabrics by gunfire; 17607.

Typewriters; automatic typewriters; cost; cost effectiveness; productivity; 18094.

Typewriters; automatic typewriters; cost-effective; economic; research designs; surveys; 17571.

U

Ultra-high frequency; building attenuation; direct satellite communication; disaster warning; statistical analysis; statistics; 17780.

Ultralinear modulator; differential optical gain; optical bistability; Pockels cell; polarizer; power limiting; 18276.

Ultra-pure air; 298.15 K; Burnett method; low pressures; PVT; *J. Res. 83*, No. 5, 415-418 (1978).

Ultrasonic; welding; wire; adhesion; bonding; mechanism; thermocompression; 17657.

Ultrasonic bond; wire bond; bond; interlaboratory comparison; microelectronic; pull test; 18245.

Ultrasonic calorimeter; ultrasonic power measurements; calorimeter; 18175.

Ultrasonic interferometer; vacuum; manometer; mercury; pressure; 17717.

Ultrasonic power measurements; calorimeter; ultrasonic calorimeter; 18175.

Ultrasonic transducers; calibration of transducers; medical ultrasonics; modulated radiation pressure; nondestructive evaluation; radiation pressure; transducers; *NBSIR 78-1520*.

Ultrasonic transducers; calibration of transducers; medical ultrasonics; modulated radiation pressure; nondestructive evaluation; radiation pressure; transducers; 17987.

Ultrasonics; acoustic emission; bibliography; eddy currents; index; National Bureau of Standards; nondestructive evaluation; publications; radiography; *NBSIR 78-1557*.

Ultrasonics; acoustic emission; calibrations; nondestructive evaluation; reference blocks; spectral response; standards; transducers; 18177.

- Ultrasonics; ASTM standards; calibration; nondestructive evaluation; reference blocks; search units; specifications; transducers; *NBSIR 78-1454*.
- Ultrasonics; visual; wear debris; acoustic emission; eddy currents; magnetic particles; microwaves; nondestructive testing; penetrants; radiography; standards; thermal; *17933*.

- User assistance; computer networks; network operating systems; 18026.
- User needs; architectural design; design considerations; dimensional relationships; environmental design; safety; stairs; NBSIR 78-1554.
- User requirements for police uniforms; clothing survey; law enforcement officer's uniforms; police; police clothing; police uniforms; SP480-29.
- User's documentation; data structures; graphics; statistical software package; time series algorithms; time series software; SP503, pp. 339-341 (Mar. 1978).
- Users of radiation; dissemination; ionizing radiation; measurement assurance; National Measurement System; standards; NBSIR 75-946.
- U.S.S.R.; computer export model; computer model; decision model; export administration; export model; model; Soviet Union; NBSIR 78-1435.
- U.S.S.R.; Wadsley defects; actinolite; ambient air; amosite; amphibole; amphibolite; anthophyllite; asbestos; asbestos stability; chrysotile; chrysotile emissions; chrysotile mining; crocidolite; cummingtonite; dust levels; grunerite; SP506, pp. 49-70 (Nov. 1978).
- U.S.-U.S.S.R. program; 100 endurance test; electrode materials; materials characterization; MHD (magnetohydrodynamics); 17464.
- Utilities; conservation; integrated utilities; performance guidelines; residential utilities; total energy; NBSIR 78-1395.
- Utility systems; appliance combinations; energy conservation in dwellings; ERDA; heat recovery; hot water distribution systems; integrated appliances; 17540.
- UV; degradation; photodegradation; poly(methyl methacrylate); NBSIR 78-1463.

UV laser components; wavelength modulation spectroscopy; extrinsic uv absorption; laser calorimetry; laser windows; Urbach tail; *SP509*, pp. 127-131 (Dec. 1977).

UV photometry; air pollution; atmospheric monitoring; calibration, ozone; *17656*.

U-values; ASHRAE Standard; climatic conditions; energy conservation; glass area; heat transfer; insulation standards; *SP518*, pp. 205-218 (Aug. 1978).

UV-B spectral region; solar simulators; spectroradiometry of solar simulators; *17605*.

U-235; Cf-252; delayed neutrons; enriched uranium; neutron interrogation; nondestructive assay; *SP528*, pp. 41-48 (Nov. 1978).

V

Vacancy wind; alloys; atom flux; cadmium; chemical interdiffusion; experiments; interdiffusion coefficients; intrinsic diffusion coefficients; Kirkendall shift; Matano analysis; silver; single crystals; *18081*.

Vacuum; manometer; mercury; pressure; ultrasonic interferometer; *17717*.

Vacuum; vacuum weighing; buoyancy of air; density; mass comparisons in vacuo; precise weighing; *J. Res.* **83**, No. 5, 407-413 (1978).

Vacuum ultraviolet; electronic states; electronic structure; hydrogen halides; molecular spectra; *17807*.

Vacuum ultraviolet photolysis; argon metastables; CCl_2 ; $(\text{CCl}_2)\text{HF}$ anion; electron capture; HCClF anion; HCCl_2F ; hydrogen bonding; infrared spectrum; matrix isolation; ultraviolet spectrum; *17727*.

Vacuum ultraviolet photolysis; chemiionization; electron capture; excited argon atom reactions; exciton diffusion; HCClF_2 ; HCClF_2^- ; HCF_2^- ; infrared spectrum; matrix isolation; molecular structure; ultraviolet spectrum; *17726*.

Vacuum ultraviolet photolysis; CH_3SH ; CH_3S ; dimethyldisulfide; infrared spectrum; matrix isolation; pyrolysis; *s*-trithiane; thioformaldehyde; ultraviolet photolysis; *17725*.

Vacuum weighing; buoyancy of air; density; mass comparisons in vacuo; precise weighing; vacuum; *J. Res.* **83**, No. 5, 407-413 (1978).

Vacuum-ultraviolet photolysis; DNO; force constants; HNO ; infrared spectrum; matrix isolation; NOCl ; reaction of H with NO; *17556*.

Validation; accuracy; bias detection; chemical analysis; chemical measurement process; data reporting; detection limits; exploratory techniques; patterns; performance characteristics; precision; random error; standards; systematic error; testing of assumptions; *18152*.

Validation; COBOL; Federal ADP standards; programming languages; software testing; *17479*.

Value incentive clauses; ETIP; Federal Supply Service; innovation; life cycle costing; local government; procurement policy; state government; test methods; *17862*.

Value incentive clauses; Veterans Administration; ETIP; Federal Supply Service; innovation; life cycle costing; local government; performance specifications; procurement policy; state government; test methods; *17485*.

Van der Pauw structure; bridge structure; cross-bridge structure; cross structure; diffused layer; line width; process control; sheet resistance; sheet resistor; silicon; test pattern; test structure; *17800*.

Van der Pauw structure; cross structure; diffused layer; process control; sheet resistance; sheet resistor; silicon; test pattern; test structure; *17801*.

Van der Waals broadening; atomic; instrumental broadening; line shapes; line shifts; pressure broadening; resonance broadening; Stark broadening; *SP366. Supplement 3*.

Van Hove limit; collective modes; condensed state; correlation functions; harmonic oscillator; nitrogen-argon mixture; projection operator; Raman line shape; *18126*.

Vanadium; allowed transitions; chromium; *f*-values; isoelectronic sequence; line strengths; manganese; oscillator strengths; systematic trends; transition probabilities; *JPCRD* **7**, No. 2, 495-630 (1978).

Vanadium; atomic energy levels; atomic spectra; *JPCRD* **7**, No. 3, 1191-1262 (1978).

Vanadium; x-ray fluorescence spectrometry; arsenic; cadmium; detection limits; lead; mercury; *NBSIR 77-1211*.

Vanadium oxides; air pollution; chemical analysis; particles; Raman spectroscopy; sulfates; *18244*.

Vane anemometer; wind tunnel; airflow; anemometer; laser velocimeter; low velocity; performance; *NBSIR 78-1485*.

Vane anemometer; wind tunnel; airflow; anemometer; laser velocimeter; low velocity; mine ventilation; performance; *NBSIR 78-1524*.

Vapor association; enthalpy; entropy; gas oligomers; Gibbs energy; ion fragmentation; molybdenum pentafluoride; saturated vapor; thermodynamic properties; *17395*.

Vapor barriers; weatherization; weatherstripping; caulks and sealants; clock thermostats; energy conservation; insulation; replacement windows; retrofitting; storm doors; storm windows; *TN982*.

Vapor density; vapor pressure; melting point; molybdenum pentafluoride; static technique; transpiration; *17397*.

Vapor pressure; corrections to scaling; critical exponent; critical isochore; critical pressure; critical temperature; ethylene; scaling laws; *17989*.

Vapor pressure; heat of combustion; heat of explosion; miscellaneous materials; specific heat; *NBSIR 78-1479*.

Vapor pressure; melting point; molybdenum pentafluoride; static technique; transpiration; vapor density; *17397*.

Vapor pressures; coexistence boundary; critical point; equation of state; ethane; fluids; orthobaric densities; specific heats; *17458*.

Vapor pressures; equation of state; ethylene; internal energy; saturated vapor densities; thermodynamic properties; *J. Res.* **83**, No. 4, 325-327 (1978).

Vapor recovery; weights and measures; consumer affairs; education; electronic devices; enforcement; Grain Standards Act; International Organization of Legal Metrology; labeling insulation and polyethylene products; metrication; model laws and regulations; *SP517*.

Vaporizing; distribution patterns; drops (liquid); drop size; fire models; fire plumes; sensitivity analysis; spray; sprinkler heads; *NBS-GCR-78-121*.

Variable metric method; computer timings; curve fitting; estimation; gradient; Newton-Raphson; perturbation methods; quasi-Newton; simplex method; *SP503*, pp. 373-378 (Mar. 1978).

Variance; bias; bispectra; cubic spline; density function estimate; turbulence; *SP503*, pp. 184-188 (Mar. 1978).

Variations in CPU charges; varying workloads; accounting/computer charges; CPU time; elapsed time; metering; system performance; tuning programs; *SP500-41*, pp. 243-253 (Oct. 1978).

Varying workloads; accounting/computer charges; CPU time; elapsed time; metering; system performance; tuning programs; variations in CPU charges; *SP500-41*, pp. 243-253 (Oct. 1978).

Vectorized characters; alphabets; COM; computer graphics; computerized typesetting; digital plotting; plotting; type fonts; type setting; *SP500-32*.

Vehicle, emergency; vision, peripheral; warning signal; color; conspicuity; emergency vehicle; flashing light; lights; motor vehicle; photometry; signal light; standards; *SP480-16*.

Vehicle leasing; vehicle management; fleet management; life cycle costing; patrol cars; police fleets; *SP480-15*.

- Vehicle management; fleet management; life cycle costing; patrol cars; police fleets; vehicle leasing; *SP480-15*.
- Vehicle routing; probabilistic demands; *SP503*, pp. 252-259 (Mar. 1978).
- Vehicle service life; automobile durability; automobile testing; design analysis; electronic field data collection program; *SP514*, pp. 107-120 (May 1978).
- Vehicular electronic systems; biological hazard; electromagnetic compatibility; field strength measurements; mobile communication systems; *17356*.
- Velocity; corridor; heat transfer; room fire; scaling; temperature; *17582*.
- Velocity; cut; edge; force; injury; pig skin; plastic; *NBSIR 78-1493*.
- Velocity of sound; density; enthalpy; entropy; oxygen; properties of fluids; specific heat; *18255*.
- Venetian blinds; view; windows; window usage; energy conservation; office buildings; orientation; photographic method; season; *BSS112*.
- Ventilation; barrier analysis; fire severity; fire spread; fuel load; models; probabilistic analysis; room fires; systems analysis; *NBS-GCR-78-119*.
- Ventilation; computer program; flashover; furniture; ignition; room fires; thermodynamics; *NBS-GCR-77-110*.
- Ventilation; computer programs; fire plume; flashover; ignition; room fires; rooms; thermodynamics; *NBS-GCR-77-111*.
- Venting; performance testing; plumbing system design; reduced-size vents; trap-seal retention; *18084*.
- Venture capital; barriers; imperfections; policy; resource allocation; technology; *17377*.
- Verification; ADP security; computer networks; controlled accessibility; encryption; evaluation criteria; key; password; personal identification; terminals; *17565*.
- Verification; balancing; building code official; code requirements; energy conservation; performance specifications; testing; *SP518*, pp. 135-144 (Aug. 1978).
- Verification; dynamic conduction heat transfer; heat transfer; thermal response factor; *NBSIR 77-1405*.
- Verified spectra; analytical data; mass spectra; organic substances; *NSRDS-NBS63, Volumes 1-4 and 1978 Index*.
- Versions; dated software; diagnostics; distribution; installation parameters; load modules; maintenance; portability; *SP503*, pp. 215-220 (Mar. 1978).
- Vertical acceleration; design; horizontal acceleration; seismic coefficients; stability; strong-motion accelerogram; structures; *SP523*, pp. IV-1—IV-19 (Sept. 1978).
- Vertical distribution of seismic wave; deep borehole; earthquake, in-situ velocity measurement; S-wave; *SP523*, pp. III-44—III-54 (Sept. 1978).
- Vertical separation; altimetry; altitude; aviation; height measurement; measurement units; metric; standardization; *NBSIR 77-1386*.
- Very low-power cryocooler; interfering signal; Nb SQUID; self-generated interference spectrum; SQUID; *SP508*, pp. 59-65 (Apr. 1978).
- Very-low-pressure pyrolysis; 2,3-dimethyl-butane; alkane; bond cleavage; butane; decomposition; ethyl; heats of formation; hexamethylethane; isopropyl; pre-exponential factor; radical buffer; radical combination; rate expressions; shock tube; tert-butyl; *18110*.
- Veterans Administration; ETIP; Federal Supply Service; innovation; life cycle costing; local government; performance specifications; procurement policy; state government; test methods; value incentive clauses; *17485*.
- Vibration experiments; dynamic water pressure; shaking table; underground pipes; *SP523*, pp. V-53—V-68 (Sept. 1978).
- Vibration isolation; helium dewar; JT loop, regenerative cryocooler; temperature control; three stages; two stages; *SP508*, pp. 45-57 (Apr. 1978).
- Vibration measurements; ac/dc difference; ac voltage calibrator; infrasonic voltage measurements; rms measurements; rms voltmeter; *18216*.
- Vibration spectrum; closed cycle refrigerator; cryogenic refrigerator; magnetic signature; *SP508*, pp. 123-129 (Apr. 1978).
- Vibrational band centers; CH₃-d_n; infrared spectrum; matrix isolation; molecular structure; quartic anharmonicity; rotational energy levels; *17723*.
- Vibrational data; force field refinement; lattice dynamics; *n*-alkanes; nonbonded potential functions; polyethylene; *JPCRD 7*, No. 4, 1309-1322 (1978).
- Vibrational excitation; chemical kinetics; chemical laser; chemiluminescence; energy partitioning; energy transfer; *17488*.
- Vibrational frequencies; force constants; fundamental frequencies; infrared spectra; normal vibrations; polyatomic molecules; Raman spectra; *JPCRD 7*, No. 4, 1323-1444 (1978).
- Vibrational partitioning; chain mechanism; infrared chemiluminescence; laser photolysis; reaction dynamics; *18212*.
- Vibrational relaxation; energy transfer; hydrogen halides; isotopes; TEA laser; *18002*.
- Vibrational spectrum; airborne particles; atmospheric pollution; microprobe analysis; molecular composition; Raman spectroscopy; *17668*.
- Vibrational states; cyanoacetylene; interstellar molecules; millimeter wave; orion; radio astronomy; *17643*.
- Vibrations; mechanical integrity; nondestructive evaluation; normal modes; orthopedic implants; piezoelectric polymer; plastics; *17596*.
- Vibrations; natural frequencies; prolate coordinates; shells; transverse shear; *17934*.
- Vibrator; harmonic wave; Love waves; model structure; Rayleigh waves; soil-structure interaction; *SP523*, pp. IV-96—IV-114 (Sept. 1978).
- Vibronic coupling; deep level studies; ion implantation; isothermal transient capacitance method; isotope shift; thermally stimulated capacitance measurement; *17966*.
- Video tape; archival storage; electron beam recording; kinescope recording; laser scanning; magnetic tape; midfield splice; motion picture film; rapid pulldown; *SP480-31*.
- View; windows; window usage; energy conservation; office buildings; orientation; photographic method; season; venetian blinds; *BSS112*.
- Vinyl chloride; desorption; diffusion constants; Henry's law constants; poly(vinyl chloride); sorption; *17371*.
- Vinyl title; water-thinned polyurethane system; field demonstration; high traffic areas; laboratory findings; maintenance engineers; service conditions; solvent-thinned polyurethane system; *NBSIR 77-1399*.
- Vinyl wallcoverings; wallcovering materials; washability; abrasion; Federal Specification CCC-W-408A; fungus resistance; stain resistance; surface roughness; *TN984*.
- Vinylidene chloride polymer; chloranil; free radicals; mechanochemistry; *18223*.
- Vinylidene-fluoride-tetrafluoroethylene copolymer; aligned dipoles; piezoelectricity; polarization; polyvinylchloride; polyvinylidene fluoride; pyroelectricity; transducers; *17511*.
- Violations; building official; building regulations; code enforcement; construction; court decisions; disasters; economics; legal approach; regulatory process; *SP518*, pp. 381-390 (Aug. 1978).
- Viral coefficients; volumetric data; helium; helium-krypton mixture; interaction second virial coefficients; krypton; *18232*.
- Virtual photons; ⁶He; ⁶Li; electroproduction; nuclear structure; pions; *17627*.

- Viscoplasticity; creep-fatigue interaction; dissipation; energy approach; fatigue; hysteresis loop; irreversible thermodynamics; low-cycle fatigue; mathematical modeling; multi-axial fatigue; polymethyl-methacrylate; stainless steel; 17424.
- Viscosity; compressed gas; compressed liquid; experimental; oxygen; saturated liquid; saturated vapor; tables; torsional crystal viscometer; 17901.
- Viscosity; critically evaluated data; critical review; data compilation; liquid water; *JPCRD* 7, No. 3, 941-948 (1978).
- Viscosity; diamond cell; glass transition; high pressure; hydrostaticity; liquids; 18085.
- Viscous flow; Weber's equation; boundary-value problem; eigenvalues; parabolic cylinder functions; resonance; rotating disks; singular perturbations; turning-point; 17816.
- Visible spectrum; wedged film; arsenic trisulfide; optical constants; *SP509*, pp. 352-357 (Dec. 1977).
- Vision; brightness; human observers; luminance; photometry; spectroradiometry; 18220.
- Vision; illumination; illumination levels; lighting; task lighting; 18230.
- Vision, peripheral; warning signal; color; conspicuity; emergency vehicle; flashing light; lights; motor vehicle; photometry; signal light; standards; vehicle, emergency; *SP480-16*.
- Visual; wear debris; acoustic emission; eddy currents; magnetic particles; microwaves; nondestructive testing; penetrants; radiography; standards; thermal; ultrasonics; 17933.
- Visual classifications; accident investigation; fluting pattern; forensic science; headlight glass; hit-and-run accidents; sealed beam headlights; *SP480-17*.
- Visual defect inspection; alignment tolerance; automated photomask inspection; dimensional inspection; flying-spot scanner; microdensitometer; optical overlay; photomask; spatial filtering; TV-microscope; *SP400-46*.
- Visual images; charge storage; electron beams; insulators; ion beams; phosphors; surface conductivity; surfaces; 17522.
- Visual images; electron beams; insulators; ion beams; phosphors; surfaces; 17707.
- VLSI; cooperative technology; electronics; foreign competition; integrated circuits; semiconductor technology; *NBSIR* 78-1482.

X

X ray; accountability; analysis; gamma-ray; neutron; nuclear safeguards; special nuclear materials; *SP528*.

X ray; Apollo; data analysis; gamma-ray; lunar; unfolding; 17948.

X rays; americium; detection limits; gamma rays; germanium detector; in-situ analysis; plutonium; *SP528*, pp. 201-206 (Nov. 1978).

X rays; angle interferometers; crystal lattice spacing; gamma rays; muonic x rays; standard wavelengths; 17448.

X rays; bicyclononane system; diffraction; direct-methods; explosives; single-crystal; 17699.

X rays; multiple vacancy processes; synchrotron radiation; 17951.

Xenon; discharge; sodium; 18124.

Xenon; excimer; mercury; 17961.

Xenon-ion laser; dye laser; 17998.

X-radiation of intensifier screens; fluorescent screens; intensifier screen standards; radiographic intensifier screen efficiency; screen evaluations; sensitivity of screens; spectro-radiometry of screens; 17577.

X-ray analysis; adobe; clay; particle size distribution; soluble salt analysis; weathering; *NBSIR 78-1495*.

X-ray analysis; electron microscope; particle analysis; wear; wear debris; 17466.

X-ray calibration; brachytherapy sources; calibration; dissemination; gamma-ray calibration; measurement assurance; medical dosimetry; radiation dosimetry; radiation standards; 18199.

X-ray continuum; x-ray spectrum; computer program; energy dispersive detector; multichannel analyzer; peak overlap; quantitative electron probe microanalysis; 17830.

X-ray crystallography; low-dimensional materials; mercury; Raman spectroscopy; tetrathiafulvalene; 17562.

X-ray detector calibration; 1.5-8 keV x rays; absolute x-ray detector; electron excitations; monoenergetic x rays; pulsed x-ray source; 17771.

X-ray diffraction; amphibole asbestos; cummingtonite; grunerite; thermal analysis; tremolite; *SP506*, pp. 295-312 (Nov. 1978).

X-ray diffraction; amphiboles; asbestos; chlorite; electron microscopy; fiber; morphology; optical microscopy; talc; *SP506*, pp. 339-352 (Nov. 1978).

X-ray diffraction; analysis of radioactive materials; handling radioactive materials; transporting radioactive samples; *SP528*, pp. 121-124 (Nov. 1978).

X-ray diffraction; asbestiform; asbestos; chrysotile; detection; fiber; identification; light microscopy; selected area electron diffraction; talc; transmission electron microscopy; tremolite; *SP506*, pp. 325-337 (Nov. 1978).

X-ray diffraction; crystal chemistry; ion exchange; polymorphism; potassium aluminum silicate; rubidium aluminum silicate; 18027.

X-ray diffraction; crystal structure; integrated intensities; lattice constants; peak intensities; powder patterns; reference intensities; standard; *Monogr. 25, Section 15*.

X-ray diffraction; diffraction geometry; diffractometer; flat cone; neutron diffraction; position sensitive detector; 18251.

X-ray diffraction; 2,3,7,8-tetrachlorodibenzofuran; inducer of enzymes; industrial contaminant; single crystal; toxic material; 18195.

X-ray diffraction techniques; x-ray emission; actinide; alpha energy analysis; *SP528*, pp. 112-120 (Nov. 1978).

X-ray dynamical diffraction; anomalous transmission; asymmetric crystal topography; crystal growth; crystal perfection; Czochralski growth; dislocation density; magnetic domains; 17732.

X-ray emission; actinide; alpha energy analysis; x-ray diffraction techniques; *SP528*, pp. 112-120 (Nov. 1978).

X-ray emission; $\text{Cu K}\alpha_{1,2}$; double vacancy states; Hartree-Fock calculation; monolithic double crystal spectrometer; relative strengths; 17665.

X-ray emission; flare stars; helium; 18312.

X-ray emission spectrum; direct electron bombardment; $L\gamma$ valence-band spectrum; tellurium metal; 18099.

X-ray emission; iodine; $L\gamma_{2,3}$ spectra; tellurium; tin; 17683.

X-ray energy analysis; amphibole; analysis; asbestos; electron diffraction; electron microscopy; fibers; transmission electron microscopy; *SP506*, pp. 271-280 (Nov. 1978).

X-ray equipment; radiation safety; *H111, Revised*.

X-ray exposure; x-ray lithography; radiation damage; semiconductor devices; silicon-on-sapphire; silicon-sapphire interface; 17955.

X-ray fluorescence; activation analysis; characterization; chemical composition; chromatographic analysis; coulometry; electron probe microanalysis; ion-selective electrodes; mass spec-

- trometry; polarography; spectrochemical analysis; thermal analysis; wet chemistry; 17595.
- X-ray fluorescence; data analysis; housing; lead paint; lead poisoning; survey; 18265.
- X-ray fluorescence; fusion; gas-burner; lithium tetraborate; spectrometry; 18100.
- X-ray fluorescence analysis; actinides; freeze dried; gravimetric standards; high accuracy; particle size effects; radioactive samples; SP528, pp. 149-155 (Nov. 1978).
- X-ray fluorescence analysis; atmospheric pollutants; counting statistics; detection limits; energy vs. wavelength dispersion; imprecision; merit; quantitation limits; reporting of data; systematic error; 17507.
- X-ray fluorescence analysis; non-linear least squares; two-dimensional calibration; uranium; SP528, pp. 156-160 (Nov. 1978).
- X-ray fluorescence analysis; x-ray liquid and slurry sample cell; x-ray monochromator; analysis of solutions and slurries; high-precision, wavelength dispersive x-ray spectrometer; nuclear safeguards; rotating target x-ray tube; SP528, pp. 125-132 (Nov. 1978).
- X-ray fluorescence spectrometry; arsenic; cadmium; detection limits; lead; mercury; vanadium; NBSIR 77-1211.
- X-ray fluorescence spectrometry; baseline estimation; counting statistics; gamma-ray spectrometry; Lagrange multiplier; numerical analysis; spectrum analysis; 17509.
- X-ray fluorescent; accuracy; calibration; evaluation; lead; paint; poisoning; portable; precision; radiation; references; substrates; NBSIR 78-1466.
- X-ray fluorescent; accuracy; calibration; evaluation; lead; paint; poisoning; portable; precision; radiation; references; substrates; 17996.
- X-ray grids; anti-scatter grids; contrast improvement; experimental method; exposure reduction; grid performance; radiography; 17648.

²³⁸U(n,f); ²³⁹U(n,f); ²⁵²Cf; absolute; fission cross section; integral fission measurement; spontaneous fission spectrum; ²³⁵U(n,f); *17809*.

- ²³⁸U(n,f); ²⁵²Cf; absolute; fission cross section; integral fission measurement; spontaneous fission spectrum; ²³⁵U(n,f); ²³⁸U(n,f); 17809.
- 2,4-dioxypyrimidine; 2,4(1H, 3H)-pyrimidinedione; calorimetry; density, enthalpy of solution, entropy of solution; nucleic acid bases; thermochemistry; uracil; *J. Res.* **83**, No. 6, 547-554 (1978).
- 2,4(1H, 3H)-pyrimidinedione; calorimetry; density, enthalpy of solution, entropy of solution; nucleic acid bases; thermochemistry; uracil; 2,4-dioxypyrimidine; *J. Res.* **83**, No. 6, 547-554 (1978).
- ²⁵²Cf; absolute; fission cross section; integral fission measurement; spontaneous fission spectrum; ²³⁵U(n,f); ²³⁸U(n,f); ²³⁸U(n,f); 17809.
- 298.15 K; Burnett method; low pressures; PVT; ultra-pure air; *J. Res.* **83**, No. 5, 415-418 (1978).
- ³H; ³²P; accuracy; blank; Cerenkov counting; figure of merit; liquid scintillation counting; Poisson errors; precision; quenching; random error; reduced activity; systematic error; 17510.
- ³He(e,e'), E = 28.8-95.0 MeV; deduced rms charge radius; measured $\sigma(E)$ at $\theta = 75^\circ$; nuclear reactions; 17623.
- 3-photon Bloch equations; ac Stark shift; adiabatic approximation; dissociation; harmonic generation; ionization; laser bandwidth; multiphoton absorption; multiphoton dynamics; nonresonant processes; n-photon Bloch equations; pole approximation; 17750.
- 3-terminal; dielectric measurements; electrical measurements; electrical properties of materials; precise measurements; 2-terminal; 17890.
- 310 stainless steel; electron channelling; erosive wear; scanning electron microscopy; solid particle impact; transmission electron microscopy; 17467.
- ³²P; accuracy; blank; Cerenkov counting; figure of merit; liquid scintillation counting; Poisson errors; precision; quenching; random error; reduced activity; systematic error; ³H; 17510.
- ^{36,40}Ar deduced levels J, π , Γ ; enriched ³⁶Ar target; measured $\sigma(E, \theta)$; 17523.
- 4-amino-2(1H)-pyrimidinone; calorimetry; cytosine; density, enthalpy of solution, entropy of solution; nucleic acid bases; thermochemistry; *J. Res.* **83**, No. 6, 539-546 (1978).
- (CCl₂)HF anion; electron capture; HCCIF anion; HCCl₂F; hydrogen bonding; infrared spectrum; matrix isolation; ultraviolet spectrum; vacuum ultraviolet photolysis; argon metastables; CCl₂; 17727.
- 4-methylheptyne; 4-methylhexyne-1; 5-methylhexyne-1; acetylenic; decomposition; heat of formation; hexyne-1; methyl propargyl; propargyl; resonance energy; shock tube; thermal properties; 18112.
- 4-methylhexyne-1; 5-methylhexyne-1; acetylenic; decomposition; heat of formation; hexyne-1; methyl propargyl; propargyl; resonance energy; shock tube; thermal properties; 4-methylheptyne; 18112.
- 4-plot analysis; assumptions; data analysis; distribution analysis; graphical analysis; in control; measurement process; predictability; probability plots; randomness; statistics; testing assumptions; 17935.
- (V-A)-currents; GIM model; neutrinos; partons; quarks; reconciliation; scattering; 17496.
- 5-methylhexyne-1; acetylenic; decomposition; heat of formation; hexyne-1; methyl propargyl; propargyl; resonance energy; shock tube; thermal properties; 4-methylheptyne; 4-methylhexyne-1; 18112.
- 5-methyl-uracil; 5-methyl-2,4 (1H, 3H)-pyrimidinedione; calorimetry; density; enthalpy of solution; nucleic acid bases; thermochemistry; thymine; *J. Res.* **83**, No. 6, 529-537 (1978).
- 5-methyl-2,4 (1H, 3H)-pyrimidinedione; calorimetry; density; enthalpy of solution; nucleic acid bases; thermochemistry; thymine; 5-methyl-uracil; *J. Res.* **83**, No. 6, 529-537 (1978).
- 50 K-473 K; accuracy; nuclear quadrupole resonance; precision; thermometry; 17776.
- ⁵⁵Fe, ⁸⁵Sr, ¹⁰⁹Cd, ¹²⁵I; defined solid angle spectrometer; standardization; 17785.
- 6-amino purine; adenine; calorimetry; density, enthalpy of solution, entropy of formation; nucleic acid bases; thermochemistry; *J. Res.* **83**, No. 4, 347-370 (1978).
- ⁶He; ⁶Li; electroproduction; nuclear structure; pions; virtual photons; 17627.
- ⁶Li; electroproduction; nuclear structure; pions; virtual photons; ⁶He; 17627.
- ⁶Li(n, α)T; flux measurement; H(n,p); neutrons; standards; time-of-flight; 18225.
- 6-port junction; automated measurements; bolometer unit calibration; broadband measurement; microwave power measurement; precision microwave measurements; 18067.
- ⁶⁰Co; absorbed dose; calorimeters; comparison; national standards; 18233.
- 8th Annual Conference; ASHRAE 90-P; building codes; mobile homes; National Conference of States on Building Codes and Standards; NCSBCS; proceedings; NBSIR 77-1413.1

APPENDIX A. LIST OF DEPOSITORY LIBRARIES IN THE UNITED STATES

ALABAMA

- Alexander City: Alexander City State Junior College, Thomas D. Russell Library (1967).
- Auburn: Auburn University, Ralph Brown Draughon Library (1907).
- Birmingham:
- Birmingham Public Library (1895).
 - Birmingham-Southern College Library (1932).
 - Jefferson State Junior College, James B. Allen Library (1970).
 - Samford University, Harwell G. Davis Library (1884).
- Enterprise: Enterprise State Junior College, Learning Resource Center (1967).
- Florence: University of North Alabama, Collier Library (1932).
- Gadsden: Gadsden Public Library (1963).
- Huntsville: University of Alabama, Huntsville Campus Library (1964).
- Jacksonville: Jacksonville State University, Ramona Wood Library (1929).
- Maxwell A.F. Base: Air University Library (1963).
- Mobile:
- Mobile Public Library (1963).
 - Spring Hill College, Thomas Byrne Memorial Library (1937).
 - University of South Alabama Library (1968).
- Montgomery:
- Alabama State Department of Archives and History Library (1884).
 - Alabama Supreme Court and State Law Library (1884).
 - Auburn University at Montgomery Library (1971)-REGIONAL.
- Normal: Alabama Agricultural and Mechanical College, Drake Memorial Library (1963).
- St. Bernard: St. Bernard College, Herman J. Heidrich Library (1962).
- Troy: Troy State University, Lurleen B. Wallace Educational Resources Center (1963).
- Tuskegee Institute: Tuskegee Institute, Hollis Burke Frissell Library (1907).
- University:
- University of Alabama, School of Law Library (1967).
 - University of Alabama Library (1860)-REGIONAL

ALASKA

- Anchorage:
- Supreme Court of Alaska Library (1973).
 - University of Alaska, Anchorage Library (1961).
- College: University of Alaska, Elmer E. Rasmuson Library (1922).
- Juneau: Alaska State Library (1964).
- Ketchikan: Ketchikan Community College Library (1970).

ARIZONA

- Coolidge: Central Arizona College, Instructional Materials Center (1973).
- Flagstaff: Northern Arizona University Library (1937).

Phoenix:

- Department of Library and Archives (unknown)-REGIONAL.
 - AL.
 - Grand Canyon College, Fleming Library.
 - Phoenix Public Library (1917).
- Prescott: Yavapai College Library (1976).
- Tempe:
- Arizona State University, Matthews Library (1944).
 - Arizona State University, College of Law Library (1977).
- Thatcher: Eastern Arizona Junior College Library (1963).
- Tucson:
- Tucson Public Library (1970).
 - University of Arizona Library (1907)-REGIONAL.
- Yuma: Yuma City-County Library (1963).

ARKANSAS

- Arkadelphia: Ouachita Baptist University, Riley Library (1963).
- Batesville: Arkansas College Library (1963).
- Clarksville: College of the Ozarks Library (1925).
- Conway: Hendrix College, O. C. Bailey Library (1903).
- Fayetteville: University of Arkansas Library (1907).
- Little Rock:
- Arkansas Supreme Court Library (1962).
 - Little Rock Public Library (1953).
 - University of Arkansas at Little Rock Library (1973).
- Magnolia: Southern Arkansas University, Mogale Library (1956).
- Monticello: University of Arkansas at Monticello Library (1956).
- Pine Bluff: University of Arkansas at Pine Bluff, Watson Memorial Library (1976).
- Russellville: Arkansas Tech University, Tomlinson Library (1925).
- Searcy: Harding College, Beaumont Memorial Library (1963).
- State College: Arkansas State University, Dean B. Ellis Library (1913).
- Walnut Ridge: Southern Baptist College, Felix Goodson Library (1967).

CALIFORNIA

- Anaheim: Anaheim Public Library (1963).
- Arcadia: Arcadia Public Library (1975).
- Arcata: Humboldt State College Library (1963).
- Bakersfield:
- California State College, Bakersfield Library (1974).
 - Kern County Library System (1943).
- Berkeley:
- University of California, General Library (1907).
 - University of California, Law Library, Earl Warren Legal Center (1963).
- Carson:
- California State University, Dominguez Hills, Educational Resources Center (1973).
 - Carson Regional Library (1973).
- Chico: Chico State University Library (1962).
- Claremont: Pomona College Documents Collection, Honnold Library (1913).
- Coalingo: West Hills Community College (1978).

Compton: Compton Library (1972).
 Culver City: Culver City Library (1966).
 Davis:
 University of California at Davis Library (1953).
 University of California at Davis, School of Law Library (1972).
 Downey: Downey City Library (1963).
 Fresno:
 California State University Library (1962).
 Fresno County Free Library (1920).
 Fullerton: California State University, Fullerton Library (1963).
 Garden Grove: Garden Grove Regional Library (1963).
 Gardena: Gardena Public Library (1966).
 Hayward: California State College at Hayward Library (1963).
 Huntington Park: Huntington Park Library, San Antonio Region (1970).
 Inglewood: Inglewood Public Library (1963).
 Irvine: University of California at Irvine Library (1963).
 La Jolla: University of California, San Diego, University Library (1963).
 Lakewood: Angelo Iacoboni Public Library (1970).
 Lancaster: Lancaster Regional Library (1967).
 Long Beach:
 California State University at Long Beach Library (1962).
 Long Beach Public Library (1933).
 Los Angeles:
 California State College at Los Angeles, John F. Kennedy Memorial Library (1956).
 Los Angeles County Law Library (1963).
 Los Angeles Public Library (1891).
 Loyola University of Los Angeles Library (1933).
 Occidental College, Mary Norton Clapp Library (1941).
 Pepperdine University Library (1963).
 Southwestern University, School of Law Library (1975).
 University of California at Los Angeles Library (1932).
 University of California at Los Angeles, Law Library (1958).
 University of Southern California Library (1933).
 Menlo Park: Department of the Interior, Geological Survey Library (1962).
 Montebello: Montebello Library (1966).
 Monterey: Naval Postgraduate School Library (1963).
 Monterey Park: Bruggemeyer Memorial Library (1964).
 Northridge: California State University at Northridge, Delmar T. Oviatt Library (1958).
 Norwalk: Los Cerritos Regional Library (1973).
 Oakland:
 Mills College Library (1966).
 Oakland Public Library (1923).
 Ontario: Ontario City Library (1974).
 Pasadena:
 California Institute of Technology, Robert A. Millikan Memorial Library (1933).
 Pasadena Public Library (1963).
 Pleasant Hill: Contra Costa County Library (1964).
 Redding: Shasta County Library (1956).
 Redlands: University of Redlands, Armacost Library (1933).
 Redwood City: Redwood City Public Library (1966).
 Reseda: West Valley Regional Branch Library (1966).
 Richmond: Richmond Public Library (1943).
 Riverside:
 Riverside Public Library (1947).
 University of California at Riverside Library (1963).
 Sacramento:
 California State Library (1895)-REGIONAL.
 Sacramento City-County Library (1880).
 Sacramento County Law Library (1963).
 Sacramento State University Library (1963).
 San Bernardino: San Bernardino County Free Library (1964).

San Diego:
 San Diego State University, Love Library (1962).
 San Diego County Law Library (1973).
 San Diego County Library (1966).
 San Diego Public Library (1895).
 University of San Diego Law Library (1967).
 San Francisco:
 Mechanics' Institute Library (1889).
 San Francisco Public Library (1889).
 San Francisco State College, Social Science and Business Library (1955).
 Supreme Court of California Library (1972).
 U.S. Court of Appeals for Ninth Circuit Library (1971).
 University of San Francisco, Richard A. Gleeson Library (1963).
 San Jose: San Jose State College Library (1962).
 San Leandro: San Leandro Community Library Center (1961).
 San Luis Obispo: California State Polytechnic University Library (1969).
 San Rafael: Marin County Free Library (1975).
 Santa Ana:
 Orange County Law Library (1975).
 Santa Ana Public Library (1959).
 Santa Barbara: University of California at Santa Barbara Library (1960).
 Santa Clara: University of Santa Clara, Orradre Library (1963).
 Santa Cruz: University of California at Santa Cruz Library (1963).
 Santa Rosa: Santa Rosa-Sonoma County Public Library (1896).
 Stanford: Stanford University Libraries (1895).
 Stockton: Public Library of Stockton and San Joaquin County (1884).
 Thousand Oaks: California Lutheran College Library (1964).
 Torrance: Torrance Civic Center Library (1969).
 Turlock: Stanislaus State College Library (1964).
 Valencia: Valencia Library (1972).
 Ventura: Ventura County Library Services Agency (1975).
 Visalia: Tulare County Free Library (1967).
 Walnut: Mount San Antonio College Library (1966).
 West Covina: West Covina Library (1966).
 Whittier: Whittier College, Wardman Library (1963).

CANAL ZONE

Balboa Heights: Canal Zone Library-Museum (1963).

COLORADO

Alamosa: Adams State College, Learning Resources Center (1963).
 Boulder: University of Colorado Libraries (1879)-REGIONAL.
 Colorado Springs:
 Colorado College, Charles Leaming Tutt Library (1880).
 University of Colorado, Colorado Springs Library (1974).
 Denver:
 Auraria Libraries (1978).
 Colorado State Library (unknown).
 Denver Public Library (1884)-REGIONAL.
 Department of Interior, Bureau of Reclamation Library (1962).
 Regis College, Dayton Memorial Library (1915).
 Supreme Court Library (1978).
 University of Denver, Penrose Library (1909).
 U.S. Court of Appeals for Tenth Circuit Library (1973).
 Fort Collins: Colorado State University Library (1907).
 Golden: Colorado School of Mines, Arthur Lakes Library (1939).

Grand Junction: Mesa County Public Library (1975).
 Greeley: University of Northern Colorado Library (1966).
 Gunnison: Western State College, Leslie J. Savage Library (1932).
 La Junta: Otero Junior College, Wheeler Library (1963).
 Lakewood: Jefferson County Public Library, Lakewood Regional Library (1968).
 Pueblo:
 Pueblo Regional Library (1893).
 University Southern Colorado Library, Learning Resources Center (1965).
 U.S. Air Force Academy: Academy Library (1956).

CONNECTICUT

Bridgeport: Bridgeport Public Library (1884).
 Danbury: Western Connecticut State College, Ruth A. Haas Library (1967).
 Danielson: Quinebaug Valley Community College (1975).
 Enfield: Enfield Public Library (1967).
 Hartford:
 Connecticut State Library (unknown)-REGIONAL.
 Hartford Public Library (1945).
 Trinity College Library (1895).
 Middletown: Wesleyan University Library (1906).
 Mystic: Marine Historical Association, Inc., G. W. Blunt White Library (1964).
 New Britain: Central Connecticut State College, Elihu Burritt Library (1973).
 New Haven:
 Southern Connecticut State College Library (1968).
 Yale University Library (1859).
 New London:
 Connecticut College Library (1926).
 U.S. Coast Guard Academy Library (1939).
 Stamford: Stamford Public Library (1973).
 Storrs: University of Connecticut, Wilbur Cross Library (1907).
 Waterbury:
 Post College, Traurig Library (1977).
 Silas Bronson Library (1869).
 West Haven: University of New Haven Library (1971).

DELAWARE

Dover:
 Delaware State College, William C. Jason Library (1962).
 State Department of Community Affairs and Economic Development, Division of Libraries (1972).
 State Law Library in Kent County (unknown).
 Georgetown:
 Delaware Technical and Community College, Southern Branch Library (1968).
 Sussex County Law Library (1976).
 Newark: University of Delaware, Morris Library (1907).
 Wilmington:
 Delaware Law School Library (1976).
 New Castle County Law Library (1974).
 Wilmington Institute and New Castle County Library (1861).

DISTRICT OF COLUMBIA

Washington:
 Administrative Conference of U.S. Library (1977).
 Advisory Commission on Intergovernmental Relations Library (1972).
 Civil Aeronautics Board Library (1975).
 Civil Service Commission Library (1963).
 Department of Commerce Library (1955).

Department of Health, Education, and Welfare Library (1954).
 Department of Housing and Urban Development Library (1969).
 Department of the Interior Central Library (1895).
 Department of Justice Main Library (1895).
 Department of Labor Library (1976).
 Department of State Library (1895).
 Department of State, Office of Legal Advisor, Law Library (1966).
 Department of Transportation, National Highway Traffic Safety Administration Library (1968).
 District of Columbia Public Library (1943).
 Federal City College Library (1970).
 Federal Deposit Insurance Corporation Library (1972).
 Federal Election Commission Library (1975).
 Federal Reserve System Law Library (1976).
 General Accounting Office Library (1975).
 General Services Administration Library (1975).
 Georgetown University Library (1969).
 Indian Claims Commission Library (1968).
 Library of Congress, Gift and Exchange Division (1977).
 National Defense University Library (1895).
 Navy Department Library (1895).
 Navy Department, Office of Judge Advocate General Library (1963).
 Office of Management and Budget Library (1965).
 Office of The Adjutant General, Department of Army Library (1969).
 Postal Service Library (1895).
 Research Library, Board of Governors of the Federal Reserve System (1978).
 Treasury Department Library (1895).
 U.S. Court of Appeals, Judge's Library (1975).
 U.S. Supreme Court Library (1978).
 Veterans' Administration, Central Office Library (1976).

FLORIDA

Boca Raton: Florida Atlantic University Library (1963).
 Clearwater: Clearwater Public Library (1972).
 Coral Gables: University of Miami Library (1939).
 Crestview: Robert F. L. Sikes Public Library (1978).
 Daytona Beach: Volusia County Public Libraries (1963).
 DeLand: Stetson University, duPont-Ball Library (1887).
 Fort Lauderdale:
 Broward County Library System (1967).
 Nova University Law Library (1967).
 Fort Pierce: Indian River Community College Library (1975).
 Gainesville: University of Florida Libraries (1907)-REGIONAL.
 Jacksonville:
 Haydon Burns Library (1914).
 Jacksonville University, Swisher Library (1962).
 University of North Florida Library (1972).
 Lakeland: Lakeland Public Library (1928).
 Leesburg: Lake-Sumter Community College Library (1963).
 Melbourne: Florida Institute of Technology Library (1963).
 Miami:
 Florida International University Library (1970).
 Miami Public Library (1952).
 North Miami: Florida International University, North Miami Campus Library (1977).
 Opa Locka: Biscayne College Library (1966).
 Orlando: Florida Technological University Library (1966).
 Palatka: St. Johns River Junior College Library (1963).
 Pensacola: University of West Florida, John C. Pace Library (1966).
 Port Charlotte: Charlotte County Library System (1973).

St. Petersburg:
St. Petersburg Public Library (1965).
Stetson University College Law Library (1975).

Sarasota: Selby Public Library (1970).

Tallahassee:

Florida Agricultural and Mechanical University, Coleman Memorial Library (1936).

Florida State University, R. M. Stozier Library (1941). (1941).

Florida Supreme Court Library (1974).

State Library of Florida (1929).

Tampa:

Tampa Public Library (1965).

University of South Florida Library (1962).

University of Tampa, Merle Kelce Library (1953).

Winter Park: Rollins College, Mills Memorial Library (1909).

GEORGIA

Albany: Albany Public Library (1964).

Americus: Georgia Southwestern College, James Earl Carter Library (1966).

Athens: University of Georgia Libraries (1907)-REGIONAL.

Atlanta:

Atlanta Public Library (1880).

Atlanta University, Trevor Arnett Library (1962).

Emory University, Robert W. Woodruff Library (1928).

Emory University, School of Law Library (1968).

Georgia Institute of Technology, Price Gilbert Memorial Library (1963).

Georgia State Library (unknown).

Georgia State University Library (1970).

Augusta: Augusta College Library (1962).

Brunswick: Brunswick-Glyn County Regional Library (1965).

Carrollton: West Georgia College, Sanford Library (1962).

Columbus: Columbus College, Simon Schwob Memorial Library (1975).

Dahlonega: North Georgia College Library (1939).

Dalton: Dalton Junior College Library (1978).

Decatur: Dekalb Community College-South Campus, Learning Resources Center (1973).

Macon: Mercer University Library (1964).

Marietta: Kennesaw Junior College Library (1968).

Milledgeville: Georgia College at Milledgeville, Ina Dillard Russell Library (1950).

Mount Berry: Berry College, Memorial Library (1970).

Savannah: Savannah Public and Chatham-Effingham Liberty Regional Library (1857).

Statesboro: Georgia Southern College Library (1939).

Valdosta: Valdosta State College, Richard Holmes Powell Library (1956).

GUAM

Agana: Nieves M. Flores Memorial Library (1962).

HAWAII

Hilo: University of Hawaii, Hilo Campus Library (1962).

Honolulu:

Hawaii Medical Library, Inc. (1968).

Hawaii State Library (1929).

Municipal Reference Library of the City and County of Honolulu (1965).

Supreme Court Law Library (1973).

University of Hawaii Library (1907)-REGIONAL.

Lae: Church College of Hawaii, Woolley Library (1964).

Lihue: Kauai Public Library (1967).

Pearl City: Leeward Community College Library (1967).

Wailuku: Maui Public Library (1962).

IDAHO

Boise:

Boise State University Library (1966).

Boise Public Library and Information Center (1929).

Idaho State Law Library (unknown).

Idaho State Library (1971).

Caldwell: College of Idaho, Terteling Library (1930).

Moscow: University of Idaho Library (1907)-REGIONAL.

Pocatello: Idaho State University Library (1908).

Rexburg: Ricks College, David O. McKay Library (1946).

Twin Falls: College of Southern Idaho Library (1970).

ILLINOIS

Bloomington: Illinois Wesleyan University Libraries (1964).

Carbondale: Southern Illinois University Library (1932).

Carlinville: Blackburn College Library (1954).

Cartersville: Shawnee Library System (1971).

Champaign: University of Illinois Law Library, College of Law (1965).

Charleston: Eastern Illinois University, Booth Library (1962).

Chicago:

Chicago Public Library (1876).

Chicago State University Library (1954).

DePaul University, Lincoln Park Campus Library (1975).

Field Museum of Natural History Library (1963).

John Crerar Library (1909).

Loyola University of Chicago, E. M. Cudahy Memorial Library (1966).

Northeastern Illinois University Library (1961).

University of Chicago Law Library (1964).

University of Chicago Library (1897).

University of Illinois, Chicago Circle Campus Library (1957).

Decatur: Decatur Public Library (1954).

De Kalb: Northern Illinois University, Swen Franklin Parson Library (1960).

Edwardsville: Southern Illinois University, Lovejoy Memorial Library (1959).

Elsah: Principia College, Marshall Brooks Library (1957).

Evanston: Northwestern University Library (1876).

Freeport: Freeport Public Library (1905).

Galesburg: Galesburg Public Library (1896).

Jacksonville: MacMurray College, Henry Pfeiffer Library (1929).

Kankakee: Olivet Nazarene College, Benner Library and Resource Center (1946).

Lake Forest: Lake Forest College, Donnelley Library (1962).

Lebanon: McKendree College, Holman Library (1968).

Lisle: Illinois Benedictine College, Theodore F. Lownik Library (1911).

Lockport: Lewis University Library (1952).

Macomb: Western Illinois University Memorial Library (1962).

Moline: Black Hawk College, Learning Resources Center (1970).

Monmouth: Monmouth College Library (1860).

Morton Grove: Oakton Community College Library (1976).

Mt. Carmel: Wabash Valley College Library (1975).

Mt. Prospect: Mt. Prospect Public Library (1977).

Normal: Illinois State University, Milner Library (1877).

Oak Park: Oak Park Public Library (1963).

Oglesby: Illinois Valley Community College Library (1976).

Palos Hills: Moraine Valley Community College Library (1972).

Park Forest South: Governors State University Library (1974).

Peoria:
 Bradley University, Cullom Davis Library (1963).
 Peoria Public Library (1883).
River Forest: Rosary College Library (1966).
Rockford: Rockford Public Library (unknown).
Springfield: Illinois State Library (unknown)-REGIONAL.
Urbana: University of Illinois Library (1907).
Wheaton: Wheaton College Library (1964).
Woodstock: Woodstock Public Library (1963).

INDIANA

Anderson: Anderson College, Charles E. Wilson Library (1959).
Bloomington: Indiana University Library (1881).
Crawfordsville: Wabash College, Lilly Library (1906).
Evansville:
 Evansville and Vanderburgh County Public Library (1928).
 Indiana State University, Evansville Campus Library (1969).
Fort Wayne:
 Indiana-Purdue Universities, Walter E. Helmke Library (1965).
 Public Library of Fort Wayne and Allen County (1896).
Franklin: Franklin College Library (1976).
Gary:
 Gary Public Library (1943).
 Indiana University, Northwest Campus Library (1966).
Greencastle: De Pauw University, Roy O. West Library (1879).
Hammond: Hammond Public Library (1964).
Hanover: Hanover College Library (1892).
Huntington: Huntington College Library (1964).
Indianapolis:
 Butler University, Irwin Library (1965).
 Indiana State Library (unknown)-REGIONAL.
 Indiana Supreme Court Law Library (1975).
 Indiana University, Law Library (1967).
 Indianapolis-Marion County Public Library (1906).
Kokomo: Indiana University, Kokomo Regional Campus Library (1969).
Lafayette: Purdue University Library (1907).
Muncie:
 Ball State University Library (1959).
 Muncie Public Library (1906).
New Albany: Indiana University, Southeastern Campus Library (1965).
Notre Dame: University of Notre Dame, Memorial Library (1883).
Rensselaer: St. Joseph's College Library (1964).
Richmond:
 Earlham College, Lilly Library (1964).
 Morrison-Reeves Library (1906).
South Bend: Indiana University at South Bend Library (1965).
Terre Haute: Indiana State University, Cunningham Memorial Library (1906).
Valparaiso: Valparaiso University, Moellering Memorial Library (1930).

IOWA

Ames: Iowa State University of Science and Technology Library (1907).
Cedar Falls: University of Northern Iowa Library (1946).
Council Bluffs:
 Free Public Library (1885).
 Iowa Western Community College, Hoover Media Library (1972).
Davenport: Davenport Public Library (1973).
Des Moines:
 Drake University, Cowles Library (1966).
 Drake University Law Library (1972).

State Library Commission of Iowa (unknown).
 Public Library of Des Moines (1888).
Dubuque:
 Carnegie-Stout Public Library (unknown).
 Loras College, Wahlert Memorial Library (1967).
