ABOUT Us

Established in 1989, Positive Technologies, Inc. is a family owned and operated manufacturer and supplier of quality electrical connectors and fasteners. From our distribution center in Tampa, Florida, we provide quality products to wholesalers across the United States.

SOLD EXCLUSIVELY TO AUTHORIZED DISTRIBUTORS

All trademarks, aside from those owned by Positive Technologies, Inc., are the property of their respective owners. Positive Technologies, Inc. has made every attempt to correctly identify these trademarks and at no time assumes to represent these trademarks as their own.

TABLE OF CONTENTS

SPLIT BOLTS	2-3
COMPRESSION LUGS	4-16
MECHANICAL LUGS	17-23
INSULATED TAPS	24-28
GROUNDING CLAMPS	29-33
BOX HARDWARE	34-37
SOLDERLESS TERMINALS	38-54
WIRE CONNECTORS	55-62
SIGNAGE AND LABELS	64-65
CABLE TIES	66-70
CABLE MANAGEMENT	71-73
SHRINK TUBING	74-80
TAPE PRODUCTS	81-87
FIRESTOP & CHEMICALS	88-98
ROPE AND TWINE	99-100
PPE / SAFETY	101-104
VOICE AND DATA	105-110
TOOLS AND SUPPLIES	111-115
HOLE SAWS AND BLADES	116-117
CUTTING TOOLS	118-124
BITS AND DRIVERS	125-127
CONDUIT STRAPS AND FITTINGS	128-130
STAPLES	131-134
ROD AND SUPPORT FIXTURES	135-136
ENCLOSURE HARDWARE	137
STRUT ACCESSORIES AND HARD	138-141
ANCHORS	142-157
FASTENERS	158-174

INDEX	177-182

SPLIT BOLTS

COPPER TO COPPER

Compact, high strength, high copper alloy split-bolt has free running threads and easy to grip wrench flats. Highly resistant to seasonal cracking and corrosion, our split bolt provides maximum pressure and assures a secure connection on all combinations of run and tap conductors.

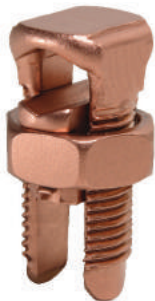

PART NO	CROSS FLATS	L	W	WIRE RANGE	RECOMMENDED TIGHTENING TORQUE IN-LB
SBCU-0010	.50	.85	.38	12 STR. - 10 STR.	80
SBCU-0008	.50	.85	.38	10 STR. - 8 STR.	80

SBCU-750M	2.31	3.29	1.94	4/0 STR. - 750 MCM	1000
SBCU-100M	2.56	3.73	2.19	300 MCM - 1000 MCM	1100

Listed torque values are for maximum conductor combinations accommodated.

Consult UL486 Tables 7-4, 7-5, 7-6 for smaller conductor combinations.

All wire sizes, unless noted otherwise, are American Wire Gauge (AWG)

COPPER TO COPPER 3-WIRE

Compact, high strength, high copper alloy split-bolt has free running threads and easy to grip wrench flats. Highly resistant to seasonal cracking and corrosion, our split bolt provides maximum pressure and assures a secure connection on all combinations of run and tap conductors.

PART NO	CROSS FLATS	L	W	WIRE RANGE	RECOMMENDED TIGHTENING TORQUE IN-LB
SBCU-0006-3	.62	1.05	.70	8 STR. - 6 SOL.	165
SBCU-0004-3	.68	1.30	.78	8 STR. - 4 SOL.	165
SBCU-0003-3	.74	1.51	.84	6 STR. - 2 SOL.	165

Not UL Listed

All wire sizes, unless noted otherwise, are American Wire Gauge (AWG)

SPLIT BOLTS

DUAL RATED TIN PLATED COPPER

Tin-plated, high strength, copper alloy split-bolt with spacer. Spacer separates dissimilar conductors and provides long contact length that prevents high pressure point contacts between run and tap conductors. Use of CUAL joint compound recommended with aluminum and ACSR

LISTED
Copper Only

All wire sizes, unless noted otherwise, are American Wire Gauge (AWG)

UL listed for Copper connections only

DUAL RATED ALUMINUM - ALUMINUM AND COPPER (UL)

- No scratch brushing required
- No oxide inhibitor require
- Orients the conductor
- Provides maximum pressure and assures a secure connection of run and tap conductors
- Facilitates piercing the aluminum conductor surface oxides

- UL 486B listed, 90°C rated
- Provides a low contact resistance
- Provides equal coefficient of expansion
- Inhibits the reformation of oxides by producing a gas-tight seal
- Provides improved retention of minimum to maximum conductor combinations

LISTED
All Combinations

All wire sizes, unless noted otherwise, are American Wire Gauge (AWG)

COMPRESSION LUGS

COPPER – ONE HOLE – STANDARD BARREL

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug.
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

UL Listed 90° C
Up to 35 kV

COMPRESSION LUGS

COPPER - ONE HOLE - LONG BARREL

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the strength of the connection
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

INSULATED MULTI-TAPS

DIRECT BURIAL

- Encapsulated in EPDM rubber with a nominal thickness of 125 Mils and a dielectric strength of 240 Volts per Mil
- Pre-marked end insert allows broad wire range
- O-Ring design screw cap inserts
- Connector is produced from high strength 6061-T6 aluminum alloy
- For proper installation torques, refer to the stuffer sheet or the recommended torque column below
- Rated for 600 Volts, 90° C
- Dual Rated for Copper and Aluminum Conductor
- UL Listed for Direct Burial
- Connector has solid wire stop
- Tested to UL 486D

LISTED

POWER TAPS

INSULATION PIERCING

Features

- Body is molded from tough, resilient glass-filled nylon
- Compact design
- Tin plated copper contact teeth
- Insulation piercing
- Perforated end tabs
- Pre-filled with silicone lubricant
- Increased safety
- Horizontal line grid
- Temperature rating 90° C

Benefits

- Provides high degree of breakage resistance and long dependable use
- Saves space
- Easily penetrates most types of insulation
- No need to strip the conductor which saves installation time
- Break out easily by hand
- Prevents oxidation and moisture from entering the contact area
- Can be used as a splice or tap connector
- Contains no external energized parts.
- Provides a visual guide for proper installation of conductors

MECHANICAL GROUNDING

DUAL RATED WATER PIPE CLAMPS

FOR COPPER AND ALUMINUM CABLE

GCAL ground clamps are UL listed for use with either copper or aluminum conductors to copper water pipe, galvanized pipe or steel conduit. All clamps are constructed from tin plated high-strength extruded aluminum alloy. CUAL oxide inhibiting joint compounds are recommended for all aluminum applications.

PART NO	PIPE SIZE	CONDUCTOR RANGE
GCAL-1005	1/2" - 1"	1/0 - #14 AWG

All wire sizes, unless noted otherwise, are American Wire Gauge (AWG)

INTERSYSTEM BONDING DEVICE

- Fast & simple installation on ground conductor below meter
- Lay-in feature allows termination to existing main ground electrode without cutting or splicing conductor
- Open faced design allows installer to quickly lay-in the grounding conductor with no break in the ground conductor
- Four(4) Bonding Positions accommodate low voltage utility service ground wires
- Made of 6061-T6 Aluminum
- AL9CU Dual Rated For Copper or Aluminum Conductors
- Stainless Steel Flush Mount Slot Head Screws
- UV Rated Paintable Thermoplastic Cover
- UL467 Listed, Meets NEC 2008 Section 250.94 Requirements

BOX GROUNDING

SOLID GROUNDING PIG TAILS

We manufacture our grounding pigtailed right here in Tampa, FL. Assembled from UL listed domestic THHN wire twisted around our distinctive combination drive grounding screw or optional type F thread cutting variety. Don't see the size or configuration you're looking for? We can provide custom lengths and gauges with minimal turnaround and small minimum orders.

SHEATHED CABLE TAP KITS

Non-metallic splice and tap kits provide a fast and reliable method for splicing or tapping 2 wire w/ ground and splicing 3 wire with ground non-metallic cables up to 300 volts. They are designed and approved for use in rework within existing structures. Splice and Tap Kits also eliminate wire connectors for installation and replace the conventional method for adding a splice or tap for non-metallic cable without the need for exposed and unsightly junction boxes. NEC approved Article 334-40b.

THE HISTORY OF SOLDERLESS TERMINALS

Solderless Terminals, also known as crimp connectors, were first invented in the 1940's by Aircraft Marine Products, known later as AMP Corporation. Until this time, wire connections were commonly soldered in place. Soldered connections were subject to joint fatigue resulting from vibration and other environmental factors. The introduction of solderless terminals created a gas tight connection that is vibration resistant and free from oxidation and resulting corrosion. A proper crimp will create what is known as a cold-weld, essentially combining the two metals together into a singular mass.

SOLDERLESS VINYL TERMINALS

SOLDERLESS VINYL RING TERMINALS

These Vinyl Ring Terminals are the most economical insulated terminals available. They feature a PVC insulated sleeve that is securely fastened to the seam barrel. They offer a flared entry to easy wire insertion and industry standard color coding for wire sizes.

SOLDERLESS VINYL TERMINALS

SOLDERLESS RING TERMINALS – BRAZED SEAM

8 AWG - 4 AWG

These Vinyl Ring Terminals feature a PVC insulated sleeve that is securely fastened to brazed barrel. The brazed barrel creates a virtually seamless crimp which helps to prevent deformation and misaligned crimps. They also offer a flared entry to easy wire insertion and industry standard color coding for wire sizes.

WIRE CONNECTORS

TWIST-ON WIRE CONNECTOR

- Deep surface ridges provide better grip
- Flame retardant UL 94V-2 thermoplastic shell provides excellent electrical insulation
- Pre-twisting of wires is not necessary
- Zinc-plated springs for low contact resistance
- Temperature Rating: 105 °C (221 °F)
- Voltage: 600V max., 1,000V max. in fixtures and signs
- Wire Type: For Copper wire only

PRO-TRACE® DB CONNECTOR

PRO-TRACE® DB Connector is injection molded from polycarbonate that has outstanding temperature and high-impact resistance. It is superior to breaking and cracking. The outer housing is clear in color and provides visual confidence with each installation. The inner housing features a locking mechanism made from zinc and uses applied hand pressure that securely closes and locks the wire inside with ease. A corrosion proof silicone sealant fills the inner housing and provides longevity for each installation.

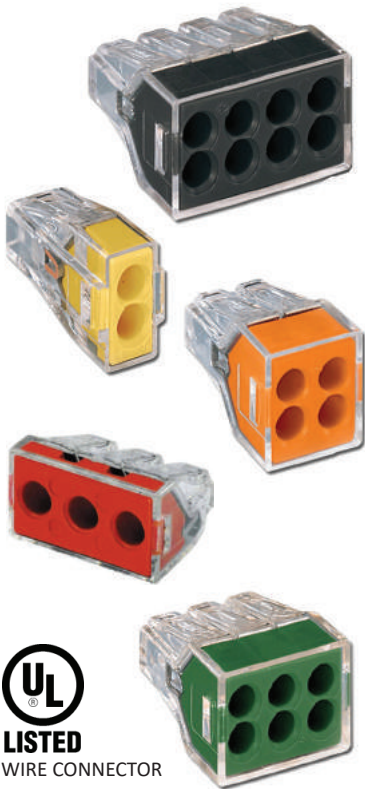

- 300 Volts Max 10 AWG - 14 AWG
- Rated for Direct Burial

PART NO	PCS	DESCRIPTION
WGKT-0075	130	ASSORTED PUSHWIRE CONNECTORS
WGKT-0250	250	ASSORTED PUSHWIRE CONNECTORS LARGE
WGKT-0070	70	ASSORTED STANDARD LEVER-NUT CONNECTORS
WGKT-0080	80	ASSORTED COMPACT LEVER-NUT CONNECTORS

LUMINAIRE DISCONNECTS

- Copper components offers a superior connection over brass
- Completely touch-proof in the unmated position
- 100% protected against mis-mating
- 600V (1000V Signs and Fixtures) 20A
- #12 AWG - #16 AWG Copper Solid and Stranded Copper Wire

MOISTURE RESISTANT IDC CONECTORS

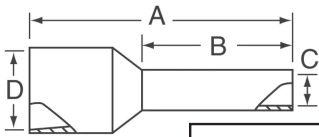

Create moisture resistant connections with 2 or 3 wires. Rated 1000V for use with luminaires, fixtures and signs and 600V-rated for use with building wire to meet multiple on-the-job needs. The self-stripping functionality lets you quicken installation pace to reduce labor time.

WIRE FERRULES

DIN STYLE SINGLE WIRE FERRULES

Polypropylene insulated ferrules conform to DIN standards for single and dual wire containment. Funnel entry and seamless barrel allow for faster insertion and superior terminations. Multiple pins lengths available for a variety of terminal blocks.

All wire sizes, unless noted otherwise, are American Wire Gauge (AWG)

EURO STYLE – TOUCH SAFE

The panel and chassis mounted series are ideal for connecting electrical control panels to external power sources, signal sources, other electrical panels and electrical loads of many types and sizes. Ideal for use with wire ferrules, the screw tightened connections result in high contact forces thus promoting safe wire secureness and retention, low electrical resistance and safe reusable connections. All wire retention screws are captive in their towers and they cannot fall out during transportation, installation and use.

- No exposed contacts for safe
- Housing Material: Polyamide 66 (Nylon 66), UL 94V-2
- Temperature Rating: 105°C (UL), -30°C to 110°C (VDE)
- Terminal Insert: Brass metal alloy, nickel plated
- Screw: Zinc plated

WIRE IDENTIFICATION

WIRE MARKER BOOKS

Posi-tech pre-printed wire marker book is compact, easy to carry, and easy to use. Each wire marker book includes 10 pages of wire markers constructed of highest quality vinyl-coated cloth, backed with high-tack rubber adhesive. Each wire marker includes a matching terminal marker.

- Pre-printed vinyl coated cloth wire markers
- High-tack rubber adhesive
- Convenient 10-page booklets

VOLTAGE MARKER LABELS – SELF ADHESIVE

Style A

Style B

Style C

Use Posi-tech's black on orange self-adhesive voltage markers to identify voltages on conduit, power and distribution panels, electrical components, and control panels. Constructed of vinyl with permanent acrylic adhesive, these voltage markers resist abrasion, dirt, oil, grease, moisture, and most chemicals and solvents.

CABLE TIES

NATURAL CABLE TIES

Python Wraps are manufactured to be superior in strength, far exceeding the required tensile strengths used in industry standards. Using high quality raw materials, our ties are backed up with a 100% performance guarantee.

Select ties (noted below) are designed to meet all the testing requirements of Aerospace Standard SAE-AS23190A (formerly MIL-S-23190) and the dimensional requirements of Aerospace Standard SAE-AS33671 (formerly MS3367).

CABLE TIE REMOVAL TOOL / WIRE STRIPPER

The TLWS-4000 includes a built in 12-22 AWG wire stripper. Designed for safely cutting cable ties off of bundles of wires. Using the wrong tool such as a pair of side cutters can result in wire damage or even severing the wire. Perfect for working in tight places such as behind patch panels, A/V systems, or other head end equipment. Also perfect for cutting off cable tie tails flush; eliminate sharp dangerous edges on your cable ties. Features: Fits All Cable Tie Sizes Scissor Action Cutters Safety Guard Ensures Bundle Protection High Quality Heat Treated Alloy Steel Auto Return Spring Handles Handle Lock for Storage Ergonomic Cushion Grip Handles Professional Quality MADE IN THE USA

CTMB-1753-CL	100/BAG	BLACK	.90	.35 175LB	.63

ANCHOR MOUNT BASE

- Save positioning time with 4 sided entry allowing parallel or perpendicular bundle alignment
- Used in confined spaces & control panels and other areas where space is limited
- Quickly secures and positions wire bundles, cables, and hoses to panels
- Easy insertion of cable ties through wide entry slot
- Non-Adhesive

EXPANDABLE BRAIDED SLEEVING

Our expandable braided sleeving is a braided weave with a wide expandability that enables quick n' easy installation over large connectors and lengthy runs. This sleeving is braided from 10 mil polyethylene terephthalate (PET) monofilament yarns. The material has a wide operating temperature range (-94°F to +125°F), is resistant to chemical degradation, UV radiation, and abrasion. The sleeving cuts easily and cleanly with a hot knife and once installed, will beautify and protect any wire, hose or cable application.

PYTHON SHRINK™

DUAL WALL POLYOLEFIN 3:1 SHRINK TUBING FOR WET APPLICATIONS

Adhesive-lined heat shrink tubing ideal for applications where both exceptional flame retardancy and environmental sealing capabilities are required. Ideal for wet applications such as well pumps, waste treatment and aquatic features.

- Flame retardant
- Superior sealing against water, moisture or other contaminants
- Meets MIL - DTL - 23053/4
- Class 3
- Continuous Operating Temperature: -55°C to 125°C
- Shrink Temperature: 120°C

PYTHON SHRINK™

HEAVY WALL POLYOLEFIN 3:1 SHRINK TUBING FOR DIRECT BURIAL APPLICATIONS

Heavy wall heat shrink tubing insulates and protects electrical splices and terminations where maximum flame retardancy and exceptional insulating and sealing characteristics are required.

- Thermoplastic adhesive liner provides complete environmental protection and insulation
- Flame retardant
- High impact and abrasion resistance - capable of withstanding severe mechanical abuse of URD and direct burial installations.
- Rated for 1 kV, 90°C continuous use
- Continuous Operating Temperature: -55°C to 110°C
- UL 486D (except where noted)
- Shrink Temperature: 120°C

HEAT GUNS

- High temperature and power ratings: 1000°F/540°C at up to 1740 watts
- High air flow rating: 23 CFM at 3000 FPM gets the job done fast
- Powerful high speed universal motor
- Sturdy die cast housing
- Kit includes Heat Gun, Shrink Attachment, Spreader Attachment and Storage Case.
- Use to bend plastics, cure adhesives, dry parts, heat parts and shrink tubing.

PYTHON SHRINK™

COLD SHRINK

STCS series cold applied splice sealing products are made of specially formulated silicone rubber that offer excellent insulation and moisture proof sealing for in-line cable connector systems or elbow to cable jacket applications. The rubber sleeves are factory expanded and held over a removable, plastic rip core housing. Installs quickly and easily.

- Ease of installation
- Suitable for a wide range of cable sizes
- UV resistance
- 1000V rating as a primary insulation cover
- No special tools or training required for installation
- Operating temperature: -40°C to 105°C

NO HEAT
REQUIRED

2:1 shrink ratio

* Cable size listed is approximated based on THHN/TFN/OD specifications. Please consult your wire manufacturer for proper fitment. Terminations and splices are not calculated in this application guide.

CABLE REPAIR SLEEVES

CRS sleeves close easily with a permanent locking system that consists of a raised rail profile and a stainless steel channel. These sleeves are made from crosslinked polyolefin which equals or exceeds the material properties of the original cable jacket. CRS sleeves fit a wide range of cable sizes and have unlimited shelf life.

- 3:1 shrink ratio
- Provides water tight seal upon recovery
- Offers mechanical durability
- Application procedure is quick, simple and clean
- Steel channel provides permanent closure system
- Can be trimmed to desired length
- Installation temperature range: -35°C to 100°C

ELECTRICAL TAPES

PVC ELECTRICAL TAPES - BLACK

- Economical all-purpose black electrical tape.
- Provides moisture-tight electrical and mechanical protection.
- Weather resistant. Resists UV rays, acids, alkalis, abrasion, moisture, and corrosion.
- Temperature range: 0°C to 80°C
- Wound on 1.5" ID core.

PART NO	SIZE	COLOR	PACK
TAEL-3460	3/4" X 60FT	BLACK	10

ELECTRICAL TAPES

LOW VOLTAGE RUBBER TAPE W/LINER

- High quality, un-vulcanized EPR rubber with first-rate self-amalgamating properties carried on a thick poly liner
- Primary insulation for electrical wires and cables splices of not more than 600V
- Suitable for industrial pipe repair, automotive, marine, construction, and many other general applications
- Dielectric strength 490 volts per mil
- Flexible over a wide temperature range: Max operating temperature 176°F
- UL 510 listed. Meets requirements of ASTM-D119 and HHI-553C

PART NO	SIZE	COLOR	PACK
TARU-3422	3/4" X 22YDS	BLACK	EACH
TARU-2022	2" X 22YDS	BLACK	EACH

30MIL HIGH VOLTAGE RUBBER TAPE - W/LINER

- Self-bonding, highly conformable, 30 mil EPR rubber wound on a heavy duty woven poly liner.
- Use as a primary electric insulation for low and high voltage applications through 69 kV.
- Designed for Telcom and Utility applications.
- Rated for up to 194°F continuous operating temperature and intermittent service at 266°F.

PART NO	SIZE	COLOR	PACK
TARH-3422	3/4" X 22YDS	BLACK	EACH
TARH-2022	2" X 22YDS	BLACK	EACH

LIQUID ELECTRICAL TAPE

Out-performs common electrical tape by sealing out moisture and dirt to virtually eliminate corrosion, which causes many electrical failures. Sticks to metal, wiring, rubber, vinyl and plastic, forming a tough flexible coating that dries at room temperature in 5 minutes. Handy applicator top and thicker formula is great for getting into tight places that just cannot be reached with ordinary tape. Use anywhere a dependable weather-proof connection is required.

ELECTRICAL TAPES

GLASS CLOTH TAPE – RUBBER ADHESIVE

- Provides heat stable insulation for use on motor leads, and switches, and controls
- 7mil thickness
- Insulation class: 130°C (266°F)
- Dielectric strength 3,300 volts
- Tensile Strength: 170 lb/in
- Meets UL requirements and MIL-I-15126F (Type GFT)

PART NO	SIZE	COLOR	PACK
TAGL-3466	3/4" X 66FT	WHITE	EACH
TAGL-1066	1" X 66FT	WHITE	EACH

SILICONE

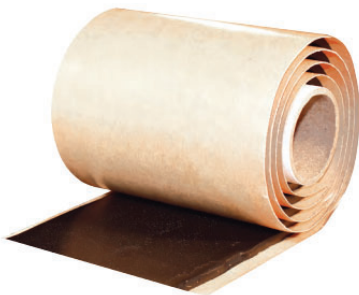

Silicone Tape is a self-fusing, repair tape that conforms to any surface while providing a water-tight seal. Silicone Tape creates a chemical, moisture-resistant barrier that fixes leaky pipes, hoses and insulates frayed electrical wires. It is easy to remove, leaves no sticky residue and protects from corrosion. Ideal for marine, automotive, plumbing and household applications, plus many more!

- Insulates up to 8,000 volts
- 300% Stretch
- -85°F to 500°F

PART NO	SIZE	COLOR	PACK
TSIB-1010	1" x 10FT	BLACK	EACH

MASTIC RUBBER WRAP

- Self-bonding 1/8" thick (125mil) electrical grade rubber mastic
- Use for insulating and moisture sealing splices and terminations on solid electric cable
- Can be wrapped, stretched or molded around irregular shapes for insulation build up, water sealing and surface protection
- Apply an overwrap of premium vinyl for optimum durability and protection
- Widely used for cellular tower electrical splices
- Made in USA

PART NO	SIZE	COLOR	PACK
TAMR-2510	2-1/2" (W) X 10FT (L)	BLACK	EACH

FRICTION TAPE

- Cotton cloth impregnated with scientifically compounded pure rubber based adhesive for maximum elasticity and moisture resistance
- Dielectric strength: 1,000 volts
- Standard color: black
- Tape Thickness: 15.0 mil
- Tensile Strength: 40 lb/in

PART NO	SIZE	COLOR	PACK
TAFR-3460	3/4" X 60FT	BLACK	EACH
TAFR-2060	2" X 60FT	BLACK	EACH

CONSTRUCTION TAPES

DUCT TAPE - CLOTH BACKED

100% Dacron® cloth/polyethylene (PE) film with an aggressive pressuresensitive natural rubber adhesive combines to provide a quality utility product. Consistent tensile and even tear in both cross and machine direction. Excellent conformability to irregular surfaces.

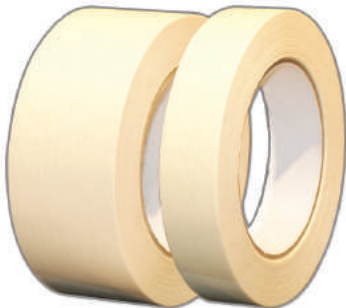

Tested in accordance with UL-723

Backing: PE film
 Adhesive Natural: Rubber/Resin
 Reinforcement: PET Cloth

BURIAL TAPES - DETECTABLE

Detectable Marking Tape is used for detecting, locating, identifying, and protecting buried utility lines for gas, water, sewer, telecommunication, and electrical markets. The width of tape used, is determined by the size of, and depth at which the underground utility line is buried. The depth at which detectable tape is buried, is determined by the width of the tape used.

Also available in the following configurations:

TAAD - **POTABLE WATER**

TASD - **SEWER**

TAGD - **GAS**

FIRESTOP PRODUCTS

COMMERCIAL FIRESTOP FOAM

BOSS® 813 can be used on any commercial or residential construction where the code calls for a UL system for penetration of wires, cables and metal pipes through drywall, concrete or wood. (Please consult the UL directory for a full list of approved systems). BOSS® 813 can also be used as a fireblock/draftstop in non-fire rated construction. BOSS® 813 prevents the spread of fire, smoke and toxic gasses from one compartment to another, while still maintaining the integrity of the Firewall. BOSS® 813 has excellent insulation and acoustic properties, and is also paintable (after inspection).

BOSS® 813 meets or exceeds all building codes including the new International Building Code. BOSS® 813 has been tested as a Through Penetration Firestop for 1 & 2 hour fire rated construction and is listed to UL 1479 (ASTM E-814) BOSS® 813 must be installed as tested to achieve a 1 or 2 hour rating. Visit www.bossproducts.com for a "Complete Firestop Systems Guide" and view the systems as they were tested for proper installation.

PART NO	SIZE	CASE
813	24oz	12

COMMERCIAL FIRESTOP SEALANT

Firestop-814+ Elastomeric Intumescent Firestop Sealant offers comprehensive UL Testing for a wide range of electrical, plumbing, HVAC and head-of-wall applications for "Through Penetrations" found in up to 3 hour fire rated wood, gypsum and concrete floor & wall assemblies. Firestop-814+ is a highly flexible, general purpose firestopping sealant that conforms to ASTM-E814 (UL 1479) standards for multi-family and commercial firestopping applications.

PART NO	SIZE	CASE
CHFC-1030	10oz	12

COMMERCIAL FIRESTOP PUTTY PADS

Flame Tech Putty Pads are non-curing, 7" x 7" x 1/8" moldable pads that Easy Installation are applied to the backside of electrical boxes to maintain the integrity of 1 & Non-Curing 2 hour fire rated gypsum walls. In fire conditions, Flame Tech Putty Pads expand to form and intumescent char that encloses the electrical box and Long Shelf Life seals off any openings that may allow the spread of flame, smoke, and toxic gases. Flame Tech Putty Pads have been UL tested and classified as a protective material for wall openings for up to 2 hours.

PART NO	SIZE	CASE
CHIP-7070	7" x 7" x 1/8"	20

COMMERCIAL FIRESTOP PILLOWS

2" x 4" x 8" Intumescent Firestop Pillows designed to firestop large open voids and openings made for penetrating items such as cables, cable trays, ductwork, pipes, and conduits. Firestop Pillows are UL tested to maintain up to a 3 hour rating and are soft, easily stackable, self-supporting and require no mesh or sealant.

PART NO	SIZE	CASE
CHPL-4080	2" x 4" x 8"	25

FIREBLOCK PRODUCTS

RESIDENTIAL FIREBLOCK FOAM

Handi-Foam Fireblock has a recognizable orange color allowing inspectors to easily identify the use of an approved fireblock product for Type V residential construction. Due to its expansion characteristics, Handi-Foam Fireblock is more effective than many traditional fireblocking materials for preventing the spread of air, flames and smoke in concealed penetrations, preventing flame spread from room to room and floor to floor. NOT approved for use in commercial or multi-family construction.

RESIDENTIAL FIREBLOCK SEALANT

Fire Caulk-136 is an economical, fire rated, non-combustible material used to fill the annular space around wires, pipes, ducts, and other mechanical penetrating items in steel and wood-framed single family residential construction. Fire Caulk is tested to ASTM-E136 standard for non-combustibility and fulfills fireblocking requirements by resuming the integrity of non-rated penetrations through top plates, ceiling, and floor openings.

PART NO	SIZE	CASE
CHFC-0136	10.1oz	12

GENERAL VOID FILL

NON-FIRE RATED FOAM

Handi-Foam® low pressure one-component polyurethane foam sealants are moisture-cured, multipurpose sealants designed to seal and fill small cracks and voids, creating a tight barrier against noise, moisture and air infiltration. Handi-Foam Sealants are UL GREENGUARD® Gold Certified, contributing to healthier indoor environments.

SEALANTS

100% SILICONE

Our Silicone Sealant is a high performance acetoxy curing silicone sealant adhesive that demonstrates high strength adhesion and excellent weatherability under the most severe conditions. TruSil has been specially formulated to meet low VOC requirements and is recognized for its smooth consistency, low temperature application, ease of tooling, and quick cure time. TruSil 100 adheres to a wide variety of non-porous substrates including glass, aluminum and other metals, non-porous concrete, stone, tile, ceramic, non-oily wood, fiberglass, painted surfaces, plastics, many rubbers and other building materials.

RAGS-1000	MIXED COLORS	10lb

AEROSOL CHEMICALS

CONTACT CLEANERS

Sprayon® Electrical Contact Cleaner & Protectant Aerosol is intended to clean/degrease electrical equipment when electrical current exists or when there is a residual electrical potential from a component. Instant solvent and cleaning action leaving a fine, microscopic film for protection against corrosion.

PART NO	DESCRIPTION	SIZE	CASE
EL2001	NON-FLAMMABLE	11oz	12
EL2302	FLAMMABLE - SAFE ON PLASTICS	11oz	12

ELECTRICAL LACQUER SEALER

Sprayon® Clear Electrical Lacquer Sealer Aerosol seals electrical and electronic parts. Weather/water proofs in one application. Protects against rust, corrosion, tarnish. Resists fungus, chemicals, dirt, grease. Dries to a crystal clear, flexible film. Has exceptional resistance to vegetable oils, mineral oils, greases, chemical fumes. Meets MIL-TT-L-50G.

PART NO	DESCRIPTION	SIZE	CASE
EL2000	WEATHER AND WATERPROOF - CLEAR	11oz	12

RED INSULATING VARNISH

Sprayon® EL601 Red Insulating Varnish Aerosol is an insulating spray for general coating, impregnating and insulating electrical and electronic work. Excellent adhesion, flexibility, and water resistance. Protects surface against oils, moisture, acid and alkalis. Meets NEMA & UL Class F Requirements.

PART NO	DESCRIPTION	SIZE	CASE
EL601	RESISTS OIL, MOISTURE, ACIDS AND ALKALIS	15.25oz	12
EL601GAL	RESISTS OIL, MOISTURE, ACIDS AND ALKALIS	GALLON	4

ELECTRIC MOTOR DEGREASER

Sprayon® EL703 Electric Motor Degreaser Aerosol instantly penetrates and removes dirt, oil, grease, wax and moisture from electrical equipment and machinery. Formulated to clean/degrease electrical equipment when electrical current exists or when there is a residual electrical potential from a component.

PART NO	DESCRIPTION	SIZE	CASE
EL703	NON-FLAMMABLE	19oz	12

ELECTRICAL DEGREASER

Sprayon® EL848 Electrical Degreaser (Flash Free™) Aerosol is a non-flammable, fast-evaporating cleaner that penetrates instantly to remove dirt, oil, grease and wax. Increases the life of electrical components by removing foreign materials that can cause costly downtime. Replaces 1,1,1 Trichloroethylene

PART NO	DESCRIPTION	SIZE	CASE
EL848	NON-FLAMMABLE	13oz	12

AEROSOL CHEMICALS

WHITE LITHIUM GREASE

Sprayon® LU100 White Lithium Grease Aerosol is a high solids white grease that provides excellent lubrication for metal-to-metal applications and serves as an excellent corrosion inhibitor for unpainted metal.

PART NO	DESCRIPTION	SIZE	CASE
LU100	FOR USE ON CHAINS, GEARS, DRIVES	11oz	12

RUST BREAKER

Sprayon® LU103 Heavy-Duty Rust Penetrant (Rust Breaker®) Aerosol quickly loosens rust while penetrating grease and dirt. This high-performance, non-flammable penetrant is transparent and non-staining.

PART NO	DESCRIPTION	SIZE	CASE
LU103	RUST PENETRANT - NON-FLAMMABLE	11oz	12

DRY FILM MOLY LUBRICANT

Sprayon® LU200 Dry Film Moly Lubricant Aerosol is a high solids, molybdenum disulfide coating that withstands high pressures. This non-conductive lubricant bonds to all clean surfaces that are not adversely affected by alcohol or aromatic hydrocarbons (toluene or xylene) resulting in a high performance dry film lubricant.

PART NO	DESCRIPTION	SIZE	CASE
LU200	NON-CONDUCTIVE	11oz	12

MOLY CHAIN LUBRICANT

Sprayon® LU202 Moly Chain Lubricant Aerosol is a high-viscosity, non-drying oil that clings to moving parts and metal-to-metal applications to provide long-lasting lubrication and reduce friction. The foaming action penetrates close tolerances of chain drive bushings and pins and the moly additive improves its load carrying capacity (will work under extreme pressures).

PART NO	DESCRIPTION	SIZE	CASE
LU202	FOAMING ACTION	11oz	12

ALL-PURPOSE SILICONE LUBRICANT

Sprayon® LU206 All-Purpose Silicone Lubricant Aerosol is economical for applications where petroleum based products are not desired. 5% silicone formula protects against air and moisture to retard oxidation and corrosion. It virtually eliminates friction and sticking to improve high-speed production.

PART NO	DESCRIPTION	SIZE	CASE
LU206	PAINTABLE	10oz	12

AEROSOL CHEMICALS

CUTTING OIL - AEROSOL

Sprayon® LU208 Cutting Oil Aerosol is an excellent lubricant specifically formulated for all ferrous and non-ferrous machining operations. Extends tool life, reducing tool sharpening downtime. It utilizes a unique combination of friction reducing triglycerides which aides in a high degree of fluid film protection.

PART NO	DESCRIPTION	SIZE	CASE
LU208	AEROSOL JET SPRAY	12oz	12

ALL PURPOSE LUBRICANT - THE PROTECTOR™

Sprayon® LU711 All-Purpose Lubricant (The Protector™) Aerosol is an ultra-thin film, transparent blend of high quality petroleum distillates formulated to ensure maximum moisture displacement. Its film resists the collection of abrasive particles on delicate contacts & connectors. This general maintenance penetrant is unmatched in its versatility & quality.

PART NO	DESCRIPTION	SIZE	CASE
LU711	RUST PENETRANT - NON-FLAMMABLE	11oz	12

OUTDOOR METAL PROTECTANT

Sprayon® LU777 Outdoor Metal Protectant Aerosol is a waxy corrosion preventative that offers excellent lubrication and long-term outdoor protection. Its tacky film provides an excellent barrier to salt spray and high humidity. Meets MIL-C-16173D- Grade 2.

PART NO	DESCRIPTION	SIZE	CASE
LU777	24 MONTH DURABILITY	11oz	12

HEAVY DUTY CITRUS DEGREASER

Sprayon® CD757 Heavy-Duty Citrus Degreaser Aerosol is a heavy duty, multi-purpose degreaser, adhesive and graffiti remover. This non-chlorinated formula has the cleaning power of solvents to remove grime, dirt, grease and oil. An outstanding biodegradable cleaner for use in general maintenance, public buildings. Ideal as a cleaner prior to painting.

PART NO	DESCRIPTION	SIZE	CASE
CD757	BIODEGRADABLE - NON-CHLORINATED	16oz	12

COIL AND FIN CLEANER

Sprayon® CD887 Coil & Fin Cleaner Aerosol is a heavy-duty water-based foaming coil cleaner designed to remove stubborn grease, grime and chloride build up that can accumulate on refrigeration and A/C coils. Its foaming and penetrating action ensures proper coverage and cleaning of finned areas.

PART NO	DESCRIPTION	SIZE	CASE
CD887	NON-FLAMMABLE - NON-CORROSIVE	18oz	12

CHEMICALS

SPRAY-ON GALVANIZING COMPOUND

High performance primer containing zinc dust pigment blended with epoxy resin. Stops rust by electrochemical action on steel or galvanized coatings. The self-sacrificing zinc protects the base metal, preserving strength and prevents rust creepage when the area is penetrated or scratched. This compound fuses zinc to the metal substrate and delivers protection against corrosion equal to or better than hot-dipped galvanizing.

PART NO	DESCRIPTION	SIZE	CASE
WL739	SILVER GALVANIZING COMPOUND	14oz	12
WL740	ZINC RICH SILVER GALVANIZING COMPOUND	14oz	12

WASP AND HORNET KILLER

Sprayon® SP857 Blast'Em Wasp & Hornet Killer is perfect for killing wasps, hornets, yellow jackets without getting close to the insects. It contains a high amount of petroleum distillates for the best knockdown and kill rate. The 20 oz. Aerosol comes equipped with the Accu-Sol™ Ergonomic Trigger Spray Nozzle which sprays from a distance of up to 20 ft.

PART NO	DESCRIPTION	SIZE	CASE
SP857	DIELECTRIC STRENGTH: 33,000 VOLTS	20oz	12

NATRAPEL™ INSECT REPELLANT

- CDC recommended formula of 20% Picaridin is the recommended concentration to guard against diseases transmitted by insects including the Zika Virus, West Nile Virus, Eastern Equine Encephalitis, Lyme Disease, and Dengue Fever
- Easy to apply and easy on the air with a continuous spray without releasing harmful aerosols
- Enjoy 12+ hours of insect protection
- Safe on your gear as the DEET free formula won't melt jackets, fishing line, and other plastics

PART NO	DESCRIPTION	SIZE	CASE
6772	NATRAPEL 8 HOUR PUMP BOTTLE	3.4oz	12
6878	NATRAPEL 8 HOUR AEROSOL	6oz	12
6095	NATRAPEL 8 HOUR WIPES	3" x 6" x 10"	12

HAND CLEANER

Orange GOOP™ liquid gel is a 'waterless' hand cleaner that gets hands 'dinner table clean' quickly, with the power of Orange. Orange GOOP™ uses all natural citrus cleaners to remove the toughest of soils, with no harsh chemicals or solvents, and is infused with natural humectants to keep your hands soft. Orange GOOP™ is available in multiple sizes, with fine pumice scrubbers to help remove those extra tough stains, or without pumice to soothe sensitive hands.

PART NO	DESCRIPTION	SIZE	CASE
549	ORANGE GOOP HAND CLEANER W/PUMICE	16oz	12
548	ORANGE GOOP HAND CLEANER W/PUMICE	1/2 GAL	6
46	ORANGE GOOP HAND CLEANER W/PUMICE	GAL	4
950	RUFF TOWELS W/PUMICE	72 CT	6

PVC CEMENT

REGULAR BODY CLEAR

Clear, regular bodied, high strength, fast setting PVC solvent cement for all classes and schedule, except schedule 80. For use on PVC pipes and fittings. This cement may be used for up to 4" pipes and fittings with interference fit for potable water, irrigation, drain, waste, vent, sewer and conduit applications.

PART NO	DESCRIPTION	SIZE	CASE
CHPC-0063	REGULAR BODY CLEAR UP TO 4"	1/2 PINT	24
CHPC-0125	REGULAR BODY CLEAR UP TO 4"	PINT	12
CHPC-0250	REGULAR BODY CLEAR UP TO 4"	QUART	12
CHPC-1000	REGULAR BODY CLEAR UP TO 4"	GALLON	4

MEDIUM BODY CLEAR

Clear, medium bodied, high strength, fast setting PVC solvent cement for all classes and schedule. For use on PVC pipes and fittings. This cement may be used for up to 6" pipes and fittings with interference fit for potable water, irrigation, drain, waste, vent, sewer and conduit applications.

PART NO	DESCRIPTION	SIZE	CASE
CHPM-0063	MEDIUM BODY CLEAR UP TO 6"	1/2 PINT	24
CHPM-0125	MEDIUM BODY CLEAR UP TO 6"	PINT	12
CHPM-0250	MEDIUM BODY CLEAR UP TO 6"	QUART	12
CHPM-1000	MEDIUM BODY CLEAR UP TO 6"	GALLON	4

MEDIUM BODY BLUE FOR WET APPLICATIONS

Blue medium bodied, high strength, fast setting PVC solvent cement for all classes and schedules. For use on PVC pipes and fittings. For use on pipes and fittings with interference fit up to 6". Formulated for wet conditions and suitable for potable water, irrigation, drain, waste, vent, sewer and conduit.

PART NO	DESCRIPTION	SIZE	CASE
CHPS-0250	MEDIUM BODY BLUE FOR WET APPLICATIONS	QUART	12

CLEANERS, PRIMERS AND PARTS

- Clear cleaner is for use on PVC, CPVC, ABS and Styrene pipes and fittings. This cleaner helps remove dirt, oil, grease and grime from the joining surfaces prior to primer application
- Primer is for use on PVC and PVC pipes and fittings. This primer helps soften the joining surfaces prior to the solvent cement application

LUBRICANTS

DARK CUTTING OIL

Black Swan Dark Cutting Oil is a heavy duty sulfurized-chlorinated base oil that helps cut clean, sharp threads on steel and brass pipe. It is formulated to reduce friction during the machining process. By reducing this friction heat generation is minimized. The results are cleaner, sharper threads, better fitting joints and longer tool life.

PART NO	DESCRIPTION	SIZE	CASE
CHCO-4242	DARK CUTTING OIL	QUART	12
CHCO-1000	DARK CUTTING OIL	GALLON	6

ANCHOR LUBE™ CUTTING LUBRICANT

Anchorlube is the future of multi-purpose lubricants, offering a new level of tool-life along with the cleanliness of a water/soap based compound. Anchorlube is a semi-paste and performs well on all metals, especially stainless steel and other exotic metals that tend to shorten tool life considerably. It is a clean lubricant that contains no petroleum, chlorine, or sulfur, and is a water-based soap, maintaining a clean work area with no oily surfaces.

PART NO	DESCRIPTION	SIZE	CASE
CHLU-0400	ANCHOR LUBE SQUEEZE TUBE	4oz	12
CHLU-0800	ANCHOR LUBE SQUEEZE TUBE	8oz	12
CHLU-1600	ANCHOR LUBE SQUEEZE TUBE	16oz	12
CHLU-1000	ANCHOR LUBE	Gallon	4

CLEAR WIRE PULLING LUBE

Posi-tech Wire Pulling Lubricant is a premium grade lubricant that reduces friction and limits surface tension making difficult wire pulling applications quick and easy. Posi-tech is compatible with all cable jackets and possesses excellent cling characteristics. Non-corrosive and non-toxic.

PART NO	DESCRIPTION	SIZE	CASE
CHWP-0250	CLEAR LUBE SQUEEZE BOTTLE	QUART	12
CHWP-1000	CLEAR LUBE PAIL	GALLON	4
CHWP-5000	CLEAR LUBE BUCKET	5 GAL	EACH

ANTI-OX FOR AL/CU CONNECTIONS

Anti-Ox is used for aluminum to copper and aluminum to aluminum wire connections and improves the conductivity and overall service life of the electrical connection.

PART NO	DESCRIPTION	SIZE	CASE
CUAL-0400	ANTI-OX FOR AL/CU CONNECTIONS	40z	12
CUAL-1000	ANTI-OX FOR AL/CU CONNECTIONS	80z	12

WIRE PULLING SUPPLIES

PULLING TWINE

- Will not rot, mildew or rust
- Ships in plastic pail for ease of use

PART NO	DESCRIPTION	LENGTH	TENSILE
ROPL-6501	SPIRAL PULLING TWINE BLUE/WHITE	6500	210LBS

SEINE TWINE

Twisted nylon seine twine, made of continuous filament, is strong and nearly indestructible. Excellent for tying, it resists mildew, rot, abrasion, oil, grease, and most chemicals. Also known as masons twine.

PART NO	DESCRIPTION	LENGTH	CASE
RONT-2150	NO. 9 73LB TENSILE (24LB WORKING)	525FT	EACH

CONDUIT MEASURING TAPE

Manufactured from bonded parallel polyester fibers. This product is produced for use as a measuring tape and light weight pull cord. Each reel is printed in 1 foot increments for accurate measuring of conduit runs. Sequentially printed in 1-ft increments. Lightweight, easily blown through conduit .

PART NO	DESCRIPTION	LENGTH	CASE
ROCM-3630	CONDUIT MEASURING TAPE	3000 FT	EACH

PULL LINE CONDUIT CARRIERS

Our Conduit Pistons, comprised of industrial foam materials, are designed for quick blowing or vacuuming through most conduits sizes from 1/2" - 6". Tough enough to clean out loose debris and reusable

Our Zip Line Packages are designed to be blown or vacuumed at speeds up to 400 Ft. in 10 seconds
Combination piston/pull string for use in all types of conduit (IMC, EMT, PVC, rigid, etc.)

ROPE

TWISTED YELLOW POLYPROPELENE

Polypropylene rope is an extremely economical rope that is strong and lightweight. Polypropylene can be stored wet and is resistant to mildew, most chemicals, and marine organisms.

- Will not rot or mildew; resistant to acid & most chemicals
- Light weight 3 strand construction
- Economical, moderate elongation
- Excellent dielectric properties

IDC CONNECTORS

Available in a variety of contact styles for splicing telecom/telephone wiring, tapping existing wiring, or joining wires of different wire gauges, these connectors provide a moisture resistant barrier for reliable connections. Butt splice connectors are easy to use, and are ideal for many types of cable splicing. Operating temperature: -22°F to 158°F (-30°C to 70°C).

CARGO SECURITY

ROPE RATCHET TIE-DOWN

Each ROPE RATCHET is made super tough to take all the hard work you do. The outer casings are made from #6 - 33% Glass Filled Nylon with interior mechanisms of Die Cast Zinc. The rope is Solid Braided Polyester or Polypropylene and the hooks are Zinc Plated Steel.

With the ROPE RATCHET you simply attach the two hooks and pull the loose end of the rope for a secure, tight hold. ROPE RATCHETS stay tight, locking in place as you pull the free end. To loosen you just pull the rope to reduce tension and push the handy thumb release. It's that easy!

PART NO	DESCRIPTION	QTY PACK
CGRR-1408	1/4" RATCHET W/ 8FT ROPE	1
CGRR-3808	3/8" RATCHET W/ 8FT ROPE	1

RATCHET STRAPS

These durable ratchet tie downs feature a new comfortable ergonomic molded rubber grip. The webbing is UV treated for direct sun durability. The polyester webbing has very low elasticity for minimum tie-down stretching. All steel parts are heat treated for additional strength. Our ratchet tie downs have plenty of uses such as moving, travel, camping, building materials, power sports, motorcycles, ATV, 4x4, quad, trailer, mountain bikes, snowmobiles, scooters, lawnmowers, jet skis, boats and anything else under the sun that needs to be tied down and tightly secured.

TARP-1216	SILVER HD TARPAULIN 12FT X 16FT
TARP-1620	SILVER HD TARPAULIN 16FT X 20FT

SECURING YOUR LOAD WITH RATCHET STRAPS

Ratchet straps use a mechanically geared, slotted drum and a crank handle to tension the strap. Once the webbing is threaded through the slotted drum, the crank handle is used to take up the slack and tension the strap to the required level. The ratchet lever is then moved to the "closed position". It is crucial that there is at least one complete winding of the webbing around the drum since this type of mechanism relies on the friction between the wound layers of webbing to keep the webbing from slipping through the slot when under tension. Too many wraps of webbing around the drum may cause the mechanism to jam. Releasing the tension is a simple matter of pulling the center latch and moving the ratchet crank handle to the "open" position and pulling the webbing back through the slotted drum.

TOOLS AND SUPPLIES

CONDUIT BENDING LEVEL

This tool is indispensable if you want to bend precision offsets, saddles, and stubs without dog legs or wows. The "wow-watcher" or no-dog is constructed of Vertron, a space age material made of fiberglass and nylon compounds. This combination of materials provides a tough, yet lightweight tool. A thumb screw with a brass insert is used for securing the device to any type of conduit, in sizes 1/2" through 6". The precision straight bubble vial is used so the tool can accurately indicate level in all positions.

RECIPROCATING SAW BLADES

HSS bimetal saw blades are the correct choice where the material to be cut and the conditions of use subject the saw-blade to extreme stresses. The teeth of the saw blade are made of HSS steel whereas the spine is made of a softer and more elastic HCS steel. This combination of materials makes the HSS bimetal saw blades highly flexible and gives them high cutting performance and long service life at the same time.

TWIST DRILLS

FRACTIONAL – JOBBER LENGTH

118° ECONOMY BLACK OXIDE HSS

135° BLACK AND GOLD HSS

135° M35 COBALT STEEL

118° ECONOMY: Optimal for for drilling aluminum, die cast alloys and sheet metals. Wide flutes and high spiral are conducive of good chip removal and require less thrust than conventional drills.

135° BLACK AND GOLD: The self-centering split point eliminates walking for accurate hole location. Black and Gold surface treated for use in hardened steels, increasing abrasion resistance and increase chip flow.

135° COBALT: Made from M35 cobalt steel, our cobalt twist drills are manufactured to National Aerospace standard 907. These drill bits display high red hardness, permitting speeds up to 30% greater than with conventional M2 high speed steel, and are especially effective in drilling tough, high tensile strength materials like stainless steel, inconel, and titanium.

TWIST DRILLS

GATOR HIDE TWIST DRILL INDEX

Gator Hide contractor grade twist drill index, from Posi-tech, is the most durable drill bit index available today. Constructed from high impact plastic. Comes fully stocked with 29pcs.

- Shatterproof
- Weatherproof
- Convenient portability with molded belt clip

PART NO	DESCRIPTION
DBKJ-0290	118° HSS ECONOMY INDEX
DBKJ-0290-135	135° PREMIUM BLACK AND GOLD
DBKJ-0290-CO	135° COBALT

TWIST DRILL INDEX KITS

- Each storage hole precisely sized for accurate, quick drill selection
- Compact design for easy storage
- Corrosion resistant, epoxy baked on coating
- Secure, snap-lock steel cover
- Rugged, heavy gauge all-steel case

PART NO	DESCRIPTION
DBKJ-0130	118° HSS ECONOMY INDEX 1/16" - 1/4" X 64THS - 13PCS
DBKJ-0150	118° HSS ECONOMY INDEX 1/16" - 1/2" X 32NDS - 15PCS
DBKJ-1290	118° HSS ECONOMY INDEX 1/16" - 1/2" X 64THS - 29PCS

Our 115 pc index includes all of our fractional, letter and number jobber length twist drills. Available in both economy 118° and premium 135° Black and Gold.

PART NO	DESCRIPTION
DBKJ-0115	118° ECONOMY COMPLETE INDEX - 115PCS
DBKJ-0115-135	135° BLACK AND GOLD COMPLETE INDEX - 115PCS

270PC, 29 compartment counter display - available completely stocked with any one of our three standard jobber length twist drill series.

PART NO	DESCRIPTION

CUTTING TOOLS

AIRCRAFT LENGTH TWIST DRILL - 12"

Manufactured to National Aerospace Standard 907. 135° split point is self-centering and reduces thrust. Ideal for drilling in mild steels where extra length for reach is required. They have a black oxide surface treatment that is abrasion resistant, reduces chip welding and improves chip flow. Sizes smaller than #52 and 1/16 have the 118° standard point.

SIZE	PART NO	LENGTH

HAND TAPS - CARBON STEEL

Carbon Steel Hand Taps are used to re-thread damaged and/or jammed threads. Carbon Steel Hand Taps may also be used to thread mild steels.

Taper Style - Starts the thread square with the workpiece

Plug Style - Generally used in thru holes

Bottom style - Generates the thread to the bottom of the hole

MASONRY DRILLS

SMOOTH/ROUND SHANK

Engineered with wide flutes to provide fast dust removal in softer materials. Designed for drilling in brick, concrete, and sandstone. Carbide tips brazed to tough steel bodies and are larger than the nominal drill size to provide clearance for installation of anchor screws, expansion shields and toggle bolts. For use in portable electric drills.

NAIL BUSTER AUGER BITS

Nail buster auger drill bits are professional grade drill bits made to cut through nail-embedded wood. The drill bit comes with a self-feed screw point for fast drilling and are machined on a true center to prevent wobbling. A unique head makes it easy to resharpen.

CHOOSING THE RIGHT DRILL BIT FOR WOOD

When choosing the proper drill bit for attacking your wood project, there are several factors to be considered. For small holes, under 1/4", a HSS twist drill is suitable for most applications. For low volume, larger holes, the spade bit (also known as a paddle bit) is an excellent choice. This is an economical means to drill holes up to 1-1/2" in pine and other softwoods. For repeated and rapid hole making, the auger bit is superior in every respect and will make short work of most construction timber. Available up to 18" in length, auger bits are sold in standard steel and high-grade steel for use in nail embedded timber.

RIGID STRAPS

SNAP-ON ONE HOLE

Our snap on style, one-hole rigid straps are crafted from highly resilient, Zinc plated steel and feature an inverted rib for added strength. Easy to install and available in a variety of sizes to suit multiple applications. Available in 1/2" to 4" sizes; supports both IMC and Rigid conduit.

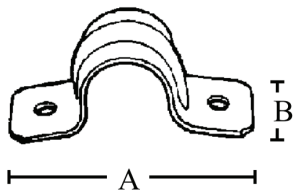

SIZE	ELECTRO GALVANIZED	316 STAINLESS	A	B

ANTI SHORT BUSHINGS

Orbit Industries' anti-short circuit bushings are used to create insulating barriers against sharp edges of flexible metal conduits that have been cut in the field. They protect wires passing through flexible metal conduits. The bushings snap in place on the cut edge of flexible metal conduits. They help prevent short circuits and rework. In addition, they help ensure wires are protected from damage.

PART NO	SIZE	FLEX SIZE

NMSC MULTICABLE STAPLES

- MultiCable Staples organize and secure multiple cable runs on a stud
- Secures NMSC, coaxial and CAT 5 all on the same staple
- Snap lock gate quickly and easily secures all cables
- Self-centering tab guides perfect placement on the stud
- Easy installation with one nail for wood studs or one screw for metal studs (fasteners included)
- Polypropylene material is flame retardant

Cable Combinations: (8) NM-B Flat 14-2 | (8) NM-B Flat 12-2 | (4) NM-B Flat 10-2
(2) NM-B Round 14-3 | NM-B Round 12-3 | (10) RG-59 | (8) RG-6 | (10) Cat-5

NM STEEL STAPLES

FOR USE WITH UF AND NMSC CABLES

Graphite Metallic Steel Staples are designed to secure NMSC cables. These straight-driving, burr free, steel staples feature sharper tips so the legs drive in straight without splitting wood and have recessed heads to protect cable jackets. Virtually oil-free for cleaner handling and engineered to contractor preferred length. Designed to be driven into wood with a hammer.

BEAM CLAMPS

ELECTRICIAN'S STYLE

Our heavy duty beam clamps feature single screw, two-hole assembly and are fabricated from high grade, long lasting malleable iron. Manufactured with precision to optimize functionality and dependability; jaw openings range from 3/4" to 1 1/8"; appropriate for load capacities from 125 to 600 LBS. Solid, malleable iron body will not distort or slip off beam when tightened.

ENCLOSURE HARDWARE

STEEL CONDUIT LOCKNUTS

POSI-TECH conduit locknuts are used to secure threaded conduits or connectors to electrical junction boxes or enclosures in wet locations. The conduit locknuts allow standard junction boxes to be used with unthreaded conduit knockout openings in wet locations. Serrated teeth on the locknut bite into the box and enclosure to prevent vibratory loosening of the connection.

SNAP-IN KNOCKOUT SEALS

POSI-TECH knockout seals are inserted into unused open box knockouts to protect exposed wires. They are used in standard, air tight or dust tight applications. POSI-TECH's snap in knockouts can seal, close and secure open knockout holes without removing box devices or covers.

CONCRETE ANCHORS

PIPE SPIKES™

The Pipe Spike is a, one-piece, vibration resistant anchor for use in concrete block or stone. Designed to suspend threaded rod and fasteners, the Pipe Spike anchor is formed with an “s” shaped configuration at the working end of the anchor to create an expansion mechanism. Since the anchor is pre-formed, there is no secondary tightening operation required which greatly reduces the overall cost of an anchor installation.

Applications where user does not have an SDS drill available, please refer to page 117 for smooth shank masonry drill bits.

TLDI / TLSI DROP-IN SETTING TOOL

MINI DROP-IN ANCHORS

The Mini Dropin is a carbon steel, machine bolt anchor for use in shallow embedment applications. Besides, solid concrete and hollow core concrete plank, it can be used in hard stone and solid block. It may also be used in overhead applications.

STOP BIT

Stop bits ensure proper drilling depth for drop-in anchors. This is especially important when drilling into post tension slabs. The 1.25" shoulder keeps user from over drilling. Fits all SDS+ Hammers

RAPIDSET® CALK-IN ANCHOR TOOL

- The fastest, easiest and most reliable way to install machine screw anchors (Calk-In™ Anchors)
- Power tool does all the work—no pounding with setting tools
- Put RapidSet® Installation Tool into power tool, trigger tool to rapidly spin anchor onto tool, insert into hole and trigger tool
- Eliminates the need for anchor to be bottom bearing, great for use in hollow block
- Automatically sets anchor just below the surface—no guessing on depth

LAG SHIELDS™

The Lag Shield™ is a screw style anchor designed for use with lag bolts. It is suitable for use in concrete and the mortar joints of block or brick walls. Lag Shield™ anchors are formed from Zamac alloy. In harder masonry materials, short style Lag Shields are used to reduce drilling time. The long style version is used in soft or weak masonry for improved strength.

CONCRETE ANCHORS

WEDGE ANCHORS

The Power-Stud+ SD1 anchor is a fully threaded, torque-controlled, wedge expansion anchor which is designed for consistent performance in cracked and uncracked concrete. Suitable base materials include normal-weight concrete, structural sand-lightweight concrete and concrete over metal deck. The anchor is manufactured with a zinc plated carbon steel body and expansion clip. Nut and washer are included.

PRE-CAST CONCRETE INSERTS FOR METAL SUBSTRATES

Bang-It concrete inserts are specifically designed to provide hanger attachments for mechanical, electrical, plumbing (MEP) and fire protection. Bang-It concrete inserts are designed for installation in and through composite steel deck (i.e. "pan-deck") used to support newly poured concrete floors or roof slabs. After installation, the protective sleeve of the insert protrudes below the surface of the deck. The sleeves are color coded by size and allow overhead attachment of steel threaded rod in sizes ranging from 1/4" to 3/4" in diameter. The sleeve prevents sprayed fireproofing material and acoustical dampening products from clogging the internal threads of the insert. It also prevents burying, masking or losing the insert location. A hex impact plate offers resistance to rotation within the concrete as a steel threaded rod is being installed.

ROD DIAMETER	COLOR	PART NO
1/4"	BROWN	BBMS-2500
3/8"	GREEN	BBMS-3700
1/2"	YELLOW	BBMS-5000

PRE-CAST CONCRETE INSERTS FOR WOOD SUBSTRATES

Wood-Knocker concrete inserts are specifically designed to provide hanger attachments for mechanical, electrical, plumbing (MEP) and fire protection. Wood-Knocker II concrete inserts are installed onto wooden forms used to support newly poured concrete floor slabs, roof slabs or walls. When the forms are stripped, the color-coded flange is visibly embedded in the concrete surface. The inserts allow the attachment of steel threaded rod or threaded bolts in sizes ranging from 1/4" to 3/4" in diameter. The hex impact plate offers resistance to rotation within the concrete as a steel threaded rod or threaded bolt is being installed.

WEDGE BOLT™

The Wedge-Bolt+ anchor is a one piece, heavy duty screw anchor with a finished hex head. It is simple to install, easy to identify and fully removable. The Wedge-Bolt+ has many features and benefits that make it well suited for many applications in a variety of base materials. The anchor is designed for consistent and reliable performance in cracked and uncracked concrete.

PINS

Drive pins with a 0.300" diameter head are designed for permanently fastening a fixture to concrete, some types of masonry and A36 or A572 structural steel. Drive pins are manufactured with a 0.145" diameter shank in various lengths. A plastic flute is mounted over the point to retain the drive pin in the fastener guide of the tool providing guidance during the driving operation.

POWDERLESS PINS

Hammer Drive pins are designed for permanently fastening a fixture to concrete and some types of masonry. This fastener is designed for use in a standard hand tool and should not be used in a powder actuated tool. The pins are formed with a 1/4" diameter head on one end and a 0.140" diameter shank in various lengths. A 3/8" diameter steel washer is mounted over the point to retain the drive pin in the fastener guide of the tool providing guidance during the driving operation. The fastener is recommended for light duty static load applications where holding power is not a critical factor. It should not be used overhead.

HOLLOW WALL ANCHORS

SNAPTOGGLES™

The SNAPTOGGLE anchor is a heavy-duty hollow wall anchor for use in walls, ceilings, or floors of materials such as gypsum board or drywall. The anchor is pre-assembled and ready for immediate use. The ratcheting strap and locking cap assembly positions the one-piece zinc-plated (or stainless) steel anchoring channel flush against the rear of the wall. The cap slides down the straps to lock flush against the front of the wall. The straps on the outside of the wall are then easily and quickly snapped off by hand flush with the surface of the wall (no extra tools required).

Now available with 2-1/2" screws included on 3/16" and 1/4"

PLASTIC TOGGLES

Plastic Toggle anchors ideal for static applications requiring light to medium load performance. Installation is very fast, needing a pre-drilled 5/16" diameter hole. The fastener pre-installs without a screw, allowing for easy placement and removal of the fixture. Pop-Toggle™ fasteners are not recommended for use overhead or applications where holding values are critical.

EASY DRYWALL ANCHORS

- No pre-drilling necessary - drills directly into drywall even if you hit a wood stud.
- Starts easier than other self-drilling drywall anchors
- A superior alternative to traditional plastic plugs and mollies.
- Each kit includes 50 anchors and 50 pan head slot/phillips combo sheet metal screws

WALL ANCHORS

HAMMER SCREW™ ANCHORS

The Zamac Hammer-Screw® is a unique, one-step drive anchor featuring a Phillips type head and a screw thread for use in concrete, block, brick or stone. With a body formed from corrosion resistant Zamac alloy and a carbon or stainless steel drive screw, this anchor has been developed by Powers as an improvement over standard nail-in anchors.

WALL ANCHORS

CONICAL ANCHORS

Conical wall anchors are a plastic anchor designed for use with lightweight fixtures using a sheet metal or wood screw. The anchor is recommended for light duty static applications where holding power is not a critical factor. Ideal for masonry, block and stucco wall applications. It should not be used overhead.

SHARKIE™ SELF-MOLDING ANCHORS

The Sharkie wall anchor is engineered for strength - the screw extrudes and compresses the anchor polymer into the wall under tremendous pressure. The anchor molds and conforms exactly to the surface of the hole. All of the forces supported by the screw are transmitted outwardly 360° providing greater holding power by distributing the force over the maximum area possible.

SHEET METAL SCREW

HEX WASHER HEAD

AVAILABLE IN

Sheet metal screws, known technically as tapping screws (not to be confused with self-drilling), have sharp threads that cut (or thread) into materials such as plastic, plexi glass, wood, and sheet metal. They are also recommended for use with Conical and Easy Wall Anchors. They make excellent fasteners for attaching metal hardware to wood because the fully threaded shank provides good retention in wood.

SELF-TAPPING VS SELF-DRILLING

It can be a confusing conversation, self tapping, tapping, self-drilling...customers ask for one thing when they mean another. Our sheet metal screw is technically known as a tapping screw, where the sharp end is inserted through an existing hole or penetrates thin sheet metal and "taps" threads as a means of fastening to the material. Alternatively, a self-drilling screw (often referred to as a Tek™ screw), has a hardened drill point ranging from #2 through #5 in length for varying gauges of material.

SELF-DRILLING SCREWS

HEX WASHER HEAD #2 - #3 POINT

AVAILABLE IN

CONTRACTOR
BUCKETS

Self-Drilling Screws eliminate the need for a pre-drilled hole. New and Improved design provides up to 30% faster drill times and less kick-out.

Available in zinc plated and 410 stainless steel.

FLAT HEAD PHILLIPS DRIVE

Machine screws are used with nuts or screwed directly into a threaded nut or insert to fasten metal parts together. If nuts are needed, use with nuts of the same finish and threading for proper fit.

Listed lengths are measured from the top of the head.

HEX CAP SCREWS

Hex Head Cap Screws, are bolts with a hexagonal or six sided head. Hex cap screws feature a washer surface directly under the head which creates a better seal and a chamfered tip for an easier insertion from different angles.

HEX NUTS

MACHINE SCREW NUTS

AVAILABLE IN

Hex machine screw nuts are used for fastening to a bolt when mechanically joining materials together. This type refers to nuts used with smaller machine screw sizes under 1/4". Machine screw nuts are designed to be used with machine screws.

WASHERS

USS FLAT WASHERS

Washers are typically used to bear the load of a threaded fastener, often a screw or a nut. United States Standard or USS Flatwashers were developed to satisfy engineering requirements in the majority of industrial applications in all fields of manufacturing, maintenance and repair. No. 6 and No. 8 available as SAE only.

FENDER WASHERS

A fender washer, though similar in shape to a standard washer, differs in that the outside diameter is traditionally much larger in proportion to the center hole. With this design, a fender washer can be placed under the head of a bolt or nut to help distribute forces applied when tightening.

SPLIT LOCK WASHERS

The "Split" in the helical spring lock washer absorbs initial driving torque and visually closes under nominal bolt loading. When tension in the assembly is reduced and loosening occurs, it provides resistance to the back-off rotation of the screw

WASHERS

SERRATED TOOTH LOCK WASHERS

External Tooth Lock Washers or external lockwashers provide maximum torsional resistance. These lock washers work best with large head screws such as pan, truss and washer heads.

BELLVILLE CONICAL SPRING WASHERS

Belleville Washers are disks of metal that are formed in an conical shape so that when the washer is loaded, it deflects, acting like a spring, providing a preload between two surfaces. These washers also provide continual pressure in the presence of vibration or thermal expansion, lessening the chances of decoupling..

NEOPRENE BONDED WASHERS

Bonded washers or sealing washers are used in applications that require a stronger seal than conventional washers might provide. Bonded washers are slightly conical metal washers with a bonded neoprene or EPDM rubber backing. They are available in steel and stainless steel and in a range of sizes.

WIRE SIZE EQUIVALENCY CHART

When sizing compression lugs for flex, DLO and welding cables, the diameter varies from that of standard building wire. The chart below will help you to find the equivalent wire size for proper lug fitment. Always check manufacturer specifications for proper termination directions and follow all safety guidelines.

CLASS B&C BUILDING WIRE	FLEX CABLE	WELDING CABLE	DLO
8 AWG	8 AWG	----	----
6 AWG	6 AWG	----	----
4 AWG	----	----	----
3 AWG	4 AWG	4 AWG	4 AWG

Manufacturer Warranty

Positive Technologies, Inc. (Posi-tech) warrants products to be free from defects in workmanship and material for a period of one year from the date of delivery to the purchaser buying direct from Positive Technologies, Inc. or it's authorized distributor. This warranty includes, but is not limited to, those products manufactured to a specification supplied by the purchaser. Any defects appearing more than one year from the date of delivery to the purchaser shall be deemed wear and tear. Positive Technologies, Inc. assumes no risk or liability for the suitability or unsuitability or results of the use of its products used in combination with any electrical or electronic components, circuits, systems, mechanical devices, construction projects, assemblies, or any other material or substances or environments. The purchasers right under this warranty shall consist solely of requiring Positive Technologies, Inc. to repair, or in Positive Technologies, Inc.'s sole discretion, replace, free of charge, FOB factory, any defective items received at it's factory within said year, as determined by Positive Technologies, Inc., to be defective.

All products to be returned to Positive Technologies, Inc., For evaluation under this warranty shall first receive return authorization from Positive Technologies, Inc. All products returned without authorization may be returned at senders expense. The failure to give, or the giving of any advice or recommendations by Positive Technologies, Inc. shall not constitute any warranty by, or impose any liability upon Positive Technologies, Inc.. The sole and exclusive remedy of the purchaser and the exclusive liability of Positive Technologies, Inc., are outlined and stated above, and is in lieu of any and all other warranties expressed, implied, or statutory as to merchantability, fitness for the purpose sold, description, quality, productiveness, or any other matter. In no event shall Positive Technologies, Inc. be liable for consequential or special damages, or for the delay in the performance of this warranty.

The information contained within this catalog and the functions offered are intended to provide information about products available for purchase from Positive Technologies, Inc. All reasonable efforts have been made to ensure the accuracy of the information. Positive Technologies, Inc. cannot be held responsible for any errors or unexpected un-fulfillment of shipments. Positive Technologies, Inc. does not warrant the accuracy and reserves the right to make changes to the catalog and at any time without notice.
