ARS Aleut Remediation LLC
and Toeroek Associates

October 19, 2017

PREAMBLE

The purpose of this document is to provide the public with the U.S. Environmental Protection Agency's (EPA) index to the administrative record for the San Jacinto River Waste Pits Superfund Site (the "Site") which is located in Harris County, Texas. Hazardous substances have been released at the Site, and EPA has selected a remedial action for the Site in the Record of Decision dated October 11, 2017, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. Section 9601 et seq.

Section 113 (j)(1) of CERCLA, 42 U.S.C. § 9613 (j)(1), provides that judicial review of the adequacy of a CERCLA response action shall be limited to the administrative record. Section 113 (k)(1) of CERCLA, 42 U.S.C. § 9613 (k)(1), requires the EPA to establish an administrative record upon which it shall base the selection of its remedial actions. As the EPA decided what to do at the site of a release of hazardous substances, it compiled documents concerning the site and the EPA's decision into an "administrative record file." Once the EPA Administrator signed the Record of Decision memorializing the selection of the action, the documents which form the basis for the selection of the response action are then known as the "administrative record."

Section 113(k)(1) of CERCLA requires the EPA to make the administrative record available to the public at or near the site of the response action. Accordingly, the EPA has established a repository where the record administrative record may be reviewed near the Site at:

Highlands Public Library
Stratford Branch
509 Stratford
Highlands, Texas 77562
Contact: Mandy Sheffield
(281) 426-3521

And

Texas Commission on Environmental Quality
Central File Room
12100 Park 35 Circle, Building E
Austin, Texas 78753
Contact: John Flores
(512) 239-2900

The public may also review the administrative record at the EPA Region 6 offices in Dallas, Texas, by calling 800-533-3508. The administrative record is available for public review during normal business hours. The administrative record is treated as a non-circulating reference document. Any document in the administrative record may be photocopied according to the

procedures used at the repository or at the EPA Region 6 offices. This index and the administrative record were compiled in accordance with the EPA's Revised Guidance on Compiling Administrative Records for CERCLA Response Actions (September 20, 2010), as updated on November 14, 2016.

Documents listed as bibliographic sources for other documents in the record file might not be listed separately in the Site index. Where a document is listed in the Site index or in a bibliography, or is summarized in the Record of Decision or in Site reports (in particular guidance and the voluminous sampling data), but is not located among the documents which EPA has made available in the repository, EPA will, upon request, include the document in the repository or make the document available for review at an alternate location. This procedure applies to documents such as verified sampling data, quality assurance/quality control validation of the data, chain of custody forms, guidance and policy documents, as well as voluminous site-specific reports. This procedure does not apply to documents in EPA's confidential file. Copies of guidance documents can also be obtained by calling the Superfund Information Hotline at (800) 533-3508. Requests for documents under the procedure described in the preceding paragraph should be addressed to the Remedial Project Manager at the following address:

Gary Miller
Remedial Project Manager (6SF-RL)
U.S. EPA Region 6
1445 Ross Avenue
Dallas, Texas 75202-2733
(214) 665-8318

The EPA response-selection guidance compendium index has not been updated since March 22, 1991 (see CERCLA Administrative Records: First Update of the Compendium of Documents Used for Selecting CERCLA Response Actions (March 22, 1991)); accordingly, it is not included here. Moreover, based on resource considerations, the Region 6 Superfund Division Director has decided not to maintain a Region 6 compendium of response-selection guidance. Instead, consistent with 40 CFR §§ 300.805(a)(2) and 300.810(a)(2) and OSWER Directive No. 9833.3A-1 at page 37, the administrative record index, the Record of Decision, Site reports, and the bibliographies of the various documents in the record file include listings of and references to guidance documents which may form a basis for the selection of the response action in question.

The administrative record file is compiled as documents related to the response action are generated. This document provides the index to the administrative record for the Site. The documents included in the index are arranged predominantly in chronological order. The administrative record for this Site incorporates by reference the final administrative records for the Request for a Time Critical Removal Action at the San Jacinto River Waste Pits Site, Harris County, Texas, dated April 2, 2010; the Decision Document for the Time Critical Removal Action at the San Jacinto River Waste Pits Site, Harris County, Texas, dated July 28, 2010; and the Unilateral Administrative Order for Remedial Investigation/Feasibility Study, Docket No. 06-03-10, dated November 20, 2009.

Note: The letter dated September 27, 2017, from Mr. Ronald J. Tenpas of Morgan, Lewis & Bockius LLP initially was omitted inadvertently from the Administrative Record, but was added to the record on October 19, 2017.

This index includes the following information for each document:

- **A unique document identification number or “Docid”**
- **Page numbers assigned to the document** - These sequential numbers are stamped on each page of the documents. The page range is given after the word “Bates” in the index
- **Document Date** - The date the document was published and/or released. A date in the year 2525 means no date was recorded.
- **Pages** - Total number of printed pages in the document, including attachments.
- **Title** – title or synopsis
- **Doc Type** – The general classification of the document (*e.g.*, “correspondence,” or “electronic record”)
- **Author** - Name and/or organization of the originator.
- **Addressee** - Name and/or organization of the recipient.
- **Document Type** - General identification, *e.g.*, correspondence, Remedial Investigation Report, Record of Decision.
