Response to the State of Utah for WSCA-NASPO Master Agreement for Data Communications Products and Services from Hewlett-Packard Company

30 August 2013

Solicitation JP14001

Hewlett-Packard Company 3000 Hanover Street Palo Alto, CA 94304-1185 www.hp.com

30 August 2013

Jennifer Porter State of Utah Division of Purchasing and General Services State Office Building, Capitol Hill, Room 3150 Salt Lake City, UT 84114-1061

Rob Courtney SLED Executive Account Manager Tel.: 937.604.4704 robert.courtney@hp.com

Veronica Mendez SLED Contract Program Manager Tel: 650.258.2822 veronicam@hp.com Dear Ms. Porter:

Hewlett-Packard Company (HP) is pleased to have the opportunity to respond to the State of Utah WSCA Datacom Network Hardware and Services RFP. The proposed HP networking products are high quality, high performance, and can help the State of Utah (and any other states that use this contract) achieve enhanced productivity, obtain substantial cost savings over other network vendors and realize greater agility to deploy applications on the network. Key differentiators of the proposed HP networking solution include:

- Lower cost of ownership: The proposed HP networking products, featuring industry-leading warranty, are engineered for high reliability to industry standard specifications.
 HP recently announced enhancements to our industry leading perpetual warranty by including 3 years of software support and 7x24x365 call center support for our customers.
- Product lifecycle management: Our team will work with you to ensure that you are
 informed of product roadmaps and are able to address end-of-life product issues in a
 proactive fashion. This will enable the State of Utah to maintain a consistent and
 predictable network infrastructure.
- End-to-end solution: HP can deliver world-class networking products, network security and technology services for installation / implementation and warranty / maintenance.

HP is committed to the State of Utah's success and is confident that our solution addresses your critical business requirements and the needs of other states that use this contract. We look forward to meeting with you to review our capabilities, to discuss the benefits of our proposed solution and to explore the next steps in creating a strong and mutually beneficial business relationship.

Sincerely,

Rob Courtney

SLED Executive Account Manager

Veronica Mendez

Executive Summary

Hewlett-Packard Company (HP) appreciates the opportunity to present the State of Utah (the State) with an HP networking solution in response to the WSCA-NASPO Master Agreement for Data Communications Products and Services RFP. HP understands the technical and business requirements of the state of Utah and this proposal response will demonstrate the depth of HP's expertise as a world-class network solution provider. The proposal will highlight a comprehensive HP networking product portfolio that includes competitively priced, fully featured Ethernet switches, routers, wireless LAN (WLAN), and security products and services that will meet your business needs. HP has an industry-leading lifetime warranty on most of our networking hardware products, which was recently upgraded to include 3 years of software support and 3 years of 7x24x365 helpdesk support at no additional cost. In addition, HP offers the State of Utah the flexibility to choose higher levels of support (including maintenance and installation), if desired, through HP CarePacks and Technology Services, all included in this response. If the State of Utah desires to contract for project management or consulting services, these are also available through contracted professional services purchased from HP Services or authorized HP subcontract partners to this contract.

Meeting Business Requirements

HP has created a global networking powerhouse and is changing the rules of networking. HP is raising the bar through innovation to deliver a differentiated portfolio of edge to core and data center networking solutions and wireless networking solutions complemented by global service and support capabilities. This expanded portfolio delivers best-in-class solutions that enable clients to harness the power of convergence and accelerate business growth at a lower total cost of ownership. In research and advisory firm Gartner Inc.'s Magic Quadrant for Enterprise LAN (Global), Published: 8 August 2011, Analyst(s): Mark Fabbi, Tim Zimmerman, HP is one of two vendors positioned in the Leaders quadrant. In Gartner Inc.'s Magic Quadrant for the Wired and Wireless LAN Access Infrastructure, Published: 13 June 2012, HP is one of only three vendors positioned in the Leaders quadrant. Please refer to the Magic Quadrants in the figures in our response to Section 4.1 for more information.

HP is in a unique position to deliver on the promise of the Converged Infrastructure, with advanced technology, broad innovation, unparalleled expertise in technology services and enterprise services, and our broad partner ecosystem. The State of Utah (and others states who sign to use the Participating Addendum to the State of Utah contact) can realize the following benefits with an HP networking solution:

- A leader in technology innovation A networking technology innovator for over 40 years, HP
 continues to pioneer customer-centric solutions including software-defined networking (SDN),
 bring your own device (BYOD), and virtualization.
- We simplify the network HP FlexNetwork simplifies and flattens data center and campus networks, increasing performance and reducing latency. And HP Intelligent Management Center (IMC) single pane-of-glass management provides a single control point for HP and multivendor legacy wired and wireless networks.
- Lower TCO Architectural efficiencies, industry-leading warranties, and energy-conscious
 design drive cost reduction. As a result, HP customers can realize total cost of ownership (TCO)
 savings of almost 66 percent across all aspects of their operations (Annual networking costs per
 user, IDC, 2010)

¹ Gartner does not endorse any vendor, product or service depicted in its research publications, and does not advise technology users to select only those vendors with the highest ratings. Gartner research publications consist of the opinions of Gartner's research organization and should not be construed as statements of fact. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

- Global services and support—Leverage HP Services to design, implement, and optimize your networking solutions. Our engineering support across networking, servers, software, and storage help ensure that your customers' business is always up and running.
- Open standards-based networking HP facilitates incremental migration and leverages the
 existing expertise of trained network engineers and partners. HP allows customer-focused
 innovation and interoperability instead of vendor lock-in, allowing a choice of best-in-class
 products and solutions with each purchase.
- Best- in-class solutions working with industry-leading partners ("HP AllianceONE") HP solutions have been pretested and configured to run either within the network fabric infrastructure or by way of dedicated platforms. These include Unified Communications and Collaboration (UC&C) partners like Microsoft, Avaya, and Aastra, application delivery partners, like Riverbed and F5, and a variety of security partners for fast time-to-value.

Meeting RFP Requirements

HP meets or exceeds ALL of the requirements of this RFP, just as HP has done for more than 5 years on the existing WSCA Data Com contract. Since being awarded the contract, HP has improved our position in the Gartner Magic Quadrant and improved upon our industry leading warranty and global support. HP will continue to provide the State of Utah and all other participants with a world-class product / solution set for your networking requirements, along with the industry's best warranty and support for our networking products. Finally, HP will do all this with an industry low total cost of ownership.

Closing

The following RFP response takes into consideration all the core values and general goals of our customer base. Our relationship with our customers is second to none in the industry. We provide advanced functionality at affordable prices, and we will anticipate the future needs of the State of Utah. We commit to providing flexible and easy to use products which interoperate easily with other manufacturers' products in the industry.

HP simply provides a partnership unlike any other in the network community.

Request for Proposal - Instructions and General Provisions

1. SUBMITTING THE PROPOSAL: (a) The Utah Division of Purchasing and General Services (DIVISION) prefers that proposals be submitted electronically. Electronic proposals may be submitted through a secure mailbox at BidSync (formerly RFP Depot, LLC) (www.bidsync.com) until the date and time as indicated in this document. It is the sole responsibility of the supplier to ensure their proposal reaches BidSync before the closing date and time. There is no cost to the supplier to submit Utah's electronic proposals via BidSync. (b) Electronic proposals may require the uploading of electronic attachments. The submission of attachments containing embedded documents is prohibited. All documents should be attached as separate files. (c) If the supplier chooses to submit the proposal directly to the DIVISION in writing: The proposal must be signed in ink, sealed, and delivered to the Division of Purchasing, 3150 State Office Building, Capitol Hill, Salt Lake City, UT 84114-1061 by the "Due Date and Time." The "Solicitation Number" and "Due Date" must appear on the outside of the envelope. All prices and notations must be in ink or typewritten. Each item must be priced separately. Unit price shall be shown and a total price shall be entered for each item offered. Errors may be crossed out and corrections printed in ink or typewritten adjacent and must be initialed in ink by person signing offer. Unit price will govern, if there is an error in the extension. Written offers will be considered only if it is submitted on the forms provided by the DIVISION. (d) Proposals, modifications, or corrections received after the closing time on the "Due Date" will be considered late and handled in accordance with the Utah Procurement Rules, section R33-3-209. (e) Facsimile transmission of proposals to DIVISION will not be considered.

Response:

HP has read and acknowledges.

2. PROPOSAL PREPARATION: (a) Delivery time of products and services is critical and must be adhered to as specified. (b) Wherever in this document an item is defined by using a trade name of a manufacturer and/or model number, it is intended that the words, "or equivalent" apply. "Or equivalent" means any other brand that is equal in use, quality, economy and performance to the brand listed as determined by the DIVISION. If the supplier lists a trade name and/or catalog number in the offer, the DIVISION will assume the item meets the specifications unless the offer clearly states it is an alternate, and describes specifically how it differs from the item specified. All offers must include complete manufacturer's descriptive literature if quoting an equivalent product. All products are to be of new, unused condition, unless otherwise requested in this solicitation. (c) Incomplete proposals may be rejected. (d) Where applicable, all proposals must include complete manufacturer's descriptive literature. (e) By submitting the proposal the offeror certifies that all of the information provided is accurate, that they are willing and able to furnish the item(s) specified, and that prices offered are correct. (f) This proposal may not be withdrawn for a period of 60 days from the due date.

Response:

HP has read and acknowledges.

HP helps customers adapt to the changing needs of their business by delivering a choice of high performance networking products and solutions that are open, interoperable, centrally managed and offer low total cost of ownership. Our complete portfolio is engineered to legendary HP quality standards - backed by our service, support, training and industry-leading warranty. Complete manufacturer's descriptive literature is provided at http://h17007.www1.hp.com/us/en/networking/index.aspx.

3. FREIGHT COST: Suppliers are to provide line item pricing FOB Destination Freight Prepaid. Unless otherwise indicated on the contract/purchase order, shipping terms will be FOB Destination Freight Prepaid.

Response:

HP has read and acknowledges.

4. SOLICITATION AMENDMENTS: All changes to this solicitation will be made through written addendum only. Answers to questions submitted through BidSync shall be considered addenda to the solicitation documents. Bidders are cautioned not to consider verbal modifications.

Response:

HP has read and acknowledges.

5. PROTECTED INFORMATION: Suppliers are required to mark any specific information contained in their offer which they are claiming as protected and not to be disclosed to the public or used for purposes other than the evaluation of the offer. Each request for non-disclosure must be made by completing the "Confidentiality Claim Form" located at: http://www.purchasing.utah.gov/contract/documents/confidentialityclaimform.doc with a specific justification explaining why the information is to be protected. Pricing and service elements of any proposal will not be considered proprietary. All material becomes the property of the DIVISION and may be returned only at the DIVISION's option.

Response:

HP has read and acknowledges.

6. BEST AND FINAL OFFERS: Discussions may be conducted with offerors who submit proposals determined to be reasonably susceptible of being selected for award for the purpose of assuring full understanding of, and responsiveness to, solicitation requirements. Prior to award, these offerors may be asked to submit best and final offers. In conducting discussions, there shall be no disclosure of any information derived from proposals submitted by a competing offeror.

Response:

HP has read and acknowledges.

7. SAMPLES: Samples of item(s) specified in this offer, brochures, etc., when required by the DIVISION, must be furnished free of expense to the DIVISION. Any item not destroyed by tests may, upon request made at the time the sample is furnished, be returned at the offeror's expense.

Response:

HP has read and acknowledges.

8. AWARD OF CONTRACT: (a) The contract will be awarded with reasonable promptness, by written notice, to the responsible offeror whose proposal is determined to be the most advantageous to the DIVISION, taking into consideration price and evaluation factors set forth in the RFP. No other factors or criteria will be used in the evaluation. The contract file shall contain the basis on which the award is made. Refer to Utah Code Annotated 65-56-408. (b) The DIVISION may accept any item or group of items, or overall best offer. The DIVISION can reject any or all proposals, and it can waive any informality, or technicality in any proposal received, if the DIVISION believes it would serve the best interests of the DIVISION. (c) Before, or after, the award of a contract the DIVISION has the right to inspect the offeror's premises and all business records to determine the offeror's ability to meet contract requirements. (d) The DIVISION will open proposals publicly, identifying only the names of the offerors. During the evaluation process, proposals will be seen only by authorized DIVISION staff and those selected by DIVISION to evaluate the proposals. Following the award decision, all proposals become public information except for protected information (see number 5 above). A register of proposals and contract awards are posted at http://purchasing.utah.gov/vendor/bidtab.html. (e) Estimated quantities are for bidding purposes only, and not to be interpreted as a guarantee to purchase any amount. (f) Utah has a reciprocal preference law which will be applied against

offerors offering products or services produced in states which discriminate against Utah products. For details see Section 63G-6-404 and 63G-6-405, Utah Code Annotated. (g) Multiple contracts may be awarded if the DIVISION determines it would be in its best interest.

Response:

HP has read and acknowledges: (a), (b), (d), (e), (f), and (g). (c) HP understands the State's desire to inspect HP's property. HP respectfully requests that this requirement be applicable after award and contract execution and limit the records to those directly pertinent to invoicing and payment pursuant to the subsequent contract. Further, HP will not be required to provide confidential or proprietary records, such as but not limited to cost data and other confidential information.

9. DEBRIEFING OF UNSUCCESSFUL OFFERORS: State Purchasing does not conduct face to face or teleconference debriefings. All debriefings are to be conducted in writing. A debrief request must be submitted in writing to the Purchasing Agent within seven (7) calendar days of the award notification or rejection notification made through written correspondence or posted on BidSync. The debrief response will be limited to critiquing the strength/weakness of an offeror's proposal based on the evaluation criteria. The debriefing is intended as a courtesy to offerors, providing feedback to be used for future opportunities. Comparisons between proposals or evaluations of other proposals will not be allowed.

Response:

HP has read and acknowledges.

10. DIVISION APPROVAL: Contracts written with the State of Utah, as a result of this proposal, will not be legally binding without the written approval of the Division.

Response:

HP has read and acknowledges.

11. DEBARMENT: The CONTRACTOR certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction (contract) by any governmental department or agency. If the CONTRACTOR cannot certify this statement, attach a written explanation for review by the DIVISION.

Response:

HP has read and acknowledges.

12. ENERGY CONSERVATION AND RECYCLED PRODUCTS: The contractor is encouraged to offer Energy Star certified products or products that meet FEMP (Federal Energy Management Program) standards for energy consumption. The State of Utah also encourages contractors to offer products that are produced with recycled materials, where appropriate, unless otherwise requested in this solicitation.

Response:

HP has read and acknowledges.

13. GOVERNING LAWS AND REGULATIONS: All State purchases are subject to the Utah Procurement Code, Title 63 Chapter 56 U.C.A. 1953, as amended, and the Procurement Rules as adopted by the Utah State Procurement Policy Board. These are available on the Internet at www.purchasing.utah.gov. By submitting a bid or offer, the bidder/offeror warrants that the bidder/offeror and any and all supplies, services equipment, and construction purchased by the State shall comply fully with all applicable Federal and State laws and regulations, including applicable licensure and certification requirements.

Response:

14. SALES TAX ID NUMBER: Utah Code Annotated (UCA) 59-12-106 requires anyone filing a bid with the state for the sale of tangible personal property or any other taxable transaction under UCA 59-12-103(1) to include their Utah sales tax license number with their bid. For information regarding a Utah sales tax license see the Utah State Tax Commission's website at www.tax.utah.gov/sales. The Tax Commission is located at 210 North 1950 West, Salt Lake City, UT 84134, and can be reached by phone at (801) 297-2200.

Response:

HP has read and acknowledges. HP's tax ID in the State of Utah is 11839922 002 STC.

Section 1: WSCA-NASPO Solicitation General Information

1.1 Purpose of Request for Proposal (RFP)

The State of Utah, Division of Purchasing is requesting proposals in conjunction with WSCA-NASPO Cooperative Purchasing Organization, LLC (WSCA-NASPO). The purpose of this request for proposal is to establish master agreements with qualified manufacturers to provide Data Communications products and services outlined in the specifications for all participating States. The services resulting from the award of this solicitation are to be available to all state entities, cities, counties, higher education, school districts and other political subdivisions on an as needed basis under the same pricing and terms and conditions agreed to in the Master Agreement.

It is anticipated that this RFP may result in Master Agreement awards to multiple contractors.

While the primary purpose of this solicitation is to select a proposer(s) who can offer the Products or Services for all Participating States, proposers are permitted to submit a proposal on more limited geographical areas, but not less than one entire Participating State. Proposers must clearly describe the geographical limits (e.g. by State name) if proposing a geographical area less than that of all Participating States. However, if a proposer elects to submit a Proposal for a single State then the proposer must be willing to supply the entire State and will not be allowed to add additional States following award or at any time during the term of the contract or any renewals.

A Participating State may evaluate and select a proposer for award in more limited geographical areas (e.g. A single state) where judged to be in the best interests of the State or States involved.

Each participating entity shall select the authorized contractor(s) they choose to do business with during the participating addendum process. A participating entity may require the authorized contractor(s) to submit additional information regarding their firm as part of the selection process during the execution of a participating addendum. This information could include, but is not limited to; partners or resellers approved under their PA, business references, number of years in business, technical capabilities, and the experience of both their sales and installation personnel.

Each participating entity has the option to select one or more product categories or services from the resulting Master Agreement(s) during the execution of the participating addendum process.

Each participating entity has the option to negotiate an expanded product line within the product category offering and within the scope of this RFP during the Participating Addendum process. Any additional incremental discounts available to a Participating Entity, if offered, may be provided at the discretion and as the sole legal obligation of the Contract provider or their Authorized Sub-Contractor to the Participating Entity and negotiated during the Participating Addendum process. All Participating entities have the right to put dollar limits and certain line item, parts or on the total amount purchased per occasion on their individual PA's as they deem appropriate.

The resulting Master Agreement will be awarded with the understanding and agreement that it is for the sole convenience of the participating entities. The participating entities reserve the right to obtain like goods or services from other sources when necessary.

This RFP is designed to provide interested proposers with sufficient basic information to submit proposals meeting minimum requirements, but is not intended to limit a proposal's content or exclude any relevant or essential data. Suppliers are encouraged to expand upon the specifications to evidence service and capability.

Response:

HP has read and acknowledges.

1.2 WSCA-NASPO Background Information

WSCA-NASPO is a cooperative purchasing organization of all 50 states, the District of Columbia and the organized US territories. WSCA-NASPO is a subsidiary of the National Association of State

Procurement Officials (NASPO). NASPO is a non-profit association dedicated to strengthening the procurement community through education, research, and communication. It is made up of the directors of the central purchasing office in each of the 50 states, the District of Columbia and the territories of the United States. For more information consult the following websites www.wscanaspo.org and www.naspo.org

Obligations under master agreements that result from this cooperative procurement are limited to those states and other eligible entities that execute a Participating Addendum:

63G-6a-2105. Participation of a public entity or a procurement unit in agreements or contracts of procurement units -- Cooperative purchasing -- State cooperative contracts.

(2) A public entity may obtain a procurement item from a state cooperative contract or a contract awarded by the chief procurement officer under Subsection (1), without signing a participating addendum if the quote, invitation for bids, or request for proposals used to obtain the contract includes a statement indicating that the resulting contract will be issued on behalf of a public entity in Utah.

Financial obligations of Participating States (Entities) are limited to the orders placed by the departments, agencies and institutions of that Participating State (Entity) having legally available funds. Participating States incur no financial obligations on behalf of its political subdivisions, other governmental entities or other eligible entities.

Unless otherwise specified in the solicitation or a Participating Addendum, the resulting master price agreement(s) will be permissive.

This RFP is designed to provide interested Offerors with sufficient basic information to submit proposals meeting minimum requirements, but is not intended to limit a proposal's content or exclude any relevant or essential data. Proposals must be succinct, concise, and as short as possible to allow for efficient evaluation. Blanket marketing material and unnecessary elaborate brochures or representations beyond what is sufficient to present a complete and effective proposal are not acceptable.

Offerors must respond to any or all of the 12 categories that follow. The following product and service categories are included in this RFP:

- 1. Data Center Application Services
- 2. Networking Software
- 3. Network Management and Automation
- 4. Network Optimization and Acceleration
- Optical Networking
- 6. Routers
- 7. Security
- 8. Storage Networking
- 9. Switches
- 10. Wireless
- 11. Unified Communications
- 12. Services

Response:

HP has read and acknowledges. HP would like to provide products and services to all states that wish to participate on this contract.

1.3 Objective

The objective of this RFP is to obtain deeper volume price discounts than are obtainable by an individual state or local government entity. This discount is based on the collective volume of potential purchases by the numerous state and local government entities. The savings realized by the contractor in managing one comprehensive WSCA-NASPO Master Agreement rather than numerous state and local contracts should result in the most attractive service level and discounts available in the marketplace.

The Master Agreement(s) resulting from this procurement may be used by state governments (including departments, agencies, institutions), institutions of higher education, political subdivisions (i.e., colleges, school districts, counties, cities, etc.), and other eligible entities subject to approval of the individual state procurement director and local statutory provisions.

Participation by political subdivisions, other government entities and other eligible participants is with the authorization or acknowledgement of the specific state chief procurement official, and the execution of a Participating Addendum.

Response:

HP has read and acknowledges.

1.4 Solicitation Background

This is a rebid for the current for the WSCA-NASPO Data Communications Equipment, Supplies and Services contracts. Eight (8) Manufacturers currently have Master Contracts to provide Data Communications Equipments, Supplies and Services. They are as follows:

Alcatel-Lucent – AR1466
Brocade Communications – AR214
Cisco Systems – AR233
Enterasys Networks, Inc. – AR1471
Extreme Networks – AR1471
Hewlett-Packard - AR1464
Juniper Networks – AR229
Meru Networks – AR218

Although the State of Utah and WSCA-NASPO does not guarantee any usage or spend under these contracts, for bid purposes only, the total combined spend on these contracts for 2012 was \$204 million dollars.

Response:

HP has read and acknowledges.

1.5 Issuing Office and Solicitation Number

The State of Utah, Division of Purchasing is the issuing office for this document and all subsequent addenda relating to it. The reference number for the transaction is Solicitation # JP14001. This number must be referred to on all proposals, correspondence, and documentation relating to the RFP.

Response:

HP has read and acknowledges.

1.6 WSCA-NASPO Contract Administrator

The WSCA-NASPO Contract Administrator designated by WSCA-NASPO and the State of Utah, Division of Purchasing and General Services is:

Name: Jennifer Porter

State of Utah Division of Purchasing and General Services

State Office Building, Capitol Hill

Room 3150

Salt Lake City, UT 84114-1061 Email: jenniferporter@utah.gov

Phone: 801-538-3064 Fax: 801-538-3882

Response:

1.7 Proposal Submittal

Offers must be received, according to instructions, by the posted due date and time. Offers received after the deadline will be non-responsive.

Proposals are due August 30, 2013 at 11:00 am MST

Questions will be accepted until July 26, 2013 at 11:00 am MST

Data Communication RFP Release Webinar is scheduled for July 11, 2013. Webinar details will be posted on the WSCA-NASPO website (www.wsca-naspo.org).

The preferred method of submitting your original 'master' proposal packet is electronically in Microsoft Word and Excel through BidSync, (www.bidsync.com), or you may mail or drop off your hard copies to the address noted in Section 1.6 of this RFP on or before the due date and time. The original 'master' proposal packet shall include a separate document or sealed envelope labeled "SOLICITATION # JP14001 Cost Schedule" that contains the pricing document. Please note that the State of Utah Division of Purchasing office is closed on Saturday and Sunday and therefore does not accept deliveries on those days.

When submitting an offer electronically through BidSync, please allow sufficient time to complete the online forms and upload documents. The solicitation will end at the closing time listed in the offer. If you are in the middle of uploading your documents at the closing time, the system will stop the process and your offer will not be received by the system. It is recommended that the submission process be completed the day prior to the due date, with the knowledge that any changes/updates will be accepted through the due date and time.

Electronic offers may require the uploading of electronic attachments. BidSync's site will accept a wide variety of document types as attachments. However, the submission of documents containing embedded documents (zip files), mov, wmp, and mp3 files are prohibited. All documents should be attached as separate files.

BidSync customer support may be contacted at (800) 990-9339 for guidance on the BidSync site.

Respondents are responsible for ensuring that their BidSync registration information is current and correct. The State of Utah accepts no responsibility for missing or incorrect information contained in the vendor registration in BidSync. Incorrect or missing vendor registration information may result in failure to receive notification from BidSync regarding this procurement.

In addition to the original 'master' proposal packet submission, Respondents are required to send one (1) hard copy and one (1) electronic version (Microsoft Word and Excel) of the complete proposal, excluding pricing information, to each of the evaluation team members listed below. Each proposal packet shall be marked with the solicitation number and be in accordance with the submittal requirements. The original 'master' sent to the WSCA-NASPO Master Agreement Administrator identified in Section 1.6 of this RFP will prevail in resolving any discrepancies.

Alaska – Ted Fawcett Contracting Officer ted.fosket@alsaka.gov

California - Bonnie Bahnsen bonnie.bahnsen@dgs.ca.gov

Nevada – Marti Marsh Purchasing Officer mmarsh@admin.nv.gov

New Jersey – Vicente Azarcon Procurement Specialist vicente.azarcon@treas.state.nj.us

Utah – Jennifer Porter Purchasing Agent State of Utah jenniferporter@utah.gov

Response:

HP has read and acknowledges.

1.8 Current State Participants

The States currently participating in the existing contracts are: Alaska, Arkansas, California, Colorado, Delaware, District of Columbia, Hawaii, Idaho, Iowa, Kentucky, Louisiana, Minnesota, Missouri, Montana, Nevada, New Jersey, Oklahoma (Grand River Dam Authority), Oregon, South Dakota, Utah, Washington, Wisconsin and Wyoming.

States with "Intent to Participate" – The following states have executed an Intent to Participate thru WSCA-NASPO, which simply indicates that they want to be formally listed in the published Request for Proposal as participating in the solicitation process: California, Hawaii, Minnesota, Missouri, Montana, Nevada, New Jersey, South Carolina, South Dakota, Utah, Vermont and Washington. All 56 NASPO members are eligible to participate in all WSCA-NASPO contracts when and if they decide they want to, in accordance with their individual statutory requirements.

Response:

HP has read and acknowledges.

1.9 Governing Laws and Regulations

This procurement is conducted by the State of Utah, Division of Purchasing & General Services, in accordance with the Utah Procurement Code. These are available at the Internet website www.purchasing.utah.gov for the State of Utah's Division of Purchasing & General Services.

The laws of the State of Utah will govern all Master Agreements that result from this procurement unless the Data Communications Products and Services Provider and participating entity agree in a Participating Addendum that the laws of another jurisdiction will govern purchases made by purchasing entities within the jurisdiction of the participating entity.

Response:

HP has read and acknowledges.

1.10 Length of Contract

The Master Agreement(s) resulting from this RFP will be for a period of five years (initial term). The Master Agreement(s) may be extended beyond the original Master Agreement period for a two (2) year period, by mutual agreement.

Response:

HP has read and acknowledges.

1.11 Pricing Structure

Pricing Structure: Pricing for the WSCA-NASPO Master Agreements shall be based on the Percent Discount off the current global MSRP Schedule applicable to United States customers.

Response:

1.12 Price Guarantee Period

Price Guarantee Period: The Data Communication Provider's Discount rate shall remain in effect for the term of the WSCA-NASPO Master Price Agreement.

Response:

HP has read and acknowledges.

1.13 Price Escalation

Equipment, Supplies and Services: Data Communications provider may update the pricing on their MSRP price list one time every year after the first year of the original contract term. The WSCA-NASPO Contract Administrator will review a documented request for a Price Schedule price list adjustment only after the Price Guarantee Period.

Response:

HP has read and acknowledges.

1.14 Price Reductions

In the event of a price decrease in any category of product at any time during the contract in a Provider's Price Schedule, including renewal options, the WSCA-NASPO Contract Administrator shall be notified immediately. All Price Schedule price reductions shall be effective upon the notification provided to the WSCA-NASPO Master Agreement Administrator.

Response:

HP has read and acknowledges.

HP respectfully requests that product and price files (decreases to MSRP) be updated by HP on a regular basis, at least monthly, and that HP and the State of Utah agree to a process to administer this, including posting price changes to the website / e-portal upon approval from the State of Utah.

1.15 Usage Reporting Requirement

All Data Communication Provider's will be required to provide quarterly usage reports to the WSCA-NASPO Contract Administrator or designee. The initiation and submission of the quarterly reports are the responsibility of the Data Communication Contract Provider. You are responsible to collect and report all sales data including your resellers and partners sales associated with your Master Agreement. There will be no prompting or notification provided by the WSCA-NASPO Contract Administrator.

Quarterly reports must coincide with the quarters in the fiscal year as outlined below:

WSCA-NASPO Data Communications Services Solicitation # JP14001

Quarter #1: July 1 through September 30, due annually by October 30. Quarter #2: October 1 through December 31, due annually by January 30.

Quarter #3: January 1 through March 31, due annually by April 30. Quarter #4: April 1 through June 30, due annually by July 30.

Respondents must identify the person responsible for providing the mandatory usage reports. This contact information must be kept current during the Master Agreement period. The WSCA-NASPO Contract Administrator must be notified if the contact information changes. The contact information for the person responsible for the mandatory quarterly usage reporting must be specified per Section 3.1.5.

The purpose of the Master Agreement usage-reporting requirement is to aid in Master Agreement management. The specific report content, scope, and format requirements will be provided to the awarded Data Communications Products and Services Provider's during Master Agreement execution. Some WSCA¬NASPO States may require additional reporting requirements. Those requirements will be addressed through the individual participating entity's Participating Addendum process. Failure to comply with this requirement may result in Master Agreement cancellation.

Response:

HP has read and acknowledges.

1.16 Standard Contract Terms and Conditions

Any Master Agreement resulting from this RFP will include, but will not be limited to, the WSCA-NASPO Standard Master Agreement Terms and Conditions, the State of Utah Additional Terms and Conditions (Appendix A) and any additional terms and conditions specific to WSCA-NASPO participating addendums for participating entities. The WSCA-NASPO Master Agreement Terms and Conditions and State of Utah Additional Terms and Conditions will take highest precedence in any contract resulting from this solicitation. Vendors must clearly identify exceptions to the WSCA-NASPO Standard Master Agreement Terms and Conditions and the State of Utah Additional Terms and Conditions in the bid submission. Vendor exceptions must include proposed solution language. Failure to submit exceptions and/or solution language will constitute vendor acceptance of WSCA-NASPO and State of Utah Additional Terms and Conditions. No third party terms and conditions will be allowed in resulting contracts awarded under this solicitation. Additional vendor terms and conditions must be submitted with the solicitation bid response for legal review and contract applicability. Submission of vendor terms and conditions with a bid response does not guarantee acceptance. Vendor terms and condition will not include any reference to website URLs that house additional terms and conditions. All terms and conditions associated with resulting contracts will be identified and attached to the WSCA-NASPO Master Agreement. The State of Utah reserves the right to accept, reject, and/or negotiate vendor terms and conditions after the award(s) have been made if it is in the best interest of the State of Utah. Participating States reserve the right to negotiate vendor terms and conditions during the Participating Addendum process. Vendor terms and conditions included with a bid response are limited to a maximum of 10 pages (81/2 x 11 inch paper, 10 pt Arial font, and single sided). Failure to adhere to these terms and conditions requirements may result in vendor disqualification.

Response:

HP has read and acknowledges.

1.17 Questions

All questions must be submitted through BidSync. Answers will be given via the BidSync website. Questions received after the Question/Answer period will not be answered. No agency employee, board member, or evaluation committee member should be contacted concerning this solicitation during the solicitation posting and selection process. Failure to comply with this requirement may result in vendor disqualification.

Response:

1.18 Discussions with Respondents (Oral Presentation)

An oral presentation by a Respondent to clarify a proposal may be required at the sole discretion of the WSCA-NASPO Master Agreement Administrator. However, the WSCA-NASPO Contract Administrator may award a Master Agreement based on the initial proposals received without discussion with the Respondent. If oral presentations are required, they will be scheduled after the submission of proposals. Oral presentations will be made at the Respondents expense.

Response:

HP has read and acknowledges.

HP requests the opportunity to make an oral presentation, if needed, prior to a decision to not provide HP with an award. After oral presentation, the decision would be at the sole discretion of the State of Utah.

1.19 Protected Information

The Government Records Access and Management Act (GRAMA), Utah Code Ann., Subsection 63-2-304, provides in part that:

the following records are protected if properly classified by a government entity:

- trade secrets as defined in Section 13-24-2 if the person submitting the trade secret has provided the governmental entity with the information specified in Section 63-2-308 (Business Confidentiality Claims);
- (2) commercial information or non-individual financial information obtained from a person if:
- (a) disclosure of the information could reasonably be expected to result in unfair competitive injury to the person submitting the information or would impair the ability of the governmental entity to obtain necessary information in the future;
- (b) the person submitting the information has a greater interest in prohibiting access than the public in obtaining access; and
- (c) the person submitting the information has provided the governmental entity with the information specified in Section 63-2-308; * * * * *
- (6) records the disclosure of which would impair governmental procurement proceedings or give an unfair advantage to any person proposing to enter into a contract or agreement with a governmental entity, except that this Subsection (6) does not restrict the right of a person to see bids submitted to or by a governmental entity after bidding has closed;

GRAMA provides that trade secrets, commercial information or non-individual financial information may be protected by submitting a Claim of Business Confidentiality.

To protect information under a Claim of Business Confidentiality, the Respondent must:

- 1. provide a written Claim of Business Confidentiality at the time the information (proposal) is provided to the State, and
- 2. include a concise statement of reasons supporting the claim of business confidentiality (Subsection 63-2-308(1)).
- 3. submit an electronic "redacted" (excluding protected information) copy of your proposal response. Copy must clearly be marked "Redacted Version." Failure to submit a redacted version may result in release of your entire proposal.

A Claim of Business Confidentiality may be appropriate for information such as client lists and non-public financial statements. Pricing and service elements cannot be protected. An entire proposal cannot be protected under a Claim of Business Confidentiality or Proprietary. Failure to comply with this requirement many result in your proposal being ruled Non-Responsive and no longer

considered. The claim of business confidentiality must be submitted with your proposal on the form which may be accessed at:

www.purchasing.utah.gov/contract/documents/confidentialityclaimform.doc

To ensure the information is protected, the Division of Purchasing asks the Respondent to clearly identify in the Executive Summary and in the body of the proposal any specific information for which a Respondent claims business confidentiality protection as "PROTECTED".

All materials submitted become the property of the State of Utah. Materials may be evaluated by anyone designated by the State as part of the sourcing team. Materials submitted may be returned only at the State's option.

Response:

HP has read and acknowledges.

1.20 WSCA Administrative Fee

The Contracted Supplier must pay a WSCA-NASPO administrative fee of one quarter of one percent (.025%) in accordance with the terms and conditions of the contract. The WSCA-NASPO administrative fee shall be submitted quarterly and is based on the actual sales of all products and services in conjunction with your quarterly reports. The WSCA-NASPO administrative fee must be included when determining the pricing offered. The WSCA-NASPO administrative fee is not negotiable and shall not be added as a separate line item on an invoice.

Additionally, some WSCA-NASPO participating entities may require that an administrative fee be paid directly to the WSCA-NASPO participating entity on purchases made by purchasing entities within that State. For all such requests, the fee percentage, payment method and payment schedule for the participating entity's administrative fee will be incorporated in the Participating Addendum. Data Communications Provider will be held harmless, and may adjust (increase) the WSCA-NASPO Master Agreement pricing by the fee percentage for that participating entity accordingly for purchases made by purchasing entities within the jurisdiction of the State. All such agreements may not affect the WSCA-NASPO fee or the prices paid by the purchasing entities outside the jurisdiction of the participating entities requesting the additional fee.

Response:

HP has read and acknowledges.

1.21 Interest

Any payments that a Contracted Supplier makes or causes to be made to WSCA-NASPO after the due date as indicated on the Quarterly Report schedule shall accrue interest at a rate of 18% per annum or the maximum rate permitted by law, whichever is less, until such overdue amount shall have been paid in full. The right to interest on late payments shall not preclude WSCA-NASPO from exercising any of its other rights or remedies pursuant to this agreement or otherwise with regards to Data Communication Provider's failure to make timely remittances.

Response:

HP has read and acknowledges.

1.22 Proposal Offer Firm

Responses to this RFP, including proposed discounts offered will be considered firm for one hundred and sixty (160) days after the proposal due date. By signature (electronic or otherwise) and submission of a proposal, the person signing verifies that they are authorized to submit the proposal and bind the firm to provide the products/services in the proposal and potential Master Agreement.

Response:

1.23 Cancellation of Procurement

This RFP may be canceled at any time and any and all proposals may be rejected in whole or in part when the State of Utah, Division of Purchasing and General Services determines such action to be in the best interest of the State of Utah.

Response:

HP has read and acknowledges.

1.24 Right to Waive

The sourcing team reserves the right to waive minor irregularities at its sole discretion.

Response:

HP has read and acknowledges.

1.25 Right to Accept All or Portion

It is our intent to accept the entire line of Data Communications Equipment and Services (included in the scope) from the awarded Data Communications Providers, however we reserve the right to accept all or a portion of a Respondents proposal.

Response:

HP has read and acknowledges.

1.26 Service Line Additions and Updates

During the term of the contract, Data Communications Providers may submit a request to update the awarded items (within the scope listed in IDENTIFY SECTION) as new technology is introduced, updated or removed from the market. The Master Agreement Administrator will evaluate requests and update the contract offering via written amendment as appropriate. The Data Communications Service Provider shall update the dedicated website, price lists, and catalogs to reflect approved changes. Pricing must utilize the same pricing structure as was used for services falling into the same service category.

Response:

HP has read and acknowledges.

1.27 Right to Publish

Throughout the duration of this procurement process and Master Agreement term, Respondents, Data Communications Providers and their authorized contractors must secure from the WSCA-NASPO Contract Administrator prior approval for the release of any information that pertains to the potential work or activities covered by this procurement or the Master Agreement. The Data Communications Provider shall not make any representations of WSCA-NASPO's opinion or position as to the quality or effectiveness of the services that are the subject of this Master Agreement without prior written consent of the WSCA-NASPO Contract Administrator. Failure to adhere to this requirement may result in disqualification of the Respondents proposal or termination of the Master Agreement for cause

Response:

HP has read and acknowledges.

1.28 Changes in Representation

The Contracted Supplier must notify the WSCA-NASPO Contract Administrator of changes in the Contracted Supplier's key administrative personnel, to the extent that there may be adverse impacts to the contract. The WSCA-NASPO Contact Administrator reserves the right to require a change in

Contracted Supplier(s) representatives if the assigned representative(s) is not, in the opinion of the WSCA-NASPO Contract Administrator, meeting the terms and conditions of the contract.

Response:

HP has read and acknowledges.

1.29 E-Rate Requirement

All award contractors must commit to participation in the Federal Communication Commission's Erate discount program established under authority of the Federal Telecommunications Commission Act of 1996. Participation in, and implementation of, this program must be provided without the addition of any service or administration fee by the contractor.

Response:

HP offers over 2,000 Priority two internal connection eligible E-Rate products and services. HP provides reseller training, and works with an E-Rate consultant to ensure compliance to the E-Rate program and rules. HP relies upon our authorized channel partners to assist qualified school districts with all aspects of the E-Rate application (Form 470) process. HP will support any certified E-Rate trained reseller with registering with the USAC (Form 498) process and in preparing proposals requested by a school district. HP will assist the reseller in understanding the annual E-Rate certification process (Form 473 and form 474). At this time, HP does not provide direct bids that require Form 474 invoice and collection activities. Upon request, HP will engage or provide the name of a certified E-Rate trained reseller who may provide these services to school districts.

1.30 Section 508 Compliant

Respondents must meet all Federal and State regulations required to these types of products including but limited to accessible products by describing their support of the applicable provisions of the Workforce Investment Act of 1998, Section 508.

Response:

HP is committed to providing accessible products and services to meet the needs of people with disabilities or age-related limitations. This commitment helps make sure that the benefits of technology are available to all and supports our company's diversity and "Total Customer Experience" objectives.

HP was also one of the very first companies to include both summary-level and detailed VPAT information on our website at http://www.hp.com/accessibility. Today, we still develop summary and detailed VPATs on individual products to assist our customers in determining what products meet their requirements and to help public-sector customers comply with Section 508.

1.31 Glossary

Authorized Contractor: The Prime Contractor as listed as Contractor under the resulting Master Agreement(s) as a result of this RFP.

Authorized Sub Contractor: sub Contractor, Reseller, Partner, etc. Authorized by the Contractor (Prime) to sell only the products and services listed under the Master Agreement (s) established as a result of this RFP. This authorized sub contractor must have the authority and ability to accurately reflect the ability of the Respondent to meet the requirements detailed in this RFP.

WSCA-NASPO Contract Administrator: A dedicated person with the authority and ability to manage compliance with the scope and terms and conditions for this contract.

Mandatory Minimum Requirements: Requirements that must be met in order to be considered for further evaluation. Mandatory minimum requirements are non-negotiable. An offer that does not meet the mandatory minimum requirements will be disqualified from further consideration.

Participating Addendum: A Participating Addendum must be executed by any State that decides to adopt a WSCA-NASPO Master Agreement.

A Participating Addendum shall be executed for each contractor by the individual State desiring to use their contract.

Additional States may be added with the consent of the contractor and the Lead State (on behalf of WSCA-NASPO) through execution of Participating Addendums.

A Participating Addendum allows for each Participating State to add terms and conditions that may be unique to their State.

The Participating State and the Contractor shall negotiate and agree upon any additional terms and conditions prior to the signing and execution of the Participating Addendum.

States are not mandated to sign a Participating Addendum with all awarded vendors.

Participating Entity: A State that has indicated intent to participate in the solicitation process, or after award, a State that has executed a participating addendum.

Purchasing Entity: Any end-user in a participating State that is eligible to use the Master Agreement(s) through the participating addendum, including but not limited to State Agencies, Counties, Cities, Education, and other entities.

Qualified Entity: An entity that is eligible to use the Master Agreement(s).

Usage Report Administrator: A contractors person responsible for the quarterly sales reporting and payments described in Section 1.15 Usage Reporting Requirement.

Volume Discount: A percentage discount offered by the seller to the buyer for purchasing a stated dollar amount of Data Communications services and products to be delivered at one time or for a specified period.

Sourcing Team: The technical and business team charged with setting requirements for the Data Communications procurement, and its subsequent evaluation.

Response:

Section 2: General Proposal Requirements and Information

2.1 Proposal Content and Format Requirements

Proposals must be detailed and concise. Unless otherwise stated in your proposal as an "exception", Respondents agree to comply with every section, subsection, attachment and addendum of this RFP. Each proposal must be submitted in Microsoft Word or Excel, labeled and organized in a manner that is congruent with the section number, headings, requirements, and terminology used in this RFP. Proposal documents must be Arial font size 10. Respondent responses that are limited to a specified number of pages are referring to single sided pages. As an example, a response that is limited to a document that is no more than two pages long may be submitted on one double sided page, but not two double sided pages.

Response:

HP has read and acknowledges.

2.2 RFP Revisions

Revisions, if any, and all written questions and the State's answers, will be posted on the BidSync website. Solicitation documents will not be mailed to prospective Proposers. Respondents must register (free of charge) as a vendor with BidSync in order to have access to the RFP and related documents. Respondents are responsible for ensuring that their registration information is current and correct. The State of Utah accepts no responsibility for missing or incorrect information contained in the supplier's registration information on BidSync. The State of Utah accepts no responsibility for a prospective Respondent not receiving solicitation documents and/or revisions to the solicitation. It is the responsibility of the prospective Respondent to obtain the information provided through BidSync.

Response:

HP has read and acknowledges.

2.3 Right to Waive

The State of Utah reserves the right to waive any informality or technicality in any proposal.

Response:

HP has read and acknowledges.

2.4 Proposals Become Property of the State of Utah

All proposal contents become the property of the State of Utah. All proposal content is proprietary during the proposal evaluation process. Upon Master Agreement award, the successful Respondents' proposals will be open to public inspection, by request, with the exception of any proposal content that is marked as "proprietary or confidential" by the Respondent. All content designated as "proprietary or confidential" must be supported by documentation as to the rationale for the proprietary nature of the information.

Response:

2.5 News Releases

News releases or other public disclosure of information pertaining to this RFP or the statewide contracts may not be published without the prior written permission of the State of Utah.

Response:

HP has read and acknowledges.

2.6 State Seal Use

The Utah Great Seal Rule states, in section R622-2-3. Custody and Use, that "no facsimile or reproduction of the Great Seal may be manufactured, used, displayed, or otherwise employed by anyone without the written approval of the Lieutenant Governor."

Other participating States have similar rules that must be adhered to by Respondents or interested parties.

Response:

Section 3: Data Communications Provider Mandatory Minimum Requirements

3.1 General Information

This section contains requirements that must be addressed in order for your proposal to be considered for the evaluation phase of this RFP. All of the items described in this section are non-negotiable. Respondents are required to complete:

Mandatory Requirements (M)

All Respondents must meet the **(M)** requirements listed in this section, and explain how the requirement is met. A 'no' response on the acceptance document or omission of the required explanation will disqualify the service from further evaluation.

3.1.1 Equipment Offering

(M) Identify Equipment Offering in sections 5.2.1-5.3.0.

Response:

For information on HP's Equipment Offerings, please see Appendix 1a - HP Equipment Offerings - Section 3.1.1.

3.1.2 Service Offering

(M) Identify Service Offerings for all products offered in Sections 5.2.1-5.3.0.

Response:

HP Network Consulting

HP Network Consulting focuses on the following IT success factors:

- Flexibility in the creation and supply of network services that can easily adapt to changing conditions and capitalize on new opportunities
- Speed to provide faster times to market and to service, along with a more agile response to changing customer requirements
- Automation to scale network resources to avoid under- and over-provisioning and instantly meet network demands
- Security to mitigate risk in the network and protect intellectual property
- Optimization of resources and cost to enable a future-ready network

There are a variety of reasons to embrace planning and integration services in general—and HP Network Consulting in particular—as the State of Utah transforms its network environment. The main reason is that advanced technologies have significantly increased the complexity of the network. As a result, IT organizations in increasing numbers are seeking guidance from vendors with proven subject-matter expertise to help them develop strategies to increase the efficiency and reduce the total cost of ownership (TCO) of their investments. Plus, working with services professionals enables you to allocate your internal resources on innovative, revenue-producing initiatives.

In an Instant-On world, it is crucial to have a trusted advisor who understands where your business is going and the technology decisions you need to make to get there. Combining technology intelligence and know-how with business intelligence, our service professionals have been helping organizations across the globe meet their evolving needs. They can do the same for the State of Utah.

HP Network Consulting has more than 40 years of experience with multivendor network equipment through an expansive delivery organization of expert network consultants. HP Network Consulting has assisted both enterprise and service provider customers to plan, design, integrate, and deploy highly complex network infrastructures.

Additional information on HP Network Consulting is provided in Appendix 2.

For information on HP's Service Offerings, please see Appendix 1b - HP Service Offerings – Section 3.1.2.

HP Training

HP offers a variety of courses on our network equipment. For information on HP's Training Offerings, please see Appendix 1c - HP Service Offerings (Training) - Section 3.1.2.

3.1.3 Insurance Requirement

(M) This pertains to the State of Utah insurance requirements. Other Participating States may identify different insurance requirements during the participating addendum process.

Data Communications Provider's and their authorized contractors shall procure and maintain insurance which shall protect the authorized contractor and The State and/or purchasing entity (as an additional insured) from any claims from bodily injury, property damage, or personal injury covered by the indemnification obligations set forth herein. The Data Communications Provider's authorized contractor shall procure and maintain the insurance policies described below at their own expense and shall furnish to the procurement manager, upon award, an insurance certificate listing the participating State(s) as certificate holder and as an additional insured. The insurance certificate must document that the Commercial General Liability insurance coverage purchased by the authorized contractor to include contractual liability coverage applicable to this Master Agreement. In addition, the insurance certificate must provide the following information: the name and address of the insured; name, address, telephone number and signature of the authorized agent; name of the insurance company (authorized to operate in all States); a description of coverage in detailed standard terminology (including policy period, policy number, limits of liability, exclusions and endorsements) and an acknowledgment of notice of cancellation to the participating States.

Authorized contractor is required to maintain the following insurance coverage's during the term of the WSCA-NASPO Master Agreement:

- Workers' Compensation Insurance The Data Communications Provider's authorized contractor must comply with Participating State's requirements and provide a certificate of insurance.
- 2) Commercial General Liability Policy per occurrence \$1,000,000. Coverage to include bodily injury and property damage combined single limit.
- 3) Business Automobile Policy to include but not limited to liability coverage on any owned, non-owned, or hired vehicle used by Data Communications Provider's authorized contractor personnel in the performance of this Master Agreement. The business automobile policy shall have the following limits of liability: Per Occurrence \$1,000,000, Annual Aggregate \$23,000,000, Annual Aggregate applying to products and services \$23,000,000. Coverage must include premises and operations, bodily injury and property damage, personal and advertising injury; blanket contractual, products and services, owner named as an additional insured. The State of Utah must be listed as an additional insured.

Within 10 days of contract award, the Contracted Supplier and/or Authorized Contractor must submit proof of certificate of insurance that meets the above requirements or the Participating States requirements.

Response:

HP respectfully requests the changes to this provision which are in redline above. HP can agree to this insurance provision with the removal of the notice requirements. Since October 1, 2010, the Certificate of Insurance ACORD forms no longer included cancellation notice to the certificate holder.

3.1.4 Delivery

(M) The prices offered shall be the delivered price to any WSCA-NASPO purchasing entity. All deliveries shall be F.O.B. destination with all transportation and handling charges paid by the contractor. Responsibility and liability for loss or damage shall remain the Contractor until final inspection and acceptance (within 30 days after delivery for external damage and 30 days for any concealed damage) when responsibility shall pass to the Buyer except as to latent defects, fraud and Contractor's warranty obligations. The minimum shipment amount will be found in the special terms and conditions. Any order for less than the specified amount is to be shipped with the freight prepaid and added as a separate item on the invoice. Any portion of an order to be shipped without transportation charges that is back ordered shall be shipped without charge.

Response:

HP has read and acknowledges. HP respectfully requests the use of the provision below from the WSCA NASPO B271764 Laptop and peripherals contract to define final inspection and acceptance:

The Purchasing Entity will make every effort to notify the Contractor within thirty (30) calendar days following delivery non-acceptance of a Product or Service. In the event that the Contractor has not been notified within 30 calendar days from delivery of Product or completion of Service, the Product and Services will be deemed accepted on the 31st day after delivery of Product or completion of Services, except for Software which is not preloaded on equipment which is accepted upon delivery.

3.1.5 Service Offering Documentation

(M) Upon request, user and/or technical documentation should be supplied for all procured products and services. Manuals may be available via the Contracted Supplier's website. The manual shall contain user and technical instructions appropriate to the service.

Response:

HP provides The State of Utah access to the HP Support Center, which includes manuals and technical instructions for the proposed HP products. In addition to finding manuals, HP Support Center additional features are:

- Product pages/Product selector: This feature allows you to use a product locator or product selector to find product pages that contain product-specific support information.
- Drivers, software, and firmware: This feature provides access to software, firmware, drivers, and other downloads that can be used to solve problems and maintain, manage, or upgrade your HP products.
- Software updates and licensing: This feature allows you to download the most recent versions
 of software products, documentation, and license updates. To download your updates, you
 must have an HP Passport user ID and one or more active support agreements with software
 updates linked to your HP Passport account. With software updates and licensing, you can:
 - View a list of products and select from available software, documentation, and licensing updates, based on your active support agreement
 - Choose to download immediately; use the HP Download Manager to assist with the download, or use the download cart to download at your convenience
 - Sign up for notifications of product updates through HP Support alerts
- Knowledge base: Within the knowledge base, you can search for support information, view top
 issues, most viewed solutions, manuals, and support advisories for your product. You can also
 navigate to product documents based on tasks such as troubleshoot a problem, setup and
 install, learn and use, or perform maintenance.

- Search support knowledge: This feature allows you to search across our content repositories for answers to your support-related questions. Everything that is searchable on HP Support Center is included here. With the search feature, you can:
 - Browse through content repositories that span technical support documents, patch readme documents, manuals, and more
 - Search the repositories by keyword or document ID using filter options, such as content types and date ranges, to narrow your search

To make the best use of this feature, you should be a registered user of HP Support Center and be sure to link or share your HP product warranty, HP Care Pack, or HP support agreement to your user account. You can also use the guided troubleshooting feature to find solutions to common issues through a step-by-step troubleshooting tool.

- Forums: The HP Support Center Forum, as a part of the "Always On" support community, is an
 online community for peer-to-peer technical support and knowledge sharing. Like-minded
 professionals gather to exchange knowledge, best practices, and experience. Forums allow you
 to:
 - Read, search, navigate, and post in any of the discussion forum areas pertaining to your HP product or solution
 - Share best practices and troubleshooting tips on our products and third-party products supported by us
 - Award appreciation to posts that you find useful and helpful
 - Send private messages to other forum users regarding IT issues that you wouldn't like to discuss publicly
 - Subscribe to RSS and email for notifications when there is new activity in a particular area of the community
 - Post more easily on subjects of interest and relevance, using links to photos and videos, spell-check, simple formatting, and more
 - Tag a response to your question as a great solution, so that others will benefit from the knowledge that's being shared
 - Share your expertise within the all-new community knowledge base, enhancing our "Always
 On" support community knowledge-sharing capabilities to go beyond conversational forum
 discussions
- Parts, repair, and warranty: Provides information about customer self-repair, and information on how to replace parts. It also provides a warranty check feature to allow you to check the status of your warranty.
- Chat with HP Support: This feature allows you to seek technical support for your HP Networking
 products via real-time chat. With chat, you can have an interactive chat session with an HP
 agent over the Web. When a customer submits a support request using chat, the feature can
 collect information about your computer and/or printing device, and pass it to an online support
 specialist. A case number is assigned so that you can track your case with HP.
- Support Case Manager: This is a Web-based tool designed for managing HP support cases for HP products and third-party products supported by us. With Support Case Manager, you can:
 - Submit, review, update, and report cases via the Internet
 - Manage cases for a wide variety of hardware and software products and systems
 - Save time by submitting or viewing data quickly, accurately, and at your convenience
 - Track support case progress and history, including updates made by HP support agents,
 from the time a case is created until the time it is resolved and closed You can easily attach

case-related files that help with troubleshooting, such as error messages, memory dumps, and log files.

3.1.6 Data Communications Provider Contract Administrator and Usage Report Administrator

(M) The Contracted Supplier shall provide a Contract Administrator to manage compliance with the scope and terms and conditions for this contract. The following Information, at a minimum, regarding the Contract Administrator shall be provided:

- a. Administrator's number of years experience in the Data Communications Services business.
- Confirmation that the Data Communications Provider Contract Administrator has authority to enforce the scope of work and terms and conditions of the resulting contract.

The Contracted Supplier shall also provide a Usage Report Administrator responsible for the quarterly sales reporting described in Section 1.15 Usage Reporting Requirement.

Response:

Veronica Mendez, SLED Contract Program Manager, has worked for HP's Public Sector market for 6 years and has 3 years of experience in WSCA Data Com (as contract administrator). Veronica has authority to enforce the scope of work and terms of the contract.

Elizabeth Leach will be the Usage Report Administrator. Elizabeth has been with HP for 5 years in a variety of roles, including positions in the Americas Contracting Office and Technical Services.

3.1.7 eMarket Center Cooperation

(M) To be eligible for contract award, the Contractor must agree to cooperate with WSCA-NASPO and SciQuest (and any authorized agent or successor entity to SciQuest) with uploading a hosted catalog or integrating a punchout site. The contract requirements are in section 7.

Response:

Section 4: Data Communications Provider Qualifications

4.1 General Information:

Provide any pertinent general information about the depth and breadth of the Offeror's product and service offerings and their overall use and acceptance in the Data Communications marketplace.

Response:

HP in Profile

HP is the world's largest provider of information technology infrastructure, software, services, and solutions to individuals and organizations of all sizes.

HP is unmatched in the breadth of our portfolio and scale. We are a \$120 billion company with five major lines of business and more than 320,000 people who work in 170 countries. Our portfolio spans servers, storage, networking, personal computing, imaging and printing, software, services, and solutions.

We bring the advantages of that scale, the breadth and depth of our portfolio, our innovation, and our competitiveness to our customers every day and in almost every country in the world.

HP ranks 15th on the 2013 U.S. Fortune 500, ranks 31st on the 2012 Global Fortune 500, and is the world's largest technology company.

Figure 1. Some of the HP Company Fast Facts

Technology Leadership

Building these kinds of experiences requires expertise and innovation across the devices, infrastructure, and services that make them possible. HP delivers a unique portfolio to help our customers apply technology to whatever they want to do:

- Personal Systems—HP has a leading portfolio of business and consumer PCs, highperformance workstations, handheld devices, digital entertainment solutions, personal storage, and Internet services that create connected and compelling personal experiences.
- **Imaging and Printing**—HP is leading the digital transformation of printing and offering its customers exciting new ways to be creative, save money, improve productivity, and stand out. For the home, the office, and graphics markets, HP has a wide range of award-winning products and services to help our customers succeed.
- Enterprise Group—HP offers a broad range of solutions focused on helping our business
 customers manage and transform their technology to unleash new possibilities and have a
 meaningful impact on business and life. Business customers can take advantage of our
 technology and expertise by leveraging our core building blocks—servers, storage, networking,
 software, and services.

- Enterprise Services—With 50 years experience working in a variety of industries, Enterprise Services is the strategic partner that helps organizations map enterprise-wide strategies to meet business and mission goals for today and tomorrow. We help clients manage applications, create cloud delivery systems, mobile solutions and other strategies to give them a competitive advantage and create better value for their customers and citizens.
- HP Financial Services (HPFS)—HPFS helps customers move toward the lowest total cost of ownership throughout the technology lifecycle—from planning and acquiring it all the way to retiring and replacing it. We make it easy and economical to deploy world-class business technology on terms tailored to your unique needs.
- HP Labs—HP's exploratory and advanced research group pushes the frontiers of fundamental science. With 23 labs across seven worldwide locations, HP Labs focuses high impact research on addressing the most complex challenges facing technology customers in the next decade in the areas of information explosion, the cloud, content transformation, intelligent infrastructure, and sustainability.

Market Leadership and Industry Recognition

HP market leadership spans a broad range of solution areas. With a number-one market share ranking in several key IT product segments, HP holds a formidable competitive position that is unmatched in the industry.

Specifically with regards to Data Communications (i.e. networking), HP has an incredible set of qualifications. Gartner has recognized HP in its most up to date research as a leader among networking technology companies. Below are the two most recently published Gartner Magic Quadrants for Enterprise LAN and Wired and Wireless LAN.

Figure 3. Magic Quadrant for Enterprise LAN (Global)²

Positioned as Leader in the most recently published Enterprise LAN Magic Quadrant

² This Magic Quadrant graphic was published by Gartner Inc. as part of a larger research note and should be evaluated in the context of the entire report. The Gartner report is available upon request from HP. Gartner does not endorse any vendor, product or service depicted in its research publications, and does not advise technology users to select only those vendors with the highest ratings. Gartner research publications consist of the opinions of Gartner's research organization and should not be construed as statements of fact. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

Figure 4. Magic Quadrant for the Wired and Wireless LAN Access Infrastructure³

Leader in the most recently published Wired & Wireless LAN Magic Quadrant

Other key points that demonstrate HP's qualifications in the Data Communications market are:

- HP is one of only two vendors with Data Communications market share over 10%. HP is the #2 vendor in ship share and ports.
- HP has been in the Data Communications business for over 30 years.
- HP has hundreds of partners in an extensive network that are certified to sell and support sales in the US into the public sector market.
- HP is the largest IT vendor in the world, exceeding \$120 Billion in annual revenue.
- HP has the industry leading Lifetime Warranty for most of our networking products, and in addition recently announced this will include 3 years of 7x24x365 phone support to our customers AT NO ADDITIONAL COST.
- HP Technology Services division, which provides warranty and maintenance services, is the largest organization of its type in US, with over 2,500 employees in this division.

This Magic Quadrant graphic was published by Gartner Inc. as part of a larger research note and should be evaluated in the context of the entire report. The Gartner report is available upon request from HP. Gartner does not endorse any vendor, product or service depicted in its research publications, and does not advise technology users to select only those vendors with the highest ratings. Gartner research publications consist of the opinions of Gartner's research organization and should not be construed as statements of fact. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

- HPs FlexNetwork architecture provides the infrastructure blueprint for Virtual Application Networks, the industry's only architecture which converges the data center, campus, and branch based on open-industry standards.
- HP Networking now has an incredibly broad networking and security portfolio spanning from the network edge to the data center core, and includes wireless networking solutions.
- HP provides single-pane-of-glass management and a broad range of services for our networking customers.

In addition to market share leadership, HP has a longstanding commitment to quality and customer satisfaction that earns widespread recognition from customers, trade publications and industry associations. An acknowledged leader across the full spectrum of IT products and services, the growth and success of HP are based on the extraordinary loyalty of over one billion customers worldwide. Recent recognition of HP corporate leadership in the areas of quality, environmental protection, supplier performance, communication, and business strategy can be found at: http://www.hp.com/hpinfo/newsroom/.

4.2 Warranty

Specify the Offeror's standard warranty offerings for the products and services proposed in the response to this RFP.

Response:

Most HP Networking products include Lifetime Warranty 2.0, which essentially means if the product fails, HP will replace it at no cost. In addition, HP recently added 3 years of 24x7 phone support to most HP FlexCampus, FlexBranch, and Small Business products, as part of the purchase price of the product. The following table provides information regarding HP Lifetime Warranty Networking Products.

Table 1. HP Networking Lifetime Warranty

| | Lifetime Warranty 2.0 | Hardware Warranty 2.0 | | |
|---|---|--|---|--|
| HP Networking Products | LTW with 3-years 24x7 Phone Support | HW Warranty with 3-year 24x7 Phone Support | HW Warranty with 1-year 24x7 Phone Support | |
| FlexCampus Core Switches* | | | 10500,7500 | |
| FlexCampus & FlexBranch Access Switches* | 82xx, 62xx, 55xx EI/H, 54xx, 51xx EI, 42xx, 38xx, 36xx EI, 35xx, 31xx EI, 29xx, 26xx, 25xx, AllianceONE zi Modules | | | |
| FlexCampus & FlexBranch WLAN Access Points* | MSM4xx, MSM3xx, MSM317 | | MSM4xx-R, MSM3xx-R | |
| FlexCampus and FlexBranch WLAN Controllers and Software* | MSM720, MSM765, 830 Unified Wired-WLAN | | 10500/7500 Wired-WLANModule, MSM760, MSM710, HP RF Manager | |
| FlexCampus Routers * | | | HSR6600, 6600 | |
| FlexBranch Routers* | | | MSRRouters | |
| Small Business Switches and WLAN access points* | 1910, 181x, 1410, M200, M220 | 1905, 1405, IntelliJack | | |
| FlexCampus & FlexBranch WLAN Devices* | MSM415 RF Security Sensor | | M111 Wireless Client Bridge | |

HP has also provided an HP Networking product warranty summary in Appendix 3.

The Software End User License Agreement and Hardware Limited Warranty for HP Networking is incorporated into this proposal by this reference. This document exceeds the requirement in Section 1.16 Standard Contract Terms and Conditions.

4.3 Website

Award contractors are required to establish and maintain a website applicable to the WSCA/NASPO contract which will allow Participating States to see applicable contract price list, discounts on said price list, approved resellers or partners for their state and any additional information that may be required to assist the participating states in obtaining information concerning the contract award. The State of Utah representing WSCA/NASPO reserves the right to require the award contractor to add additional items to assist in this process. Specify Websites used by the Offeror to facilitate customer ordering under awarded contracts. This is a mandatory requirement.

Response:

HP understands and agrees to maintain a website applicable to an awarded WSCA-NASPO contract allowing Participating States to see applicable contract pricing, price lists, approved resellers/partners for the respective Participating States, similar to the current contract HP holds today under www.hp.com/buy/wscadata website. HP further agrees to provide addition information as required by WSCA-NASPO or a respective Participating States site tied to the map under the Information Center or where possible as designated and approved by the WSCA-NASPO Lead State Contract Administrator or Participating State.

HP also agrees to establish a WSCA-NASPO eMarketcenter site for this contract providing another avenue for procurement by the respective States under the contract. HP agrees to work with the WSCA-NASPO Lead State on any specific requirements needed on maintaining a website in support of an awarded Master Agreement and Participating Addendums.

4.4 Customer Service

Specify the Offeror's standard customer service policies and detail the escalation process used to handle customer-generated issues.

Response:

When the State of Utah has a technical support issue, an incident can be logged via telephone or online through the HP Support Center. HP technical service specialists will log the request and facilitate initial troubleshooting procedures with the State of Utah. Should the State of Utah have concerns regarding a resolution which will fall outside the purchased service, HP has a formal escalation process for technical service related issues.

HP Escalation Process

Administered by the Global Escalation Management team, the HP Escalation Process provides a consistent support delivery model. This model is backed by a team of technical and managerial specialists customized to the State of Utah's unique situation. John Malone is the local Account Deliver Manager for the State of Utah.

Escalation Process Benefits

- Formal, structured communication
- Defined roles and responsibilities for Escalation Team members
- The State of Utah's business requirements and expectations actively managed throughout the process
- Solution monitored for agreed period until the State of Utah and HP are satisfied that the problem is resolved

Escalation Management Process Summary

Formal Approach to Issue Resolution

HP takes a five-step approach to escalation management. This process provides a clearly defined framework for issue resolution.

The Escalation Team

Management and technical members from HP and the State of Utah form the Escalation Team. Each team member has a specific role and responsibilities in the successful conclusion of the escalation. Members of the Escalation Team often include:

- Escalation Management Owner—leads the Escalation Management team, creates the Escalation Action Plan, and is the focal point for communication between HP and the State of Utah
- Escalation Specialist—develops and coordinates the technical aspects of the Escalation Action Plan
- Customer Management Contact—primary contact for management issues with the State of Utah's organization
- Customer Technical Contact—primary contact for technical issues with the State of Utah's organization
- Additional Resources—may be added for specific product knowledge and can include the following:
 - Engineering
 - Complex Problem Manager to coordinate engineering and partner resources
 - Delivery Partners
 - HP Management and Executives

Escalation Action Plan Development

Action planning is central to the successful resolution of serious customer situations. Developing an Escalation Action Plan to resolve the issue at hand is the Escalation Team's primary objective. The plan includes the following actions:

- Actions required to mitigate and solve the problem so the State of Utah can run your business
- Named individual responsible for each action
- Deadline and expected outcome for each action
- Contingency plan if the desired results are not achieved
- Defined communication plan, including frequency and method of communication
- Criteria for success describing when escalated issue will be regarded as solved

4.5 Firm

Company/Delivery Description

- a. Provide a brief history of your firm including the following:
 - 1. Number of years providing Data Communications Services being offered in response to this RFP.
 - 2. Number of separate services provided in each of the area categories described in this RFP.

Response:

HP History

HP was founded in 1939 by two engineers—Bill Hewlett and Dave Packard—who believed in the power of technology and the contribution it could make to our customers' lives, communities, and businesses. More than 70 years later, we are still a company that applies new thinking to improve the lives and businesses of our customers.

Today HP is the largest technology company in the world, with a global reach and an array of products and solutions. At HP, we are proud that our products touch so many lives, and we want you to know that this is just the beginning. We believe that technology is vital to helping us all succeed in this rapidly changing world. We believe that because we serve such a wide range of customers we have a unique perspective on their needs and an exceptional level of insight into how they may be solved. In addition, we are committed to using our products, services, and ideas to unleash the exciting new possibilities just around the bend.

Figure 5. HP Milestones—Important Dates in HP History

In its proud history, HP has not only changed the face of technology but also changed the way that an entire industry has come to view its commitments to its people, its customers, its communities and the world.

Years Offering These Services

HP has provided the data communications services being offered in response to this RFP for over 30 years.

HP Services Provided in Each of the Area Categories Described in this RFP

HP has included more than 30,000 SKUs for implementation services, post-implementation support services and defined engagement services - available through advance purchase of HP Care Pack Services - for the State of Utah's consideration.

Describe specifically what makes your firm a stable long term partner for WSCA-NASPO.

Response:

HP is the world's largest technology company, delivering innovation in printing, personal computing, software, services, and IT infrastructure, including networking. HP is unmatched in the breadth of our portfolio and scale. We are a \$120 billion company with five major lines of business and more than 320,000 people who work in 170 countries. We are the 13th largest company in America, and we are financially stable, generating more cash flow than Coca-Cola, Disney, FedEx, McDonald's, and Visa generated recently. Our portfolio spans servers, storage, networking, personal computing, imaging and printing, software, services, and solutions. We are a diversified technology company that is number one or two in just about every market we serve. We have a well-known and trusted brand. We bring the advantages of that scale, the breadth and depth of our portfolio, our innovation, and our competitiveness to our customers every day and in almost every country in the world.

c. Describe specifically what information the Data Communications Provider contract administrator would provide at annual meetings with an entity that has executed a participating addendum.

Response:

HP will perform the following functions:

- HP will participate in the annual WSCA/NASPO contract, including marketing events at the NASPO meetings as well as attending additional meetings throughout each quarter. The HP primary account representative, along with Management, will attend these meetings at times approved and designated by WSCA/NASPO.
- The HP Program Management team will meet with participating states throughout the year to review participating state marketing plans and events, which may include Management.
- HP will work with the WSCA Contract Administrator and the WSCA/NASPO Board to schedule seminars that may be held in the state capitals of the WSCA contract participating states. These seminars will focus on the latest trends in information technology important to each WSCA/NASPO state. HP will coordinate with each WSCA state to ensure the content of the seminar is relevant and meaningful to the audience.

As an attendee at State, Local and Education Forums:

- HP will host educational forums to teach State, Local and Educations customers about some of
 the latest technology changes and solutions impacting government. The Forums will be led by
 HP specialists with experience in IT solutions, and customers from State, Local and Education
 that will share best practices. This will be an opportunity for State, Local and Education
 customers to learn how to make the most use of the technology offered from HP, while gaining
 insight from peer-to-peer networking.
- HP will attend the WSCA/NASPO meetings/events and the annual NASPO Marketing event to continue to review current and future planning, challenges and collaboratively discuss and institute possible enhancements or alternatives during the term contract, as approved by WSCA/NASPO and the WSCA/NASPO Contract Administrator.
- d. Describe how you plan to implement the contract including having a single point of contact to perform and manage all aspects of this contract.

Response:

HP's Contract Program Manager will be the single point of contact to manage all contract responsibilities, internally and externally, in order to address all contract requirements.

e. Describe in detail your firm's escalation management plan including contact information.

Response:

HP's escalation management plans for contracts and services are provided below.

Contracts Escalation Management Plan

HP's role is to ensure you receive quality service in addition to enjoying the benefits that HP Networking solutions offer. Should you ever have a concern or issue, please contact the HP Enterprise Business Contract Program Manager or email hpwscadatacom@hp.com.

You can contact Veronica Mendez, HP's Contract Program Manager, at (650) 258-2822 or veronicam@hp.com.

Escalations will be routed through the contract program manager or the email node provided above.

Services Escalation Management Plan

HP's escalation management plan for services is described in our response to Section 4.4. John Malone, the local Account Deliver Manager for the State of Utah, can be reached at (801) 592-5855 or john.malone@hp.com.

4.6 Authorized Sub Contractor Relationships

Respondents may propose the use of Servicing Subcontractors or partners however, the Contractor shall remain solely responsible for the performance under the terms and conditions of the Contract if Servicing Subcontractors are utilized. This includes sales report information. The Contractor will be responsible to collect, and report this information from all partners or resellers representing your contract.

a. Briefly describe what your firm requires from potential contractors to become an "Authorized Data Communications Reseller". Provide an Authorized Contractor List.

Response:

HP has an extensive partner network which is an important part of the HP eco-system. Any subcontractor delivering on an HP contract must have the appropriate HP Networking certifications (both sales and systems analyst certifications) in order to qualify. HP also strives to select subcontractors that help HP drive volume in our networking products and services. Potential subcontractors must submit a business plan to HP to be considered as a subcontractor on this contract. We authorize partners by state, as we want to make sure they have a local presence within each state that signs a participating addendum. Eleven states currently participate on the existing WSCA Datacom contract; the list of authorized subcontractors for each state is provided in the following table. Each subcontractor must sign a contract addendum with HP, and they are required to abide by the HP terms and conditions (T&Cs) on our contract. Ultimately, HP acknowledges that we remain solely responsible for the performance of these T&Cs even when we authorize subcontractors.

b. Describe in detail how your firm currently measures an authorized contractors' performance.

Response:

By signing the subcontractor addendum, the partners agree to report sales from this contract to HP on a regular basis; however we try to do individual reviews with the partners based on their performance semi-annually vs. their business plan. In some cases, when partners do not perform,

we have had to take them off the contract. Their business plans also include qualitative inputs on what they will do to invest in driving sales by getting on the agreement(s). These are also reviewed during the semi-annual reviews.

 Describe in detail the process for revoking a designation as a subcontractor from an authorized contractor for issues related to customer service, or other authorized contractor performance related issues.

Response:

The HP subcontractor addendum allows HP to revoke a subcontractor's authorization at any time, without notice or cause. We give the same right to the partner. We also closely monitor their sales reporting and send warning letters to partners for non-reporting, if necessary. The main process for dismissal, however, is based on the performance of the partner versus their business plan in the semi-annual reviews.

From a contract perspective, when HP revokes a subcontractor, we send them a notification in writing that their subcontractor agreement has been cancelled, and remove them from the authorized pricing lists immediately. We also remove the subcontractor from the web page maintained for the contract so that they are no longer listed.

d. Describe in detail how your firm will support and assist an authorized contractor in improving their performance and the corrective action process.

Response:

It is always HP's intention to help our partners be successful. Since we measure performance on a regular basis, there are always interim conversations that we can have with subcontractors who do not seem to be performing. HP has channel partner business managers who manage relationships with our channel partners, and they are in contact on a very regular basis, both via phone and face to face. We leverage these folks in times when we see a subcontractors performance wavering and ask them to help HP and the partner with corrective actions. HP has a world-class channel partner program that provides excellent incentives for partners to both achieve performance of their plans, and also rewards partners for accelerating or overachieving on their plans. Our main goal is to assist the partner / subcontractor in succeeding, as we said above, our partners are an extremely important part of the HP eco-system.

Describe in detail the process that your firm uses to track and respond to issues and concerns
from both your authorized contractors and from participating entities.

Response:

Veronica Mendez is our single point of contact for all contract related issues from our authorized subcontractors. In addition to Veronica, Rob Courtney, Director for Government and Education (Gov/ Ed) Channels, assists in relationships with our Gov/ Ed partners. Rob also manages Gov/ Ed programs for HP partners which help the partners grow profitably. HP also has Gov/ Ed field-based market program managers who assist with driving key relationships with the partner executive and also with HP's larger Gov / Ed customers. Finally, HP has dedicated HP Networking partner business managers who proactively work with partners so that they are properly trained, maintain their certifications, and have technical resources on opportunities and in accounts where the partner might need assistance from HP to win business. Partners know that any of these HP resources are available to assist in day-to-day activities, and our HP people also know they need to escalate to either Veronica or Rob if there are any issues that need resolution.

f. Describe in detail how your firm will track, report and verify sales from your designated Data Communication partners and authorized contractors.

Response:

HP has a process already in place since we have had a WSCA Data Com contract in place for the past 5 years. Essentially, the subcontract agreement requires the partner to report sales to HP on a regular basis. Then Americas Contract Operations, where the partner reports are submitted, consolidates these reports into one (or in the case of participating states if they require a report just for their state, we break them into multiple reports) and provides these reports to the appropriate

entity, such as the State of Utah. In addition, we process payment to remit to the appropriate entity that is due at the time of the report. This process has work effectively for the past 5 years on the existing contract.

Section 5: Service Offering Qualifications 5.1 General Information

This section contains mandatory minimum requirements that must be met in order for your proposal to be considered for the evaluation phase of this RFP. All of the items described in this section are non-negotiable. Respondents are required to complete:

Mandatory Requirements (M)

All Respondents must meet the **(M)** requirements listed in this section, and explain how the requirement is met. A 'no' response on the acceptance document or omission of the required explanation will disqualify the service from further evaluation.

5.1.1 General Business Requirements

Each provider must meet the following mandatory general business requirements:

Response:

HP's responses of compliance are provided after each requirement.

5.1.2 Terms and Conditions

(M) Respondents must indicate their acceptance of the State of Utah Standard Terms and Conditions in addition to the WSCA-NASPO Terms and Conditions attached to this RFP as Attachment A and Attachment B. Any exceptions to these terms and conditions must be clearly identified in bid response and during the question and answer period on BidSync. Significant exceptions may constitute grounds for rejecting Respondent proposals.

Response:

HP has read and acknowledges.

5.1.3 Experience

(M) Respondents must be able to provide reference service contracts from a minimum of five government or commercial customers for their Data Communications Product and Services offerings. Government references are preferred. References must include environments and complexity that is similar in scope to those described within this RFP. Any proposals from Respondents that cannot meet these requirements will not be considered. The Respondent must provide specific contact information describing their reference service contracts, which may be verified.

Response:

The following HP customers have submitted Attachment B – Reference Form directly to the State of Utah:

- Alpine School District, Utah
- Jordan School District, Utah
- Thunderbird School of Global Management, Arizona
- The Evergreen State College, Washington
- Florida Department of Transportation, Florida
- Rio Rancho Public Schools, New Mexico

5.1.4 Financial Stability

(M) The Data Communications Product and Services vendor must provide audited financial statements to the State and should meet a minimum Dun and Bradstreet (D&B) credit rating of 4A2 or better, or a recognized equivalent rating. Please provide the Respondent's D&B Number and the

composite credit rating. The State reserves the right to verify this information. If a branch or wholly owned subsidiary is bidding on this RFP, please provide the D&B Number and score for the parent company that will be financially responsible for performance of the agreement. Prime contractors working on behalf of Respondents must submit financial statements that demonstrate financial stability, and adequate working capital, but do not need to meet 4A2 credit rating requirements.

Response:

HP Financial Materials

HP financial materials are available online and in print. Materials include the Annual Report, Form 10-K, Form 10 Q, and quarterly earnings releases. These materials can be accessed via the following link:

http://h30261.www3.hp.com/phoenix.zhtml?c=71087&p=irol-reportsannual

To request materials be delivered via mail, see the HP Investor Relations website at

http://h30261.www3.hp.com/phoenix.zhtml?c=71087&p=quarterlyearnings

http://h30261.www3.hp.com/phoenix.zhtml?c=71087&p=irol-sec

Answers to frequently asked questions (FAQ) can be found on the HP Investor Information webpage at http://h30261.www3.hp.com/phoenix.zhtml?c=71087&p=irol-faq.

HP D&B Information

D&B is a respected provider of business information. D&B issues D-U-N-S® Numbers, unique nine-digit sequences recognized as the universal standard for identifying and tracking businesses worldwide. The D-U-N-S® Number for Hewlett-Packard corporate headquarters is 00-912-2532. Our D&B rating is 5A3.

Please note that HP, as a large, global corporation, has unique D&B D-U-N-S® Numbers for many of its offices and facilities around the world.

HP cannot provide copies of D&B reports due to federal copyright restrictions. However, customers may contact D&B's Customer Service at 1-800-234-3867 to obtain a copy of our current D&B Report or visit the D&B website at http://creditreports.dnb.com.

5.1.5 Other General Responsibilities

(M) The Respondent must provide the personnel, equipment, tools, and expertise to meet the requirements in this RFP.

Response:

HP has read and acknowledges.

(M) Computer applications and Web sites must be accessible to people with disabilities, and must comply with Participating entity accessibility policies and the Americans with Disability Act.

Response:

HP has read and acknowledges. Please see further clarification below.

(M) Applications and content delivered through Web browsers must be accessible using current released versions of multiple browser platforms (such as Internet Explorer, Firefox, Chrome, and Safari) at minimum.

Response:

HP has integrated standards from Section 508 and the World Wide Web Consortium's Web Content Accessibility Guidelines (W3C WCAG) Version 2.0 Level AA into our web standards for hp.com. HP also developed and deployed internal training and tools to enable our web developers to integrate accessibility into hp.com. These standards are put in place to provide consistent conformance to accessibility guidelines across all of HP's online properties. If non-conformances are reported, the

Accessibility and Aging Program Office works with the website developers to remediate the problems. HP regularly tests, audits, and remediates our website to improve the accessibility.

5.2 Data Communications Services – Requirements

Offerors may respond to any of the sections where they have substantive product offerings that address the scope detailed in each Section from 5.2.1-5.3.0. All Offerors must include a response to section 5.31 services, that addresses products proposed in 5.2.1-5.3.0.

Products may be used by the states in branch offices, main government offices and data centers, and by overall government data communications providers offering carrier class services. Responses should consider this breadth of use and users.

The scope and context of this solicitation **does not include endpoints such as cell/smart phones**, **other mobile devices or devices designed exclusively for use by individual users**. It is focused on the equipment and software infrastructure required to support provisioning of a variety of network services within a modern digital network. The user context will vary from branch offices through enterprise and statewide data communication network installations. Respondents should offer a range of solutions that are appropriate for installations of varying size and complexity.

5.2.1 Data Center Application Services

Application networking solutions and technologies that enable the successful and secure delivery of applications within data centers to local, remote, and branch-office users using technology to accelerate, secure, and increase availability of both application traffic and computing resources.

5.2.1.1 Virtualized Load Balancers

- Virtual devices that act like a reverse proxy to distribute network and/or application traffic across multiple servers to improve the concurrent user capacity and overall reliability of applications.
 Capabilities should include:
 - SSL (Secure Sockets Layer) Off-loading
 - Caching capabilities
 - Layer 4 Load Balancing
 - Layer 7 Load Balancing
 - Detailed Reporting
 - Supports multiple load balancers in the same system for multiple groups
 - Supports TLS1.2

Response:

The HP 7500 Load Balancing module (JD252A) is built on the latest state-of the-art multi-core processing architecture. Its fast forwarding capabilities provide high performance load balancing to enhance application availability and provide faster response times.

It offers a complete set of capabilities to load balance users' traffic to a cluster of servers co-located in a data center. The local server load balancing capabilities allow a particular server to be accessed transparently by end users, hiding the potential overload or failure of one or several servers in the group and offering continuous access to services and applications hosted on those servers. The module monitors the status of every server in real-time to help maintain application availability. User sessions are guaranteed to flow to the same server through the session persistency capabilities of the solution.

5.2.1.2 WAN Optimization

- An appliance utilizing a collection of techniques for increasing data-transfer efficiencies across wide-area networks (WAN). Capabilities should include:
 - CIFS (Common Internet File System) acceleration
 - Data Compression
 - SSL encryption/decryption for acceleration (Optional)

- Laver 4-7 visibility
- Application Specific optimization

Response:

HP has no current product to meet this requirement.

5.2.2 Networking Software

- Software that runs on a server and enables the server to manage data, users, groups, security, applications, and other networking functions. The network operating system is designed to allow shared file and printer access among multiple computers in a network, typically a local area network (LAN), a private network or to other networks. Networking software capabilities should include:
 - Restartable Process
 - · High availability options
 - Targeted operating systems, i.e. DC, campus, core, wan, etc.
 - Operating System Efficiencies

5.2.2.1 Network Management and Automation

Software products and solutions for data center automation, cloud computing, and IT systems management.

Response:

Intelligent Management Center (IMC) is next-generation management software from HP; it provides a comprehensive platform that integrates network technologies and provides full fault, configuration, accounting, performance, and security management functionality for small-to-medium IT infrastructures.

Built from the ground up to support the Information Technology Infrastructure Library (ITIL) operational center of excellence IT practices model, IMC's single-pane management paradigm enables efficient end-to-end business management to address the stringent demands of the State's mission-critical enterprise IT operations.

Targeted at large, advanced enterprise IT and data center environments, IMC is designed on a service-oriented architecture (SOA) that uses a business application flow model as its core to enable the fully integrated management of resources, services and users.

IMC enables enterprises to grow their management in scale and seamlessly accommodate new technologies. It is compatible with Windows operating systems and supports the management of HP and third-party devices.

IMC is licensed based on the number of devices requiring management. IMC comes with support for up to 50 managed devices. Additional node licenses can be purchased to extend the node limit of IMC.

IMC delivers an extensive set of capabilities for managing large heterogeneous networks. The self-contained solution supplies scalability and high availability through a flexible distributed deployment model. With its modular design, IMC can be deployed across multiple servers, providing increased scalability and resilience.

5.2.2.2 Data Center Management and Automation

Software products and solutions that capture and automate manual tasks across servers, network, applications, and virtualized infrastructure.

Response:

IMC is next-generation management software from HP; it provides a comprehensive platform that integrates network technologies and provides full fault, configuration, accounting, performance, and security management functionality for small-to-medium IT infrastructures.

Built from the ground up to support the ITIL operational center of excellence IT practices model, IMC's single-pane management paradigm enables efficient end-to-end business management to address the stringent demands of the State's mission-critical enterprise IT operations.

Targeted at large, advanced enterprise IT and data center environments, IMC is designed on a SOA that uses a business application flow model as its core to enable the fully integrated management of resources, services and users.

IMC enables enterprises to grow their management in scale and seamlessly accommodate new technologies. It is compatible with Windows operating systems and supports the management of HP and third-party devices.

IMC is licensed based on the number of devices requiring management. IMC comes with support for up to 50 managed devices. Additional node licenses can be purchased to extend the node limit of IMC.

IMC delivers an extensive set of capabilities for managing large heterogeneous networks. The self-contained solution supplies scalability and high availability through a flexible distributed deployment model. With its modular design, IMC can be deployed across multiple servers, providing increased scalability and resilience.

5.2.2.3 Cloud Portal and Automation

Software products and solutions for cloud management with policy-based controls for provisioning virtual and physical resources.

Response:

Intelligent Management Center (IMC) is next-generation management software from HP; it provides a comprehensive platform that integrates network technologies and provides full fault, configuration, accounting, performance, and security management functionality for small-to-medium IT infrastructures.

Built from the ground up to support the Information Technology Infrastructure Library (ITIL) operational center of excellence IT practices model, IMC's single-pane management paradigm enables efficient end-to-end business management to address the stringent demands of the State's mission-critical enterprise IT operations.

Targeted at large, advanced enterprise IT and data center environments, IMC is designed on a service-oriented architecture (SOA) that uses a business application flow model as its core to enable the fully integrated management of resources, services and users.

IMC enables enterprises to grow their management in scale and seamlessly accommodate new technologies. It is compatible with Windows operating systems and supports the management of HP and third-party devices.

IMC is licensed based on the number of devices requiring management. IMC comes with support for up to 50 managed devices. Additional node licenses can be purchased to extend the node limit of IMC.

IMC delivers an extensive set of capabilities for managing large heterogeneous networks. The self-contained solution supplies scalability and high availability through a flexible distributed deployment model. With its modular design, IMC can be deployed across multiple servers, providing increased scalability and resilience.

5.2.2.4 Branch Office Management and Automation

Software products and solutions for management of branch offices. Capabilities include remote troubleshooting, device management, WAN performance monitoring.

Response:

Intelligent Management Center (IMC) is next-generation management software from HP; it provides a comprehensive platform that integrates network technologies and provides full fault, configuration,

accounting, performance, and security management functionality for small-to-medium IT infrastructures.

Built from the ground up to support the Information Technology Infrastructure Library (ITIL) operational center of excellence IT practices model, IMC's single-pane management paradigm enables efficient end-to-end business management to address the stringent demands of the State's mission-critical enterprise IT operations.

Targeted at large, advanced enterprise IT and data center environments, IMC is designed on a service-oriented architecture (SOA) that uses a business application flow model as its core to enable the fully integrated management of resources, services and users.

IMC enables enterprises to grow their management in scale and seamlessly accommodate new technologies. It is compatible with Windows operating systems and supports the management of HP and third-party devices.

IMC is licensed based on the number of devices requiring management. IMC comes with support for up to 50 managed devices. Additional node licenses can be purchased to extend the node limit of IMC.

IMC delivers an extensive set of capabilities for managing large heterogeneous networks. The self-contained solution supplies scalability and high availability through a flexible distributed deployment model. With its modular design, IMC can be deployed across multiple servers, providing increased scalability and resilience.

5.2.3 Network Optimization and Acceleration

Devices and tools for increasing data-transfer efficiencies across wide-area networks.

Response:

Intelligent Management Center (IMC) is next-generation management software from HP; it provides a comprehensive platform that integrates network technologies and provides full fault, configuration, accounting, performance, and security management functionality for small-to-medium IT infrastructures.

Built from the ground up to support the Information Technology Infrastructure Library (ITIL) operational center of excellence IT practices model, IMC's single-pane management paradigm enables efficient end-to-end business management to address the stringent demands of the State's mission-critical enterprise IT operations.

Targeted at large, advanced enterprise IT and data center environments, IMC is designed on a service-oriented architecture (SOA) that uses a business application flow model as its core to enable the fully integrated management of resources, services and users.

IMC enables enterprises to grow their management in scale and seamlessly accommodate new technologies. It is compatible with Windows operating systems and supports the management of HP and third-party devices.

IMC delivers an extensive set of capabilities for managing large heterogeneous networks. The self-contained solution supplies scalability and high availability through a flexible distributed deployment model. With its modular design, IMC can be deployed across multiple servers, providing increased scalability and resilience.

5.2.3.1 Dynamic Load Balancing

An appliance that performs a series of checks and calculations to determine which server can best service each client request in order to select the server that can successfully fulfill the client request and do so in the shortest amount of time without overloading either the server or the server farm as a whole.

Response:

The HP 7500 Load Balancing module (JD252A) is built on the latest state-of the-art multi-core processing architecture. Its fast forwarding capabilities provide high performance load balancing to enhance application availability and provide faster response times.

It offers a complete set of capabilities to load balance users' traffic to a cluster of servers co-located in a data center. The local server load balancing capabilities allow a particular server to be accessed transparently by end users, hiding the potential overload or failure of one or several servers in the group and offering continuous access to services and applications hosted on those servers. The module monitors the status of every server in real-time to help maintain application availability. User sessions are guaranteed to flow to the same server through the session persistency capabilities of the solution.

5.2.3.2 WAN Acceleration

- Appliance that optimizes bandwidth to improve the end user's experience on a wide area network (WAN). Capabilities should include:
 - CIFS acceleration
 - Data Compression
 - SSL encryption/decryption for acceleration (Optional)
 - Layer 4-7 visibility
 - Application Specific optimization

Response:

HP has no current product to meet this requirement.

5.2.3.3 High Availability and Redundancy

Limits any disruption to network uptime should an appliance face unforeseen performance issues. Transparently redistributes workloads to surviving cluster appliances without impacting communication throughout the cluster.

Response:

The HP 7500 Switch Series comprises modular, multilayer chassis switches that meet the evolving needs of integrated services networks and can be deployed in multiple network environments. A passive backplane, support for load sharing, and redundant management and fabrics help the series provide high availability. Versatile, the HP 7500 Load Balancing module (JD252A) is built on the latest state-of the-art multi-core processing architecture. Its fast forwarding capabilities provide high performance load balancing to enhance application availability and provide faster response times. It offers a complete set of capabilities to load balance users' traffic to a cluster of servers colocated in a data center. The local server load balancing capabilities allow a particular server to be accessed transparently by end users, hiding the potential overload or failure of one or several servers in the group and offering continuous access to services and applications hosted on those servers. The module monitors the status of every server in real-time to help maintain application availability. User sessions are guaranteed to flow to the same server through the session persistency capabilities of the solution.

5.2.4 Optical Networking

High capacity networks based on optical technology and components that provide routing, grooming, and restoration at the wavelength level as well as wavelength based services.

5.2.4.1 Core DWDM (Dense Wavelength Division Multiplexing) Switches

Switches used in systems designed for long haul and ultra long-haul optical networking applications.

Response:

The HP 12500 Switch Series is a family of powerful, next-generation routing switches with outstanding capacity for the network core or data center. Besides innovative Intelligent Resilient Framework (IRF) technology that provides unprecedented levels of performance and high availability, the 12500 switch series incorporate Open Application Architecture (OAA), which enables flexible deployment options for new services. These switches also have energy-efficiency features that drive down operational expenses and are ideal for organizations contemplating large-scale data center consolidations, business continuity and disaster recovery sites, metropolitan area network deployments, and other applications requiring a robust, high-performance switching platform.

- Advanced architecture: midplane, CLOS
- 13.32 Tb switching capacity
- High-density 10GbE with 288 1:1, 576 4:1 ports
- 40/100 GbE ready
- Redundant switching fabric, power supply, fan tray

The HP 10500 Switch Series sets a new benchmark for performance, reliability, and scalability with a next-generation CLOS architecture. Designed for enterprise campus core networks, the HP 10500 Switch Series enables a cloud-connected and media-rich capable infrastructure.

- In-service software upgrade (ISSU): provides an upgrade of the entire chassis
- Jumbo frames: allow high-performance backups and disaster-recovery systems
- High-density port connectivity: offers up to 12 interface module slots; provides up to 96 40 GbE ports, 576 10GbE ports, and 576 gigabit fiber/electrical ports
- HP 10500 Type A MPU w/Comware v7 OS
- HP IRF technology virtualizes up to four chassis
- Ultra-high 1/10/40 GbE density; 100 GbE-ready
- More than 11 terabits-per-second switching capacity

The HP 7500 Switch Series comprises modular, multilayer chassis switches that meet the evolving needs of integrated services networks and can be deployed in multiple network environments, including the enterprise LAN core, aggregation layer, and wiring closet edge. The series switches offer 40 GbE connectivity and cost-effective, wire-speed 10-Gigabit Ethernet ports to safeguard the throughput and bandwidth needed for your mission-critical data and high-speed communications. A passive backplane, support for load sharing, and redundant management and fabrics help the series provide high availability. Moreover, these switches deliver wire-speed Layer 2 and Layer 3 routing services for the most demanding applications with hardware-based IPv4 and IPv6 support.

- Versatile, high-performance modular switches
- Enterprise LAN core, aggregation, and edge
- Extensive switching and routing, IPv6, MPLS
- Advanced functionality with service modules
- Robust network and service virtualization

5.2.4.2 Edge Optical Switches

Provide entry points into the enterprise or service provider core networks.

Response:

The HP 12500 Switch Series is a family of powerful, next-generation routing switches with outstanding capacity for the network core or data center. Besides innovative Intelligent Resilient

Framework (IRF) technology that provides unprecedented levels of performance and high availability, the 12500 switch series incorporate Open Application Architecture (OAA), which enables flexible deployment options for new services. These switches also have energy-efficiency features that drive down operational expenses and are ideal for organizations contemplating large-scale data center consolidations, business continuity and disaster recovery sites, metropolitan area network deployments, and other applications requiring a robust, high-performance switching platform.

- Advanced architecture: midplane, CLOS
- 13.32 Tb switching capacity
- High-density 10GbE with 288 1:1, 576 4:1 ports
- 40/100 GbE ready
- Redundant switching fabric, power supply, fan tray

The HP 10500 Switch Series sets a new benchmark for performance, reliability, and scalability with a next-generation CLOS architecture. Designed for enterprise campus core networks, the HP 10500 Switch Series enables a cloud-connected and media-rich capable infrastructure.

- In-service software upgrade (ISSU): provides an upgrade of the entire chassis
- Jumbo frames: allow high-performance backups and disaster-recovery systems
- High-density port connectivity: offers up to 12 interface module slots; provides up to 96 40 GbE ports, 576 10GbE ports, and 576 gigabit fiber/electrical ports
- HP 10500 Type A MPU w/Comware v7 OS
- HP IRF technology virtualizes up to four chassis
- Ultra-high 1/10/40 GbE density; 100 GbE-ready
- More than 11 terabits-per-second switching capacity

The HP 7500 Switch Series comprises modular, multilayer chassis switches that meet the evolving needs of integrated services networks and can be deployed in multiple network environments, including the enterprise LAN core, aggregation layer, and wiring closet edge. The series switches offer 40 GbE connectivity and cost-effective, wire-speed 10-Gigabit Ethernet ports to safeguard the throughput and bandwidth needed for your mission-critical data and high-speed communications. - Versatile, high-performance modular switches
- Enterprise LAN core, aggregation, and edge
- Extensive switching and routing, IPv6, MPLS
- Advanced functionality with service modules
- Robust network and service virtualization

5.2.4.3 Optical Network Management

Provides capabilities to manage the optical network and allows operators to execute end-to-end circuit creation.

Response:

HP Intelligent Management Center (IMC) is a stand-alone, comprehensive management platform for delivering next generation, integrated, modular network management capabilities that efficiently meet the needs of advanced, heterogeneous enterprise networks. HP IMC is designed on a service-oriented architecture (SOA) using a business application flow model as the core and featuring an on-demand, modularized structure. The combination allows the efficient implementation of end-to-end business management, while HP IMC software's modular design allows for the effective integration of traditionally separate management tools. Together, they provide complete management of resources, services, and users. HP IMC provides the ability to manage virtual network devices such as servers, virtual machines, and virtual switches and provides the ability to

create and move virtual machines within or across datacenters. The software is compatible with Microsoft® Windows® Server and supports the management of HP and third-party devices.

- · Highly flexible, scalable deployment models
- Powerful administration control
- Rich resource management
- Detailed performance monitoring and management
- Flexible centralized reporting

HP IMC is a modular, comprehensive resource management platform. With its extensive device support, IMC provides true end-to-end management for the entire network, and entire operation cycle.

5.2.4.4 IP over DWDM (IPoDWDM)

A device utilized to integrate IP Routers and Switches in the OTN (Optical Transport Network).

Response:

The HP 12500 Switch Series is a family of powerful, next-generation routing switches with outstanding capacity for the network core or data center. Besides innovative Intelligent Resilient Framework (IRF) technology that provides unprecedented levels of performance and high availability, the 12500 switch series incorporate Open Application Architecture (OAA), which enables flexible deployment options for new services. These switches also have energy-efficiency features that drive down operational expenses and are ideal for organizations contemplating large-scale data center consolidations, business continuity and disaster recovery sites, metropolitan area network deployments, and other applications requiring a robust, high-performance switching platform.

- Advanced architecture: midplane, CLOS
- 13.32 Tb switching capacity
- High-density 10GbE with 288 1:1, 576 4:1 ports
- 40/100 GbE ready
- Redundant switching fabric, power supply, fan tray

The HP 10500 Switch Series sets a new benchmark for performance, reliability, and scalability with a next-generation CLOS architecture. Designed for enterprise campus core networks, the HP 10500 Switch Series enables a cloud-connected and media-rich capable infrastructure.

- In-service software upgrade (ISSU): provides an upgrade of the entire chassis
- Jumbo frames: allow high-performance backups and disaster-recovery systems
- High-density port connectivity: offers up to 12 interface module slots; provides up to 96 40 GbE ports, 576 10GbE ports, and 576 gigabit fiber/electrical ports
- HP 10500 Type A MPU w/Comware v7 OS
- HP IRF technology virtualizes up to four chassis
- Ultra-high 1/10/40 GbE density; 100 GbE-ready
- More than 11 terabits-per-second switching capacity

The HP 7500 Switch Series comprises modular, multilayer chassis switches that meet the evolving needs of integrated services networks and can be deployed in multiple network environments, including the enterprise LAN core, aggregation layer, and wiring closet edge. The series switches offer 40 GbE connectivity and cost-effective, wire-speed 10-Gigabit Ethernet ports to safeguard the throughput and bandwidth needed for your mission-critical data and high-speed communications. A passive backplane, support for load sharing, and redundant management and fabrics help the series provide high availability. Moreover, these switches deliver wire-speed Layer 2 and Layer 3 routing services for the most demanding applications with hardware-based IPv4 and IPv6 support.

- Versatile, high-performance modular switches
- Enterprise LAN core, aggregation, and edge

- Extensive switching and routing, IPv6, MPLS
- Advanced functionality with service modules
- Robust network and service virtualization

The HP 5830AF Switch Series is a family of high-density 1 GbE top-of-rack data center and campus switches that are a part of the HP FlexNetwork architecture's HP FlexFabric solution module. The two models, the 5830AF-48G and 5830AF-96G switches, are ideally suited for deployments at the server access layer in medium-sized and large enterprise data centers and campus networks. The HP 5830AF-48G Switch delivers 48 1-GbE ports and up to four 10GbE ports in a space-saving 1RU package, while the HP 5830AF-96G Switch provides an industry-leading 96 1-GbE ports and up to 10 GbE uplink ports in a 2RU form factor.

- Stackable, high port density for high scalability
- HP IRF technology for simpler two-tier networks
- Ultradeep (1 GB and 3 GB) packet buffers
- Full L2/L3 features, IPv4 and IPv6 dual stack
- Lower OpEx and greener data centers

5.2.5 Routers

A device that forwards data packets along networks. A router is connected to at least two networks, commonly two LANs or WANs or a LAN and its ISP's network. Routers are located at gateways, the places where two or more networks connect, and are the critical device that keeps data flowing between networks and keep the networks connected to the Internet.

5.2.5.1 Branch Routers

A multiservice router typically used in branch offices or locations with limited numbers of users and supports flexible configurations/feature. For example: security, VoIP, wan acceleration, etc.

Response:

HP MSR50 Series routers are a component of the HP FlexBranch solution, which is part of the HP FlexNetwork architecture.

These routers are designed for large branch offices, regional offices, and enterprise deployments that require high-performance converged routing, switching, wireless, security, voice, and virtualized applications.

The MSR50 Series has a rich set of modular WAN, LAN, and voice interface connectivity options, as well as embedded hardware-based encryption and voice processing. With optional Open Architecture Platform (OAP) modules, it can deliver VMware vSphere, an industry-leading virtualization platform that integrates third-party applications with the router.

- High-performance, modular LAN/WAN router
- Converged routing, switching, wireless, voice, and security
- Third-party applications and virtualized services platform
- Embedded encryption, firewall, and other security features
- High reliability, with available dual power supplies and hot-swappable modules

HP MSR30 Series routers are a component of the HP FlexBranch solution, which is part of the HP FlexNetwork architecture.

MSR30 Series routers are ideal for the branch and regional offices of medium to large enterprises that require high-performance integrated routing, switching, security, wireless, voice, and virtualized applications.

With a rich set of modular WAN, LAN, and voice interface connectivity options in a single device, these routers help reduce operating and capital costs and reduce complexity by enabling remote users in branch locations to securely and reliably access enterprise applications and corporate resources.

- Converged routing, switching, voice, and security
- Third-party applications and virtualized services platform
- Embedded encryption, firewall, and security features
- Unified wired and wireless WAN and LAN
- Support for AC/DC power and PoE

The HP MSR20 router series is a component of the HP FlexBranch solution, which is part of the HP FlexNetwork architecture. It features a modular design that delivers unmatched flexibility for small branch offices and small to medium-sized businesses while reducing complexity, simplifying management, and increasing control. MSR20 series routers provide a full-featured, resilient routing platform, including IPv6 and MPLS, up to 180 Kpps forwarding capacity, and 100 Mbps encryption. These products offer lasting investment protection, and help reduce capital and operating expenses. MSR20 series routers provide an agile, flexible network infrastructure that offers the ability to quickly adapt to changing business requirements while delivering integrated, concurrent services on a single, easy-to-manage platform.

- Converged routing, switching, voice, security
- Embedded encryption, firewall, security features
- Modular WAN/LAN interface options
- Unified wired and wireless
- Single-pane-of-glass management

The HP MSR20-1x Series is a component of the HP FlexBranch solution, which is part of the HP FlexNetwork architecture. MSR20-1X routers are full-featured, economical routers designed for converged wired and wireless WAN and LAN environments at small remote branch offices and small to medium-sized businesses. HP MSR20-1x series routers deliver high-performance integrated routing, switching, security, wireless, and voice services while reducing complexity, simplifying management, and increasing control. These routers enable an agile and flexible network infrastructure that can quickly adapt to changing business requirements while delivering integrated services on a single, easy-to-manage platform.

- Routing, switching, security, wireless, and voice
- Compact design for both desktop and rackmounting
- Fixed-port and modular WAN/LAN interface options
- Embedded encryption, firewall, security features
- Single-pane-of-glass management

The HP MSR900 router series is a component of the HP FlexBranch module of the HP FlexNetwork architecture. HP MSR900 series routers deliver integrated routing, switching, security, and 802.11b/g wireless LAN in a single box for secure, reliable small branch connectivity. These routers are perfect "branch-in-a-box" appliances that deliver converged network solutions, including data, voice and video, IPv6 support, and robust Quality of Service (QoS), and help ensure that they can handle both current enterprise networking applications as well as the future connectivity and capacity demands of an HP FlexNetwork architecture. Additionally, a standards-based design provides complete interoperability in multivendor environments.

- Converged routing, switching, security, and WLAN
- Integrated 2 Fast Ethernet WAN, 4/8 LAN on board
- Unified 802.11b/g wireless LAN and 3G wireless WAN
- Embedded encryption, firewall, security features
- A unified management platform

The HP MSR93x Series features high-performance, small-branch routers that deliver integrated routing, switching, security, SIP, integrated 3G, and 4G USB options. These solutions deliver up to 300 Kpps forwarding with comprehensive IPv4 and IPv6 routing, MPLS, QoS, firewall, NAT, VPN, switching, voice, and wireless capabilities in a compact, fixed, form factor. The MSR93x Series has 1 GigE WAN, 4 GigE LAN ports, serial, and optional dual 3G WAN. Additionally, the MSR93x Series is based on open standards for seamless integration within small-branch deployments.

- Converged high-performance routing, switching, security, SIP, and 300 Kpps performance
- Integrated 1 Gigabit Ethernet WAN, 4 Gigabit Ethernet LAN, and optional serial port
- Integrated 3G, dual 3G options, and external 4G USB WWAN
- Embedded encryption, firewall, NAT, DVPN, GDVPN, security features
- Unified OS, zero-touch solution, and single-pane-of-glass management

5.2.5.2 Network Edge Routers

A specialized router residing at the edge or boundary of a network. This router ensures the connectivity of its network with external networks, a wide area network or the Internet. An edge router uses an External Border Gateway Protocol, which is used extensively over the Internet to provide connectivity with remote networks.

Response:

HP MSR50 Series routers are a component of the HP FlexBranch solution, which is part of the HP FlexNetwork architecture.

These routers are designed for large branch offices, regional offices, and enterprise deployments that require high-performance converged routing, switching, wireless, security, voice, and virtualized applications.

The MSR50 Series has a rich set of modular WAN, LAN, and voice interface connectivity options, as well as embedded hardware-based encryption and voice processing. With optional Open Architecture Platform (OAP) modules, it can deliver VMware vSphere, an industry-leading virtualization platform that integrates third-party applications with the router.

- High-performance, modular LAN/WAN router
- Converged routing, switching, wireless, voice, and security
- Third-party applications and virtualized services platform
- Embedded encryption, firewall, and other security features
- High reliability, with available dual power supplies and hot-swappable modules

HP MSR30 Series routers are a component of the HP FlexBranch solution, which is part of the HP FlexNetwork architecture.

MSR30 Series routers are ideal for the branch and regional offices of medium to large enterprises that require high-performance integrated routing, switching, security, wireless, voice, and virtualized applications.

With a rich set of modular WAN, LAN, and voice interface connectivity options in a single device, these routers help reduce operating and capital costs and reduce complexity by enabling remote users in branch locations to securely and reliably access enterprise applications and corporate resources.

- Converged routing, switching, voice, and security

These solutions deliver up to 300 Kpps forwarding with comprehensive IPv4 and IPv6 routing, MPLS, QoS, firewall, NAT, VPN, switching, voice, and wireless capabilities in a compact, fixed, form factor. The MSR93x Series has 1 GigE WAN, 4 GigE LAN ports, serial, and optional dual 3G WAN. Additionally, the MSR93x Series is based on open standards for seamless integration within small-branch deployments.

- Converged high-performance routing, switching, security, SIP, and 300 Kpps performance
- Integrated 1 Gigabit Ethernet WAN, 4 Gigabit Ethernet LAN, and optional serial port
- Integrated 3G, dual 3G options, and external 4G USB WWAN
- Embedded encryption, firewall, NAT, DVPN, GDVPN, security features
- Unified OS, zero-touch solution, and single-pane-of-glass management

5.2.5.3 Core Routers

High performance, high speed, low latency routers that enable Enterprises to deliver a suite of data, voice, and video services to enable next-generation applications such as IPTV and Video on Demand (VoD), and Software as a Service (SaaS).

Response:

The HP 6600 Router Series is a family of high-performance WAN routers, ideal for campus and data center WAN edge and aggregation deployments.

These routers are built with a multi-core architecture offering distributed or centralized processing to help balance performance and cost. The HP 6600 series delivers robust routing, security, full Layer 2 switching, and modular high-density WAN and LAN interface options, all integrated in a single high-performance routing platform.

In addition, the HP 6600 Router Series features robust carrier-class reliability capabilities to help minimize disruption from network or system failures.

- High-performance WAN routing
- Multi-core distributed or centralized processing
- · Comprehensive routing, switching, and security
- Embedded hardware encryption
- Robust high availability and resiliency

The HP HSR6600 Router Series is made up of high-performance services WAN routers that are ideal for small- to medium-sized campus WAN edge and aggregation, as well as high-end branch deployments.

These routers are built with a compact multi-core centralized processing architecture that delivers, in a 2 RU form factor, robust routing, security, full Layer 2 switching, and modular WAN and LAN interface options, all integrated in a single fast and powerful routing platform.

In addition, these routers feature robust carrier-class reliability capabilities to reduce disruption from network or system failures.

- High-performance WAN routing
- Compact, multi-core centralized processing architecture
- Comprehensive routing, switching, and security
- Modular WAN and LAN connectivity options
- Robust high availability and resiliency

The HP HSR6800 Router Series is a portfolio of high-performance WAN services routers that are ideal for large-scale data center and campus WAN networks.

These routers are built with a multicore distributed processing architecture that scales up to 420 Mpps forwarding and up to 2 Tbps switch capacity. They deliver robust routing (MPLS, IPv4, IPv6, dynamic routing, and nested QoS), security (stateful firewall, IPSec/Dynamic VPN, DoS protection, and NAT), full Layer 2 switching, traffic analysis capabilities, and high-density 10GbE (and 40/100 GbE-ready) WAN interface options—all integrated in a single high-performance routing platform.

- High-performance services with up to 420 Mpps forwarding and 2 Tbps switching capacity
- Multicore, distributed processing architecture
- Comprehensive routing, switching, and security
- High-density WAN connections
- Carrier-class resiliency

The HP 8800 Router Series is a family of high-end enterprise WAN routers that operate at the WAN edge and core layers of campus and data center locations. These routers enable high-performance WAN routing with up to 864 Mpps forwarding and up to 1.44 Tbps switching capacity.

Comprehensive WAN routing, switching, and security services are provided by the 8800 Router Series, with modular, high-density WAN/LAN options (Ethernet, 10GbE, OC-3~192, serial, etc.), and carrier-class reliability, all in a single integrated routing platform. Ideal for high-density 10 Gigabit Ethernet deployments, the HP 8800 Router Series helps enterprises deliver high-speed applications across the WAN to all users, regardless of location.

- Distributed architecture with four independent planes
- High-performance routing with up to 864 Mpps
- High-density WAN and LAN (Ethernet, 10GbE, OC-3~192)
- Carrier-class reliability
- Advanced routing, switching, and security features

5.2.5.4 Service Aggregation Routers

Provides multiservice adaptation, aggregation and routing for Ethernet and IP/MPLS networks to enable service providers and enterprise edge networks simultaneously host resource-intensive integrated data, voice and video business and consumer services.

Response:

The HP 6600 Router Series is a family of high-performance WAN routers, ideal for campus and data center WAN edge and aggregation deployments.

These routers are built with a multi-core architecture offering distributed or centralized processing to help balance performance and cost. The HP 6600 series delivers robust routing, security, full Layer 2 switching, and modular high-density WAN and LAN interface options, all integrated in a single high-performance routing platform.

In addition, the HP 6600 Router Series features robust carrier-class reliability capabilities to help minimize disruption from network or system failures.

- High-performance WAN routing
- Multi-core distributed or centralized processing
- Comprehensive routing, switching, and security
- Embedded hardware encryption
- Robust high availability and resiliency

The HP HSR6600 Router Series is made up of high-performance services WAN routers that are ideal for small- to medium-sized campus WAN edge and aggregation, as well as high-end branch deployments.

These routers are built with a compact multi-core centralized processing architecture that delivers, in a 2 RU form factor, robust routing, security, full Layer 2 switching, and modular WAN and LAN interface options, all integrated in a single fast and powerful routing platform.

In addition, these routers feature robust carrier-class reliability capabilities to reduce disruption from network or system failures.

- High-performance WAN routing
- Compact, multi-core centralized processing architecture
- Comprehensive routing, switching, and security
- Modular WAN and LAN connectivity options
- Robust high availability and resiliency

The HP HSR6800 Router Series is a portfolio of high-performance WAN services routers that are ideal for large-scale data center and campus WAN networks.

These routers are built with a multicore distributed processing architecture that scales up to 420 Mpps forwarding and up to 2 Tbps switch capacity. They deliver robust routing (MPLS, IPv4, IPv6, dynamic routing, and nested QoS), security (stateful firewall, IPSec/Dynamic VPN, DoS protection, and NAT), full Layer 2 switching, traffic analysis capabilities, and high-density 10GbE (and 40/100 GbE-ready) WAN interface options—all integrated in a single high-performance routing platform.

- High-performance services with up to 420 Mpps forwarding and 2 Tbps switching capacity
- Multicore, distributed processing architecture
- Comprehensive routing, switching, and security
- High-density WAN connections
- Carrier-class resiliency

The HP 8800 Router Series is a family of high-end enterprise WAN routers that operate at the WAN edge and core layers of campus and data center locations. These routers enable high-performance WAN routing with up to 864 Mpps forwarding and up to 1.44 Tbps switching capacity.

Comprehensive WAN routing, switching, and security services are provided by the 8800 Router Series, with modular, high-density WAN/LAN options (Ethernet, 10GbE, OC-3~192, serial, etc.), and carrier-class reliability, all in a single integrated routing platform. Ideal for high-density 10 Gigabit Ethernet deployments, the HP 8800 Router Series helps enterprises deliver high-speed applications across the WAN to all users, regardless of location.

- Distributed architecture with four independent planes
- High-performance routing with up to 864 Mpps
- High-density WAN and LAN (Ethernet, 10GbE, OC-3~192)
- Carrier-class reliability
- · Advanced routing, switching, and security features

5.2.5.5 Carrier Ethernet Routers

High performance routers that enable service providers to deliver a suite of data, voice, and video services to enable next-generation applications such as IPTV, Video on Demand (VoD), and Software as a Service (SaaS).

Response:

The HP HSR6800 Router Series is a portfolio of high-performance WAN services routers that are ideal for large-scale data center and campus WAN networks.

These routers are built with a multicore distributed processing architecture that scales up to 420 Mpps forwarding and up to 2 Tbps switch capacity. - Distributed architecture with four independent planes
- High-performance routing with up to 864 Mpps
- High-density WAN and LAN (Ethernet, 10GbE, OC-3~192)
- Carrier-class reliability
- Advanced routing, switching, and security features

5.2.6 Security

5.2.6.1 Data Center and Virtualization Security Products and Appliances

Products designed to protect high-value data and data center resources with threat defense and policy control.

Response:

HP Intelligent Management Center (IMC) is a modular, comprehensive resource management platform. With its extensive device support, IMC provides true end-to-end management for the entire network, and entire operation cycle. Virtual Application Networks Manager is an IMC module, which delivers a template based approach for managing network configuration policies, yielding consistency and reliability across network infrastructure. Administrators define the policies in a template, which will be applied as a configuration policy to the edge switch associated with the virtual machine of interest. Virtual machine network connectivity is automated and orchestrated by IMC VAN Manager which lends to the acceleration of application deployment and service rollout and greatly reduces risk during virtual machine migration. The module includes a plugin into the VMware hypervisor manager which enables the connection policies defined in IMC to be applied to the virtual machine.

- Automation and orchestration of edge configuration
- Template based approach for policy management
- Virtual Machine migration
- Edge switch management

5.2.6.2 Intrusion Detection/Protection and Firewall Appliances

- Provide comprehensive inline network firewall security from worms, Trojans, spyware, key
 loggers, and other malware. This includes Next-Generation Firewalls (NGFW), which offer a
 wire-speed integrated network platform that performs deep inspection of traffic and blocking of
 attacks. Intrusion Detection/Protection and Firewall Appliances should provide:
 - Non-disruptive in-line bump-in-the-wire configuration
 - Standard first-generation firewall capabilities, e.g., network-address translation (NAT), stateful protocol inspection (SPI) and virtual private networking (VPN), etc.
 - Application awareness, full stack visibility and granular control
 - Capability to incorporate information from outside the firewall, e.g., directory-based policy, blacklists, white lists, etc.
 - Upgrade path to include future information feeds and security threats
 - SSL decryption to enable identifying undesirable encrypted applications (Optional)

Response:

Built on the latest state-of-the-art multicore CPU platform and with advanced hardware acceleration, the HP Firewall Series enables advanced scalable network protection from the network core to the network edge with firewall throughput at up to 40 Gbps. The series also features rich VPN abilities, including GRE, L2TP, and IPSec tunneling technologies, which makes it ideal for building VPN gateways. The appliances combine built-in protection against denial-of-service (DoS) attacks, hacking attacks, zonal and virtual stateful packet inspection firewalls, application bandwidth management, audio/video IP multicast routing, and email attachment filtering. The series includes all the advanced security capabilities found in the unified software platform of HP switches and routers that deliver easy integration, simple management, and network deployment infrastructure, lowering a network's total cost of ownership.

- High performance with up to 40 Gbps throughput
- Advanced virtual firewall
- Rich VPN functions, IPSec/GRE/L2TP
- Comprehensive security protection

Carrier-grade reliability

The HP TippingPoint Intrusion Prevention System (IPS) provides 20Gbps of in-line, real-time protection, providing proactive network security for today's and tomorrow's real-world networks and data centers.

- Industry-proven proactive network security
- Up to 20 Gbps IPS protection
- Carrier-class reliability and redundancy
- Security compliance best practices
- Industry leading security research team HP DVLabs

HP A7500 SSL VPN Module works on HP A7500 (JD253A) switches delivers a fast, secure access method for remote user visiting internal resource. Web browser based, no specific client required makes it to be a convenient and low-cost solution to enterprise.

5.2.6.3 Logging Appliances and Analysis Tools

Solutions utilized to collect, classify, analyze, and securely store log messages.

Response:

HP Intelligent Management Center (IMC) is a modular, comprehensive resource management platform. With its extensive device support, IMC provides true end-to-end management for the entire network, and entire operation cycle. The IMC module Endpoint Admission Defense (EAD) Software reduces network exposure by integrating security policy management and endpoint posture assessment to identify and isolate risks at the network edge. The security policy component allows administrators to control endpoint admission based on an endpoint's identity and posture. If an endpoint is not compliant with software, network assets can be protected by blocking or isolating an endpoint's access. EAD reduces the risk of malicious code infections or other security breaches by detecting endpoint patches, viruses, Address Resolution Protocol attacks, abnormal traffic, the installation and running of sensitive software, as well as the status of system services. EAD provides continual monitoring of endpoints.

- Enforces posture compliance
- Fully integrates all functions
- · Reduces infection risk of network terminal
- Automatically blocks suspicious traffic
- Protects sensitive data

5.2.6.4 Secure Edge and Branch Integrated Security Products

Network security, VPN, and intrusion prevention for branches and the network edge. Products typically consist of appliances or routers.

Response:

HP Intelligent Management Center (IMC) software is a modular, comprehensive resource management platform. With its extensive device support, IMC software provides true end-to-end management for the entire network, as well as the entire operation cycle.

IMC User Access Management (UAM) software is an IMC module that supports user identity authentication based on the access policies associated with infrastructure resources, such as routers, switches, and servers. UAM software extends management to wired, wireless, and remote network users, enabling the integration, correlation, and collaboration of network device management and user management on a single unified platform.

The IMC UAM software solution provides a full-featured RADIUS server that supports centralized authentication, authorization, and accounting management of endpoints that connect and use network services. Policy management provides access control with tiered privilege levels. As a result, IMC UAM software helps reduce vulnerabilities and security breaches.

- One central database of users and available services
- Advanced reporting capabilities
- Directory of network-attached devices and endpoints
- Supports IEEE 802.1X/EAP/PAP/CHAP/MS-CHAP/MS-CHAPv2
- Access to LDAP-compliant directory services

5.2.6.5 Secure Mobility Products

Delivers secure, scalable access to corporate applications across multiple mobile devices.

Response:

HP Intelligent Management Center (IMC) Smart Connect w/WLAN Manager Virtual Appliance Software offers a comprehensive bring your own device (BYOD) solution with easy onboarding, provisioning, and monitoring of users and clients. With this software, HP moves beyond the basic BYOD requirements of identity-based access by offering a comprehensive solution that includes single policy enforcement and converged network management across wired and wireless environments. Unified BYOD monitoring further enables administrators to plan for capacity and comply with regulatory requirements.

The HP IMC Smart Connect w/WLAN Manager solution is based on HP Intelligent Management Center Standard Edition Software and includes HP IMC User Access Manager Software for user access, guest access management, device fingerprinting, self-registration, and HP IMC Wireless Services Manager (WSM) Software for unified wired and wireless network management.

HP IMC Smart Connect w/WLAN Manager Virtual Appliance Software is offered as a virtualization appliance to allow easy installation and configuration. It includes an embedded SQL database and Red Hat Linux operating system, which are delivered in an OVA file. HP IMC Smart Connect w/WLAN Manager Virtual Appliance Software includes a license for 100 device nodes, 200 users, and 50 access points. Identity-based access, advanced device profiling, and real-time traffic quarantining Converged network support with universal policies for all wired and wireless devices Seamless policy enforcement based on user and/or device Unified monitoring of BYOD traffic and user behavior Simplified deployment and configuration

5.2.6.6 Encryption Appliances

A network security device that applies crypto services at the network transfer layer - above the data link level, but below the application level.

Response:

The HP TippingPoint S1500 SSL Appliance gives you accelerated Secure Sockets Layer (SSL) offloading and bridging for high-performance intrusion prevention system (IPS) inspection of SSL secure encrypted traffic. This increases security coverage in next-generation data centers and helps you prevent encrypted attacks from compromising web servers and web applications and helps your business address compliance requirements without impacting the performance or availability of the network.

- Accelerate SSL offloading and bridging for
- Increase the performance of your IPS in inspecting SSL secure encrypted traffic
- Increase security coverage
- Prevent encrypted attacks from compromising web servers and web applications
- Meet compliance requirements without impacting network performance or availability

5.2.6.7 On-premise and Cloud-based services for Web and/or Email Security

 Solutions that provide threat protection, data loss prevention, message level encryption, acceptable use and application control capabilities to secure web and email communications.

Response:

The HP 200 Unified Threat Management (UTM) Appliance Series comprises a group of purpose-built security devices designed to provide comprehensive protection for distributed environments such as branch offices and remote sites. Utilizing a state-of-the-art multicore platform and advanced hardware acceleration, the U200 UTM appliance series delivers robust protection against malicious attacks that could compromise networks and their critical assets. Sharing the same proven technology as the HP VPN Firewall Module Family, the U200 UTM appliance series provides protection against known threats such as malware and denial-of-service (DoS) attacks while providing optional services such as antivirus, antispam, and URL filtering capabilities, thereby providing manageable, flexible security options for organizations and their unique deployment needs.

- Flexible security zone and virtual firewall
- Advanced VPN
- Comprehensive threat protection
- Antivirus, antispam, and URL filtering options
- Intelligent Web-based management

5.2.6.8 Secure Access

- Products that provide secure access to the network for any device, including personally owned mobile devices (laptops, tablets, and smart phones). Capabilities should include:
 - · Management visibility for device access
 - Self-service on-boarding
 - Centralized policy enforcement
 - · Differentiated access and services
 - Device Management

Response:

The HP BYOD solution pivots around HP Intelligent Management Center (IMC), which offers you a single-pane-of-glass network and user management solution for your entire enterprise network. HP IMC's modular design integrates traditionally separate management tools, network access services, policy management, and user and traffic monitoring that delivers to your enterprise a single-pane-of-glass application for BYOD essentials: Device On-boarding, Provisioning and Monitoring. IMC goes beyond the unified BYOD essentials by delivering converged management across various networks—physical and virtual, wired and wireless, and applies the appropriate security policies to the users and devices (personal or company-owned) accessing your network.

For granular network and application access, HP IMC manages user access control and identity-based policies to help your IT managers overcome the complex security challenges associated with the widespread adoption of user-owned devices. Your IT administrators can establish and enforce granular and consistent network access policies for wired and wireless users to protect your IT assets, mitigate risks, optimize network availability, and ensure regulatory compliance. HP BYOD solution supports wired and wireless device on-boarding, provisioning, and monitoring. Deployment of the BYOD solution delivered through IMC comes with ease because of IMC's modular design. The modular design gives you the flexibility to add functionality as needed without the need to deploy separate management tools.

Mobile device on-boarding: IMC supports user authentication based on identity, device location, time, and endpoint security health. Users can be assigned automatically into the appropriate VLAN based on their identity, device type, device posture, time of day, application type, or other factors. Access to the network can be granted based on a device's IP or media access control (MAC)

address, which is particularly useful for printers, IP phones, and barcode scanners. Because IMC centralizes network access and policy enforcement with network management capabilities, your IT administrators can integrate, correlate, and collaborate user and network device management from a single platform. By providing authentication and authorization for devices accessing your network, IMC helps you reduce vulnerabilities and security breaches. IMC fully supports the IEEE 802.1X network access control standard and leverages HP advanced fingerprinting technologies for Apple iOS and Android devices and comes with a self-registration portal for guests and personally-owned device to automate the on-boarding process and reduce the administrative burden so that you can support your organizations' BYOD initiatives quickly and easily.

Provisioning: You can further minimize security risks through HP IMC-integrated security policy management and endpoint posture assessment. This allows your administrators to control endpoint admission based on the device's identity and posture. If an endpoint is not compliant with the established policies, access to the network can be isolated for remediation or blocked to protect your network assets. IMC security policy component further provides non-intrusive actions to secure your network edge proactively, including end point monitoring and notification. This component also supports security evaluation, security threat location, and security event awareness. To ensure continued security HP IMC policy component continually monitors each endpoint's traffic, installed software running processes, and registry changes. These functions enable all endpoints connected to your network to be secure.

Monitoring: With HP IMC, administrators will have full visibility into what users are accessing from personal and company issued devices. Since IMC can provide information regarding what users have accessed from their device, you will be able to differentiate between business oriented access versus recreational access.

Integration with network resource usage data such as network address translation (NAT), flow records provide you with full visibility of BYOD traffic and compliance reporting. Based on this data, you can set the appropriate network access policies, and manage network resources and capacity more effectively across wired and wireless networks.

5.2.7 Storage Networking

High-speed network of shared storage devices connecting different types of storage devices with data servers.

5.2.7.1 Director Class SAN (Storage Area Network) Switches and Modules

A scalable, high-performance, and protocol-independent designed primarily to fulfill the role of core switch in a core-edge Fibre Channel (FC), FCOE or similar SAN topology. A Fibre Channel director is, by current convention, a switch with at least 128 ports. It does not differ from a switch in core FC protocol functionality. Fibre Channel directors provide the most reliable, scalable, high-performance foundation for private cloud storage and highly virtualized environments.

Response:

HP SN8000B and DC SAN Director Family

The HP SN8000B and DC SAN Directors are part of the B-series portfolio and are the industry's leading Fibre Channel switching infrastructure solutions, combining breakthrough performance, scalability, and energy efficiency with long-term investment protection. The SN8000B Directors were designed to unleash the full potential of private cloud storage and virtualization. With unmatched scalability, 16 Gbps performance, reliability, and functionality, the SN8000B Directors are the strategic platform for transforming current SAN fabrics into cloud-optimized SANs. For SAN fabrics not requiring the performance of the 16 Gbps platforms, the DC SAN Directors are the most advanced 8 Gbps switching platforms in the industry.

All B-series SAN Directors are based on the same core technology and consist of two form factors. The SN8000B 8-Slot Director and DC SAN Backbone Director are both a 14U chassis and support 8 Fibre Channel blades for large enterprises to deliver maximum scalability, performance, and

functionality. The SN8000B 4-Slot Director and the DC04 SAN Director are both a 9U chassis and support 4 Fibre Channel blades for mid-size enterprises as the core of their SANs.

The SN8000B SAN Directors are based on 7th generation technology and provide up to 384 16Gb or 512 8Gb FC ports. These directors also provide up to 32 QSFP based Inter Chassis Links (ICLs) which are equivalent to 128 16Gb FC ports. They support a range of fibre channel blade options including 32 port and 48 port 16Gb blades, 32 port and 48 port 8Gb enhanced blades and the 64 port 8Gb blade. They provide up to 8.2Tbps of total aggregate bandwidth and 512Gbps of slot bandwidth and are the ideal foundation for private cloud storage and highly virtualized environments.

The DC SAN Directors are based on 6th generation technology and provide up to 512 8Gb FC ports. They support several types of port blades -16, 32, 48, and 64 port 8Gb blades. They provide up to 4.1Tbps of total aggregate bandwidth and 256Gbps of slot bandwidth and are ideally suited to address the problems of traditional data centers

B-series SAN Directors offer multi-protocol support through various blades with autosensing support, depending on model, for 16/10/8/4/2 Gbps Fibre Channel, FICON, FCIP, FCoE (not supported with SN8000B) and data at rest Encryption.

HP SN8000C Directors, HP C-series Family (MDS 9506/ MDS 9509/ MDS 9513)

The HP C-series, SN8000C Directors deliver many unique innovations for constructing powerful, large scale storage networks. With these innovations, users can build highly scalable, always available, high performance storage network solutions with comprehensive security and unified management. The SN8000C Directors have multiple layers of intelligence, including multi-protocol support (Fibre Channel, iSCSI, FCIP, and "future proofed" for FCoE), Virtual SANs (VSANs), embedded diagnostics and role-based security.

The SN8000C Directors deliver industry-leading scalability and performance (up to 8.4 Terabits per second internal system bandwidth), high port density (up to 528-ports in an SN8000C 13-Slot Director) and high availability to lower TCO and enable integrated SAN infrastructures. HP delivers the SN8000C Directors with high availability features inherent in the design. The base units include a 6, 9 or 13 slot modular chassis with dual supervisor 2A modules and power supplies to help ensure smooth, continuous operation and non-disruptive upgrade capability. The SN8000C 13-Slot Director also includes dual Fabric3 Modules making even the backplane fabric both redundant and hot-swappable, thereby taking fabric availability to a higher plane. The open expansion slots of the SN8000C Directors can be filled by optional MDS 9000 Family Modules, which include32 and 48 port 8Gb Advanced Fibre Channel Modules and 24 and 48 port 8Gb performance Modules .Additionally the SN8000C Directors can be filled with the 48-Port Host Optimized Modules which provide 4 8Gb and 44 4Gb ports. Lastly, the SN8000C Directors can be populated with the 4-port 10Gb Fibre Channel Module as well as an MDS 9000 18/4 MultiServices Module with 18, 4Gb FC ports, 4, 1Gb IP ports and a cryptographic processing engine enabling integrated Fibre Channel, FCIP and iSCSI operation. In addition, the 18/4 Multi-Service Module and MDS 9500 I/O Acceleration package license will increase the speed of data transfer across a MAN or WAN environment resulting in better data replication and backup performance. Most MDS 9000 modules are interchangeable across SN8000C, providing a smooth migration path, common sparing and investment protection.

5.2.7.2 Fabric and Blade Server Switches

A Fibre Channel switch is a network switch compatible with the Fibre Channel (FC) protocol. It allows the creation of a Fibre Channel fabric, which is currently the core component of most SANs. The fabric is a network of Fibre Channel devices, which allows many-to-many communication, device name lookup, security, and redundancy. FC switches implement zoning; a mechanism that disables unwanted traffic between certain fabric nodes.

Response:

Entry-level Switches

HP 8/20q Fibre Channel Switch and 8Gb Simple SAN Connection Kit: Delivers next-generation 8 Gb/s FC performance with built-in simplicity at affordable 4Gb/s price points for new small or midmarket SAN deployments. HP SAN Connection Manager (SCM) enterprise software, included with the 8/20q, provides installation, management, and visual topology views of HP HBAs, H-series switches, and HP Storage.

HP SN6000 Stackable 8Gb 12-port single power supply Fibre Channel switch: Delivers enterpriseclass capability, at entry-level pricing, for new small-or mid-market SAN deployments.

- Entry-level switch with eight enabled device ports and four enabled stacking inter-switch link (ISL) 10/20 Gb/s ports.
- SCM enterprise software, included with the SN6000, provides installation, management, and visual topology views of HP HBAs, H-series switches, and HP Storage.
- Scales, without application interruption, to 120 device ports in a single stack. Scales to over 500 device ports with multiple stacks.

HP SN3000B 16Gb Fibre Channel Switch: HP SN3000B 16Gb Fibre Channel Switch meets the needs of hyper-scale, private cloud storage environments by delivering market-leading 16 Gb FC technology and capabilities that support highly virtualized environments. Designed to enable better flexibility and investment protection, the HP SN3000B switch scales from 12 to 24 ports and supports 4, 8, or 16 Gbps speeds in an efficiently designed 1U package. It also provides a simplified deployment process and a point-and-click user interface, making it powerful and easy to use. It offers low-cost access to SAN technology while providing "pay-as-you-grow" scalability to meet the needs of an evolving storage environment.

HP 8/8 SAN Switch: Consolidates data center connectivity for smaller companies delivering 8 Gb/s highly available, lossless networking between applications and data, as well as between servers and storage networks.

HP 8/24 SAN Switch: Consolidates data center connectivity for small to medium sized enterprises delivering 8 Gb/s highly available, lossless networking between applications and data, as well as between servers and storage networks. Cisco MDS 9124 Fabric Switch: Offers advanced storage networking capabilities for small to medium sized enterprises at an attractive entry-level price, making this switch ideal for entry-level SANs as well as large-scale enterprise core-edge switch deployments.

Mid-range Switches

HP SN6000 Stackable 8Gb Fibre Channel Switches: Deliver a cost-efficient scalable SAN architecture with built-in, high-performance 20 Gb/s ISL stacking, availability, and management simplicity for a wide range of enterprise and consolidated data center environments. This entry-level to mid-enterprise switch provides 20 enabled device ports and four enabled stacking ISL ports. Need to accommodate SAN growth? Simply add additional SN6000 stacking switches for low-cost core switching without application interruption. Easily scales to 120 device ports in a single stack and to over 500 device ports with multiple stack topologies. SCM enterprise software, included with the HP SN6000, provides installation, management and visual topology views of HBAs, and H-series switches from a single integrated interface.

HP SN6000B 16Gb Fibre Channel Switch: Designed to enable better flexibility and investment protection, this switch scales from 24 to 48 ports and supports 4, 8, 10, or 16 Gb/s speeds in an efficiently designed 1U package offering a wide range of performance for long distance connectivity. ISL compression provides the capability to compress all data in flight, which allows customers the choice of either moving more data or reducing bandwidth costs. The Power Pack+ models include a set of tools that monitor the network's health and performance and include Fabric Watch, Extended Fabric, ISL Trunking, Adaptive Networking, Server Application Optimization and Advance Performance Monitoring.

HP SN6000C 8Gb Fibre Channel Switch: Provides a highly available, secure, and easy-to-use storage networking solution at a cost-effective price point in a compact one-rack-unit (1U) form factor. HP 8/40 SAN Switch: Provides industry leading 8 Gb/s FC performance, "pay-as-you-grow" scalability, and complete investment protection to meet the advanced requirements of consolidated, virtualized data centers.

HP 8/80 SAN Switch: Provides industry leading 8 Gb/s FC performance, the industry's highest port density, and complete investment protection to meet the advanced requirements of consolidated, virtualized data centers.

Fibre Channel over Ethernet switches

HP 2408 Converged Network Switches: Simplifies IT environments and reduces operational costs by supporting converged SAN and LAN traffic.

HP Nexus 5000 Converged Network Switches: Reduces operational costs, including IT capital expense, maintenance, real estate, and carbon footprint of the data center with reduced power consumption and cooling requirements.

5.2.7.3 Enterprise and Data Center SAN and VSAN (Virtual Storage Area Network) Management

Management tools to provisions, monitors, troubleshoot, and administers SANs and VSANs.

Response:

The HP B-series portfolio offers the HP SAN Network Advisor Software for the management of B-series directors, routers, switches, Host Bus Adapters (HBAs) and FCoE devices. HP B-series SAN Network Advisor includes the same level of support for management of FC SANs as its predecessor, HP B-series Data Center Fabric Manager (DCFM), and introduces management support of 16Gb FC SANs. SAN Network Advisor offers management of data center fabrics including configuration, monitoring, and diagnostics.

HP B-series SAN Network Advisor provides comprehensive management of data center fabrics-including configuration, monitoring, and management of all B-series Directors, Switches, and HBAs. It provides support for FC SANs with configuration, zoning, and visualization capabilities, including HBA, storage, SAN fabric, and Layer 2 switch topology views. SAN diagnostics help meet SLAs via proactive alerting and advanced SAN diagnostic capabilities, including SAN port diagnostics, bottleneck detection, and best-practices validation of SAN configurations.

HP B-series SAN Network Advisor provides management of multiple 4Gb, 8Gb, and 16Gb B-series Directors, Switches, and HBAs. By measuring and displaying network performance, it provides the essential functions for efficiently configuring, monitoring, and dynamic provisioning of SAN fabrics.

5.2.7.4 SAN Optimization

Tools to help optimize and secure SAN performance (ie. Encryption of data-at-rest, data migration, capacity optimization, data reduction, etc.

Response:

Multipurpose/specialty Switches

HP 1606 Extension SAN Switch: Provides next generation FC and Fibre Channel over IP (FCIP) technology to enable fast, reliable, and cost-effective, remote data replication, backup, and migration for wide area networks (WANs).

HP MPX200 Multifunction Router (Multiple connectivity and heterogeneous data migration): HP MPX200 provides flexibility, high performance and high availability for LAN, SAN and WAN environments in a single unified redundant blade enclosure. The MPX200 is ideal for converged networking applications and easily runs hundreds of Virtual Machines (VMs) efficiently by using unified block storage on P6000/EVA (iSCSI/FC/Fibre Channel over Ethernet FCoE) in one integrated enclosure. The MPX200 is easily managed through an efficient single-pane-of-glass interface, and supports high performance up to (4TBs/Hr + heterogeneous data migration on 3PAR P10000 V-Class, F-Class, T-Class, P6000/EVA, P4000 (iSCSI) and P9000/XP, as well as thick to thin LUN data migration. MPX200 versatility simplifies long distance replication with FCIP support, and is an excellent overall flexible converged networking, multipurpose router that increases return on investment (ROI).

Cisco MDS 9222i Modular Fabric Switch: Allows customers to easily grow and manage their storage network fabric environment with an all-in-one box solution even as needs change and expand beyond traditional FC SANs.

HP Encryption SAN Switch: Manages operational risk and achieves compliance with regulatory mandates by using industry standards for "data-at-rest" encryption within the storage fabric for centralized management of both disk and tape solutions.

5.2.8 Switches

Layer 2/3 devices that are used to connect segments of a LAN (local area network) or multiple LANs and to filter and forward packets among them.

5.2.8.1 Campus LAN - Access Switches

- Provides initial connectivity for devices to the network and controls user and workgroup access to internetwork resources. The following are some of the features a campus LAN access switch should support:
 - Security
 - i. SSHv2 (Secure Shell Version 2)
 - ii. 802.1X (Port Based Network Access Control)
 - iii. Port Security
 - iv. DHCP (Dynamic Host Configuration Protocol) Snooping
 - VLANs
 - Fast Ethernet/Gigabit Ethernet
 - PoE (Power over Ethernet)
 - link aggregation
 - 10 Gb support
 - Port mirroring
 - Span Taps

- Support of IPv6 and IPv4
- Standards-based rapid spanning tree
- Netflow Support (Optional)

Response:

The HP 3800 Switch Series is a family of nine fully managed Gigabit Ethernet switches available in 24-port and 48-port models, with or without POE+, and with either SFP+ or 10GBASE-T uplinks. The 3800 Switch Series utilizes the latest HP ProVision ASIC technology and advances in hardware engineering to deliver one of the most resilient and energy-efficient switches in the industry. Meshed stacking technology is implemented in the HP 3800 Switch Series to deliver chassis-like resiliency in a flexible, stackable form factor.

- Fully managed Layer 3 stackable switch series
- · Low-latency, highly resilient architecture
- SFP+, 10GBASE-T, PoE+, modular stacking
- Highly resilient meshed stacking technology
- Industry-leading lifetime warranty

The HP 2920 Switch Series consists of four switches: the HP 2920-24G and 2920-24G-PoE+ Switches with 24 10/100/1000 ports, and the HP 2920-48G and 2920-48G-PoE+ Switches with 48 10/100/1000 ports. Each switch has four dual-personality ports for 10/100/1000 or SFP connectivity. In addition, the 2920 switch series supports up to four optional 10 Gigabit Ethernet (SFP+ and/or 10GBASE-T) ports, as well as a two-port stacking module. These options provide you with flexible and easy-to-deploy uplinks and stacking. Together with static and RIP routing, robust security and management, enterprise-class features, free lifetime warranty, and free software updates, the 2920 switch series is a cost-effective, scalable solution for customers who are building high-performance networks. These switches can be deployed at the enterprise edge, in remote branch offices, and in converged networks.

- High-performance Gigabit Ethernet access switch
- Four optional 10GbE (SFP+ and/or 10GBASE-T) ports
- Stacking capability with a total of four switches
- Layer 2 and Layer 3 plus static and RIP routing, PoE and PoE+ support
- Lifetime warranty, sFlow, ACLs, OpenFlow, and rate limiting

The HP 3600 EI Switch Series delivers premium levels of intelligent and resilient performance, security, and reliability for robust switching at the enterprise network edge. The series consists of Layer 3 Fast Ethernet and PoE/PoE+ switches, with advanced features that can accommodate the most demanding applications. Secure, resilient connectivity and the latest traffic-prioritization technologies enhance converged networks. Designed for increased flexibility and scalability, HP 3600 EI series switches come with 24 or 48 10/100 ports, four active SFP-based Gigabit Ethernet ports for stacking and uplinks, and a 24-port 100BASE-FX switch with two or four Gigabit Ethernet SFP slots.

- Robust switching at the enterprise network edge
- Advanced Layer 3 and multicast routing
- IRF-automated stack and switching fabric setup
- Integrated and distributed security enforcement
- Enterprise-level non-blocking performance

The HP 5500 HI Switch Series comprises Gigabit Ethernet switches that deliver outstanding resiliency, security, and multiservice support capabilities at the edge layer of data center, large campus, and metro Ethernet networks. The switches can also be used in the core layer of SMB networks. With Intelligent Resilient Fabric (IRF) support and available dual power supplies, the HP 5500 HI Switch Series can deliver the highest levels of resiliency and manageability. In addition, the PoE+ models provide up to 1,440 W of PoE+ power with the dual power supply configuration. Designed with two fixed 10GbE ports and extension module flexibility, these switches can provide

up to six 10GbE uplink or 70 GbE ports. With complete IPv4/IPv6 and MPLS/VPLS features, the series provides investment protection with an easy transition from IPv4 to IPv6 networks.

- High expandability for investment protection
- Premium resiliency and integrated management
- Enhanced MPLS/VPLS support
- Full-featured IPv4/IPv6 dual stack
- 1440 W of PoE+ power using dual power supplies for high resiliency

5.2.8.2 Campus LAN - Core Switches

- Campus core switches are generally used for the campus backbone and are responsible for transporting large amounts of traffic both reliably and quickly. Core switches should provide:
 - · High bandwidth
 - Low latency
 - Hot swappable power supplies and fans
 - Security
 - i. SSHv2
 - ii. MacSec encryption
 - iii. Role-Based Access Control Lists (ACL)
 - Support of IPv6 and IPv4
 - 1/10/40/100 Gbps support
 - IGP (Interior Gateway Protocol) routing
 - EGP (Exterior Gateway Protocol) routing
 - VPLS (Virtual Private LAN Service) Support
 - VRRP (Virtual Router Redundancy Protocol) Support
 - Netflow Support.

Response:

The HP 12500 Switch Series is a family of powerful, next-generation routing switches with outstanding capacity for the network core or data center. Besides innovative Intelligent Resilient Framework (IRF) technology that provides unprecedented levels of performance and high availability, the 12500 switch series incorporate Open Application Architecture (OAA), which enables flexible deployment options for new services. These switches also have energy-efficiency features that drive down operational expenses and are ideal for organizations contemplating large-scale data center consolidations, business continuity and disaster recovery sites, metropolitan area network deployments, and other applications requiring a robust, high-performance switching platform.

- Advanced architecture: midplane, CLOS
- 13.32 Tb switching capacity
- High-density 10GbE with 288 1:1, 576 4:1 ports
- 40/100 GbE ready
- Redundant switching fabric, power supply, fan tray

The HP 10500 Switch Series sets a new benchmark for performance, reliability, and scalability with a next-generation CLOS architecture. Designed for enterprise campus core networks, the HP 10500 Switch Series enables a cloud-connected and media-rich capable infrastructure.

- In-service software upgrade (ISSU): provides an upgrade of the entire chassis
- Jumbo frames: allow high-performance backups and disaster-recovery systems
- High-density port connectivity: offers up to 12 interface module slots; provides up to 96 40 GbE ports, 576 10GbE ports, and 576 gigabit fiber/electrical ports
- HP 10500 Type A MPU w/Comware v7 OS

- HP IRF technology virtualizes up to four chassis
- Ultra-high 1/10/40 GbE density; 100 GbE-ready
- More than 11 terabits-per-second switching capacity

The HP 7500 Switch Series comprises modular, multilayer chassis switches that meet the evolving needs of integrated services networks and can be deployed in multiple network environments, including the enterprise LAN core, aggregation layer, and wiring closet edge. The series switches offer 40 GbE connectivity and cost-effective, wire-speed 10-Gigabit Ethernet ports to safeguard the throughput and bandwidth needed for your mission-critical data and high-speed communications. A passive backplane, support for load sharing, and redundant management and fabrics help the series provide high availability. Moreover, these switches deliver wire-speed Layer 2 and Layer 3 routing services for the most demanding applications with hardware-based IPv4 and IPv6 support.

- Versatile, high-performance modular switches
- Enterprise LAN core, aggregation, and edge
- Extensive switching and routing, IPv6, MPLS
- Advanced functionality with service modules
- Robust network and service virtualization

The HP 8200 zl Switch Series offers high performance, scalability, and a wide range of features in a high-availability platform that dramatically reduces complexity and provides reduced cost of ownership. As part of a unified wired and wireless network infrastructure solution, the 8200 zl switch series provides platform technology, system software, system management, application integration, wired and wireless integration, network security, and support that are common across HP modular and fixed-port switches. Together, they deliver an agile, cost-effective, high-availability network solution. With key technologies to provide solution longevity, the 8200 zl switch series is built to deliver long-term investment protection without added complexity for network core, aggregation, and high-availability access layer deployments. It provides these capabilities while bringing to market the industry's first highly available switch with a lifetime warranty.

- Core, distribution, mission-critical access layer
- Advanced high-availability AllianceONE integrated
- Layer 2 to 4 and intelligent edge feature set
- Enterprise-class performance and security
- Scalable 10/100/1000 and 10 GbE connectivity

5.2.8.3 Campus Distribution Switches

- Collect the data from all the access layer switches and forward it to the core layer switches.
 Traffic that is generated at Layer 2 on a switched network needs to be managed, or segmented into Virtual Local Area Networks (VLANs), Distribution layer switches provides the inter-VLAN routing functions so that one VLAN can communicate with another on the network. Distribution layer switches provides advanced security policies that can be applied to network traffic using Access Control Lists (ACLs).
 - High bandwidth
 - Low latency
 - Hot swappable power supplies and fans
 - Security (SSHv2 and/or 802.1X)
 - Support of IPv6 and IPv4
 - Jumbo Frames Support
 - Dynamic Trunking Protocol (DTP)

- Per-VLAN Rapid Spanning Tree (PVRST+)
- Switch-port auto recovery
- NetFlow Support or equivalent

Response:

The HP 10500 Switch Series sets a new benchmark for performance, reliability, and scalability with a next-generation CLOS architecture. Designed for enterprise campus core networks, the HP 10500 Switch Series enables a cloud-connected and media-rich capable infrastructure.

- In-service software upgrade (ISSU): provides an upgrade of the entire chassis
- Jumbo frames: allow high-performance backups and disaster-recovery systems
- High-density port connectivity: offers up to 12 interface module slots; provides up to 96 40 GbE ports, 576 10GbE ports, and 576 gigabit fiber/electrical ports

- · Versatile, high-performance modular switches
- Enterprise LAN core, aggregation, and edge
- Extensive switching and routing, IPv6, MPLS
- Advanced functionality with service modules
- Robust network and service virtualization

5.2.8.4 Data Center Switches

- Data center switches, or Layer 2/3 switches, switch all packets in the data center by switching
 or routing good ones to their final destinations, and discard unwanted traffic using Access
 Control Lists (ACLs), all at Gigabit and 10 Gigabit speeds. High availability and modularity
 differentiates a typical Layer 2/3 switch from a data center switch. Capabilities should include:
 - High bandwidth
 - Low latency
 - Hot swappable power supplies and fans
 - Ultra-low latency through wire-speed ports with nanosecond port-to-port latency and hardware-based Inter-Switch Link (ISL) trunking
 - Load Balancing across Trunk group able to use packet based load balancing scheme
 - Bridging of Fibre Channel SANs and Ethernet fabrics
 - Jumbo Frame Support
 - Plug and Play Fabric formation that allows a new switch that joins the fabric to automatically become a member
 - Ability to remotely disable and enable individual ports
 - Support NetFlow or equivalent

Response:

The HP 12500 Switch Series is a family of powerful, next-generation routing switches with outstanding capacity for the network core or data center. Besides innovative Intelligent Resilient Framework (IRF) technology that provides unprecedented levels of performance and high availability, the 12500 switch series incorporate Open Application Architecture (OAA), which

enables flexible deployment options for new services. These switches also have energy-efficiency features that drive down operational expenses and are ideal for organizations contemplating large-scale data center consolidations, business continuity and disaster recovery sites, metropolitan area network deployments, and other applications requiring a robust, high-performance switching platform.

- Advanced architecture: midplane, CLOS
- 13.32 Tb switching capacity
- High-density 10GbE with 288 1:1, 576 4:1 ports
- 40/100 GbE ready
- Redundant switching fabric, power supply, fan tray

The HP FlexFabric 11900 Switch Series is a high-performance data center aggregation switch which provides line-rate, high-density 10GbE and 40GbE connectivity designed for cost-effective end of row (EoR) and small core deployments. With latency as low as 3 µs, the HP FlexFabric 11900 Switch Series can scale to 384 1/10GbE and 64 40GbE ports. The switch delivers up to 7.7 Tbps switching capacity and 5.8 Bpps forwarding throughput. A broad variety of interface options is available, including GbE, 10GbE and 40GbE.

Ready for software-defined networking (SDN), the switch supports full layers 2 and 3 features, including advanced features like Transparent Interconnection of Lots of Links (TRILL), and Intelligent Resilient Framework (IRF), which provides the ability to build large, resilient switching fabrics. The HP FlexFabric 11900 Switch Series also supports fully redundant and hot swappable components to complement its other enterprise-class capabilities.

- High-performance CLOS-based switching architecture
- Large layer 2 scaling with TRILL with HP IRF
- Feature-rich routing with IPv4/IPv6, MPLS, QoS
- Enhanced modularity with control and data plane separation
- High 10GbE and 40GbE density; 100GbE-ready across 7.7 Tbps switch fabric

The HP 10500 Switch Series sets a new benchmark for performance, reliability, and scalability with a next-generation CLOS architecture. Designed for enterprise campus core networks, the HP 10500 Switch Series enables a cloud-connected and media-rich capable infrastructure.

- In-service software upgrade (ISSU): provides an upgrade of the entire chassis
- Jumbo frames: allow high-performance backups and disaster-recovery systems
- High-density port connectivity: offers up to 12 interface module slots; provides up to 96 40 GbE ports, 576 10GbE ports, and 576 gigabit fiber/electrical ports
- HP 10500 Type A MPU w/Comware v7 OS
- HP IRF technology virtualizes up to four chassis
- Ultra-high 1/10/40 GbE density; 100 GbE-ready
- More than 11 terabits-per-second switching capacity

The HP 7500 Switch Series comprises modular, multilayer chassis switches that meet the evolving needs of integrated services networks and can be deployed in multiple network environments, including the enterprise LAN core, aggregation layer, and wiring closet edge. The series switches offer 40 GbE connectivity and cost-effective, wire-speed 10-Gigabit Ethernet ports to safeguard the throughput and bandwidth needed for your mission-critical data and high-speed communications. A passive backplane, support for load sharing, and redundant management and fabrics help the series provide high availability. Moreover, these switches deliver wire-speed Layer 2 and Layer 3 routing services for the most demanding applications with hardware-based IPv4 and IPv6 support.

- Versatile, high-performance modular switches
- Enterprise LAN core, aggregation, and edge
- Extensive switching and routing, IPv6, MPLS
- Advanced functionality with service modules
- Robust network and service virtualization

The HP 5920 Switch Series is made up of high-density 10GbE, ultra-deep packet buffering, top-of-rack (ToR) switches. These switches are part of the HP FlexNetwork architecture's HP FlexFabric solution module and are ideally suited for deployments at the server access layer of large enterprise data centers. The HP 5920 Switch Series is also designed for content delivery networks, especially when used to reduce network congestion at the I/O that is associated with the heavy use of server virtualization, as well as bursty multimedia, storage applications, and other critical services. With the increase in virtualized applications and server-to-server traffic, customers now require ToR switch innovations that will meet their needs for higher-performance server connectivity, convergence of Ethernet and storage traffic, the capability to handle virtual environments, and ultra-deep packet buffering all in a single device.

- Ultra-deep packet buffering
- HP IRF for virtualization and 2-tier architecture
- High 10GbE ToR port density
- IPv6 support in ToR with full L2/L3 features
- TRILL and VEPA readiness for virtualized networks

5.2.8.5 Software Defined Networks (SDN)

Virtualized Switches and Routers Technology utilized to support software manipulation of hardware for specific use cases.

Response:

HP Intelligent Management Center (IMC) is a modular, comprehensive resource management platform. With its extensive device support, IMC provides true end-to-end management for the entire network, and entire operation cycle. Virtual Application Networks Manager is an IMC module, which delivers a template based approach for managing network configuration policies, yielding consistency and reliability across network infrastructure. Administrators define the policies in a template, which will be applied as a configuration policy to the edge switch associated with the virtual machine of interest. Virtual machine network connectivity is automated and orchestrated by IMC VAN Manager which lends to the acceleration of application deployment and service rollout and greatly reduces risk during virtual machine migration. The module includes a plugin into the VMware hypervisor manager which enables the connection policies defined in IMC to be applied to the virtual machine.

- Automation and orchestration of edge configuration
- Template based approach for policy management
- Virtual Machine migration
- Edge switch management

5.2.8.6 Software Defined Networks (SDN)

Controllers - is an application in software- defined networking (SDN) that manages flow control to enable intelligent networking. SDN controllers are based on protocols, such as OpenFlow, that allow servers to tell switches where to send packets. The SDN controller lies between network devices at one end and applications at the other end. Any communications between applications and devices have to go through the controller. The controller uses multiple routing protocols including OpenFlow to configure network devices and choose the optimal network path for application traffic.

Response:

Software-Defined Networks (SDN) brings greater simplicity to your network. SDN delivered through HP will enable your organization to experience applications as never before, since the network is automatically tuned through SDN.

As your organization realizes the full benefits of a SDN solution, you can achieve:

- Dynamic and rapid deployment of cloud applications
- Automation of network provisioning while eliminating configuration errors
- Increased IT efficiency with services orchestration

The HP Virtual Application Networks Framework is a complete, end-to-end SDN solution that enables businesses to create a scalable, agile, and secure network that streamlines operations. Virtual Application Networks delivers business agility for software defined and traditional networks. Virtual Application Networks solutions delivered through HP Intelligent Management Center (IMC) enable policy-based automation and orchestration for traditional networks.

HP's approach to transformational initiatives such as Software-defined Networks is a proven method that is grounded in realistic and practical steps based on service innovation, lifecycle approach and project experience in other domains such as Cloud.

5.2.8.7 Carrier Aggregation Switches

- Carrier aggregation switches route traffic in addition to bridging (transmitted) Layer 2/Ethernet traffic. Carrier aggregation switches' major characteristics are:
- Designed for Metro Ethernet networks
- Designed for video and other high bandwidth applications
- Supports a variety of interface types, especially those commonly used by Service Providers
 Capabilities should include:
- Redundant Processors
- Redundant Power
- IPv4 and IPv6 unicast and multicast
- High bandwidth
- Low latency
- Hot swappable power supplies and fans
- MPLS (Multiprotocol Label Switching)
- BGP (Border Gateway Protocol)
- Software router virtualization and/or multiple routing tables
- Policy based routing
- Layer 2 functionality
 - i. Per VLAN Spanning Tree
 - ii. Rapid Spanning Tree
 - iii. VLAN IDs up to 4096

- iv. Layer 2 Class of Service (IEEE 802.1p)
- v. Link Aggregation Control Protocol (LACP)
- vi. QinQ (IEEE 802.1ad)

Response:

The HP 12500 Switch Series is a family of powerful, next-generation routing switches with outstanding capacity for the network core or data center. Besides innovative Intelligent Resilient Framework (IRF) technology that provides unprecedented levels of performance and high availability, the 12500 switch series incorporate Open Application Architecture (OAA), which enables flexible deployment options for new services. These switches also have energy-efficiency features that drive down operational expenses and are ideal for organizations contemplating large-scale data center consolidations, business continuity and disaster recovery sites, metropolitan area network deployments, and other applications requiring a robust, high-performance switching platform.

- Advanced architecture: midplane, CLOS
- 13.32 Tb switching capacity
- High-density 10GbE with 288 1:1, 576 4:1 ports
- 40/100 GbE ready
- Redundant switching fabric, power supply, fan tray

The HP FlexFabric 11900 Switch Series is a high-performance data center aggregation switch which provides line-rate, high-density 10GbE and 40GbE connectivity designed for cost-effective end of row (EoR) and small core deployments. With latency as low as 3 μ s, the HP FlexFabric 11900 Switch Series can scale to 384 1/10GbE and 64 40GbE ports. The switch delivers up to 7.7 Tbps switching capacity and 5.8 Bpps forwarding throughput. A broad variety of interface options is available, including GbE, 10GbE and 40GbE.

Ready for software-defined networking (SDN), the switch supports full layers 2 and 3 features, including advanced features like Transparent Interconnection of Lots of Links (TRILL), and Intelligent Resilient Framework (IRF), which provides the ability to build large, resilient switching fabrics. The HP FlexFabric 11900 Switch Series also supports fully redundant and hot swappable components to complement its other enterprise-class capabilities.

- High-performance CLOS-based switching architecture
- Large layer 2 scaling with TRILL with HP IRF
- Feature-rich routing with IPv4/IPv6, MPLS, QoS
- Enhanced modularity with control and data plane separation
- High 10GbE and 40GbE density; 100GbE-ready across 7.7 Tbps switch fabric

The HP 10500 Switch Series sets a new benchmark for performance, reliability, and scalability with a next-generation CLOS architecture. Designed for enterprise campus core networks, the HP 10500 Switch Series enables a cloud-connected and media-rich capable infrastructure.

- In-service software upgrade (ISSU): provides an upgrade of the entire chassis
- Jumbo frames: allow high-performance backups and disaster-recovery systems
- High-density port connectivity: offers up to 12 interface module slots; provides up to 96 40 GbE ports, 576 10GbE ports, and 576 gigabit fiber/electrical ports
- HP 10500 Type A MPU w/Comware v7 OS
- HP IRF technology virtualizes up to four chassis
- Ultra-high 1/10/40 GbE density; 100 GbE-ready
- More than 11 terabits-per-second switching capacity

5.2.8.8 Carrier Ethernet Access Switches

- A carrier Ethernet access switch can connect directly to the customer or be utilized as a network interface on the service side to provide layer 2 services.
- Hot-swappable and field-replaceable integrated power supply and fan tray

- AC or DC power supply with DC input ranging from 18V to 32 VDC and 36V to 72 VDC
- Ethernet and console port for manageability
- SD flash card slot for additional external storage
- Stratum 3 network clock
- Line-rate performance with a minimum of 62-million packets per second (MPPS) forwarding rate
- · Support for dying gasp on loss of power
- Support for a variety of small form factor pluggable transceiver (SFP and SFP+) with support for Device Object Model (DOM)
- Timing services for a converged access network to support mobile solutions, including Radio Access Network (RAN) applications
- Support for Synchronous Ethernet (SyncE) services
- Supports Hierarchical Quality of Service (H-QoS) to provide granular traffic-shaping policies
- Supports Resilient Ethernet Protocol REP/G.8032 for rapid layer-two convergence

Response:

The HP 12500 Switch Series is a family of powerful, next-generation routing switches with outstanding capacity for the network core or data center. Besides innovative Intelligent Resilient Framework (IRF) technology that provides unprecedented levels of performance and high availability, the 12500 switch series incorporate Open Application Architecture (OAA), which enables flexible deployment options for new services. - HP IRF technology virtualizes up to four chassis
- Ultra-high 1/10/40 GbE density; 100 GbE-ready
- More than 11 terabits-per-second switching capacity

5.2.9 Wireless

- Provides connectivity to wireless devices within a limited geographic area. System capabilities should include:
 - · Redundancy and automatic failover
 - IPv6 compatibility
 - NTP Support

Response:

The HP MSM controllers with the HP MSM 802.11n Dual Radio Access Point Series delivers high-performance networking solutions. The enhanced controller architecture scales to IEEE 802.11n without requiring a controller replacement. The MSM controller provides advanced radio resource management (RRM), including client load balancing and interference mitigation. The MSM wireless controllers support a fast-roaming capability, an important feature, especially for VoIP communications. The access points can be used in managed as well as autonomous mode without a controller.

5.2.9.1 Access Points

- A wireless Access Point (AP) is a device that allows wireless devices to connect to a wired network using Wi-Fi, or related standards. Capabilities should include:
 - 802.11a/b/g/n
 - 802.11n
 - 802.11ac
 - Capable of controller discovery method via DHCP (onsite controller or offsite through Cloud Architecture)
 - UL2043 plenum rated for safe mounting in a variety of indoor environments
 - Support AES-CCMP (128-bit)
 - Provides real-time wireless intrusion monitoring and detection

Response:

Working in unison with HP MSM controllers, the HP MSM 802.11n Dual Radio Access Point Series delivers high-performance networking solutions. The enhanced controller architecture scales to IEEE 802.11n without requiring a controller replacement. The MSM controller provides advanced radio resource management (RRM), including client load balancing and interference mitigation. The MSM wireless controllers support a fast-roaming capability, an important feature, especially for VoIP communications.

The access points can be used in managed as well as autonomous mode without a controller. The access points provide RF Spectrum Analysis with detection and classification of non-IEEE 802.11 interference and have the ability to automatically avoid interference. Wireless security is comprehensive with integrated Wireless IDS and support for internal and external authentication, authorization, and accounting (AAA) servers; built-in stateful firewall; per-user VLAN mapping; and authentication. In addition to these access points working with the MSM controllers, they also work with the new HP 10500/7500 20G Unified Wired-WLAN Module and the HP 830 Unified Wired-WLAN Switch. See the module and switch datasheets for more information on these new controllers and supported features.

- First three spatial stream MIMO AP in the industry
- Up to 450 Mb/s per radio on MSM460 and MSM466/MSM466-R access points
- Support for a range of indoor and outdoor antennas for the MSM466 and outdoor MSM466-R access points
- MSM430 AP is a two spatial stream 3x3 MIMO access point and is the price/performance leader
- Comprehensive WLAN security

5.2.9.2 Outdoor Wireless Access Points

- Outdoor APs are rugged, with a metal cover and a DIN rail or other type of mount. During
 operations they can tolerate a wide temperature range, high humidity and exposure to water,
 dust, and oil. Capabilities should include:
 - Flexible Deployment Options
 - Provides real-time wireless intrusion monitoring and detection
 - Capable of controller discovery method via DHCP (onsite controller or offsite through Cloud Architecture)

Response:

Working in unison with HP MSM controllers, the HP MSM 802.11n Dual Radio Access Point Series delivers high-performance networking solutions. The enhanced controller architecture scales to IEEE 802.11n without requiring a controller replacement. The MSM controller provides advanced radio resource management (RRM), including client load balancing and interference mitigation. The MSM wireless controllers support a fast-roaming capability, an important feature, especially for VoIP communications.

The access points can be used in managed as well as autonomous mode without a controller. The access points provide RF Spectrum Analysis with detection and classification of non-IEEE 802.11 interference and have the ability to automatically avoid interference. Wireless security is comprehensive with integrated Wireless IDS and support for internal and external authentication, authorization, and accounting (AAA) servers; built-in stateful firewall; per-user VLAN mapping; and authentication. In addition to these access points working with the MSM controllers, they also work with the new HP 10500/7500 20G Unified Wired-WLAN Module and the HP 830 Unified Wired-WLAN Switch. See the module and switch datasheets for more information on these new controllers and supported features.

- First three spatial stream MIMO AP in the industry
- Up to 450 Mb/s per radio on MSM460 and MSM466/MSM466-R access points
- Support for a range of indoor and outdoor antennas for the MSM466 and outdoor MSM466-R access points
- MSM430 AP is a two spatial stream 3x3 MIMO access point and is the price/performance leader
- Outdoor IP67-rated antennas two omnidirectional and two directional MIMO antennas are weatherproof IP67 tested for point-to-point, multipoint, mesh, and outdoor coverage

5.2.9.3 Wireless LAN Controllers

- An onsite or offsite solution utilized to manage light-weight access points in large quantities by the network administrator or network operations center. The WLAN controller automatically handles the configuration of wireless access-points. Capabilities should include:
 - Ability to monitor and mitigate RF interference/self-heal
 - Support seamless roaming from AP to AP without requiring re-authentication
 - Support configurable access control lists to filter traffic and denying wireless peer to peer traffic
 - System encrypts all management layer traffic and passes it through a secure tunnel
 - Policy management of users and devices provides ability to de-authorize or deny devices without denying the credentials of the user, nor disrupting other AP traffic

 Support configurable access control lists to filter traffic and denying wireless peer to peer traffic

Response:

The HP 10500/7500 20G Unified Wired-WLAN Module delivers enterprise-scale features, capacity, high reliability, and offers substantial wireless data processing capacity. The HP 10500/7500 20G Unified Wired-WLAN Module provides refined user control and management, comprehensive RF management and security mechanisms, fast roaming, QoS and IPv4/IPv6 features, and powerful WLAN access control. Designed for WLAN access of enterprise networks, the HP 10500/7500 20G Unified Wired-WLAN Module provides an industry leading WLAN solution for large enterprise networks. Working together with HP access points, the HP 10500/7500 Unified Wired-WLAN Module can be easily deployed on Layer 2 or Layer 3 networks without affecting existing configurations.

- Enterprise-scale capacity, performance, and high reliability for wireless networks
- System-wide approach to WLAN reliability through Wi-Fi Clear Connect
- Flexible forwarding modes
- IPv4/IPv6 dual stack
- End-to-end QoS

The HP 830 Unified Wired-WLAN Switch Series integrates both wireless controller and 1000 Mb/s Ethernet switch functions. The switch series provides 1000 Mb/s Ethernet ports, with each supporting a maximum power of up to 30 W PoE+ and IEEE 802.11a/b/g/n APs while delivering unified wired and wireless access control functions. The HP 830 24-Port PoE+ Unified Wired-WLAN Switch provides two 10GbE slots on the rear panel to relieve transmission bottleneck at the core of a WLAN network. The HP 830 Unified Wired-WLAN Switch Series are part of the HPN Mobility enterprise solution. This product set provides edge-to-core unified access and consistent WLAN services to small/medium branch offices for enterprises that are deploying the HP 10500/7500 20G Unified Wired-WLAN Module at their central (or main) office.

- Unified wired and wireless services for branch offices
- System-wide approach to WLAN reliability through Wi-Fi Clear Connect
- PoE+ capability
- Built-in IEEE 802.1X and portal authentication servers
- 8-port and 24-port versions available

Working in unison with HP MSM controllers, the HP MSM-802.11n Access Point Series delivers high-performance networking solution. The enhanced controller architecture scales to IEEE 802.11n without requiring a controller replacement. The MSM controllers provide advanced radio resource management (RRM), including client load balancing and interference mitigation. The MSM wireless controllers support a fast-roaming capability.

The MSM430 and MSM46x access points provide RF Spectrum Analysis with detection and classification of non-IEEE 802.11 interference. These access points have the ability to automatically avoid interference. Wireless security is comprehensive with integrated Wireless IDS (MSM410, MSM430, and MSM46x access points) and support for internal and external authentication, authorization, and accounting (AAA) servers; a built-in stateful firewall; per-user VLAN mapping; and authentication.

- Ease of use, scalability, and redundancy
- Enhanced architecture for flexible network design
- IEEE 802.11a/b/g/n AP and access device support
- Comprehensive WLAN security
- Appliance and blade form factors

5.2.9.4 Wireless LAN Network Services and Management

- Enables network administrators to quickly plan, configure and deploy a wireless network, as well as provide additional WLAN services. Some examples include wireless security, asset tracking, and location services. Capabilities should include:
 - Provide for redundancy and automatic failover
 - Historical trend and real time performance reporting is supported
 - Management access to wireless network components is secured
 - SNMPv3 enabled
 - RFC 1213 compliant
 - Automatically discover wireless network components
 - Capability to alert for outages and utilization threshold exceptions
 - Capability to support Apple's Bonjour Protocol / mDNS
 - QoS / Application identification capability

Response:

HP Intelligent Management Center (IMC) is a stand-alone, comprehensive management platform for delivering next generation, integrated, modular network management capabilities that efficiently meet the needs of advanced, heterogeneous enterprise networks. HP IMC is designed on a service-oriented architecture (SOA) using a business application flow model as the core and featuring an on-demand, modularized structure. The combination allows the efficient implementation of end-to-end business management, while HP IMC software's modular design allows for the effective integration of traditionally separate management tools. Together, they provide complete management of resources, services, and users. HP IMC provides the ability to manage virtual network devices such as servers, virtual machines, and virtual switches and provides the ability to create and move virtual machines within or across datacenters. The software is compatible with Microsoft® Windows® Server and supports the management of HP and third-party devices.

- Highly flexible, scalable deployment models
- Powerful administration control
- Rich resource management
- Detailed performance monitoring and management
- Flexible centralized reporting

HP Intelligent Management Center (IMC) is a modular, comprehensive resource management platform. With its extensive device support, IMC provides true end-to-end management for the entire network, and entire operation cycle.

An optional IMC module, IMC Wireless Services Manager (WSM) software provides unified management of wired and wireless networks, adding network management functions into existing wired network management systems. WSM software offers wireless LAN (WLAN) device configuration, topology, performance monitoring, RF heat mapping, and WLAN service reports.

IMC WSM software facilitates centralized control over your wireless network, even if it is geographically dispersed. This reduces the time needed to deploy configuration changes and provides uniformity throughout your WLAN infrastructure.

- Intuitive, easy-to-use interface
- Unified wired and wireless device management
- Range of topology management modes
- Low maintenance costs and low TCO

5.2.9.5 Cloud-Based Services for Access Points

- Cloud-based management of campus-wide WiFi deployments and distributed multi-site networks. Capabilities include:
 - · Zero-touch access point provisioning
 - Network-wide visibility and control

- RF optimization,
- Firmware updates

Response:

HP Intelligent Management Center (IMC) is a stand-alone, comprehensive management platform for delivering next generation, integrated, modular network management capabilities that efficiently meet the needs of advanced, heterogeneous enterprise networks. HP IMC is designed on a service-oriented architecture (SOA) using a business application flow model as the core and featuring an on-demand, modularized structure. The combination allows the efficient implementation of end-to-end business management, while HP IMC software's modular design allows for the effective integration of traditionally separate management tools. Together, they provide complete management of resources, services, and users. HP IMC provides the ability to manage virtual network devices such as servers, virtual machines, and virtual switches and provides the ability to create and move virtual machines within or across datacenters. The software is compatible with Microsoft® Windows® Server and supports the management of HP and third-party devices.

- Highly flexible, scalable deployment models
- Powerful administration control
- Rich resource management
- Detailed performance monitoring and management
- Flexible centralized reporting

HP Intelligent Management Center (IMC) is a modular, comprehensive resource management platform. With its extensive device support, IMC provides true end-to-end management for the entire network, and entire operation cycle.

An optional IMC module, IMC Wireless Services Manager (WSM) software provides unified management of wired and wireless networks, adding network management functions into existing wired network management systems. WSM software offers wireless LAN (WLAN) device configuration, topology, performance monitoring, RF heat mapping, and WLAN service reports.

IMC WSM software facilitates centralized control over your wireless network, even if it is geographically dispersed. This reduces the time needed to deploy configuration changes and provides uniformity throughout your WLAN infrastructure.

- Intuitive, easy-to-use interface
- Unified wired and wireless device management
- Range of topology management modes
- Low maintenance costs and low TCO

5.2.9.6 Bring Your Own Device (BYOD)

- Mobile Data Management (MDM) technology utilized to allow employees to bring personally owned mobile devices (laptops, tablets, and smart phones) to their workplace, and use those devices to access privileged government information and applications in a secure manner. Capabilities should include:
 - Ability to apply corporate policy to new devices accessing the network resources, whether wired or wireless
 - Provide user and devices authentication to the network
 - Provide secure remote access capability
 - Support 802.1x
 - Network optimization for performance, scalability, and user experience

Response:

The HP BYOD solution pivots around HP Intelligent Management Center (IMC), which offers you a single-pane-of-glass network and user management solution for your entire enterprise network. HP IMC's modular design integrates traditionally separate management tools, network access services, policy management, and user and traffic monitoring that delivers to your enterprise a single-pane-

of-glass application for BYOD essentials: Device On-boarding, Provisioning and Monitoring. IMC goes beyond the unified BYOD essentials by delivering converged management across various networks—physical and virtual, wired and wireless, and applies the appropriate security policies to the users and devices (personal or company-owned) accessing your network.

For granular network and application access, HP IMC manages user access control and identity-based policies to help your IT managers overcome the complex security challenges associated with the widespread adoption of user-owned devices. Your IT administrators can establish and enforce granular and consistent network access policies for wired and wireless users to protect your IT assets, mitigate risks, optimize network availability, and ensure regulatory compliance. HP BYOD solution supports wired and wireless device on-boarding, provisioning, and monitoring. Deployment of the BYOD solution delivered through IMC comes with ease because of IMC's modular design. The modular design gives you the flexibility to add functionality as needed without the need to deploy separate management tools.

Mobile device on-boarding: IMC supports user authentication based on identity, device location, time, and endpoint security health. Users can be assigned automatically into the appropriate VLAN based on their identity, device type, device posture, time of day, application type, or other factors. Access to the network can be granted based on a device's IP or media access control (MAC) address, which is particularly useful for printers, IP phones, and barcode scanners. Because IMC centralizes network access and policy enforcement with network management capabilities, your IT administrators can integrate, correlate, and collaborate user and network device management from a single platform. By providing authentication and authorization for devices accessing your network, IMC helps you reduce vulnerabilities and security breaches. IMC fully supports the IEEE 802.1X network access control standard and leverages HP advanced fingerprinting technologies for Apple iOS and Android devices and comes with a self-registration portal for guests and personally-owned device to automate the on-boarding process and reduce the administrative burden so that you can support your organizations' BYOD initiatives quickly and easily.

Provisioning: You can further minimize security risks through HP IMC-integrated security policy management and endpoint posture assessment. This allows your administrators to control endpoint admission based on the device's identity and posture. If an endpoint is not compliant with the established policies, access to the network can be isolated for remediation or blocked to protect your network assets. IMC security policy component further provides non-intrusive actions to secure your network edge proactively, including end point monitoring and notification. This component also supports security evaluation, security threat location, and security event awareness. To ensure continued security HP IMC policy component continually monitors each endpoint's traffic, installed software running processes, and registry changes. These functions enable all endpoints connected to your network to be secure.

Monitoring: With HP IMC, administrators will have full visibility into what users are accessing from personal and company issued devices. Since IMC can provide information regarding what users have accessed from their device, you will be able to differentiate between business oriented access versus recreational access.

Integration with network resource usage data such as network address translation (NAT), flow records provide you with full visibility of BYOD traffic and compliance reporting. Based on this data, you can set the appropriate network access policies, and manage network resources and capacity more effectively across wired and wireless networks.

5.3.0 Unified Communications (UC)

5.3.0 Unified Communications (UC)

A set of products that provides a consistent unified user interface and user experience across
multiple devices and media types. Unified Communications that is able to provide services such
as session management, voice, video, messaging, mobility, and web conferencing. It can
provide the foundation for advanced unified communications capabilities of IM and presencebased services and extends telephony features and capabilities to packet telephony network
devices such as IP phones, media processing devices, Voice over IP (VoIP) gateways, and

multimedia applications. Additional services, such as unified messaging, multimedia conferencing, collaborative contact centers, and interactive multimedia response systems, are made possible through open telephony APIs. General UC solution capabilities should include:

- High Availability for Call Processing
- Hardware Platform High Availability
- Network Connectivity High Availability
- Call Processing Redundancy

Response:

HP and Microsoft have combined our resources to create innovative UC&C solutions, built upon an IP-enabled converged infrastructure for seamless integration of voice, video, and data services. These new software-powered solutions can transform how businesses communicate, enable workflow tasks, and provide business tools to office and remote workers reliably.

HP offers the most complete portfolio of switches and routers—combined with end-to-end converged infrastructure solutions and expert service available from any Microsoft partner today.

Using the HP FlexNetwork architecture as the foundation, HP Converged Infrastructure delivers an architectural blueprint for Microsoft Lync that integrates networking, servers, storage, management and services.

The HP and Microsoft Lync solutions can be offered as Enterprise On Premise Solutions and Hosted Solution.

For Enterprise On Premise Solutions, customers need Lync Server 2013 Client Access Licenses based on the requirements. These are:

- Standard CAL: The Lync Server 2013 Standard CAL offers instant messaging and rich
 presence (IM/P) features. It provides users with real-time presence and enhanced IM along with
 PC-to-PC audio and video communications, as well as authenticated attendee experience for
 internal Lync Meetings.
- Enterprise CAL: The Lync Server 2013 Enterprise CAL offers Lync Meetings, including Audio, Video, and Web conferencing features. It provides users the ability to create, moderate, and join conferences for collaboration with both internal and external users.
- Plus CAL: The Lync Server 2013 Plus CAL offers enterprise voice capabilities that can enhance
 or replace traditional PBX systems. These capabilities include common calling features such as
 answer, forward, transfer, hold, divert, release, and park, along with Enhanced 9-1-1 calling for
 North America, support for analog devices and a broad range of both IP and USB user devices
 from partners.

For Hosted Solutions – Microsoft offers Online Subscription Licensing for Microsoft-hosted Lync Online. Lync Online provides communications and collaboration solutions that can be provided as cloud services, on-premises services, or a combination of the two. This level of flexibility allows organizations to create solutions that meet their ever-changing business requirements.

HP and Microsoft Lync solution offers a set of products that provides a consistent unified user interface and user experience across multiple devices and media types that include services such as session management, voice, video, messaging, mobility, and web conferencing. The solution provides advanced unified communications capabilities of IM and presence-based services and extends telephony features and capabilities to packet telephony network devices such as IP phones, media processing devices, Voice over IP (VoIP) gateways, and multimedia applications.

5.3.0.1 IP Telephony

- Solutions utilized to provide the delivery of the telephony application (for example, call setup
 and teardown, and telephony features) over IP, instead of using circuit-switched or other
 modalities. Capabilities should include:
 - Support for analog, digital, and IP endpoints

- · Centralized Management
- Provide basic hunt group and call queuing capabilities
- Flexibility to configure queue depth and hold time, play unique announcements and Music on Hold (MoH), log in and log out users from a queue and basic queue statistics (from the phone
- E911 Support

Response:

HP and Microsoft Lync offer a complete UC&C solution that provides:

- Ability to initiate, conduct, control, and terminate voice (and video) calls over networks that support Internet Protocols (IP) or that can be accessed through a gateway that converts from IP to other protocols or formats, such as TDM or analog telephony.
- Ability to initiate voice calls to a specific user from within any Microsoft Office application, such as Outlook, and within Microsoft SharePoint.
- Ability to make a test call to check voice quality; this allows users to hear how they would sound
 in a real call.
- Ability to deliver basic communications functions for specific jobs and processes, as required by supported users. These will vary by job, but include at least the following (that is, mandatory functionality):
 - Initiate, connect, and conduct call.
 - Terminate (hang up) call.
 - Transfer call to others and to mobile.
 - Conference others into call.
 - Place call on hold.
 - Divert incoming call to voice mail if the line is busy or unanswered.
 - Provide visual indication of pending voice messages.
 - Automatically add or drop video during a voice call.
 - Escalate from a person-to-person call to a multiparty call without restarting the call. Dragand-drop functionality, invite by name, and invite by number should be supported.
- Ability to deliver advanced communications functions for specific jobs and processes, as required by supported users. These will vary by job, but may include the following:
 - Park and retrieve calls.
 - Route incoming calls to alternate numbers under user or administrator control (call coverage).
 - Route calls to varying other numbers based on situation (such as busy, no answer, caller identity, or Presence status). Customized software is acceptable for this.
 - Route calls regardless of specific matrices associated with local format.
 - See at least the telephone number identification of an incoming call, if caller ID is provided.
 - See other details about the call, including a subject, if such information is provided.
 - Launch a call to a group in a single action.
 - Launch automatic transcription of voice mail.
 - Use varying identity formats (such as number, name, directory entry, contacts, handle, or IM address) to initiate a call or conference.
 - Trace malicious calls, including the calling number and call time.
 - Keep a second DID, or private line, with distinctive ring and toast pop-up.
 - Provide support for boss/admin scenarios, including the following:

- The boss can assign all required admins.
- The call can ring both boss and admin at the same time or respectively.
- The admin can receive a boss call, with the indication that the call is for the boss.
- The admin can identify boss status from the incoming call toast.
- The admin can transfer a call to the boss after answering the call.
- The admin can dial a number on behalf of the boss.
- The boss can receive a toast indicating who answered the call from the admin list.
- Ability for direct routing of media to simplify topology and optimize flow and QoE. This can reduce the number of servers for lower TCO—eliminating unnecessary hops and potential points of failure and saving bandwidth across wide-area networks.
- Ability to manage communications through a PC or appropriate mobile device (including mobile phones), whether the voice/video media stream is coming through the PC or mobile device or through an alternate channel.
- Ability to configure a departmental, Presence-enabled Automatic Call Distributor (ACD) so that agents can accept incoming calls and make outgoing calls on behalf of the ACD, without revealing their identities.
- Ability for ACD to support more flexible interactive voice response (IVR) configurations, such as a prompt for an invalid response or no response to an IVR question before music on hold times out.
- Ability for ACD application to provide a more robust web service that supports customized agent consoles.
- Ability to discover; diagnose; and provide direct, actionable feedback to end users on voice quality issues.
- Ability to support both gateway and SIP options (such as SIP trunking) for interconnection to IP PBX systems and PSTN networks, so that an administrator can migrate users to Enterprise Voice over time, while minimizing disruption.
- Ability to integrate with existing voice communication resources—such as PBX, voice mail, and conferencing systems—directly or through software or hardware gateways, using:
 - TDM-type standards (such as QSIG, PRI)
 - CTI-type standards (CSTA links)
 - IP-type standards (SIP, SIMPLE)
 - Various standard encoding (such as G.711, G.723.1, G.722)
 - Analog telephony, if required (such as for paging devices or fax machines)
- Support for both traditional TDM trunks and SIP trunks for PSTN connectivity.
- Support for a variety of end-user audio devices, including:
 - Wired IP telephones
 - Wired IP conference room phones
 - Conference room systems
 - Wired and wireless USB headsets
 - Wired USB speaker phones
 - Wired USB telephones
 - Analog devices (phones or faxes)
- Availability of phone editions to make and receive calls from PBX, PSTN, VoIP, or softphones inside or outside company firewalls. IP phones should offer, at minimum:
 - Join meetings with a single click.
 - Search for and call people in the company global address list (GAL) and Outlook contacts, without the need to look up phone numbers.

- View Presence for contacts.
- Place calls to contacts, transfer calls, and conference in callers.
- Transfer calls to mobile phones without interruption.
- View and play individual voice mails.
- Play Music on Hold (MoH).
- Ability to integrate with the voice telephony dial plan of an enterprise, with or without an update to the existing dial plan (if a dial plan exists).
- Ability to define voice policies based on an enterprise-wide directory and to define a set of calling features that can be enabled/disabled to determine the Enterprise Voice functionality available to users.
- Ability to define the call permissions available for each user, site, or organization that is assigned the policy.
- Ability to configure voice policies with the following scope levels:
 - User voice policy can be assigned to individual users, groups, or contact objects.
 - Site voice policy applies to an entire site, except for any users, groups, or contact objects that are assigned a user voice policy.
 - Global voice policy is the default voice policy installed with the product.
- Ability to automatically change the Presence status and indicator of an authorized user when that user is in a voice or video call across multiple devices.
- Ability to log all communication events associated with voice and video calls, including identification of parties, subject (if provided), and call duration.
- Ability to use the Internet for audio calls, in addition to or instead of company-owned WAN links.
 The system should employ an adaptive codec that works well on unmanaged networks like the
 Internet, such as RT Audio, and should encrypt both signaling and media by default. The
 system will be used to support, at minimum, the following scenarios using the public Internet:
 - Ability to work from home without the need for specialized hardware.
 - Mobile access while traveling.
 - Low-cost connectivity to satellite offices.
- Enhanced 9-1-1 support for users in the United States, including the ability to provide coverage to mobile users.
- Ability to translate a dialed number into the E.164 or another format, according to the normalization rules that an administrator defined.
- Ability to create one or more rules that assist in manipulating the Request URI E.164 format before the call is routed to the gateway.
- Ability to route and queue incoming calls to designated persons for special purposes, such as customer service, internal help desk, or general telephone support for a department.
- Single system image across all facilities, including 4-digit or 5-digit dialing between all stations (if desired); automatic least cost routing based on administrator-defined dial plans; and automatic alternate routing for all calls.
- Support for the hot-desking between phones scenario, where a user can log on to a phone to
 access the personal profile; then, when the user logs out or the idle timeout expires, the user
 data is cleaned up.
- Ability to route incoming call for an unassigned number to an announcement application, unified messaging, or receptionist.

 Support for granular control of the presented caller ID (alter/suppress) based on caller and destination number.

5.3.0.2 Instant Messaging/ Presence

Solutions that allow communication over the Internet that offers quick transmission of text-based messages from sender to receiver. In push mode between two or more people using personal computers or other devices, along with shared clients, instant messaging basically offers real-time direct written language-based online chat. Instant messaging may also provide video calling, file sharing, PC-to-PC voice calling and PC-to-regular-phone calling.

Response:

Instant Messaging:

- Single Contacts list available within the UC client unified with Microsoft Exchange for a single inbox with email, IM history, and unified messages.
- Ability to assign contacts different levels of access depending on their relationship with user, such as Family or Workgroup.
- Ability to add trusted domains for people outside the company.
- Ability to search for new contacts within the organization based either on name (via the corporate directory) or on skillset (via SharePoint).
- Ability to automatically include context when initiating an IM.
- Ability to send an IM to an individual user or group of users. Groups can be created dynamically
 by adding users to an existing IM session via drag-and-drop action or invitation, or they can be
 defined in advance as a list or group. Use of existing group definitions, such as in a directory
 (like Active Directory) or email system (like Microsoft Exchange) is desirable.
- Ability to federate IM with other specific enterprises or systems; that is, to provide secure IM functionality between your and other companies' IM systems.
- Ability to federate IM with public IM services or systems; that is, to provide IM functionality between your systems and public IM services (such as MSN Live, AOL, or Yahoo!). This must be as secure as is possible with each public service.
- Mandatory ability to log and archive communications in all IM sessions for records management or regulatory compliance. Logging IM sessions for only specific pre-identified users is desirable. Logging IM sessions under user control, if not specified, is desirable.
- Ability to manage multiple active conversations in one place.
- Ability to access conversation history and conversations missed.
- Ability to archive peer-to-peer and multiparty IM.
- Ability to archive conference content, including uploaded content (for example, handouts) and event-related content (for example, joining, leaving, uploading, and sharing, as well as changes in visibility).
- Ability to store frequently used contacts as a contact category.
- Ability to administratively enable certain users to send/receive files with policy settings to for inside the company and to external users.
- Ability to rejoin existing conversations.
- Ability to send/receive files via the IM client.
- Mandatory ability for visual and audible alerts to the recipient when an IM arrives. Mode(s) of alerts under user control.

- Ability to initiate IM to a specific user from within any Microsoft Office application, such as Outlook, and within Microsoft SharePoint.
- Ability to create, send, and receive IM from other software applications, with supporting interfaces and/or toolkits.

Group Chat:

In addition to IM, the Group Chat functionality promotes problem resolution, as teams can communicate ideas and activities, as well as capture and preserve information for later review and documentation. Members of the chat room must have ready access to the room; be able to see the Presence status of all members; and be able to post IM, documents, and links.

Presence:

- Ability to view Presence in lists or groups based on user, administrator, or software assignment of groups.
- Ability to determine Presence across groups, based on the highest level of availability for members of a group.
- Ability for Presence status to be rich in capabilities, including at least the following:
 - Number of status modes sufficient to support optimal work habits, such as online, offline, does not disturb, on a call/conference, busy, and limited availability.
 - Manual adjustment of Presence status.
 - Automatic adjustment of Presence status based on calendar information, communication mode, device type, network connectivity status, location, type of activity, identity of other parties in communication, and so on.
 - Ability to establish privacy with at least four categories of relationship (such as Team, Colleague, or External Contact) that can be assigned to any other authorized user (manual setting mandatory, automatic setting desirable) and that determines what Presence information is provided to that other user.
 - Desirable ability for the State of Utah to define and create other Presence indications, including a unique color or symbol based on any determinable state (such as entering an order, talking to a person known to be a customer, and so on).
 - Ability to see Microsoft Exchange out-of-office messages as part of a contact's Presence.
- Ability to initiate any mode of communication from the Presence indication, including IM, email, calling, conferencing, and collaboration.
- Ability to escalate from one mode to another, as appropriate, during a session.
- Ability to limit the communication modes based on the Presence status of the selected user. For example, the option to call a user is not presented (or active) if the user is in do not disturb mode.
- Ability to view presence of users outside the enterprise—including those who use Microsoft
 Office Communications Server and Microsoft Lync Server 2010, Windows Live Messenger,
 Yahoo!, AIM, IBM SameTime, GoogleTalk, Cisco CUPS, and other services—and to send IM to
 these users.
- Availability of Presence information within Microsoft Outlook, Microsoft Office, and Microsoft SharePoint applications.
- Ability to expand the Presence indicator to a Contact Card view, which provides additional
 information about the user and allows single-click communications with that user. Ideally, the
 Contact Card will be consistent across the UC client, Outlook, Office, SharePoint, and, if
 desired, custom software applications.

- Ability to see "social updates" from people in the Contacts list, such as personal note updates, out-of-office messages, title changes, office moves, new personal photos, or a history of the last several status notes that have been posted.
- Ability to programmatically add Presence information to other software and line-of-business applications.
- Desirable ability for software applications to query the Presence status of a user or group of users and to assign, link, or route communication events to a selected user under software control, with supporting interfaces and/or toolkits.

5.3.0.3 Unified Messaging

- Integration of different electronic messaging and communications media (e-mail, SMS, Fax, voicemail, video messaging, etc.) technologies into a single interface, accessible from a variety of different devices.
- Ability to access and manage voice messages in a variety of ways, using email inbox, Web browser, desktop client, VoIP phone, or mobile phone
- Visual Voicemail Support (Optional)

Response:

The HP Microsoft Lync UC client offers Single Contacts list within Microsoft Exchange for a single inbox with email, IM history, and unified messages (e-mail, SMS, Fax, voicemail, video messaging, etc.). These are accessible through variety of interfaces such as email inbox, Web browser, desktop client, VoIP phone, or mobile phone. Visual Voicemail notification is also shown in client and endpoints.

5.3.0.4 Contact Center

A computer-based system that provides call and contact routing for high-volume telephony transactions, with specialist answering "agent" stations and a sophisticated real-time contact management system. The definition includes all contact center systems that provide inbound contact handling capabilities and automatic contact distribution, combined with a high degree of sophistication in terms of dynamic contact traffic management.

Response:

Microsoft offers extensive contact center support through the Lync ISV qualification program that is designed to help ensure that qualified applications meet customer expectations for specific scenarios. With third party testing, the program defines specific requirements for interoperability with Lync Server, installation, set-up and configuration, documentation, and support. Designed with enterprise class industry standards, testing covers performance, reliability, and SDK/API utilization.

5.3.0.5 Communications End Points and Applications

- Attendant Consoles
- IP Phones

Response:

HP and Microsoft offer Lync Optimized IP Phones. HP offers the HP 4110 common area and HP 4120 desktop IP phones optimized for the Microsoft Lync environment. These natively integrated UC devices deliver rich presence, clear, high definition audio and seamless plug-and-play functionality.

Attendant consoles are available through 3rd parties.

5.3.0.6 UC Network Management

Provides end-to-end service management for Unified Communications. Capabilities include testing, performance monitoring, configuration management, and business intelligence reporting.

Response:

For UC management, please refer to Network Management sections of Section 5.2.2 -- Networking Software.

5.3.0.7 Collaboration

Voice, video, and web conferencing; messaging; mobile applications; and enterprise social software.

Response:

HP and Microsoft Lync offer:

- Ability to provide conferencing—that is, simultaneous shared communication—between 2 to 250 parties with any combination of the following five functional types:
 - Voice communications
 - Video communications
 - Web collaboration via presentation of documents, applications, and desktops
 - Web collaboration via joint editing and control of documents, applications, and desktops
 - Whiteboard, with the ability to cut-and-paste content of any type
- Ability to initiate a conference via meeting invitation or ad hoc formation (by calling a person or by adding people to an existing call). To simplify conference call setup, it must be possible to use drag-and-drop functionality to add participants from the UC client.
- Ability to invite users to a conference through an invitation that is consistent with Microsoft Office products, especially with the Outlook calendar, including accepting, rejecting, or proposing alternate times for a meeting.
- Ability for Outlook users to join conferences directly from the meeting reminder, without opening the meeting invitation.
- Ability to support multiple types of secure conferencing connections, such as on-site users; users at other sites but within the enterprise firewall; users who are members of the enterprise as represented in an Active Directory; and users who are not members of the enterprise with no Active Directory entry.
- Ability for users or non-enterprise members to join a conference via voice connections from
 either a PSTN/PBX endpoint via an appropriate gateway, or from a PC endpoint using a web or
 PC client interface available as part of the conferencing product.
- Ability to determine user roles by access mode and user type (IP or TDM endpoint, enterprise employee or guest, internal or external to the network) or by determination of the conference host.
- Ability to record conferences for later reviews, including voice, video, and web content.
- Ability to publish these recordings to a location that is accessible by others.
- Ability to share files or other content from collaborative workspaces, such as Microsoft SharePoint, used at your Company.
- Ability to mute/unmute participants and lock/unlock conferences.
- Ability to integrate existing conferencing products at the State of Utah, with the new conferencing function.
- Ability to log conferencing activity for billing and usage analysis.

- Ability to provide connectivity and interoperability with standards-based video conferencing and tele-presence systems.
- Ability to interoperate with existing room-based video conference systems and new visual communication solutions, such as tele-presence and video on mobile devices.
- Ability to archive a variety of content for compliance purposes. This content includes IM transcripts, meeting attendance and roles, content added/shared/deleted, slide flips, original content files, attachments, and meeting transcripts.
- Ability to disable features that cannot be archived, such as annotations, application sharing, and peer-to-peer file transfers. This behavior can help to ensure that all users' communications will be archived, if required, for compliance.

Mobility

- Ability to connect from outside the office, anywhere with an Internet connection—with no VPN or specialized hardware required.
- Ability to use a PC laptop for a complete user experience outside the office.
- Ability to use a combination of phone and web browser to deliver a rich, multimedia conferencing and IM experience.
- Ability for mobile smartphone users to have GAL support, Contacts lists, and IM, and to join scheduled conferences with a single click.
- Ability to transfer a call or audio conference from a PC-based client to a standard or mobile phone without disrupting the conversation, so that users on the move can stay connected.
- Simultaneous ringing feature to have incoming calls automatically ring on a mobile, home, or other telephone, in addition to the desktop client.

5.3.0.8 Collaborative Video

A set of immersive video technologies that enable people to feel or appear as if they were present in a location that they are not physically in. Immersive video consists of a multiple codec video system, where each meeting attendee uses an immersive video room to "dial in" and can see/talk to every other member on a screen (or screens) as if they were in the same room and provides call control that enables intelligent video bandwidth management.

Response:

HP has no current product to meet this requirement.

5.3.0.8.1 Content Delivery Systems (CDS)

A large distributed system of servers deployed in multiple data centers connected by the Internet. The purpose of the content delivery system is to serve content to end-users with high availability and high performance. CDSs serve content over the Internet, including web objects (text, graphics, URLs, and scripts), downloadable objects (media files, software, documents), applications (ecommerce, portals), live streaming media, on-demand streaming media, and social networks.

Response:

HP has no current product to meet this requirement.

5.3.0.8.2 Physical Security

- Technology utilized to restricting physical access by unauthorized people to controlled facilities.
 Technologies include:
- Access control systems
- b. Detection/Identification systems, such as surveillance systems, closed circuit television cameras, or IP camera networks and the associated monitoring systems.

- c. Response systems such as alert systems, desktop monitoring systems, radios, mobile phones, IP phones, and digital signage
- d. Building and energy controls

Response:

HP has no current product to meet this requirement.

5.3.1 Services

For each Category above (5.21-5.30), the following services should be available for procurement as well at the time of product purchase or anytime afterwards.

5.3.1.1 Maintenance Services

Capability to provide technical support, flexible hardware coverage, and smart, proactive device diagnostics for hardware.

Response:

HP offers our customers a full life cycle suite of technical support from installation and startup turn-key services through hardware coverage options with monitoring and call home functionality. When a product has reached maturity our HP services also help to plan seamless migration to new technology and HP platforms. HP has our own HP badged and certified technical resources across the US. We also enable and train our HP authorized channel partners to become technically certified to provide services on behalf of HP. HP has hardware coverage options, like most industry standards you find, such as next business day, same day 9x5 and 24x7x4 for example. However, through proactive premier service level options we can also customize a service offering to include call-to-repair times, dedicated resources and residents, and onsite sparing if our customer's business availability or SLA's so demand. HP offers proactive monitoring tools across our breadth of products and can trap on customer device definable error thresholds to notify HP technical centers of failures and rapidly engage to assist with diagnostics before errors impact business production and uptime. HP Network's Intelligent Management Center software has the ability to track HP and multivendor devices proactively. HP System Insight Manager can monitor and call home across the multiple HP devices it can monitor.

5.3.1.2 Professional Services

Deployment Services

- Survey/ Design Services Includes, but not limited to, discovery, design, architecture review/validation, and readiness assessment.
- Implementation Services Includes, but not limited to, basic installation and configuration or end-to-end integration and deployment.
- Optimization Includes, but not limited to, assessing operational environment readiness, identify ways to increase efficiencies throughout the network, and optimize Customer's infrastructure, applications and service management.

Response:

HP Network Consulting can be your change agent in the planning, design, and implementation of a network solution that works with what you have—or in a full replacement of your networks. We endorse the ideas of:

- Open standards for interoperability and better economics
- A simplified, single network architecture in the data center, campus, and branch environments
- Increased manageability through a single tool across your organization
- An evergreen strategy of regular upgrades and continuous improvement to keep your infrastructure up to date

HP Network Consulting works closely with you to effect the transformation you need. Our expert consultants define a network vision and path by leveraging HP's expertise, methodology, and blueprints. HP Network Consulting's transformation methodology and complete lifecycle of network services—together with the HP FlexNetwork architecture and commitment to open standards—liberates you from a proprietary networking infrastructure by creating a flexible, secure, cost-effective network designed to meet your business demands.

The HP Network Consulting portfolio was created to promote your success. Our portfolio is anchored by a comprehensive lifecycle of services focused on cloud-ready and converged network infrastructures, open standards networking, unified communications and mobility, and network security. These services are designed to future-proof the enterprise network in order to increase productivity, enhance your competitive advantage, and reduce your operational costs:

- Cloud ready networking and converged infrastructure: HP reference architectures, best practices, and proven methodologies to build a future-ready wired and wireless network infrastructure
- Open standards networking: Network transformation opportunities to remove complexity, reduce costs, and enable greater network agility
- Unified communications and mobility: Strategies and solutions built around converged communications
- Network security: Solutions to implement a fortified network security framework, from the data center to the edge of the network
- Network Integration and Deployment Services: The State of Utah can get its new environment up and running quickly by engaging these services, which coordinate the end-to-end integration and deployment of your network implementation. HP can bring your network online, add new connections to an existing network, or guide your transition to a converged network environment while scaling the solution to fit your requirements. Services include:
 - Site surveys and site-specific designs with implementation guides
 - Procurement, staging, distribution, installation, and configuration
 - Hardware and software integration
 - Testing, cutover, and acceptance
 - Multivendor network integration (interoperability, migration to open standards)
 - Project management
 - Education services
- Network Optimization Services: By providing end-to-end visibility of your network
 infrastructure, HP Network Optimization Services allow the State of Utah to achieve a greater
 return on investment (ROI). These services enable your critical applications to meet
 performance service-level agreements (SLAs) by proactively detecting problems via continuous
 monitoring during production. Services include:
 - LAN and data center networking performance optimization
 - WAN acceleration
 - Application delivery optimization
 - Network scaling and upgrades
 - WLAN optimization study (post-installation verification)
- IPv4 to IPv6 Transition Services: Another CIO decision point that's gathering momentum is whether, when, and how to transition from IPv4 to IPv6. HP Network Consulting offers a suite of IPv6 transition services to guide you in this necessary change.

The cost-savings and IT-performance benefits of cloud computing are motivating large numbers of enterprises to deploy private clouds, public clouds, or a hybrid. Regardless of which platform you choose, the traditional client/server network infrastructure is no longer capable of fully supporting it. The State of Utah needs one that supports highly scalable and highly dynamic workloads delivered by higher-performing servers. HP Network Consulting incorporates HP's Cloud Networking blueprint architecture with your requirements to design and build a cloud-ready network infrastructure.

HP Network Consulting focuses on the following IT success factors:

- Flexibility in the creation and supply of network services that can easily adapt to changing conditions and capitalize on new opportunities
- Speed to provide faster times to market and to service, along with a more agile response to changing customer requirements
- Automation to scale network resources to avoid under- and over-provisioning and instantly meet network demands
- Security to mitigate risk in the network and protect intellectual property
- Optimization of resources and cost to enable a future-ready network

There are a variety of reasons to embrace planning and integration services in general—and HP Network Consulting in particular—as the State of Utah transforms its network environment. The main reason is that advanced technologies have significantly increased the complexity of the network. As a result, IT organizations in increasing numbers are seeking guidance from vendors with proven subject-matter expertise to help them develop strategies to increase the efficiency and reduce the total cost of ownership (TCO) of their investments. Plus, working with services professionals enables you to allocate your internal resources on innovative, revenue-producing initiatives.

In an Instant-On world, it is crucial to have a trusted advisor who understands where your business is going and the technology decisions you need to make to get there. Combining technology intelligence and know-how with business intelligence, our service professionals have been helping organizations across the globe meet their evolving needs. They can do the same for the State of Utah.

HP Network Consulting has more than 40 years of experience with multivendor network equipment through an expansive delivery organization of expert network consultants. HP Network Consulting has assisted both enterprise and service provider customers to plan, design, integrate, and deploy highly complex network infrastructures.

It's about real partnership. Our consultants and support experts can work with the State of Utah to transform IT, converge infrastructure, and keep technology running. Think of it as technology with a human touch.

Remote Management Services

Includes, but not limited to, continuous monitoring, incident management, problem management, change management, and utilization and performance reporting that may be on a subscription basis.

Response:

HP IMC

HP IMC is a comprehensive, modular platform with the flexibility and scalability to meet the needs of networks in the small- to medium-sized business (SMB) or the global enterprise arena. IMC delivers superior visibility and management by consolidating a host of traditionally separate management tools, including those for managing the network infrastructure, its services, and its users. Plus, IMC provides the vital orchestration needed for HP FlexManagement.

HP IMC integrated toolset covers the entire network, from the data center to the edge, even if it is geographically dispersed. And IMC supports the management of all HP Networking equipment as well as over 6,000 third-party devices from a variety of vendors.

In the data center, IMC provides insight into what is a "black hole" for many network administrators—the virtualized network environment. IMC offers new capabilities that allow its single-pane-of-glass multivendor management to automate VM orchestration and synchronize network connectivity information, helping bridge the management and operational divide between physical and virtual worlds.

At the network edge, in a campus or branch office, IMC offers converged wired and wireless infrastructure management, unified user access policies, and traffic analysis. The result is a substantial reduction in manual involvement by the IT department and time wasted on problem recognition.

It only makes sense that if you're trying to reduce complexity, depending on multiple tools is not the best way to manage consolidation. That's why HP IMC is the choice of so many efficiency-focused organizations. Standards-based IMC is the one management tool that provides the integrated toolset you need to architect, deploy, manage, and maintain your network to meet today's challenges and complexities. It pulls together wired, wireless, physical, and virtual environments under a single management umbrella. And it can reduce overhead costs while freeing IT staff time for new initiatives and projects that support business goals. Whether or not you're aiming for a mobile enterprise, HP IMC is the answer for your network of today—and tomorrow.

HP Insight Online and HP Insight Remote Support Capabilities and Benefits

HP Insight Online, accessed through the HP Support Center portal, is part of an expanded portfolio of tools focused on infrastructure monitoring, management, and support. It offers secure single signon access to product and HP support information specific to a customer's IT environment with standard HP warranty, Care Pack, or contract services. It is designed for IT staff who deploy, manage, and support systems, as well as HP Authorized Partners that support IT infrastructure on behalf of their customers. HP Insight Online includes the following capabilities:

- Access personalized dashboard to monitor device health, events, and support status anytime, anywhere
- View and manage all devices in the IT environment, as well as associated support contracts, warranties, and service credits by device
- Monitor auto-generated hardware events and support cases

HP Insight Online gives customers full control to organize their IT environment and to more easily monitor and manage devices, events, and support status. Users can both auto populate the list of devices managed and add devices manually. HP Insight Online users can share device information with HP or HP Authorized Partners to help expedite support and system recommendations.

HP Insight Remote Support is another advanced support program that offers expanded remote monitoring for HP servers, storage, networking, and printers as well as select third-party products. HP Insight Remote Support includes the following capabilities:

- Remote monitoring 24 x 7 to track potential hardware service events, with 24 x 7 "phone home" to HP call centers
- Automatic notification of potential hardware problems for customers and partners
- Automatic support case generation and status tracking, including HP and HP Authorized Partners, if desired
- Support diagnostics and detailed problem resolution information

- Seamless integration with HP Insight Online to enable monitoring and device management across the IT ecosystem
- Advanced installation wizards to discover and verify readiness of devices

The HP Insight Remote Support functionality is available for no additional cost as part of the HP warranty — no support agreement or Care Pack is required. For hardware problems that require parts, HP Insight Remote Support features onsite service dispatch.

HP Insight Online and HP Insight Remote Support can also take full advantage of the technologies available in HP ProLiant Gen8 servers, including the latest Intel Xeon processors. The HP ProLiant Gen8 servers were specifically designed to offer a variety of advanced remote support capabilities, including agentless setup for HP Insight Remote Support. In addition, HP ProLiant Gen8 servers feature Active Health Monitoring functionality that can monitor and capture system changes across 1,600 unique parameters.

When used together, HP Insight Online and HP Insight Remote Support can offer a range of potential benefits for IT organizations looking to "do more with less." By pairing the device management, anytime/anywhere functionality in HP Insight Online with the advanced remote monitoring and support capabilities in HP Insight Remote Support, IT organizations could see the following:

- Improved resolution time for all monitored technology in the IT landscape
- Increased efficiency of the entire IT organization
- Reduced overall risk in the IT environment
- Lower total cost of ownership

Consulting/Advisory Services

Includes, but not limited to, assessing the availability, reliability, security and performance of Customer's existing solutions.

Response:

Typically, the need for assessment and analysis is driven by initiatives such as consolidation, centralization, and virtualization of IT environments—and when you are deploying new applications or technologies. HP network consultants employ a structured methodology to accomplish these objectives by collecting and analyzing detailed data of your network's characteristics. Services include:

- Assessment of your end-to-end environment readiness
- Gap analysis and program planning
- Security assessment
- Recommendations and roadmap

Data Communications Architectural Design Services

Developing architectural strategies and roadmaps for transforming Customer's existing network architecture and operations management.

Response:

HP Network Consulting lifecycle services consist of:

- Network Strategy and Planning Services: These services define high-level strategies and roadmaps, business case developments, high-level solution design and blueprints, and interoperability and transition strategies. Services include:
 - Visioning workshops, which are interactive sessions with IT and business decision makers to define a high-level transformation roadmap
 - Network business benefits roadmaps, delivered in an interview and workshop style to facilitate the sharing of network transformation opportunities

- Network strategic architecture services to align your needs and visions with an actual technology deployment roadmap on which your IT team can deliver
- Network Architecture and Design Services: These services offer detailed network architecture and design for your campus, wireless, and data center local area networks (LANs), utilizing HP's methodology for a converged and virtualized infrastructure. Included are high-availability options, established design principles, the use of network protocols in conjunction with various network topologies, and other considerations. The goal is to provide the State of Utah with a scalable, resilient network architecture within a best-practices framework. Services include:
 - Architectural analysis and validation
 - Blueprint and standards
 - Detailed logical and physical design
 - Interoperability and testing
 - Proof of concept
 - Implementation planning
 - Documentation and bill of materials

· Statement of Work (SOW) Services

Customer-specific tasks to be accomplished and/or services to be delivered based on Customer's business and technical requirements.

Response:

HP has developed a comprehensive set of solution-focused services that spans the entire lifecycle of IT deployments—whether the State is planning, implementing or maintaining new capabilities. This diverse portfolio addresses business, industry and infrastructure services. It is grounded in services that form the building blocks for industry solutions and solution families that address major technology issues facing most organizations today. HP supports businesses and governments all over the world. As one of the largest segments of HP, we leverage the breadth of our extended portfolio to offer the most comprehensive end-to-end IT services.

Integrated solutions across industries for infrastructure, applications and business processes

INFRASTRUCTURE TECHNOLOGY OUTSOURCING

- Data Center Services
- Networking Services
- Security, Compliance, and Continuity Services
- Workplace Services

APPLICATION SERVICES

- Application Development Services
- Applications Management Services
- Enterprise Application Services
- Systems Integration Services

INDUSTRY SERVICES/ BUSINESS PROCESSES

- Customer Relationship Management Services
- Document Processing Services
- Finance and Administrative Services
- HR and Payroll Services

Consulting • In-House • Outsourced • Cloud

HP offers a broad portfolio of services that includes customer support, consulting and integration, outsourcing services, and education. HP can enter at any point of the engagement lifecycle, to design, build, integrate, manage and evolve a solution tailored to address the State's specific business requirements. HP Enterprise Services offers technology solutions that help customers transform their IT environment into a business asset.

HP professionals follow a collaborative approach, taking time to understand the State's business requirements and IT environment, and then adjusting their approach to fit your needs. Using a proven set of methodologies, they draw on a comprehensive portfolio of integrated offerings to deliver solutions that provide both choice and value. HP can help The State

- Ensure cost-effective stability and flexibility with unparalleled support for handling end-to-end distributed IT resources
- Reduce complexity with services to manage multivendor, heterogeneous infrastructures and complex networks seamlessly
- Optimize current assets and prepare for the future with access to HP world-class R&D teams, lifecycle maturity specialists and new technology integration teams

HP can help the State become more productive, innovative, and secure so you can grow. To help achieve these outcomes, we utilize our BestShore[®] delivery strategy, making processes more consistent, increasing availability of systems and resources, and improving run performance globally.

A good infrastructure forms the framework of your IT system. The State's enterprise infrastructure of servers, networks, and other assets should make it easy for you to connect you real-time data to speed decision-making and capitalize on opportunities. Being able to adjust quickly to changing business needs drives resilience, can increase utilization and lower costs. Our world-class services include hosting mainframes, midrange, and web infrastructures. We are leaders in managing desktop assets, incidents, problems, and communication networks while assuming operational responsibility through outsourcing arrangements.

The HP team of professionals draws upon a comprehensive set of integrated offerings to create custom solutions. With an experienced team of skilled professionals, The State can reduce business costs, control operational risks and transform IT into an accelerator of business growth. HP will work collaboratively with you to provide better business outcomes though our depth of business and technical insight, high level of flexibility and tried and tested execution. Complemented by a global network of partners, HP Services can enhance your business results.

HP delivers the right combination of hardware, software, and services to meet your unique business requirements, shorten implementation times, and provide rapid time to value. And most importantly, we flexibly deliver what you need, how you need it—whether you buy our technology and run it yourself; have HP help manage it; outsource it to HP and have us manage it for you on our site, your site, or through the cloud; or choose a combination of the above.

Our flexibility also extends to the financing and leasing options we offer through HP Financial Services—which offers leasing, financing, and utility programs; asset recovery services; and financial asset management services for large global and enterprise customers.

For over 70 years, HP has helped people, organizations, and communities around the world apply technology in meaningful ways—by harnessing new thinking and ideas to deliver reliable products and services.

5.3.1.3 Partner Services

Provided by Contractor's Authorized Partners/Resellers

Subject to Contractor's approval and the certifications held by its Partners/Resellers, many Partners/Resellers can also offer and provide some or all of the Services as listed above at competitive pricing, along with local presence and support. As the prime, Contractor is still ultimately responsible for the performance of its Partners/ Resellers. Customers can have the option to purchase the Services to be directly delivered by Contractor (OEM) or its certified Partners/Resellers.

Response:

HP has read and acknowledges. HP will only put services SKUs on the contract that HP or authorized resellers are able to deliver. In most cases, the partner / reseller will take the order and

then decide to allow HP to deliver the service or deliver the service themselves. HP has a process that allows our resellers to become authorized providers of HP services. In these cases, the partner still uses the HP services SKUs that we have listed.

5.3.1.4 Training

Learning offerings for IT professionals on networking technologies, including but not limited to designing, implementing, operating, configuring, and troubleshooting network systems pertaining to items provided under the master agreement.

Response:

HP has listed our training offerings as SKUs in Appendix 1c - HP Service Offerings (Training) - Section 3.1.2. Pricing has been provided in the Cost Schedule. Our partners can take orders for HP education services; however, HP delivers the training to the customer.

5.3.2 Adding Products

The ability to add new equipment and services is for the convenience and benefit of WSCA-NASPO, the Participating States, and all the Authorized Purchasers. The intent of this process is to promote "one-stop shopping" and convenience for the customers and equally important, to make the contract flexible in keeping up with rapid technological advances. The option to add new product or service categories and/items will expedite the delivery and implementation of new technology solutions for the benefit of the Authorized Purchasers.

After the contracts are awarded, additional IT product categories and/or items may be added per the request of the Contractor, a Participating State, an Authorized Purchaser or WSCA-NASPO. Additions may be ad hoc and temporary in nature or permanent. All additions to an awarded Contractor or Manufacturer's offerings must be products, services, software, or solutions that are commercially available at the time they are added to the contract award and fall within the original scope and intent of the RFP (i.e., converged technologies, value adds to manufacturer's solution offerings, etc.).

Response:

HP has read and acknowledges. To further clarify, HP has two types of product additions:

- Minor changes and product replacements direct replacements for discontinued products. HP
 would request that these types of changes are automatically updated when they occur, similar
 to price decreases. As a regular maintenance procedure, HP updates its product list and
 pricing.
- New product categories. When new products are commercially available and are within the original scope and intent of the RFP, HP will add these products pursuant to the RFP instructions.

5.3.2.1 New Product from Contractors

If Contractor, a Participating State, an Authorized Purchaser or WSCA-NASPO itself requests to add new product categories permanently, then all awarded Contractors (Manufacturers) will be notified of the proposed change and will have the opportunity to work with WSCA to determine applicability, introduction, etc. Any new products or services must be reviewed and approved by the WSCA-NASPO Contract Administrator.

Response:

HP has read and acknowledges.

5.3.2.2 Ad Hoc Product Additions

A request for an ad hoc, temporary addition of a product category/item must be submitted to WSCA-NAPOS via the governmental entity's contracting/purchasing officer. Ad hoc, temporary requests will be handled on a case-by-case basis.

Response:

HP has read and acknowledges.

5.3.2.3 Pricelist Updates

As part of each Contractor's ongoing updates to its pricelists throughout the contract term, Contractor can add new SKUs to its awarded product categories that may have been developed inhouse or obtained through mergers, acquisitions or joint ventures; provided, however, that such new SKUs fall within the Contractor's awarded product categories.

Response:

HP has read and acknowledges.

HP's web-based pricing is generated automatically from the WSCA approved contract price files, in combination with the then current US commercial list price, which is the baseline used for WSCA contract discounting. This will be done systematically at least once a month per the direction of the State of Utah.

Section 6: Evaluation

6.1 General Information

Proposals will be evaluated for completeness and compliance with the requirements of this RFP by a sourcing team. The sourcing team may engage additional qualified individuals during the process to assist with technical, financial, legal, or other matters.

Except at the invitation of the sourcing team, no activity or comments from Offerors regarding this RFP shall be discussed with any member of the sourcing team during the evaluation process. An Offeror who contacts a member of the sourcing team in reference to this RFP may have its proposal rejected.

Each proposal must be submitted in Microsoft Word or Excel, or PDF labeled and organized in a manner that is congruent with the section number, headings, requirements, and terminology used in this RFP. Proposal documents must be use Arial font size 10. All proposals must be submitted in electronic form.

Response:

HP has read and acknowledges.

6.2 Administrative Requirements Compliance

The sourcing team will evaluate each proposal for compliance with administrative requirements. Non compliance with any of these requirements will render a proposal non-responsive. Only those proposals that pass the administrative requirements will be evaluated further.

In order to pass the Administrative Requirements, the following must be received by due date and time associated with this RFP as listed in Bid Sync.

Response:

HP has read and acknowledges.

6.2.1 References

Vendor must provide a least three current account references for which your company provides similar Data Communications services for private, state and/or large local government clients (preferably government/public entities). Offerors are required to submit Attachment B - Reference Form, for business references. The business providing the reference must submit the Reference Form directly to the State of Utah, Division of Purchasing. It is the offeror's responsibility to ensure that completed forms are received by the State of Utah Division of Purchasing on or before the proposal submission deadline for inclusion in the evaluation process. Business references not received, or not complete, may adversely affect the offeror's score in the evaluation process. The Purchasing Division reserves the right to contact any or all business references for validation of information submitted.

Response:

The following HP customers have submitted Attachment B – Reference Form directly to the State of Litah:

- Alpine School District, Utah
- Jordan School District, Utah
- Thunderbird School of Global Management, Arizona
- The Evergreen State College, Washington
- Florida Department of Transportation, Florida
- Rio Rancho Public Schools, New Mexico

6.3 Minimum Scope Requirements Compliance

The sourcing team will evaluate each proposal that passed the administrative requirements for compliance with Section 5.2 Data Communications Services – Requirements. Scope requirements are evaluated in terms of the breadth and depth of the offeror proposal for each of the section 5.2.1-5.3.0 Scope categories. Only those proposals in each section that score 70% or better will move on to cost evaluation.

Response:

HP has read and acknowledges.

6.4 Evaluation Criteria

The following table details how each proposal shall be evaluated on a basis of 100 points.

An evaluation committee comprised of representatives from some WSCA-NASPO member States will be appointed by the WSCA-NASPO Contract Administrator to perform the proposal evaluation.

All Offeror's proposals will be initially reviewed for compliance with the mandatory general requirements in Section 3 and Sections 5.1.1-5.1.5 stated within the RFP. Any proposal failing to meet one or more mandatory requirement(s) will be considered non-responsive and deemed "unacceptable", and will be eliminated from further consideration.

Those proposals deemed "acceptable" or "potentially acceptable" will be evaluated against the following proposal evaluation criteria using a point-based scoring methodology. Proposal evaluation criteria are listed in relative order of importance:

6.4.1 Cost – (bid sheets including discounts off list price attached) – 30%

Given that technology products generally depreciate over time and go through typical product lifecycles, it is more favorable for customers to have prime contracts be based on minimum discounts off the Offeror's' commercially published pricelists versus fixed pricing. In addition, Offerors must have the ability to update and refresh their respective price books, as long as the agreed-upon discounts are fixed. Minimum guaranteed contract discounts do not preclude an Offeror and/or its authorized resellers from providing deeper or additional, incremental discounts at there sole discretion.

- 6.4.1.1 Refurbished Equipment Many IT manufacturers offer refurbished equipment at a substantially lower cost with attractive warranties that also address risk concerns some customers may have with refurbished gear. Offerors may add an optional provision for manufacturer-certified refurbished equipment to be available for procurement under this contract. This offering will not be evaluated as part of the cost scoring process.
- 6.4.2 Demonstrate ability to provide products and services within scope of the RFP (Section 5.2-5.31) 25%
- 6.4.3 Qualifications, technical ability, maintenance, training and value added services 10%
- 6.4.4 Ability to supply to WSCA / NASPO member states/geographical coverage -10%
- 6.4.5 Offer profile and references (i.e., financial stability, presence in marketplace, adequate staff, marketing efforts etc.) -20%
- 6.4.6 Administrative (i.e., report generating ability, e-commerce, account reps, problem resolution, customer satisfaction, website hosting and other administrative related issues) -5%

At the option of the evaluation committee the WSCA-NASPO Contract Administrator may initiate discussion(s) with Offerors who submit responsive or potentially responsive proposals for the purpose of clarifying aspects of the proposal(s), however, proposals may be evaluated withoutsuch discussion(s). Such discussion(s) is not to be initiated by Offerors.

Based on the competitive range of the evaluation scores, the evaluation committee may choose to make a "finalist list" of offeror's; if opted for, all offeror's will be notified of their status at this juncture by the Procurement Manager.

Finalist Offeror's may be required, at the option of the evaluation committee, to present their proposals and possibly demonstrate their Internet website to the evaluation committee. The Procurement Manager will schedule the time and location for each Offeror presentation. Each Offeror presentation will be of equal duration for all offeror's and may also include an additional amount of time reserved for questions/answers.

The sourcing team will evaluate each proposal that has passed the administrative requirements and met or exceeded the Section 3 and Section 5.1.1-5.1.5 Mandatory Requirements.

WSCA-NASPO Data Communications Equipment and Associated Products #JP14001

Firm Name:

Section Number:

0 = Failure, no response
1 = Poor, inadequate, fails to meet requirement
2 = Fair, only partially responsive
3 = Average, meets minimum requirement
4 = Above average, exceeds minimum requirement
5 = Superior

| | | Score (0-5) | Weight | Points |
|---|--------------------|----------------|--------|--------------------------------|
| Demonstrated Ability to meet scope of requirements (25 points possible) | | | | |
| Scope and Varity of products provided | 8 points possible | | X 1.6 | |
| Experience and technical ability of manufacturer | 7 points possible | | X 1.4 | |
| Maintenance Program | 2 points possible | | X .40 | |
| Training Program | 2 points possible | | X .40 | |
| Service Program | 2 points possible | | X .40 | |
| Demonstrate Effective Reseller Program managed by the manufacturer in WSCA / NASPO States | 4 points possible | | X .80 | |
| 2. Demonstrate Qualifications and Technical Ability (10 points possible) | | | | |
| Technical Staff Qualifications | 2 points possible | | X .40 | |
| Maintenance Staff Qualifications | 2 points possible | | X .40 | |
| Training Staff Qualifications | 2 points possible | | X .40 | |
| Technical Suitability of Products | 4 points possible | | X .80 | |
| 3. Demonstrate ability to supply WSCA / NASPO member States (10 points possible) | 10 points possible | | X 2 | |
| 4. Company profile and references (20 points) | | | | |
| Financial Statements and Records | 10 points possible | | X 2 | |
| References, Reputation, Breadth and Depth of Offering | 10 points possible | | X 2 | |
| 5. Demonstrate ability to provide administrative support (5 points possible) | 5 points possible | | X 1 | |
| 6. Cost (30 points possible)* Services (10 points) | 30 points possible | | | * Inserted by purchasing |

| Product Offering Discount Percentage (20 points) | | | |
|--|-----------------------|-------|--|
| | (100 points possible) | Total | |

* Purchasing will use the following cost formula for the "Services": The points assigned to each Offeror's cost proposal will be based on the lowest proposal price. The offeror with the lowest Proposed Price will receive 100% of the price points. All other Offerors will receive a portion of the total cost points based on what percentage higher their Proposed Price is than the Lowest Proposed Price. An Offeror who's Proposed Price is more than double (200%) the Lowest Proposed Price will receive no points. The formula to compute the points is: Cost Points x (2- Proposed Price/Lowest Proposed Price).

Purchasing will use the following cost formula for the "Product Offering Discount Percentage": The points assigned to each Offeror's cost proposal will be based on the highest discount percentage. The Offeror with the highest discount percentage will receive 100% of the price points. All other Offerors will receive a portion of the total cost points based on what percentage lower their discount percentage is than the highest discount percentage. An Offeror who's Proposed percentage discount is less than double (200%) the highest discount percentage will receive no points. The formula to compute the points is: Cost Points x (2¬ Highest Proposed Discount/Proposed Discount).

Response:

HP has read and acknowledges.

Section 7: Master Agreement Terms and Conditions/Exceptions

7.1 WSCA-NASPO Master Agreement Terms and Conditions

7.1.1

The WSCA-NASPO Contract Administrator referred to in section 2 of the WSCA-NASPO Master Agreement Terms and Conditions is Debra Gunderson, State of Utah Division of Purchasing and General Services. This RFP represents the WSCA-NASPO Contract Administrator's written approval of the modifications, waivers, alterations, amendments, and supplements to the Master Agreement Terms and Conditions made in this RFP and this Section 7.

Response:

HP has read and acknowledges.

7.1.2

Except as limited in this section or elsewhere in this RFP, Participating Entities who execute a Participating Addendum may alter, modify, supplement, or amend the WSCA-NASPO Master Agreement Terms and Conditions as necessary to comply with Participating Entity law or policy with respect to their orders under the Master Agreement. A Contractor may not deliver Products or perform services under this Master Agreement until a Participating Addendum acceptable to the Participating Entity and Contractor is executed. The WSCA-NASPO Terms and Conditions are applicable to any order by a Participating Entity, except to the extent altered, modified, supplemented or amended by a Participating Addendum. By way of illustration and not limitation, this authority may apply to unique delivery and invoicing requirements, confidentiality requirements, defaults on orders, governing law and venue relating to orders by a Participating Entity, Indemnification, and insurance requirements. Statutory or constitutional requirements relating to availability of funds may require specific language in some Participating Addenda in order to comply with applicable law. The expectation is that these alterations, modifications, supplements, or amendments will be addressed in the Participating Addendum or, with the consent of the Participating Entity and Contractor, may be included in the commitment voucher (e.g. purchase order or contract) used by the Participating Entity to place the order.

Response:

HP has read and acknowledges.

7.1.3

The term Purchasing Entity and Participating Entity shall both mean "Participating Entity" as that term is defined in WSCA-NASPO Master Agreement Terms and Conditions.

Response:

HP has read and acknowledges.

7.1.4

With respect to section 11, Indemnification, the terms of any Participating Addendum may alter, modify, supplement, or amend the language in section 11 and may include a limitation of liability mutually agreeable to the Participating Entity and the Contractor.

Response:

HP has read and acknowledges.

7.1.5

With regard to section 20, Participants, Participating Entities who are not states may under some circumstances sign their own Participating Addendum, subject to the approval of the Chief Procurement Official of the state where the Participating

Entity is located. Contractors may upon request obtain a copy of the written authorization from the WSCA-NASPO Contract Administrator.

Response:

HP has read and acknowledges.

7.2 Offeror Exceptions to Terms and Conditions

7.2.1

The Lead State discourages exceptions to contract terms and conditions in the RFP, attached Participating Entity terms and conditions (if any), and the WSCA-NASPO Master Agreement Terms and Conditions. As specified in this RFP, exceptions may cause a proposal to be rejected as nonresponsive when, in the sole judgment of the Lead State (and its evaluation team), the proposal appears to be conditioned on the exception or correction of what is deemed to be a deficiency or unacceptable exception would require a substantial proposal rewrite to correct. Moreover, Offerors are cautioned that award may be made on receipt of initial proposals without clarification or an opportunity for discussion, and the nature of exceptions would be evaluated. Further, the nature of exceptions will be considered in the competitive range determination if one is conducted. Exceptions will be evaluated to determine the extent to which the alternative language or approach poses unreasonable, additional risk to the state, is judged to inhibit achieving the objectives of the RFP, or whose ambiguity makes evaluation difficult and a fair resolution (available to all vendors) impractical given the timeframe for the RFP.

Response:

HP has read and acknowledges.

7.2.2

The Lead State will entertain exceptions to contract terms and conditions in this RFP, including the WSCA-NASPO Master Agreement Terms and Conditions. Offerors are strongly encouraged to be judicious in identifying exceptions.

Response:

HP has read and acknowledges.

7.2.3

Based on the market research conducted by the Lead State, the following provisions are intended to frame the contours of exceptions that may be acceptable, additional risk so long as the Offeror's exceptions are specified with sufficient particularity.

Response:

HP has read and acknowledges.

7.2.4

The Lead State will consider Offeror standard terms for inspection and acceptance, so long as a reasonable time for acceptance is stated. However, the Participating Entities right to exercise revocation of acceptance under its Uniform Commercial Code must be preserved. Submit the standard terms with the offer and describe generally how commerciality in their use is established, e.g., identify publicly-available catalogs where the warranty terms are used and how long they have been in use.

Response:

The HP Networking Product Warranty Summary is provided in Appendix 3.

7.2.5

The Lead State will consider standard warranty and/or maintenance terms, but the alternative warranty and/or maintenance will be evaluated to determine whether they provide comparable protection to the warranty specified in section 30 of the WSCA-NASPO Master Agreement Terms and Conditions. Provide the terms of the warranty and maintenance in the offer. Also describe generally how commerciality is established for those terms, e.g., publicly-available catalogs the warranty terms

are used and how long they have been in use. Provide one reference from a customer having comparable sales volume who is using the warranty and maintenance provisions, where the warranty term has expired, and who has exercised rights under the warranty.

Response:

The HP Networking Product Warranty Summary is provided in Appendix 3.

HP offers an industry-leading Lifetime Warranty for many of our networking products, which recently became even stronger by including 3 years of 7x24x365 phone support at no additional cost. Because of this warranty, many of our networking customers never pay for maintenance for the life of the product. All of the customers that have provided references benefit from the HP lifetime warranty.

Additionally, three of the customers who provided HP references also have purchased upgraded support to cover those products not included in the lifetime coverage. Those customers include Alpine School District, Jordan School District, and Rio Rancho School District. Therefore the State has received a good cross section of input from HP networking customers who use both the warranty coverage and also the paid-for support.

7.2.6

Intellectual property. The Lead State will consider license terms and conditions that as a minimum convey to Participating Entities a nonexclusive, irrevocable, perpetual, paid-up, royalty free license to use software or other intellectual property delivered with or inherent in the commodity or service, and to transfer the license rights to third parties for government purposes. Provide the terms of the license, including any terms that cover third party intellectual property used in the Offeror's solution. Offerors should be aware that Participating Entities using federal funds may be required to negotiate additional or different terms to satisfy minimum rights requirements of their federal grants.

Response:

HP respectfully clarifies that all software licenses are subject to compliance with the license terms made available with the product.

HP respectfully clarifies that all software licenses are subject to compliance with the license terms made available with the product and the provisions in Additional Definitions and Alternative Terms for Consideration section in the WSCA-NASPO Master Agreement Terms and Conditions section of this document.

7.2.7

Any limitation of liability provision – including any exclusion of damages clause – proposed by an Offeror to be the default limitation of liability provision under the Master Agreement must preserve a reasonable amount of direct damages for breach of contract, additionally permit the Participating Entity to recoup amounts paid for supplies or services not finally accepted (as in the case of advance or progress payments, if used), and preserve the right of the Participating Entity to be held harmless from costs of litigation as well as ultimate liability within limits agreed by the parties.

Moreover, any limitation of liability clause proposed by an Offeror should be reciprocal, cover lost profits, and exclude claims or liability arising out of intellectual property infringement, bodily injury (including death), damage to tangible property, and data breach. Include the text of any such language if proposed. Further, provide contact information for a public entity, or private entity if no public entity exists, where the limitation of liability clause (or another clause substantially similar) operated to limit liability. If no such example exists, provide contact information for a state, or if no state exists, a higher education institution, or if none exists, a city or county represented by counsel in the negotiations who has agreed to the proposed terms and conditions.

HP provides the following limitation of liability and general indemnification for your consideration and is representative of what is commercially reasonable and within industry standards. In the alternative, HP is willing to consider other language lawfully required by the State of Utah or participating entity.

HP's liability to Customer under this Agreement is limited to the greater of \$1,000,000 or the amount payable by Customer to HP for the relevant Order. Neither Customer nor HP will be liable for lost revenues or profits, downtime costs, loss or damage to data or indirect, special or consequential costs or damages. This provision does not limit either party's liability for: unauthorized use of intellectual property, death or bodily injury caused by their negligence; acts of fraud; willful repudiation of the Agreement; nor any liability which may not be excluded or limited by applicable law.

Examples of State Contracts which contain this language: New Mexico WSCA NASPO Managed Print Services, Gerrie Becker and Maine WSCA NASPO MLTI, Mark Lutte are HP's two most similar contracts where this provision has been approved. HP will provide the contracts upon request.

HP will defend and settle third party claims against the State for tangible property damage, bodily injury and death, to the extent caused by HP's negligence or willful misconduct, provided that the State promptly notifies HP of such claims, cooperates with HP in the defense of the claims, and grants HP sole defense of such claims. In connection with such claims, HP will pay all defense costs, settlement amounts, court awarded damages (including court costs and reasonable attorneys' fees), and third party costs incurred by the State at the request of HP in connection with the defense of the claim.

7.2.8

The enumerated examples in subsection 7.2 are not intended to limit the ability of Offerors to propose additional, reasonable exceptions. For any other exception, where the exception is based on claims of standard or normal commercial practice, provide contact information for a state, or if no state exists, a higher education institution, or if none exists, a city or county represented by counsel in the negotiations who has agreed to the proposed terms and conditions.

Response:

HP has read and acknowledges.

7.2.8

The enumerated examples in subsection 7.2 are not intended to limit the ability of Offerors to propose additional, reasonable exceptions. For any other exception, where the exception is based on claims of standard or normal commercial practice, provide contact information for a state, or if no state exists, a higher education institution, or if none exists, a city or county represented by counsel in the negotiations who has agreed to the proposed terms and conditions.

Response:

HP has read and acknowledges.

7.3 WSCA-NASPO eMarket Center

7.3.1 In July 2011, WSCA-NASPO entered into a multi-year agreement with SciQuest, Inc. whereby SciQuest will provide certain electronic catalog hosting and management services to enable eligible WSCA-NASPO entity's customers to access a central online website to view and/or shop the goods and services available from existing WSCA-NASPO Cooperative Contracts. The central online website is referred to as the WSCA-NASPO eMarket Center Contractor shall either upload a hosted catalog into the eMarket Center or integrate a punchout site with the eMarket Center.

Supplier's Interface with the eMarket Center

There is no cost charged by SciQuest to the Contractor for loading a hosted catalog or integrating a punchout site.

At a minimum, the Contractor agrees to the following:

- 1. Implementation Timeline: WSCA-NASPO eMarket Center Site Admin shall provide a written request to the Contractor to begin enablement process. The Contractor shall have fifteen (15) days from receipt of written request to work with WSCA-NASPO and SciQuest to set up an enablement schedule, at which time SciQuest's technical documentation shall be provided to the Contractor. The schedule will include future calls and milestone dates related to test and go live dates. The contractor shall have a total of Ninety (90) days to deliver either a (1) hosted catalog or (2) punch-out catalog, from date of receipt of written request.
- Definition of Hosted and Punchout: WSCA-NASPO and SciQuest will work with the Contractor, to decide which of the catalog structures (either hosted or punch-out as further described below) shall be provided by the Contractor. Whether hosted or punch-out, the catalog must be strictly limited to the Contractor's awarded contract offering (e.g. products and/or services not authorized through the resulting cooperative contract should not be viewable by WSCA-NASPO Participating Entity users).
 - a. Hosted Catalog. By providing a hosted catalog, the Contractor is providing a list of its awarded products/services and pricing in an electronic data file in a format acceptable to SciQuest, such as Tab Delimited Text files. In this scenario, the Contractor must submit updated electronic data annually to the eMarket Center for WSCA-NASPO Contract Administrator's approval to maintain the most up-to-date version of its product/service offering under the cooperative contract in the eMarket Center.
 - b. Punch-Out Catalog. By providing a punch-out catalog, the Contractor is providing its own online catalog, which must be capable of being integrated with the eMarket Center as a. Standard punch-in via Commerce eXtensible Markup Language (cXML). In this scenario, the Contractor shall validate that its online catalog is up-to-date by providing a written update quarterly to the Contract Administrator stating they have audited the offered products/services and pricing listed on its online catalog. The site must also return detailed UNSPSC codes (as outlined in line 3) for each line item. Contractor also agrees to provide e-Quote functionality to facilitate volume discounts.
- 3. Revising Pricing and Product Offerings: Any revisions (whether an increase or decrease) to pricing or product/service offerings (new products, altered SKUs, etc.) must be pre-approved by the WSCA-NASPO Contract Administrator and shall be subject to any other applicable restrictions with respect to the frequency or amount of such revisions. However, no cooperative contract enabled in the eMarket Center may include price changes on a more frequent basis than once per quarter. The following conditions apply with respect to hosted catalogs:
 - a. Updated pricing files are required by the 1st of the month and shall go into effect in the eMarket Center on the 1st day of the following month (i.e. file received on 1/01/14 would be effective in the eMarket Center on 2/01/14). Files received after the 1st of the month may be delayed up to a month (i.e. file received on 11/06/14 would be effect in the eMarket Center on 1/01/15).
 - b. Contract Administrator-approved price changes are not effective until implemented within the eMarket Center. Errors in the Contractor's submitted pricing files will delay the implementation of the price changes in eMarket Center.
- 4. Supplier Network Requirements: Contractor shall join the SciQuest Supplier Network (SQSN) and shall use the SciQuest's Supplier Portal to import the Contractor's catalog and pricing, into the SciQuest system, and view reports on catalog spend and product/pricing freshness. The Contractor can receive orders through electronic delivery (cXML) or through low-tech options such as fax. More information about the SQSN can be found at: www.sciquest.com or call the SciQuest Supplier Network Services team at 800-233-1121.

- 5. Minimum Requirements: Whether the Contractor is providing a hosted catalog or a punch-out catalog, the Contractor agrees to meet the following requirements:
 - Catalog must contain the most current pricing, including all applicable administrative fees and/or discounts, as well as the most up-to-date product/service offering the Contractor is authorized to provide in accordance with the cooperative contract; and
 - b. The accuracy of the catalog must be maintained by Contractor throughout the duration of the cooperative contract between the Contractor and the Contract Administrator; and
 - c. The Catalog must include a Lead State contract identification number; and
 - The Catalog must include detailed product line item descriptions; and
 - e. The Catalog must include pictures when possible; and
 - f. The Catalog must include any additional WSCA-NASPO and Participating Addendum requirements.*
- Order Acceptance Requirements: Contractor must be able to accept Purchase Orders via fax or cXML.
 - a. The Contractor shall provide positive confirmation via phone or email within 24 hours of the Contractor's receipt of the Purchase Order. If the Purchasing Order is received after 3pm EST on the day before a weekend or holiday, the Contractor must provide positive confirmation via phone or email on the next business day.
- 7. UNSPSC Requirements: Contractor shall support use of the United Nations Standard Product and Services Code (UNSPSC). UNSPSC versions that must be adhered to are driven by SciQuest for the suppliers and are upgraded every year. WSCA-NASPO reserves the right to migrate to future versions of the UNSPSC and the Contractor shall be required to support the migration effort. All line items, goods or services provided under the resulting statewide contract must be associated to a UNSPSC code. All line items must be identified at the most detailed UNSPSC level indicated by segment, family, class and commodity. More information about the UNSPSC is available at: http://www.unspsc.com and http://www.unspsc.com/FAQs.asp#howdoesunspscwork.
- Applicability: Contractor agrees that WSCA-NASPO controls which contracts appear in the eMarket Center and that WSCA-NASPO may elect at any time to remove any supplier's offering from the eMarket Center.
- 9. The WSCA-NASPO Contract Administrator reserves the right to approve the pricing on the eMarket Center. This catalog review right is solely for the benefit of the WSCA-NASPO Contract Administrator and Participating Entities, and the review and approval shall not waive the requirement that products and services be offered at prices (and approved fees) required by the Master Agreement.
 - * Although suppliers in the SQSN normally submit one (1) catalog, it is possible to have multiple contracts applicable to different WSCA-NASPO Participating Entities. For example, a supplier may have different pricing for state government agencies and Board of Regents institutions. Suppliers have the ability and responsibility to submit separate contract pricing for the same catalog if applicable. The system will deliver the appropriate contract pricing to the user viewing the catalog.

Several WSCA-NASPO Participating Entities currently maintain separate SciQuest eMarketplaces, these Participating Entities do enable certain WSCA-NASPO Cooperative Contracts. In the event one of these entities elects to use this WSCA-NASPO Cooperative Contract (available through the eMarket Center) but publish to their own eMarketplace, the Contractor agrees to work in good faith with the entity and WSCA-NASPO to implement the catalog. WSCA-NASPO does not anticipate that this will require substantial additional efforts by the Contractor; however, the supplier agrees to take commercially reasonable efforts to enable such separate SciQuest catalogs.

Response:

HP has read and acknowledges.

In 2.b. above, HP has the following clarification:

On the punch-out sites, HP can provide a quote and list it under the "Company Standards" which can be saved for the customer's use.

In 3.a above, HP would like the state of Utah to agree to a price update process as follows:

HP will provide the State of Utah notification of price decreases and or minor product updates with prices (e.g. replacement products) when they occur. If this is provided to the State of Utah 72 business hours before the 1st of the month and HP does not receive a disapproval notice, HP will post these updates on the 1st day of the month.

HP Response to Attachment A—State of Utah Standard Information Technology Terms and Conditions (for WSCA Contracts and DTS Related Contracts)

- AUTHORITY: Provisions of this contract are pursuant to the authority set forth in 63G-6, Utah Code Annotated, 1953, as amended, Utah State Procurement Rules (Utah Administrative Code Section R33), and related statutes which permit the State to purchase certain specified services, and other approved purchases for the State.
- 2. CONTRACT JURISDICTION, CHOICE OF LAW, AND VENUE: The provisions of this contract shall be governed by the laws of the State of Utah. The parties will submit to the jurisdiction of the courts of the State of Utah for any dispute arising out of this Contract or the breach thereof. Venue shall be in Salt Lake City, in the Third Judicial District Court for Salt Lake County.
- LAWS AND REGULATIONS: The Contractor and any and all supplies, services, equipment, and construction furnished under this contract will comply fully with all applicable Federal and State laws and regulations, including applicable licensure and certification requirements.
- 4. RECORDS ADMINISTRATION: The Contractor shall maintain, or supervise the maintenance of all records necessary to properly account for the payments made to the Contractor for firm-fixed pricing costs authorized by this contract. These records shall be retained by the Contractor for at least four years after the contract terminates, or until all audits initiated within the four years, have been completed, whichever is later. The Contractor agrees to allow the State to appoint a nationally recognized third-party auditor and Federal auditors, and State Agency Staff, access to all the records to this contract, for audit and inspection, and monitoring of services. Such access will be during normal business hours, or by appointment.

Response:

HP respectfully requests the changes to this provision which are in redline above.

- CERTIFY REGISTRATION AND USE OF EMPLOYMENT "STATUS VERIFICATION SYSTEM": The Status Verification System, also referred to as "E-verify", only applies to contracts issued through a Request for Proposal process, and to sole sources that are included within a Request for Proposal. It does not apply to Invitation for Bids or to the Multi-Step Process.
 - 1. Status Verification System
 - (1) Each offeror and each person signing on behalf of any offeror certifies as to its own entity, under penalty of perjury, that the named Contractor has registered and is participating in the Status Verification System to verify the work eligibility status of the contractor's new employees that are employed in the State of Utah in accordance with applicable immigration laws including UCA Section 63G-12-302.
 - (2) The Contractor shall require that the following provision be placed in each subcontract at every tier: "The subcontractor shall certify to the main (prime or general) contractor by affidavit that the subcontractor has verified through the Status Verification System the employment status of each new employee of the respective subcontractor, all in accordance with applicable immigration laws including UCA Section 63G-12-302 and to comply with all applicable employee status verification laws. Such affidavit must be provided prior to the notice to proceed for the subcontractor to perform the work."
 - (3) The State will not consider a proposal for award, nor will it make any award where there has not been compliance with this Section.

- (4) Manually or electronically signing the Proposal is deemed the Contractor's certification of compliance with all provisions of this employment status verification certification required by all applicable status verification laws including UCA Section 63G-12-302.
- 2. Indemnity Clause for Status Verification System
 - (1) Contractor (includes, but is not limited to any Contractor, Design Professional, Designer or Consultant) shall protect, indemnify and hold harmless, the State and its officers, employees, agents, representatives and anyone that the State may be liable for, against any claim, damages or liability arising out of or resulting from negligent act, wrongful act, error or omission of the Contractor for violations of the above Status Verification System Section whether violated by employees, agents, or contractors of the following: (a) Contractor; (b) Subcontractor at any tier; and/or (c) any entity or person for whom the Contractor or Subcontractor may be liable.
 - (2) Notwithstanding Section 1. above, Design Professionals or Designers under direct contract with the State shall only be required to indemnify the State for a liability claim that arises out of the design professional's services, unless the liability claim arises from the Design Professional's negligent act, wrongful act, error or omission, or other liability imposed by law except that the design professional shall be required to indemnify the State in regard to subcontractors or subconsultants at any tier that are under the direct or indirect control or responsibility of the Design Professional, and includes all independent contractors, agents, employees or anyone else for whom the Design Professional may be liable at any tier.
- 6. CONFLICT OF INTEREST: Contractor represents that none of its officers or employees are officers or employees of the State of Utah, unless disclosure has been made in accordance with 67-16-8, Utah Code Annotated, 1953, as amended.
- 7. CONFLICT OF INTEREST WITH STATE EMPLOYEES: In addition to the provisions of State of Utah Terms and Conditions # 6, Conflict of Interest, the Contractor certifies that no person in the State's employment, directly or through subcontract, will receive any private financial interest, direct or indirect, in the contract. The Contractor will not hire or subcontract with any person having such conflicting interest.
- 8. CONTRACTOR ACCESS TO SECURE STATE FACILITIES / CRIMINAL CONVICTION INFORMATION / FORMER FELONS: The Contractor shall provide (at its own expense) the State with sufficient personal information about its agents or employees, and the agents and employees of its subcontractors (if any) who will enter upon secure premises controlled, held, leased, or occupied by the State during the course of performing this contract so as to facilitate a criminal record check, at State expense. "Sufficient personal information" about its agents or employees, and the agents and employees of its subcontractors (if any) means for the Contractor to provide to the State Project Manager, in advance of any on-site work, a list of the full names of the designated employees, including their social security number, driver license number and the state of issuance, and their birth date. Thereafter, on their first site visit, each contractor employee expected to work on-site shall be fingerprinted by the State, and the State is authorized to conduct a federal criminal background check based upon those fingerprints and personal information provided. Contractor, in executing any duty or exercising any right under this contract, shall not cause or permit any of its agents or employees, and the agents and employees of its subcontractors (if any) who have been convicted of a felony and misdemeanors other than minor misdemeanors to enter upon any premises controlled, held, leased, or occupied by the State. A felony and misdemeanor are defined by the jurisdiction of the State of Utah, regardless of where the conviction occurred.
- DRUG-FREE WORKPLACE: The Contractor agrees to abide by the Department of Technology Services (DTS) drug-free workplace policies while on State of Utah premises. DTS will provide the Contractor with a copy of these written "drug-free workplace policies" upon request.
- 10. CODE OF CONDUCT: When Contractor employees are working on-site, the Contractor agrees to follow and enforce DTS Policy 2000-001 Code of Conduct. If Contractor is working at facilities controlled by other State agencies, Contractor agrees to follow and enforce the Code of

Conduct Policy of these other State agencies when Contractor is providing services at these facilities under provisions of this contract. The Contractor will assure that each employee or volunteer under Contractor's supervision receives a copy of such Code of Conduct, and a signed statement to this effect must be in each Contractor or Subcontractor employee's/volunteer's file and is subject to inspection and review by the State's monitors. Upon request, DTS agrees to provide Contractor with a copy of any applicable codes of conduct. If a Contractor or Subcontractor is working at any State agency which has a Code of Conduct applicable to this Contract, the DTS Project Manager will provide the Contractor with a copy in advance of the Contractor's on-site contract services performance. Contractor reserves the right to review and adjust price or schedule if impacted by compliance with any state agencies code of conduct other than the Department of Technology Services Code of Conduct incorporated into this Contract.

Response:

HP respectfully requests the changes to this provision which are in redline above. HP agrees to comply with the Department of Technology Services Code of Conduct, including on behalf of its onsite employees assigned to perform Contractor's obligations under the contract. HP must reserve the right to review and agree to any additionally imposed code of conduct requirements imposed by other state agencies, and the ability to adjust price or schedule if compliance imposes additional obligations on HP. HP has a Standards of Business Conduct which each employee of HP reviews and confirms compliance every year. To the extent there are State of Utah statutory laws that HP employees much abide by, HP will review and confirm whether or not employees working on any specific project can comply.

11. INDEMNITY CLAUSE: The Contractor agrees to defend or settle, indemnify, save harmless, and release the State of Utah, and all its officers, agents, volunteers, and employees from and against any and all third party claims for loss, damages, injury, liability, suits, and proceedings arising out of the performance of this contract which are caused in whole or in part by the acts or negligence or willful misconduct of the Contractor's officers, agents, volunteers, or employees, but not for claims arising from the State's sole negligence. The parties agree that if there are any Limitations of the Contractor's Liability, including a limitation of liability for anyone for whom the Contractor is responsible, such Limitations of Liability will not apply to bodily injuries to persons, including death, or to damages to property. This indemnity only applies if Contractor has sole control of the defense or settlement; the State promptly notifies Contractor of the claim and cooperates with Contractor in the defense of the claim. In connection with this indemnity, Contractor will pay defense costs, settlement amounts, and court awarded damages.

Response:

HP respectfully requests the above modification limiting general indemnity to third party claims.

- 12. EMPLOYMENT PRACTICES CLAUSE: The Contractor agrees to abide by the provisions of Title VI and VII of the Civil Rights Act of 1964 (42USC 2000e) which prohibits discrimination against any employee or applicant for employment or any applicant or recipient of services, on the basis of race, religion, color, or national origin; and further agrees to abide by Executive Order No. 11246, as amended, which prohibits discrimination on the basis of sex; 45 CFR 90 which prohibits discrimination on the basis of age; and Section 504 of the Rehabilitation Act of 1973, or the Americans with Disabilities Act of 1990 which prohibits discrimination on the basis of disabilities. Also, the Contractor agrees to abide by Utah's Executive Order, dated March 17, 1993, which prohibits sexual harassment in the work place.
- 13. TERMINATION: Unless otherwise stated in the Special Terms and Conditions, this contract may be terminated, with cause by either party, in advance of the specified termination date, upon written notice being given by the other party. The party in violation will be given twenty ten (20 10) working days after notification to correct and cease the violations, after which the contract may be terminated for cause. This contract may be terminated without cause, in advance of the specified expiration date, by either party, upon sixty (60) days prior written notice being given the other party. On termination of this contract, all accounts and payments will be processed according to the financial arrangements set forth herein for approved services rendered to date of termination.

In the event of such termination, and professional services apply to the contract; the Contractor shall be compensated for services properly performed under this Contract up to the effective date of the notice of termination. The Contractor agrees that in the event of such termination for cause or without cause, Contractor's sole remedy and monetary recovery from the State is limited to full payment for all work properly performed as authorized under this Contract up to the date of termination as well as any reasonable monies owed as a result of the Contractor having to terminate contracts necessarily and appropriately entered into by the Contractor pursuant to this Contract. Contractor further acknowledges that in the event of such termination, all work product, which includes but is not limited to all manuals, forms, contracts, schedules, reports, and any and all documents produced by Contractor under this Contract up to the date of termination are the property of the State and shall be promptly delivered to the State.

Response:

HP respectfully requests the change to this provision which is in redline above.

- 14. SUSPENSION OF WORK: Should circumstances arise which would cause the State to suspend the work, but not terminate the contract, this will be done by formal notice. The work may be reinstated upon advance formal notice from the State.
- 15. NONAPPROPRIATION OF FUNDS: The Contractor acknowledges that the State cannot contract for the payment of funds not yet appropriated by the Utah State Legislature. If funding to the State is reduced due to an order by the Legislature or the Governor, or is required by State law, or if federal funding (when applicable) is not provided, the State may terminate this contract or proportionately reduce the services and purchase obligations and the amount due from the State upon 30 days written notice. In the case that funds are not appropriated or are reduced, the State will reimburse Contractor for products delivered or services performed through the date of cancellation or reduction, and the State will not be liable for any future commitments, penalties, or liquidated damages.
- 16. SALES TAX EXEMPTION: The State of Utah's sales and use tax exemption number is 11736850-010-STC, located at http://purchasing.utah.gov/contract/documents/salestaxexemptionformsigned.pdf. The tangible personal property or services being purchased are being paid from State funds and used in the exercise of that entity's essential functions. If the items being purchased are construction materials, they will be converted into real property by employees of this government entity, unless otherwise stated in the contract.

17. SECURE PROTECTION AND HANDLING OF DATA:

- 1. Network Security: Contractor agrees at all times to maintain network security that at a minimum includes: network firewall provisioning, intrusion detection, and regular third party penetration testing. Likewise Contractor agrees to maintain network security that conforms to one of the following:
 - a. Those standards the State of Utah applies to its own network, found at http://www.dts.utah.gov;
 - b. Current standards set forth and maintained by the National Institute of Standards and Technology, includes those at: http://web.nvd.nist.gov/view/ncp/repository/; or
 - c. Any generally recognized comparable standard that Contractor then applies to its own network and approved by DTS in writing.
- Data security: Contractor agrees to protect and maintain the security of the State of Utah data with protection that is at least as good as or better than that maintained by the State of Utah. These security measures included but are not limited to maintaining secure environments that are patched and up to date with all appropriate security updates as designated, (ex. Microsoft Notification).
- 3. Data Transmission: Contractor agrees that any and all transmission or exchange of system application data with the State of Utah and/or any other parties expressly designated by the State of Utah, shall take place via secure means, (ex. HTTPS or FTPS).

- 4. Data Storage: Contractor agrees that any and all State of Utah data will be stored, processed, and maintained solely on designated target servers approved of by DTS and that no State of Utah data at any time will be processed on or transferred to any portable or laptop computing device or any portable storage medium, unless such medium is part of the Contractor's designated backup and recovery process.
- 5. Data Encryption: Contractor agrees to store all State of Utah backup data as part of its designated backup and recovery process in encrypted form, using no less than 128 bit key.
- 6. Password Protection. Contractor agrees that any portable or laptop computer that has access to a State of Utah network, or stores any non-public State of Utah data is equipped with strong and secure password protection.
- 7. Data Re-Use: Contractor agrees that any and all data exchanged shall be used expressly and solely for the purpose enumerated in this Contract. Contractor further agrees that no State of Utah data of any kind shall be transmitted, exchanged or otherwise passed to other Contractors or interested parties except on a case-by-case basis as specifically agreed to in writing by DTS.
- 8. Data Destruction: The Contractor agrees that upon termination of this Agreement it shall erase, destroy, and render unreadable all State of Utah data from all non-state computer systems and backups, and certify in writing that these actions have been completed within 30 days of the termination of this Agreement or within 7 days of the request of DTS, whichever shall come first.
- 18. NOTIFICATION AND DATA BREACHES: Contractor agrees to comply with all applicable laws that require the notification of individuals in the event of unauthorized release of personally-identifiable information or other events requiring notification in accordance with DTS Policy 5000-1250-PR1 Computer Incident Reporting Procedure (copy available upon request). In the event of a data breach of any Contractor's security obligations or other event requiring notification under applicable law (Utah Code Annotated § 13-44-101 thru 301 et al), Contractor agrees at its own expense to assume responsibility for informing all such individuals in accordance with applicable laws and to indemnify, hold harmless and defend the State of Utah against any claims, damages, or other harm related to such Notification Event.

The Utah DTS Customer Service representative stated that DTS 5000-1250-PRI was for use by State employees only but if HP wanted the document it should use the GRAMA process. HP is requesting the DTS 5000-1250-PRI policy using the GRAMA process. In the meantime, HP complies with all applicable laws with regard to Data Breach and Breach Notification. Upon receipt from the State, HP will review DTS 5000-1250PRI and upon contract award, HP will negotiate in good faith with the State any necessary changes.

19. CHANGE MANAGEMENT: Contractor agrees to comply with DTS Change Management Policy 4000-0004. This DTS policy requires that any work performed by the Contractor that has the potential to cause any form of outage, or modify the State's infrastructure architecture must first be reviewed by the DTS Change Management Committee, and coordinated accordingly. The DTS Project Manager will inform the Contractor if this change control requirement is applicable. Following this notification, any failure by the Contractor that causes outages or data security breaches caused by the Contractor as a direct result of failure to comply, will result in the Contractor's liability for the damages, subject to the limitation of liability.

For reference purposes, the latest version of DTS Change Management Policy 4000-0004 is detailed at http://dts.utah.gov/policies/documents/4000-0004changemanagementpolicy.pdf.

Response:

HP respectfully requests the change to this provision which is in redline above.

HP attempted to obtain a copy of DTS 4000-0004. However, the Utah DTS Customer Service representative stated that DTS 4000-0004 was for use by State employees only but if HP wanted the document it should use the GRAMA process. HP is requesting the DTS 4000-0004 policy using

the GRAMA process. Upon receipt from the State, HP will review DTS 5000-1250PRI and upon contract award, HP will negotiate in good faith with the State any necessary changes.

20. PUBLIC INFORMATION: Contractor agrees that the contract, related Sales Orders, and Invoices will be public documents, and may be available for distribution. Contractor gives the State express permission to make copies of the contract, related Sales Orders, and Invoices in accordance with the State of Utah Government Records Access and Management Act (GRAMA). Except for sections identified in writing and expressly approved by the State Division of Purchasing, Contractor also agrees that the Contractor's response to the solicitation will be a public document, and copies may be given to the public under GRAMA laws. The permission to make copies as noted will take precedence over any statements of confidentiality, proprietary information, copyright information, or similar notation.

Response:

HP respectfully requests the changes to this provision which are in redline above. HP agrees to comply with the State's public record laws.

- 21. CREDITING STATE IN ADVERTISING / PUBLICITY: Any publicity given to the project or services provided herein shall identify the State of Utah's managing agency as the sponsoring agency and shall not be released without prior written approval by that State agency's Project Manager.
- 22. STATE AGENCY WEB SITE BRANDING: The Contractor agrees to use the DTS logo, or a newer version if replaced in the future, on websites produced under terms of this contract. Contractor further agrees to allow a State agency to also utilize their own web site branding and logo, if requested by that State agency.
- 23. ORDERING AND INVOICING: All orders will be shipped promptly in accordance with the delivery schedule. The Contractor will promptly submit invoices (within 30 days of shipment or delivery of services) to the State. The State contract number and/or the agency purchase order number shall be listed on all invoices, freight tickets, and correspondence relating to the contract order. The prices paid by the State will be those prices listed in the contract. The State has the right to adjust or return any invoice reflecting incorrect pricing.

Response:

HP respectfully requests the above modification to allow for resolution of disputed invoices between the parties.

24. PROMPT PAYMENT DISCOUNT: Offeror may quote a prompt payment discount based upon early payment; however, discounts offered for less than 30 days will not be considered in making the award. Contractor shall list Payment Discount Terms on invoices. The prompt payment discount will apply to payments made with purchasing cards and checks. The date from which discount time is calculated will be the date a correct invoice is received or receipt of shipment, whichever is later; except that if testing is performed, the date will be the date of acceptance of the merchandise.

25. PAYMENT:

1. Payments are normally made within 30 days following the date the order is delivered or the date a correct of invoice is received, whichever is later. After 60 days from the date a correct invoice is received by the appropriate State official, If the State's payment is past due, the Contractor may assess interest on overdue, undisputed account charges up to a maximum of the interest rate paid by the IRS on taxpayer refund claims, plus two percent, computed similarly as the requirements of Utah Code Annotated Section 15-6-3. The IRS interest rate is adjusted quarterly, and is applied on a per annum basis, on the invoice amount that is overdue.

Response:

HP respectfully requests the above modifications on the basis of Utah's Prompt Payment Act allows for the payment term as specified in the contract to govern, and the application of interest payments to commence upon the date the payment is past-due.

- 2. The contract total may be changed only by written amendment executed by authorized personnel of the parties. Unless otherwise stated in the Contract, all payments to the Contractor will be remitted by mail, electronic funds transfer, or the State of Utah's purchasing card (major credit card). The State of Utah will not allow the Contractor to charge end users electronic payment fees of any kind.
- 3. The acceptance by the Contractor of final payment without a written protest filed with the State within twenty ten (20 10) working days of receipt of final payment shall release the State from all claims and all liability to the Contractor for fees and costs of the performance of the services pursuant to this Contract.

HP respectfully requests the change to this provision which is in redline above. HP understands this to be final payment under a contract and not on a per order basis.

4. Overpayment: The Contractor agrees that if during or subsequent to the contract performance, a CPA audit, or a State agency audit determines and Contractor agrees that payments were incorrectly reported or paid the State may adjust the payments. The Contractor shall, upon written request, immediately refund or credit to DTS any such overpayments. The Contractor further agrees that the State shall have the right to withhold any or all-subsequent payments under this or other contracts that the Contractor may have with the State until recoupment of overpayment is made.

Response:

HP respectfully requests the above modification to allow for Contractor assessment and agreement with overpayments.

5. Payment withholding: the Contractor agrees that the adequate reporting, record keeping, and compliance requirements specified in this contract are a material element of performance and that if the Contractor's record keeping practices, compliance, and/or reporting to DTS are not conducted in a timely and satisfactory manner, DTS may withhold part or all payments under this or any other contract until such deficiencies have been remedied. This includes, but is not limited to, Contractors failure to provide timely invoicing, and/or other requirements described elsewhere within this contract. In the event of the payment(s) being withheld, DTS agrees to provide ten (10) day advance Notice to the Contractor of the deficiencies that must be corrected in order to bring about the release of withheld payment. Contractor shall have ten (10) days thereafter to correct the cited reporting or record keeping practice deficiencies or the contract may be terminated.

Response:

HP respectfully requests the changes to this provision which are in redline above.

26. COPYRIGHT: The contractor agrees that any and all Deliverables prepared for the State of Utah as required by this contract, to the extent to which it is eligible under copyright law in any country, shall be deemed a work made for hire, such that all rights, title and interest in the work and Deliverables shall be exclusively owned by the State of Utah. State of Utah reserves a royalty-free, nonexclusive, and irrevocable license to reproduce, publish, or otherwise use and to authorize others to use for Federal or State Government purposes, such software, modifications and documentation. To the extent any Deliverable is deemed not to be, for any reason whatsoever, work made for hire, Contractor agrees to assign and hereby assigns all right title and interest, including but not limited to copyright patent, trademark and trade secret, to such Deliverables, and all extensions and renewals thereof, to the State of Utah. Contractor further agrees to provide all assistance reasonably requested by the State of Utah in the establishment, preservation, and enforcement of its rights in such Deliverables, without any additional compensation to Contractor. Contractor agrees to and hereby, to the extent permissible, waives all legal and equitable rights relating to the Deliverables, including without limitation any and all rights of identification of authorship and any and all rights of approval, restriction or limitation on use or subsequent modifications.

HP respectfully requests the replacement of Section 26, Copyright, in its entirety with the following:

No transfer of ownership of any intellectual property will occur under this Agreement. State of Utah grants Contractor a non-exclusive, worldwide, royalty-free right and license to any intellectual property that is necessary for Contractor and its designees to perform the ordered services. If deliverables are created by Contractor specifically for State of Utah and identified as such in Supporting Material (means any supporting material which the parties identify as incorporated either by attachment or reference), Contractor hereby grants State of Utah a worldwide, non-exclusive, fully paid, royalty-free license to reproduce and use copies of the deliverables internally.

27. OWNERSHIP, PROTECTION AND USE OF RECORDS: Except for confidential medical records held by direct care providers, the State shall own exclusive title to all information gathered, reports developed, and conclusions reached in performance of this Contract. The Contractor may not use, except in meeting its obligations under this contract, information gathered, reports developed, or conclusions reached in performance of this Contract without the express written consent of the State. The improper use or disclosure of any information concerning a State of Utah client, or a State of Utah employee for any purpose not directly connected with the administration of the State, or the Contractor's responsibilities with respect to services purchased under this agreement, is prohibited except on written consent of the state agency employee, state agency client, their attorney, or their responsible parent or guardian. The Contractor will be required to sign a Confidential Information Certification form in situations where they will be given access to confidential computerized records. The Contractor agrees to maintain the confidentiality of records it holds as agent for the State as required by Government Records Access and Management Act ("GRAMA"), or other applicable federal or state law. The State of Utah shall own and retain unlimited rights to use, disclose, or duplicate all information and data (copyrighted or otherwise) developed, derived, documented, stored, or furnished by the Contractor under the Contract. The Contractor, and any subcontractors under its control. expressly agrees not to use confidential client, or confidential federal, state, or local government data, without prior written permission from the State of Utah Project Manager and appropriate officials of the State Agency.

Response:

HP respectfully modifies and enhances this section 27 with the above redline and the following:

- 27. OWNERSHIP. PROTECTION AND USE OF RECORDS:
 - a. The parties acknowledge that the nature of the Services to be provided pursuant to these Terms is not intended to grant HP direct access to Customer's Personally Identifiable Information ("PII"). In the event HP has access to Customer PII (with the exception of business contact information of the Customer and its representatives) such access will likely be incidental. Customer shall remain the data controller of its PII at all times. To the extent HP has incidental access to Customer PII, HP agrees to treat Customer PII as Confidential Information and to use or disclose such data only: (a) in furtherance of or in connection with performing Professional Services pursuant to these Terms; (b) pursuant to a lawful subpoena, service of process, or otherwise required or permitted by law; (c) as directed or instructed by Customer; or (d) with the prior informed consent of the data subject about whom the PII pertains.
 - b. Notwithstanding the foregoing, if Customer requests HP to process Customer PII in a Statement of Work, then the parties will negotiate in good faith and set forth in any such Statement of Work the applicable terms, conditions, and requirements related to the appropriate handling of any such PII, including additional fees and costs to be payable to HP.
- 28. OWNERSHIP, PROTECTION, AND USE OF CONFIDENTIAL FEDERAL, STATE, OR LOCAL GOVERNMENT INTERNAL BUSINESS PROCESSES AND PROCEDURES: The improper use or disclosure by any party of protected internal Federal or State business processes, policies, procedures, or practices is prohibited. Confidential federal or state business processes, policies,

- procedures, or practices shall not be divulged by the Contractor, Contractor's employees, or their Subcontractors, unless prior written consent has been obtained in advance from the State of Utah Project Manager.
- 29. OWNERSHIP, PROTECTION, AND RETURN OF DOCUMENTS AND DATA UPON CONTRACT TERMINATION OR COMPLETION: All documents and data pertaining to work required by this contract will be that is determined to be the property of the State and must be delivered to the State within 30 working days after termination or completion of the contract, or destroyed by Contractor, regardless of the reason for contract termination, and without restriction or limitation to their future use. Any State data that may be returned under provisions of this clause must either be in the format as originally provided, or in a format that is readily usable by the State or that can be formatted in a way that it can be used. Costs for all of these described items will be considered as included in the basic contract compensation of the work described used by the State.

HP respectfully requests the changes to this provision which are in redline above.

30. CONFIDENTIALITY: Contractor, and anyone for whom the Contractor may be liable, must maintain the confidentiality of any non-public personal information. Personal information includes, but is not limited to, names, social security numbers, birth dates, address, credit card numbers and financial account numbers. The State reserves the right to identify additional reasonable types or categories of information that must be kept confidential by the Contractor and anyone for whom the Contractor may be liable. This duty of confidentiality shall be ongoing and survive the term of this contract.

Response:

HP respectfully replaces this provision with the provisions above as they relate to confidentiality.

31. TERMINATION UPON DEFAULT: In the event this contract is terminated as a result of a default by the Contractor, the State may procure or otherwise obtain, upon such terms and conditions as the State deems appropriate, services similar to those terminated that are in default, and Contractor shall be liable to the State for any and all damages arising there from, including, but not limited to, attorneys' fees and excess costs incurred by the State in obtaining similar services, to the extent that such excess costs do not exceed the limitation of liability in cases where indemnification liability does not apply and the State has first allowed the Contractor a reasonable opportunity to cure the default.

Response:

HP respectfully requests the changes to this provision which are in redline above.

- 32. PROCUREMENT ETHICS: The Contractor understands that a person who is interested in any way in the sale of any supplies, services, construction, or insurance to the State of Utah is violating the law if the person gives or offers to give any compensation, gratuity, contribution, loan or reward, or any promise thereof to any person acting as a procurement officer on behalf of the State, or who in any official capacity participates in the procurement of such supplies, services, construction, or insurance, whether it is given for their own use or for the use or benefit of any other person or organization (63G-6-1002, Utah Code Annotated, 1953, as amended).
- 33. WORKERS' COMPENSATION: The Contractor shall furnish proof to the State, upon request and maintain during the life of this contract, workers' compensation insurance for all its employees as well as any subcontractor employees related to this contract.
- 34. LIABILITY INSURANCE: The Contractor agrees to provide and to maintain during the performance of the contract, at its sole expense, a policy of liability insurance. The limits of the policy shall be no less than \$1,000,000.00 for each occurrence and \$3-2,000,000.00 aggregate.

HP can agree to this provision with the single change to aggregate to reflect the other insurance provisions in the State of Utah RFP and WSCA NASPO contract.

It shall be the responsibility of the Contractor to require any of their Subcontractor(s) to secure the same insurance coverage as prescribed herein for the Contractor.

- 35. ENTIRE AGREEMENT: This Agreement, including all Attachments, and documents incorporated hereunder, and the related State Solicitation constitutes the entire agreement between the parties with respect to the subject matter, and supersedes any and all other prior and contemporaneous agreements and understandings between the parties, whether oral or written. The terms of this Agreement shall supersede any additional or conflicting terms or provisions that may be set forth or printed on the Contractor's work plans, cost estimate forms, receiving tickets, invoices, or any other related standard forms or documents of the Contractor that may subsequently be used to implement, record, or invoice services hereunder from time to time, even if such standard forms or documents have been signed or initialed by a representative of the State. The parties agree that the terms of this Agreement shall prevail in any dispute between the terms of this Agreement and the terms printed on any such standard forms or documents, and such standard forms or documents shall not be considered written amendments of this Agreement.
- 36. SURVIVORSHIP: This paragraph defines the specific contractual provisions that will remain in effect after the completion of or termination of this contract, for whatever reason: (a) State of Utah Standard IT Terms and Conditions # 2, Contract Jurisdiction, Choice of Law, and Venue; (b) State of Utah Standard IT Terms and Conditions # 17, Secure Protection and Handling of Data; (c) State of Utah Standard IT Terms and Conditions # 18, Notification and Data Breaches; (d) State of Utah Standard IT Terms and Conditions # 26, Copyright; (e) State of Utah Standard IT Terms and Conditions #27, Ownership, Protection, and Use of Records, including Residuals of such records; and (f) State of Utah Standard IT Terms and Conditions # 28, Ownership, Protection, and Use of Confidential Federal, State, or Local Government Internal Business Processes, including Residuals of such confidential business processes; (g) State of Utah Standard IT Terms and Conditions # 29, Ownership, Protection, and Return of Documents and Data Upon Contract Termination or Completion; and (h) State of Utah Standard IT Terms and Conditions # 30, Confidentiality.
- 37. WAIVER: The waiver by either party of any provision, term, covenant or condition of this Contract shall not be deemed to be a waiver of any other provision, term, covenant or condition of this Contract nor any subsequent breach of the same or any other provision, term, covenant or condition of this Contract.
 - If professional services are applicable to this solicitation/contract, the following terms and conditions apply:
- 38. TIME: The Contractor shall complete the scope of services work in a manner to achieve any milestones identified in the procurement documents related to this Contract and the attachments to this Contract. The full scope of services work shall be completed by any applicable deadline stated in the solicitation.
- 39. TIME IS OF THE ESSENCE: For all work and services under this Contract, time is of the essence and Contractor shall be liable for all damages to the State of Utah and anyone for whom the State of Utah may be liable, as a result of the failure to timely complete the scope of work required under this Contract.

Response:

In any agreement the introduction of this provision places an extremely heavy burden upon the vendor. When this term is applied without limitation within an MPA, the unqualified risk posed is too great to automatically accept without knowing more. HP proposes that this term be used, as appropriate, for extremely urgent or critical need performances and that it be included into the supporting SOW. Under these circumstances, HP would agree to this term.

- 40. CHANGES IN SCOPE: Any changes in the scope of the services to be performed under this Contract shall be in the form of a written amendment to this Contract, mutually agreed to and signed by duly authorized representatives of both parties, specifying any such changes, fee adjustments, any adjustment in time of performance, or any other significant factors arising from the changes in the scope of services.
- 41. PERFORMANCE EVALUATION: The State of Utah may conduct a performance evaluation of the Contractor's services, including specific personnel of the Contractor. References in the Contract to Contractor shall include Contractor, Contractor's subcontractors, or subconsultants at any tier, if any. Results of any evaluation will be made available to the Contractor.
- 42. WAIVERS: No waiver by the State or Contractor of any default shall constitute a waiver of the same default at a later time or of a different default.

43. INSURANCE:

- To protect against liability, loss and/or expense in connection with the performance of services described under this Contract, the Contractor shall obtain and maintain in force during the entire period of this Contract without interruption, at its own expense, insurance as listed below from insurance companies authorized to do business in the State of Utah and with an A.M. Best rating as approved by the State of Utah Division of Risk Management.
- 2. The following are minimum coverages that may be supplemented by additional requirements contained in the solicitation for this Contract or provided in an Attachment to this Contract; if no insurance limits are identified in the solicitation, insurance minimums will default to Section 34 44. Liability Insurance Requirements:
 - (1) Worker's Compensation Insurance and Employers' Liability Insurance. Worker's compensation insurance shall cover full liability under the worker's compensation laws of the jurisdiction in which the service is performed at the statutory limits required by said jurisdiction.
 - (2) Professional liability insurance in the amount as described in the solicitation for this Contract, if applicable.
 - (3) Any other insurance described in the solicitation for this Contract, if applicable.
- 3. Any type of insurance or any increase of limits of liability not described in this Contract which the Contractor requires for its own protection or on account of any statute, rule, or regulation shall be its own responsibility, and shall be provided at Contractor's own expense.
- 4. The carrying of insurance required by this Contract shall not be interpreted as relieving the Contractor of any other responsibility or liability under this Contract or any applicable law, statute, rule, regulation, or order.

Response:

HP respectfully corrects the referenced provision number.

44. STANDARD OF CARE: The services of Contractor and its subcontractors and subconsultants at any tier, if any, shall be performed in accordance with the standard of care exercised by licensed members of their respective professions having substantial experience providing similar services which similarities include the type, magnitude and complexity of the services that are the subject of this Contract. The Contractor shall be liable to the State of Utah for claims, liabilities, additional burdens, penalties, damages or third party claims (i.e. another Contractor's claim against the State of Utah), to the extent caused by wrongful acts, errors or omissions that do not meet this standard of care.

Response:

HP respectfully requests the following alternative language for this provision.

- Services are performed using generally recognized commercial practices and standards. Customer agrees to provide prompt notice of any such service concerns and HP will re-perform any service that fails to meet that standard.
- 45. STATE REVIEWS, LIMITATIONS: The right of the State to perform plan checks, plan reviews, other reviews and/or comment upon the services of the Contractor, as well as any approval by the State, shall not be construed as relieving the Contractor from its professional and legal responsibility for services required under this Contract. No review by the State or any entity/user, approval or acceptance, or payment for any of the services required under this Contract shall be construed to operate as a waiver by the State of any right under this Contract or of any cause of action arising out of the performance or nonperformance of this Contract, and the Contractor shall be and remain liable to the State in accordance with applicable law for all damages to the State caused by the negligent wrongful acts, errors and/or omissions of the Contractor or its subcontractors or subconsultants at any tier, if any.

HP respectfully requests the changes to this provision which are in redline above.

(Revised July 1, 2013)

HP Response to Attachment B—References

In order to pass the Administrative Requirements, the following must be received by due date and time associated with this RFP as listed in Bid Sync.

Vendor must provide a least three current account references for which your company provides similar Data Communications services for private, state and/or large local government clients (preferably government/public entities). Offerors are required to submit Attachment B - Reference Form, for business references. The business providing the reference must submit the Reference Form directly to the State of Utah, Division of Purchasing. It is the offeror's responsibility to ensure that completed forms are received by the State of Utah Division of Purchasing on or before the proposal submission deadline for inclusion in the evaluation process. Business references not received, or not complete, may adversely affect the offeror's score in the evaluation process. The Purchasing Division reserves the right to contact any or all business references for validation of information submitted.

Response:

The following HP customers have submitted Attachment B – Reference Form directly to the State of Utah:

- Alpine School District, Utah
- Jordan School District, Utah
- Thunderbird School of Global Management, Arizona
- The Evergreen State College, Washington
- Florida Department of Transportation, Florida
- Rio Rancho Public Schools, New Mexico

HP Response to Attachment C—Cost Schedule

HP has provided a completed Attachment C—Cost Schedule under separate cover as directed in the RFP.

HP Response to WSCA-NASPO Master Agreement Terms and Conditions

1. AGREEMENT ORDER OF PRECEDENCE:

The Master Agreement shall consist of the following documents:

- 1. A Participating Entity's Participating Addendum ("PA");
- 2. WSCA-NASPO Master Agreement Terms and Conditions;
- 3. The Statement of Work;
- 4. The Solicitation; and
- 5. Contractor's response to the Solicitation.

These documents shall be read to be consistent and complementary. Any conflict among these documents shall be resolved by giving priority to these documents in the order listed above. Contractor terms and conditions that apply to this Master Agreement are only those that are expressly accepted by the Lead State and must be in writing and attached to this Master Agreement as an Exhibit or Attachment. No other terms and conditions shall apply, including terms and conditions listed in the Contractor's response to the Solicitation, or terms listed or referenced on the Contractor's website, in the Contractor quotation/sales order or in similar documents subsequently provided by the Contractor.

- 2. AMENDMENTS The terms of this Master Agreement shall not be waived, altered, modified, supplemented or amended in any manner whatsoever without prior written approval of the WSCA-NASPO Contract Administrator.
- <u>3. ASSIGNMENT/SUBCONTRACT</u> Contractor shall not assign, sell, transfer, subcontract or sublet rights, or delegate responsibilities under this contract, in whole or in part, without the prior written approval of the WSCA-NASPO Contract Administrator.
- 4. CANCELLATION Unless otherwise stated in the special terms and conditions, any Master Agreement may be canceled by either party upon 60 days notice, in writing, prior to the effective date of the cancellation. Further, any Participating State may cancel its participation upon 30 days written notice, unless otherwise limited or stated in the special terms and conditions of this solicitation. Cancellation may be in whole or in part. Any cancellation under this provision shall not effect the rights and obligations attending orders outstanding at the time of cancellation, including any right of and Purchasing Entity to indemnification by the Contractor, rights of payment for goods/services delivered and accepted, and rights attending any warranty or default in performance in association with any order. Cancellation of the Master Agreement due to Contractor default may be immediate.

5. CONFIDENTIALITY, NON-DISCLOSURE AND INJUNCTIVE RELIEF

5.1 Confidentiality. Contractor acknowledges that it and its employees or agents may, in the course of providing the Product under this Master Agreement, be exposed to or acquire information that is confidential to Participating Entity or Participating Entity's clients. Any and all information of any form that is marked as confidential or would by its nature be deemed confidential obtained by Contractor or its employees or agents in the performance of this Master Agreement, including, but not necessarily limited to (a) any Participating Entity records, (b) personnel records, and (c) information concerning individuals, is confidential information of Participating Entity ("Confidential Information"). Any reports or other documents or items (including software) that result from the use of the Confidential Information by Contractor shall be treated in the same manner as the Confidential Information. Confidential Information does not include information that (a) is or becomes (other than by disclosure by Contractor) publicly known; (b) is furnished by Participating Entity to others without restrictions similar to those imposed by this Master Agreement; (c) is rightfully in Contractor's possession without the obligation of nondisclosure prior to the time of its disclosure under this Master Agreement; (d) is obtained from a source other than Participating Entity without the obligation of confidentiality, (e) is disclosed with the written consent of Participating Entity or: (f) is independently developed by employees, agents or subcontractors of Contractor who can be shown to have had no access to the Confidential Information.

- **5.2 Non-Disclosure.** Contractor shall hold Confidential Information in confidence, using at least the industry standard of confidentiality, and not to copy, reproduce, sell, assign, license, market, transfer or otherwise dispose of, give, or disclose Confidential Information to third parties or use Confidential Information for any purposes whatsoever other than the performance of this Master Agreement to Participating Entity hereunder, and to advise each of its employees and agents of their obligations to keep Confidential Information confidential. Contractor shall use commercially reasonable efforts to assist Participating Entity in identifying and preventing any unauthorized use or disclosure of any Confidential Information. Without limiting the generality of the foregoing, Contractor shall advise Participating Entity immediately if Contractor learns or has reason to believe that any person who has had access to Confidential Information has violated or intends to violate the terms of this Master Agreement and Contractor shall at its expense cooperate with Participating Entity in seeking injunctive or other equitable relief in the name of Participating Entity or Contractor against any such person. Except as directed by Participating Entity, Contractor will not at any time during or after the term of this Master Agreement disclose, directly or indirectly, any Confidential Information to any person, except in accordance with this Master Agreement, and that upon termination of this Master Agreement or at Participating Entity's request, Contractor shall turn over to Participating Entity all documents, papers, and other matter in Contractor's possession that embody Confidential Information. Notwithstanding the foregoing, Contractor may keep one copy of such Confidential Information necessary for quality assurance, audits and evidence of the performance of this Master Agreement.
- **5.3 Injunctive Relief.** Contractor acknowledges that breach of this Section, including disclosure of any Confidential Information, will cause irreparable injury to Participating Entity that is inadequately compensable in damages. Accordingly, Participating Entity may seek and obtain injunctive relief against the breach or threatened breach of the foregoing undertakings, in addition to any other legal remedies that may be available. Contractor acknowledges and agrees that the covenants contained herein are necessary for the protection of the legitimate business interests of Participating Entity and are reasonable in scope and content.
- <u>6. DEBARMENT</u> The contractor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction (contract) by any governmental department or agency. If the contractor cannot certify this statement, attach a written explanation for review by WSCA-NASPO.

7. DEFAULTS & REMEDIES

- a. The occurrence of any of the following events shall be an event of default under this Master Agreement:
 - i. Nonperformance of contractual requirements; or
 - ii. A material breach of any term or condition of this Master Agreement; or
 - iii. Any representation or warranty by Contractor in response to the solicitation or in this Master Agreement proves to be untrue or materially misleading; or
 - iv. Institution of proceedings under any bankruptcy, insolvency, reorganization or similar law, by or against Contractor, or the appointment of a receiver or similar officer for Contractor or any of its property, which is not vacated or fully stayed within thirty (30) calendar days after the institution or occurrence thereof; or
 - v. Any default specified in another section of this Master Agreement.
- b. Upon the occurrence of an event of default, Lead State shall issue a written notice of default, identifying the nature of the default, and providing a period of 15 calendar days in which Contractor shall have an opportunity to cure the default. The Lead State shall not be required to provide advance written notice or a cure period and may immediately terminate this Master Agreement in whole or in part if the Lead State, in its sole discretion, determines that it is reasonably necessary to preserve public safety or prevent immediate public crisis. Time allowed for cure shall not diminish or eliminate Contractor's liability for damages, including liquidated damages to the extent provided for under this Master Agreement.

- c. If Contractor is afforded an opportunity to cure and fails to cure the default within the period specified in the written notice of default, Contractor shall be in breach of its obligations under this Master Agreement and Lead State shall have the right to exercise any or all of the following remedies:
 - i. Exercise any remedy provided by law; and
 - ii. Terminate this Master Agreement and any related Contracts or portions thereof; and
 - iii. Impose liquidated damages as provided in this Master Agreement; and
 - iv. Suspend Contractor from receiving future bid solicitations; and
 - v. Suspend Contractor's performance; and
 - vi. Withhold payment until the default is remedied.
- d. In the event of a default under a Participating Addendum, a Participating Entity shall provide a written notice of default as described in this section and have all of the rights and remedies under this paragraph regarding its participation in the Master Agreement, in addition to those set forth in its Participating Addendum.
- 8. DELIVERY Unless otherwise indicated in the Master Agreement, the prices are the delivered price to any Participating State agency or political subdivision. All deliveries shall be F.O.B. destination with all transportation and handling charges paid by the contractor. Responsibility and liability for loss or damage shall remain the Contractor until final inspection and acceptance when responsibility shall pass to the Buyer except as to latent defects, fraud and Contractor's warranty obligations. The minimum shipment amount will be found in the special terms and conditions. Any order for less than the specified amount is to be shipped with the freight prepaid and added as a separate item on the invoice. Any portion of an order to be shipped without transportation charges that is back ordered shall be shipped without charge.

HP has read and acknowledges. HP respectfully requests the use of the provision below from the WSCA NASPO B271764 Laptop and peripherals contract to define "final inspection" and "acceptance" in this provision:

The Purchasing Entity will make every effort to notify the Contractor within thirty (30) calendar days following delivery non-acceptance of a Product or Service. In the event that the Contractor has not been notified within 30 calendar days from delivery of Product or completion of Service, the Product and Services will be deemed accepted on the 31st day after delivery of Product or completion of Services, except for Software which is not preloaded on equipment which is accepted upon delivery.

- **9. FORCE MAJEURE** Neither party to this Master Agreement shall be held responsible for delay or default caused by fire, riot, acts of God and/or war which is beyond that party's reasonable control. WSCA-NASPO may terminate this Master Agreement after determining such delay or default will reasonably prevent successful performance of the Master Agreement.
- 10.GOVERNING LAW This procurement and the resulting agreement shall be governed by and construed in accordance with the laws of the state sponsoring and administering the procurement. The construction and effect of any Participating Addendum or order against the Master Agreement(s) shall be governed by and construed in accordance with the laws of the Participating Entity's State. Venue for any claim, dispute or action concerning an order placed against the Master Agreement(s) or the effect of an Participating Addendum shall be in the Purchasing Entity's State.
- 11. INDEMNIFICATION The Contractor shall defend, indemnify and hold harmless WSCA-NASPO, the Lead State and Participating Entities along with their officers, agencies, and employees as well as any person or entity for which they may be liable from and against third party claims, damages or causes of action including reasonable attorneys' fees and related costs for any death, injury, or damage to property arising from negligent act(s), error(s), or omission(s) of the Contractor, its employees or subcontractors or volunteers, at any tier, relating to the performance under the Master Agreement. This section is net subject to any limitations of liability in this Master Agreement er and in any other document executed in conjunction with this Master Agreement.

HP respectfully requests the changes to this provision which are in redline above.

- 12. INDEMNIFICATION INTELLECTUAL PROPERTY The Contractor shall defend, indemnify and hold harmless WSCA-NASPO, the Lead State and Participating Entities along with their officers, agencies, and employees as well as any person or entity for which they may be liable ("Indemnified Party") from and against third party claims, damages or causes of action including reasonable attorneys' fees and related costs arising out of the claim that the HP Branded Product or its use, infringes Intellectual Property rights ("Intellectual Property Claim"). The Contractor's obligations under this section shall not extend to any combination of the Product with any other product, system or method, unless:
- (1) the Product, system or method is:
 - (a) provided by the Contractor or the Contractor's subsidiaries or affiliates;
 - (b) specified by the Contractor to work with the Product; or
 - (c) reasonably required, in order to use the Product in its intended manner, and the infringement could not have been avoided by substituting another reasonably available product, system or method capable of performing the same function; or
- (2) it would be reasonably expected to use the Product in combination with such product, system or method.

The Indemnified Party shall notify the Contractor within a reasonable time after receiving notice of an Intellectual Property Claim. Even if the Indemnified Party fails to provide reasonable notice, the Contractor shall not be relieved from its obligations unless the Contractor can demonstrate that it was prejudiced in defending the Intellectual Property Claim resulting in increased expenses or loss to the Contractor. If the Contractor promptly and reasonably investigates and defends any Intellectual Property Claim, it shall have control over the defense and settlement of it. However, the Indemnified Party must consent in writing for any money damages or obligations for which it may be responsible. The Indemnified Party shall furnish, at the Contractor's reasonable request and expense, information and assistance necessary for such defense. If the Contractor fails to vigorously pursue the defense or settlement of the Intellectual Property Claim, the Indemnified Party may assume the defense or settlement of it and the Contractor shall be liable for all costs and expenses, including reasonable attorneys' fees and related costs, incurred by the Indemnified Party in the pursuit of the Intellectual Property Claim. This section is not subject to any limitations of liability in this Master Agreement or in any other document executed in conjunction with this Master Agreement.

Response:

HP respectfully requests the changes to this provision which are in redline above.

- 13. INDEPENDENT CONTRACTOR The contractor shall be an independent contractor, and as such shall have no authorization, express or implied to bind WSCA-NASPO or the respective states to any agreements, settlements, liability or understanding whatsoever, and agrees not to perform any acts as agent for WSCA-NASPO or the states, except as expressly set forth herein.
- 14. INDIVIDUAL CUSTOMER Except to the extent modified by a Participating Addendum, each Participating Entity shall follow the terms and conditions of the Master Agreement and applicable Participating Addendum and will have the same rights and responsibilities for their purchases as the Lead State has in the Master Agreement, including but not limited to, any indemnity or to recover any costs allowed in the Master Agreement and applicable Participating Addendum for their purchases. Each Participating Entity will be responsible for its own charges, fees, and liabilities. The Contractor will apply the charges and invoice each Participating Entity individually.
- **15. INSURANCE** Contractor shall, during the term of this Master Agreement, maintain in full force and effect, the insurance described in this section. Contractor shall acquire such insurance from an insurance carrier or carriers licensed to conduct business in the Participating Entity's state and having a rating of A-, Class VII or better, in the most recently published edition of Best's Reports.

Failure to buy and maintain the required insurance may result in this Master Agreement's termination or at a Participating Entity's option, result in termination of its Participating Addendum.

Coverage shall be written on an occurrence basis. The minimum acceptable limits shall be as indicated below, with no deductible for each of the following categories:

- a) Commercial General Liability covering the risks of bodily injury (including death), property damage and personal injury, including coverage for contractual liability, with a limit of not less than \$1 million per occurrence/\$2 million general aggregate;
- b) Contractor must comply with any applicable State Workers Compensation or Employers Liability Insurance requirements.

Contractor shall pay premiums on all insurance policies. Such policies shall also reference this Master Agreement and shall have a condition that they not be revoked by the insurer until thirty (30) calendar days after notice of intended revocation thereof shall have been given to Participating Entity by the Contractor.

Prior to commencement of the work, Contractor shall provide to the Participating Entity a written endorsement to the Contractor's general liability insurance policy that (i) names the Participating Entity as an additional insured, (ii) provides that no material alteration, cancellation, non-renewal, or expiration of the coverage contained in such policy shall have effect unless the named Participating Entity has been given at least thirty (30) days prior written notice, and (iii) provides that the Contractor's liability insurance policy shall be primary, with any liability insurance of the Participating Entity as secondary and noncontributory.

Contractor shall furnish to Participating Entity copies of certificates of all required insurance within thirty (30) calendar days of the Participating Addendum's effective date and prior to performing any work. Copies of renewal certificates of all required insurance shall be furnished within thirty (30) days after renewal date. These certificates of insurance must expressly indicate compliance with each and every insurance requirement specified in this section. Failure to provide evidence of coverage may, at State's sole option, result in this Master Agreement's termination.

Coverage and limits shall not limit Contractor's liability and obligations under this Master Agreement.

Response:

HP respectfully requests the change to this provision which is in redline above. HP can agree to this insurance provision with the removal of the notice requirements. Since October 1, 2010, the Certificate of Insurance ACORD forms no longer included cancellation notice to the certificate holder.

16. LAWS AND REGULATIONS Any and all supplies, services and equipment offered and furnished shall comply fully with all applicable Federal and State laws and regulations.

<u>17. LICENSE OF PRE-EXISTING INTELLECTUAL</u> PROPERTY Contractor grants to the Participating Entity a nonexclusive, perpetual, royalty-free, irrevocable, unlimited license to publish, translate, reproduce, modify, deliver, perform, display, and dispose of the Intellectual Property, and its derivatives, used or delivered under this Master Agreement, but not created under it ("Pre-existing Intellectual Property"). The license shall be subject to any third party rights in the Pre-existing Intellectual Property. Contractor shall obtain, at its own expense, on behalf of the Participating Entity, written consent of the owner for the licensed Pre-existing Intellectual Property.

Response:

HP respectfully clarifies that all software licenses are subject to compliance with the license terms made available with the product and the provisions in Additional Definitions and Alternative Terms for Consideration section below.

18. NO WAIVER OF SOVEREIGN IMMUNITY In no event shall this Master Agreement, any Participating Addendum or any contract or any purchase order issued thereunder, or any act of a Lead State or a Participating Entity, be a waiver by the Participating Entity of any form of defense or immunity, whether sovereign immunity, governmental immunity, immunity based on the Eleventh

Amendment to the Constitution of the United States or otherwise, from any claim or from the jurisdiction of any court.

If a claim must be brought in a federal forum, then it must be brought and adjudicated solely and exclusively within the United States District Court for the Participating State. This section applies to a claim brought against the Participating State only to the extent Congress has appropriately abrogated the Participating State's sovereign immunity and is not consent by the Participating State to be sued in federal court. This section is also not a waiver by the Participating State of any form of immunity, including but not limited to sovereign immunity and immunity based on the Eleventh Amendment to the Constitution of the United States.

- **19. ORDER NUMBERS** Master Agreement order and purchase order numbers shall be clearly shown on all acknowledgments, shipping labels, packing slips, invoices, and on all correspondence.
- **20. PARTICIPANTS** WSCA-NASPO is the cooperative purchasing arm of the National Association of State Procurement Officials. It is a cooperative group contracting consortium for state government departments, institutions, agencies and political subdivisions (e.g., colleges, school districts, counties, cities, etc.,) for all 50 states, the District of Columbia and the organized US territories. Obligations under this Master Agreement are limited to those Participating States who have signed a Participating Addendum where contemplated by the solicitation. Financial obligations of Participating States are limited to the orders placed by the departments or other state agencies and institutions having available funds. Participating States incur no financial obligations on behalf of political subdivisions. Unless otherwise specified in the solicitation, the resulting award(s) will be permissive.
- **21. ENTITY PARTICIPATION** Use of specific WSCA-NASPO cooperative Master Agreements by state agencies, political subdivisions and other entities (including cooperatives) authorized by individual state's statutes to use state contracts are subject to the approval of the respective State Chief Procurement Official. Issues of interpretation and eligibility for participation are solely within the authority of the respective State Chief Procurement Official.
- **22.PAYMENT** Payment for completion of a contract order is normally made within 30 days following the date the entire order is delivered or the date a correct invoice is received, whichever is later. After 30 45 days the Contractor may assess overdue account charges up to a maximum rate of one percent per month on the outstanding balance. Payments will be remitted by mail. Payments may be made via a State or political subdivision "Purchasing Card" with no any additional charge as agreed to between the parties.

Response:

HP respectfully requests the above modifications on the basis of Utah's Prompt Payment Act which allows for the payment term as specified in the contract to govern, and the application of interest payments to commence upon the date the payment is past-due.

- **23. PUBLIC INFORMATION** This Master Agreement and all related documents are subject to disclosure pursuant to the Participating Entity's public information laws.
- **24. RECORDS ADMINISTRATION AND AUDIT** The contractor will maintain, or supervise the maintenance of all records necessary to properly account for the payments made to the contractor for costs authorized by this Master Agreement. These records will be retained by the contractor for at least four years after the Master Agreement terminates, or until all audits initiated within the four years have been completed, whichever is later. The contractor agrees to allow WSCA-NASPO, State and Federal auditors, and state agency staff access to all the records of this Master Agreement and any order placed under this Master Agreement, for audit and inspection, and monitoring of services. Such access will be during normal business hours, or by appointment.
- **25.REPORTS** and ADMINISTRATIVE FEES The contractor shall submit quarterly reports to the WSCA-NASPO Contract Administrator showing the quantities and dollar volume of purchases by each participating entity.

The contractor must pay a WSCA-NASPO administrative fee of one quarter of one percent (.25%) in accordance with the terms and conditions of the Master Agreement. The WSCA-NASPO administrative fee shall be submitted quarterly and is based on sales of products and services. The

WSCA-NASPO administration fee is not negotiable. This fee is to be included as part of the pricing submitted with proposal.

Additionally, some States may require that an additional fee be paid directly to the State on purchases made by procuring entities within that State. For all such requests, the fee level, payment method and schedule for such reports and payments will be incorporated in a Participating Addendum that is made a part of the Master Agreement. The contractor may adjust the Master Agreement pricing accordingly for purchases made by procuring agencies within the jurisdiction of the State. All such agreements may not affect the WSCA-NASPO administrative fee or the prices paid by the procuring agencies outside the jurisdiction of the State requesting the additional fee.

26. STANDARD OF PERFORMANCE AND ACCEPTANCE The Standard of Performance applies to all Product(s) purchased under this Master Agreement, including any additional, replacement, or substitute Product(s) and any Product(s) which are modified by or with the written approval of Contractor after Acceptance by the Participating Entity. The Acceptance Testing period shall be in accordance with the Manufacturer's published specifications thirty (30) calendar days or other time period identified in the selicitation or the Participating Addendum, starting from the day after the Product is installed and Contractor certifies that the Product is ready for Acceptance Testing. If the Product does not meet the Manufacturer's published specifications Standard of Performance during the initial period of Acceptance Testing, Participating Entity may, at its discretion, continue Acceptance Testing on a day-to-day basis until the Manufacturer's published specifications Standard of Performance is met. Upon rejection, the Contractor will have fifteen (15) twenty business calendar days to cure the Standard of Performance issue(s). If after the cure period, the Product still has not met the Manufacturer's published specifications Standard of Performance Participating Entity may, at its option: (1) declare Contractor to be in breach and terminate the Order; (2) demand replacement Product from Contractor at no additional cost to Participating Entity; or, (3) continue the cure period for an additional time period agreed upon by the Participating Entity and the Contractor. Contractor shall pay all costs related to the preparation and shipping of Product returned pursuant to the section. No Product shall be accepted and no charges shall be paid until the Standard of Performance is met. The warranty period will begin upon Acceptance, but in no event later than the 31st day from the date of installation unless the product does not conform to the Manufacturer's published specifications.

Response:

HP respectfully requests the changes to this provision which are in redline above.

HP respectfully requests the use of the provision below from the WSCA NASPO B271764 Laptop and peripherals contract to define final inspection and acceptance:

The Purchasing Entity will make every effort to notify the Contractor within thirty (30) calendar days following delivery non-acceptance of a Product or Service. In the event that the Contractor has not been notified within 30 calendar days from delivery of Product or completion of Service, the Product and Services will be deemed accepted on the 31st day after delivery of Product or completion of Services, except for Software which is not preloaded on equipment which is accepted upon delivery.

27. SYSTEM FAILURE OR DAMAGE In the event of system failure or damage caused by the Contractor or its Product, the Contractor agrees to use its best commercially reasonable efforts to restore or assist in restoring the system to operational capacity.

Response:

HP respectfully requests the change to this provision which is in redline above.

28. TITLE OF PRODUCT Upon Acceptance by the Participating Entity, Contractor shall convey to Participating Entity title to the Product free and clear of all liens, encumbrances, or other security interests. Transfer of title to the Product shall include an irrevocable and perpetual license to use the Embedded Software in the Product. If Participating Entity subsequently transfers title of the Product to another entity, Participating Entity shall have the right to transfer the license to use the Embedded Software with the transfer of Product title. A subsequent transfer of this software license

shall be at no additional cost or charge to either Participating Entity or Participating Entity's transferee.

Response:

HP respectfully clarifies that all software licenses are subject to compliance with the license terms made available with the product.

29. WAIVER OF BREACH Failure of Lead State or Participating Entity to declare a default or enforce any rights and remedies shall not operate as a waiver under this Master Agreement or Participating Addendum. Any waiver by the Lead State or Participating Entity must be in writing. Waiver by the Lead State or Participating Entity of any default, right or remedy under this Master Agreement or Participating Addendum, or breach of any terms or requirements shall not be construed or operate as a waiver of any subsequent default or breach of such term or requirement, or of any other term or requirement under this Master Agreement or Participating Addendum.

30. WARRANTY

The Contractor warrants for a period of one year from the date of Acceptance that: (a) the Product performs according to all specific claims that the Contractor made in its response to the solicitation, (b) the Product is suitable for the ordinary purposes for which such Product is used, (c) the Product is suitable for any special purposes identified in the solicitation or for which the Participating Entity has relied on the Contractor's skill or judgment, (d) the Product is designed and manufactured in a commercially reasonable manner, and (e) the Product is free of defects. Upon breach of the warranty, the Contractor will repair or replace (at no charge to the Participating Entity) the Product whose nonconformance is discovered and made known to the Contractor. If the repaired and/or replaced Product proves to be inadequate, or fails of its essential purpose, the Contractor will refund the full amount of any payments that have been made. The rights and remedies of the parties under this warranty are in addition to any other rights and remedies of the parties provided by law or equity, including, without limitation, actual damages, and, as applicable and awarded under the law, to a prevailing party, reasonable attorneys' fees and costs.

Response:

HP respectfully provides the following alternative language for the State's consideration.

All HP-branded hardware products are covered by HP's limited warranty statements that are provided with the products or otherwise made available. Hardware warranties begin on the date of delivery or if applicable, upon completion of HP installation, or (where Customer delays HP installation) at the latest 30 days from the date of delivery. Non-HP branded products receive warranty coverage as provided by the relevant third party supplier.

HP warrants that its branded software products will conform materially to their specifications and be free of malware at the time of delivery. HP warranties for software products will begin on the date of delivery and unless otherwise specified in Supporting Material, will last for ninety (90) days. HP does not warrant that the operation of software products will be uninterrupted or error-free or that software products will operate in hardware and software combinations other than as authorized by HP in Supporting Material.

31. ASSIGNMENT OF ANTITRUST RIGHTS To the extent an assignment is necessary for the State to defend itself on indirect purchaser actions under federal anti-trust laws, Contractor irrevocably assigns to a Participating Entity any claim for relief or cause of action which the Contractor now has or which may accrue to the Contractor in the future by reason of any violation of state or federal antitrust laws (15 U.S.C. § 1-15 or a Participating Entity's state antitrust provisions), as now in effect and as may be amended from time to time, in connection with any goods or services provided to the Contractor for the purpose of carrying out the Contractor's obligations under this Master Agreement or Participating Addendum, including, at a Participating Entity's option, the right to control any such litigation on such claim for relief or cause of action.

Contractor shall require any subcontractors hired to perform any of Contractor's obligations, under this Master Agreement or Participating Addendum, to irrevocably assign to a Participating Entity, as third party beneficiary, any right, title or interest that has accrued or which may accrue in the future by reason of any violation of state or federal antitrust laws (15 U.S.C. § 1-15 or a Participating

Entity's state antitrust provisions), as now in effect and as may be amended from time to time, in connection with any goods or services provided to the subcontractor for the purpose of carrying out the subcontractor's obligations to the Contractor in pursuance of this Master Agreement or Participating Addendum, including, at a Participating Entity's option, the right to control any such litigation on such claim for relief or cause of action.

Response:

HP respectfully requests the change to this provision which is in redline above.

32. WSCA-NASPO eMARKET CENTER Awarded responders are required to participate in the WSCA-NASPO eMarket Center and, working through WSCA-NASPO's contractor (SciQuest), connect with the eMarket Center. The ideal situation would be to use either a hosted (by SciQuest) or Punchout Level 2 catalog configurations, but actual requirements will be determined by the Lead State Contract Administrator, WSCA-NASPO, WSCA-NASPO's contractor (SciQuest) and the awarded contractor, after award. Participation does not require an awarded responder to have any special level of technology or technological understanding.

Definitions

Acceptance - means a written notice from a purchasing entity to contractor advising Contractor that the Product has passed its Acceptance Testing. Acceptance of a product for which acceptance testing is not required shall occur following the completion of delivery, installation, if required, and a reasonable time for inspection of the product, unless the Purchasing Entity provides a written notice of rejection to contractor.

Response:

HP respectfully requests the change to this provision which is in redline above.

Acceptance Testing - means the process for ascertaining that the Product meets the standards set forth in the section titled Standard of Performance and Acceptance, prior to Acceptance by the Purchasing Entity.

Contractor - means the person or entity delivering Products or performing services under the terms and conditions set forth in this Master Agreement.

Intellectual Property – means any and all patents, copyrights, service marks, trademarks, trade secrets, trade names, patentable inventions, or other similar proprietary rights, in tangible or intangible form, and all rights, title, and interest therein.

Lead State - means the State conducting this cooperative solicitation and centrally administering any resulting Master Agreement with the permission of the Signatory States.

Master Agreement – means the underlying agreement executed by and between the Lead State, as WSCA-NASPO contract administrator, acting on behalf of WSCA-NASPO, and the Contractor, as now or hereafter amended.

Order - means any purchase order, sales order, or other document used by a Participating Entity to order the Products, including any supporting material which the parties identify as incorporated either by attachment or reference ("**Supporting Material**").

Response:

HP respectfully requests the change to this provision which is in redline above.

Participating Addendum - means a bilateral agreement executed by a Contractor and a Participating Entity incorporating this Master Agreement and any other additional Participating Entity specific language or other requirements ,e.g. ordering procedures specific to the Participating Entity, other terms and conditions.

Participating Entity - means a state, or other legal entity, properly authorized by a state to enter into the Master Agreement or Participating Addendum or who is authorized to order under the Master Agreement or Participating Addendum.

Product - Any equipment, software (including embedded software), documentation, or deliverable supplied or created by the Contractor pursuant to this Master Agreement.

WSCA-NASPO -is a cooperative group contracting consortium for state procurement officials, representing departments, institutions, agencies, and political subdivisions (i.e., colleges, school districts, counties, cities, etc.) for all states and the District of Columbia. WSCA-NASPO is a cooperative purchasing arm of the National Association of State Procurement Officials (NASPO).

Additional Definitions and Alternative Terms for Consideration

Below are additional definitions and alternative terms for consideration by the sourcing teams depending upon the nature of the solicitation and negotiations between the Contractor and Vendor.

Embedded Software - means one or more software applications which permanently reside on a computing device.

Machine Code – means microcode, basic input/output system code, utility programs, device drivers, diagnostics, and another code delivered with a computing device for the purpose of enabling the function of the computing device, as stated in its published specifications.

Installation. If HP is providing installation with the product purchase, HP's site guidelines (available upon request) will describe Customer requirements. HP will conduct its standard installation and test procedures to confirm completion.

Support Services. HP's support services will be described in the applicable Supporting Material, which will cover the description of HP's offering, eligibility requirements, service limitations and Customer responsibilities, as well as the Customer systems supported.

Eligibility. HP's service, support and warranty commitments do not cover claims resulting from:

- 1. improper use, site preparation, or site or environmental conditions or other non-compliance with applicable Supporting Material;
- 2. Modifications or improper system maintenance or calibration not performed by HP or authorized by HP;
- failure or functional limitations of any non-HP software or product impacting systems receiving HP support or service;
- 4. malware (e.g. virus, worm, etc.) not introduced by HP; or
- 5. abuse, negligence, accident, fire or water damage, electrical disturbances, transportation by Customer, or other causes beyond HP's control.

Professional Services. HP will deliver any ordered IT consulting, training or other services as described in the applicable Supporting Material.

Professional Services Acceptance. The acceptance process (if any) will be described in the applicable Supporting Material, will apply only to the deliverables specified, and shall not apply to other products or services to be provided by HP.

Product Performance. All HP-branded hardware products are covered by HP's limited warranty statements that are provided with the products or otherwise made available. Hardware warranties begin on the date of delivery or if applicable, upon completion of HP installation, or (where Customer delays HP installation) at the latest 30 days from the date of delivery. Non-HP branded products receive warranty coverage as provided by the relevant third party supplier.

Software Performance. HP warrants that its branded software products will conform materially to their specifications and be free of malware at the time of delivery. HP warranties for software products will begin on the date of delivery and unless otherwise specified in Supporting Material, will last for ninety (90) days. HP does not warrant that the operation of software products will be uninterrupted or error-free or that software products will operate in hardware and software combinations other than as authorized by HP in Supporting Material.

Services Performance. Services are performed using generally recognized commercial practices and standards. Customer agrees to provide prompt notice of any such service concerns and HP will re-perform any service that fails to meet this standard.

Services with Deliverables. If Supporting Material for services define specific deliverables, HP warrants those deliverables will conform materially to their written specifications for 30 days following delivery. If Customer notifies HP of such a non-conformity during the 30 day period, HP will promptly remedy the impacted deliverables or refund to Customer the fees paid for those deliverables and Customer will return those deliverables to HP.

Product Warranty Claims. When we receive a valid warranty claim for an HP hardware or software product, HP will either repair the relevant defect or replace the product. If HP is unable to complete the repair or replace the product within a reasonable time, Customer will be entitled to a full refund upon the prompt return of the product to HP (if hardware) or upon written confirmation by Customer that the relevant software product has been destroyed or permanently disabled. HP will pay for shipment of repaired or replaced products to Customer and Customer will be responsible for return shipment of the product to HP.

Remedies. This Agreement states all remedies for warranty claims. To the extent permitted by law, HP disclaims all other warranties.

License Grant. HP grants Customer a non-exclusive license to use the version or release of the HP-branded software listed in the Order. Permitted use is for internal purposes only (and not for further commercialization), and is subject to any specific software licensing information that is in the software product or its Supporting Material. For non-HP branded software, the third party's license terms will govern its use.

Updates. Customer may order new software versions, releases or maintenance updates ("**Updates**"), if available, separately or through an HP software support agreement. Additional licenses or fees may apply for these Updates or for the use of the software in an upgraded environment. Updates are subject to the license terms in effect at the time that HP makes them available to Customer.

License Restrictions. HP may monitor use/license restrictions remotely and, if HP makes a license management program available, Customer agrees to install and use it within a reasonable period of time. Customer may make a copy or adaptation of a licensed software product only for archival purposes or when it is an essential step in the authorized use of the software. Customer may use this archival copy without paying an additional license only when the primary system is inoperable. Customer may not copy licensed software onto or otherwise use or make it available on any public external distributed network. Licenses that allow use over Customer's intranet require restricted access by authorized users only. Customer will also not modify, reverse engineer, disassemble decrypt, decompile or make derivative works of any software licensed to Customer under this Agreement unless permitted by statute, in which case Customer will provide HP with reasonably detailed information about those activities.

License Term and Termination. Unless otherwise specified, any license granted is perpetual, provided however that if Customer fails to comply with the terms of this Agreement, HP may terminate the license upon written notice. Immediately upon termination, or in the case of a limited-term license, upon expiration, Customer will either destroy all copies of the software or return them to HP, except that Customer may retain one copy for archival purposes only.

License Transfer. Customer may not sublicense, assign, transfer, rent or lease the software or software license except as permitted by HP. HP-branded software licenses are generally transferable subject to HP's prior written authorization and payment to HP of any applicable fees. Upon such transfer, Customer's rights shall terminate and Customer shall transfer all copies of the software to the transferee. Transferee must agree in writing to be bound by the applicable software license terms. Customer may transfer firmware only upon transfer of associated hardware.

License Compliance. HP may audit Customer compliance with the software license terms. Upon reasonable notice, HP may conduct an audit during normal business hours (with the auditor's costs being at HP's expense). If an audit reveals underpayments then Customer will pay to HP such

underpayments. If underpayments discovered exceed five (5) percent of the contract price, Customer will reimburse HP for the auditor costs.

US Federal Government Use. If software is licensed to Customer for use in the performance of a US Government prime contract or subcontract, Customer agrees that consistent with FAR 12.211 and 12.212, commercial computer software, documentation and technical data for commercial items are licensed under HP's standard commercial license.

Global Trade compliance. Products and services provided under these terms are for Customer's internal use and not for further commercialization. If Customer exports, imports or otherwise transfers products and/or deliverables provided under these terms, Customer will be responsible for complying with applicable laws and regulations and for obtaining any required export or import authorizations. HP may suspend its performance under this Agreement to the extent required by laws applicable to either party.

Limitation of Liability. HP's liability to Customer under this Agreement is limited to the greater of \$1,000,000 or the amount payable by Customer to HP for the relevant Order. Neither Customer nor HP will be liable for lost revenues or profits, downtime costs, loss or damage to data or indirect, special or consequential costs or damages. This provision does not limit either party's liability for: unauthorized use of intellectual property, death or bodily injury caused by their negligence; acts of fraud; willful repudiation of the Agreement; nor any liability which may not be excluded or limited by applicable law.
