## PREAMBLE

The purpose of this document is to provide the public with the U.S. Environmental Protection Agency's (EPA) index to the administrative record file for the San Jacinto River Waste Pits Superfund Site (the "Site") which is located in Harris County, Texas. Hazardous substances have been released at the Site, and EPA is in the process of determining what sort of remedial action (if any) to take at the Site under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. Section 9601 et seq. Comments regarding this response action including this record file should be addressed to:

Remedial Project Manager (6SF-RA)  
U.S. EPA Region 6  
1445 Ross Avenue, Suite 1200  
Dallas, Texas 75202-2733

Section 113 (j)(1) of CERCLA, 42 U.S.C. § 9613 (j)(1), provides that judicial review of the adequacy of a CERCLA response action shall be limited to the administrative record. Section 113 (k)(1) of CERCLA, 42 U.S.C. § 9613 (k)(1), requires the EPA to establish an administrative record upon which it shall base the selection of its remedial actions. As the EPA decides what to do at the site of a release of hazardous substances, it compiles documents concerning the site and the EPA's decision into an "administrative record file." This means that documents may be added to the administrative record file from time to time. Once the EPA Region 6 Superfund Division Director signs the Record of Decision memorializing the selection of the action, the documents which form the basis for the selection of the response action are then known as the "administrative record."

Section 113(k)(1) of CERCLA requires the EPA to make the administrative record file available to the public at or near the site of the response action. Accordingly, the EPA has established a repository where the record administrative record file may be reviewed near the Site at:

Highlands Public Library  
Stratford Branch Library  
509 Stratford  
Highlands, Texas 77562  
(281) 426-3521  
Contact: Mandy Sheffield

and

Texas Commission on Environmental Quality  
Central File Room  
12100 Park 35 Circle, Building E  
Austin, Texas 78753  
(512) 239-2900  
Contact: John Flores

The Administrative Record file, along with the Site's profile page, is available on the internet at the following website: <https://www.epa.gov/tx/sjrwf> . The public may also review the administrative record file at the EPA Region 6 offices in Dallas, Texas, by calling 800-533-3508. The administrative record file is available for public review during normal business hours. The administrative record file is treated as a non-circulating reference document. Any document in the administrative record file may be photocopied according to the procedures used at the repository or at the EPA Region 6 offices. This index and the administrative record file were compiled in accordance with the EPA's Revised Guidance on Compiling Administrative Records for CERCLA Response Actions (September 20, 2010).

Documents listed as bibliographic sources for other documents in the record file might not be listed separately in the Site index. Where a document is listed in the Site index or in a bibliography, or is summarized in Site reports (in particular the voluminous sampling data), but is not located among the documents which EPA has made available in the repository, EPA will, upon request, include the document in the repository or make the document available for review at an alternate location. This procedure applies to documents such as verified sampling data, quality assurance/quality control validation of the data, chain of custody forms, guidance and policy documents, as well as voluminous site-specific reports. This procedure does not apply to documents in EPA's confidential file. Copies of guidance documents can also be obtained by calling the Superfund Information Hotline at (800) 533-3508. Requests for documents under the procedure described in the preceding paragraph should be addressed to the Remedial Project Manager at the address listed above.

The EPA response-selection guidance compendium index has not been updated since March 22, 1991 (see CERCLA Administrative Records: First Update of the Compendium of Documents Used for Selecting CERCLA Response Actions (March 22, 1991)); accordingly, it is not included here. Moreover, based on resource considerations, the Region 6 Superfund Division Director has decided not to maintain a Region 6 compendium of response-selection guidance. Instead, consistent with 40 CFR §§ 300.805(a)(2) and 300.810(a)(2) and OSWER Directive No. 9833.3A-1 at page 37, the administrative record file index, Site reports, and the bibliographies of the various documents in the record file include listings of guidance documents which may form a basis for the selection of the response action in question.

The administrative record file is compiled as documents related to the response action are generated. All documents that are clearly relevant and non-privileged are placed in the administrative record file, and made available to the public as soon as possible. The documents included in the index are arranged predominantly in chronological order. EPA may send supplemental administrative record file volumes and indexes to the designated repository. These supplements should be placed with the initial administrative record file. In addition, the administrative record file for this Site incorporates by reference the final administrative records for the Request for a Time Critical Removal Action at the San Jacinto River Waste Pits Site,

Harris County, Texas, dated April 2, 2010; the Decision Document for the Time Critical Removal Action at the San Jacinto River Waste Pits Site, Harris County, Texas, dated July 28, 2010; and the Unilateral Administrative Order for Remedial Investigation/Feasibility Study, Docket No. 06-03-10, dated November 20, 2009.

This index includes the following information for each document:

- **A unique document identification number or “Docid”**
- **Page numbers assigned to the document** - These sequential numbers are stamped on each page of the documents. The page range is given after the word “Bates” in the index
- **Document Date** - The date the document was published and/or released. A date in the year 2525 means no date was recorded.
- **Pages** - Total number of printed pages in the document, including attachments.
- **Title** – title or synopsis
- **Doc Type** – The general classification of the document (*e.g.*, “correspondence,” or “electronic record”)
- **Author** - Name and/or organization of the originator.
- **Addressee** - Name and/or organization of the recipient.
- **Document Type** - General identification, *e.g.*, correspondence, Remedial Investigation Report, Record of Decision.
