Appendix J. Lapsed Permissions	

1. Executive Summary

Introduction

- 1.1. The National Planning Policy Framework (NPPF) requires Local Authorities to identify and annually review their housing land supply. The purpose of this assessment is to consider whether there are sufficient deliverable sites within a Local Authority Area to allow for the provision of five years' worth of housing (plus an appropriate buffer), based on the identified housing requirement set out in adopted strategic policies, or against local housing need where strategic policies are more than five years old, unless policies have been reviewed and found up-to-date¹.
- 1.2. This assessment covers the five year period from 2021/22 to 2025/26. The assessment has been undertaken using a cautious and robust methodology which is generally consistent with that endorsed by the Site Allocations and Management of Development (SAMDev) Plan Inspector within her Report on the SAMDev Plan (2015), whilst also reflecting recent changes to national policy and guidance.
- 1.3. In conclusion the assessment demonstrates that Shropshire currently has **5.60 years supply of deliverable housing land against the housing requirement within the adopted Core Strategy (2011) and 7.44 years supply of deliverable housing land against the housing need identified using Governments standard methodology.**

Housing Land Requirement

- 1.4. The adopted Local Plan for Shropshire consists of the Core Strategy (2011); Site Allocations and Management of Development (SAMDev) Plan (2015); and any adopted formal Neighbourhood Plans. The Shropshire Core Strategy (2011) identifies an ambitious housing requirement for Shropshire of 27,500 dwellings between 2006 and 2026. The SAMDev Plan (2015) seeks to deliver the housing requirement identified within the Core Strategy (2011).
- 1.5. In order to allow the phased release of housing land, the Core Strategy (2011) and SAMDev Plan (2015) identify the mechanisms for the release of sites so that a five year supply of housing land can be maintained over the plan period. This includes a trajectory for the phased release of housing land across the plan period. Shropshire Council considers that this trajectory is the most appropriate mechanism for identifying the annual housing land requirement. This approach was endorsed by the SAMDev Plan Inspector.
- 1.6. To inform an ongoing Local Plan Review, Shropshire Council has completed a Local Housing Need (LHN) Assessment for Shropshire (2020 base date). This assessment was undertaken using Governments standard methodology for calculating local housing need. A report summarising this assessment is available on the Council's website at:
<https://shropshire.gov.uk/planning-policy/local-planning/local-plan-review/evidence-base/>
- 1.7. Although not produced for this purpose, the Shropshire Council LHN Assessment provides endorsement of the housing requirement within the adopted Local Plan, in that housing need over the period from 2016-2026 (aligning with the start date for the proposed plan period within the Local Plan Review and end date of the plan period covered within the adopted Local Plan) is less than and as such would be met by achieving this housing requirement. On the basis of this evidence it is considered appropriate to continue to assess the housing land supply in Shropshire

¹DLUHC (was HCLG), (2021), NPPF – Paragraph 74

against the housing requirement within the adopted Local Plan. However, to demonstrate robustness of methodology, housing land supply will also be calculated against the LHN calculated using Governments standard methodology.

Housing Land Supply

- 1.8. Shropshire Council has undertaken a cautious and robust assessment of the housing land supply in Shropshire. This assessment concludes that deliverable sites in Shropshire include:
- Sites with extant Planning Permission at the 31st March 2021.
 - Sites with an extant and positive Prior Approval decision at the 31st March 2021.
 - Selected sites with a resolution to grant at the 31st March 2021.
 - Selected sites allocated for development within the adopted Local Plan which are likely to be deliverable within five years.
 - Selected sites from the Strategic Land Availability Assessment (SLAA) which are likely to be deliverable within five years.
 - Affordable housing sites, including Homes England (HE) funded sites.
 - Windfall sites.
- 1.9. In order to be considered deliverable *“sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years”*.²
- 1.10. The methodology utilised for this assessment is summarised within the main report of this statement.

Housing Land Requirement and Supply Calculation

- 1.11. The housing requirement and supply for the five year period starting on the 1st April 2021 have been calculated using a methodology generally consistent with that endorsed by the SAMDev Plan Inspector within her Report, whilst also reflecting recent changes to national policy and guidance.
- 1.12. Table 1 provides a summary of the calculation of the five year housing requirement:

Table 1: Summary of Five Year Housing Requirement

Category	Core Strategy Requirement	LHN
(A) 5 Year Requirement:	2021/22	1,530
	2022/23	1,530
	2023/24	1,530
	2024/25	1,530
	2025/26	1,530
	Total	7,650
(B) Under-Delivery: (from earlier in the plan period)	179	0
(C) Buffer: (5% buffer consisting of supply brought forward from later in the plan period to ensure choice and competition. Applied to both the requirement and past under-delivery)	391	294
(D) Total Requirement (A) + (B) + (C):	8,220	6,179

²DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

- 1.13. Table 2 provides a summary of the housing land supply in Shropshire considered deliverable within the next five years, as at the 1st April 2021:

Table 2: Summary of deliverable housing land supply (as at 1st April 2021)

Category	Net Dwellings
(A) Dwellings on sites with Planning Permission*	6,782
(B) Dwellings on sites with Prior Approval*	87
(C) Selected sites with a 'resolution to grant'* Planning Permission	149
(D) Dwellings on allocated sites estimated to be completed within 5 years*	838
(E) Selected proposed allocated sites estimated to be completed within 5 Years*	312
(F) SLAA Sites deliverable within 5 years*	155
(G) Emerging affordable housing sites*	278
(H) Windfall sites**	598
Total: (A) + (B) + (C) + (D) + (E) + (F) + (G) + H	9,199

*A very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; allocation within the adopted Local Plan; proposed allocation within the draft Local Plan; identified within the SLAA; and identified as an Emerging Affordable Housing Site will not be delivered in the five year period has been applied to figures in this table.

**Based on historic delivery rates and expected future trends.

Conclusion

- 1.14. Table 3 brings together the five year housing land requirement and the results of the assessment of the five year housing land supply in Shropshire.
- 1.15. This table confirms that Shropshire Council is able to demonstrate a five year housing land supply as at the 1st April 2021.

Table 3: Comparison: Five Year Housing Requirement and Supply

Category	Core Strategy Requirement	LHN
Total Requirement:	8,220	6,179
Total Supply:	9,199	9,199
Over / Under Provision:	+979	+3,020
Number of Years Supply:	5.60	7.44

- 1.16. Identifying land sufficient for the delivery of enough housing to meet the housing requirement for the area is one of the key responsibilities of a Local Planning Authority. Shropshire Council is in a position where it is able to demonstrate sufficient deliverable sites for **5.60 years supply of deliverable housing land against the housing requirement within the adopted Core Strategy (2011) and 7.44 years supply of deliverable housing land against the local housing need identified using Governments standard methodology**. The focus must therefore be on delivery of sustainable housing, which is ultimately a market function undertaken by the development industry.
- 1.17. Please Note: The sites which make up the various components of the five year housing land supply as at the 31st March 2021 are included within Appendices A-H of the Shropshire Council: Five Year Housing Land Supply Statement (2021).

2. Introduction

- 2.1. The National Planning Policy Framework (NPPF) requires Local Authorities to identify and annually review their housing land supply. The purpose of this assessment is to consider whether there are sufficient deliverable sites within a Local Authority Area to allow for the provision of five years' worth of housing, based on the identified housing requirement set out in adopted strategic policies, or against local housing need where strategic policies are more than five years old, unless policies have been reviewed and found up-to-date³.
- 2.2. In addition, the NPPF specifies that this assessment of housing land supply should allow for the provision of an appropriate buffer, moved forward from later within the plan period, to allow for choice and competition in the market³.
- 2.3. Identifying land sufficient for the delivery of enough housing to meet the housing requirement for the area is one of the key responsibilities of a Local Authority. However, delivery of sustainable housing development is ultimately undertaken by the development industry.
- 2.4. This statement sets out the assessment of housing land supply in Shropshire as at 1st April 2021 and has been undertaken using a cautious and robust methodology which is generally consistent with that endorsed by the Site Allocations and Management of Development (SAMDev) Plan Inspector within her Report⁴ on the SAMDev Plan (2015), whilst also reflecting recent changes to National policy and guidance. The five years covered within the assessment are 2021/22 to 2025/26.
- 2.5. The statement comprises six main components, these are the:
 - Housing land requirement;
 - Housing delivery;
 - Housing land supply;
 - Housing land requirement and supply calculation;
 - Housing land supply conclusion; and
 - Schedules of sites included within the housing land supply.
- 2.6. Within all aspects of this assessment, account has been taken of dwellings recorded as completed at the base date for the supply (31st March 2021) and residential units lost through any development scheme, to produce a net figure.
- 2.7. In order to ensure that the appraisal of the deliverability / developability of the housing land supply is robust, a comprehensive methodology for the appraisal of sites has been utilised, further details of which are provided within this statement. **Ultimately this assessment represents a cautious appraisal and presents a robust position on the housing land supply in Shropshire.**
- 2.8. This assessment will be updated annually as further information becomes available regarding the supply and delivery of housing sites.
- 2.9. In addition, further analysis of the information emerging from this review has been undertaken in order to provide a breakdown of the housing commitments and completions by settlement/group of settlements (where a residential development guideline is identified within the adopted Local Plan). The results of this further analysis are provided as an Annexe to this report.
- 2.10. **Please Note:** A separate assessment of Gypsy and Traveller accommodation (requirement and supply)⁵ has been undertaken.

3. Housing Land Requirement

Identification of the Housing Land Requirement

- 3.1. The NPPF states “*Local Planning Authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old*”⁶.
- 3.2. The adopted Local Plan for Shropshire consists of the Core Strategy (2011); Site Allocations and Management of Development (SAMDev) Plan (2015); and any adopted formal Neighbourhood Plans. The Shropshire Core Strategy (2011) sets out the Council’s vision, strategic objectives and broad spatial strategy to guide future development and growth in Shropshire to 2026. A key aspect of this spatial strategy was the identification of an ambitious housing target for Shropshire within Policy CS1 of 27,500 dwellings between 2006 and 2026, based upon evidence produced in preparation for the West Midlands Regional Spatial Strategy.
- 3.3. The SAMDev Plan (2015) seeks to deliver the housing requirement identified within the Core Strategy (2011) (as recognised in Policy MD1), through the identification of deliverable sites for housing development and policies to appraise development proposals.
- 3.4. Shropshire Council is currently progressing a Local Plan Review. To inform this review, Shropshire Council has completed a Local Housing Need (LHN) Assessment for Shropshire (2020 base date). This assessment was undertaken using Governments standard methodology for calculating local housing need. A report summarising this assessment is available on the Council’s website at: <https://shropshire.gov.uk/planning-policy/local-planning/local-plan-review/evidence-base/>
- 3.5. Although not produced for this purpose, the Shropshire Council LHN Assessment provides endorsement of the housing requirement within the adopted Local Plan, in that housing need over the period from 2016-2026 (aligning with the start date for the proposed plan period within the Local Plan Review and end date of the plan period covered within the adopted Local Plan) is less than and as such would be met by achieving this housing requirement.
- 3.6. Specifically, the first ten years of this proposed plan period within the Local Plan Review (2016-2038) that the LHN assessment has been undertaken to inform coincide with the last ten years of the plan period covered within the adopted Local Plan (2016-2026). According to the LHN, the total housing need calculated over the period from 2016 to 2038 is 25,894, which equates to some 1,177 dwellings per annum. Using this annual need, the total need for the period 2016-2026 can be calculated at 11,770 dwellings. The housing requirement within the adopted Local Plan for this same ten year period is some 14,600⁷, equating to 1,390 dwellings per annum (2016-2021); and 1,530 dwellings per annum (2021-2026). It is therefore apparent that the housing requirement within the adopted Local Plan is sufficient to deliver the LHN for this ten year period.
- 3.7. As such it is considered appropriate to continue to assess the housing land supply in Shropshire against the housing requirement within the adopted Local Plan. However, to ensure robustness, housing land supply will also be calculated against the LHN calculated using Governments standard methodology.

⁶DLUHC (was HCLG), (2021), NPPF – Paragraph 74

⁷Using the housing requirement within Core Strategy (2011) Policy CS1 and the phased approach described in Paragraph 5.5 of the explanatory text to Core Strategy (2011) Policy CS10, against which Shropshire Council is seeking to deliver and which is being used within the calculation of housing land supply, as described below.

Identification of the Annual Housing Land Requirement

Adopted Local Plan

- 3.8. In order to allow the phased release of housing land, the Core Strategy (2011) and SAMDev Plan (2015) identify the mechanisms for the release of sites, so that a five year supply of housing land can be maintained over the plan period. This includes a trajectory for the phased release of housing land across the plan period within the supporting text of Core Strategy (2011) Policy CS10: Managed Release of Housing Land. This trajectory specifies that housing development will be phased in five year time bands, as follows:
- 2006/2011 – 1,190 dwellings per annum.
 - 2011/2016 – 1,390 dwellings per annum.
 - 2016/2021 – 1,390 dwellings per annum.
 - 2021/2026 – 1,530 dwellings per annum.
- 3.9. Shropshire Council considers that this trajectory is the most appropriate mechanism for identifying the annual housing land requirement. The Inspectors Report of the SAMDev Plan corroborates this position concluding that:
- “The purpose of the housing trajectory in the CS is to illustrate the expected rate of housing delivery over the plan period, demonstrating how the Council will maintain delivery of a five-year supply of housing land to meet their housing target. It reflects timing constraints and was accepted by the Inspector. The phasing is to be subject to review, linked to monitoring through the SHLAA and the Five Year Housing Land Supply Statement. The CS therefore provides justification for the Council’s preferred approach (scenario 1) for demonstrating how the SAMDev Plan will maintain delivery of a five year supply of housing land and meet the overall housing requirement. To do otherwise would not properly reflect the CS. The use of the phasing bands set out in the CS as the base requirement against which the five year housing land supply position is to be calculated is therefore justified”.*
- 3.10. The trajectory is also consistent with local circumstances, as it:
- Reflects the impact of the economic downturn, which suppressed housing delivery in the early part of the plan period;
 - Reflects timing constraints due to the need for infrastructure to be put in place;
 - Recognises the acceleration of housing delivery resulting from the adoption of the SAMDev Plan; and
 - Reflects local circumstances and the objectives of the Local Plan.
- 3.11. Furthermore, whilst neither the NPPF nor the National Planning Practice Guidance (NPPG) specify what approach should be utilised for identifying the annual housing land requirement, both make reference to the need to prepare a housing trajectory and review delivery against it⁸.
- 3.12. The use of the trajectory approach was discussed with the Shropshire Council Developer Panel (consisting of representatives of the various scales of the development industry operating in Shropshire) prior to the Examination of the SAMDev Plan, who accepted that the use of the trajectory was reasonable, subject to the approach taken on other methodological issues, which have also been reflected within this assessment.

Housing Need

- 3.13. The LHN Assessment for Shropshire (2020 base date), undertaken using Governments standard methodology for calculating housing need, indicates an annual housing need of 1,177 dwellings.

⁸DLUHC (was HCLG), (2021), NPPF – Paragraph 74

DLUHC (was HCLG), (2019), NPPG – Housing and Economic Land Availability Assessment, Paragraph: 024 Reference ID: 3-024-20190722, Revision date: 22 07 2019

4. Housing Delivery

Annual Housing Completions

Adopted Local Plan

4.1. Using the annual housing land requirement identified within Core Strategy (2011) Policy CS10 and its supporting text, Shropshire Council has undertaken a review of housing completions within previous years of the plan period. The results of this review are summarised in Table 4.

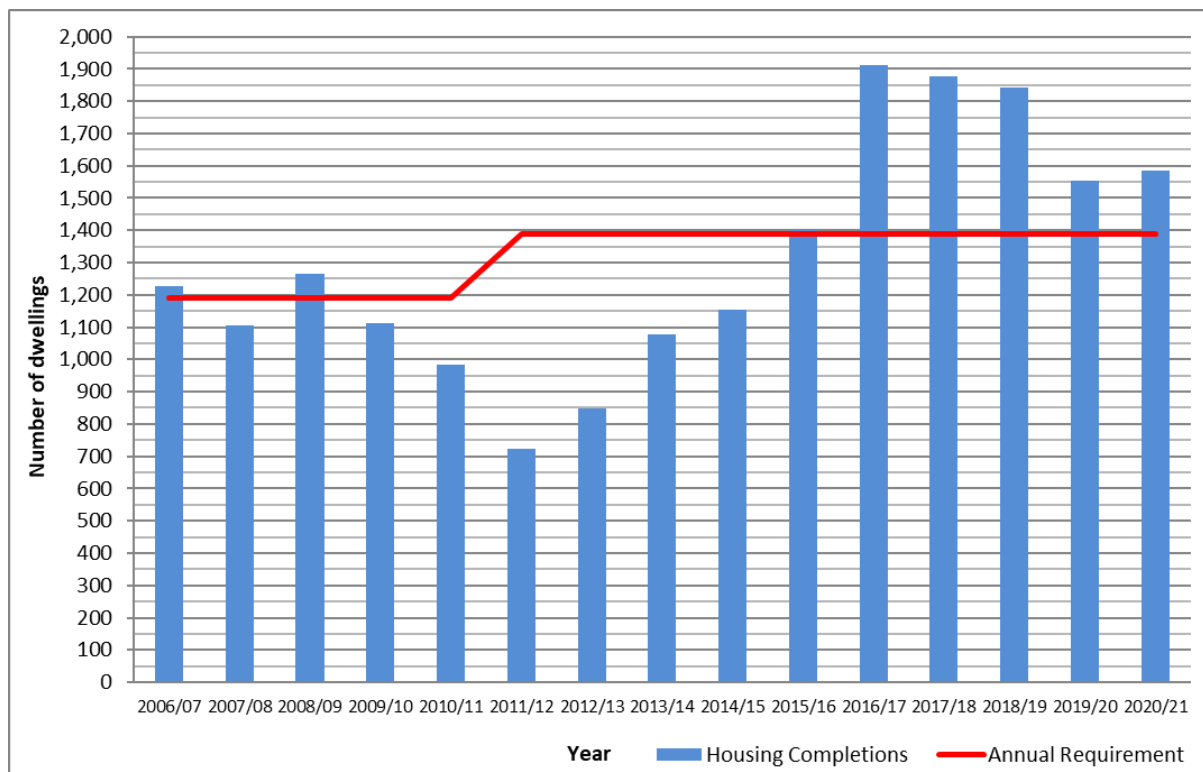

Table 4: Housing Completions in Shropshire (2006/07 - 2020/21)

Financial Year	Annual Requirement ¹	Housing Completions	Over provision / shortfall	Cumulative provision
2006/07	1,190	1,228	+38	+38
2007/08	1,190	1,106	-84	-46
2008/09	1,190	1,265	+75	+29
2009/10	1,190	1,112	-78	-49
2010/11	1,190	984	-206	-255
2011/12	1,390	724	-666	-921
2012/13	1,390	847	-543	-1,464
2013/14	1,390	1,079	-311	-1,775
2014/15	1,390	1,155	-235	-2,010
2015/16	1,390	1,402	+12	-1,998
2016/17	1,390	1,910	+520	-1,478
2017/18	1,390	1,876	+486	-992
2018/19	1,390	1,843	+453	-539
2019/20	1,390	1,554	+164	-375
2020/21	1,390	1,586	+196	-179

¹Identified using the housing trajectory from the supporting text of Policy CS10 of the Core Strategy (2011).

4.2. These results have also been depicted graphically in Figure 1 below:

Figure 1: Housing Completions in Shropshire (2006/07 - 2020/21)

- 4.3. Completion rates experienced over the period from 2011/12 to 2016/17 increased year on year. Rates between 2017/18 and 2020/21 remained high, exceeding the housing requirement. It is considered that this reflects current market conditions and the benefits of an up-to-date Local Plan.

Housing Need

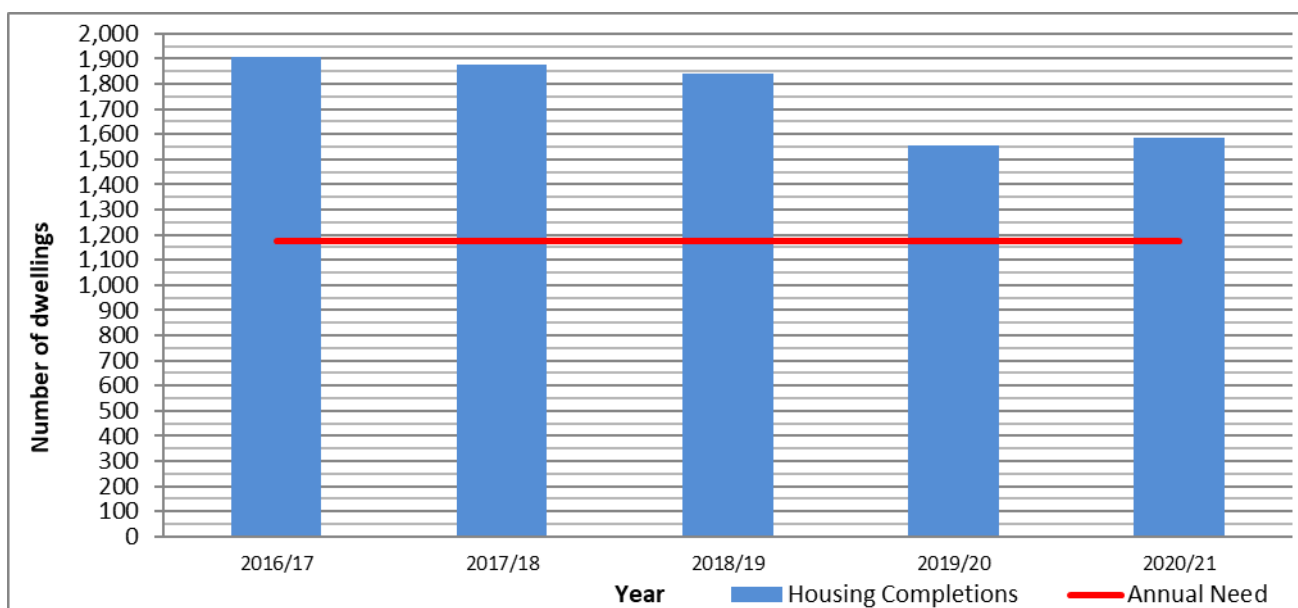

- 4.4. The LHN Assessment (2020 base date) for Shropshire, has been undertaken by Shropshire Council to inform the ongoing Local Plan Review which is proposed to cover the period from 2016 to 2038. The results of an assessment of housing completions against the identified housing need for previous years within this period is summarised in Table 5.

Table 5: Housing Completions in Shropshire (2016/17 - 2020/21)

Financial Year	Annual Need	Housing Completions	Over provision / shortfall	Cumulative provision
2016/17	1,177	1,910	+733	+733
2017/18	1,177	1,876	+699	+1,432
2018/19	1,177	1,843	+666	+2,098
2019/20	1,177	1,554	+377	+2,475
2020/21	1,177	1,586	+409	+2,884

- 4.5. These results have also been depicted graphically in Figure 2 below:

Figure 2: Housing Completions in Shropshire (2016/17 - 2020/21)

- 4.6. Completion rates experienced over the period from 2016/17 to 2020/21 have consistently met the local housing need established within the LHN Assessment (2020 base date).

Past Over/Under-Delivery

Adopted Local Plan

- 4.7. Housing completions in recent years have exceeded the relevant annual housing requirement, reflecting current market conditions and the benefits of an up-to-date Local Plan. However, primarily as a result of the economic downturn, completions in earlier years fell below the relevant annual housing requirement. This has resulted in a cumulative shortage of 178 dwellings.

- 4.8. The results of the economic downturn are particularly evident in Figure 1, which demonstrates the drop in the number of dwellings completed each year between 2008/09 and 2011/12 and the gradual uplift in the number of completions between 2011/12 and 2016/17, with completions remaining high between 2017/18 and 2020/21. Due to the level of completions achieved over the last six years, under-delivery from earlier in the plan period has significantly reduced.
- 4.9. Nationally, a number of methodological approaches have been utilised for redistributing past under-delivery within the plan period, in order to ensure the total housing requirement identified for a plan is met within the lifespan of the plan. The two most common are:
- Requiring past under-delivery to be delivered within the next five years of the plan (often referred to as ‘the Sedgefield approach’).
 - Requiring past under-delivery to be delivered over the remaining plan period (often referred to as ‘the Liverpool approach’).
- 4.10. The NPPG on Housing Supply and Delivery states that *“The level of deficit or shortfall will need to be calculated from the base date of the adopted plan and should be added to the plan requirements for the next 5 year period (the Sedgefield approach), then the appropriate buffer should be applied. If a strategic policy-making authority wishes to deal with past under delivery over a longer period, then a case may be made as part of the plan-making and examination process rather than on a case by case basis on appeal”*⁹.
- 4.11. As such, Shropshire Council will continue to apply ‘the Sedgefield approach’ and include all past under-delivery over the next five years.

Housing Need

- 4.12. The LHN Assessment (2020 base date) has been undertaken to inform the ongoing Local Plan Review, which is proposed to cover the period from 2016 to 2038. Since 2016, the start of this period, housing completions have consistently exceeded need calculated within the LHN Assessment (2020 base date). As such during the period there has been no under-delivery of housing against need.

Housing Delivery Test

- 4.13. The NPPF states *“To maintain the supply of housing, local planning authorities should monitor progress in building out sites which have permission. Where the Housing Delivery Test indicates that delivery has fallen below 95% of the local planning authority’s housing requirement over the previous three years, the authority should prepare an action plan in line with national planning guidance, to assess the causes of under delivery and identify actions to increase delivery in future years”*¹⁰.
- 4.14. Government has published guidance on the housing delivery test, including a measurement rule book, which explains how it is calculated.
- 4.15. In summary, the housing delivery test is *“a percentage measurement of the number of net homes delivered against the number of homes required, as set out in the relevant strategic policies for the areas covered by the Housing Delivery Test, over a rolling three year period”*¹¹.

⁹DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 031 Reference ID: 68-031-20190722, Revision date: 22 July 2019

¹⁰DLUHC (was HCLG), (2021), NPPF – Paragraph 76

¹¹DLUHC (was HCLG), (2018), Housing Delivery Test Measurement Rule Book

4.16. The calculation can therefore be summarised as follows:

$$\text{Housing Delivery Test (\%)} = \frac{\text{Total net homes delivered over three year period}}{\text{Total number of homes required over three year period}}$$

4.17. The guidance then goes on to identify the method for calculating homes delivered and required. In summary:

- *“The number of net homes delivered is the National Statistic for net additional dwellings over a rolling three year period, with adjustments for net student and net other communal accommodation”¹¹.*
- The number of homes required is the lower of:
 - *“the latest adopted housing requirement, including any unmet need from neighbouring authorities which forms part of that adopted housing requirement. This requirement will be the stepped housing requirement (or the annual average requirement where there is no stepped requirement)”¹¹, where the housing requirement is less than five years old; or*
 - *“the minimum annual local housing need figure (and any need from neighbouring authorities which it has been agreed should be planned for, and which has been tested at examination) for that authority calculated with a base date of 1st April each year”¹¹.*

4.18. Government published the results of the Housing Delivery Test 2021 measurement on the 14th January 2021.

4.19. This 2021 measurement indicated that within Shropshire over the relevant three years (2018/19, 2019/20 and 2020/21) housing delivery exceeded housing required, with delivery at 158%¹².

4.20. This calculation undertaken can be summarised as follows:

$$\text{Housing Delivery Test (158\%)} = \frac{\text{Total net homes delivered over three year period (4,971)}}{\text{Total number of homes required over three year period (3,156)}}$$

4.21. Please Note: Within this measurement, the housing completions figure for the 2019/20 period has been updated to reflect updated housing completion data provided by Shropshire Council. However, this update has not included the completed communal accommodation (equating to 12 net dwellings, using the methodology within the Housing Delivery Test Measurement Rulebook). This does not result in a significant change to the results of the measurement.

4.22. If the housing requirement within the adopted Local Plan were used to calculate the Housing Delivery Test over the same three years (2018/19, 2019/20 and 2020/21) housing delivery exceeded housing required, with delivery at 120%.

$$\text{Housing Delivery Test (120\%)} = \frac{\text{Total net homes delivered over three year period (4,983)}}{\text{Total number of homes required over three year period (4,170)}}$$

Housing Buffer

4.23. The NPPF specifies that when assessing the five year housing land supply, Local Authorities should *“identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies, or against their local*

¹²DLUHC (was HCLG), (2020), Housing Delivery Test: 2019 measurement

housing need where the strategic policies are more than five years old. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

a) 5% to ensure choice and competition in the market for land; or

b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or

c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply”¹³.

4.24. The NPPF indicates that significant under delivery of housing will be “*measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement*”¹⁴.

4.25. The Housing Delivery Test indicates that within Shropshire, housing completions over the last three years have exceeded housing required, as such a 5% buffer will be applied.

¹³DLUHC (was HCLG), (2021), NPPF – Paragraph 74

¹⁴DLUHC (was HCLG), (2021), NPPF – Footnote 41

5. Housing Land Supply

Introduction

- 5.1. Shropshire Council has undertaken a cautious and robust assessment of the housing land supply in Shropshire. This part of the statement identifies the methodological approach utilised during this assessment.

Definition of a Dwelling

- 5.2. In order to undertake an assessment of housing land supply, a definition of a dwelling must be identified. This ensures consistency and robustness of the assessment.
- 5.3. Shropshire Council considers that the most appropriate definition of a dwelling for the purposes of an assessment of housing land supply is that provided by the Office for National Statistics (ONS), as it is data collected by the ONS that underpins the assessment of Housing Need, informing the subsequent Housing Requirement.
- 5.4. This definition has also been endorsed by the Department for Housing, Communities and Local Government (HCLG), the department responsible for producing the NPPF and NPPG. The NPPF and NPPG identify the requirement for Local Authorities to undertake an annual assessment of housing land supply and outline the parameters for such an assessment.
- 5.5. Furthermore, the definition is consistent with that applied when determining whether a unit would generate an award under the New Homes Bonus and whether it should be subject to Council Tax.
- 5.6. This definition of a dwelling is as follows: *“a self-contained unit of accommodation. Self-containment is where all the rooms (including kitchen, bathroom and toilet) in a household’s accommodation are behind a single door which only that household can use. Non-self-contained household spaces at the same address should be contained together as a single dwelling. Therefore a dwelling can consist of one self-contained household space or two or more non-self-contained household spaces at the same address”*¹⁵.

Extra Care Accommodation

- 5.7. The term 'extra care accommodation' can be applied to a range of accommodation types intended to meet the needs of those who need assistance (primarily but not necessarily the elderly). These include 'assisted living', 'extra' or 'very sheltered housing', 'close care', 'continuing care retirement communities' (more than 50 units) and 'retirement villages'.
- 5.8. Equally, the use-class of extra care accommodation varies significantly and is not necessarily a reflection of the type of accommodation provided. Therefore, Shropshire Council considers that it is most appropriate to apply the ONS and HCLG definition of a dwelling when determining if these units of accommodation are dwellings.
- 5.9. Where the units comply with this definition (are self-contained, with their own living space, bedroom, bathroom and kitchen behind their own front door) then they are considered to represent a dwelling(s) for the purpose of this assessment of housing land supply.

¹⁵DLUHC (was HCLG), (2020), Housing Flow Reconciliation, https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/905338/Housing_Flows_Reconciliation_guidance.pdf

5.10. The SAMDev Plan Inspector has endorsed the approach taken by Shropshire Council in relation to these units, stating within Paragraph 49 of her report that *“It is reasonable to include care home accommodation within the 5 year housing land supply where it is in the form of self-contained units. Shropshire Council has been very cautious in its consideration of which extra care/care home facilities can be included within the supply, giving consideration to the details of a particular scheme rather than simply the description of development which may be misleading”*¹⁶.

Other communal accommodation for the elderly

5.11. Shropshire Council has only recently started including communal accommodation for the elderly within its housing land supply. This is to reflect guidance within the NPPG on Housing Supply and Delivery, which specifies that *“Local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, as part of their housing land supply. This contribution is based on the amount of accommodation released in the housing market”*¹⁷.

5.12. The NPPG on Housing for Older and Disabled People specifies how such accommodation should be accounted for within the housing land supply, stating: *“plan-making authorities will need to count housing provided for older people against their housing requirement. For residential institutions, to establish the amount of accommodation released in the housing market, authorities should base calculations on the average number of adults living in households, using the published Census data”*¹⁸.

5.13. Currently the average number of adults living in all households is 1.8. As such the calculation of the contribution of completed communal accommodation to total housing supply would be as follows:

*“Net bedrooms in communal accommodation
Average number of adults in households in England (currently 1.8)”*¹⁹

5.14. For consistency, the NPPG on Housing Supply and Delivery also specifies that *“Communal accommodation, including student accommodation and other communal accommodation, can count towards the Housing Delivery Test...”*²⁰.

1.1. Shropshire Council commenced monitoring consents/completions on other communal accommodation for the elderly from the 2018/19 monitoring period. The contribution that such properties make to the housing completions and housing land supply have been calculated consistent with the NPPG.

Student accommodation

5.15. The NPPG on Housing Supply and Delivery states *“All student accommodation, whether it consists of communal halls of residence or self-contained dwellings, and whether or not it is on campus, can in principle count towards contributing to an authority’s housing land supply based on:*

- *The amount of accommodation that new student housing releases in the wider housing market (by allowing existing properties to return to general residential use); and / or*

¹⁷DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 035 Reference ID: 68-035-20190722, Revision date: 22 July 2019

¹⁸DLUHC (was HCLG), (2019), NPPG – Housing for Older and Disabled People, Paragraph: 016a Reference ID: 63-016a-20190626, Revision date: 26 June 2019

¹⁹DLUHC (was HCLG), (2018), Housing Delivery Test Measurement Rule Book

²⁰DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 041 Reference ID: 68-041-20190722, Revision date: 22 July 2019

- *The extent to which it allows general market housing to remain in such use, rather than being converted for use as student accommodation.*
- 5.16. *This will need to be applied to both communal establishments and to multi bedroom self-contained student flats. Several units of purpose-built student accommodation may be needed to replace a house which may have accommodated several students.*
- 5.17. *Authorities will need to base their calculations on the average number of students living in student only accommodation, using the published census data, and take steps to avoid double-counting. The exception to this approach is studio flats designed for students, graduates or young professionals, which can be counted on a one for one basis. A studio flat is a one-room apartment with kitchen facilities and a separate bathroom that fully functions as an independent dwelling”²¹.*
- 5.18. Currently the average number of students in student only households is 2.5. As such the calculation of the contribution of completed communal accommodation to total housing supply would be as follows:

Net bedrooms in student communal accommodation

Average number of students in student only households in England (currently 2.5)²²

- 5.19. For consistency, the NPPG on Housing Supply and Delivery also specifies that “*Communal accommodation, including student accommodation and other communal accommodation, can count towards the Housing Delivery Test...*”²³.
- 5.20. This approach has been applied to student accommodation within the housing land supply from the 2017/18 monitoring period. The contribution that such properties make to the housing completions and housing land supply have been calculated consistent with the NPPG.

Annexes

- 5.21. In conformity with the ONS and HCLG definition of a dwelling, Shropshire Council considers that annexes represent self-contained dwellings where they:
- Are self-contained (have their own living space, bedroom, bathroom and kitchen);
 - Have their own point of access; and
 - Are not subject to conditions on occupancy, that restrict a self-contained household from being formed within them²⁴.
- 5.22. Consequently, where annexes comply with these criteria, they will be considered as part of the review of the housing land supply.

Deliverable and Developable Sites

- 5.23. When reviewing the housing land supply, Shropshire Council is required to undertake an assessment of sites to determine if they are deliverable, developable or not currently considered developable for housing. This will then inform the consideration of when the site is likely to come forward for development.

²¹DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 034 Reference ID: 68-034-20190722, Revision date: 22 July 2019

²²DLUHC (was HCLG), (2018), Housing Delivery Test Measurement Rule Book

²³DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 041 Reference ID: 68-041-20190722, Revision date: 22 July 2019

²⁴DLUHC (was HCLG), (2020), Housing Flow Reconciliation,

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/905338/Housing_Flow_s_Reconciliation_guidance.pdf

5.24. Sites to be included within the first five years of the housing land supply should be considered deliverable. The NPPF states that *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years.*

In particular:

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”²⁵.

5.25. It is apparent that this is not intended to be an exhaustive list of the types of site which can be considered deliverable and that sites do not need to involve major development and have Planning Permission or detailed Planning Permission to be included within the first five years of the housing land supply. Rather the requirement is that there is clear evidence, through assessment of a site, that concludes that it is **available now**; offers a **suitable location for development now**; and is **achievable** with a realistic prospect that **housing will be delivered** within five years.

5.26. Sites can be included within the housing land supply beyond the first five years where they are considered developable. For a site to be considered developable the NPPF requires that *“sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged”²⁵.*

5.27. For the purposes of this statement deliverable and developable sites include:

- Sites with extant Planning Permission at the 31st March 2021.
- Sites with an extant and positive Prior Approval decision at the 31st March 2021.
- Selected sites with a resolution to grant at the 31st March 2021.
- Selected sites allocated for development within the adopted Local Plan which are likely to be deliverable within five years.
- Selected sites from the Strategic Land Availability Assessment (SLAA) which are likely to be deliverable within five years.
- Affordable Housing Sites Including Homes England (HE) Funded Sites.
- Windfall sites.

Build Rates and Lead-in Times

5.28. When reviewing housing land supply, Shropshire Council must also make assumptions about both lead-in times and build rates on development sites.

Lead-in Times

5.29. Lead-in time represents the period of time before construction starts on a site. There are a range of factors that will dictate lead-in times, however to ensure consistency in its assessment, Shropshire Council has identified very cautious

²⁵DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

standard assumptions on lead-in times, which reflects the broad range of applications received.

5.30. The Council's assumptions on lead-in times assume a period of between 10-27 months from the preparation of an application to the completion of the first dwelling on a site. This reflects the significant range of applications the Council receives, which in turn reflects the varied nature of the County. This includes a significant volume of applications on small sites which will usually be subject to less pre-application discussion and negotiation on Section 106 Legal Agreements, through to larger schemes, mixed use proposals and urban extensions in Shrewsbury; the market towns; and key centres. It is considered that the assumptions made by the Council on lead-in times are both realistic and reflective of site/local circumstances.

5.31. Table 6 summarises the Council's lead-in time assumptions:

Table 6: 'Standard' Lead-in Times in Shropshire

Action	Months as a range		
Preparation of Application	1	6	8-21
Local Planning Authority Consideration of Application	2	3	
Completion of S.106 Legal Agreement	1	6	
Preparation of Reserved Matters Application (if applicable) & Discharging of Conditions	2	3	
Local Planning Authority Consideration of Reserved Matters Application(s) (if applicable)	2	3	
Site Mobilisation	2	6	2-6
Infrastructure Implementation			
Build First Dwelling			
Totals:	10	27	10-27

5.32. Development occurring on larger sites in Shropshire is more than capable of commencement within six months following the grant of approval, with examples provided below. This is not surprising considering many larger sites are Local Plan allocations and benefit from significant amounts of design work, site marketing and discussions with the Council prior to the submission of a Planning Application.

5.33. For instance:

- 13/03055/FUL Land at Aston Street, Shifnal (115 dwellings): Decision notice issued on 24th March 2014. Commencement on 7th April 2014. Development completed during 2017/18.
- 13/00893/FUL Phase 1 of the Shrewsbury South SUE (291 dwellings): Decision notice issued on 9th May 2014. Commencement on 27th May 2014. As at the 31st March 21, 260 dwellings have been completed on this site.
- 14/01264/FUL Mount Farm, Whitchurch (100 dwellings): Decision notice issued on 23rd December 2014. Commencement on 23rd March 2015. Development completed during 2018/19.
- 14/05343/FUL Land West of Ellesmere Road, Shrewsbury (147 dwellings): Decision notice issued on 26th March 2015. Commencement on 15th June 2015. Development completed during 2018/19.

- 16/02618/FUL Phase 3 of the Shrewsbury South SUE (159 dwellings): Decision notice issued on 19th December 2016. Commencement on 16th January 2017. Development completed during 2019/20.
- 16/05474/FUL Land East of A53, Shrewsbury Road, Shawbury (50 dwellings): Decision notice issued 4th October 2017. Commencement on 21st October 2017. Development completed during 2019/20.
- 17/05554/FUL Land to the North of Hall Bank, Pontesbury (86 dwellings): Decision notice issued 10th September 2018. Commencement on 17th September 2018. As at 31st March 2021, 65 dwellings have been completed on this site.
- 21/01748/FUL Land to North of Oteley Road, Shrewsbury (66 bedroom care home): Decision notice issued 9th August 2021. Commencement on 6th October 2021. Development is progressing at pace.

- 5.34. These assumptions represent a cautious assessment of the timescales taken to undertake key stages in the development process such as preparing for and undertaking pre-application discussions; carrying out supporting investigations and surveys; securing Planning Permission; completing Section 106 Legal Agreements; discharging pre-commencement conditions; and undertaking pre-construction works.
- 5.35. Where possible, to increase accuracy of assumptions on lead-in times, they have been further refined through discussions with landowners, land promoters and developers which ensure that Shropshire Council can have significant confidence that the assumptions for each site are realistic.

Build Rates

- 5.36. Build rates represent the number of dwellings that it is anticipated will be completed on a site, per-annum. Similar to lead-in times, there are a range of factors that will dictate build rates.
- 5.37. To ensure consistency Shropshire Council has identified 'standard' build rates, based on its own monitoring of development activity and feedback from the Shropshire Council Developer Panel (consisting of representatives of the various scales of the development industry operating in Shropshire), which indicated that build rates on sites in Shropshire are around 30-40 units/year. It is the experience of many local developers that, "the right site sells well" in Shropshire.
- 5.38. Further feedback from the Panel has also indicated that on large sites (benchmark estimate of 250 dwellings plus) that the build-out rate could be multiplied to take into consideration that two or more developers may be constructing housing units at the same time.
- 5.39. These 'standard' build rates are summarised in the Table 7 below:

Table 7: 'Standard' Build Rates in Shropshire

Location of Development	Anticipated Build Rate*
North Shropshire	25 dwellings/year
Central Shropshire	38 dwellings/year
South Shropshire	36 dwellings/year

*Sites of more than 250 dwellings will be subject to a large site multiplier

- 5.40. It is considered that these build rates represent a fair and reasonable reflection of the local market.

- 5.41. However, where possible, to further increase accuracy of assumptions on build rates, proactive discussions were undertaken with landowners, land promoters and developers regarding build-rates on specific sites, to ensure that Shropshire Council can have significant confidence that the assumptions for build rates are realistic.

Sites with Planning Permission as at 31st March 2021 (Appendices A and B)

- 5.42. The NPPF states that: *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”²⁶.

- 5.43. Consistent with the NPPF, Shropshire Council considers that the majority of sites with an extant Planning Permission can be considered deliverable and are therefore suitable for inclusion within the first five years of the housing land supply. Where the extant Planning Permission is an outline consent for major development, the sites deliverability has been documented within Appendix B.
- 5.44. To ensure the robustness of this assessment of housing land supply, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission will not be delivered in the five year period. This is an approach utilised by many Local Planning Authorities; is in line with standard industry practice; and was endorsed by the SAMDev Plan Inspector within her report.
- 5.45. Ultimately there is no mandatory requirement for a non-delivery rate to be applied to sites with Planning Permission within the housing land supply. Shropshire Council considers that the use of a consistent assumption that 10% of deliverable dwellings on sites with Planning Permission will not be delivered in the five year period is appropriate and represents a robust approach to variations in the market and other factors that might inhibit development and ensures a comprehensive and consistent assessment of housing land supply.
- 5.46. Shropshire Council recognises that some sites will take longer than five years to build out, therefore the number of dwellings expected to be completed annually on deliverable land has been informed by the ‘standard’ assumptions on lead-in times and build rates – refined through proactive discussions with landowners, land promoters and developers where possible. Where development of a site is expected to take more than five years to complete, only the equivalent part of the site is included within the first five years of the housing land supply.
- 5.47. These sites are identified within Appendix A and B of this document.

²⁶DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

Sites with a Prior Approval decision as at 31st March 2021 (Appendix C)

- 5.48. Sites with Prior Approval are comparable to sites with detailed Planning Permission.
- 5.49. As such, similar to sites with Planning Permission, Shropshire Council considers that the majority of sites with an extant Prior Approval decision (where the decision is that either Prior Approval is not required or is approved) can be considered deliverable and are therefore suitable for inclusion within the first five years of the housing land supply.
- 5.50. This is consistent with Governments stated intention when they introduced amendments to Permitted Development Rights, for example: *“under new Class MB agricultural buildings will be able to change to up to three dwelling houses (C3), and carry out associated building works, so that rural businesses can diversify while increasing housing supply”*²⁷ (my emphasis).
- 5.51. However, similar to sites with Planning Permission, it is recognised that a small proportion of dwellings on sites with a Prior Approval decision (where the decision is that either Prior Approval is not required or is approved) that are considered deliverable may not be delivered in the five year period. With this consideration in mind and to ensure the robustness of this assessment, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on sites with Prior Approval will not be delivered in the five year period.
- 5.52. These sites are identified within Appendix C of this document.

Sites with a ‘resolution to grant’ as at 31st March 2021 (Appendices D)

- 5.53. In some cases, Shropshire Council has ‘resolved to grant’ Planning Permission on a site, subject to the signing of a S106 Legal Agreement. Selected sites with a ‘resolution to grant’ Planning Permission have been included in the housing supply, as they are considered to be deliverable (as demonstrated by the fact that they have sufficiently progressed to the point where a Planning Application has been submitted and a ‘resolution to grant’ the Planning Application has been reached).
- 5.54. When considering the deliverability of sites with a ‘resolution to grant’, Shropshire Council has exercised caution in order to ensure that its assessment of the housing land supply is robust. Therefore, sites have only been considered deliverable where they comply with one or more of the following criteria:
- The site subject to the Planning Application is an adopted Local Plan allocation.
 - The site subject to the Planning Application is located within a settlement development boundary and the settlement has been identified as a suitable location for infill/windfall development within the SAMDev Plan (2015).
 - The site subject to the Planning Application is for affordable housing, rural workers housing or an agricultural workers dwelling.
 - The site subject to the Planning Application is for the conversion of an existing building, such as a barn.
 - The site subject to the Planning Application is for the redevelopment of a select number of sustainable brownfield sites.
 - The site subject to the Planning Application had a resolution to grant subject to completion of a S106 Legal Agreement at the 31st March 2021 and has subsequently been approved.

²⁷Explanatory Memorandum to the Town and Country Planning (General Permitted Development (Amendment and Consequential Provisions) (England) Order 2014

- 5.55. Furthermore, for consistency, where the ‘resolution to grant’ relates to outline consent for major development, the sites deliverability has been further documented.
- 5.56. However, despite this robust approach to filtering Planning Applications with a ‘resolution to grant’, it is recognised that not all dwellings on sites with a ‘resolution to grant’ Planning Permission that are considered deliverable will eventually have a successfully signed S106 Legal Agreement and be implemented within the five year period. Consequently, Shropshire Council has again applied a very cautious assumption that 10% of deliverable dwellings on sites with a ‘resolution to grant’ Planning Permission will not be delivered in the five year period.
- 5.57. **It should be stressed, of course, that inclusion of a Planning Application with a ‘resolution to grant’ within this assessment of Housing Land Supply is without prejudice to the completion of the S106 Legal Agreement and final Planning Application decision.**
- 5.58. These sites are identified within Appendix D of this document.

Sites allocated for development within the Local Plan (Appendix E)

- 5.59. Within Shropshire, strategic locations for development were identified in the adopted Core Strategy (2011) and sites have been allocated for development within the adopted SAMDev Plan (2015). Further information on these two documents is available in Chapter 3: Housing Land Requirement.

Sustainable Urban Extensions (SUE’s)

- 5.60. The Core Strategy (2011) identifies Sustainable Urban Extensions (SUE’s) in Shrewsbury and Oswestry (Core Strategy (2011) Policies CS2 and CS3 respectively) as strategic locations for growth. These SUE’s are summarised in Table 8:

Table 8: Shropshire Sustainable Urban Extensions

Location	Name	Status
Shrewsbury	Shrewsbury South SUE	<p>Phase 1 of the Residential Development on the Shrewsbury South SUE:</p> <ul style="list-style-type: none"> • Full Planning Permission (13/00893/FUL) granted in May 2014 for 291 dwellings (majority of phase 1), with development also commencing in May 2014. Development is progressing at pace. • Full Planning Permission (21/01748/FUL) granted for a 66 bedroom care home in August 2021 (remainder of phase 1), with development commencing in October 2021. Development is progressing at pace. <p>Phase 2 of the Residential Development on the Shrewsbury South SUE:</p> <ul style="list-style-type: none"> • Outline Planning Permission (14/04428/OUT) granted for up to 550 dwellings and a 70 bed care home in June 2015. -A series of Reserved Matters Applications for engineering works; construction of the access road; and the location of the attenuation ponds were granted in March; May; and September 2016. Engineering works subsequently commenced; the balancing pond formed; and multiple points of access to the site established. -Reserved Matters Planning Permission (17/06149/REM) granted in April 2018 for 164 dwellings and development of these dwellings has commenced. -Reserved Matters Planning Permission (19/00048/REM) granted in April 2019 for 49 dwellings and development of these dwellings has commenced. -Reserved Matters Planning Permission (19/04460/REM) granted in March 2020 for 175 dwellings and development of these dwellings has commenced. -Reserved Matters Planning Permission (19/05470/REM) granted in April 2020 for 162 dwellings and development of these dwellings has commenced. • Alternative Outline Planning Application (21/02982/OUT) pending

Location	Name	Status
		<p>consideration for 35 dwellings on the element of the site with Outline Planning Permission for a 70 bed care home (the remaining residential component subject to this Outline Planning Permission).</p> <ul style="list-style-type: none"> Hybrid Planning Permission (18/04194/FUL) granted for a supermarket (full), 80 bedroom care home and extra-care facility (outline) granted in September 2018. Reserved Matters Planning Permission granted for the 80 bedroom care home in February 2020. Development has commenced. <p>Phase 3 of the Residential Development on the Shrewsbury South SUE:</p> <ul style="list-style-type: none"> Full Planning Permission (16/02618/FUL) for 159 dwellings was approved in December 2016. Development is progressing at pace. <p>Wider Development:</p> <ul style="list-style-type: none"> Other development including a supermarket and garden centre have been approved and completed. <p>General:</p> <ul style="list-style-type: none"> There are now numerous outlets operating across Shrewsbury South SUE and development is progressing at pace. However, Shropshire Council have continued to apply very cautious assumptions regarding lead-in times and delivery rates. As such, forecasted completion rates for this site are very likely to be overly cautious.
Shrewsbury	Shrewsbury West SUE	<p>Phase 1 of the Residential Development on the Shrewsbury West SUE:</p> <ul style="list-style-type: none"> Outline Planning Permission (14/00246/OUT) for 296 dwellings granted in September 2019. Full Planning Application (20/01957/FUL) for 345 dwellings has subsequently been received and is pending consideration. The area subject to this Full Planning Application is included within the extent of the area subject to Outline Planning Application (14/00246/OUT). <p>Subsequent Phases of Residential Development on the Shrewsbury West SUE:</p> <ul style="list-style-type: none"> Willing landowners/developers committed to bringing the subsequent phases forward for development. <p>General:</p> <ul style="list-style-type: none"> Forecasted completion rates for this site are very likely to be overly cautious.
Oswestry	Eastern Gateway SUE	<p>Phases 1 and 2 of the Residential Development on the Eastern Gateway SUE:</p> <ul style="list-style-type: none"> Outline Planning Permission (16/02594/OUT) granted for up to 600 dwellings in April 2020. Reserved Matters Planning Application (21/04449/REM) now pending consideration for phase 1 of the development (284 dwellings). <p>Phase 3 of the Residential Development on the Shrewsbury South SUE:</p> <ul style="list-style-type: none"> Outline Planning Permission (17/06025/OUT) granted for up to 150 dwellings in December 2020. Reserved Matters Planning Application (21/03584/REM) now pending consideration for 120 dwellings. <p>Phase 4 of the Residential Development on the Shrewsbury South SUE:</p> <ul style="list-style-type: none"> Willing landowner committed to bringing the phase forward for development. <p>General:</p> <ul style="list-style-type: none"> Forecasted completion rates for this site are very likely to be overly cautious.

5.61. The latest information available has been drawn upon to assess the deliverability (including lead-in times and delivery rates) of each of the SUE's as part of this assessment of the housing land supply in Shropshire.

Other Allocated Sites

5.62. The adopted SAMDev Plan (2015) identifies further housing land allocations, which together with other sources of housing land supply are sufficient to ensure the delivery of the agreed Core Strategy (2011) vision and housing requirements.

Deliverability of Allocations

5.63. The NPPF states that: *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”²⁸.

5.64. Consistent with this definition of deliverable, Shropshire Council has taken a cautious approach to the inclusion of SAMDev Plan (2015) allocations within the first five years of the housing land supply, only including those which are considered to be available now, offer a suitable location for development now, and are achievable with a realistic prospect that housing will be delivered on the site within five years. The availability, suitability and achievability of allocations has been documented within Appendix E.

5.65. Furthermore, only the numbers of homes that are considered deliverable within five years are counted, which in many cases is considerably less than the sites' full capacity. Deliverability has been informed by 'standard' lead in times and build rates identified for this assessment, refined through pro-active discussions with landowners, land promoters and developers to ensure that Shropshire Council can have significant confidence that assumptions for each site are realistic.

5.66. To ensure the robustness of this assessment, a very cautious assumption that 10% of deliverable dwellings on allocated sites will not be delivered in the five year period is applied.

5.67. Please Note: It must be stressed, of course, that inclusion of strategic locations identified in the Core Strategy (2011) and SAMDev Plan (2015) allocations in the housing land supply is without prejudice to the Local Plan process or the determination of any planning application for the site.

5.68. These sites are identified within Appendix E of this document.

²⁸DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

Selected sites proposed for allocation for development within the draft Shropshire Local Plan (Appendix F)

- 5.69. Shropshire Council is at a relatively advanced stage of a Local Plan Review. Specifically, a number of Regulation 18 (plan-making) consultations and a Regulation 19 (pre-submission) consultation have been undertaken. The draft Shropshire Local Plan (2016 - 2038) was subsequently submitted to the Secretary of State for examination on the 3rd September 2021.
- 5.70. The NPPF stipulates the factors which effect the amount of weight that can be applied to relevant policies in emerging plans, these are:
- “a) the stage of preparation of the emerging plan (the more advanced its preparation, the greater the weight that may be given);*
- b) the extent to which there are unresolved objections to relevant policies (the less significant the unresolved objections, the greater the weight that may be given); and*
- c) the degree of consistency of the relevant policies in the emerging plan to this Framework (the closer the policies in the emerging plan to the policies in the Framework, the greater the weight that may be given)”²⁹.*
- 5.71. Reflecting these considerations, it is considered that given the relatively advanced stage of the Local Plan Review, some limited weight can be applied to relevant draft policies in the draft Shropshire Local Plan, as a material consideration in the decision making process on Planning Applications. However, it is also considered that this limited weight is reduced in circumstances where there are relevant unresolved objections.
- 5.72. Ultimately, it is acknowledged that the draft Shropshire Local Plan will only carry full weight upon its adoption.
- 5.73. However, a number of sites proposed for allocation within the draft Shropshire Local Plan have sufficiently progressed to provide confidence that they are deliverable. The NPPF states *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years.”³⁰*
- 5.74. Specifically, sites proposed for allocation that were the subject of a Planning Application that had sufficiently advanced to provide confidence that they are deliverable within the five year period have been included within the five year housing land supply. It is acknowledged that this is a cautious approach and significantly underestimates the contribution from proposed allocated sites towards the housing land supply for the next five years, but it is ultimately considered that this provides further confidence in the robustness of this assessment.
- 5.75. Please Note: It must be stressed, of course, that inclusion of selected proposed allocations identified in the draft Shropshire Local Plan in the housing land supply is without prejudice to the Local Plan examination process or the determination of any planning applications for these sites.**
- 5.76. These selected sites are identified within Appendix H of this document.

²⁹DLUHC (was HCLG), (2021), NPPF – Paragraph 48

³⁰DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

Sites from the Strategic Land Availability Assessment (SLAA) (Appendix G)

- 5.77. Within Shropshire, windfall development on unallocated sites forms a significant proportion of all residential development that takes place. Indeed, the adopted Core Strategy (2011) and SAMDev Plan (2015) and the draft Shropshire Local Plan all recognise the importance of windfall development in Shropshire and make allowances for and facilitate the delivery of appropriately located windfall sites (where they accord with the policies within the adopted or draft Local Plan). This supports the conclusion that windfall development does and will continue to represent an important part of the housing land supply.
- 5.78. Furthermore, best available data on past completions continues to support the importance of windfall sites as an important and appropriate source of supply for residential development. Specifically, over the last five years (2016/17-2020/21), some 5,622 dwellings have been completed on windfall sites in Shropshire (1,716 dwellings on small scale windfall sites of less than 5 dwellings and 3,906 dwellings on medium and large scale windfall sites of 5 or more dwellings).
- 5.79. The Strategic Land Availability Assessment (SLAA) is a technical assessment of the suitability; availability; and achievability (including viability) of land for housing and employment development. The SLAA considers sites and broad locations for residential development where they are capable of delivering 5 or more dwellings. Generally, sites of less than 0.2 hectares are unlikely to achieve these thresholds.
- 5.80. The SLAA was published in late 2018, following a call for sites in early 2017. In excess of 2,000 sites and broad locations were included within the assessment which will inform the ongoing Local Plan Review.
- 5.81. As the SLAA assessment includes consideration of both sustainability (in accordance with the NPPF); and the suitability, availability and achievability (including viability) of sites, consistent within the definition of deliverability, it is considered reasonable to include the accepted sites which have an expected yield in the plan period, within the housing land supply.
- 5.82. However, to ensure further robustness, a full site by site review has been undertaken of SLAA sites as part of this assessment of housing land supply and only those where the information available gives confidence that the sites are deliverable, have been included within the first five years of the housing land supply. Those sites considered to be developable within the plan period have been included within the housing land supply for the remainder of the plan period.
- 5.83. This review also included consideration of any updated information regarding site capacity and build rates - reflecting feedback from relevant site promoters, agents and/or developers.
- 5.84. Around 75 sites are included within the housing land supply of which around 35 sites are considered deliverable within the next five years.
- 5.85. To ensure the robustness of this assessment, a very cautious assumption that 10% of deliverable dwellings on SLAA sites will not be delivered in the five year period is applied.
- 5.86. Please Note: The SLAA database is continuously updated. Appendix G includes those SLAA sites from the current active SLAA database that are considered likely to be delivered within the next five years or developable within the plan period. It should be noted that SLAA sites represent only those sites which the Council are aware of and are included within the SLAA database. In reality, there is likely to be a significant amount of additional site opportunities within the development boundaries of identified settlements.
- 5.87. **It should be stressed, of course, that inclusion of a SLAA site within this assessment of Housing Land Supply is without prejudice to the determination of any planning application for that site.**

Affordable Housing Sites Including Homes England (HE) Funded Sites (Appendix H)

- 5.88. Policies CS5 and CS11 of the Core Strategy (2011); Policy MD7a of the SAMDev Plan (2015); and the supplementary guidance within the accompanying Type and Affordability of Housing Supplementary Planning Document (SPD), support the provision of **affordable housing**, including on sites outside settlement development boundaries and in rural hamlets, as an exception to normal planning policies – subject to specific policy requirements. Furthermore, the Council has consistently enabled such exception sites to come forward over the years, with great success.
- 5.89. A detailed review of affordable housing sites has been undertaken for this statement, with many such sites being included within the list of sites with Planning Permission; a Planning Application with a ‘resolution to grant’ or a site submitted to the SLAA and considered deliverable or developable.
- 5.90. However, there are a limited number of sites that Shropshire Council is aware of, on which schemes are being progressed, including those on which applications for Homes England (HE) funding have/will be submitted which do not yet have a Planning Permission/Planning Application with a ‘resolution to grant’ or were not submitted for consideration within the SLAA.
- 5.91. Shropshire Council has therefore undertaken a separate appraisal of these sites. Those which are considered deliverable have been included within this assessment of housing land supply. These sites are identified within Appendix H of this document.
- 5.92. **Please Note:** Shropshire Council has a close working relationship with Affordable Housing providers. We understand that there is a long lead-in process to taking forward an Affordable Housing scheme, particularly where it is subject to HE funding – which often also requires specific delivery timescales. Sites that have progressed to the point of applying for funding have had significant pre-application and community consultation, consequently the Affordable Housing providers and Shropshire Council have confidence that the sites that are considered deliverable within this assessment will come forward within the 5 year period.
- 5.93. To ensure the robustness of this assessment, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on affordable housing sites including HE funded sites will not be delivered in the five year period.
- 5.94. **However, it should be stressed, of course, that the inclusion of affordable housing sites including HE funded sites within this assessment of Housing Land Supply is without prejudice to the determination of any planning application for that site.**

Windfall Sites (Appendix I)

- 5.95. In addition to the larger SLAA sites previously considered, there is a need to take into account individual and small housing schemes. Small scale windfall sites of **less than 5 dwellings** have always represented a significant component of the housing land supply in Shropshire, and it is anticipated that this will remain the case.
- 5.96. As already documented, the adopted Core Strategy (2011) and SAMDev Plan (2015) and the draft Shropshire Local Plan all recognise the importance of windfall development in Shropshire and make allowances for and facilitate the delivery of appropriately located windfall sites (where they accord with the policies within the

adopted or draft Local Plan). This supports the conclusion that windfall development does and will continue to represent an important part of the housing land supply.

- 5.97. Furthermore, as also documented above, best available data on past completions continues to support the importance of windfall sites as an important and appropriate source of supply for residential development. Specifically, over the last five years (2016/17-2020/21), some 5,622 dwellings have been completed on windfall sites in Shropshire (1,716 dwellings on small scale windfall sites of less than 5 dwellings and 3,906 dwellings on medium and large scale windfall sites of 5 or more dwellings).
- 5.98. Whilst the average completion rate on all small scale windfall sites of less than 5 dwellings over the plan period thus far (2006/07-2020/21), is some 373 dwellings per annum.
- 5.99. These trends support the conclusion that windfall development does and will continue to represent an important part of the housing land supply.
- 5.100. The importance of small scale windfall housing in Shropshire is not surprising given that Shropshire is a large rural County containing the town of Shrewsbury, 18 other smaller settlements identified as market towns or key centres; and hundreds of other villages and hamlets. Consequently, there is a constant and significant recycling of previously developed land; significant numbers of infill developments; high numbers of conversions of barns and other rural buildings; and high uptake of affordable housing under the 'build your own' affordable housing scheme (supported by Shropshire Council within Policies CS5 and CS11 of the Core Strategy (2011); MD7a of the SAMDev Plan (2015); and supplementary guidance within the Type and Affordability of Housing SPD).
- 5.101. The above factors therefore endorse the inclusion of a very cautious 299 dwellings per year, for years 4 and 5 of the supply.

Lapsed Planning Permission (Appendix J)

- 5.102. Often sites that have previously secured Planning Permission where the permission is not subsequently implemented within permitted timescales remain developable. Specifically, in many circumstances the site remains suitable for development and available for development and will be achievable later within the plan period, particularly as market conditions continue to improve.
- 5.103. Consequently, Shropshire Council has undertaken an assessment of sites with capacity for more than five dwellings (as it is anticipated that sites of less than 5 dwellings would be included within the windfall allowance, as identified in Appendix I of this document) in order to determine whether they are suitable for inclusion within the housing land supply.
- 5.104. Whilst none of these sites have been included within the first five years of the housing land supply, many have been deemed suitable for inclusion within the latter part of the plan period. These sites are identified within Appendix J of this document.
- 5.105. **However, it should be stressed, of course, that inclusion of a site with a lapsed Planning Permission within this assessment of Housing Land Supply is without prejudice to the determination of any future planning application for that site.**

6. Housing Land Supply – Calculation

Shropshire Five Year Housing Land Requirement

- 6.1. Using the methodological approach outlined in Chapters 3 and 4, the housing requirement for the five year period starting on the 1st April 2021 has been calculated.
- 6.2. Table 9 provides a summary of the calculation of the five year housing requirement:

Table 9: Summary of Five Year Housing Requirement

Category		Core Strategy Requirement	LHN
(A) 5 Year Requirement:	2021/22	1,530	1,177
	2022/23	1,530	1,177
	2023/24	1,530	1,177
	2024/25	1,530	1,177
	2025/26	1,530	1,177
	Total	7,650	5,885
(B) Under-Delivery: (from earlier in the plan period)		179	0
(C) Buffer: (5% buffer consisting of supply brought forward from later in the plan period to ensure choice and competition. Applied to both the requirement and past under-delivery)		391	294
(D) Total Requirement (A) + (B) + (C):		8,220	6,179

Shropshire Five Year Housing Land Supply

- 6.3. Using the methodological approach outlined in Chapter 5, a comprehensive assessment of housing land in Shropshire has been undertaken.
- 6.4. Table 10 provides a summary of the housing land supply in Shropshire considered deliverable within the next five years, as at the 1st April 2021:

Table 10: Summary of deliverable housing land supply (as at 1st April 2021)

Category	Net Dwellings
(A) Dwellings on sites with Planning Permission*	6,782
(B) Dwellings on sites with Prior Approval*	87
(C) Selected sites with a 'resolution to grant'* Planning Permission	149
(D) Dwellings on allocated sites estimated to be completed within 5 years*	838
(E) Selected proposed allocated sites estimated to be completed within 5 Years*	312
(F) SLAA Sites deliverable within 5 years*	155
(G) Emerging affordable housing sites*	278
(H) Windfall sites**	598
Total: (A) + (B) + (C) + (D) + (E) + (F) + (G) + H	9,199

*A very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; allocation within the adopted Local Plan; proposed allocation within the draft Local Plan; identified within the SLAA; and identified as an Emerging Affordable Housing Site will not be delivered in the five year period has been applied to figures in this table.
 **Based on historic delivery rates and expected future trends.

- 6.5. Shropshire Council includes a very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; ‘resolution to grant’ Planning Permission; allocation within the adopted Local Plan; identified within the SLAA Sites; and Emerging Affordable Housing Sites will not be delivered in the five year period. This assumption is reflected within the figures provided within Table 10 of this document.
- 6.6. The actual number of dwellings considered deliverable in the next 5 years in each of these categories before this deduction is applied are:
- Dwellings on sites with Planning Permission: 7,535 dwellings.
 - Dwellings on sites with Prior Approval: 97 dwellings.
 - Dwellings on selected sites with a ‘resolution to grant’ Planning Permission: 165 dwellings.
 - Dwellings on selected sites allocated for development: 931 dwellings.
 - Dwellings on selected sites proposed for allocation for development: 347 dwellings.
 - Dwellings on selected SLAA sites: 172 dwellings.
 - Dwellings on sites seeking Homes England (HE) funding: 309 dwellings.
- 6.7. The sites which make up the various components of the five year housing land supply as at the 1st April 2021 are included within Appendices A-I of this statement.

Comparison: Shropshire Five Year Housing Land Requirement & Supply

- 6.8. Table 11 brings together the five year housing land requirement and the results of the assessment of the five year housing land supply in Shropshire.
- 6.9. This table confirms that Shropshire Council is able to demonstrate a five year housing land supply as at the 1st April 2021.

Table 11: Comparison: Five Year Housing Requirement and Supply

Category	Core Strategy Requirement	LHN
Total Requirement:	8,220	6,179
Total Supply:	9,199	9,199
Over / Under Provision:	+979	+3,020
Number of Years Supply:	5.60	7.44

7. Housing Land Supply – Conclusion

Five Year Housing Land Supply

- 7.1. This comprehensive review of the housing land supply establishes that there are sufficient deliverable sites to allow for the provision of five years' worth of housing (plus an additional buffer moved forward from later within the plan period, to allow for choice and competition in the market), based on the identified housing requirement for Shropshire. Indeed, there is currently **5.60 years supply of deliverable housing land against the housing requirement within the adopted Core Strategy (2011) and 7.44 years supply of deliverable housing land against the local housing need identified using Governments standard methodology.**

Conclusion

- 7.2. Shropshire Council, through its Local Plan has positively planned for an ambitious but deliverable level of housing development to 2026. This trend is continuing with ongoing work on the Local Plan Review which is also proposing an ambitious but deliverable housing requirement.
- 7.3. Furthermore, the Council was involved in the production of the Marches Local Enterprise Partnership's (LEP) High Level Planning and Housing Statement "Poised for Growth"³¹. As these documents make clear, Shropshire Council is committed to creating an environment for successful housing delivery, and is working with the development industry and local communities to ensure that sustainable development is brought forward.
- 7.4. The reality is there is a significant and growing supply of housing land in Shropshire, sufficient to demonstrate a housing land supply to meet the housing land requirement; address past under-delivery; and allow for necessary buffers to the supply.
- 7.5. However, whilst Shropshire Council is taking a positive approach to planning for housing and there is a significant amount of land available for housing development, ultimately it is the responsibility of the development industry to deliver sustainable development, consisting of the right types of housing, in the right locations and within the right timescales.

Five Year Housing Land **Supply Statement** **Annexes**

Annex 1. Housing Commitments & Completions

Introduction

A1.1. The information resulting from the assessment of the housing land supply for Shropshire can also be utilised to determine the number of dwellings (net) committed and completed by settlement in Shropshire.

Commitments and Completions

A1.2. As it is recognised that this is an area of interest for these communities, a summary of the net commitments and completions is provided in Table 12: Market Towns; Table 13: Hubs and Clusters; and Table 14: Wider Rural Area:

Table 12: Housing Commitments and Completions in the Market Towns

Settlement	Completions (2006/07 – 2020/21)	Commitments	
		Sites with Planning Permission or Prior Approval as at the 31 st March 2021	Allocations without Planning Permission as at the 31 st March 2021
Albrighton	102	138	77
Bishops Castle	117	34	40
Bridgnorth	768	93	500
Broseley	228	66	0
Church Stretton	217	66	0
Cleobury Mortimer	331	30	0
Craven Arms	124	52	325
Ellesmere	423	324	0
Highley	214	32	0
Ludlow	515	761	0
Market Drayton	601	468	41
Minsterley & Pontesbury	281	121	7
Much Wenlock	134	20	0
Oswestry	1,048	833	351
Shifnal	1,517	190	0
Shrewsbury	5,482	2,532	624
Wem	466	23	100
Whitchurch	623	707	60

**The completions in each of the market towns include exception development which contributes to the housing requirement for the town.
Please Note: The figures provided are net.*

Table 13: Housing Commitments and Completions in SAMDev Plan Hubs and Clusters

*The completions in each of the Community Hubs and Clusters include exception development which contributes to the housing requirement for the Community Hub or Cluster.

^A11 completions as at 31st March 2021 have been excluded to offset the exclusion of 11 commitments when identifying the SAMDev Housing Requirement.

^BThe 116 dwellings outstanding (as at 2013) on Planning Permission OS/05/13887/REM (Almond Avenue, Gobowen) were excluded from consideration when identifying the SAMDev Housing Requirement. All dwellings are now completed however the total number of units completed across the development increased to 126. {Planning Permission OS/05/13887/REM and 14/00568/FUL (Almond Avenue, Gobowen) therefore 126 dwellings removed from figures, as the site was excluded from consideration when identifying the SAMDev Housing Requirement}.

^C42 completions as at the 31st March 2021 have been excluded to offset the exclusion of 42 commitments when identifying the SAMDev Housing Requirement.

^DThe 115 dwellings outstanding (as at 2013) on Planning Permission 15/05307/REM (Gro Continental Site, Prees) (Outline Consent 09/00111/OUT) were excluded from consideration when identifying the SAMDev Housing Requirement.

{10 completions and 105 commitments on Planning Permission 15/05307/REM (Gro Continental Site, Prees) (Outline Consent 09/00111/OUT) removed, as excluded from consideration when identifying the SAMDev Housing Requirement}.

Please Note: The figures provided are net.

Table 14: Housing Commitments and Completions in the Rural Area

	Completions (2006/07 – 2020/21)	Sites with Planning Permission or Prior Approval (as at the 31st March 2021)
Wider Rural Area	4,216	1,271

*The completions in the rural area exclude exception development which contributes to the housing requirement of Market Towns; or Community Hubs or Clusters.

**The completions in the rural area includes completions which occurred in Community Hubs and Clusters prior to the identification of housing guidelines for these areas, as these have not been counted towards the achievement of the identified housing guidelines.

***The commitments and completions include those dwellings excluded from Community Hub or Cluster settlements guidelines.

Please Note: The figures provided are net.

Appendix B. Deliverability of Sites for Major Development with Outline Planning Permission as at 31st March 2021

Planning Application	Address	Date of Decision	Deliverability
14/04019/OUT	Proposed Development Land To The East Of Avenue Road, Broseley, Shropshire	31/08/2016	The Outline Planning Permission was granted at Planning Appeal. The appellants confirmed deliverability of the site during the appeal process. Reserved Matters Planning Application (19/03639/REM) now pending decision for 16 dwellings and employment development. A 'resolution to grant' this Planning Application (subject to completion of a S106 Legal Agreement) (officer delegated) has been reached. The draft Broseley Neighbourhood Plan which has recently been the subject of a Regulation 16 consultation proposes the expansion of this site. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
19/05151/OUT	Proposed Residential Development South Of Little Stocks Close, Kinlet, Shropshire	15/05/2020	Site was allocated within the SAMDev Plan (KLT001). We understand the landowner is proactively progressing this scheme with the intention of submitting a Reserved Matters Application imminently and then implementing the development. Given this and the scale of the site it is considered that the site will be built out in the next five years. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
14/04047/OUT	Proposed Marina South Of Canal Way, Ellesmere, Shropshire	20/12/2016	Site allocated within the SAMDev Plan (ELL003a & ELL003b). A strategic site to be delivered in phases. The landowner is proactively progressing this scheme. Reserved Matters Application (19/05445/REM) pending consideration for the first phase (99 dwellings) of residential development. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
13/03862/OUT	Proposed Residential Development South Of A49, Ludlow, Shropshire	30/11/2015	Reserved Matters Application (18/05461/REM) pending consideration for development of 213 dwellings on the site. Proactive discussions ongoing between the case officer and applicant particularly regarding pedestrian access to the site. A Full Planning Application (21/06007/FUL) has now been received for a new pedestrian link between the site and Bromfield Road. It is understood that the developer associated with the site (Tesni Homes) remains committed to the delivery of this site. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
14/00790/OUT	Land Off Bearstone Road, Norton In Hales, Market Drayton, Shropshire	05/06/2015	Outline application for the erection of fourteen dwellings incorporating two affordable units (to include formation of vehicular and pedestrian access). Full Planning Application (16/04166/FUL) granted for Plot 1. Reserved Matters Application (17/00767/REM) granted for Plot 2. Reserved Matters Application (17/03636/REM) granted at appeal for Plots 3 and 4. Reserved Matters Application (18/03832/REM) granted for Plots 5 and 6. Reserved Matters Application (16/05879/REM) granted for Plots 7 and 8. Reserved Matters Application (18/01469/REM) subsequently granted for Plot 8. Reserved Matters Application (15/05444/REM) granted for Plots 9, 10 and 11. Reserved Matters Application (18/01470/REM) subsequently granted for Plots 10 and 11. Reserved Matters Application (17/05872/REM) granted for Plot 12. Reserved Matters Application (17/03104/REM) granted for Plot 13. Reserved Matters Application (17/05995/REM) granted for Plot 14. Full Planning Application (21/03751/FUL) pending consideration for Plot 14. 10 of the dwellings on this site have now been completed. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
14/03782/OUT	Land Off Greenfields Lane, Market Drayton, Shropshire	09/03/2018	Site allocated within the SAMDev Plan (MD030, MD010 & MD028). Reserved Matters Application (21/01142/REM) granted Post 31st March 2021 for 209 dwellings. Subsequent discharges of conditions and non-material amendments have been issued. The developer has indicated an intention to commence in early 2022 with first completions in May 2022. The other phase of the allocation has already commenced. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
15/03969/OUT	Stoke Heath Camp, Warrant Road, Stoke Heath, Shropshire	25/05/2016	Site has been sold to a developer (Warrant Road Developments Limited). Rather than a Reserved Matters Application, the developer determined to submit a Full Planning Application (19/02385/FUL) for development of 38 dwellings on this site. This is not an unusual practice. A resolution to grant this Full Planning Application (subject to completion of a S106 Legal Agreement) has now been reached. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
16/02594/OUT	Proposed Development Land To The North Of Shrewsbury Road, Oswestry	22/04/2020	Site was allocated within the SAMDev Plan (OSW024). Known developer involvement. A Reserved Matters Planning Application (21/04449/REM) for the first phase under this Outline Planning Permission (284 dwellings) has now been received from a developer (Pickstock Homes). Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
17/06025/OUT	Proposed Residential Development Land To The South Of Middleton Road, Oswestry, Shropshire	16/12/2020	Site was allocated within the SAMDev Plan (OSW024). Reserved Matters Application (21/03584/REM) pending consideration for 120 dwellings. The applicant is a developer (Fletcher Homes). Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
17/02610/OUT	Proposed Residential Development Land And Farm Buildings To The East Of Leigh Road, Minsterley, Shrewsbury, Shropshire	11/09/2019	Site allocated within the SAMDev Plan (MIN002 and MIN015). This is the new build element of the allocation. We understand that the landowner intends to submit a Reserved Matters Application in Spring 2022, with development following on and being built out over a two year period. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.

Planning Application	Address	Date of Decision	Deliverability
14/04428/OUT	Development Land To The South Of Oteley Road, Shrewsbury, Shropshire	23/06/2015	SAMDev Plan allocation SHREW028, SHREW029, SHREW075, SHREW107, SHREW114, SHREW127, ELR02 & ELR66. This is a strategic site to be delivered in phases. A series of Reserved Matters Planning Permissions granted for various phases of the development (17/06149/REM for 164 dwellings of which 93 have been completed; 19/00048/REM for 49 dwellings of which 26 have been completed, 19/04460/REM for 175 dwellings of which 7 have been completed and 19/05470/REM for 162 dwellings (as at 31st March 2021)). Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
16/04559/OUT	Caterpillar Defence, Perkins Engines, Lancaster Road, Shrewsbury, Shropshire, SY1 3NX	17/10/2019	A large brownfield site within Shrewsbury granted at appeal. This Planning Application was granted at appeal. The Planning Inspector of the appeal stated "The proposal for 140 dwellings would contribute to the supply of housing in the borough and the provision of 14 affordable homes on the site would assist to address local housing need". Shropshire Council expects a Reserved Matters Planning Application to be submitted in the next year. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
17/01612/OUT	Land Between Preston Street & London Road, Shrewsbury, Shropshire	08/08/2018	This is a Hybrid Planning Application. Full consent is granted for 353 dwellings (Phase 1) and outline consent for up to 247 dwellings (Phase 2). A Reserved Matters Application (19/05564/REM) has now been granted for phase 2 consisting of 257 dwellings. The site is being built out at pace by a number of outlets including Taylor Wimpey, Persimmon Homes and Charles Church. Assumptions made about build out rates were informed by proactive discussions with the developers and are very cautious. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
17/02809/OUT	H M Prison, The Dana, Shrewsbury, Shropshire, SY1 2HR	14/09/2017	A large site to be implemented in phases (five years for last Reserved Matters Application). Various conditions on the site have been discharged. A Reserved Matters Application (18/03025/REM) was granted for formation of the access etc. A Reserved Matters Application (18/03643/REM) was granted for phase 1 (conversion of school to 11 dwellings and demolition of school garage building to form 8 dwellings and parking) of residential development. This phase of development was completed after 31st March 2021. An associated Full Planning Application (18/03206/FUL) was also granted for new build on the adjacent former prison car park, which is expected to follow-on from the completion of phase 1. Subsequent phases of development will then follow-on from this associated scheme. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, that development is progressing and that development is achievable with a realistic prospect that housing will be delivered within five years.
17/05325/OUT	Proposed Care Home, Shillingston Drive, Berwick Grange, Shrewsbury, Shropshire	09/07/2018	Outline Planning Permission secured by well established national developer. A Reserved Matters Application (21/03378/REM) is now pending consideration for a 70 bed care home. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
18/02392/OUT	Proposed Residential Development Land To The West Of Ellesmere Road, Shrewsbury, Shropshire	27/06/2019	This Planning Application was granted at appeal. The appellant is a developer (Saxonby Group). The Planning Inspector of the appeal felt the proposed dwellings would provide greater confidence that the housing guideline figure for the town would be met. This must equally apply to the wider housing land supply for Shropshire, as such it is clear that the Planning Inspector considered the site to be deliverable. The agent has advised that the applicant remains committed to the delivery of the site in the medium term. Shropshire Council considers that there is clear evidence that the site is available, offers a suitable location for development, and is achievable with a realistic prospect that housing will be delivered in the medium term.
19/03905/OUT	Land To The West Of Battlefield Road, Shrewsbury, Shropshire	07/07/2020	Site allocated within the SAMDev Plan (SHREW115). Full Planning Applications have subsequently been submitted and withdrawn on the site. The developers agent has advised that a Reserved Matters Application will shortly be submitted for development of the site and that assuming this application is approved, commencement of development will occur shortly after consent is granted. The developer expects build-out by end of 2025. The applicant is a developer Jessup Brothers Ltd. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
19/05426/OUT	Marches Care Limited, The Uplands, Clayton Way, Bicton Heath, Shrewsbury, Shropshire, SY3 8GA	12/02/2020	The Planning Application is for an extra-care facility to complement the successful adjacent Uplands Care Home. Proposals are for 28 apartments across two buildings. We understand that submission of a Reserved Matters Application was delayed due to Covid 19 and associated considerations, however the applicant remains intent on bringing forward the development in the future. Due to the nature of the proposals, development works can progress rapidly and as such it is considered there is a reasonable prospect that housing will be delivered within five years. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
13/03481/OUT	Storage Land And Premises (former Dairy) Mile Bank Road, Whitchurch, Shropshire	17/09/2015	On-site demolition works have commenced under Full Planning Application (18/01740/FUL). Reserved Matters Application (18/00552/REM) is pending consideration for development of 70 dwellings. Proactive discussions ongoing between the case officer, other relevant departments (for instance ecology who provided comments on the Biodiversity Management Plan, deeming it sufficient, in September 2021) and the applicant. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
13/05077/OUT	Land At Tilstock Road, Whitchurch, Shropshire, SY13 3JG	21/05/2015	Site allocated within the SAMDev Plan (WHIT009). Reserved Matters Application (16/02160/REM) granted for Phase 1 (156 dwellings). The development approved within this Reserved Matters Application has been implemented. Reserved Matters Application (20/01895/REM) pending consideration for Phase 2 (134 dwellings). Reserved Matters Application (20/01897/REM) pending consideration for Phase 3 (151 dwellings). Reserved Matters Application (20/01899/REM) pending consideration for Phase 4 (39 dwellings). Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.

20/01454/FUL	Proposed Exception Site Dwelling North Of Cold Weston, Shropshire	Affordable housing / rural worker / agricultural dwellings. Resolution to grant subject to completion of a S106 Legal Agreement (completed post 31/03/2021).	1	0	1						1	0
20/03378/FUL	Single Plot Exception Affordable Dwelling, Lower Lane, Wistanstow, Shropshire	Affordable housing / rural worker / agricultural dwellings. Resolution to grant subject to completion of a S106 Legal Agreement (completed post 31/03/2021).	1	0	1						1	0
18/01027/OUT	Old Station Yard, Brownlow Road, Ellesmere, Shropshire	Selected redevelopment of brownfield sites. Sites within a settlements development boundary within the SAMDev Plan. Resolution to grant subject to completion of a S106 Legal Agreement (completed post 31/03/2021). Hybrid Application, consisting of a Full Application for 7 dwellings and Outline Application for 58 dwellings. Development is to be implemented in phases. The applicant was Homes England, which has an impressive track record for securing housing delivery on their sites. The site has now been transferred to a developer (Housing Plus Group) and we understand they intend to progress the development at pace. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.	65	0	65			7	25	25	57	8

Allocation			Availability Assessment				Summary
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability	
BRID001, BRID020a and BRID020b (linked to ELR011a and ELR011b)	Land North of Wenlock Road and North of Church Lane, Tasley, Bridgnorth	Erection of 500 dwellings	Allocated site.	The components of the site jointly promoted and to be brought forward as a comprehensive development. Site promoter recently consulted on proposals prior to submission of a Planning Application. A Hybrid Planning Application (21/05023/OUT) has now been submitted for up to 550 dwellings etc. Intention is to first develop the eastern element of BRID001/BRID020b, followed by BRID020b and then the remainder of BRID020a. Residential development on some components of the site to progress before the relocation of the Livestock Market. Single major landowner (Tasley Estates), including site for the relocation of the Livestock Market (ELR011b).	The components of the site jointly promoted and to be brought forward as a comprehensive development. Site promoter recently consulted on proposals prior to submission of a Planning Application. A Hybrid Planning Application (21/05023/OUT) has now been submitted for up to 550 dwellings etc. Site promoted by a principal employment land/buildings provider in Bridgnorth with track record of delivery.	Major project, with housing cross-subsidising infrastructure investment, relocation of livestock market and provision of serviced employment land. Residential development on some components of the site can commence before relocation of the livestock market.	Site on edge of town (components of the site jointly promoted and to be brought forward as a comprehensive development). Sustainable development with no fundamental planning issues affecting suitability. Site promoter recently consulted on proposals prior to submission of a Planning Application. Intention is to first develop the eastern element of BRID001/BRID020b, followed by BRID020b and then the remainder of BRID020a. Works can commence prior to the relocation of the Livestock Market. Housing cross-subsidises infrastructure investment, relocation of livestock market and provision of serviced employment land. Detailed site investigations in hand prior to submission of planning application. Shropshire Council have proactively engaged with the site promoter and they have recently undertaken public consultation on proposals for the site (https://www.tasleygateway.co.uk/) which were informed by relevant supporting studies and masterplanning. A Hybrid Planning Application (21/05023/OUT) has now been submitted for up to 550 dwellings, a neighbourhood centre, B2/B8 employment uses, sui-generis uses, relocation of the livestock market, and associated infrastructure. The Full Planning Application primarily relates to enabling infrastructure works. The Hybrid Planning Application relates to the entirety of the allocation (including linked employment sites ELR011a and ELR011b). The landowner has indicated that delivery is expected from year 3 (2023/24) onwards, starting with the eastern element of BRID001/020b, then BRID020a and finally BRID020b. With employment delivery occurring alongside these phases of development. Build rates are informed by the deliverability statement produced by the landowner. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
DITT005	Land opposite 6 Station Road, Ditton Priors	Erection of 12 dwellings	Allocated site.	Site promoted through the site allocation process. Outline/Reserved Matters Planning Applications and subsequent Full Planning Application granted for 16 dwellings.	Site promoted through the site allocation process. Outline/Reserved Matters Planning Applications and subsequent Full Planning Application granted for 16 dwellings.	No known viability concerns.	Straightforward small greenfield site in sustainable settlement. Outline/Reserved Matters Planning Applications and subsequent Full Planning Application granted for 16 dwellings. High likelihood of delivery.

Allocation			Availability Assessment				Summary
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability	
KLT001	Land off Little Stocks Close, Kinlet	Erection of 20 dwellings	Allocated site.	Site promoted through the site allocation process. Part of site has been transferred to a Registered Social Landlord (RSL), the remainder is owned by the Estate. Planning Permissions granted on both aspects of the site and phase 1 has been built out. No known impediments to the availability of the site.	Site promoted through the site allocation process. Full Planning Application granted for 8 dwellings. Approved development has been completed. Outline Planning Application granted for a further 15 dwellings. Likely to be delivered. Total site capacity 23 dwellings.	No known viability concerns.	Straightforward greenfield site on edge of settlement. Phase 1 subject to a Full Planning Application for 8 dwellings has been granted and completed. Phase 2 subject to Outline Planning Application granted for 15 dwellings is considered likely to be delivered.
CRAV002	Land off Watling Street, Craven Arms	Erection of 25 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
CRAV003 & CRAV009	Land between Watling Street and Brook Road, Craven Arms	Erection of 235 dwellings	Allocated site.	Site promoted through the site allocation process. No developer involvement but willing landowner with track record of releasing land for development of the town.	Site promoted through the site allocation process. Indicative layout and other supporting information provided. Surface water flood risk affects part of combined site but can be accommodated through a SUDS scheme requiring all of CRAV009 for provision of swales and balancing ponds for flood storage capacity. Development linked to provision of northern highway access to town, and landowners to form part of delivery partnership.	Significant constraints but supporting information provided, therefore the site is still considered viable. Shropshire Council has also submitted a Levelling Up-Fund (LUF) bid to the Government, with support from National Highways to support the accelerated delivery of highway infrastructure associated with this and other sites. Similarly, Shropshire Council has submitted highway infrastructure associated with this and other sites for inclusion within National Highways ongoing Route Strategy update.	Greenfield site within settlement - sustainable development subject to widening of Watling Street and provision of new junction (landowners to form part of delivery partnership), retention of veteran trees and flood storage capacity provision. Site promoted with indicative layout and other supporting information. No developer involvement but willing landowner with track record of releasing land for development of the town. Shropshire Council has submitted a Levelling Up-Fund (LUF) bid to the Government, with support from National Highways to support the accelerated delivery of highway infrastructure associated with this and other sites. Similarly, Shropshire Council has submitted highway infrastructure associated with this and other sites for inclusion within National Highways ongoing Route Strategy update. Town Council support. Likely to be delivered, starting toward the end of the five year period. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
CRAV004 & CRAV010	Land off Watling Street East, Craven Arms	Erection of 60 dwellings	Allocated site.	Site promoted through the site allocation process. The site is now owned by a developer (Connexus) who are pursuing development of the site. Full Planning Permission (18/04931/FUL) for phase 1 granted and development now completed. Phase 2 expected to follow on.	Site promoted through the site allocation process. No highway access constraint at this point on Watling Street. No known impediments to the availability of the site. The site is now owned by a developer (Connexus) who are pursuing development of the site. Full Planning Permission (18/04931/FUL) for phase 1 granted and development now completed. Phase 2 expected to follow on.	Some viability risk resulting from archaeological interest, but earlier evaluation indicates no fundamental constraints - potential impact limited to reduction in site capacity.	Greenfield site on edge of settlement with Town Council support. Known archaeological interest not considered to raise fundamental concerns in view of earlier evaluation (1991). Full Planning Permission (18/04931/FUL) for phase 1 granted and development now completed. It is anticipated that phase 2 will shortly follow on from phase 1 of the development. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
CRAV024	Land adjoining Clun Road / Sycamore Close, Craven Arms	Erection of 25 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site.	Site promoted through the site allocation process. No highway access constraint at this point on Watling Street. No developer involvement but willing landowner with track record of releasing land for development of the town.	No significant viability constraints.	Greenfield site within edge of settlement. Sustainable development. No fundamental planning issues. Town Council support. Likely to be delivered following other allocations in the town.

Allocation			Availability Assessment				Summary
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability	
CRAV030	Land at Newington Farmstead, Craven Arms	Erection of 5 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site.	Site promoted through the site allocation process. Detailed submission including indicative layout provided. Owners in negotiation with Highways Agency regarding A49 junction to serve adjoining abattoir development, with scope to also serve this site (but site has separate access in any event). Development likely to follow first phase of adjoining abattoir development which provides replacement livestock storage and releases site for redevelopment.	No known viability constraints.	Brownfield site on edge of settlement. No fundamental issues subject to suitable scheme safeguarding heritage value of existing buildings. Likely to be delivered following first phase of adjoining abattoir development which provides replacement livestock storage and releases site for redevelopment.
CO002a & CO002b	Land to the West of Cockshutt	Erection of 10 dwellings	Allocated site.	Site promoted through the site allocation process. Straightforward small greenfield site. Full Planning Permission (17/05018/FUL) granted for 4 dwellings on phase 1 CO002b and development now completed. Phase 2 CO002a expected to follow on. No known impediments to the availability of the site.	Site promoted through the site allocation process and likely to be delivered. Full Planning Permission (17/05018/FUL) granted for 4 dwellings on phase 1 CO002b and development now completed. Phase 2 CO002a expected to follow on. Total site capacity considered to be 10 dwellings.	No major viability issues noted to date. Updated Highway evidence assessed and found to demonstrate delivery.	Straightforward small greenfield site. Updated Highway evidence assessed and found to demonstrate delivery. Parish Council support. Full Planning Permission (17/05018/FUL) granted for 4 dwellings on phase 1 (CO002b) and has recently been built out. Phase 2 (CO002a) which is remaining on this allocation, is expected to follow on. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
CO005 & CO0023	Land at Cockshutt House Farm and Land South of Kenwick Road, Cockshutt	Erection of 5 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
CO018	Land South of Chapel House Farm, Cockshutt	Erection of 5 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
DUDH006	Ravenscroft Haulage Site, Dudleston Heath	Erection of 20 dwellings	Allocated site.	Site promoted through the site allocation process. Land in single ownership. Outline Planning Application pending decision for 20 dwellings on the site. No known impediments to the availability of the site.	Site promoted through the site allocation process. Outline Planning Application pending decision for 20 dwellings on the site. Full delivery expected in next 5 years.	No known viability concerns	Straightforward small part brownfield site with no fundamental planning issues and Parish Council support. Planning Application (20/02270/OUT) is pending decision on the site with a resolution to grant subject to completion of a S106 legal agreement. S106 legal agreement being prepared. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
ELL003a & ELL003b	Land South of Ellesmere	Erection of 268 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Outline Planning Permission (14/04047/OUT) granted for up to 250 dwellings. Reserved Matters Application (19/05445/REM) pending consideration for phase 1 of the development (99 dwellings).	Site promoted through the site allocation process. Outline Planning Permission (14/04047/OUT) granted for up to 250 dwellings. Reserved Matters Application (19/05445/REM) pending consideration for phase 1 of the development (99 dwellings).	Flood Risk Assessment undertaken in support of the Outline Application. No known viability concerns	Major greenfield site linked to development of adjoining land for leisure & tourism use consistent with Town Council views. No fundamental planning issues and site. Flood Risk Assessment undertaken in support of the Outline Application. Outline Planning Permission (14/04047/OUT) granted for up to 250 dwellings. Reserved Matters Application (19/05445/REM) pending consideration for phase 1 of the development (99 dwellings).
TET001	Land South of Cairndale, Tetchill	Erection of 10 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
WFTN002	Land adjacent to St Andrew's Church, Welsh Frankton	Erection of 15 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
HIGH003	Land off Rhea Hall/Coronation Street, Highley	Erection of 30 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.

Allocation			Availability Assessment				
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability	Summary
LUD017	Land south of Rocks Green, Ludlow	Erection of 200 dwellings	Allocated site.	Site promoted through the site allocation process. No fundamental impediments to the availability of the site. Known infrastructure requirements identified from the outset and linked to the allocation of the land. Environmental screening/scoping opinions submitted for development of the site. Part Full and Part Outline Planning Permission (17/05189/FUL) granted for up to 200 dwellings. Development commenced.	Site promoted through the site allocation process. Development Company has option on site - in discussion with Council on infrastructure contributions and delivery of development. Part Full and Part Outline Planning Permission (17/05189/FUL) granted for up to 200 dwellings. Development commenced.	Infrastructure requirements identified from outset linked to allocation, so no viability issues. Part Full and Part Outline Planning Permission (17/05189/FUL) granted for up to 200 dwellings. Development commenced.	Greenfield site outside bypass identified as most appropriate from alternatives available. No fundamental planning issues. Sustainable development subject to site development guidelines, including contributions to enable future provision of improved pedestrian/cycle links over A49, if required, and to Eco Park to the south. Development Company has option on land and in discussion with Council. No viability issues. Environmental screening/scoping opinions submitted for development of the site. Part Full and Part Outline Planning Permission (17/05189/FUL) granted for up to 200 dwellings. Development commenced.
LUD034	Land east of Eco Park, Ludlow	Erection of 80 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Outline and Reserved Matters Planning Permissions (14/01012/OUT and 19/02741/REM) granted for 68 dwellings and employment land. Development commenced.	Site promoted through the site allocation process. Known developer interest in the site. Outline and Reserved Matters Planning Permissions (14/01012/OUT and 19/02741/REM) granted for 68 dwellings and employment land. Development commenced.	Infrastructure requirements identified from outset linked to allocation, so no viability issues. Development commenced.	Greenfield site close to Eco Park to east of Bypass, forming part of a mixed use land allocation and providing access to potential future development area - sustainable development delivering benefits for town. Known developer interest in the site. Outline and Reserved Matters Planning Permissions (14/01012/OUT and 19/02741/REM) granted for 68 dwellings and employment land. Development commenced and likely to be delivered.
ONBY003	Onibury Farm, Onibury	Erection of 8 dwellings	Allocated site.	Site promoted through the site allocation process. Site owned by Onibury Estate. No known impediments to the availability of the site.	Site promoted through the site allocation process. Indicative layout showing site capable of delivering 8 dwellings.	No known viability concerns (existing modern farm building to be removed).	Small site within the village. An appropriate scheme would represent sustainable development. No fundamental planning issues have been identified. Estate owned and promoted site - indicative layout showing site capable of delivering 8 dwellings. Timescales reflect information provided by the estate. Likely to be delivered in accordance with these timescales.
HIN002	Land West of Manor Farm Drive, Hinstock	Erection of 8 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Outline Planning Permission granted for 6 dwellings. Subsequent series of Full Planning Permissions granted for each of the 6 plots.	Site promoted through the site allocation process. Outline Planning Permission granted for 6 dwellings. Subsequent series of Full Planning Permissions granted for each of the 6 plots.	No known viability concerns.	Straightforward small greenfield site on edge of village inside bypass, within the settlement boundary. Outline Planning Permission granted for 6 dwellings. Subsequent series of Full Planning Permissions granted for each of the 6 plots. Likely to be delivered.
HIN009	Land at Bearcroft, Hinstock	Erection of 30 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
HOD009, HOD010 & HOD011	Land to rear of Shrewsbury Street; Land off Station Road; and Shrewsbury Street Farm, Hodnet	Erection of up to 50 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Full Planning Permission (13/03452/FUL) granted for 44 dwellings. Variation Planning Application (20/03882/VAR) pending to increase the number of dwellings on the site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Full Planning Permission (13/03452/FUL) granted for 44 dwellings. Variation Planning Application (20/03882/VAR) pending to increase the number of dwellings on the site.	No known viability concerns.	Greenfield site. No known impediments to the availability of the site. Full Planning Permission (13/03452/FUL) granted for 44 dwellings. Variation Planning Application (20/03882/VAR) pending to increase the number of dwellings on the site.

Allocation			Availability Assessment				Summary
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability	
MD030, MD010 & MD028	Land off Rush Lane; and Land between Croft Way and Greenfields Lane, Market Drayton	Erection of 400 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Complex land ownerships and single access required - Development Company coordinating delivery. Phase 1: Two Outline Planning Permissions (14/01982/OUT / 14/04701/OUT / 16/03082/REM) and a Reserved Matters granted for 162 dwellings. Development has commenced. Phase 2: Outline Planning Permission (14/03782/OUT) was granted for 250 dwellings. Reserved Matters Application (21/01142/REM) for 209 dwellings (phase 1) granted post 31st March 2021 for Phase 2a. Phase 2b is expected to follow on from Phase 2a, however timescales for submission of Reserved Matters under the Outline Planning Permission has now passed.	Site promoted through the site allocation process. No known impediments to the availability of the site. Complex land ownerships and single access required - Development Company coordinating delivery. Phase 1: Two Outline Planning Permissions (14/01982/OUT / 14/04701/OUT / 16/03082/REM) and a Reserved Matters granted for 162 dwellings. Development has commenced. Phase 2: Outline Planning Permission (14/03782/OUT) was granted for 250 dwellings. Reserved Matters Application (21/01142/REM) for 209 dwellings (phase 1) granted post 31st March 2021 for Phase 2a. Phase 2b is expected to follow on from Phase 2a, however timescales for submission of Reserved Matters under the Outline Planning Permission has now passed.	Infrastructure provision including access from A53, but known as part of site allocation, so no viability concerns. Complex land ownerships and single access required - Development Company coordinating delivery. Phase 1: Two Outline Planning Permissions (14/01982/OUT / 14/04701/OUT / 16/03082/REM) and a Reserved Matters granted for 162 dwellings. Development has commenced. Phase 2: Outline Planning Permission (14/03782/OUT) was granted for 250 dwellings. Reserved Matters Application (21/01142/REM) for 209 dwellings (phase 1) granted post 31st March 2021 for Phase 2a. Phase 2b is expected to follow on from Phase 2a, however timescales for submission of Reserved Matters under the Outline Planning Permission has now passed.	Greenfield site on edge of town within A53 Bypass - sustainable development. Single point of access off A53 required for all the allocations that form this wider site. Site reflects local ambitions for greenfield recreational facilities. No fundamental planning issues. Complex land ownerships - Development Company coordinating delivery and high likelihood of delivery. Complex land ownerships and single access required - development Company coordinating delivery. Phase 1: Two Outline Planning Permissions (14/01982/OUT / 14/04701/OUT / 16/03082/REM) and a Reserved Matters granted for 162 dwellings. Development has commenced. Phase 2: Outline Planning Permission (14/03782/OUT) was granted for 250 dwellings. Reserved Matters Application (21/01142/REM) for 209 dwellings (phase 1) granted post 31st March 2021 for Phase 2a. Phase 2b is expected to follow on from Phase 2a, however timescales for submission of Reserved Matters under the Outline Planning Permission has now passed.
STH002	Part of land off Dutton Close, Stoke Heath	Erection of up to 25 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Outline and Reserved Matters Planning Permissions (15/00415/OUT / 19/00471/REM) granted for 25 dwellings. Development commenced.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Permissions (15/00415/OUT / 19/00471/REM) granted for 25 dwellings. Development commenced.	Cost of demolition of former social club building but no known viability concerns. Outline and Reserved Matters Planning Permissions (15/00415/OUT / 19/00471/REM) granted for 25 dwellings. Development commenced.	Straightforward part brownfield site with no fundamental planning issues. Outline and Reserved Matters Planning Permissions (15/00415/OUT / 19/00471/REM) granted for 25 dwellings. Development commenced.
MIN002 & MIN015	Hall Farm, Minsterley	Erection of 17 dwellings	Allocated site.	Site promoted through the site allocation process. Single landowner. The southern element of the site is for new build development and benefits from Outline Planning Permission granted for up to 14 dwellings. The northern element of the site is for the conversion of existing farm buildings for residential and employment purposes. It is expected that the northern element of the site (conversion) will follow on from the southern element of the site (new build).	Site promoted through the site allocation process. Single landowner. The southern element of the site is for new build development and benefits from Outline Planning Permission granted for up to 14 dwellings. We understand that the landowner intends to submit a Reserved Matters Application in Spring 2022, with development following on and being built out over a two year period. The northern element of the site is for the conversion of existing farm buildings for residential and employment purposes. It is expected that the northern element of the site (conversion) will follow on from the southern element of the site (new build).	Cost of appropriate conversion and buildings clearance, cross-subsidised by wider development proposals.	Site promoted through the site allocation process and in a single ownership. Development is to be implemented in two phases. The southern element of the site is for new build development and benefits from Outline Planning Permission (17/02610/OUT) granted for up to 14 dwellings. We understand that the landowner intends to submit a Reserved Matters Application in Spring 2022, with development following on and being built out over a two year period. The northern element of the site is for the conversion of existing farm buildings for residential and employment purposes. It is expected that the northern element of the site (conversion) will follow on from the southern element of the site (new build). It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
MIN007	Callow Lane, Minsterley	Erection of 32 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
PBY018 & PBY029	Hall Bank, Pontesbury	Erection of 60 dwellings	Allocated site.	Site promoted through the site allocation process. Land in single ownership (Hereford Diocesan Board). Full Planning Permission (17/05554/FUL) granted for 86 dwellings. Development progressing at pace.	Site promoted through the site allocation process. Full Planning Permission (17/05554/FUL) granted for 86 dwellings. Development progressing at pace.	No known viability concerns.	Straightforward, largely greenfield site in single ownership with Parish Council support. Full Planning Permission (17/05554/FUL) granted for 86 dwellings. Development progressing at pace.

They submitted a Full Planning Application, which was subsequently withdrawn to allow for the scheme to be revised. It is understood that a new Full Planning Application is being worked up. Wrekin Housing Group have confirmed their intention to bring the site forward for development.	No known viability concerns. The site previously had the benefit of Outline Planning Permission for 27 dwellings. A Registered Social Landlord (Wrekin Housing Group) now intends to develop the site. They submitted a Full Planning Application, which was subsequently withdrawn to allow for the scheme to be revised. It is understood that a new Full Planning Application is being worked up. Wrekin Housing Group have confirmed their intention to bring the site forward for development.	Small greenfield site, re-allocated from Oswestry Local Plan. No fundamental planning issues or significant outstanding objections. Parish Council support. The site previously had the benefit of Outline Planning Permission for 27 dwellings. A Registered Social Landlord (Wrekin Housing Group) now intends to develop the site. They submitted a Full Planning Application, which was subsequently withdrawn to allow for the scheme to be revised. It is understood that a new Full Planning Application is being worked up and will be submitted shortly. Wrekin Housing Group have confirmed their intention to bring the site forward for development.
GOB012	Land between A5 and Shrewsbury railway line, Gobowen	Erection of 90 dwellings	Allocated site.	Site promoted through the site allocation process. Single landowner. No known impediments to the availability of the site.	Site promoted through the site allocation process.	No known viability concerns.	No fundamental planning issues or significant outstanding objections. Parish Council support. Large greenfield site extending existing Fletcher Homes Wat's Meadow site (recently built out). Within their recent representation (February 2021) on the draft Shropshire Local Plan, the landowner confirmed that development of the site had been delayed due to unforeseen non-planning issues, however these issues have now been resolved and the land can now be made available for development (Reference A0510). Further discussions have confirmed intention to market the site for development. Allowing for discussed lead-in times to this marketing, the marketing itself and the Planning Application process, delivery is allowed for in years 5 onwards. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
KK001	Land north of Lower House, Knockin	Erection of 15 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
KYN001	Land adjacent Kinnerley Primary School, Kinnerley	Erection of 12 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
KYN002	Land west of School Road, Kinnerley	Erection of 12 dwellings	Allocated site.	Site promoted through the site allocation process. Land in single ownership. Full Planning Permission (16/04719/FUL) granted for 18 dwellings. No known impediments to the availability of the site.	Site promoted through the site allocation process. Full Planning Permission (16/04719/FUL) granted for 18 dwellings.	No known viability concerns.	Full Planning Permission (16/04719/FUL) granted for 18 dwellings.

Allocation			Availability Assessment				Summary
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability	
LLAN001	Former Railway Land, Station Road, Llanymynech	Erection of 32 dwellings	Allocated site.	Site promoted through the site allocation process. Site in single ownership. No known impediments to the availability of the site.	Site promoted through the site allocation process.	No known viability concerns.	Straightforward small greenfield site with no fundamental planning issues and Parish Council support. Development expected to follow-on from the adjoining site (LLAN009) which has Outline and Reserved Matters (14/05001/OUT and 16/05302/REM) Planning Permissions and development is currently ongoing. The site is currently being actively marketed by Towler Shaw Roberts (TSR): https://www.tsrsurveyors.co.uk/index.php?option=com_propertylab&task=showproperty&id=267&addthisprop=favourite It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
LLAN009	Land north of playing fields, Llanymynech and Pant	Erection of 35 dwellings	Allocated site.	Site promoted through the site allocation process. Site in single ownership. Outline and Reserved Matters Permissions (14/05001/OUT / 16/05302/REM) granted for 35 dwellings. Development ongoing. No known impediments to the availability of the site.	Site promoted through the site allocation process. Outline and Reserved Matters Permissions (14/05001/OUT / 16/05302/REM) granted for 35 dwellings. Development ongoing.	No known viability concerns.	Straightforward small greenfield site with no fundamental planning issues and Parish Council support. Likely to be delivered. Outline and Reserved Matters Permissions (14/05001/OUT / 16/05302/REM) granted for 35 dwellings. Development ongoing.
MBK001	Land at Greenfields Farm, Maesbrook	Erection of 4 dwellings	Allocated site.	Site promoted through the site allocation process. Site in single ownership. No known impediments to the availability of the site.	Site promoted through the site allocation process.	No known viability concerns.	Straightforward small greenfield site with no fundamental planning issues and Parish Council support. Given the scale, build out would be expected to occur in a relatively short period following grant of Planning Permission. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
MBK009	Land adj. to The Smithy, Maesbrook	Erection of 5 dwellings	Allocated site.	Site promoted through the site allocation process. Site in single ownership. No known impediments to the availability of the site.	Site promoted through the site allocation process.	No known viability concerns.	Straightforward small greenfield site with no fundamental planning issues and Parish Council support. Given the scale, build out would be expected to occur in a relatively short period following grant of Planning Permission. It is understood from the agent that the landowner remains committed to seeing the site developed. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
OSW004	Land off Whittington Road, Oswestry	Erection of 117 dwellings	Allocated site.	Site promoted through the site allocation process. Environmental Impact Assessment screening for 91 dwellings pending consideration. No known impediments to the availability of the site.	Site promoted through the site allocation process. Greenfield site with some physical constraints to be addressed as part of layout. Environmental Impact Assessment screening for 91 dwellings pending consideration.	No known viability concerns Environmental Impact Assessment screening for 91 dwellings pending consideration.	Greenfield site subject to comprehensive development guidelines. Known developer interest. Environmental Impact Assessment screening for 91 dwellings pending consideration (submitted by housebuilder Galliers Homes). The site benefits from and will be facilitated by approved HIF funding bid of £9.3m granted to Shropshire Council by Homes England for improvement works to the nearby Mile End Roundabout, Oswestry. The delivery of the Mile End upgrades are underway and expected to be completed in 2022. It is considered that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.

Allocation			Availability Assessment				Summary
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability	
SHREW001	Land north of London Road, Shrewsbury	Erection of 50 dwellings	Allocated site.	Site promoted through the site allocation process. Single landowner. No known impediments to the availability of the site.	Site promoted through the site allocation process. Full Planning Permission (16/02049/FUL) granted for a single dwelling on the site. The remainder of the site is to be brought forward by the Shropshire Council owned housing company Cornovii developments as a part self/custom-build development and part market development. Cornovii developments intend to bring forward a Planning Application on the site shortly.	Viability of individual units will depend upon build method. However it is considered that the site will be delivered.	Straightforward greenfield site owned by Shropshire Council. Full Planning Permission (16/02049/FUL) granted for a single dwelling on the site. The remainder of this site is to be brought forward by the Shropshire Council owned housing company Cornovii developments as a part self/custom-build development and part market development. Cornovii developments intend to bring forward a Planning Application on the site before the end of the year and development will follow on from securing this consent. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.
SHREW002, SHREW035, SHREW083, SHREW128, ELR64, ELR67 & ELR68	Shrewsbury West Sustainable Urban Extension	Erection of 750 dwellings	Allocated site.	Yes, although a major development requiring complex S106 Agreements and involvement of a number of landowners, the primary landowners are working collaboratively to deliver the development. Development to be brought forward in coordinated phases. Residential phases 1 and 2 of the site have national housebuilder involvement. Residential phases 3 and 4 are in Shropshire Council ownership. Outline and Reserved Matters Planning Applications granted for the first phase of residential development, consisting of 296 dwellings. An alternative scheme (Full Planning Application) for 340 dwellings now has a resolution to grant subject to completion of a S106 Legal Agreement on the first phase of residential development.	Site promoted through the site allocation process. Infrastructure costs and contributions agreed, with main landowners (including Shropshire Council) working collaboratively towards delivery. Development to be brought forward in coordinated phases. Residential phases 1 and 2 of the site have national housebuilder involvement. Residential phases 3 and 4 are in Shropshire Council ownership. Highways Authority has accepted principle of up to 400 dwellings accessed off Welshpool Road prior to construction of new Link Road, so no legal or physical impediment to first phases of development. Outline and Reserved Matters Planning Applications granted for the first phase of residential development, consisting of 296 dwellings. An alternative scheme (Full Planning Application) including the land subject to the approved Outline and Reserved Matters Planning Applications now has a resolution to grant subject to completion of a S106 Legal Agreement.	Major infrastructure requirements, including provision of new Oxon Link Road, but land identified in Core Strategy on this basis and costs to be reflected in land values so no viability issues. Infrastructure costs and contributions agreed, with main landowners (including Shropshire Council) working collaboratively towards delivery. Local Economic Partnership (LEP) grant offer towards elements of highways costs, subject to detailed business case approval.	Principle of development established in Core Strategy. Comprehensive development to occur in accordance with adopted masterplan to include 750 dwellings, employment, the provision of new Oxon Link Road, and other infrastructure. Infrastructure costs and contributions agreed, with main landowners (including Shropshire Council) working collaboratively towards delivery. Development to be brought forward in coordinated phases. Residential phases 1 and 2 of the site have national housebuilder involvement. Residential phases 3 and 4 are in Shropshire Council ownership. Outline and Reserved Matters Planning Applications granted for the first phase of residential development, consisting of 296 dwellings. An alternative scheme (Full Planning Application 20/01957/FUL) for 340 dwellings now has a resolution to grant subject to completion of a S106 Legal Agreement on the first phase of residential development. Known developer interest in bringing forward the second phase of residential development. Shropshire Council remains committed to bringing forward appropriate development on the third and fourth phases of residential development. Full Planning Permission (21/04495/FUL) granted for the first employment phase of development on the site. Full Planning Permission (14/05707/FUL) granted for 85 extra care apartments on the first phase of the health campus element of the site. Development subsequently completed. Full Planning Permission (20/04541/FUL) granted for a further 54 apartments/bungalows on the first phase of the health campus element of the site. Outline Planning Permission (20/04544/OUT) granted for health/medical office accommodation on the first phase of the health campus element of the site.

WHIT009	Land at Tilstock Road, Whitchurch	Erection of 500 dwellings	Allocated site.	Site promoted through the site allocation process. Outline Planning Application (13/05077/OUT) granted for up to 500 dwellings. Reserved Matters Planning Application (16/02160/REM) granted for the first phase (156 dwellings). Development has commenced. Reserved Matters Planning Applications (20/01895/REM, 20/01897/REM and 20/01899/REM) pending consideration for phases 2, 3 and 4 (total of 324 dwellings).	Site promoted through the site allocation process. Outline Planning Application (13/05077/OUT) granted for up to 500 dwellings. Reserved Matters Planning Application (16/02160/REM) granted for the first phase (156 dwellings). Development has commenced. Reserved Matters Planning Applications (20/01895/REM, 20/01897/REM and 20/01899/REM) pending consideration for phases 2, 3 and 4 (total of 324 dwellings). Agreement regarding foul sewerage capacity - permits commencement of development pending permanent upgrade by Welsh Water or developer.	Foul sewerage capacity upgrade required for complete build out of development. Agreement regarding foul sewerage capacity - permits commencement of development pending permanent upgrade by Welsh Water or developer.	Major greenfield site. Outline Planning Application (13/05077/OUT) granted for up to 500 dwellings. Reserved Matters Planning Application (16/02160/REM) granted for the first phase (156 dwellings). Development has commenced. Reserved Matters Planning Applications (20/01895/REM, 20/01897/REM and 20/01899/REM) pending consideration for phases 2, 3 and 4 (total of 324 dwellings). Agreement regarding foul sewerage capacity - permits commencement of development pending permanent upgrade by Welsh Water or developer. Full build out subject to permanent foul sewerage capacity upgrade.
WHIT021	Land at Alport Road, Whitchurch	Erection of 60 dwellings	Allocated site.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Permissions (14/01263/OUT and 17/03076/REM) granted for 90 dwellings. Development commenced.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Permissions (14/01263/OUT and 17/03076/REM) granted for 90 dwellings. Includes condition regarding foul sewerage capacity. Development commenced.	Foul sewerage capacity upgrade required for complete build out of development. Development commenced.	Sustainable development. Outline and Reserved Matters Planning Permissions (14/01263/OUT and 17/03076/REM) granted for 90 dwellings. Likely to be delivered, but full build out subject to permanent foul sewerage capacity upgrade. Development commenced.
WHIT033/10	Land North of Mill Park, Whitchurch	Erection of 13 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
WHIT046	Land at Mount Farm, Whitchurch	Erection of 100 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.	Development completed.
WHIT051	Land West of Oaklands Farm, Whitchurch	Erection of 60 dwellings	Allocated site.	Site promoted through the site allocation process. Part of mixed use scheme linked to ELR033. Development guidelines specified for the site. No known impediments to the availability of the site. Outline Planning Application (21/02736/OUT) pending consideration for 7 dwellings, which represents the first phase of this development.	Site promoted through the site allocation process. Outline Planning Application (21/02736/OUT) pending consideration for 7 dwellings, which represents the first phase of this development.	No known viability concerns - linkage with employment land to be addressed at application stage.	Greenfield site on edge of town. Sustainable development. No fundamental planning issues. Town Council support. Part of mixed use scheme linked to ELR033 with site development guidelines, including phasing. Outline Planning Application (21/02736/OUT) pending consideration for 7 dwellings, which represents the first phase of this development. Shropshire Council has recently undertaken proactive discussions regarding the remainder of the site and is confident that a Planning Application will be submitted imminently. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.

Approved Application on at least part of the site.
Approved Application on all of the site.

Appendix F. Selected sites proposed for allocation for development within the draft Shropshire Local Plan

Proposed Allocation		Assessment					Details		
Proposed Site Allocation Reference	Address	Suitability	Availability	Achievability	Viability	Summary	Net Dwellings	Net Completions	Net Outstanding
PON008, PON017 & PON030	Land at Minsterley Road, Pontesbury	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review. PON008 represents the largest component of the site and it is anticipated that access will be formed through it. The site promoters correspondence (Appendix 2 of the Viability Topic Paper) confirms that delivery timescale assumptions in the draft Shropshire Local Plan are correct. It is anticipated that PON017 and PON030 will follow on as subsequent phases of development.	The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site.	Greenfield site. The site is considered suitable, available, achievable and viable. PON008 represents the largest component of the site and it is anticipated that access will be formed through it. The site promoters correspondence (Appendix 2 of the Viability Topic Paper) confirms that delivery timescale assumptions in the draft Shropshire Local Plan are correct. A Planning Application (21/03660/FUL) is pending decision on the PON008 component of the site, with a resolution to grant. It is anticipated that PON017 and PON030 will follow on as subsequent phases of development. Considered likely to be delivered.	40	0	40
SMH038	Former Ifton Heath Primary School, St Martins	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review. Planning Application (20/02248/FUL) granted on the site for 35 dwellings.	Part greenfield and part brownfield site. The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site. Planning Application (20/02248/FUL) granted on the site for 35 dwellings.	Part greenfield and part brownfield site. The site is considered suitable, available, achievable and viable. Planning Application (20/02248/FUL) granted on the site for 35 dwellings post 31st March 2021. Considered likely to be delivered within the timescales identified.	35	0	35
BAY050	Former Oaklands School Site, Bayston Hill	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Part greenfield part brownfield site. Hybrid Planning Application (19/01873/OUT) pending decision for 47 dwellings. Site promoters correspondence (Appendix 26 of the Viability Topic Paper) states "With regard to the sites listed below I can confirm that further to the work undertaken to date that they remain very much viable and deliverable with regard to the policy requirements identified within the 'Regulation 19': Pre-Submission Draft Shropshire Local Plan. We will continue to undertake further diligence work in this respect." No known impediments to the achievability or viability of the site.	Part greenfield part brownfield site. The site is considered suitable, available, achievable and viable. Hybrid Planning Application (19/01873/OUT) pending decision for 47 dwellings. Shropshire Council owns part of this site and is committed to seeing its effective and appropriate redevelopment. Site promoters correspondence (Appendix 26 of the Viability Topic Paper) states "With regard to the sites listed below [which included this site] I can confirm that further to the work undertaken to date that they remain very much viable and deliverable with regard to the policy requirements identified within the 'Regulation 19': Pre-Submission Draft Shropshire Local Plan. We will continue to undertake further diligence work in this respect." Considered likely to be delivered.	47	0	47

Appendix G. Strategic Land Availability Assessment (SLAA) Sites

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
ALB003	Caravan storage, Station Road, Albrighton	The site is suitable for residential development, subject to appropriate management of any physical, heritage and environmental constraints present. For instance provision of an appropriate access to the site and management of the sites relationship with the railway line (e.g. noise). Furthermore the site is located within proximity of several TPO's therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also in proximity of one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
BIS016	Field adj. Blunden Hall, Brampton Road, Bishop's Castle	The site is within a settlement boundary and so suitable for development in principle. Any proposed development design and layout should complement the adjacent employment allocation. The site lies within 300m of a Conservation Area and several Listed Buildings. Development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Effort should be made to retain mature trees and hedgerows on the site.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; viable and achievable. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Bishop's Castle is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.
BIS020	Rear of surgery, Schoolhouse Lane, Bishop's Castle	Site is suitable for residential development subject to satisfactory access. The site is within 300m of a Scheduled Monument, a Conservation Area and several Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available in the future; viable; and achievable. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. The site is also considered suitable for residential development subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Bishop's Castle is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.
BKL001	Field opposite the Junior School, Bucknell	The site is within the development boundary so development is acceptable in policy terms. Suitability is subject to appropriate management of any physical, heritage or environmental constraints present. For instance the site is in proximity to the River Redlake Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also within 300m of a Scheduled Monument, a Conservation Area and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	Shropshire Council Officers have investigated the availability of this site, but it remains unclear as to whether the site is available for this form of development. Therefore information gathered for the purpose of this study is unable to confirm that the site is available for this form of development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, available, viable and achievable (subject to any further necessary viability assessment). Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Bucknell is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
BKL002	The Old Farm, Bucknell	<p>The site is within the development boundary so development is acceptable in principle subject to material considerations. However, part of the site is within the River Redlake Wildlife Site, consequently development of this element of the site and an appropriate buffer is likely to lead to a significant adverse effect on one or more locally designated site(s) and as such is contrary to policy, therefore this part of the site is unsuitable for development. Additionally, part of the site is also within Flood Zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The suitability of the remainder of the site is subject to appropriate management of any physical, heritage and environmental constraints present. For instance part of the site is within and the remainder is in proximity of a Conservation Area. The site is also within proximity of a Scheduled Monument and one or more listed buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The element of the site that is not within a Local Wildlife Site is in proximity of this site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.</p>	<p>The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is available, achievable and viable. Whilst the site is located within the development boundary, there are a number of constraints that apply. This includes the fact that part of the site is within the River Redlake Wildlife Site, consequently development of this element of the site and an appropriate buffer is likely to lead to a significant adverse effect on one or more locally designated site(s) and as such is contrary to policy, therefore this part of the site is unsuitable for development. Additionally, part of the site is also within Flood Zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. Suitability of the site for open market residential development is therefore subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Bucknell is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment. Outline Planning Application (21/03445/OUT) pending consideration for 8 dwellings on part of the site.</p>
CLU003	Land adjacent to The Hall, Vicarage Road, Clun	<p>The site is within the development boundary so development is acceptable in policy terms, subject to material considerations such as the ability to suitably manage any physical, heritage or environmental constraints present. For instance the site is in a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is densely wooded, which will require due consideration. The site is also within 300m of a Scheduled Monument and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is in the Shropshire Hills AONB, therefore major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is within the development boundary so development is acceptable in policy terms, subject to a heritage assessment of the impact of development on the Conservation Area will be required. If this shows no adverse effect, or that any such effect can be adequately mitigated, the site's development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment. These include the site's location in the Shropshire Hills AONB; the wooded character of the site; and its proximity to a Wildlife Site, Scheduled Monument and one or more Listed Buildings. Clun is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.</p>
WBR008	Land at Bank Farm, Worthen	<p>Agricultural buildings within an existing Community Cluster settlement, as such conversions/infilling may be appropriate subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance comments will be needed from highway department regarding highway access. The site is within 300m of several grade 2 listed buildings and a grade 1 listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. It is also proposed that Worthen will be a Community Hub, which may impact on suitability for other uses. The site has been proactively promoted through the Local Plan Review process and is proposed for allocation, alongside an additional parcel of land in the same ownership, within the draft Shropshire Local Plan (2016 - 2038). A Planning Application (21/00769/OUT) has subsequently been submitted on the associated land within this proposed allocation.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. The site has been proactively promoted through the Local Plan Review process and is proposed for allocation, alongside an additional parcel of land in the same ownership, within the draft Shropshire Local Plan (2016 - 2038). A Planning Application (21/00769/OUT) has subsequently been submitted on the associated land within this proposed allocation.</p>	<p>The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered suitable (infilling/conversion); available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for open market residential development (infilling/conversion) is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. It is also proposed that Worthen will be a Community Hub, which may impact on suitability for other uses. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site has been proactively promoted through the Local Plan Review process and is proposed for allocation, alongside an additional parcel of land in the same ownership, within the draft Shropshire Local Plan (2016 - 2038). A Planning Application (21/00769/OUT) has subsequently been submitted on the associated land within this proposed allocation.</p>

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period
SLAA Site Reference	Address	2021/22	2022/23	2023/24	2024/25	2025/26	Total	
BKL002	The Old Farm, Bucknell						0	30
CLU003	Land adjacent to The Hall, Vicarage Road, Clun						0	2
WBR008	Land at Bank Farm, Worthen						5	0

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
BRD012	Land off Stourbridge Road, Bridgnorth	The site is considered developable subject to appropriate management of any physical, heritage and environmental constraints. For instance the ability to provide access is subject to Highway Officer advice. The site contains and is within proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within proximity of a Conservation and Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is not currently available but will become so in the future; that there is a willing landowner/developer; and no legal or ownership problems which could limit development beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically access to the site and mitigation of the impact of development on the trees subject to TPO protection both on the site and in proximity; and the Conservation and Listed Buildings within proximity. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
DNP005	Land north-west of South Road, Ditton Priors	The site is within the development boundary so development is acceptable in policy terms, subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance these include the presence of a Listed Building within the site the site's location in a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in the Shropshire Hills AONB, therefore major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, achievable and viable (subject to any further necessary viability assessment). The site is within the development boundary so development is acceptable in policy terms, subject to material considerations and management of any physical, heritage or environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment.
BRO034	Adj. Brook Cottage, 4 Bridge Rd, Broseley	Within development boundary so site suitable for development. Discussion will be needed with highway authority about vehicle access and Coal Authority regarding land conditions. The site is within 500m of an Ancient Woodland site. Development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 250m of 3 Local Wildlife Sites, so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 30m of a Veteran Tree/ tree protected by a Tree Preservation Order so development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is located within a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is within proximity of a World Heritage Site and a number of listed buildings so development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically potential impacts on environmental and heritage assets. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
CST001 and CST002	Church Stretton Car Sales and Crown Carpets, Burway Road, Church Stretton	The site is within the development boundary of the settlement so residential development is acceptable in principle subject to material considerations. development in relation to this matter, subject to acceptable safeguarding. The site is within a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is located within the Shropshire Hills AONB. Major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is also within proximity of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Furthermore the site is within proximity of ancient woodland, therefore development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within proximity of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available; achievable; and viable (subject to any further necessary viability assessment). Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The sites suitability for development is subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically its location within the AONB and a Conservation Area. If no significant adverse impacts on this asset was identified or if suitable mitigation is possible, the site's development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. A 'Resolution to Grant' Planning Application (19/03202/FUL) for 14 dwellings has been reached post 31st March 2021 on SLAA sites CST001 and CST002.
CST008	Land at Woodbank House, Church Stretton	The site is within the Church Stretton development boundary so the principle of development is accepted. The site is located within the Shropshire Hills AONB. Major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 500m of an Ancient Woodland site. Development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 250m of a Wildlife Site. Development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is adjacent to a Conservation Area. Development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
CRA001	Abattoir site, Craven Arms	A small part of the site are within Flood Zones 2 and/or 3. The area of the site outside this zone has potential for residential development (following the relocation of the existing abattoir) as it is located within the Craven Arms settlement boundary. This potential is subject to the appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 300m of a Conservation Area and several Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future. Specifically there is a stated aspiration within the current Development Plan to relocate the abattoir to the proposed Newington Food Park. This relocation will allow the redevelopment of the existing site, which will act as a catalyst for the redevelopment of the wider area.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available (following the relocation of the existing abattoir); achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate assessment and management of the impact on physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Such constraints include: Flood Zones 2 and/or 3; proximity to a Conservation Area and to several Listed Buildings. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period
SLAA Site Reference	Address	2021/22	2022/23	2023/24	2024/25	2025/26	Total	
CST001 and CST002	Church Stretton Car Sales and Crown Carpets, Burway Road, Church Stretton						14	0
CST008	Land at Woodbank House, Church Stretton						6	0
CRA001	Abattoir site, Craven Arms						0	26

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
CRA029	Garage Corvedale Rd, Craven Arms	The site is a brownfield site within the development boundary. Suitable in principle for residential development. A positively designed scheme could enhance the site and its setting, which is a gateway into the town. Therefore the site is suitable subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is brownfield and in use as a garage, therefore there are potential contamination issues. The site is also in proximity of a conservation area and listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
HNN021	Off Netherton Lane, Highley	The site is located within the Highley development boundary. As such the principle of residential development on the site is established. Suitability is subject to appropriate management of the physical, heritage and environmental constraints. For instance part of the site was subject to previous quarrying and subsequent landfill uses, this will require due consideration. The site is adjacent to existing commercial units. The relationship between these units and any residential development on this site will require due consideration. The site contains and is in proximity of trees subject to TPO protection, development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. The site is also in proximity of a conservation area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.
LUD005	21 New Street, Ludlow	The site is located within the Ludlow development boundary and is considered to represent a suitable location for residential development, subject to appropriate management of any physical, heritage and environmental constraints. For instance, the site is located within proximity of one or more listed buildings and a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; likely to become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
LUD022	Morris Bufton Galdeford, Ludlow	The site is within the Ludlow development boundary so the principle of development is accepted subject to management of any physical, heritage and environmental constraints. These include consideration of any loss of employment. The site is in proximity of a Scheduled Monument, Conservation Area and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within 500m of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. If the consent for a retail unit on part of the site is implemented, this will need to be excluded from the developable area.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered viable and achievable (subject to any further necessary viability assessment). Its availability is unknown. Where necessary, this will be informed by further discussions with landowners and/or their representatives. Furthermore, the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site is currently suitable for development as it is located within the development boundary where the principle of development is accepted subject to management of any physical, heritage and environmental constraints. These include the implications of any loss of employment; and the site's proximity to a SSSI, a Scheduled Monument, a Conservation Area and several Listed Buildings. Additionally, if the consent for a retail unit on part of the site is implemented, this will need to be excluded from the developable area.

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
ONY005	Land at the Quarry	<p>The site is located adjacent to an existing Community Hub, however within Onibury open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The housing guideline for Onibury is around 25 dwellings.</p> <p>As a former quarry, the sites topography may be challenging, contamination may be present and ground investigations are likely to be required.</p> <p>The site is also located within the AONB, therefore any major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.</p> <p>The site is also in proximity of a conservation area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The ability to provide an appropriate access is subject to highway approval. Subject to these factors, a suitably sized scheme, appropriate consideration of the identified housing guideline for the settlement, and any other material considerations, including any other physical, heritage and environmental constraints present, the site may currently be suitable for development. However, Onibury has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. As such under this policy approach open market residential development on the site would be contrary to policy.</p>	<p>The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability.</p> <p>Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Particularly the fact the site is located within the AONB, site topography/stability, appropriate development size/design/layout and consideration of the settlement guideline.</p> <p>However, Onibury has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. As such under this policy approach open market residential development on the site would be contrary to policy in the future.</p>
HHH003	Divisional Surveyors Office & Depot, Hearne Lane, Hodnet	<p>The site is within the development boundary so the principle of development is accepted subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance, the site is located within a Conservation Area and its proximity to a Scheduled Monument, a Registered Park or Garden and one or more Listed Buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability.</p> <p>Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>	<p>The site is considered available; achievable; and viable (subject to any further necessary viability assessment). Furthermore, the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site is also suitable in principle for open market residential development as it is within the development boundary, subject to material considerations; suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment.</p>
HHH001	Land adjacent to County Primary School, Hodnet	<p>The site is within the development boundary so the principle of development is accepted subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance, the site is located within a Conservation Area and its proximity to a Scheduled Monument, a Registered Park or Garden and one or more Listed Buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.</p> <p>The site has been proactively promoted throughout the Local Plan Review process and is proposed for allocation, alongside an additional parcel of land in the same ownership, within the draft Shropshire Local Plan (2016 - 2038).</p>	<p>Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p> <p>The site has been proactively promoted throughout the Local Plan Review process and is proposed for allocation, alongside an additional parcel of land in the same ownership, within the draft Shropshire Local Plan (2016 - 2038).</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
MDR002	Car Sales Area, Salisbury Road, Market Drayton	The site is considered suitable for residential development. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance there is a TPO adjacent to the site, therefore development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded. Thus, the site is considered suitable for development in relation to this matter, subject to these safeguarding measures being deemed acceptable. Additionally the site is located within proximity of one or more listed buildings, consequently development is subject to an assessment of impact on the significance of the setting of this heritage asset(s). Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of either a withdrawn Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
MDR003	Haulage Yard, Newcastle Road, Market Drayton	The site is considered suitable for open market residential development. Suitability is also subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 300m of a Conservation Area, accordingly the impact of any proposed development will need to be appropriately assessed and considered. Notwithstanding this there are few other constraints and the site is considered suitable for development.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, likely to become available, achievable; and viable (subject to any further necessary viability assessment) and appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
MDR004	Cricket Club, Betton Road, Market Drayton	The site falls within the development boundary of Market Drayton. As such it is a suitable location for residential development. Although the site is included within the cricket club open space, the site itself does not include any green space (it is a brownfield site) although it does include the club house, any development would therefore need to demonstrate that this facility is no longer required or include a replacement facility. Any development on the site would need to address any physical, heritage and environmental constraints present. For instance, the site is within 300m of a Conservation Area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was subject to a series of applications for residential development in 2006 and 2008. Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, available, achievable; and viable (subject to any further necessary viability assessment) and appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Suitability is subject to the development including a replacement club house facility or demonstrating that this facility is no longer required as although the site is included within the cricket club open space, the site itself does not include any green space (it is a brownfield site) only the club house. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
MDR026	Pet Market, Shrewsbury Road, Market Drayton	The site is considered suitable for residential development. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
SKH001	Land at Rosehill Road Stoke Heath	This brownfield site is located within proximity of an existing Community Hub, within Stoke Heath open market development will be delivered upon the allocated site together with limited infilling, groups of houses and conversions on suitable sites within Stoke Heath. This particular site has also been identified within the emerging Neighbourhood Plan as an appropriate location for residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Particularly contamination. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. This brownfield site is considered suitable (subject to appropriate management of any policy, physical, heritage and environmental constraints present); available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. The site has also been identified within the Stoke Upon Tern Neighbourhood Plan as an appropriate location for residential development. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site. It is considered the remainder of the site has capacity for 14 dwellings, as assumed within the Shropshire housing land supply assessment.

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
MUW001	Smithfield Works, Much Wenlock	Complies with current policy and is also a brownfield site. Within 500m of a SSSI so development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site boundary is also within 30m of a Tree Preservation Order. Development is subject to an assessment of impact on this protected tree in order to demonstrate how it can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Site is also within 300m of a Conservation Area and several Listed Buildings. Development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Previously submitted for consideration within the SHLAA; SAMDev Plan; and the Much Wenlock Neighbourhood Plan. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; likely to become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate assessment and management of impact on heritage and environmental constraints in proximity (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
KCK001	The Old Post Office, Knockin	The site is located within the development boundary for Knockin. As such development by infilling and conversions of buildings may be acceptable subject to material considerations. Knockin also represents a proposed Community Hub. Material considerations include suitable consideration and management of any physical, heritage and environmental constraints. For instance the ability of the current access to serve the redevelopment of the site is subject to highway approval. The site is within a conservation area and in proximity of a number of listed buildings and a scheduled monument, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is by infilling and conversions of buildings, subject to material considerations; appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. For instance the site is located within a conservation area. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
OSW002	Health Centre/ Adult Training Centre, Victoria Rd, Oswestry	Suitable location subject to appropriate design and necessary assessments. Specifically the site is located within proximity of a scheduled monument, conservation area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within proximity of a number of TPO's, therefore development is subject to an assessment of impact on these protected trees in order to demonstrate how they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; achievable; and viable (subject to any further necessary viability assessment) for residential development. The site is considered to be not currently available, but is likely to become so. Where necessary, this will be informed by further discussions with landowners and/or their representatives. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
OSW005	Roy Evans Garage, Oak Street, Oswestry	The site is in a suitable location for residential development, subject to appropriate assessment and management of physical, heritage and environmental factors. Specifically, the site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of a scheduled monument; one or more listed buildings; and a registered park/garden, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has previously been submitted for inclusion within the SHLAA. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
OSW043	Welsh Border Meats, Willow Street, Oswestry	The site is located on the edge of the town centre within the Oswestry development boundary. The surrounding area contains a mix of uses including many residential properties. As such it is an appropriate location for residential development. The site is within proximity of one or more listed buildings; a conservation area; a scheduled monument; and a registered park and garden. Development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
OSW045	Autocare, King Street, Oswestry	This brownfield site is suitable for development, subject to assessment and management of identified constraints. Specifically the site is located within a conservation area. Therefore development of this site is subject to an assessment of impact on the specified asset(s). Where this shows that substantial harm to or a total loss of significance of the designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is in proximity of one or more listed buildings and a scheduled monument. Development is therefore subject to an assessment of impact on the significance of the setting of this heritage asset(s). Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is in proximity of a wildlife site. Development is subject to an assessment of the impact on this locally designated site.. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of a series of lapsed Planning Permissions for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the sites location within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
OSW051	Weston Lane, Oswestry	The site is located within the Oswestry development boundary adjacent to sites allocated for housing development. Therefore open market residential development on the site is likely to be appropriate. However, the ability to provide an appropriate access into the site is subject to highway approval. Furthermore, the site is within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the ability to provide an appropriate access into the site is subject to highway approval. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
PYC002	Penylan, Penygarreg Lane, Pant	Brownfield site within development boundary so suitable in principle, subject to material considerations. Material considerations include any physical, environmental or heritage constraints present. For instance the site is within 500m of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. The site is within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site.. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is within 300m of grade 2 listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been the subject of a lapsed Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
RUY019	Former Dairy Site, School Road, Ruyton XI Towns	Site is considered suitable for open market residential development. Suitability is subject to material considerations and suitable management of any physical, heritage or environmental considerations. For instance the site is within 300m of several grade 2 listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been the subject of a lapsed Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. The site has been proactively promoted throughout the Local Plan Review process and is proposed for allocation within the draft Shropshire Local Plan (2016 - 2038).	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to material considerations and appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
SMH002	Darjeeling, School Lane, St Martins	Brownfield site within development boundary. Therefore the site is considered suitable in principle for residential development. Suitability is subject to appropriate management of any physical, heritage or environmental constraints present. For instance comments will be required from highway department regarding highway access. Planning Permission (19/02458/FUL) granted for 2 dwellings on part of the site.	The site has been the subject of a lapsed Planning Application for a relevant use (granted 2011). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future. Planning Permission (19/02458/FUL) granted for 2 dwellings on part of the site.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Planning Permission (19/02458/FUL) granted for 2 dwellings on part of the site.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Planning Permission (19/02458/FUL) granted for 2 dwellings on part of the site. A further Planning Application (21/01012/FUL) is pending consideration for 1 dwelling on part of the site. The Planning Permission that has been granted was reflected when identifying the potential remaining capacity of the site as included within the Shropshire five year housing land supply.
SHF004	Land to the rear of Jaspers, Shrewsbury Road, Shifnal	The site is located on the edge of the town centre of Shifnal, within its development boundary. As such it is a suitable location for open market residential development. However, this excludes a small portion of the site, along its eastern boundary which is located within flood zones 2 and/or 3. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. Additionally the site is adjacent to a TPO, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also in proximity of a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The ability to provide an appropriate access is subject to highway approval.	This site has previously been the subject of Planning Applications (most recently refused in 2005) for the demolition of existing buildings (beyond the identified site area) and erection of 28 dwellings. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available, viable and achievable. Where necessary, this will be informed by further discussions with landowners and/or their representatives; and any further necessary viability assessment work. The site is however considered suitable for residential development (excluding the small portion of the site located within flood zones 2 and/or 3), subject to assessment and management of the physical; environmental; or heritage constraints. Such as the ability to access the site and its location within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on appropriate changes to policies affecting this location; suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
SHF016	St Peter's Youth Club, Bridgnorth Road, Shifnal	The site is located within the development boundary and a predominantly residential area therefore the principle of open market residential uses on the site is accepted. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is in proximity of a conservation area and several listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is not currently available but will become so in the future; that there is a willing landowner/developer; and no legal or ownership problems which could limit development beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period
SLAA Site Reference	Address	2021/22	2022/23	2023/24	2024/25	2025/26	Total

SMH002	Darjeeling, School Lane, St Martins						7	0
SHF004	Land to the rear of Jaspers, Shrewsbury Road, Shifnal						0	5
SHF016	St Peter's Youth Club, Bridgnorth Road, Shifnal						0	12

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
SHF021	West of Lamledge Lane and Shifnal College and North of Shifnal Industrial Estate, Shifnal	The site is located within the Shifnal development boundary. The eastern portion of the site is unallocated. The western portion of the site is allocated for employment uses and the preference would be for employment uses upon it, however it is recognised that the wider employment allocation has been granted Planning Permission for a mixed residential and care home scheme, therefore open market residential uses on this component of the site is also likely to be appropriate. The ability to provide an appropriate access is subject to highway approval.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.
SHF027	Garage off Bradford Street, Shifnal	The site is located within the Shifnal development boundary and its frontage is within the town centre. As a result there would be an expectation that ground floor uses may be more appropriate for retail and town centre uses. Open market residential uses on upper floors would be supported. The site does have potential for open market residential on the ground floor subject to demonstration of compliance with current policy (that residential uses on the ground floor would support the regeneration of the town centre) or long term potential subject to appropriate policy changes. Suitability is also subject to and management of any physical, heritage and environmental constraints. For instance as a former garage site investigation and remediation or any contamination would be required. The site is within proximity of a conservation area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable, available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development above the ground floor is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Suitability of open market residential development on the ground floor is also subject to demonstration that this would support the regeneration of the town centre. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
SHF028	27 Shrewsbury Road, adjacent to St Mary's Church, Shifnal	The site is located within the Shifnal development boundary and near the town centre, therefore the site is suitable for open market residential development subject to appropriate management of any physical, heritage and environmental constraints. For instance the ability to access the site is subject to highway approval. The site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The buildings fronting onto Shrewsbury Road may have heritage value.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site is located within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
BNP014	Newtown Garage, Baschurch	Site is suitable for residential development subject to brownfield remediation issues and any site contamination as a result of previous use history. The site is also contains part of a Conservation Area. Therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also within 300m of a Listed Building. Development is subject to an assessment of impact on the significance of the setting of the listed building where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Site has previous permissions for residential development in 2011 and 2007 both now lapsed. The site has been the subject of a lapsed Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically part of the site is within a Conservation Area and the site is within 300m of one or more Listed Buildings. If the assessment shows no adverse effect or suitable mitigation were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period
SLAA Site Reference	Address	2021/22	2022/23	2023/24	2024/25	2025/26	Total

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
SHR003	Richmond House, Harlescott, Shrewsbury	The site is suitable in principle for open market residential development subject to assessment and management of physical, environmental and heritage constraints. For instance the site is located within 1km of a Ramsar Site, consequently, development is subject to an appropriate assessment under the Habitats Regulations. The site is located in proximity of a conservation area and scheduled monument. Therefore development is subject to an assessment of impact on the significance of the setting of this heritage asset(s). The site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The ability to provide an appropriate access to the site for an alternative use is subject to highway comments.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Planning Application (21/03434/FUL) for 12 dwellings pending consideration on the site.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Planning Application (21/03434/FUL) for 12 dwellings pending consideration on the site.	The site is considered available, achievable and viable (subject to any further necessary viability assessment). The site is considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site is located within proximity of a Ramsar site, conservation area and scheduled monument. The ability to provide an appropriate access for an alternative use is subject to highway comments. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Planning Application (21/03434/FUL) for 12 dwellings pending consideration on the site.
SHR011	Land at the Elms, Belvidere, Shrewsbury	As a part brownfield and part greenfield site within the development boundary, the site is considered suitable in principle for open market residential development. However, suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the need to provide an alternative location for the Scout Group. The ability to provide an appropriate access into the site is subject to highway approval. The site is within proximity of 'The Elms' Grade 2 Listed Building and a Conservation Area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site also contains and is in proximity to TPO's, therefore development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied by a Scout Group with 25 yr. lease so site will only become available during this time if an alternative location can be found for them (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically TPO's on site, impact on Grade 2 Listed Building 'The Elms' and satisfactory access. If suitable mitigation of the identified constraints were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
SHR014	Site at New Zealand House, Abbey Foregate, Shrewsbury	The portion of the site located within flood zones 2 and/or 3 is unsuitable for development. This portion of site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site is suitable for development subject to appropriate management of any physical, heritage and environmental constraints present. For instance the suitability of the access to serve the redevelopment of the site is subject to highway approval. The site is located within a Conservation Area and adjacent to a Grade 2 listed building, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. Furthermore, the site contains and is within proximity of TPO's. Consequently development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded. The site is also within 100m of a Local Nature Reserve so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered viable and achievable (subject to any further necessary viability assessment). It is not currently considered to be available, but it is considered that it is likely to become available in the future. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. The element of the site located outside flood zones 2 and/or 3 is considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically heritage assists and satisfactory access. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. The element of the site located in flood zones 2 and/or 3 would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
SHR015	Land at Whitehall, Shrewsbury	Site is located in a longstanding established residential area and would be suitable for open market residential development subject to assessment and management of physical, environmental and/or heritage constraints. For instance the site contains and is in proximity of a listed buildings; it is also located in a conservation area; and proximity of a scheduled monument, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.	Site is currently occupied as a medical / office facility with associated car parking. However, the site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered likely to become available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site contains listed buildings, is located in a conservation area and proximity of other heritage assets. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
SHR016	Shrewsbury Training and Development Centre, Racecourse Crescent, Shrewsbury	Site is located in a longstanding established residential area and would be suitable for open market residential development subject to assessment and management of physical, environmental and/or heritage constraints. For instance the ability to provide an appropriate access is subject to highway approval. The site is also within 300m of conservation area and 100m of Grade 2 listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the 'call for sites' for a relevant use, but this submission does not specify that the site is available for this form of development and subsequent investigations have not been able to clarify whether the site is available for this form of development. Therefore information gathered for the purpose of this study is unable to confirm that the site is available for this form of development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site
SHR080	Land at Oteley Road, Shrewsbury	The site is located within the development boundary and forms part of the Shrewsbury South SUE. Therefore open market residential development is suitable in principle. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the need to provide an appropriate highway access using Sutton Grange Drive, approved by Highway Authority. The site is just within 300m of Grade 2* Listed Building - the Greek Orthodox Church, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is in a prominent location and adjacent to residential dwellings and open space, therefore site design and layout must reflect this location. Full Planning Permission (21/01748/FUL) was recently granted post 31st March 2021 for the erection of a 66bed care home on the site and development has now commenced.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Full Planning Permission (21/01748/FUL) was recently granted post 31st March 2021 for the erection of a 66bed care home on the site and development has now commenced.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Full Planning Permission (21/01748/FUL) was recently granted post 31st March 2021 for the erection of a 66bed care home on the site and development has now commenced.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Full Planning Permission (21/01748/FUL) was recently granted post 31st March 2021 for the erection of a 66bed care home on the site and development has now commenced. As this Full Planning Permission consists of care home facilities, the ratio applied to communal accommodation is applied consistent with the Housing Delivery Test. This ratio is based on the national average number of adults in all households, with a ratio of 1.8. 66/1.8= 37 dwellings. This exceeds the cautious site capacity assumed within the Shropshire five year housing land supply.
SHR165	Land to north-west of Hazeldine Way, Shrewsbury	Greenfield site within development boundary, so no in principle restrictions. However, approximately 66% of the site is located within flood zone 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be suitable for development subject to confirmation of the ability to provide an appropriate access to and into the site (which is currently unclear), any proposed access is subject to highway approval. Suitability is also subject to appropriate management of any physical, heritage and environmental constraints present. For instance, the site is adjacent to Reabrook Valley Local Nature Reserve, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also in proximity of a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). Approximately 66% of the site is located within flood zone 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be suitable for development subject to confirmation of the ability to provide an appropriate access to and into the site (which is currently unclear), any proposed access is subject to highway approval. Suitability is also subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment.
SHR211	Land at Hollydene, Shrewsbury	The site is located within the development boundary. Therefore open market residential development is suitable in principle. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is subject to highway approval. The site is in proximity to trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA)		Years 1-5: Forecasting as at 31/03/2021						Post Local Plan Period

SHR211	Land at Hollydene, Shrewsbury						5	9

Strategic Land Availability Assessment (SLAA)		Strategic Land Availability Assessment			
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability	Summary
SHR217	The Pitch and Putt, Shrewsbury	The site is located within the development boundary. However approximately 50% of the site is identified as an outdoor sports facility. Therefore this area of the site is not appropriate for development unless an assessment has been undertaken which clearly indicates that the open space or facility is surplus to requirements or the loss would be replaced by equivalent or better provision. The remainder of the site is suitable in principle for open market residential development subject to material considerations and management of any physical, heritage and environmental constraints present. For instance the suitability of the access to serve alternative uses of the site will require highways approval. The site is in proximity of a conservation area, therefore development is subject to an assessment of impact on the significance of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Approximately 50% of the site is identified as an outdoor sports facility. Therefore this area of the site is not appropriate for development unless an assessment has been undertaken which clearly indicates that the open space or facility is surplus to requirements or the loss would be replaced by equivalent or better provision. The remainder of the site is suitable in principle for open market residential development subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
WEM018	Land behind 18-34 Aston Road, Wem	Suitable location subject to appropriate design and management of the physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access to and into the site is subject to highway approval. Access to services and facilities in the town may be constrained by highway and traffic issues associated with the rail crossing, this will require due consideration. The site is within proximity of a conservation Area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.
WHT005	Land at Sherrymill Hill, Whitchurch	The site is located within the development boundary, and so residential development is in line with policy. However, approximately 40% of the site is located within flood zone 2, therefore this part of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site is considered suitable for development, subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 250m of a Wildlife Site, and so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within 30m of multiple Veteran Trees/ trees protected by a Tree Preservation Order. Development is subject to an assessment of impact on these protected trees in order to demonstrate how they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 300m of a Conservation Zone. Development is subject to an assessment of impact on the significance of the setting of this heritage asset. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.	The site is considered available, viable and achievable (subject to any further necessary viability assessment). The site is located within the development boundary, and so residential development is in line with policy. 13/02623/FUL	Land At Broseley Social Club, Bank House, High Street, Broseley, Shropshire, TF12 5EZ	Application previously approved on the site (13/02623/FUL). Brownfield site within the settlement boundary.	Application previously approved on the site (13/02623/FUL). Brownfield site within the settlement boundary.	Site is currently in use, however it has been represented through the Planning Application process. Site is considered deliverable in the medium to long term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Application previously approved on the site (13/02623/FUL). Brownfield site within the settlement boundary.
10/01319/FUL	Land At 1 Pinkham, Cleobury Mortimer	Application previously approved on the site (10/01319/FUL)	Application previously approved on the site (10/01319/FUL)	Site is currently in use, however it has been represented through the Planning Application process. Site is considered deliverable in the medium to long term.	Site is considered achievable and likely to be delivered in the long term.	No major viability issues noted to date.	Application previously approved on the site (10/01319/FUL)
11/02801/OUT	Land at Wilton Lodge, Clun Road, Craven Arms	Application previously approved on the site (11/02801/OUT). Site within the settlement boundary.	Application previously approved on the site (11/02801/OUT). Site within the settlement boundary.	Known interest in developing the site in the past. Likely in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Previously approved application for 10 dwellings.
11/04589/EIA	Wharf Road, Ellesmere, Shropshire	Application previously approved on the site (11/04589/EIA). Much of the development was implemented. However phases of the development, including an extra care facility and some housing were not implemented. Site within the settlement boundary. Full Planning Permission (20/04019/FUL) was granted for 23 dwellings on part of the site, post 31st March 2021 and another Full Planning Application (21/02353/FUL) is pending consideration for 69 dwellings on the remainder of the site.	Application previously approved on the site (11/04589/EIA). Much of the development was implemented. However phases of the development, including an extra care facility and some housing were not implemented. Site within the settlement boundary. Full Planning Permission (20/04019/FUL) was granted for 23 dwellings on part of the site, post 31st March 2021 and another Full Planning Application (21/02353/FUL) is pending consideration for 69 dwellings on the remainder of the site.	Known interest in developing the site in the past. Much of the development was implemented. However phases of the development, including an extra care facility and some housing were not implemented. Full Planning Permission (20/04019/FUL) was granted for 23 dwellings on part of the site, post 31st March 2021 and another Full Planning Application (21/02353/FUL) is pending consideration for 69 dwellings on the remainder of the site.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Application previously approved on the site (11/04589/EIA). Much of the development was implemented. However phases of the development, including an extra care facility and some housing were not implemented. Site within the settlement boundary. Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term. Full Planning Permission (20/04019/FUL) was granted for 23 dwellings on part of the site, post 31st March 2021 and another Full Planning Application (21/02353/FUL) is pending consideration for 69 dwellings on the remainder of the site.
16/04032/FUL	9 Tower Street, Ludlow, SY8 1RL	Application previously approved on the site (16/04032/FUL). Site within the settlement boundary.	Application previously approved on the site (16/04032/FUL). Site within the settlement boundary.	Known interest in developing the site in the past. Likely to be delivered.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	Previously approved application for 10 dwellings. Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.
10/00968/FUL	Phoenix Garage, Great Hales Street, Market Drayton	Application previously approved on the site (10/00968/FUL). More recent application (13/01162/FUL) withdrawn in 2013, but Officer Report at the time recommended approval. Brownfield site within the settlement boundary.	Application previously approved on the site (10/00968/FUL). More recent application (13/01162/FUL) withdrawn in 2013, but Officer Report at the time recommended approval. Brownfield site within the settlement boundary.	Application to renew the previous permission was submitted and subsequently withdrawn. This indicates the landowner is still interested in bringing the site forward for development, subject to an appropriate and viable scheme. Likely in the longer term.	Subject to the development of a suitable and viable scheme, the development is achievable. Likely to come forward in the longer term.	A detailed viability report has previously been undertaken which indicated that developer profit margins were marginal. In order to make the development viable, no affordable housing contribution was to be sought - however an overage clause would have been required which will allow for the provision of an affordable housing provision should the profit margins increase due to an increase in the housing market. It is felt that in these circumstances the development would have been viable. As market conditions improve, the development will become increasingly viable.	Previously approved application for 14 dwellings. The site is likely to come forward in the longer term.
