A NOTE TO OUR READERS . . .

Because funds are limited, we are very grateful for your donations, as well as your recommendations to your publishers to forward review copies to the Editor. In addition to being listed here, all English-language titles accepted for the collection will be considered for inclusion in the NLM Catalog database, augmented at the Kennedy Institute of Ethics by contract with the National Library of Medicine. Your efforts to support this publication and the dissemination of bioethics information in general are sincerely appreciated.

NEW TITLES IN BIOETHICS is published four times per year (quarterly) by the National Reference Center for Bioethics Literature, Kennedy Institute of Ethics both as a print and electronic version (<http://bioethics.georgetown.edu>) beginning with 2004. An annual Cumulation is published in the following year as a separate print publication. In addition, NEW TITLES IN BIOETHICS data is included annually in the BIBLIOGRAPHY OF BIOETHICS. NEW TITLES IN BIOETHICS is a listing by subject of recent additions to the National Reference Center's collection. (The subject classification scheme is reproduced in full with each issue; it can also be found at the end of the cumulated edition.) With the exception of documents in the section New Publications from the Kennedy Institute of Ethics, materials listed herein are not available from the National Reference Center. They are often available directly from the publishers listed in each citation.

Subscription to the print edition of NEW TITLES IN BIOETHICS is \$25.00 per calendar year in the U.S., Canada, and Mexico, and \$35.00 elsewhere. Back volumes are available at \$20.00 per volume in the U.S., Canada and Mexico, \$25.00 per volume elsewhere. All orders must be prepaid. Note: Beginning in January 2006, NEW TITLES IN BIOETHICS quarterly issues will only be available online at: <http://bioethics.georgetown.edu>. Annual cumulations will no longer be available as a separate publication, but will be included in each annual volume of the BIBLIOGRAPHY OF BIOETHICS, published each September.

This publication has been funded in whole or in part with Federal funds from the National Library of Medicine, National Institutes of Health, Department of Health and Human Services, under Contract No. HHSN276200553501 [and] Grant No.

P41 HG01115 from the National Human Genome Research Institute, National Institutes of Health. The items cited are provided in part by the grant and contract noted above, as well as by the National Endowment for the Humanities, the Anderson Partnership, the Kampelman Collection of Jewish Ethics, and the publishers and individual donors noted.

Kilcannon's choice is a female judge with a brilliant record. And a secret. While the Senate spars over Caroline Master's nomination, an inflammatory abortion rights case is making its way toward the judge—and will explode into the headlines. Suddenly, the most divisive issue in America turns the president's nomination into all-out war. And from Judge Masters to a conservative, war-hero senator facing a crisis of conscience and a fifteen-year-old girl battling for her future, no one will be safe.") As young women, Darla and Jo enter into an agreement that will change their lives: Joanne agrees to give birth to the child that Darla cannot have on her own. Then early on a warm July morning, Joanne, four months pregnant, suffers a devastating car accident. For the first time in memory, Darla must face the possibility of life without Jo. As Darla struggles to understand why her distressed friend was out driving in those dark morning hours, she must also fight to keep the baby that was intended to be her child. In the process, she discovers the truths that hide in her own life—in her marriage, in her closest friend-

Gilman, Charlotte Perkins. THE CRUX. Durham, [NC]: Duke University Press, 2003, 1911. ISBN 0-8223-3167-5. ("Long out of print, Charlotte Perkins Gilman's novel *The Crux* is an important early feminist work that brings to the fore complicated issues of gender, citizenship, eugenics, and frontier nationalism. First published serially in the feminist journal *The Forerunner* in 1910, *The Crux* tells the story of a group of New England women who move west to start a boardinghouse for men in Colorado. The innocent central character, Vivian Lane, falls in love with Morton Elder, who has both gonorrhea and syphilis. The concern of the novel is not so much that Vivian will catch syphilis, but that, if she were to marry and have children with Morton, she would harm the "national stock". The novel was written, in Gilman's words, as a "story...for young women to read...in order that they may protect themselves and their children to come." What was to be protected was the civic imperative to produce "pureblooded" citizens for a utopian ideal.") [PS1744 .G57 C78 2003] (15.5; 10; Fiction)

WGBH Boston Video. *CRACKING THE CODE OF LIFE: THE RACE TO DECODE HUMAN DNA*. South Burlington, VT: NOVA/WGBH Boston Video, 2001. 1 color videocassette (VHS). (120 mins.). (NOVA series [WGBH Boston]. Program aired 17 April 2001. "Does it amaze you that yeast is your very close relative? That you possess roughly the same number of genes as a mouse? That you are 99.9% genetically identical to every other human? ABC Nightline correspondent Robert Krulwich lends a lighthearted touch to genetic science in this provocative two-hour NOVA special that takes you inside the amazing, complex and contentious race to decode the human genome. The Human Genome Project was born in 1990, when an international consortium of labs set out to sequence all 3 billion letters of our DNA, predicting they'd finish by 2005. Halfway though their schedule, controversial scientist and entrepreneur J. Craig Venter threw the genome world into turmoil when he announced his for-profit company Celera could finish the job in just two years. Francis Collins, leader of the publicly-funded effort, and MIT's Eric Lander were among the scientists who answered Venter's challenge. The result made history and laid the foundation for a remarkable future. Armed with this powerful information, medical pioneers are in the midst of astonishing breakthroughs that will change medicine as we know it. Will you get cancer, arthritis, or Alzheimer's? The answer lies in your genetic code—but the question is: Do you want to know? And will these new discoveries eventually lead to cures?" Multiple murderess Rachel Solando is loose somewhere on this remote and barren island, despite having been kept in a locked cell under constant surveillance. As a killer hurricane bears relentlessly

down on them, a strange case takes on even darker, more sinister shades—with hints of radical experimentation, horrifying surgeries, and lethal countermoves made in the cause of a covert shadow war. No one is going to escape Shutter Island unscathed, because nothing at Ashecliffe Hospital is what it seems. But then neither is Teddy Daniels.") ("In this comic tour de force, David Gilbert recounts the travails of Billy Schine, a semiprofessional temp worker who decides to escape his debt-ridden New York City life by enrolling in a human drug testing study. The boredom of the research center is broken only by twice-daily appointments with pills and needles, but even so, Billy finally feels at home. He and his fellow test subjects trade battle stories from the healing fields of guinea pig, and Billy finds himself rested and well fed and possibly in love with the lone female in the study. Then the messy side effects hit, and Billy's normal world is turned upside down, the real and unreal merging until spilled blood becomes the only proof of a beating heart.")
