SUBJECT: **W470589159100 Fuel System Pressure Test Gauges**

**GENERAL INFORMATION**

Due to changes to fuel system electronic monitoring capability, there is no longer a need for the four gauge system. Therefore, the Detroit™ special tool group has released W470589159100 Fuel System Pressure Test Gauge set to replace J-48706 Priming Port Fuel Pressure Test Gauge.

This tool is non-essential, so it will not be automatically shipped to your facility. The tool is currently available and can be ordered through the Paragon system.

d470297a

**TOOL USAGE INSTRUCTIONS**

There are two gauges; one is used to check low pressure fuel by manually installing the gauge on the priming port fitting. The other gauge is used to check suction from the low pressure pump by installing the pre-filter cap tool and connecting the gauge to the fitting on the cap.

**ADDITIONAL INFORMATION**

Ordering Information - Tools will not be automatically shipped to your facility. Tools can be ordered through Paragon using a DDE supplier prefix.
