INTRODUCTION

Preparation of the First Supplement

Many of the citations listed in the bibliography were obtained from the publication: Kukowski, Gary E. CHECKLIST OF THE FISHES OF THE MONTEREY BAY AREA INCLUDING ELKHORN SLOUGH, THE SAN LORENZO, PAJARO AND SALINAS RIVERS, Moss Landing Marine Laboratories' Technical Publication 72-2. Published scientific papers which are contributions of the Moss Landing Marine Laboratories, technical publications of the Laboratories and publications which have been received in the library which deal with the Central California Coast have been included. Citations were located, also, with the cooperation of Mr. Alan Baldrige, Librarian, Hopkins Marine Station, Pacific Grove and from interested users of the original bibliography who sent references which they believed were valuable enough to be included in the supplement. OCEANIC INDEX (issues 1969, No. 4 through 1971, No. 6) was the only source searched systematically for pertinent citations.

Dr. John Phillips, Director of Hopkins Marine Station, assumed the responsibility for the preparation of the punch cards for the printing of this bibliography. He developed the key punch procedures and programs used in printing the first edition and the supplement.

In the bibliography the main geographical area covered is the Central California Coast from Morro Bay to Tomales Bay. It includes the bordering land areas in addition to the ocean and bays.

The Library of Congress classification schedules, with judicious additions and deletions, were used for the subject arrangement of citations. Two major exceptions to the Library of Congress system were adopted: the systematic divisions for the section on Zoology were

adapted from GENERAL ZOOLOGY, by Tracy I. Storer and Robert L. Usinger, 4th ed., New York, McGraw Hill, 1965, and from A LIST OF COMMON AND SCIENTIFIC NAMES OF FISHES FROM THE UNITED STATES AND CANADA, by the American Fisheries Society, Committee on Names of Fishes, 2d ed., Ann Arbor, Michigan, 1960.

Since many of the publications were not available for direct examination at the time that subject assignments were made, some may have been improperly assigned. We will correct these and other errors in subsequent supplements and revisions. Also it must be stressed that the enormity of the task and the limitations of our manpower resources permitted only incomplete search procedures. Thus many omissions certainly have occurred.

We request assistance from users of this bibliography in making corrections and additions for inclusion in our supplements and eventual incorporation into a major revision. Please send your recommendations to:

Guidelines

The Table of Contents is a list of all subject headings used in this bibliography. Cross reference notes are included directly after the subject headings in the Table of Contents and are repeated in the main body of the bibliography.

The Author Index is arranged alphabetically giving date of publication and citation number which identifies the entry in the bibliography.

On the first line of a bibliography citation, one or more code letters may follow the author and year of publication. These represent a library or libraries in which the publication is available. The symbols used are:

- B - University of California, Berkeley
- H - Hopkins Marine Station
- J - San Jose State College
- M-- Moss Landing Marine Laboratories
- N - U.S. Naval Postgraduate School, Monterey
- S - Stanford University

On the author line of each citation the identification number will be found at the far right. These numbers are in ascending order but are not consecutive and are used to refer from the Author Index.

The names of journals have been abbreviated according to BIOLOGICAL ABSTRACTS LIST OF SERIALS WITH WORD ABBREVIATIONS. Directly following the journal abbreviations, and always in the same order, are numerals indicating volume, issue, and inclusive pages.

If it is known that the publication contains information specific to Monterey Bay, the following statement is appended to the citation: "Monterey Bay Information Included".

TABLE OF CONTENTS

GEOLOGY 1
 includes MINERAL STUDIES OF BEACH SAND
