- Appendix H. Windfall Sites**
- Appendix I. Lapsed Permissions**

1. Executive Summary

Introduction

- 1.1. The National Planning Policy Framework (NPPF) requires Local Authorities to identify and annually review their housing land supply. The purpose of this assessment is to consider whether there are sufficient deliverable sites within a Local Authority Area to allow for the provision of five years' worth of housing, based on the identified housing requirement set out in adopted strategic policies, or against local housing need where strategic policies are more than five years old, unless policies have been reviewed and found up-to-date¹.
- 1.2. This assessment covers the five year period from 2019/20 to 2023/24. The assessment has been undertaken using a cautious and robust methodology which is generally consistent with that endorsed by the SAMDev Plan Inspector within her Report on the SAMDev Plan, whilst also seeking to reflect recent changes to national policy and guidance.
- 1.3. In conclusion the assessment demonstrates that Shropshire Council currently has **6.42 years supply of deliverable housing land against the housing requirement within the adopted Core Strategy (2011) and 8.00 years supply of deliverable housing land against the housing need identified using Governments standard methodology.**

Housing Land Requirement

- 1.4. The adopted Local Plan for Shropshire consists of the Core Strategy (2011); Site Allocations and Management of Development (SAMDev) Plan (2015); and any adopted formal Neighbourhood Plans. The Shropshire Core Strategy (2011) identifies an ambitious housing requirement for Shropshire of 27,500 dwellings between 2006 and 2026. The Site Allocations and Management of Development (SAMDev) Plan (2015) seeks to deliver the housing requirement identified within the Core Strategy.
- 1.5. In order to allow the phased release of housing land, the Core Strategy (2011) and SAMDev Plan (2015) identify the mechanisms for the release of sites so that a five year supply of housing land can be maintained over the plan period. This includes a trajectory for the phased release of housing land across the plan period. Shropshire Council considers that this trajectory is the most appropriate mechanism for identifying the annual housing land requirement. This approach was endorsed by the SAMDev Plan Inspector.
- 1.6. To inform an ongoing Local Plan Review, Shropshire Council has completed a Full and Objective Assessment of Housing Need (FOAHN) for Shropshire. This assessment was undertaken using Governments standard methodology for calculating housing need. A report summarising this assessment is available on the Shropshire Council website at: <https://shropshire.gov.uk/planning-policy/local-planning/local-plan-partial-review-2016-2036/evidence-base/>
- 1.7. Although not produced for this purpose, the Shropshire Council FOAHN provides endorsement of the housing requirement within the adopted Local Plan, in that housing need over the period from 2016-2026 is less than, but generally consistent with this housing requirement. On the basis of this evidence it is considered appropriate to continue to assess the housing land supply in Shropshire against the housing requirement within the adopted Local Plan. However, to demonstrate

¹HCLG, (2019), NPPF – Paragraph 73

robustness of methodology, housing land supply will also be calculated against the Full Objectively Assessed Housing Need calculated using Governments standard methodology.

Housing Land Supply

- 1.8. Shropshire Council has undertaken a cautious and robust assessment of the housing land supply in Shropshire. This assessment concludes that deliverable sites in Shropshire include:
- Sites with extant Planning Permission at the 31st March 2019.
 - Sites with an extant and positive Prior Approval decision at the 31st March 2019.
 - Selected sites with a resolution to grant at the 31st March 2019.
 - Selected sites allocated for development within the Development Plan (adopted) which are likely to be deliverable within five years.
 - Selected sites from the Strategic Land Availability Assessment (SLAA) which are likely to be deliverable within five years.
 - Sites seeking Homes England (HE) funding.
 - Windfall sites.
- 1.9. In order to be considered deliverable *“sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years”*.²
- 1.10. The methodology utilised for this assessment is summarised within the main report of this statement.

Housing Land Requirement and Supply Calculation

- 1.11. The housing requirement and supply for the five year period starting on the 1st April 2019 have been calculated using a methodology generally consistent with that endorsed by the SAMDev Plan Inspector within her Report.
- 1.12. Table 1 provides a summary of the calculation of the five year housing requirement:

Table 1: Summary of Five Year Housing Requirement

Category		Core Strategy Requirement	FOAHN Housing Need
(A) 5 Year Requirement:	<i>2019/20</i>	<i>1,390</i>	<i>1,270</i>
	<i>2020/21</i>	<i>1,390</i>	<i>1,270</i>
	<i>2021/22</i>	<i>1,530</i>	<i>1,270</i>
	<i>2022/23</i>	<i>1,530</i>	<i>1,270</i>
	<i>2023/24</i>	<i>1,530</i>	<i>1,270</i>
	Total	7,370	6,350
(B) Under-Delivery: (from earlier in the plan period)		539	0
(C) Buffer: (5% buffer consisting of supply brought forward from later in the plan period to ensure choice and competition. Applied to both the requirement and past under-delivery)		395	318
(D) Total Requirement (A) + (B) + (C):		8,304	6,668

²HCLG (2019), NPPF – Annex 2: Glossary

1.13. Table 2 provides a summary of the housing land supply in Shropshire considered deliverable within the next five years, as at the 1st April 2019:

Table 2: Summary of deliverable housing land supply (as at 1st April 2019)

Category	Net Dwellings
(A) Dwellings on sites with Planning Permission*	7,754
(B) Dwellings on sites with Prior Approval*	115
(C) Selected sites with a 'resolution to grant'	269
(D) Dwellings on Allocated Sites estimated to be completed within 5 years*	1,322
(E) SLAA Sites deliverable within 5 years*	301
(F) Emerging Affordable Housing Sites*	307
(G) Windfall Sites**	598
Total: (A) + (B) + (C) + (D) + (E) + (F) + (G)	10,666

*A very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; allocation within the adopted Local Plan; identified within the SLAA Sites; and Emerging Affordable Housing Sites will not be delivered in the five year period has been applied to figures in this table.

**Based on historic delivery rates and expected future trends.

Conclusion

1.14. Table 3 brings together the five year housing land requirement and the results of the assessment of the five year housing land supply in Shropshire.

1.15. This table confirms that Shropshire Council is able to demonstrate a five year housing land supply as at the 1st April 2019.

Table 3: Comparison: Five Year Housing Requirement and Supply

Category	Core Strategy Requirement	FOAHN Housing Need
Total Requirement:	8,304	6,668
Total Supply:	10,666	10,666
Over / Under Provision:	+2,362	+3,998
Number of Years Supply:	6.42	8.00

1.16. Identifying land sufficient for the delivery of enough housing to meet the housing requirement for the area is one of the key responsibilities of a Local Planning Authority. Shropshire Council is in a position where it is able to demonstrate sufficient deliverable sites for **6.42 years supply of deliverable housing land against the housing requirement within the adopted Core Strategy and 8.00 years supply of deliverable housing land against the housing need identified using Governments standard methodology**. The focus must therefore be on delivery of sustainable housing, which is ultimately a market function undertaken by the development industry.

1.17. Please Note: The sites which make up the various components of the five year housing land supply as at the 31st March 2019 are included within Appendices A-H of the Shropshire Council: Five Year Housing Land Supply Statement (2019).

2. Introduction

- 2.1. The National Planning Policy Framework (NPPF) requires Local Authorities to identify and annually review their housing land supply. The purpose of this assessment is to consider whether there are sufficient deliverable sites within a Local Authority Area to allow for the provision of five years' worth of housing, based on the identified housing requirement set out in adopted strategic policies, or against local housing need where strategic policies are more than five years old, unless policies have been reviewed and found up-to-date.
- 2.2. In addition, the NPPF specifies that this assessment of housing land supply should allow for the provision of an additional buffer, moved forward from later within the plan period, to allow for choice and competition in the market.
- 2.3. Identifying land sufficient for the delivery of enough housing to meet the housing requirement for the area is one of the key responsibilities of a Local Authority. However, delivery of sustainable housing development is ultimately undertaken by the development industry.
- 2.4. This statement sets out the assessment of housing land supply in Shropshire as at 1st April 2019 and has been undertaken using a cautious and robust methodology which is generally consistent with that endorsed by the SAMDev Plan Inspector within her Report³ on the SAMDev Plan, whilst also seeking to reflect recent changes to National policy and guidance. The five years covered within the assessment are from 2019/20 to 2023/24.
- 2.5. The statement comprises six main components, these are the:
 - Housing land requirement;
 - Housing delivery;
 - Housing land supply;
 - Housing land requirement and supply calculation;
 - Housing land supply conclusion; and
 - Schedules of sites included within the housing land supply.
- 2.6. Within all aspects of this assessment, account has been taken of dwellings recorded as completed at the base date for the supply (31st March 2019) and residential units lost through any development scheme, to produce a net figure.
- 2.7. In order to ensure that the appraisal of the deliverability / developability of the housing land supply is robust, a comprehensive methodology for the appraisal of sites has been utilised, further details of which are provided within this statement. **Ultimately this assessment represents a cautious appraisal and presents a robust position on the housing land supply in Shropshire.**
- 2.8. This assessment will be updated annually as further information becomes available regarding the delivery of housing sites.
- 2.9. In addition, further analysis of the information emerging from this review has been undertaken in order to provide:
 - A review of the total housing land supply across the plan period; and
 - A breakdown of the housing commitments and completions by settlement.
- 2.10. The results of this further analysis are provided as Annexes to this report.
- 2.11. **Please Note:** A separate assessment of Gypsy and Traveller accommodation (requirement and supply)⁴ has been undertaken.

³www.shropshire.gov.uk/media/8232/samdev-plan-inspectors-report.pdf

⁴Shropshire Gypsy and Traveller and Travelling Showperson Accommodation Assessment (2017), <https://shropshire.gov.uk/planning-policy/local-planning/local-plan-partial-review-2016-2036/evidence-base/>

3. Housing Land Requirement

Identification of the Housing Land Requirement

- 3.1. The NPPF states “*Local Planning Authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old*”⁵.
- 3.2. The adopted Local Plan for Shropshire consists of the Core Strategy (2011); Site Allocations and Management of Development (SAMDev) Plan (2015); and any adopted formal Neighbourhood Plans. The Shropshire Core Strategy (2011) sets out the Council’s vision, strategic objectives and broad spatial strategy to guide future development and growth in Shropshire to 2026. A key aspect of this spatial strategy was the identification of an ambitious housing target for Shropshire within Policy CS1 of 27,500 dwellings between 2006 and 2026, based upon evidence produced in preparation for the West Midlands Regional Spatial Strategy.
- 3.3. The Site Allocations and Management of Development (SAMDev) Plan (2015) seeks to deliver the housing requirement identified within the Core Strategy (as recognised in Policy MD1), through the identification of deliverable sites for housing development and policies to appraise development proposals.
- 3.4. Shropshire Council is currently progressing a Local Plan Review. To inform this review, Shropshire Council has completed a Full and Objective Assessment of Housing Need (FOAHN) for Shropshire. This assessment was undertaken using Governments standard methodology for calculating housing need. A report summarising this assessment is available on the Shropshire Council website at: <https://shropshire.gov.uk/planning-policy/local-planning/local-plan-partial-review-2016-2036/evidence-base/>
- 3.5. Although not produced for this purpose, the Shropshire Council FOAHN provides endorsement of the housing requirement within the adopted Local Plan, in that housing need over the period from 2016-2026 is less than, but generally consistent with this housing requirement.
- 3.6. Specifically, the first ten years of this FOAHN coincide with the last ten years of the period addressed by the housing requirement within the adopted Local Plan (2016-2026). According to the FOAHN, the total housing need calculated over the period from 2016 to 2036 is 25,400 dwellings, which equates to some 1,270 dwellings per annum. Using this annual need, the total need for the period 2016-2026 can be calculated at 12,700 dwellings. The housing requirement within the adopted Local Plan for this same ten year period is some 14,600⁶, equating to 1,390 dwellings per annum (2016-2021); and 1,530 dwellings per annum (2021-2026). It is therefore apparent that the housing requirement within the adopted Local Plan is sufficient to deliver the FOAHN for this ten year period.
- 3.7. As such it is considered appropriate to continue to assess the housing land supply in Shropshire against the housing requirement within the adopted Local Plan.
- 3.8. However, to ensure robustness, housing land supply will also be calculated against the FOAHN calculated using Governments standard methodology.

⁵HCLG, (2019), NPPF – Paragraph 73

⁶Using the housing requirement within Core Strategy Policy CS1 and the phased approach described in Paragraph 5.5 of the explanatory text to Core Strategy Policy CS10, against which Shropshire Council is seeking to deliver and which is being used within the calculation of housing land supply, as described below.

Identification of the Annual Housing Land Requirement

Adopted Local Plan

- 3.9. In order to allow the phased release of housing land, the Core Strategy and SAMDev Plan identify the mechanisms for the release of sites, so that a five year supply of housing land can be maintained over the plan period. This includes a trajectory for the phased release of housing land across the plan period within the supporting text of Core Strategy Policy CS10: Managed Release of Housing Land. This trajectory specifies that housing development will be phased in five year time bands, as follows:
- 2006/2011 – 1,190 dwellings per annum.
 - 2011/2016 – 1,390 dwellings per annum.
 - 2016/2021 – 1,390 dwellings per annum.
 - 2021/2026 – 1,530 dwellings per annum.
- 3.10. Shropshire Council considers that this trajectory is the most appropriate mechanism for identifying the annual housing land requirement. The Inspectors Report of the SAMDev Plan corroborates this position concluding that:
- “The purpose of the housing trajectory in the CS is to illustrate the expected rate of housing delivery over the plan period, demonstrating how the Council will maintain delivery of a five-year supply of housing land to meet their housing target. It reflects timing constraints and was accepted by the Inspector. The phasing is to be subject to review, linked to monitoring through the SHLAA and the Five Year Housing Land Supply Statement. The CS therefore provides justification for the Council’s preferred approach (scenario 1) for demonstrating how the SAMDev Plan will maintain delivery of a five year supply of housing land and meet the overall housing requirement. To do otherwise would not properly reflect the CS. The use of the phasing bands set out in the CS as the base requirement against which the five year housing land supply position is to be calculated is therefore justified”.*
- 3.11. The trajectory is also consistent with local circumstances, as it:
- Reflects the impact of the economic downturn, which suppressed housing delivery in the early part of the plan period;
 - Reflects timing constraints due to the need for infrastructure to be put in place;
 - Recognises the acceleration of housing delivery which would result from the adoption of the SAMDev Plan; and
 - Reflects local circumstances and the objectives of the Development Plan.
- 3.12. Furthermore, whilst neither the NPPF nor the National Planning Practice Guidance (NPPG) specify what approach should be utilised for identifying the annual housing land requirement, both make reference to the need to prepare a housing trajectory and review delivery against it⁷.
- 3.13. The use of the trajectory approach was discussed with the Shropshire Council Developer Panel (consisting of representatives of the various scales of the development industry operating in Shropshire) prior to the Examination of the SAMDev Plan, who accepted that the use of the trajectory was reasonable, subject to the approach taken on other methodological issues, which have also been reflected within this assessment.

Housing Need

- 3.14. The Full and Objective Assessment of Housing Need (FOAHN) for Shropshire, undertaken using Governments standard methodology for calculating housing need, indicates an annual housing need of 1,270 dwellings.

⁷HCLG (2019), NPPF - Paragraph 73

HCLG, (2019,), NPPG – Housing and Economic Land Availability Assessment, Paragraph: 024 Reference ID: 3-024-20190722, Revision date: 22 07 2019

4. Housing Delivery

Annual Housing Completions

Adopted Local Plan

4.1. Using the annual housing land requirement identified within Core Strategy Policy CS10 and its supporting text, Shropshire Council has undertaken a review of housing completions within previous years of the plan period. The results of this review are summarised in Table 4.

Table 4: Housing Completions in Shropshire (2006/07 - 2018/19)

Financial Year	Annual Requirement ¹	Housing Completions	Over provision / shortfall	Cumulative provision
2006/07	1,190	1,228	+38	+38
2007/08	1,190	1,106	-84	-46
2008/09	1,190	1,265	+75	+29
2009/10	1,190	1,112	-78	-49
2010/11	1,190	984	-206	-255
2011/12	1,390	724	-666	-921
2012/13	1,390	847	-543	-1,464
2013/14	1,390	1,079	-311	-1,775
2014/15	1,390	1,155	-235	-2,010
2015/16	1,390	1,402	+12	-1,998
2016/17	1,390	1,910	+520	-1,478
2017/18	1,390	1,876	+486	-992
2018/19	1,390	1,843	+453	-539

¹Identified using the housing trajectory from the supporting text of Policy CS10 of the Core Strategy.

4.2. These results have also been depicted graphically in Figure 1 below:

Figure 1: Housing Completions in Shropshire (2006/07 - 2018/19)

4.3. Completion rates experienced over the period from 2011/12 to 2016/17 increased year on year and remained very high in 2017/18 and 2018/19, significantly exceeding the housing requirement. It is considered that this reflects current market conditions and the benefits of an up-to-date Local Plan.

Housing Need

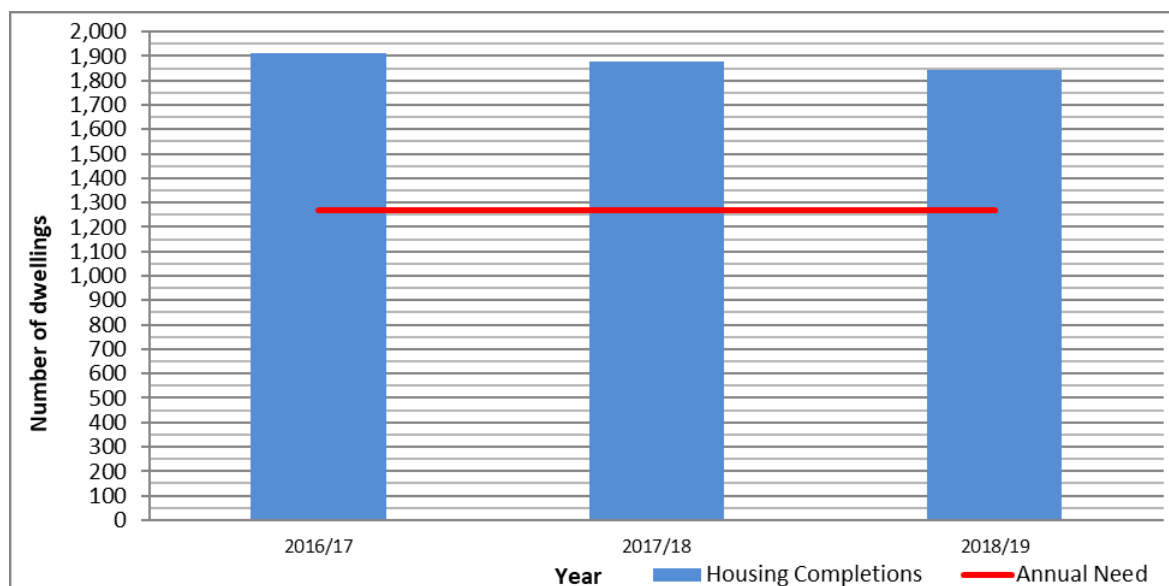

4.4. The Full and Objective Assessment of Housing Need (FOAHN) undertaken by Shropshire Council covers the period from 2016 to 2036. The results of an assessment of housing completions against the identified housing need for previous years within this period is summarised in Table 5.

Table 5: Housing Completions in Shropshire (2016/17 - 2018/19)

Financial Year	Annual Need	Housing Completions	Over provision / shortfall	Cumulative provision
2016/17	1,270	1,910	+640	+640
2017/18	1,270	1,876	+606	+1,246
2018/19	1,270	1,843	+573	+1,819

4.5. These results have also been depicted graphically in Figure 2 below:

Figure 2: Housing Completions in Shropshire (2006/07 - 2018/19)

Past Over/Under-Delivery

Adopted Local Plan

4.6. Housing completions in recent years have exceeded the relevant annual housing requirement, reflecting current market conditions and the benefits of an up-to-date Local Plan. However, primarily as a result of the economic downturn, completions in earlier years fell below the relevant annual housing requirement. This has resulted in a cumulative shortage of 539 dwellings.

4.7. The results of the economic downturn are particularly evident in Figure 1, which demonstrates the drop in the number of dwellings completed each year between 2008/09 and 2011/12 and the gradual uplift in the number of completions between 2011/12 and 2016/17, with completions remaining high in 2017/18 and 2018/19. Due to the high level of completions achieved over the last few years, under-delivery from earlier in the plan period has significantly reduced.

- 4.8. Nationally, a number of methodological approaches have been utilised for redistributing past under-delivery within the plan period, in order to ensure the total housing requirement identified for a plan is met within the lifespan of the plan. The two most common are:
- Requiring past under-delivery to be delivered within the next five years of the plan (often referred to as ‘the Sedgefield approach’).
 - Requiring past under-delivery to be delivered over the remaining plan period (often referred to as ‘the Liverpool approach’).
- 4.9. The NPPG on Housing Supply and Delivery states that *“The level of deficit or shortfall will need to be calculated from the base date of the adopted plan and should be added to the plan requirements for the next 5 year period (the Sedgefield approach), then the appropriate buffer should be applied. If a strategic policy-making authority wishes to deal with past under delivery over a longer period, then a case may be made as part of the plan-making and examination process rather than on a case by case basis on appeal”*⁸.
- 4.10. As such, Shropshire Council will continue to apply ‘the Sedgefield approach’ and include all past under-delivery over the next five years.

Housing Need

- 4.11. The Full and Objective Assessment of Housing Need (FOAHN) undertaken for Shropshire covers the period from 2016 to 2036. Since 2016, housing completions have consistently exceeded need. As such during this period there has been no under-delivery of housing against need.

Housing Delivery Test

- 4.12. The NPPF states *“To maintain the supply of housing, local planning authorities should monitor progress in building out sites which have permission. Where the Housing Delivery Test indicates that delivery has fallen below 95% of the local planning authority’s housing requirement over the previous three years, the authority should prepare an action plan in line with national planning guidance, to assess the causes of under delivery and identify actions to increase delivery in future years”*.
- 4.13. Government has published new guidance on the housing delivery test, including a measurement rule book, which explains how it is calculated.
- 4.14. In summary, the housing delivery test is *“a percentage measurement of the number of net homes delivered against the number of homes required, as set out in the relevant strategic policies for the areas covered by the Housing Delivery Test, over a rolling three year period”*⁹. The calculation can therefore be summarised as follows:

$$\text{Housing Delivery Test (\%)} = \frac{\text{Total net homes delivered over three year period}}{\text{Total number of homes required over three year period}}$$

- 4.15. The guidance then goes on to identify the method for calculating homes delivered and required. In summary:
- *“The number of net homes delivered is the National Statistic for net additional dwellings over a rolling three year period, with adjustments for net student and net other communal accommodation”*⁹.

⁸HCLG, (2018), NPPG – Housing Supply and Delivery, Paragraph: 031 Reference ID: 68-031-20190722, Revision date: 22 July 2019

⁹HCLG (2018), Housing Delivery Test Measurement Rule Book

- The number of homes required is the lower of:
 - *“the latest adopted housing requirement, including any unmet need from neighbouring authorities which forms part of that adopted housing requirement. This requirement will be the stepped housing requirement (or the annual average requirement where there is no stepped requirement)”*⁹, where the housing requirement is less than five years old; **or**
 - *“the minimum annual local housing need figure (and any need from neighbouring authorities which it has been agreed should be planned for, and which has been tested at examination) for that authority calculated with a base date of 1st April each year”*⁹.

4.16. Government has recently published the results of the Housing Delivery Test for 2019 which indicate that within Shropshire over the last three years housing delivery exceeded housing required, with delivery at 172%¹⁰ of need.

4.17. This calculation undertaken can be summarised as follows:

$$\text{Housing Delivery Test} = \frac{\text{Total net homes delivered over three year period (5,629)}}{\text{Total number of homes required over three year period (3,278)}} = \text{(172\%)}$$

4.18. If the housing requirement within the adopted Local Plan were used to calculate the Housing Delivery Test, over the last three years housing delivery exceeded housing required, with delivery at 135% of need.

$$\text{Housing Delivery Test} = \frac{\text{Total net homes delivered over three year period (5,629)}}{\text{Total number of homes required over three year period (4,170)}} = \text{(135\%)}$$

Housing Buffer

4.19. The NPPF specifies that when assessing the five year housing land supply, Local Authorities should *“identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*

a) 5% to ensure choice and competition in the market for land; or

b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or

*c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply”*¹¹.

4.20. The NPPF indicates that significant under delivery of housing will be “measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement”¹².

4.21. The Housing Delivery Test indicates that within Shropshire, housing completions over the last three years have significantly exceeded housing required, as such a 5% buffer will be applied.

¹⁰HCLG (2020), Housing Delivery Test: 2019 measurement

¹²HCLG (2019), NPPF – Footnote 39

5. Housing Land Supply

Introduction

- 5.1. Shropshire Council has undertaken a cautious and robust assessment of the housing land supply in Shropshire. This part of the statement identifies the methodological approach utilised during this assessment.

Definition of a Dwelling

- 5.2. In order to undertake an assessment of housing land supply, a definition of a dwelling must be identified. This ensures consistency and robustness of the assessment.
- 5.3. Shropshire Council considers that the most appropriate definition of a dwelling for the purposes of an assessment of housing land supply is that provided by the Office for National Statistics (ONS), as it is data collected by the ONS that underpins the assessment of Housing Need and the subsequent Housing Requirement.
- 5.4. This definition has also been endorsed by the Department for Housing, Communities and Local Government (HCLG), the department responsible for producing the NPPF and NPPG. The NPPF and NPPG identify the requirement for Local Authorities to undertake an annual assessment of housing land supply and outline the parameters for such an assessment.
- 5.5. Furthermore, the definition is consistent with that applied when determining whether a unit would generate an award under the New Homes Bonus and whether it should be subject to Council Tax.
- 5.6. This definition of a dwelling is as follows: *“a self-contained unit of accommodation. Self-containment is where all the rooms (including kitchen, bathroom and toilet) in a household’s accommodation are behind a single door which only that household can use. Non-self-contained household spaces at the same address should be contained together as a single dwelling. Therefore a dwelling can consist of one self-contained household space or two or more non-self-contained household spaces at the same address”*¹³.

Extra Care Accommodation

- 5.7. The term 'extra care accommodation' can be applied to a range of accommodation types intended to meet the needs of those who need assistance (primarily but not necessarily the elderly). These include 'assisted living', 'extra' or 'very sheltered housing', 'close care', 'continuing care retirement communities' (more than 50 units) and 'retirement villages'.
- 5.8. Equally, the use-class of extra care accommodation varies significantly and is not necessarily a reflection of the type of accommodation provided. Therefore Shropshire Council considers that it is most appropriate to apply the ONS and HCLG definition of a dwelling when determining if these units of accommodation are dwellings.
- 5.9. Where the units comply with this definition (are self-contained, with their own living space, bedroom, bathroom and kitchen behind their own front door) then they are considered to represent a dwelling(s) for the purpose of this assessment of housing land supply.
- 5.10. The SAMDev Plan Inspector has endorsed the approach taken by Shropshire Council in relation to these units, stating within Paragraph 49 of her report that *“It is*

¹³HCLG, (2012), Guidance: Definitions of general housing terms

reasonable to include care home accommodation within the 5 year housing land supply where it is in the form of self-contained units. Shropshire Council has been very cautious in its consideration of which extra care/care home facilities can be included within the supply, giving consideration to the details of a particular scheme rather than simply the description of development which may be misleading”¹⁴.

Other communal accommodation for the elderly

- 5.11. Shropshire Council has not previously included communal accommodation for the elderly within its housing land supply.
- 5.12. However, updated guidance within the NPPG on Housing Supply and Delivery specifies that *“Local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, as part of their housing land supply. This contribution is based on the amount of accommodation released in the housing market”¹⁵.*
- 5.13. The NPPG on Housing for Older and Disabled People specifies how such accommodation should be accounted for within the housing land supply, stating: *“plan-making authorities will need to count housing provided for older people against their housing requirement. For residential institutions, to establish the amount of accommodation released in the housing market, authorities should base calculations on the average number of adults living in households, using the published Census data”¹⁶.*
- 5.14. Currently the average number of adults living in all households is 1.8. As such the calculation of the contribution of completed communal accommodation to total housing supply would be as follows:

*“Net bedrooms in communal accommodation
Average number of adults in households in England (currently 1.8)”¹⁷*

- 5.15. For consistency, the NPPG on Housing Supply and Delivery also specifies that *“Communal accommodation, including student accommodation and other communal accommodation, can count towards the Housing Delivery Test...”¹⁸.*
- 5.16. Shropshire Council commenced monitoring consents/completions on other communal accommodation for the elderly from the 2018/19 monitoring period. The contribution that such properties make to the housing completions and housing land supply have been calculated consistent with the NPPG.

Student accommodation

5.17. National guidance on housing land supply states *“All student accommodation, whether it consists of communal halls of residence or self-contained dwellings, and whether or not it is on campus, can in principle count towards contributing to an authority’s housing land supply based on:*

- *The amount of accommodation that new student housing releases in the wider housing market (by allowing existing properties to return to general residential use); and / or*
- *The extent to which it allows general market housing to remain in such use, rather than being converted for use as student accommodation.*

¹⁴PINS (2015), Report on the Examination into Site Allocations and Management of Development (SAMDev) Plan, <https://shropshire.gov.uk/media/8232/samdev-plan-inspectors-report.pdf>

¹⁵HCLG, (2019), NPPG – Housing Supply and Delivery, Paragraph: 035 Reference ID: 68-035-20190722, Revision date: 22 July 2019

¹⁶HCLG, (2019), NPPG – Housing for Older and Disabled People, Paragraph: 016a Reference ID: 63-016a-20190626, Revision date: 26 June 2019

¹⁷HCLG (2018), Housing Delivery Test Measurement Rule Book

¹⁸HCLG (2019), NPPG – Housing Supply and Delivery, Paragraph: 041 Reference ID: 68-041-20190722, Revision date: 22 July 2019

- 5.18. *This will need to be applied to both communal establishments and to multi bedroom self-contained student flats. Several units of purpose-built student accommodation may be needed to replace a house which may have accommodated several students.*
- 5.19. *Authorities will need to base their calculations on the average number of students living in student only accommodation, using the published census data, and take steps to avoid double-counting. The exception to this approach is studio flats designed for students, graduates or young professionals, which can be counted on a one for one basis. A studio flat is a one-room apartment with kitchen facilities and a separate bathroom that fully functions as an independent dwelling”¹⁹.*
- 5.20. Currently the average number of students in student only households is 2.5. As such the calculation of the contribution of completed communal accommodation to total housing supply would be as follows:

Net bedrooms in student communal accommodation

Average number of students in student only households in England (currently 2.5)²⁰

- 5.21. For consistency, the NPPG on Housing Supply and Delivery also specifies that *“Communal accommodation, including student accommodation and other communal accommodation, can count towards the Housing Delivery Test...”²¹.*
- 5.22. This approach has been applied to student accommodation within the housing land supply from the 2017/18 monitoring period. The contribution that such properties make to the housing completions and housing land supply have been calculated consistent with the NPPG.

Annexes

- 5.23. In conformity with the ONS and HCLG definition of a dwelling, Shropshire Council considers that annexes represent self-contained dwellings where they:
- Are self-contained (have their own living space, bedroom, bathroom and kitchen);
 - Have their own point of access; and
 - Are not subject to conditions on occupancy, that restrict a self-contained household from being formed within them.
- 5.24. Consequently where annexes comply with these criteria, they will be considered as part of the review of the housing land supply.

Deliverable and Developable Sites

- 5.25. When reviewing the housing land supply, Shropshire Council is required to undertake an assessment of sites to determine if they are deliverable, developable or not currently developable for housing. This will then inform the consideration of when the site is likely to come forward for development.
- 5.26. Sites to be included within the first five years of the housing land supply should be considered deliverable. The NPPF states that *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

¹⁹HCLG, (2019), NPPG – Housing Supply and Delivery, Paragraph: 034 Reference ID: 68-034-20190722, Revision date: 22 July 2019

²⁰HCLG (2018), Housing Delivery Test Measurement Rule Book

²¹HCLG (2019), NPPG – Housing Supply and Delivery, Paragraph: 041 Reference ID: 68-041-20190722, Revision date: 22 July 2019

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”²².

- 5.27. It is apparent that this is not intended to be an exhaustive list of the types of site which can be considered deliverable and that sites do not need to involve major development and have Planning Permission or detailed Planning Permission to be included within the first five years of the housing land supply. Rather the requirement is that there is clear evidence, through assessment of a site, that concludes that it is **available now**; offers a **suitable location for development now**; and is **achievable** with a realistic prospect that **housing will be delivered** within five years.
- 5.28. Sites can be included within the housing land supply beyond the first five years where they are considered developable. For a site to be considered developable the NPPF requires that *“sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged”²².*
- 5.29. For the purposes of this statement deliverable and developable sites include:
- Sites with extant Planning Permission at the 31st March 2019.
 - Sites with an extant and positive Prior Approval decision at the 31st March 2019.
 - Selected sites with a resolution to grant at the 31st March 2019.
 - Selected sites allocated for development within the Development Plan (adopted) which are likely to be deliverable within five years.
 - Selected sites from the Strategic Land Availability Assessment (SLAA) which are likely to be deliverable within five years.
 - Sites seeking Homes England (HE) funding.
 - Windfall sites.

Build Rates and Lead-in Times

- 5.30. When reviewing housing land supply, Shropshire Council must also make assumptions about both lead-in times and build rates on development sites.

Lead-in Times

- 5.31. Lead-in time represents the period of time before construction starts on a site. There are a range of factors that will dictate lead-in times, however to ensure consistency in its assessment, Shropshire Council has identified very cautious standard assumptions on lead-in times, which reflects the broad range of applications received.
- 5.32. The Council’s assumptions on lead-in times assume a period of between 10-27 months from the preparation of an application to the completion of the first dwelling on a site. This reflects the significant range of applications the Council receives, which in turn reflects the varied nature of the County. This includes a significant volume of applications on small sites which will usually be subject to less pre-

²²HCLG (2019), NPPF – Annex 2: Glossary

application discussion and negotiation on Section 106 Legal Agreements, through to larger schemes, mixed use proposals and urban extensions in Shrewsbury; the market towns; and key centres. It is considered that the assumptions made by the Council on lead-in times are both realistic and locally reflective.

5.33. Table 6 summarises the Council's lead-in time assumptions:

Table 6: 'Standard' Lead-in Times in Shropshire

Action	Months as a range		
	Start	End	Range
Preparation of Application	1	6	8-21
Local Planning Authority Consideration of Application	2	3	
Completion of S.106 Legal Agreement	1	6	
Preparation of Reserved Matters Application (if applicable) & Discharging of Conditions	2	3	
Local Planning Authority Consideration of Reserved Matters Application(s) (if applicable)	2	3	
Site Mobilisation	2	6	2-6
Infrastructure Implementation			
Build First Dwelling			
Totals:	10	27	10-27

5.34. Development occurring on larger sites in Shropshire is more than capable of commencement within six months following the grant of approval, with examples provided below. This is not surprising considering many larger sites are Local Plan allocations and benefit from significant amounts of design work, site marketing and discussions with the Council prior to the submission of an application.

5.35. For instance:

- 13/03055/FUL Land at Aston Street, Shifnal (115 dwellings): Decision notice issued on 24th March 2014. Commencement on 7th April 2014. Development completed during 2017/18.
- 13/00893/FUL Phase 1 of the Shrewsbury South SUE (291 dwellings): Decision notice issued on 9th May 2014. Commencement on 27th May 2014. As at the 31st March 2019, 144 dwellings have been completed on this site.
- 14/01264/FUL Mount Farm, Whitchurch (100 dwellings): Decision notice issued on 23rd December 2014. Commencement on 23rd March 2015. Development completed during 2018/19.
- 14/05343/FUL Land West of Ellesmere Road, Shrewsbury (147 dwellings): Decision notice issued on 26th March 2015. Commencement on 15th June 2015. Development completed during 2018/19.
- 16/02618/FUL Phase 3 of the Shrewsbury South SUE (159 dwellings): Decision notice issued on 19th December 2016. Commencement on 16th January 2017. As at the 31st March 2019, 44 dwellings have been completed on this site.
- 16/05474/FUL Land East of A53, Shrewsbury Road, Shawbury (50 dwellings): Decision notice issued 4th October 2017. Commencement on 21st October 2017. As at the 31st March 2019, 35 dwellings have been completed on this site.
- 17/05554/FUL Land to the North of Hall Bank, Pontesbury (86 dwellings): Decision notice issued 10th September 2018. Commencement on 17th September 2018. As at 31st March 2019, 9 dwellings have been completed on this site.

- 5.36. These assumptions represent a cautious assessment of the timescales taken to undertake key stages in the development process such as preparing for and undertaking pre-application discussions; carrying out supporting investigations and surveys; securing Planning Permission; completing Section 106 Legal Agreements; discharging pre-commencement conditions; and undertaking pre-construction works.
- 5.37. Where possible, to increase accuracy of assumptions on lead-in times, they have been further refined through discussions with landowners, land promoters and developers which ensure that Shropshire Council can have significant confidence that the assumptions for each site are realistic.

Build Rates

- 5.38. Build rates represent the number of dwellings that it is anticipated will be completed on a site, per-annum. Similar to lead-in times, there are a range of factors that will dictate build rates.
- 5.39. To ensure consistency Shropshire Council has identified 'standard' build rates, based on its own monitoring of development activity and feedback from the Shropshire Council Developer Panel (consisting of representatives of the various scales of the development industry operating in Shropshire), which indicated that build rates on sites in Shropshire are around 30-40 units/year. It is the experience of many local developers that, "the right site sells well" in Shropshire.
- 5.40. Further feedback from the Panel has also indicated that on large sites (benchmark estimate of 250 dwellings plus) that the build-out rate could be multiplied to take into consideration that two or more developers may be constructing housing units at the same time.
- 5.41. These 'standard' build rates are summarised in the Table 7 below:

Table 7: 'Standard' Build Rates in Shropshire

Location of Development	Anticipated Build Rate*
North Shropshire	25 dwellings/year
Central Shropshire	38 dwellings/year
South Shropshire	36 dwellings/year

*Sites of more than 250 dwellings will be subject to a large site multiplier

- 5.42. It is considered that these build rates represent a fair and reasonable reflection of the local market.
- 5.43. However, where possible, to further increase accuracy of assumptions on build rates, proactive discussions were undertaken with landowners, land promoters and developers regarding build-rates on specific sites, to ensure that Shropshire Council can have significant confidence that the assumptions for build rates are realistic.

Sites with Planning Permission as at 31st March 2019 (Appendices A and B)

- 5.44. The NPPF states that: *"To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*
- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*

*b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years*²³.

- 5.45. Consistent with the NPPF, Shropshire Council considers that the majority of sites with an extant Planning Permission can be considered deliverable and are therefore suitable for inclusion within the first five years of the housing land supply. Where the extant Planning Permission is an outline consent for major development, the sites deliverability has been documented within Appendix B.
- 5.46. To ensure the robustness of this assessment of housing land supply, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission will not be delivered in the five year period. This 10% non-delivery rate is an approach utilised by many Local Planning Authorities; is in line with standard industry practice; and was endorsed by the SAMDev Plan Inspector within her report.
- 5.47. Ultimately there is no mandatory requirement for a non-delivery rate to be applied to sites with Planning Permission within the housing land supply. Shropshire Council considers that the use of a consistent 10% non-delivery rate is appropriate and represents a robust approach to variations in the market and other factors that might inhibit development and ensures a comprehensive and consistent assessment of housing land supply.
- 5.48. Shropshire Council recognises that some sites will take longer than five years to build out, therefore the number of dwellings expected to be completed annually on deliverable land has been informed by the 'standard' assumptions on lead-in times and build rates – refined through proactive discussions with landowners, land promoters and developers where possible. Where development of the sites is expected to take more than five years to complete, only the equivalent part of the site is included within the first five years of the housing land supply.
- 5.49. These sites are identified within Appendix A and B of this document.

Sites with a Prior Approval decision as at 31st March 2019 (Appendix C)

- 5.50. Sites with Prior Approval are comparable to sites with detailed Planning Permission.
- 5.51. As such, similar to sites with Planning Permission, Shropshire Council considers that the majority of sites with an extant Prior Approval decision (where the decision is that either Prior Approval is not required or is approved) can be considered deliverable and are therefore suitable for inclusion within the first five years of the housing land supply.
- 5.52. This is consistent with Governments stated intention when they introduced amendments to Permitted Development Rights, for example: *“under new Class MB agricultural buildings will be able to change to up to three dwelling houses (C3), and carry out associated building works, so that rural businesses can diversify **while increasing housing supply**”*²⁴ (my emphasis).
- 5.53. However, similar to sites with Planning Permission, it is recognised that a small proportion of sites with a Prior Approval decision (where the decision is that either

²³HCLG (2019), NPPF – Annex 2: Glossary

²⁴Explanatory Memorandum to the Town and Country Planning (General Permitted Development (Amendment and Consequential Provisions) (England) Order 2014

Prior Approval is not required or is approved) may not be implemented. With this consideration in mind and to ensure the robustness of this assessment, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on sites with Prior Approval will not be delivered in the five year period.

5.54. These sites are identified within Appendix C of this document.

Sites with a 'resolution to grant' as at 31st March 2019 (Appendices D)

5.55. In some cases Shropshire Council has 'resolved to grant' Planning Permission on a site, subject to the signing of a S106 Legal Agreement. Selected sites with a 'resolution to grant' have been included in the housing supply as they are considered to be deliverable (as demonstrated by the fact that they have sufficiently progressed to the point where a Planning Application has been submitted and a 'resolution to grant' the application has been reached).

5.56. When considering the deliverability of sites with a 'resolution to grant', Shropshire Council has exercised caution in order to ensure that its assessment of the housing land supply is robust. Therefore sites have only been considered deliverable where they comply with one or more of the following criteria:

- The site subject to the Planning Application is an existing Local Plan site or proposed SAMDev Plan site.
- The site subject to the Planning Application is located within a settlement development boundary and the settlement has been identified as a suitable location for infill/windfall development within the SAMDev Plan.
- The site subject to the Planning Application is for affordable housing, rural workers housing or an agricultural workers dwelling.
- The site subject to the Planning Application is for the conversion of an existing building, such as a barn.
- The site subject to the Planning Application is for the redevelopment of a select number of sustainable brownfield sites.
- The site subject to the Planning Application had a resolution to grant subject to completion of a S106 Legal Agreement at the 31st March 2019 and has subsequently been approved.

5.57. Furthermore, for consistency, where the 'resolution to grant' relates to outline consent for major development, the sites deliverability has been further documented.

5.58. However, despite this robust approach to filtering Planning Applications with a 'resolution to grant', it is recognised that not all 'resolution to grant' sites will eventually have a successfully signed S106 Legal Agreement and be implemented. Consequently, Shropshire Council has again applied a very cautious assumption that 10% of deliverable dwellings on sites with a 'resolution to grant' Planning Permission will not be delivered in the five year period.

5.59. **It should be stressed, of course, that inclusion of a Planning Application with a 'resolution to grant' within this assessment of Housing Land Supply is without prejudice to the completion of the S106 Legal Agreement and final Planning Application decision.**

5.60. These sites are identified within Appendix D of this document.

Sites allocated for development within the Development Plan (Appendix E)

5.61. Within Shropshire, strategic locations for development were identified in the adopted Core Strategy and sites have been allocated for development within the SAMDev Plan. For further information on the relationship between these two documents, please refer to Chapter 3: Housing Land Requirement.

Sustainable Urban Extensions (SUE's)

5.62. The Core Strategy identifies Sustainable Urban Extensions (SUE's) in Shrewsbury and Oswestry (Core Strategy Policies CS2 and CS3 respectively) as strategic locations for growth. These SUE's are summarised in Table 8:

Table 8: Shropshire Sustainable Urban Extensions

Location	Name	Status
Shrewsbury	Shrewsbury South SUE	<ul style="list-style-type: none"> A Full Planning Application (13/00893/FUL) for 291 dwellings (phase 1 of this Shrewsbury South SUE) was approved on the 9th May 2014, with development commencing on the 27th May 2014. Work is progressing at pace (144 dwellings were completed as at the 31st March 2019). An Outline Planning Application (14/04428/OUT) was approved on the second phase of this site on the 23rd June 2015. A series of Reserved Matters Applications for engineering works; construction of the access road; and the location of the attenuation ponds were granted in March; May; and September 2016. Engineering works have now commenced; the balancing pond formed; and multiple points of access to the site established. Reserved Matters Application (17/06149/REM) granted in April 2018 for 164 dwellings and development of these dwellings has commenced. Reserved Matters Application (19/00048/REM) granted post 31st March 2019 for 49 dwellings. Reserved Matters Application (19/04460/REM) pending consideration for 175 dwellings. There are expected to be at least three, possibly four developers on this site, however Shropshire Council have been very cautious in its lead-in time and delivery rate assumptions. A further Full Planning Application (16/02618/FUL) for the third and final phase of the SUE (159 dwellings) was approved on the 19th December 2016. Work is progressing at pace (44 dwellings were completed as at the 31st March 2019). Forecasted completion rates for this site are very likely to be overly cautious.
Shrewsbury	Shrewsbury West SUE	<ul style="list-style-type: none"> An Outline Planning Application (14/00246/OUT) submitted by David Wilson Homes and Jennings Estates Ltd was granted on the 13th September 2019 for 296 dwellings. Forecasted completion rates for this site are very likely to be overly cautious.
Oswestry	Eastern Gateway SUE	<ul style="list-style-type: none"> An Outline Planning Application (16/02594/OUT) is pending decision having been submitted by J Ross Developments Ltd for up to 600 dwellings covering two phases of the Oswestry SUE. Another Outline Planning Application (17/06025/OUT) is pending consideration having been submitted by Jennings Estates Ltd for up to 150 dwellings on another phase of the Oswestry SUE. We understand that Reserved Matters Applications will follow grant of these outline consents and that the developers are very keen to commence development on the site. Cautious assumptions on lead-in times have been produced identifying commencement in 2021/22.

5.63. The latest information available has been drawn upon to assess the deliverability (including lead-in times and delivery rates) of each of the SUE's as part of this assessment of the housing land supply in Shropshire.

Other Allocated Sites

5.64. The adopted SAMDev Plan identifies further housing land allocations, which together with other sources of housing land supply are sufficient to ensure the delivery of the agreed Core Strategy vision and housing requirements.

Deliverability of Allocations

5.65. The NPPF states that: *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”²⁵.

5.66. Consistent with this definition of deliverable, Shropshire Council has taken a cautious approach to the inclusion of SAMDev Plan allocations within the first five years of the housing land supply, only including those which are considered to be available now, offer a suitable location for development now, and are achievable with a realistic prospect that housing will be delivered on the site within five years. The availability, suitability and achievability of allocations has been documented within Appendix E.

5.67. Furthermore, only the numbers of homes that are considered deliverable within five years are counted, which in many cases is considerably less than the sites' full capacity. Deliverability has been informed by 'standard' lead in times and build rates identified for this assessment, refined through pro-active discussions with landowners, land promoters and developers to ensure that Shropshire Council can have significant confidence that assumptions for each site are realistic.

5.68. To ensure the robustness of this assessment, a very cautious assumption that 10% of deliverable dwellings on Allocated Sites will not be delivered in the five year period.

5.69. Please Note: It must be stressed, of course, that inclusion of strategic locations identified in the Core Strategy and SAMDev allocations in the housing land supply is without prejudice to the Development Plan process or the determination of any planning application for the site.

5.70. These sites are identified within Appendix E of this document.

²⁵HCLG (2019), NPPF – Annex 2: Glossary

Sites from the Strategic Land Availability Assessment (SLAA) (Appendix F)

- 5.71. Within Shropshire, windfall development on unallocated sites forms a significant proportion of all development that takes place. Indeed, in 2018/19 around 70% of the total housing completions occurred on windfall sites.
- 5.72. The Strategic Land Availability Assessment (SLAA) is a technical assessment of the suitability; availability; and achievability (including viability) of land for housing and employment development. The SLAA considers sites and broad locations for residential development where they are capable of delivering 5 or more dwellings. Generally, sites of less than 0.2 hectares are unlikely to achieve these thresholds.
- 5.73. The SLAA was published in late 2018, following a call for sites in early 2017. In excess of 2,000 sites and broad location were included within the assessment which will inform the ongoing Local Plan Review.
- 5.74. As the SLAA assessment includes consideration of both sustainability (in accordance with the NPPF); and the suitability, availability and achievability (including viability) of sites, consistent within the definition of deliverability, it is considered reasonable to include the accepted sites which have an expected yield in the plan period, within the housing land supply.
- 5.75. However, to ensure further robustness, a full site by site review has been undertaken of SLAA sites as part of this assessment of housing land supply and only those where the information available gives confidence that the sites are deliverable, have been included within the first five years of the housing land supply. Those sites considered to be developable within the plan period have been included within the housing land supply for the remainder of the plan period.
- 5.76. This review also included consideration of any updated information regarding site capacity and build rates - reflecting feedback from relevant site promoters, developers and/or agents.
- 5.77. Around 85 sites are included within the housing land supply of which around 40 sites are considered deliverable within the next five years.
- 5.78. To ensure the robustness of this assessment, a very cautious assumption that 10% of deliverable dwellings on SLAA sites will not be delivered in the five year period.
- 5.79. Please Note: The SLAA database is continuously updated. Appendix F includes those SLAA sites from the current active SLAA database that are considered likely to be delivered within the next five years or developable within the plan period. It should be noted that SLAA sites represent only those sites which the Council are aware of and are included within the SLAA database. In reality, there is likely to be a significant amount of additional site opportunities within the development boundaries of identified settlements.
- 5.80. **It should be stressed, of course, that inclusion of a SLAA site within this assessment of Housing Land Supply is without prejudice to the determination of any planning application for that site.**

Affordable Housing Sites Including Homes England (HE) Funded Sites (Appendix G)

- 5.81. Policies CS5 and CS11 of the Core Strategy; Policy MD7a of the SAMDev Plan; and the supplementary guidance within the accompanying Type and Affordability of Housing Supplementary Planning Document (SPD), support the provision of **affordable housing**, including on sites outside settlement development boundaries

and in rural hamlets as an exception to normal planning policies. Furthermore, the Council has consistently enabled such exception sites to come forward over the years, with great success.

- 5.82. A detailed review of affordable housing sites has been undertaken for this statement, with many such sites being included within the list of sites with Planning Permission; a Planning Application with a 'resolution to grant' or a site submitted to the SLAA and considered deliverable or developable.
- 5.83. However, there are a limited number of sites that Shropshire Council is aware of, on which schemes are being progressed and applications for Homes England (HE) funding have/will be submitted which do not yet have a Planning Permission/Planning Application with a 'resolution to grant' or were not submitted for consideration within the SLAA.
- 5.84. Shropshire Council has therefore undertaken a separate appraisal of these sites. Those which are considered deliverable have been included within this assessment of housing land supply. These sites are identified within Appendix G of this document.
- 5.85. **Please Note:** Shropshire Council has a close working relationship with Affordable Housing providers. We understand that there is a long lead-in process to taking forward an Affordable Housing scheme, particularly where it is subject to HE funding – which often also requires specific delivery timescales. Sites that have progressed to the point of applying for funding have had significant pre-application and community consultation, consequently the Affordable Housing providers and Shropshire Council have confidence that the sites that are considered deliverable within this assessment will come forward within the 5 year period.
- 5.86. To ensure the robustness of this assessment, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on affordable housing sites including HE funded sites will not be delivered in the five year period.
- 5.87. **However, it should be stressed, of course, that the inclusion of affordable housing sites including HE funded sites within this assessment of Housing Land Supply is without prejudice to the determination of any planning application for that site.**

Windfall Sites (Appendix H)

- 5.88. In addition to the larger SLAA sites previously considered, there is a need to take into account individual and small housing schemes. Small scale windfall sites of less than five dwellings have always represented a significant component of the housing land supply in Shropshire, and it is anticipated that this will remain the case.
- 5.89. Indeed, the Local Plan recognises the importance of windfall development in Shropshire and makes allowances for appropriately located windfall sites (where they accord with the policies within the Local Plan). This supports the conclusion that windfall development does and will continue to represent an important part of the housing land supply.
- 5.90. Furthermore, the average completion rate on all small scale windfall sites of less than 5 dwellings over the plan period thus far (2006/07-2018/19), is some 382 dwellings per annum. The actual rate for 2018/19 was some 390 dwellings. This again supports the conclusion that windfall development does and will continue to represent an important part of the housing land supply.

- 5.91. The importance of small scale windfall housing in Shropshire is not surprising given that Shropshire is a large rural County containing the town of Shrewsbury, 18 other smaller settlements identified as market towns or key centres; and hundreds of other villages and hamlets. Consequently there is a constant and significant recycling of previously developed land; significant numbers of infill developments; high numbers of conversions of barns and other rural buildings; and high uptake of affordable housing under the 'build your own' affordable housing scheme (supported by Shropshire Council within Policies CS5 and CS11 of the Core Strategy; MD7a of the SAMDev Plan; and supplementary guidance within the Type and Affordability of Housing SPD).
- 5.92. The above factors therefore endorse the inclusion of a very cautious 299 dwellings per year, for years 4 and 5 of the supply.

Lapsed Planning Permission (Appendix I)

- 5.93. Often sites that have previously secured Planning Permission where the permission is not subsequently implemented within permitted timescales remain developable. Specifically, in many circumstances the site remains suitable for development and available for development and will be achievable later within the plan period, particularly as market conditions continue to improve.
- 5.94. Consequently, Shropshire Council has undertaken an assessment of sites with capacity for more than five dwellings (as it is anticipated that sites of less than 5 dwellings would be included within the windfall allowance, as identified in Appendix H of this document) in order to determine whether they are suitable for inclusion within the housing land supply.
- 5.95. Whilst none of these sites have been included within the first five years of the housing land supply, many have been deemed suitable for inclusion within the latter part of the plan period. These sites are identified within Appendix I of this document.
- 5.96. **However, it should be stressed, of course, that inclusion of a site with a lapsed Planning Permission within this assessment of Housing Land Supply is without prejudice to the determination of any future planning application for that site.**

6. Housing Land Supply – Calculation

Shropshire Five Year Housing Land Requirement

- 6.1. Using the methodological approach outlined in Chapters 3 and 4, the housing requirement for the five year period starting on the 1st April 2019 has been calculated.
- 6.2. Table 9 provides a summary of the calculation of the five year housing requirement:

Table 9: Summary of Five Year Housing Requirement

Category	Core Strategy Requirement	FOAHN Housing Need
(A) 5 Year Requirement:	2019/20	1,390
	2020/21	1,390
	2021/22	1,530
	2022/23	1,530
	2023/24	1,530
	Total	7,370
(B) Under-Delivery: (from earlier in the plan period)	539	0
(C) Buffer: (5% buffer consisting of supply brought forward from later in the plan period to ensure choice and competition. Applied to both the requirement and past under-delivery)	395	318
(D) Total Requirement (A) + (B) + (C):	8,304	6,668

Shropshire Five Year Housing Land Supply

- 6.3. Using the methodological approach outlined in Chapter 5, a comprehensive assessment of housing land in Shropshire has been undertaken.
- 6.4. Table 10 provides a summary of the housing land supply in Shropshire considered deliverable within the next five years, as at the 1st April 2019:

Table 10: Summary of deliverable housing land supply (as at 1st April 2019)

Category	Net Dwellings
(A) Dwellings on sites with Planning Permission*	7,754
(B) Dwellings on sites with Prior Approval*	115
(C) Selected sites with a 'resolution to grant'	269
(D) Dwellings on Allocated Sites estimated to be completed within 5 years*	1,322
(E) SLAA Sites deliverable within 5 years*	301
(F) Emerging Affordable Housing Sites*	307
(G) Windfall Sites**	598
Total: (A) + (B) + (C) + (D) + (E) + (F) + (G)	10,666

*A very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; allocation within the adopted Local Plan; identified within the SLAA Sites; and Emerging Affordable Housing Sites will not be delivered in the five year period has been applied to figures in this table.

**Based on historic delivery rates and expected future trends.

- 6.5. Shropshire Council includes a very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; allocation within the adopted Local Plan; identified within the SLAA Sites; and Emerging Affordable Housing Sites will not be delivered in the five year period. This assumption is reflected within the figures provided within Table 10 of this document.
- 6.6. The actual number of dwellings considered deliverable in the next 5 years in each of these categories before this deduction is applied are:
- Dwellings on sites with Planning Permission: 8,615.
 - Dwellings on sites with Prior Approval: 128.
 - Dwellings on selected sites with a 'resolution to grant' Planning Permission: 299.
 - Dwellings on selected sites Allocated for Development: 1,469
 - Dwellings on selected SLAA sites: 334.
 - Dwellings on sites seeking Homes England (HE) funding: 341.
- 6.7. The sites which make up the various components of the five year housing land supply as at the 1st April 2019 are included within Appendices A-I of this statement.

Comparison: Shropshire Five Year Housing Land Requirement & Supply

- 6.8. Table 11 brings together the five year housing land requirement and the results of the assessment of the five year housing land supply in Shropshire.
- 6.9. This table confirms that Shropshire Council is able to demonstrate a five year housing land supply as at the 1st April 2019.

Table 11: Comparison: Five Year Housing Requirement and Supply

Category	Core Strategy Requirement	FOAHN Housing Need
Total Requirement:	8,304	6,668
Total Supply:	10,666	10,666
Over / Under Provision:	+2,362	+3,998
Number of Years Supply:	6.42	8.00

7. Housing Land Supply – Conclusion

Five Year Housing Land Supply

- 7.1. This comprehensive review of the housing land supply establishes that there are sufficient deliverable sites to allow for the provision of five years' worth of housing (plus an additional buffer moved forward from later within the plan period, to allow for choice and competition in the market), based on the identified housing requirement for Shropshire. Indeed there is currently **6.42 years supply of deliverable housing land against the housing requirement within the adopted Core Strategy (2011) and 8.00 years supply of deliverable housing land against the housing need identified using Governments standard methodology.**

Conclusion

- 7.2. Shropshire Council, through its Local Plan has positively planned for an ambitious but deliverable level of housing development to 2026. This trend is continuing with ongoing work on the Local Plan Review which is also proposing an ambitious but deliverable housing requirement.
- 7.3. Furthermore, the Council was involved in the production of the Marches Local Enterprise Partnership's (LEP) High Level Planning and Housing Statement "Poised for Growth"²⁶. As these documents make clear, Shropshire Council is committed to creating an environment for successful housing delivery, and is working with the development industry and local communities to ensure that sustainable development is brought forward.
- 7.4. The reality is there is a significant and growing supply of housing land in Shropshire, sufficient to demonstrate a housing land supply to meet the housing land requirement; address past under-delivery; and allow for necessary buffers to the supply.
- 7.5. However, whilst Shropshire Council is taking a positive approach to planning for housing and there is a significant amount of land available for housing development, ultimately it is the responsibility of the development industry to deliver sustainable development, consisting of the right types of housing, in the right locations and within the right timescales.

²⁶www.shropshire.gov.uk/marcheslepplanninghousingstatement/index.html

Five Year Housing Land **Supply Statement** **Annexes**

Annex 1. Housing Land Supply across the Plan Period

- A1.1. In addition to the assessment of the housing land supply available over the next five years, Shropshire Council has also undertaken a wider assessment of deliverable and developable sites, in order to determine whether there is sufficient housing land available to deliver the identified housing requirement (27,500 dwellings).
- A1.2. In order to ensure a robust assessment, the methodology used for appraising housing land supply across the total plan period is consistent with that used for the appraisal of sites within the first five years.
- A1.3. Thus far, between 2006/07 and 2018/19, 16,531 dwellings have been completed within Shropshire. Consequently, the outstanding housing requirement for Shropshire is some 10,969 dwellings.
- A1.4. Table 12 provides a summary of the housing supply in Shropshire, up to the end of the plan period (2026), compared to the outstanding housing requirement in Shropshire:

Table 12: Housing Land Supply across the Plan Period

Category		Net Dwellings
Supply:	<i>Years 1 - 5 Supply:</i>	10,666
	<i>Years 6 - 7 Supply:</i>	3,123
	Total:	13,789
Outstanding Requirement:		10,969
Over Provision:		+2,820
Percentage Over Provision:		+25.71%

- A1.5. Table 12 illustrates that there is already sufficient deliverable or developable housing land identified in Shropshire to meet the total outstanding housing requirement within the plan period.
- A1.6. Indeed, there is currently sufficient housing land to deliver more than 13,750 dwellings over the next 8 years. Current supply therefore exceeds the remaining housing requirement by a significant amount (25.71%). Furthermore supply is only likely to increase given the cautious approach that has been taken within this assessment, and in particular the approach taken to the inclusion of windfall sites within the housing land supply.
- A1.7. The sites which make up the various components of the housing land supply over the plan period at the 1st April 2019 are also included within Appendices A-I of this statement.

Annex 2. Housing Commitments & Completions

Introduction

A2.1. The information resulting from the assessment of the housing land supply for Shropshire can also be utilised to determine the number of dwellings (net) committed and completed by settlement in Shropshire.

Commitments and Completions

A2.2. As it is recognised that this is an area of interest for these communities, a summary of the net commitments and completions is provided in Table 13: Market Towns; Table 14: Hubs and Clusters; and Table 15: Wider Rural Area:

Table 13: Housing Commitments and Completions in the Market Towns

Settlement	Completions (2006/07 – 2018/19)	Commitments	
		Sites with Planning Permission or Prior Approval as at the 31 st March 2019	Allocations without Planning Permission as at the 31 st March 2019
Albrighton	66	171	77
Bishops Castle	84	62	40
Bridgnorth	757	38	500
Broseley	213	72	0
Church Stretton	213	62	37
Cleobury Mortimer	308	43	7
Craven Arms	110	48	325
Ellesmere	395	348	0
Highley	181	47	0
Ludlow	480	802	0
Market Drayton	502	474	0
Minsterley & Pontesbury	211	157	14
Much Wenlock	127	21	0
Oswestry	996	116	1,127
Shifnal	1,106	573	0
Shrewsbury	4,371	3,019	798
Wem	426	72	100
Whitchurch	570	748	60
Total:	11,116	6,883	3,085

**The completions in each of the market towns include exception development which contributes to the housing requirement for the town.
Please Note: The figures provided are net.*

Total		1,619	1,920	517

**The completions in each of the community hubs and clusters include exception development which contributes to the housing requirement for the community hub or cluster. A11 completions as at 31st March 2019 have been excluded to offset the exclusion of 11 commitments when identifying the SAMDev Housing Requirement.*

^BThe 116 dwellings outstanding (as at 2013) on Planning Permission OS/05/13887/REM (Almond Avenue, Gobowen) were excluded from consideration when identifying the SAMDev Housing Requirement. All dwellings are now completed however the total number of units completed across the development increased to 126. {Planning Permission OS/05/13887/REM and 14/00568/FUL (Almond Avenue, Gobowen) therefore 126 dwellings removed from figures, as the site was excluded from consideration when identifying the SAMDev Housing Requirement}.

^C42 completions as at the 31st March 2019 have been excluded to offset the exclusion of 42 commitments when identifying the SAMDev Housing Requirement.

^DThe 115 dwellings outstanding (as at 2013) on Planning Permission 15/05307/REM (Gro Continental Site, Prees) (Outline Consent 09/00111/OUT) were excluded from consideration when identifying the SAMDev Housing Requirement.

{6 completions and 109 commitments on Planning Permission 15/05307/REM (Gro Continental Site, Prees) (Outline Consent 09/00111/OUT) removed, as excluded from consideration when identifying the SAMDev Housing Requirement}.

Please Note: The figures provided are net.

Table 15: Housing Commitments and Completions in the Rural Area

	Completions (2006/07 – 2018/19)	Planning Permissions (as at the 31st March 2019)
Wider Rural Area	3,796	1,345

*The completions in the rural area exclude exception development which contributes to the housing requirement of market towns; or community hubs or clusters.

**The completions in the rural area includes completions which occurred in hubs and clusters prior to the identification of housing guidelines for these areas, as these have not been counted towards the achievement of the identified housing guidelines.

*** The commitments and completions include those dwellings excluded from community hub or cluster settlements guidelines.

Please Note: The figures provided are net.

Appendix B. Deliverability of Sites for Major Development with Outline Planning Permission as at 31st March 2019

Appendix B: Deliverability of Sites for Major Development with Outline Planning Permission as at 31st March 2019

Planning Application	Address	Date of Decision	Deliverability
13/01854/OUT	Residential Development Land West Of Mill Green, Knighton, Powys	27/01/2015	Complex brownfield site crossing Local Authority and national boundaries (completions forecast on the site reflect the extent of development anticipated on the element of the site in Shropshire). Reflecting this complexity 5 years was allowed for submission of the Reserved Matters Application. Site is considered deliverable towards the end of the five year period.
14/00030/OUT	Davro Iron & Steel Co Ltd, Ridgewell Works, Stourbridge Road, Wootton, Bridgnorth, WV15 6ED	18/07/2016	Full Planning Application (18/05486/FUL) pending consideration for 18 dwellings on the site.
14/04019/OUT	Proposed Development Land To The East Of Avenue Road, Broseley, Shropshire	31/08/2016	Consent granted at Planning Appeal. Appellants confirmed deliverability of the site during the appeal process. Reserved Matters Application (19/03639/REM) pending consideration.
14/04891/OUT	Rosewood Pet Products Ltd, 45 Coalport Road, Broseley, Shropshire, TF12 5AN	08/09/2015	Reserved Matters Application (18/03235/REM) pending decision for development of the site.
14/04047/OUT	Proposed Marina South Of Canal Way, Ellesmere, Shropshire	20/12/2016	A strategic site to be delivered in phases. Reserved Matters Application (19/001187/REM) received for the first phase (50 dwellings) of residential development.
13/03862/OUT	Proposed Residential Development South Of A49, Ludlow, Shropshire	30/11/2015	Reserved Matters Application (18/05461/REM) pending consideration for development of the site.
14/01012/OUT	Development Land North Side Of Sheet Road, Ludlow, Shropshire	12/09/2016	Full Planning Application for formation of the access road and attenuation pond (17/05983/FUL) granted. Reserved Matters Application (19/02741/REM) pending consideration for 68 dwellings.
14/02846/OUT	Coach Depot, Fishmore Road, Ludlow, Shropshire, SY8 2LU	07/02/2017	Reserved Matters Application (19/00242/REM) recently refused due to issues including design, layout, open space and surface water drainage. However it is considered that a deliverable scheme can be achieved on the site and the submission of a Reserved Matters Application by a development company support the conclusion that the site is deliverable in the next 5 years.
14/04608/OUT	Proposed Residential Development Land At Foldgate Lane, Ludlow, Shropshire	10/11/2016	Reserved Matters Application (18/02413/REM) pending consideration for development of the site.
16/03096/OUT	Proposed Residential Development East Of Fishmore Road, Ludlow, Shropshire	19/02/2019	Reserved Matters Application (19/02060/REM) pending consideration for 67 dwellings.

Allocation		Availability Assessment				Summary	Years 1-5: Forecasting (at 31/03/2019)			Years 6-7: Forecasting (at 31/03/2019)			Beyond Plan Period							
Allocation Reference	Address	Suitability	Availability	Achievability	Viability		Net Dwellings	Net Completions	Net Outstanding	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
LYD009	Former Garage, Lydbury North	Allocated site.	Site promoted through the site allocation process. Site in Clun catchment area, however phosphate stripping technology designed to reduce phosphate by 75% from sewage treatment works discharging to the Clun river catchment now installed at the Clun sewage works. Single landowner. Garage in short term storage use - no legal impediment.	Site promoted through the site allocation process. Site in Clun catchment area, however phosphate stripping technology designed to reduce phosphate by 75% from sewage treatment works discharging to the Clun river catchment now installed at the Clun sewage works. Former garage site, so ground contamination requiring remediation, considered achievable.	Contaminated site. Viability addressed by type and layout of residential development.	Small brownfield site within settlement. Phosphate stripping technology designed to reduce phosphate by 75% from sewage treatment works discharging to the Clun river catchment now installed at the Clun sewage works. Former garage site, so ground contamination requiring remediation, considered achievable. Viability addressed by type and layout of residential development. Likely to be delivered outside the five year period.	2	0	2						0	2		2		0
LYD011	Land adjacent to Church Close, Lydbury North	Allocated site.	Site promoted through the site allocation process. Site in Clun catchment area, however phosphate stripping technology designed to reduce phosphate by 75% from sewage treatment works discharging to the Clun river catchment now installed at the Clun sewage works. Outline Planning Application granted for 4 dwellings post 31st March 2019.	Site promoted through the site allocation process. Site in Clun catchment area, however phosphate stripping technology designed to reduce phosphate by 75% from sewage treatment works discharging to the Clun river catchment now installed at the Clun sewage works. Outline Planning Application granted for 4 dwellings post 31st March 2019.	No known viability concerns.	Small greenfield site on edge of settlement. Phosphate stripping technology designed to reduce phosphate by 75% from sewage treatment works discharging to the Clun river catchment now installed at the Clun sewage works. Highway junction improvement required. Outline Planning Application granted for 4 dwellings post 31st March 2019. Likely to be delivered.	4	0	4				4		4			0		0
BRID001/BRID020b	Land North of Wenlock Road, Tasley, Bridgnorth	Allocated site.	Site promoted through the site allocation process. New junction onto A458 required. Linked to relocation of Livestock Market although redevelopment of BRID020b (and associated BRID020a) not dependent on the relocation happening in advance. The intention is to first develop BRID020b to provide the capital for further works. Residential development on this component of the site to progress before the relocation of the Livestock Market. Single major landowner (Tasley Estates) including site for relocation of Livestock Market.	Site promoted through the site allocation process. Site promoter is the principal employment land/buildings provider in Bridgnorth with track record of delivery.	Major project but housing cross-subsidises infrastructure investment, relocation of livestock market and provision of serviced employment land. Residential development on part of this site (BRID020b) can occur prior to the relocation of the livestock market.	Site on edge of town including redevelopment of Livestock Market site - sustainable development with no fundamental planning issues affecting suitability. New junction onto A458 required. Whilst linked to relocation of Livestock Market, redevelopment of BRID020b (and associated BRID020a) not dependent on the relocation happening in advance. Site promoted by principal employment land/buildings provider in Bridgnorth with track record of delivery. Detailed site investigations in hand prior to submission of planning application. Likely to be delivered over years 3-6. Build rates are informed by the deliverability statement produced by the landowner.	200	0	200			20	63	63	146	54		54		0

BRID020a	Land North of Church Lane, Tasley, Bridgnorth	Allocated site.	Site promoted through the site allocation process. Access to the site through BRID001/BRID020b. The intention is to first develop BRID020b to provide the capital for further works. Residential development on this component of the site to progress before the relocation of the Livestock Market. Single major landowner (Tasley Estates).	Site promoted through the site allocation process. Access to the site through BRID001/BRID020b. Site promoted by principal employment land/buildings provider in Bridgnorth with track record of delivery.	Major project linked to BRID001 and BRID020b but housing cross-subsidises infrastructure investment, relocation of livestock market and provision of serviced employment land. Residential development on this site can commence before relocation of the livestock market.	Site on edge of town - sustainable development with no fundamental planning issues affecting suitability. Access to the site through BRID001/BRID020b. Intention is to commence BRID020b, with BRID001 and BRID020a following on. Works can commence prior to the relocation of the Livestock Market. Single major landowner (Tasley Estates) including site for relocation of Livestock Market. Housing cross-subsidises infrastructure investment, relocation of livestock market and provision of serviced employment land. Likely to be delivered from year 6 onwards, following BRID20b and BRID001. Build rates are informed by the deliverability statement produced by the landowner.	300	0	300						0	9	63	72	228	228
DITT005	Land opposite 6 Station Road, Ditton Priors	Allocated site.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Applications granted for 16 dwellings.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Applications granted for 16 dwellings.	No known viability concerns.	Straightforward small greenfield site in sustainable settlement. Outline and Reserved Matters Planning Applications granted for 16 dwellings. High likelihood of delivery.	0	0	0						0			0		0
NEE001	The Pheasant Inn, Neenton	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.	0	0	0						0			0		0
CSTR018	School Playing Fields, Church Stretton	Allocated site.	Shropshire Council owned school playing field – development dependent on provision of replacement facilities involving land exchange. Application pending consideration on the site. Revised scheme layout indicates capacity for 37 dwellings.	Site promoted through the site allocation process. Revised scheme layout indicates capacity for 37 dwellings.	Dependent on land exchange values, cost of provision of replacement facilities and housing yield. Discussions suggest that the development will be viable.	Shropshire Council owned school playing field – development dependent on provision of replacement facilities involving land exchange. Application pending consideration on the site. Revised scheme layout indicates capacity for 37 dwellings.	37	0	37			20	17	37				0		0
CSTR019	Battlefield to rear of Oaks Road/Alison Road, Church Stretton	Allocated site.	Site promoted through the site allocation process. Two landowners - agreement in place. No known impediments to the availability of the site. Outline and Reserved Matters Planning Permissions granted on this site for 43 dwellings.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Permissions granted on this site for 43 dwellings.	Outline and Reserved Matters Planning Permissions granted on this site for 43 dwellings.	Greenfield site on the edge of the settlement, within the settlement boundary. Outline and Reserved Matters Planning Permissions granted on this site for 43 dwellings.	0	0	0						0			0		0
CMO002	Land off Tenbury Road, Cleobury Mortimer	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Outline and Reserved Matters Planning Applications granted for 22 dwellings.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Applications granted for 22 dwellings.	No known viability concerns.	Straightforward small greenfield site on edge of settlement, within the settlement boundary. Single land ownership. No fundamental planning issues. Parish Council support. Outline and Reserved Matters Planning Applications granted for 22 dwellings. Likely to be delivered.	0	0	0						0			0		0

Appendix E: Sites allocated for development within the Development Plan

Allocation		Availability Assessment				Summary	Net			Years 1-5: Forecasting (at 31/03/2019)						Years 6-7: Forecasting (at 31/03/2019)			Beyond Plan Period	
Allocation Reference	Address	Suitability	Availability	Achievability	Viability		Dwellings	Completions	Outstanding	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
CMO005	Land at New House Farm, Cleobury Mortimer	Allocated site.	Site promoted through the site allocation process. Development subject to access off Tenbury Road or via adjoining site off Tenbury Road (CMO002).	Site promoted through the site allocation process. Adjacent allocation has reserved matters approval. Planning application expected shortly and build out expected to be completed within the 5 year period.	No major viability issues raised to date.	Straightforward small greenfield site on edge of settlement, within the settlement boundary. Single land ownership. No fundamental planning issues. Parish Council support. Likely to be delivered following completion of CMO002, which recently had Reserved Matters Approved.	7	0	7				7		7			0		0
KLT001	Land off Little Stocks Close, Kinlet	Allocated site.	Site promoted through the site allocation process. Part of site has been transferred to a Registered Social Landlord (RSL), the remainder is owned by the Estate. Planning Permissions granted on both aspects of the site and phase 1 has been built out. No known impediments to the availability of the site.	Site promoted through the site allocation process. Full Planning Application granted for 8 dwellings. Approved development has been completed. Outline and Reserved Matters Planning Applications granted for a further 15 dwellings. Likely to be delivered. Total site capacity 23 dwellings.	No known viability concerns.	Straightforward greenfield site on edge of settlement. Phase 1 subject to a Full Planning Application for 8 dwellings has been granted and completed. Phase 2 subject to Outline and Reserved Matters Planning Applications granted for 15 dwellings is considered likely to be delivered.	0	0	0						0			0		0
CRAV002	Land off Watling Street, Craven Arms	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.	0	0	0						0			0		0
CRAV003 & CRAV009	Land between Watling Street and Brook Road, Craven Arms	Allocated site.	Site promoted through the site allocation process. No developer involvement but willing landowner with track record of releasing land for development of the town.	Site promoted through the site allocation process. Indicative layout and other supporting information provided. Surface water flood risk affects part of combined site but can be accommodated through a SUDS scheme requiring all of CRAV009 for provision of swales and balancing ponds for flood storage capacity. Development linked to provision of northern highway access to town, and landowners to form part of delivery partnership.	Significant constraints but supporting information provided, therefore the site is still considered viable.	Greenfield site within settlement - sustainable development subject to widening of Watling Street and provision of new junction (landowners to form part of delivery partnership), retention of veteran trees and flood storage capacity provision. Site promoted with indicative layout and other supporting information. No developer involvement but willing landowner with track record of releasing land for development of the town. Town Council support. Likely to be delivered from 2022/23.	235	0	235				20	36	56	36	36	72	107	107
CRAV004 & CRAV010	Land off Watling Street East, Craven Arms	Allocated site.	Site promoted through the site allocation process. The site is now owned by a developer (Shropshire Housing Group) who are pursuing development of the site. Full Planning Application for phase 1 pending consideration.	Site promoted through the site allocation process. No highway access constraint at this point on Watling Street. No known impediments to the availability of the site. The site is now owned by a developer (Shropshire Housing Group) who are pursuing development of the site. Full Planning Application for phase 1 pending consideration.	Some viability risk resulting from archaeological interest, but earlier evaluation indicates no fundamental constraints - potential impact limited to reduction in site capacity.	Greenfield site on edge of settlement. Full Planning Application (18/04931/FUL) pending consideration for phase 1 of the development. It is anticipated that phase 2 will follow on from phase 1 of the development. Known archaeological interest not considered to raise fundamental concerns in view of earlier evaluation (1991). Town Council support. Likely to be delivered.	60	0	60		10	25	25		60			0		0

Appendix E: Sites allocated for development within the Development Plan

Allocation		Availability Assessment				Summary	Years 1-5: Forecasting (at 31/03/2019)						Years 6-7: Forecasting (at 31/03/2019)			Beyond Plan Period				
Allocation Reference	Address	Suitability	Availability	Achievability	Viability		Net Dwellings	Net Completions	Net Outstanding	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
CRAV024	Land adjoining Clun Road / Sycamore Close, Craven Arms	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site.	Site promoted through the site allocation process. No highway access constraint at this point on Watling Street. No developer involvement but willing landowner with track record of releasing land for development of the town.	No significant viability constraints.	Greenfield site within edge of settlement. Sustainable development. No fundamental planning issues. Town Council support. Likely to be delivered following other allocations in the town.	25	0	25						0			0	25	25

Appendix F. Sites from the Strategic Land Availability Assessment (SLAA)

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
ALB003	Caravan storage, Station Road, Albrighton	The site is suitable for residential development, subject to appropriate management of any physical, heritage and environmental constraints present. For instance provision of an appropriate access to the site and management of the sites relationship with the railway line (e.g. noise). Furthermore the site is located within proximity of several TPO's therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also in proximity of one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			6		0
BIS016	Field adj. Blunden Hall, Brampton Road, Bishop's Castle	The site is within a settlement boundary and so suitable for development in principle. Any proposed development design and layout should complement the adjacent employment allocation. The site lies within 300m of a Conservation Area and several Listed Buildings. Development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Effort should be made to retain mature trees and hedgerows on the site.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; viable and achievable. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			15		0
BIS020	Rear of surgery, Schoolhouse Lane, Bishop's Castle	Site is suitable for residential development subject to satisfactory access. The site is within 300m of a Scheduled Monument, a Conservation Area and several Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available in the future; viable; and achievable. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. The site is also considered suitable for residential development subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			13		0
BKL001	Field opposite the Junior School, Bucknell	The site is within the development boundary so development is acceptable in policy terms. Suitability is subject to appropriate management of any physical, heritage or environmental constraints present. For instance the site is in proximity to the River Redlake Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also within 300m of a Scheduled Monument, a Conservation Area and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	Shropshire Council Officers have investigated the availability of this site, but it remains unclear as to whether the site is available for this form of development. Therefore information gathered for the purpose of this study is unable to confirm that the site is available for this form of development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, available, viable and achievable (subject to any further necessary viability assessment). Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			44		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
BKL002	The Old Farm, Bucknell	The site is within the development boundary so development is acceptable in principle subject to material considerations. However, part of the site is within the River Redlake Wildlife Site, consequently development of this element of the site and an appropriate buffer is likely to lead to a significant adverse effect on one or more locally designated site(s) and as such is contrary to policy, therefore this part of the site is unsuitable for development. Additionally, part of the site is also within Flood Zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The suitability of the remainder of the site is subject to appropriate management of any physical, heritage and environmental constraints present. For instance part of the site is within and the remainder is in proximity of a Conservation Area. The site is also within proximity of a Scheduled Monument and one or more listed buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The element of the site that is not within a Local Wildlife Site is in proximity of this site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is available, achievable and viable. Whilst the site is located within the development boundary, there are a number of constraints that apply. This includes the fact that part of the site is within the River Redlake Wildlife Site, consequently development of this element of the site and an appropriate buffer is likely to lead to a significant adverse effect on one or more locally designated site(s) and as such is contrary to policy, therefore this part of the site is unsuitable for development. Additionally, part of the site is also within Flood Zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. Suitability of the site for open market residential development is therefore subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			60		0
CGD002	Land west of Broome Road, Clungunford	The site is located within an existing Community Cluster, specifically Clungunford within the Abcot, Beckjay, Clungunford, Hopton Heath, Shelderton and Twitchen (Three Ashes) Community Cluster. Within Clungunford appropriate development is limited to small scale infilling/conversion or larger development sites close to key community services on suitable sites within or adjoining the settlements. Part of the site now benefits from Planning Permission, the remainder of the site may be considered suitable for open market residential development consisting of small scale infilling, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance a small portion of the site is located within a conservation area and the remainder of the site is in proximity of this conservation area. The site is also in proximity of a scheduled monument and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The ability to provide an appropriate access is also subject to highway approval. Furthermore, Clungunford has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable. The site is located within an existing Community Cluster, specifically Clungunford within the Abcot, Beckjay, Clungunford, Hopton Heath, Shelderton and Twitchen (Three Ashes) Community Cluster. Within Clungunford appropriate development is limited to small scale infilling/conversion or larger development sites close to key community services on suitable sites within or adjoining the settlements. Part of the site now benefits from Planning Permission, the remainder of the site may be considered suitable for open market residential development consisting of small-scale infilling, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. Furthermore, Clungunford has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.						10			0	0	
CLU003	Land adjacent to The Hall, Vicarage Road, Clun	The site is within the development boundary so development is acceptable in policy terms, subject to material considerations such as the ability to suitably manage any physical, heritage or environmental constraints present. For instance the site is in a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is densely wooded, which will require due consideration. The site is also within 300m of a Scheduled Monument and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is in the Shropshire Hills AONB, therefore major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is within the development boundary so development is acceptable in policy terms, subject to a heritage assessment of the impact of development on the Conservation Area will be required. If this shows no adverse effect, or that any such effect can be adequately mitigated, the site's development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment. These include the site's location in the Shropshire Hills AONB; the wooded character of the site; and its proximity to a Wildlife Site, Scheduled Monument and one or more Listed Buildings.						2			0	0	
HPH001	Site 1 Land adjacent the railway line	The site is located within an existing Community Cluster, specifically Clungunford within the Abcot, Beckjay, Clungunford, Hopton Heath, Shelderton and Twitchen (Three Ashes) Community Cluster. Within Clungunford appropriate development is limited to small scale infilling/conversion or larger development sites close to key community services on suitable sites within or adjoining the settlements. Part of the site now benefits from Planning Permission, the remainder of the site may be considered suitable for open market residential development, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the site is in proximity of a Local Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. Furthermore, Clungunford has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable. The site is located within an existing Community Cluster, specifically Clungunford within the Abcot, Beckjay, Clungunford, Hopton Heath, Shelderton and Twitchen (Three Ashes) Community Cluster. Within Clungunford appropriate development is limited to small scale infilling/conversion or larger development sites close to key community services on suitable sites within or adjoining the settlements. Part of the site now benefits from Planning Permission, the remainder of the site may be considered suitable for open market residential development, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. Furthermore, Clungunford has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.						10			0	0	

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
HPH002	Site 2 Land adjacent the railway line	The site is located within an existing Community Cluster, specifically Clungunford within the Abcot, Beckjay, Clungunford, Hopton Heath, Shelderton and Twitchen (Three Ashes) Community Cluster. Within Clungunford appropriate development is limited to small scale infilling/conversion or larger development sites close to key community services on suitable sites within or adjoining the settlements. Part of the site now benefits from Planning Permission, the remainder of the site may be considered suitable for open market residential development, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. Furthermore, Clungunford has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable. The site is located within an existing Community Cluster, specifically Clungunford within the Abcot, Beckjay, Clungunford, Hopton Heath, Shelderton and Twitchen (Three Ashes) Community Cluster. Within Clungunford appropriate development is limited to small scale infilling/conversion or larger development sites close to key community services on suitable sites within or adjoining the settlements. Part of the site now benefits from Planning Permission, the remainder of the site may be considered suitable for open market residential development, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. Furthermore, Clungunford has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.						5			0		0
WBR008	Land at Bank Farm, Worthen	Agricultural buildings within an existing Community Cluster settlement, as such conversions/infilling may be appropriate subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance comments will be needed from highway department regarding highway access. The site is within 300m of several grade 2 listed buildings and a grade 1 listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. It is also proposed that Worthen will be a Community Hub, which may impact on suitability for other uses.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable (infilling/conversion); available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for open market residential development (infilling/conversion) is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. It is also proposed that Worthen will be a Community Hub, which may impact on suitability for other uses. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						5			0		0
BRD012	Land off Stourbridge Road, Bridgnorth	The site is considered developable subject to appropriate management of any physical, heritage and environmental constraints. For instance the ability to provide access is subject to Highway Officer advice. The site contains and is within proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within proximity of a Conservation and Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is not currently available but will become so in the future; that there is a willing landowner/developer; and no legal or ownership problems which could limit development beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically access to the site and mitigation of the impact of development on the trees subject to TPO protection both on the site and in proximity; and the Conservation and Listed Buildings within proximity. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			40		0
DNP005	Land north-west of South Road, Ditton Priors	The site is within the development boundary so development is acceptable in policy terms, subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance these include the presence of a Listed Building within the site the site's location in a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in the Shropshire Hills AONB, therefore major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable (subject to any further necessary viability assessment). The site is within the development boundary so development is acceptable in policy terms, subject to material considerations and management of any physical, heritage or environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment.						20			20		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period		
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total	
MVE002	site 2	<p>The site is located adjacent to an existing Community Cluster, specifically Morville is located within the Acton Round, Aston Eyre, Monkhopton, Morville and Upton Cressett Community Cluster Community Cluster. Within Morville open market residential development is limited to infilling, conversions and small groups of dwellings on suitable sites within or immediately adjoining the village. The housing guideline for the Community cluster is around 15 dwellings, current commitments and completions total around 28 dwellings (as at 31st March 2017). As such a small group of open market dwellings on the site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the site is located in proximity of a conservation area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The ability to provide an appropriate access is also subject to highway approval.</p> <p>however, Morville has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. BRO034	Adj. Brook Cottage, 4 Bridge Rd, Broseley	<p>Within development boundary so site suitable for development. Discussion will be needed with highway authority about vehicle access and Coal Authority regarding land conditions. The site is within 500m of an Ancient Woodland site. Development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 250m of 3 Local Wildlife Sites, so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 30m of a Veteran Tree/ tree protected by a Tree Preservation Order so development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is located within a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is within proximity of a World Heritage Site and a number of listed buildings so development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>The site has been promoted during the 2017 Call for Sites for residential development. Furthermore the site is within proximity of ancient woodland, therefore development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within proximity of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available; achievable; and viable (subject to any further necessary viability assessment). Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically its location within a Conservation Area and the AONB. If no significant adverse impacts on this assets was identified or if suitable mitigation is possible, the site's development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment.						0			5		0
CST008	Land at Woodbank House, Church Stretton	The site is within the Church Stretton development boundary so the principle of development is accepted. The site is located within the Shropshire Hills AONB. Major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 500m of an Ancient Woodland site. Development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 250m of a Wildlife Site. Development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is adjacent to a Conservation Area. Development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						6		0		0	
CRA001	Abattoir site, Craven Arms	A small part of the site are within Flood Zones 2 and/or 3. The area of the site outside this zone has potential for residential development (following the relocation of the existing abattoir) as it is located within the Craven Arms settlement boundary. This potential is subject to the appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 300m of a Conservation Area and several Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future. Specifically there is a stated aspiration within the current Development Plan to relocate the abattoir to the proposed Newington Food Park. This relocation will allow the redevelopment of the existing site, which will act as a catalyst for the redevelopment of the wider area.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available (following the relocation of the existing abattoir); achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate assessment and management of the impact on physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Such constraints include: Flood Zones 2 and/or 3; proximity to a Conservation Area and to several Listed Buildings. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0		26		0	
CRA029	Garage Corvedale Rd, Craven Arms	The site is a brownfield site within the development boundary. Suitable in principle for residential development. A positively designed scheme could enhance the site and its setting, which is a gateway into the town. Therefore the site is suitable subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is brownfield and in use as a garage, therefore there are potential contamination issues. The site is also in proximity of a conservation area and listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0		0		8	

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
HNN021	Off Netherton Lane, Highley	The site is located within the Highley development boundary. As such the principle of residential development on the site is established. Suitability is subject to appropriate management of the physical, heritage and environmental constraints. For instance part of the site was subject to previous quarrying and subsequent landfill uses, this will require due consideration. The site is adjacent to existing commercial units. The relationship between these units and any residential development on this site will require due consideration. The site contains and is in proximity of trees subject to TPO protection, development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. The site is also in proximity of a conservation area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.						0			10		0
BUR001	Field adjacent to the Aspire Centre, Burford	The site is located within the development boundary. As such open market residential development is suitable in principle. Suitability is subject to appropriate management of any physical, heritage or environmental constraints present. For instance surrounding uses are primarily employment based, the relationship between any development on this site (and resultant sensitive users) and surrounding uses will require due consideration. The site is within 500m of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. The site is also within 300m of a number of G2 listed buildings and Castle Tump, a scheduled monument, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for open market residential development subject to appropriate assessment and management of any physical; environmental; or heritage constraints to the site (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Specifically the sites setting is primarily employment based. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			36		0
LUD005	21 New Street, Ludlow	The site is located within the Ludlow development boundary and is considered to represent a suitable location for residential development, subject to appropriate management of any physical, heritage and environmental constraints. For instance, the site is located within proximity of one or more listed buildings and a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; likely to become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						5			0		0
LUD022	Morris Bufton Galdeford, Ludlow	The site is within the Ludlow development boundary so the principle of development is accepted subject to management of any physical, heritage and environmental constraints. These include consideration of any loss of employment. The site is in proximity of a Scheduled Monument, Conservation Area and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within 500m of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. If the consent for a retail unit on part of the site is implemented, this will need to be excluded from the developable area.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered viable and achievable (subject to any further necessary viability assessment). Its availability is unknown. Where necessary, this will be informed by further discussions with landowners and/or their representatives. Furthermore, the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site is currently suitable for development as it is located within the development boundary where the principle of development is accepted subject to management of any physical, heritage and environmental constraints. These include the implications of any loss of employment; and the site's proximity to a SSSI, a Scheduled Monument, a Conservation Area and several Listed Buildings. Additionally, if the consent for a retail unit on part of the site is implemented, this will need to be excluded from the developable area.						0			41		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period					
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total				
ONY005	Land at the Quarry	<p>The site is located adjacent to an existing Community Hub, however within Onibury open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The housing guideline for Onibury is around 25 dwellings.</p> <p>As a former quarry, the sites topography may be challenging, contamination may be present and ground investigations are likely to be required.</p> <p>The site is also located within the AONB, therefore any major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.</p> <p>The site is also in proximity of a conservation area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.</p> <p>The ability to provide an appropriate access is subject to highway approval.</p> <p>Subject to these factors, a suitably sized scheme, appropriate consideration of the identified housing guideline for the settlement, and any other material considerations, including any other physical, heritage and environmental constraints present, the site may currently be suitable for development. However, Onibury has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. As such under this policy approach open market residential development on the site would be contrary to policy.</p>	<p>The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Particularly the fact the site is located within the AONB, site topography/stability, appropriate development size/design/layout and consideration of the settlement guideline. However, Onibury has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. As such under this policy approach open market residential development on the site would be contrary to policy in the future.</p>							3		0		0				
ONY006	Land south east of Church Close	<p>The site is located adjacent to an existing Community Hub, however within Onibury open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The housing guideline for Onibury is around 25 dwellings.</p> <p>The site is also partly within and partly in proximity of a conservation area and in proximity of one or more listed buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.</p> <p>The ability to provide an appropriate access is subject to highway approval.</p> <p>Subject to these factors, a suitably sized scheme, appropriate consideration of the identified housing guideline for the settlement, and any other material considerations, including any other physical, heritage and environmental constraints present, the site may currently be suitable for development. However, Onibury has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. As such under this policy approach open market residential development on the site would be contrary to policy.</p>	<p>The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. As such under this policy approach open market residential development on the site would be contrary to policy in the future.</p>								5		0		0			
BLE002	Land north of A41, Bletchley	<p>The site is located within an existing Community Cluster, specifically Bletchley is located within the Bletchley, Longford, Longslow and Moreton Say Community Cluster. Within Bletchley open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The guideline across the Community Cluster is 20 additional dwellings during the plan period, current commitments and completions total around 33 dwellings (as at 31st March 2017). As such conversion of the existing buildings on the site to open market dwellings may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the site is in proximity of one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The ability to provide an appropriate access is also subject to highway approval.</p> <p>However, Bletchley has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>	<p>Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
HHH003	Divisional Surveyors Office & Depot, Hearne Lane, Hodnet	The site is within the development boundary so the principle of development is accepted subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance, the site is located within a Conservation Area and its proximity to a Scheduled Monument, a Registered Park or Garden and one or more Listed Buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment), furthermore, the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site is also suitable in principle for open market residential development as it is within the development boundary, subject to material considerations; suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment.						9			0		0
MDR001	77 - 83 Shropshire Street, Market Drayton	This site is a suitable location for residential development subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is within proximity of one or more listed buildings and a conservation area, as such development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; will likely become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						5			0		0
MDR002	Car Sales Area, Salisbury Road, Market Drayton	The site is considered suitable for residential development. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance there is a TPO adjacent to the site, therefore development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded. Thus, the site is considered suitable for development in relation to this matter, subject to these safeguarding measures being deemed acceptable. Additionally the site is located within proximity of one or more listed buildings, consequently development is subject to an assessment of impact on the significance of the setting of this heritage asset(s). Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of either a withdrawn Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
MDR003	Haulage Yard, Newcastle Road, Market Drayton	The site is considered suitable for open market residential development. Suitability is also subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 300m of a Conservation Area, accordingly the impact of any proposed development will need to be appropriately assessed and considered. Notwithstanding this there are few other constraints and the site is considered suitable for development.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, likely to become available, achievable; and viable (subject to any further necessary viability assessment) and appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			7		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
MDR004	Cricket Club, Betton Road, Market Drayton	The site falls within the development boundary of Market Drayton. As such it is a suitable location for residential development. Although the site is included within the cricket club open space, the site itself does not include any green space (it is a brownfield site) although it does include the club house, any development would therefore need to demonstrate that this facility is no longer required or include a replacement facility. Any development on the site would need to address any physical, heritage and environmental constraints present. For instance, the site is within 300m of a Conservation Area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was subject to a series of applications for residential development in 2006 and 2008. Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, available, achievable; and viable (subject to any further necessary viability assessment) and appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Suitability is subject to the development including a replacement club house facility or demonstrating that this facility is no longer required as although the site is included within the cricket club open space, the site itself does not include any green space (it is a brownfield site) only the club house. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
MDR026	Pet Market, Shrewsbury Road, Market Drayton	The site is considered suitable for residential development. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
MDR031	Longford Turning, Market Drayton	The site is located within the Market Drayton development boundary. However, the north western corner of the site is a protected employment site. As such residential development is suitable in principle apart from the element of the site which is protected for employment (suitability of which would be dependent on appropriate policy changes). Suitability on the site is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access into the site is subject to highway approval. The site is adjacent (and partly contains) the Tern Park Business Park a protected employment site, consideration of residential amenity is therefore necessary. The site is within proximity of a number of veteran trees, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. The site is also within proximity of a wildlife site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Approximately half of the site is densely wooded and this will require due consideration.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable (apart from the element of the site which is protected for employment, for which suitability is also dependent on appropriate policy changes) subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Key constraints include proximity to and presence of mature trees / trees subject to TPO protection; highway access; and site/surrounding amenity.						0			0		50
SKH001	Land at Rosehill Road Stoke Heath	This brownfield site is located within proximity of an existing Community Hub, within Stoke Heath open market development will be delivered upon the allocated site together with limited infilling, groups of houses and conversions on suitable sites within Stoke Heath. This particular site has also been identified within the emerging Neighbourhood Plan as an appropriate location for residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Particularly contamination.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	This brownfield site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Specifically the site is located within proximity of an existing Community Hub, within Stoke Heath open market development will be delivered upon the allocated site together with limited infilling, groups of houses and conversions on suitable sites within Stoke Heath. This particular site has also been identified within the emerging Neighbourhood Plan as an appropriate location for residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Particularly contamination.						15			0		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment			Summary	Years 1-5: Forecasting (as at 31/03/2019)					Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period		
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability		2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
SKH002	Land at the 'Old Camp'	The site is located within proximity of an existing Community Hub, within Stoke Heath open market development will be delivered upon the allocated site together with limited infilling, groups of houses and conversions on suitable sites within Stoke Heath. This particular site has also been identified within the emerging Neighbourhood Plan as an appropriate location for residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Specifically the site is located within proximity of an existing Community Hub, within Stoke Heath open market development will be delivered upon the allocated site together with limited infilling, groups of houses and conversions on suitable sites within Stoke Heath. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.											
MIN004	Land at The Coach Depot and The White House, Minsterley	Site is within the development boundary for Minsterley but a small section of the site is classified as protected employment land and the site adjoins a large area in existing employment use. As such open market residential development on the small element of the site that is protected employment is contrary to policy, but residential development on the remainder of the site is suitable in principle, subject to material considerations, including the suitable management of any physical, heritage and environmental constraint present. For instance the site is subject to contamination issues which require addressing. The site adjoins an existing large food processing operation (Muller) the potential impacts of which were recognised at appeal with a requirement for an acoustic fence to protect the amenities of the occupants of proposed dwellings, this relationship and the need to mitigate any impact remain key considerations. The site is also within proximity of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs.	The site has had the benefit of Planning Permission for a relevant use (residential as part of a mixed use), is subject to a current outstanding renewal application. The site has also been promoted as part of 2017 call for sites. On this basis it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	Part of the site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for residential development is subject to appropriate management of the physical and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.											
MUW001	Smithfield Works, Much Wenlock	Complies with current policy and is also a brownfield site. Within 500m of a SSSI so development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site boundary is also within 30m of a Tree Preservation Order. Development is subject to an assessment of impact on this protected tree in order to demonstrate how it can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Site is also within 300m of a Conservation Area and several Listed Buildings. Development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Previously submitted for consideration within the SHLAA; SAMDev Plan; and the Much Wenlock Neighbourhood Plan. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; likely to become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate assessment and management of impact on heritage and environmental constraints in proximity (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.											
KCK001	The Old Post Office, Knockin	The site is located within the development boundary for Knockin. As such development by infilling and conversions of buildings may be acceptable subject to material considerations. Knockin also represents a proposed Community Hub. Material considerations include suitable consideration and management of any physical, heritage and environmental constraints. For instance the ability of the current access to serve the redevelopment of the site is subject to highway approval. The site is within a conservation area and in proximity of a number of listed buildings and a scheduled monument, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is by infilling and conversions of buildings, subject to material considerations; appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. For instance the site is located within a conservation area. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.											

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment			Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period		
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
OSW002	Health Centre/ Adult Training Centre, Victoria Rd, Oswestry	Suitable location subject to appropriate design and necessary assessments. Specifically the site is located within proximity of a scheduled monument, conservation area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within proximity of a TPO's, therefore development is subject to an assessment of impact on these protected trees in order to demonstrate how they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; achievable; and viable (subject to any further necessary viability assessment) for residential development. The site is considered to be not currently available, but is likely to become so. Where necessary, this will be informed by further discussions with landowners and/or their representatives. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			22		0
OSW003	Oakfield Middleton Rd, Oswestry	Suitable location subject to appropriate design. The site is within proximity of one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Planning Permission (18/05057/FUL) granted for 3 dwellings after 31st March 2019.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Planning Permission (18/05057/FUL) granted for 3 dwellings after 31st March 2019.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Planning Permission (18/05057/FUL) granted for 3 dwellings after 31st March 2019.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Planning Permission (18/05057/FUL) granted for 3 dwellings after 31st March 2019.						3			0		0
OSW005	Roy Evans Garage, Oak Street	The site is in a suitable location for residential development, subject to appropriate assessment and management of physical, heritage and environmental factors. Specifically, the site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of a scheduled monument; one or more listed buildings; and a registered park/garden, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has previously been submitted for inclusion within the SHLAA. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically if suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
OSW006	Garages site, Whittington Road	The site is a windfall redevelopment site within the urban boundary that is considered suitable for residential development, subject to management of any physical, heritage and environmental constraints. Specifically the site contains two TPO's and is in proximity of a number of other TPO's, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			7		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
OSW021	Llys Hill, Middleton Road, Oswestry	The site is located within a residential area of Oswestry. It is located within the development boundary and therefore its redevelopment would be consistent with policy - subject to the specific scheme. The site is within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Planning Permission (18/05573/FUL) granted after 31st March 2019.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Planning Permission (18/05573/FUL) granted after 31st March 2019.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Planning Permission (18/05573/FUL) granted after 31st March 2019.						1			0		0
OSW043	Welsh Border Meats, Willow Street	The site is located on the edge of the town centre within the Oswestry development boundary. The surrounding area contains a mix of uses including many residential properties. As such it is an appropriate location for residential development. The site is within proximity of one or more listed buildings; a conservation area; a scheduled monument; and a registered park and garden. Development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
OSW045	Autocare, King Street, Oswestry	This brownfield site is suitable for development, subject to assessment and management of identified constraints. Specifically the site is located within a conservation area. Therefore development of this site is subject to an assessment of impact on the specified asset(s). Where this shows that substantial harm or a total loss of significance of the designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is in proximity of one or more listed buildings and a scheduled monument. Development is therefore subject to an assessment of impact on the significance of the setting of this heritage asset(s). Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is in proximity of a wildlife site. Development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of a series of lapsed Planning Permissions for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical, environmental; or heritage constraints to the site. Specifically the sites location within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
OSW051	Weston Lane, Oswestry	The site is located within the Oswestry development boundary adjacent to sites allocated for housing development. Therefore open market residential development on the site is likely to be appropriate. However, the ability to provide an appropriate access into the site is subject to highway approval. Furthermore, the site is within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Specifically, the ability to provide an appropriate access into the site is subject to highway approval. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			10		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period					
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total				
PWN009	Land east of Kiln Side	<p>The site is located adjacent to an existing Community Cluster, specifically Porth y waen is located within the Llanyblodwel, Porthywaen, Dolgoch, Llynclys and Bryn Melyn Community Cluster. Within Porth y waen open market residential development is limited to allocated sites and infilling, groups of houses and conversions on suitable sites within the identified development boundaries. The guideline across the Community Cluster is 15 additional dwellings during the plan period, current commitments and completions total around 6 dwellings (as at 31st March 2017).</p> <p>As such open market residential development on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is subject to highway approval. The site is located within proximity of one or more listed buildings therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is also located within proximity of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. The site is located within proximity of a Local Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.</p> <p>However, Porth y waen has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p> <p>Planning Permissions (19/00881/OUT and 19/01012/OUT) granted for 4 and 3 dwellings respectively, after 31st March 2019.</p>	<p>Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p> <p>Planning Permissions (19/00881/OUT and 19/01012/OUT) granted for 4 and 3 dwellings respectively, after 31st March 2019.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment			Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period		
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
SMH002	Darjeeling, School Lane, St Martins	Brownfield site within development boundary. Therefore the site is considered suitable in principle for residential development. Suitability is subject to appropriate management of any physical, heritage or environmental constraints present. For instance comments will be required from highway department regarding highway access.	The site has been the subject of a lapsed Planning Application for a relevant use (granted 2011). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			12		0
SHF004	Land to the rear of Jaspers, Shrewsbury Road	The site is located on the edge of the town centre of Shifnal, within its development boundary. As such it is a suitable location for open market residential development. However, this excludes a small portion of the site, along its eastern boundary which is located within flood zones 2 and/or 3. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. Additionally the site is adjacent to a TPO, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also in proximity of a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The ability to provide an appropriate access is subject to highway approval.	This site has previously been the subject of Planning Applications (most recently refused in 2005) for the demolition of existing buildings (beyond the identified site area) and erection of 28 dwellings. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available, viable and achievable. Where necessary, this will be informed by further discussions with landowners and/or their representatives; and any further necessary viability assessment work. The site is however considered suitable for residential development (excluding the small portion of the site located within flood zones 2 and/or 3), subject to assessment and management of the physical; environmental; or heritage constraints. Such as the ability to access the site and its location within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on appropriate changes to policies affecting this location; suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
SHF016	St Peter's Youth Club, Bridgnorth Road, Shifnal	The site is located within the development boundary and a predominantly residential area therefore the principle of open market residential uses on the site is accepted. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is in proximity of a conservation area and several listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is not currently available but will become so in the future; that there is a willing landowner/developer; and no legal or ownership problems which could limit development beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			12		0
SHF021	West of Lamledge Lane and Shifnal College and North of Shifnal Industrial Estate	The site is located within the Shifnal development boundary. The eastern portion of the site is unallocated. The western portion of the site is allocated for employment uses and the preference would be for employment uses upon it, however it is recognised that the wider employment allocation has been granted Planning Permission for a mixed residential and care home scheme, therefore open market residential uses on this component of the site is also likely to be appropriate. The ability to provide an appropriate access is subject to highway approval.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.						0			6		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
SHF027	Garage off Bradford Street, Shifnal	The site is located within the Shifnal development boundary and its frontage is within the town centre. As a result there would be an expectation that ground floor uses may be more appropriate for retail and town centre uses. Open market residential uses on upper floors would be supported. The site does have potential for open market residential on the ground floor subject to demonstration of compliance with current policy (that residential uses on the ground floor would support the regeneration of the town centre) or long term potential subject to appropriate policy changes. Suitability is also subject to and management of any physical, heritage and environmental constraints. For instance as a former garage site investigation and remediation or any contamination would be required. The site is within proximity of a conservation area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development above the ground floor is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Suitability of open market residential development on the ground floor is also subject to demonstration that this would support the regeneration of the town centre. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			7		0
SHF028	27 Shrewsbury Road, adjacent to St Mary's Church, Shifnal	The site is located within the Shifnal development boundary and near the town centre, therefore the site is suitable for open market residential development subject to appropriate management of any physical, heritage and environmental constraints. For instance the ability to access the site is subject to highway approval. The site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The buildings fronting onto Shrewsbury Road may have heritage value.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site is located within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			5		0
ANN003	Land adjoining Longden Road, Annscroft	The site is located within an existing Community Cluster, specifically Annscroft is located within the Longden, Hook-a-Gate, Annscroft, Longden Common, and Lower Common/Exfords Green Community Cluster. Within Annscroft open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The guideline across the Community Cluster is 10-50 additional dwellings during the plan period, current commitments and completions total around 50 dwellings (as at the 31st March 2017). As such open market residential development on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is also subject to highway approval. However, Annscroft has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable. The site is located within an existing Community Cluster, specifically Annscroft is located within the Longden, Hook-a-Gate, Annscroft, Longden Common, and Lower Common/Exfords Green Community Cluster. Within Annscroft open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The guideline across the Community Cluster is 10-50 additional dwellings during the plan period, current commitments and completions total around 50 dwellings (as at 31st March 2017). As such open market residential development consisting of a group of dwellings on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. However, Annscroft has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.						5			0		0
BIT020	Land adj. Brockway, Four Crosses	The site is located within the Four Crosses development boundary so the principle of development is accepted, subject to material considerations. However, Four Crosses has not been identified as a Strategic/Principal/Key Centre or Community Hub and therefore may not have a development boundary in the future. Material considerations include suitable management of any physical, environmental and heritage constraints present. For instance the site is within 300m of one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Furthermore, the site is also within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. However, Four Crosses has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.						0			7		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total		
BNP014	Newtown Garage, Baschurch	Site is suitable for residential development subject to brownfield remediation issues and any site contamination as a result of previous use history. The site is also contains part of a Conservation Area. Therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also within 300m of a Listed Building. Development is subject to an assessment of impact on the significance of the setting of the listed building where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Site has previous permissions for residential development in 2011 and 2007 both now lapsed. The site has been the subject of a lapsed Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical, environmental; or heritage constraints to the site. Specifically part of the site is within a Conservation Area and the site is within 300m of one or more Listed Buildings. If the assessment shows no adverse effect or suitable mitigation were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			7		0		
CON001	Land at Home Farm, Condover	The site is located adjacent to an existing Community Cluster settlement, specifically Condover within the Dorrington, Stapleton and Condover Community Cluster. Within Condover, development is limited to infilling, groups of houses and conversions within the development boundary. As such open market residential development on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance part of the site is located within a conservation area, the remainder is in proximity of a conservation area. The site is also in proximity of a registered park and one or more listed buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of a local wildlife site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also in proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. The ability to provide an appropriate access is also subject to highway approval. Furthermore, Condover has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable. The site is located within an existing Community Cluster, specifically Condover within the Dorrington, Stapleton and Condover Community Cluster. As such open market residential development on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. Furthermore, Condover has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.							25		0		0		
EXG005	Land at the Works, Exford Green	The site is located within an existing Community Cluster, specifically Exford Green is located within the Longden, Hook-a-Gate, Annsroft, Longden Common, and Lower Common/Exfords Green Community Cluster. Within Exford Green open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The guideline across the Community Cluster is 10-50 additional dwellings during the plan period, current commitments and completions total around 50 dwellings (as at the 31st March 2017). As such open market residential development consisting of a group of houses and/or conversions on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is also subject to highway approval. The site is also in proximity of ancient woodland, therefore development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, Exford Green has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	This primarily brownfield site is considered available, achievable and viable. The site is located within an existing Community Cluster, specifically Exford Green is located within the Longden, Hook-a-Gate, Annsroft, Longden Common, and Lower Common/Exfords Green Community Cluster. Within Exford Green open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The guideline across the Community Cluster is 10-50 additional dwellings during the plan period, current commitments and completions total around 50 dwellings (as at 31st March 2017). As such open market residential development consisting of a group of dwellings and/or conversions on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. However, Exford Green has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.									10		0		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period									
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total								
HKE004	junction Longden Rd & Hanley Lane	<p>The site is located within an existing Community Cluster, specifically Hook-a-Gate is located within the Longden, Hook-a-Gate, Annscroft, Longden Common, and Lower Common/Exfords Green Community Cluster. Within Hook-a-Gate open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The guideline across the Community Cluster is 10-50 additional dwellings during the plan period, current commitments and completions total around 50 dwellings (as at 31st March 2017).</p> <p>As such open market residential development consisting of a group of dwellings on the elements of this site that are not located within flood zones 2 and/or 3, may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. The element of the site located in flood zones 2 and/or 3 would only be considered to have development potential if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and will not increase risk elsewhere.</p> <p>Other such considerations include the fact that the site is in proximity of a Local Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also within proximity of one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is also in proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded.</p> <p>However, Hook-a-Gate has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered available, achievable and viable. Its availability is unknown. The site is located within an existing Community Cluster, specifically Hook-a-Gate is located within the Longden, Hook-a-Gate, Annscroft, Longden Common, and Lower Common/Exfords Green Community Cluster. Within Hook-a-Gate open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The guideline across the Community Cluster is 10-50 additional dwellings during the plan period, current commitments and completions total around 50 dwellings (as at 31st March 2017).</p> <p>As such open market residential development consisting of a group of dwellings on the elements of this site that are not located within flood zones 2 and/or 3, may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. The element of the site located in flood zones 2 and/or 3 would only be considered to have development potential if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and will not increase risk elsewhere.</p> <p>However, Hook-a-Gate has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>							3			0		0							
HPV001	Land at St Chads Farm	<p>Within Hopton open market residential development is limited to infilling/conversions on suitable sites within the village. The guideline across the Community Cluster is 10-15 additional dwellings during the plan period, current commitments and completions total around 60 dwellings (as at 31st March 2017). As such infill development on the site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the site is in proximity of a Local Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also in proximity of a scheduled monument, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.</p> <p>However, Hopton has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire's geographical location and rural character make it a desirable place to live. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered available, achievable and viable. The site is located within an existing Community Cluster, specifically Hopton is located within the Great Ness, Little Ness, Wilcott, Hopton/Valeswood, Kinton, and Felton Butler Community Cluster. Within Hopton open market residential development is limited to infilling/conversions on suitable sites within the village. The guideline across the Community Cluster is 10-15 additional dwellings during the plan period, current commitments and completions total around 60 dwellings (as at 31st March 2017). As such infill development on the site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present.</p> <p>However, Hopton has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>												5		0		0			
SHR002	The Hollies, Sutton Road, Shrewsbury	<p>As a brownfield site within the settlement boundary, it is a suitable location in principle for open market residential development. Suitability is subject to appropriate management of any physical, heritage and environmental constraints. For instance the existing building is attractive and of historic interest and as such should be retained. Furthermore the site is located within Shrewsbury Conservation Area. Therefore development of this site is subject to an assessment of impact on the designated heritage asset(s). Where this shows that substantial harm to or a total loss of significance of the designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF.</p> <p>If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is also located within proximity of one or more listed buildings and scheduled monuments. Consequently development is subject to an assessment of impact on the significance of the setting of this heritage asset(s). The site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site contains numerous trees subject to TPO's there are also numerous trees subject to TPO's in proximity of the site. Therefore development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded. The site is considered suitable for development in relation to this matter, subject to these safeguarding measures being deemed acceptable. As a result the suitability of the site is dependent on the outcome of necessary supporting assessments.</p>	<p>The site has been recently promoted for sale for residential development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site contains an attractive existing building and is located within the Shrewsbury Conservation Area.</p> <p>If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Such constraints include the presence of TPO's on the site; and the sites proximity to one or more listed buildings and scheduled monuments. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p>															13		0		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period	
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
SHR003	Richmond House, Harlescott, Shrewsbury	The site is suitable in principle for open market residential development subject to assessment and management of physical, environmental and heritage constraints. For instance the site is located within 1km of a Ramsar Site, consequently, development is subject to an appropriate assessment under the Habitats Regulations. The site is located in proximity of a conservation area and scheduled monument. Therefore development is subject to an assessment of impact on the significance of the setting of this heritage asset(s). The site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The ability to provide an appropriate access to the site for an alternative use is subject to highway comments.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable (subject to any further necessary viability assessment). The site is considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site is located within proximity of a Ramsar site, conservation area and scheduled monument. The ability to provide an appropriate access for an alternative use is subject to highway comments. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			11		0
SHR011	Land at the Elms, Belvidere, Shrewsbury	As a part brownfield and part greenfield site within the development boundary, the site is considered suitable in principle for open market residential development. However, suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the need to provide an alternative location for the Scout Group. The ability to provide an appropriate access into the site is subject to highway approval. The site is within proximity of The Elms' Grade 2 Listed Building and a Conservation Area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site also contains and is in proximity to TPO's, therefore development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied by a Scout Group with 25 yr. lease so site will only become available during this time if an alternative location can be found for them (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically TPO's on site, impact on Grade 2 Listed Building 'The Elms' and satisfactory access. If suitable mitigation of the identified constraints were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						15			0		0
SHR014	Site at New Zealand House, Abbey Foregate, Shrewsbury	The portion of the site located within flood zones 2 and/or 3 is unsuitable for development. This portion of site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site is suitable for development subject to appropriate management of any physical, heritage and environmental constraints present. For instance the suitability of the access to serve the redevelopment of the site is subject to highway approval. The site is located within a Conservation Area and adjacent to a Grade 2 listed building, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. Furthermore, the site contains and is within proximity of TPO's. Consequently development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded. The site is also within 100m of a Local Nature Reserve so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered viable and achievable (subject to any further necessary viability assessment). It is not currently considered to be available, but is it considered that it is likely to become available in the future. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. The element of the site located outside flood zones 2 and/or 3 is considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically heritage assists and satisfactory access. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. The element of the site located in flood zones 2 and/or 3 would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			14		0
SHR015	Land at Whitehall	Site is located in a longstanding established residential area and would be suitable for open market residential development subject to assessment and management of physical, environmental and/or heritage constraints. For instance the site contains and is in proximity of a listed building; it is also located in a conservation area; and proximity of a scheduled monument, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.	Site is currently occupied as a medical / office facility with associated car parking. However, the site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site contains listed buildings, is located in a conservation area and proximity of other heritage assets. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			30		0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment			Summary	Years 1-5: Forecasting (as at 31/03/2019)					Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability		2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total	
SHR016	Shrewsbury Training and Development Centre, Racecourse Crescent, Shrewsbury	The site is located in a longstanding established residential area and would be suitable for open market residential development subject to assessment and management of physical, environmental and/or heritage constraints. For instance the ability to provide an appropriate access is subject to highway approval. The site is also within 300m of conservation area and 100m of Grade 2 listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, but this submission does not specify that the site is available for this form of development and subsequent investigations have not been able to clarify whether the site is available for this form of development. Therefore information gathered for the purpose of this study is unable to confirm that the site is available for this form of development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site								9		0	0	
SHR080	Land at Oteley Road, Shrewsbury	The site is located within the development boundary and forms part of the Shrewsbury South SUE. Therefore open market residential development is suitable in principle. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the need to provide an appropriate highway access using Sutton Grange Drive, approved by Highway Authority. The site is just within 300m of Grade 2* Listed Building - the Greek Orthodox Church, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is in a prominent location and adjacent to residential dwellings and open space, therefore site design and layout must reflect this location.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.									32		0	0
SHR165	Land to north-west of Hazeldine Way, Shrewsbury	Greenfield site within development boundary, so no in principle restrictions. However, approximately 66% of the site is located within flood zone 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be suitable for development subject to confirmation of the ability to provide an appropriate access to and into the site (which is currently unclear), any proposed access is subject to highway approval. Suitability is also subject to appropriate management of any physical, heritage and environmental constraints present. For instance, the site is adjacent to Reabrook Valley Local Nature Reserve, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also in proximity of a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). Approximately 66% of the site is located within flood zone 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be suitable for development subject to confirmation of the ability to provide an appropriate access to and into the site (which is currently unclear), any proposed access is subject to highway approval. Suitability is also subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment.									0		10	0
SHR178	Reman Services Sports and Social Club off Albert Road, Shrewsbury	The site is located within the Shrewsbury development boundary. However, two elements of the site (totalling approximately 80% of the site) comprises an identified outdoor sports facility. Development on this element of the site is therefore not appropriate unless an assessment has been undertaken which clearly indicates that the open space or facility is surplus to requirements or the loss would be replaced by equivalent or better provision. The remainder of the site is suitable for development subject to management of any physical, heritage and environmental constraints present. For instance the site is in proximity of a Local Wildlife Site, development is therefore subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site also contains a Veteran Tree/tree protected by a Tree Preservation Order, development is therefore subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 300m of a Listed Building so development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). However, two elements of the site (totalling approximately 80% of the site) comprises an identified outdoor sports facility. Development on this element of the site is therefore not appropriate unless an assessment has been undertaken which clearly indicates that the open space or facility is surplus to requirements or the loss would be replaced by equivalent or better provision. The remainder of the site is suitable for development subject to management of any physical, heritage and environmental constraints present. Specifically proximity of environmental and heritage assets. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.									0		5	0

Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment			Years 1-5: Forecasting (as at 31/03/2019)						Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period		
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
SHR211	Land at Hollydene, Shrewsbury	The site is located within the development boundary. Therefore open market residential development is suitable in principle. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is subject to highway approval. The site is in proximity to trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						5			9		0
SHR217	The Pitch and Putt, Shrewsbury	The site is located within the development boundary. However approximately 50% of the site is identified as an outdoor sports facility. Therefore this area of the site is not appropriate for development unless an assessment has been undertaken which clearly indicates that the open space or facility is surplus to requirements or the loss would be replaced by equivalent or better provision. The remainder of the site is suitable in principle for open market residential development subject to material considerations and management of any physical, heritage and environmental constraints present. For instance the suitability of the access to serve alternative uses of the site will require highways approval. The site is in proximity of a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Approximately 50% of the site is identified as an outdoor sports facility. Therefore this area of the site is not appropriate for development unless an assessment has been undertaken which clearly indicates that the open space or facility is surplus to requirements or the loss would be replaced by equivalent or better provision. The remainder of the site is suitable in principle for open market residential development subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0			35		15
STA003	Court Farm	The site is located adjacent to an existing Community Cluster, specifically Stapleton is located within the Dorrington, Stapleton and Condover Community Cluster. Within Stapleton open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the identified development boundary. The guideline across the Community Cluster is 5 additional dwellings during the plan period, current commitments and completions total around 10 dwellings (as at 31st March 2017). As such open market residential development consisting of a group of dwellings on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is subject to highway approval. The site is located within proximity of a Local Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also within proximity of a scheduled monument and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Furthermore, Stapleton has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is located adjacent to an existing Community Cluster, specifically Stapleton is located within the Dorrington, Stapleton and Condover Community Cluster. Within Stapleton open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the identified development boundary. The guideline across the Community Cluster is 5 additional dwellings during the plan period, current commitments and completions total around 10 dwellings (as at 31st March 2017). As such open market residential development consisting of a group of dwellings on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. Furthermore, Stapleton has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.						5			0		0
STA006	Ye Olde Farm	The site is located adjacent to an existing Community Cluster, specifically Stapleton is located within the Dorrington, Stapleton and Condover Community Cluster. Within Stapleton open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the identified development boundary. The guideline across the Community Cluster is 5 additional dwellings during the plan period, current commitments and completions total around 10 dwellings (as at 31st March 2017). Furthermore a small portion of the site is located within flood zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be suitable for open market residential development consisting of a group of dwellings on this site may be acceptable, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is subject to highway approval. The site is located within proximity of a Local Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is located adjacent to an existing Community Cluster, specifically Weston Lullingfields is located within the Weston Lullingfields, Weston Wharf and Weston Common Community Cluster. Within Weston Lullingfields open market residential development is limited to infilling, conversions and small-groups of up to 5 dwellings on suitable sites within the village. The guideline across the Community Cluster is 15-20 additional dwellings during the plan period, current commitments and completions total around 16 dwellings (as at 31st March 2017).</p> <p>As such a small group of up to 5 dwellings on the site may be suitable subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present.</p> <p>However, Weston Lullingfields has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>											5	0	0		
MTN004	Site B	<p>The site is located adjacent to an existing Community Cluster, specifically Marton is located within the Brompton, Marton, Middleton, Pentreheyling, Priest Weston, Stockton and Rorrington Community Cluster. Within Marton open market residential development is limited to infilling and conversions on suitable sites. The housing guideline for the Community cluster is around 20 dwellings. This site may be suitable for infill development, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is subject to highway approval. The site is in proximity of a local wildlife site, therefore development is subject to an assessment of impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also in proximity of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. The site is within proximity of a Ramsar Site, therefore development is subject to an appropriate assessment under the Habitats Regulations. The site is also in proximity of one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.</p> <p>Furthermore, Marton has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Appendix F: Sites from the Strategic Land Availability Assessment (SLAA)

Site		Strategic Land Availability Assessment				Years 1-5: Forecasting (as at 31/03/2019)					Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary	2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total	
PRH006	Heath Road	The site is located within an existing Community Cluster, specifically Prees Heath within the Whitchurch Rural & Ightfield and Calverhall Community Cluster. Within Prees Heath appropriate development is limited to the allocated sites, infilling, groups of houses and conversions on suitable sites well related to the built form of Prees Heath. However, the south-west corner of the site is located within flood zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be considered suitable for open market residential development, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. For instance comments will be needed from highway department regarding highway capacity and access. The site is also within proximity of a SAC and Ramsar site, therefore development is subject to an appropriate assessment under the Habitats Regulations. The site is also in proximity of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. The site also contains and is in proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, Prees Heath has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. Therefore due to uncertainty about availability and the status of Prees Heath within the Local Plan Review, the site is rejected.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered achievable and viable. Its availability is unknown. The site is located within an existing Community Cluster, specifically Prees Heath within the Whitchurch Rural & Ightfield and Calverhall Community Cluster. Within Prees Heath appropriate development is limited to the allocated sites, infilling, groups of houses and conversions on suitable sites well related to the built form of Prees Heath. The site may be considered suitable for open market residential development, subject to material considerations including the application of SAMDev Plan Policy MD3 and any suitable management of physical, heritage and environmental constraints present. However, Prees Heath has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review.							10			0		0
WHT001	Garages on Wayland Close, Whitchurch	The site is located within an existing residential area within the Whitchurch development boundary, consequently it is considered a suitable site for residential development. However the site is within proximity of a wildlife site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Planning Permission (19/01553/FUL) granted for 2 dwellings on approximately 2/3 of the site after 31st March 2019.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future. Planning Permission (19/01553/FUL) granted for 2 dwellings on approximately 2/3 of the site after 31st March 2019.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Planning Permission (19/01553/FUL) granted for 2 dwellings on approximately 2/3 of the site after 31st March 2019.	The site is considered likely to become available, viable and achievable. Where necessary, this will be informed by further discussions with landowners and/or their representatives and any further necessary viability assessment. The site is also considered suitable for development subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Planning Permission (19/01553/FUL) granted for 2 dwellings on approximately 2/3 of the site after 31st March 2019.						3			0		0	
WHT005	Land at Sherrymill Hill, Whitchurch	The site is located within the development boundary, and so residential development is in line with policy. However, approximately 40% of the site is located within flood zone 2, therefore this part of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site is considered suitable for development, subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 250m of a Wildlife Site, and so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within 30m of multiple Veteran Trees/ trees protected by a Tree Preservation Order. Development is subject to an assessment of impact on these protected trees in order to demonstrate how they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 300m of a Conservation Zone. Development is subject to an assessment of impact on the significance of the setting of this heritage asset. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. 09/01500/FUL	Adj To Worfield Primary School, Worfield, Bridgnorth	Application previously approved on the site at appeal (09/01500/FUL). Site in ownership of an RSL. Site outside the development boundary, affordable housing exception site.	The site is in the ownership of an RSL and there is known interest in bringing the site forward for development.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Previously approved application for 14 dwellings. Known interest in developing the site. Likely in the longer term.	14						0			14		0
13/02623/FUL	Land At Broseley Social Club, Bank House, High Street, Broseley, Shropshire, TF12 5EZ	Application previously approved on the site (13/02623/FUL). Brownfield site within the settlement boundary.	Site is currently in use, however it has been represented through the Planning Application process. Site is considered deliverable in the medium to long term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Application previously approved on the site (13/02623/FUL). Brownfield site within the settlement boundary.	6						0			6		0
10/01319/FUL	Land At 1 Pinkham, Cleobury Mortimer	Application previously approved on the site (10/01319/FUL)	Site is currently in use, however it has been represented through the Planning Application process. Site is considered deliverable in the medium to long term.	Site is considered achievable and likely to be delivered in the long term.	No major viability issues noted to date.	Application previously approved on the site (10/01319/FUL)	9						0			9		0
11/02801/OUT	Land at Wilton Lodge, Clun Road, Craven Arms	Application previously approved on the site (11/02801/OUT). Site within the settlement boundary.	Known interest in developing the site in the past. Likely in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Previously approved application for 10 dwellings.	10						0			10		0
11/04589/EIA	Wharf Road, Ellesmere, Shropshire	Application previously approved on the site (11/04589/EIA). Much of the development was implemented. However phases of the development, including an extra care facility and some housing were not implemented. Site within the settlement boundary.	Known interest in developing the site in the past. Much of the development was implemented. However phases of the development, including an extra care facility and some housing were not implemented. Likely in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Application previously approved on the site (11/04589/EIA). Much of the development was implemented. However phases of the development, including an extra care facility and some housing were not implemented. Site within the settlement boundary. Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	80						0	5	5	25		25

Site		Availability Assessment					Net Dwellings	Years 1-5: Forecasting (as at 31/03/2019)					Years 6 - 7: Forecasting (as at 31/03/2019)			Beyond Plan Period		
Reference	Address	Suitability	Availability	Achievability	Viability	Summary		2019/20	2020/21	2021/22	2022/23	2023/24	Total	2024/25	2025/26	Total	2026+	Total
10/00968/FUL	Phoenix Garage, Great Hales Street, Market Drayton	Application previously approved on the site (10/00968/FUL). More recent application (13/01162/FUL) withdrawn in 2013, but Officer Report at the time recommended approval. Brownfield site within the settlement boundary.	Application to renew the previous permission was submitted and subsequently withdrawn. This indicates the landowner is still interested in bringing the site forward for development, subject to an appropriate and viable scheme. Likely in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	A detailed viability report has previously been undertaken which indicated that developer profit margins were marginal. In order to make the development viable, no affordable housing contribution was to be sought - however an overage clause would have been required which will allow for the provision of an affordable housing provision should the profit margins increase due to an increase in the housing market. It is felt that in these circumstances the development would have been viable. As market conditions improve, the development will become increasingly viable.	Previously approved application for 14 dwellings. The site is likely to come forward in the longer term.	14						0			14		0
10/01264/FUL	The Stables, Prospect Road, Market Drayton	Application previously approved on the site (10/01264/FUL). Site within the settlement boundary. Part brownfield part greenfield.	Building Control Application submitted and an approved inspector has been appointed (12/02280/DOMFPC). Application may still be extant.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Previously approved application for 6 dwellings. Building Control Application submitted and an approved inspector has been appointed (12/02280/DOMFPC). Application may still be extant.	6						0			6		0
10/04004/OUT	Land adjacent to St Marys Croft, Berrisford Road, Market Drayton	Application previously approved on the site (10/04004/OUT). Site located within the settlement boundary.	The site is an undeveloped parcel of land within the settlement boundary which has previously been used for grazing of cattle but is currently vacant. Subject to the the development of an appropriate and viable scheme, the site would be available.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Previously approved application for 6 dwellings. Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	6						0			6		0
11/00983/FUL	6 St Marys Street, Market Drayton	Application previously approved on the site (11/00983/FUL). Brownfield site within the settlement boundary.	Site was previously used by the Citizen Advice Bureau. The site is currently vacant. Known interest in developing the site in the past. Likely in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Previously approved application for 5 dwellings. Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	5						0			5		0
