Certified Occupational Health & Safety Management System

Certified Environmental Management System

Certified Quality Management System

GENERAL CATALOGUE

QUALITY POLICY AND OBJECTIVES

This catalogue illustrates the range of our standard products. For each product family we indicate the principal features, and sometimes the most frequent applications and the necessary guidelines for a correct application. Our sales personnel are at your disposal to supply more detailed information and our design and development engineers are available to study new solutions to particular applications.

All Cembre products comply with Directive 2011/65/EU of the European Parliament and Council dated 8 June 2011 (and subsequent amendment).

On 14th December 1990 **Cembre SpA Quality Management System** was certified by Lloyd's Register of Quality Assurance (LRQA) according to **ISO 9002-1987 EN 29002 - 1987 BS 5750: Part 2: 1987** for the manufacture of insulated and uninsulated copper crimping connectors. Then on 22nd December 1992 **Cembre SpA** was certified **ISO 9001** for the design and manufacture of cable accessories, electrical connectors and associated tools. The activities of the main premises in Brescia, the Italian regional offices and the subsidiary companies in Great Britain, France, Spain, Germany and USA are governed by a single Quality System, assessed by Lloyd's Register of Quality as conforming to the **ISO 9001:2008** norm, for the design, manufacture and sales of electrical connectors and associated tools, cable accessories, marking systems, tooling and products for railway applications. In house repair, refurbishment and calibration of tooling. This guarantees a homogeneous and high quality level of the products and services that Cembre offers to its customers.

Cembre S.p.A. has recently recognised the need to align its Environmental Management System with the spirit and content of **UNI EN ISO 14001: 2004** as fundamental to future development. To this end the company undertook a wide-ranging review of all functions including development and design stages, material selection, usage and manufacturing processes. The resulting definition of operational procedures in line with these aims and provisions has enabled **Cembre S.p.A.** to achieve Environmental Certification, further highlighting the companies sensitive and careful approach to environmental protection.

Cembre S.p.A. has recently enhanced its business processes with the certification by Lloyd's Register of Quality Assurance, of its Management System for the Health and Safety of Workers,

in accordance with the standard **OHSAS18001:2007 (Occupational Health and Safety Management System)**. The project, launched in early 2011, was strategically designed to facilitate the active participation of all employees at every level in the application of systems management, in order to optimise compliance of risk management capability with regard to laws and regulations concerning the health and safety of workers. All employees have received exhaustive training and are involved, by exercising their individual responsibility and competence, as key players in the identification of residual risk situations and the proposal of corrective solutions. For Cembre then, this certification is not only the proper recognition of the quality of work performed, but also an incentive to maintain a determined competitive advantage in increasingly difficult and aggressive international markets.

Cembre S.p.A. factory in Brescia (ITALY) covers an area of approximately 121.000 sqm

Cembre Ltd.
factory in Curdworth (Birmingham)

CONNECTORS FOR CONTROL, POWER AND DISTRIBUTION

Halogen free insulated terminals type VP, RP, BP, GP	4-5
Insulated chain terminals type CRP, CBP, CGP	6-7
PVC insulated crimp terminals type RF, BF, GF	8-9
Reinforced PA 6.6 insulated terminals type RKY, BKY, GKY	10-11
Female disconnect terminals type RF-F, BF-F, GF-F	12
Male disconnect terminals type RF-M, BF-M, GF-M	12
Partially insulated male/female connectors type RF-FM, BF-FM	12
Insulated bullet and socket connectors type RF-B, BF-B	12
Butt and parallel connectors type PL-M, PL-P	13
Butt connectors type NL-M	13
PE HD insulated, heat shrinkable type WL-M	13
Close end connectors type NL-P	13
Reinforced disconnect terminals type RKF, BKF, GKF	14
Female connectors, open barrel type RN-FA, BN-FA	14
Male connectors, open barrel type RN-MA, BN-MA	15
Male tabs, for board mounting type MP, MPD	15
Connector sleeves type CFA, CMA	15
Insulated end sleeves type PKE, PKC, CPKD	16
"Twin" insulated end sleeves type PKET, PKCT	17
Uninsulated end sleeves type KE	17
Uninsulated terminals type S	18-19
Uninsulated terminals type RN, BN, GN	20-21
Copper tube crimping lugs type A-M	22-23
Ring tongue terminals with contained palm for L.V. circuit breakers type A-M	24
Copper tube crimping lugs type A-L angled 90°	25
Copper tube terminals type A-2M	26
Through connectors type L-M	27
Parallel connectors type L-P	27
PA6.6 insulated Copper tube lugs type ANE-M	28
PA6.6 insulated fork terminals type ANE-U	29
Flexible braids type FL	29
PA6.6 insulated pin terminals type ANE-P	30
Uninsulated pin connectors type A-P	30
PA6.6 insulated Copper tube lugs type ANE-M, for extra flexible Copper conductor	31
Copper tube crimping lugs type A-M, for extra flexible Copper conductor	32
Copper tube lugs 4ESI fixing	33
Insulated covers type ES	33
Copper tube crimping lugs according to DIN 46235 type DR	34-35
Crimping through connectors according to DIN 46267 T.1 type DSV	35
Colour coded Copper crimping lugs type C	36-37
Colour coded Copper crimping lugs type CL	38
Colour coded Copper crimping lugs type C-D	39
Colour coded splices type BSCL	40

CONNECTORS FOR DERIVATIONS AND EARTHING

Sleeve connectors type C-C	41
Mechanical fixing lugs	42
Cable clamps	43

HIGH VOLTAGE COPPER TERMINALS

High voltage terminals type 2A-M	44
High voltage terminals type 2A-2M	45
High voltage heavy duty Copper terminals type CA-M	46
High voltage heavy duty Copper terminals type CA-2M	47
High voltage terminals type 2A-2M/55°	47
High voltage stalk connectors type MT-C	48
High voltage Copper through connectors type MT-TD, MT-GC	49

CONNECTORS FOR ALUMINIUM CONDUCTORS

Aluminium terminals type AA-M	50
Through connectors type MTMA-GC, MTMA/1	51
Reducer through connectors type MTMA-GC	51
Aluminium terminals type AAD-M	52
Aluminium through connectors type DSA	53
Bimetallic connectors, Copper palm fixing type CAA-M	54
Bimetallic connectors, Copper pin type MTA-C	54

TERMINAL BLOCKS

ZETA più single pole terminal blocks	56-59
ZETA block power distribution blocks	60-61
ZETA mini one way terminal blocks	62

CABLE GLANDS AND ACCESSORIES

MAXI block cable glands, Polyamide, IP68	64-66
<i>spiral</i> block cable glands, Polyamide, IP68	67
MAXI block ATEX cable glands, Polyamide, IP65	68
Compression cable glands, Polyamide PA6, IP54	69-70
Compression cable glands & hole plugs, Polystyrene, IP54	71
MAXI brass cable glands, Nickel plated Brass, IP68	72-75
MAXI brass ATEX cable glands, Nickel plated Brass, IP65	76
EMC cable glands & locknuts, Nickel plated Brass, IP68	76
Compression cable glands, Nickel plated & plain Brass, IP54	77
MAXI inox cable glands, Stainless Steel, IP68	78-79
Locknuts with & without collar, Polyamide	80-81
Locknuts, Nickel plated & plain Brass	82
EMC locknuts, Nickel plated Brass	83
MAXI inox locknuts, Stainless Steel	83
Internal plugs & multi-entry seals for cable glands	84-85
Thread enlargers, reducers and converters, Nickel plated Brass	86-87
Accessories	88
O-rings, sealing rings and compression washers	89-91
Entry plugs, Polyamide PA6, Polystyrene, IP54	92-93
Entry bushes, Polyamide PA6	94
Entry plugs & bushes, Nickel plated & plain Brass, IP54	95
RUTASEAL grommets, EPDM, IP67	96

CABLE & CONDUIT ACCESSORIES

SICUR clips retaining clips for cable & conduit, ABS	96
---	----

MECHANICAL TOOLS

Mechanical tools	98-115
Pneumatic press and bench tools	117-122

HYDRAULIC TOOLS

Hydraulic crimping tools	124-135
Hydraulic cable cutters	136-144
Special tools	145-147
Accessories	148
Crimping force gauges & pressure test devices	148

CORDLESS HYDRAULIC TOOLS

APPENDIX

Reference/Code cross-chart	192-201
Comparison of AWG, MCM and Metric conductor cross sections	202
IEC 60228 : 2004 - 11 Conductor Tables	203-205
System of denomination of harmonised cables according to CENELEC HD 361	206
UL & VDE approvals	207
IP ratings, flammability tests, torque settings	208-210

ELECTRICAL CONNECTORS

HALOGEN FREE INSULATED TERMINALS

VP RP
BP GP

P range funnel entry

Certified according to
EN 45545-2:2013

OPERATING
TEMPERATURE
UP TO 115° C

HALOGEN FREE

The "P" range of terminals has been designed, to meet the increasing demands for improved safety and reliability of electrical connectors. The Polycarbonate insula-

tion, is a Halogen free, self extinguishing thermoplastic material class VO (UL 94). The unique funnel shaped entry of the insulation sleeve, guarantees total

insertion of the conductor strands into the terminal barrel, creating a secure and reliable, electrical and mechanical connection.

The operating temperature range is - 20 to + 115°C (Surge + 130°C). Recommended crimping tools are shown on pages 98 to 117, 152.

INSULATED CHAIN TERMINALS

CP range with easy entry

CRP
CBP
CGP

HALOGEN FREE
OPERATING TEMPERATURE UP TO 115°C

Certified according to EN 45545-2:2013

The "CP" range of terminals has been designed to meet the increasing demands for improved safety and reliability of electrical connectors.

Developed for use with production equipment, to give a quick and reliable crimped joint, the Polycarbonate insulation is a Halogen free, self extinguishing thermoplastic material class

VO (UL 94). The unique funnel shaped entry of the insulation sleeve guarantees total insertion of the conductor strands into the terminal barrel, creating a se-

cure and reliable, electrical and mechanical connection. The operating temperature range is - 20 to + 115°C (Surge + 130°C).

Interchangeable application heads are available for crimping these terminals with the bench press ELB-3 (see page 122).

PVC INSULATED CRIMP TERMINALS

F range funnel entry

RF BF GF

The unique funnel shaped PVC sleeve guarantees total insertion of the conductor strands into the terminal barrel, creating a secure and reliable, electrical and mechanical connection. The internal surface of the

barrel is rifled to improve contact with conductor strands when crimped and to increase tensile strength. The "F" range of terminals offers a wide selection of rings, forks, pins and blades, designed to meet the ever

changing end user requirements.

The operating temperature range is - 20 to + 80°C (Surge + 90°C).

Recommended crimping tools are shown on pages 98 to 117, 152.

REINFORCED PA 6.6 INSULATED TERMINALS

RKY
BKY
GKY

KY range

HALOGEN FREE

'KY' type terminals are designed to offer improved mechanical and electrical integrity under heavy-duty application. This is achieved via a Copper sleeve located between

the Copper barrel and Polyamide insulation of the terminal. Then, during crimping, the insulation of the conductor is integrated into the crimp due to the Copper sleeve being deformed

around it to maintain the level of 'grip' required in applications subject to continuous mechanical vibrations (e.g: mobile plant, vehicles, moving components).

The operating temperature range is - 20 to + 105°C (Surge + 110°C). Recommended crimping tools are shown on pages 98 to 117, 152.

PKET PKCT

Type PKET, PKCT ranges of twin end sleeves are manufactured from Tin plated electrolytic Copper. Designed to accommodate two cables terminating in the same sleeve they are ideal for looping conductors. The operating temperature range is - 20 to + 105°C (Surge + 110°C).

Recommended crimping tools are shown on pages 98 to 121, 125, 152, 154, 156.

KE

KE series end sleeves are manufactured from Tin plated electrolytic Copper. Designed and developed for use with flexible cables.

Recommended crimping tools are shown on pages 98 to 121, 125, 152, 154, 156.

S

UNINSULATED TERMINALS

S range - brazed seam

S range terminals are manufactured from electrolytic Copper strip and Tin plated. The seam is brazed to

provide uniform mechanical strength. The terminal barrel is rifled to enhance electrical con-

tact and to improve mechanical strength.

Recommended crimping tools are shown on pages 98 to 117, 152.

UNINSULATED TERMINALS

RN, BN, GN range - unbrazed

RN
BN
GN

RN, BN, GN range terminals are manufactured from electrolytic Copper strip and

Tin plated.
The seam is unbrazed.
The terminal barrel is rifled

to enhance electrical contact and to improve mechanical strength.

Recommended crimping tools are shown on pages 98 to 117, 152.

COPPER TUBE CRIMPING LUGS

for Copper conductors

File no. E125401

A-M series lugs are manufactured from electrolytic Copper tube.

The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength to resist vibration and pull out.

Cembre lugs are annealed to guarantee optimum ductility which is an absolute necessity for connectors which will have to withstand the severe deformation arising when compressed and any bending of the palm during installation.

In applications subject to vibration, lugs still have to provide a reliable connection and annealing plays a vital role in avoiding cracking or breaks between the barrel and palm.

The presence of an inspection hole facilitates full insertion of the conductor, whilst the barrel length has been designed to allow easy and accurate positioning of the dies during the crimping operation.

Lugs are electrolytically plated to avoid oxidation. A-M series lugs form an important part of Cembre crimping systems for power carrying conductors, details of the appropriate crimping tools and dies are shown opposite and in detail on pages 178 to 179.

Our technicians are always available to provide any technical advice which may be required.

The enclosed table is only indicative of the range and many variations in stud fixing and palm lengths are also available.

RING TONGUE TERMINALS WITH CONTAINED PALM

for L.V. circuit breakers
for Copper conductors

This range of terminals features contained palm width and has been specifically developed for application on L.V. circuit breakers with reduced space terminal blocks. The contained palm width allows an immediate and easier installation. Cembre terminals are manufactured from electrolytic Copper tube.

The specifically designed section of the barrel and the choice of principal dimensions are optimising the best combination of mechanical strength and electrical conductivity. These terminals are annealed to guarantee optimum ductility and are electrolytically Tin plated to avoid oxidation. The barrel is provided with an internal taper to ease the introduction of the conductor; furthermore, its length grants a comfortable and correct positioning between dies, during crimping operations. Each palm is marked with the Cembre logo and part number.

*Actual conductor section may require a larger lug eg for 120mm² size use A30-... lug.

**See page 111

♦Not UL approved

A-L series lugs angled 90° are manufactured from electrolytic Copper tube. The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength to resist vibration and pull out.

Cembre lugs are annealed to guarantee optimum ductility which is an absolute necessity for connectors which will have to withstand the severe deformation arising when compressed and any bending of the palm during installation.

In applications subject to vibration, terminals still have to perform a reliable connection, annealing plays a vital role in avoiding cracking or breaks between the barrel and palm.

The presence of an inspection hole facilitates full insertion of the conductor, whilst the barrel length has been designed to allow easy and accurate positioning of the dies during the crimping operation.

Lugs are electrolytically tinned to avoid oxidation. Details of the appropriate crimping tools and dies are shown on pages 178 to 179.

A-2M

COPPER TUBE CRIMPING LUGS

double hole fixing
for Copper conductors

File no. E125401

A-2M.. series lugs are manufactured from electrolytic Copper tube conforming to EN13600.

The tube dimensions are designed to optimise electrical conductivity and mechanical strength.

Palms feature double stud holes at standard 44.5mm centres.

Other configurations are available upon request.

Lugs are annealed to ensure ductility and satisfactory performance when subjected to deformation and vibration.

Inspection holes facilitate verification of full conductor insertion, while the barrel length has been determined to allow easy and accurate positioning of the crimping dies.

Lugs are electrolytically Tin plated to avoid oxidation.

Details of the appropriate crimping tools and dies are shown on pages 178 to 179.

L-M

L-M range of connectors are designed for jointing low voltage conductors. Made of electrolytic Copper tube having the same dimension as A-M series lugs: L-M connectors are annealed and electrolytically Tin plated.

They feature an internal taper at both ends to ease the introduction of the conductor and a central stop to ensure correct positioning.

Details of the appropriate crimping tools and dies are shown on pages 178 to 179.

L-P

Made of electrolytic Copper tube, having the same dimensions as A-M series lugs, L-P connectors are annealed and electrolytically Tin plated.

They feature an internal taper to ease the introduction of the conductor.

Details of the appropriate crimping tools and dies are shown on pages 178 to 179.

POLYAMIDE PA6.6 INSULATED COPPER TUBE LUGS

ANE-M

ANE-M series lugs are manufactured from electrolytic Copper tube annealed and Tin plated.

The interior of the PA6.6 insulated sleeve is funnel shaped so as to ensure complete and easy introduction of the conductor strands.

It also eliminates the need to insulate the terminal using either tape or heat shrinkable tubing.

Furthermore the PA6.6 sleeve avoids the possibility of conductor breakage at the barrel entrance.

The operating temperature range is - 20 to + 115°C (Surge + 130°C).

In order to achieve the best electrical and mechanical performance it is suggested that they are crimped using dies and tools specifically developed for this purpose by Cembre.

Details of the appropriate crimping tools and dies are shown on pages 182 to 183.

Flexible braids are manufactured from electrolytic Copper wire.

Braids of different conductor sizes or lengths are available on request.

Standard finish - bright Copper.

Flexible braids can be supplied Tin plated, in this case add the suffix "ST" to reference.

E.g.:

- FL 10-150 (Bright Copper)

- FL 10-150-ST (Tin plated)

These lugs are particularly recommended for use with extra flexible conductors on for instance, welding machines.

ANE-M series lugs are manufactured from electrolytic Copper tube annealed and Tin plated.

The interior of the PA6.6 insulated sleeve is funnel shaped so as to ensure complete and easy introduction of the conductor strands.

It also eliminates the need to insulate the terminal using either tape or heat shrinkable tubing.

Furthermore the PA6.6 sleeve avoids the possibility of conductor breakage at the barrel entrance.

The operating temperature range is - 20 to + 115°C (Surge + 130°C).

In order to achieve the best electrical and mechanical performance it is suggested that they are crimped using dies and tools specifically developed for this purpose by Cembre.

Details of the appropriate crimping tools and dies are shown on pages 182 to 183.

A-M

COPPER TUBE CRIMPING LUGS

for extra flexible Copper conductors

for fine stranded
SPECIAL
flexible conductors

These lugs are particularly recommended for use with extra flexible conductors on for instance, welding machines.

A-M series lugs are designed to suit panel applications.

The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength to resist vibration and pull out.

Cembre lugs are annealed to guarantee optimum ductility and electrolytically Tin plated to avoid oxidation.

The presence of an inspection hole facilitates full insertion of the conductor.

Details of the appropriate crimping tools and dies are shown on pages 178 to 179.

A-4ESI series lugs are made from high purity electrolytic Copper tube, annealed and Tin plated. The four hole stud fixing in accordance with E.A. specifications ensures compatibility with most transformer fixing arrangements. Details of the appropriate crimping tools and dies are shown on pages 178 to 179.

Dimensions are in mm

Add the suffix corresponding to the selected colour to the reference:

-BU blue, **-GY** grey, **-BR** brown, **-BK** black, **-RE** red, **-YE** yellow,

* See A-M type copper tube lugs on pages 22-23, 32

** Depending on the diameter of the insulated cable

Insulated covers in PVC for general use with Cembre A-M copper tube lugs characterised by environmental tolerance, flexibility, not inflammability & stable performance. Widely used for the insulation and protection of connections and electrical terminations.

General features:

- **Material:** PVC
- **Self extinguishing (UL94):** VO
- **Working temperature:** 85 °C
- **Colours:** red, yellow, blue, black, grey, brown.

COPPER TUBE CRIMPING LUGS ACCORDING TO DIN 46235

for Copper conductors

DR

DR series lugs are manufactured from electrolytic Copper tube and designed to obtain high electrical conductivity combined with the mechanical strength required to resist vibration and pull out.

Cembre lugs are annealed and Tin plated for improved surface protection.

The annealing process optimises the structural features of the material allowing easier crimping and greater resistance to mechanical stresses.

Dimensions are according to DIN 46235.

The barrel entrance of the lug is chamfered to allow easy conductor insertion, while its length facilitates precise positioning in the crimping die.

Each lug is marked with:

- Cembre logo and part code.
- conductor type and csa (mm²).
- Stud Ø (mm).
- crimping die code

Details of the appropriate crimping tools and dies are shown on page 189.

DSV series through connectors are manufactured from electrolytic Copper tube, annealed and surface protected by tin plating. Internal and external dimensions match those of DR series lugs.

Chamfered ends and a central stop provide easy and correct insertion of the conductor.

Details of the appropriate crimping tools and dies are shown on page 189.

Consult us for special requirements

C

COLOUR CODED COPPER CRIMPING LUGS

for Copper conductors

C series lugs are manufactured from electrolytic Copper tube.

The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength to resist vibration and pull out.

Cembre lugs are annealed to guarantee optimum ductility, an absolute necessity for connectors which will have to withstand the severe deformation arising when compressed and any bending of the palm during installation.

In applications subject to vibration, terminals have to perform a reliable connection, the annealing process plays a vital role in avoiding cracking or breaks between the barrel and palm.

The presence of an inspection hole facilitates full insertion of the conductor. The barrel length has been designed to allow easy and accurate positioning of the dies during the crimping operation.

Lugs are electrolytically tinned to avoid oxidation.

The tongue is clearly marked with wire size and die index for Cembre tools.

UL listed for US and Canada per UL486A up to 35 KV.

C series lugs are an important part of Cembre crimping systems for power carrying conductors.

Details of the appropriate crimping tools and dies are shown on page 188.

Cembre technicians are available to provide technical advice as required.

Please consult Cembre for products not listed.

CL

COLOUR CODED COPPER CRIMPING LUGS

one hole long barrel for Copper conductors

CL series lugs are manufactured from electrolytic Copper tube for use in heavy duty applications.

The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength to resist vibration and pull out.

Cembre lugs are annealed to guarantee optimum ductility which is an absolute necessity for connectors which will have to withstand the severe deformation arising when compressed and any bending of the palm during installation.

In applications subject to vibration, terminals have to perform a reliable connection, the annealing process plays a vital role in avoiding cracking or breaks between the barrel and palm.

The long barrel provides better mechanical pull-out strength.

Lugs are electrolytically plated to avoid oxidation.

The tongue is clearly marked with wire size and die index for Cembre tools.

UL listed for US and Canada per UL486A up to 35 KV.

CL series lugs are an important part of Cembre crimping systems for power carrying conductors. Details of the appropriate crimping tools and dies are shown on page 188.

Cembre technicians are available to provide technical advice as required.

Please consult Cembre for products not listed.

CL series lugs are manufactured from electrolytic Copper tube.

The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength to resist vibration and pull out.

Cembre lugs are annealed to guarantee optimum ductility, an absolute necessity for connectors which will have to withstand the severe deformation arising when compressed and any bending of the palm during installation.

In applications subject to vibration, terminals have to perform a reliable connection, the annealing process plays a vital role in avoiding cracking or breaks between the barrel and palm.

The barrel length has been designed to allow easy and accurate positioning of the dies during the crimping operation.

Lugs are electrolytically tinned to avoid oxidation.

The tongue is clearly marked with wire size and die index for Cembre tools.

UL listed for US and Canada per UL486A up to 35 KV.

CL series lugs are an important part of Cembre crimping systems for power carrying conductors. Details of the appropriate crimping tools and dies are shown on page 188.

Cembre technicians are available to provide technical advice as required.

Please consult Cembre for products not listed.

BSCL

COLOUR CODED SPLICES

long barrel

BSCL range of connectors are designed for jointing low voltage conductors in heavy duty applications. Made of electrolytic Copper tube having the same dimension as C and CL series lugs, BSCL connectors are annealed and electrolytically Tin plated. They feature an internal taper at both ends to ease the introduction of the conductor and a central stop to ensure correct positioning. **UL listed for US and Canada per UL486A up to 35 KV.**

Appropriate crimping tools and dies are shown in details on page 188.

"C" connectors are manufactured from high purity copper profiles and are suitable for a variety of uses either to create an earthing network or tapping off from overhead distribution lines. Each connector is marked as follows:

- Cembre trade mark
- Reference number
- Conductor size-Run
- Conductor size-Tap
- Number of crimps
- Die reference.

Details of the appropriate crimping tools and dies are shown on page 184.

HIGH VOLTAGE TERMINALS

2A-M

2A-M series terminals are made from high purity Copper tube, and are annealed.

They feature a double length barrel for enhanced electrical and mechanical performance in heavy duty applications.

The absence of an inspection hole prevents the entry of water or moisture into the crimped joint making these terminals suitable for outdoor applications.

The terminals are electrolytically Tin plated to prevent atmospheric corrosion.

Details of the appropriate crimping tools and dies are shown on pages 180 to 181.

*Not UL approved

2A-2M.. series lugs are manufactured from electrolytic Copper tube conforming to EN13600.

The tube dimensions are designed to optimise electrical conductivity and mechanical strength.

Double length barrels enhance electrical and mechanical performance in heavy duty applications.

Palms feature double stud holes at standard 44.5mm centres.

Other configurations are available upon request.

Lugs are annealed to ensure ductility and satisfactory performance when subjected to deformation and vibration.

The absence of an inspection hole prevents the ingress of water or moisture into the crimped joint making these terminals suitable for outdoor applications.

Lugs are electrolytically Tin plated to avoid oxidation.

Details of the appropriate crimping tools and dies are shown on pages 180 to 181.

HIGH VOLTAGE HEAVY DUTY COPPER TERMINALS

CA-M

Series CA-M and 2A-M terminals are designed for high voltage applications up to 33 kV.

They are manufactured from high purity Copper tube, annealed and Tin plated.

The extended barrel enhances both electrical and mechanical performance. The absence of an inspection hole prevents moisture entry into the crimped joint and makes these terminals suitable for outdoor applications.

Details of the appropriate crimping tools and dies are shown on page 184.

CA-2M and 2A-2M Copper Tube Terminal Lugs are designed for high voltage applications up to 33kV. Manufactured from high purity Copper tube, annealed and Tin plated. The extended barrel enhances electrical and mechanical performance. The absence of an inspection hole prevents moisture entry into the crimped joint. Featuring an extended palm with two fixing holes at 44.5mm centres. Details of the appropriate crimping tools and dies are shown on page 184.

Conductor Format: R = Round

The 2A-2M/55° Copper Tube Terminal Lugs have the same characteristics as the CA-2M and 2A-2M ranges, with the additional feature of the palm bent at 55°.

HIGH VOLTAGE STALK CONNECTORS

MT-C

MT-C series connectors are designed for high voltage applications up to 33 kV. They are manufactured from high purity Copper, annealed and Tin plated. The extended barrel enhances both electrical and mechanical performance. The stalk or pin makes these connectors ideal for terminating conductors into contact blocks. Details of the appropriate crimping tools and dies are shown on page 184.

MT-TD and MT-GC series connectors are designed to join conductors in high voltage applications up to 33 kV.

They are manufactured from high purity Copper, annealed and Tin plated.

MT-GC series feature a solid stop which forms a barrier between the two conductors being joined, this prevents the migration of oils or greases, which may be present, in one cable contaminating the other cable.

MT-TD connectors are unblocked and are suitable for joining cables of the same type.

Details of the appropriate crimping tools and dies are shown on page 184.

ALUMINIUM TERMINALS

AA-M

AA-M series terminals are made from Aluminium of a purity equal to or greater than 99,5%.

They are designed to accept a variety of conductor forms especially low stranded compacted conductors.

Non circular conductors may require pre-rounding prior to introduction to the terminal.

Barrels are capped and filled with grease so as to avoid oxidation of the Aluminium.

Details of the appropriate crimping tools and dies are shown on page 185.

MTMA-GC series reducer through connectors are manufactured to the same specification as MTMA-GC series through connectors. Details of the appropriate crimping tools and dies are shown on pages 186-187.

AAD-M

ALUMINIUM TERMINALS

for non-tension connections on Aluminium conductors according to DIN EN 50182

Tube dimensions according to DIN 46329

Terminals type AAD.-M.. are made from Aluminium tube of a purity equal or greater than 99,5%. They are suitable for Aluminium conductors according to DIN EN 50182, up to 10 kV.

All terminals are filled with a special grease that avoids Aluminium oxidation after crimping thereby assuring an optimal compression.

Barrel is closed with a cap for storage and transport.

Bright surface finish

The following data is stamped on the terminal:

- Cembre logo
- Terminal description
- Section
- Fixing bolt size
- Number and position of crimps
- Cembre Die reference according to DIN 48083

Details of the appropriate crimping tools and dies are shown on page 190.

Crimping through connectors type DSVA .. are manufactured according to DIN 46267 part 2.

The aluminum tube has a purity equal to or greater than 99.5%. The crimping through connectors are suitable for aluminum conductors according to DIN EN 50182, up to 10 kV.

All connectors are filled with a special grease that avoids aluminum oxidation after crimp and thus guarantees an optimal compression. Barrels are capped for storage and transport.

On the connector following information is shown:

- Cembre logo
- Connector description
- Section
- Number and position of crimps
- Compression code according to DIN 48083

Details of the appropriate crimping tools and dies are shown on page 190.

CAA-M

BIMETALLIC CONNECTORS

*copper palm fixing
Aluminium barrels*

The barrels of series CAA-M connectors are made from Aluminium of a purity equal to or greater than 99,5%. The barrel is friction welded to the palm thus achieving the best possible transition between the copper palm and Aluminium barrel. Barrels are capped and filled with grease so as to avoid oxidation of the Aluminium.

Details of the appropriate crimping tools and dies are shown on pages 185, 187.

TERMINAL BLOCKS

Z6

SINGLE POLE TERMINAL BLOCKS

indirect clamping
nominal section 6 sqmm

The "Z...D" version has been designed for mounting on DIN rails

3, 5, 6 and 10 way, single pole terminal blocks for conductor section 1 to 6 sqmm. Self contained and robust, they are quick and easy to install for both industrial and domestic use. The indirect clamping of the "ZETA più" terminal blocks guarantees a low and stable contact resistance. Indirect clamping eliminates damage to the conductor strands. The easy-entry receptacles also grant a fast and reliable insertion of the cable.

160 A

Z 50-DP12-160

100, 125 and 160A, 2-4 pole distribution blocks with 7, 14 and 12 ways per pole respectively.

Accepting a wide cable CSA range (1 - 50 sqmm) and of compact size, ZETA blocks are ideal for control cabinets and distribution panels.

The lateral arrangement of terminals on upper and lower faces (Z35-DP14B one face only), simplifies connection and promotes tidy, homogeneous cable routing to assist subsequent wiring operations.

Easy entry apertures provide quick, effective cable insertion while the indirect clamping feature eliminates damage to cable strands and assures a low, stable contact resistance.

One way, single pole terminal blocks for conductors sections from 0.5 to 35 sqmm. Self contained and robust, they are ideal for the fast and safe installation for industrial and domestic applications.

The indirect clamping of the "ZETAmini" terminal blocks guarantees a low and stable contact resistance.

The easy-entry receptacle also grants a fast and reliable insertion of the cable.

Technical features:

- Self-extinguishing Polycarbonate body
- Electrolytically Zinc plated, tempered Steel clamp and screw

- Electrolytically tin plated Steel connection plate

EMC Cable glands and locknuts are designed to work together in electrical or electronic applications where a metallic cable shielding must be equipotential with a metallic enclosure, in accordance with the EMC directive.

Offering IP68 ingress protection at 5 bar pressure, EMC Cable glands will maintain shielding from electromagnetic disturbance in underground applications.

EMC locknuts have serrated teeth to maintain electrical contact through paint or surface coatings, a feature which also enhances vibration resistance.

MECHANICAL AND PNEUMATIC TOOLS

HP 1

Manual tool, compact and easy to use, equipped with:

- treated steel crimp jaws with high mechanical properties.
- factory-set ratchet for crimping control (automatic handle opening upon completion of crimping operation).
- Emergency release lever which, if necessary, opens the crimp jaws before their complete closure.
- Ergonomically designed non-slip moulded plastic grips.

Technical features:

Crimpstar[®] HP 1

Crimp style:

PVC, PC and PA6.6 insulated terminals and connectors for conductor sizes 0,2 to 2,5 sqmm

Crimping range:

Dimensions:

Length (closed handles)

234,5 mm

Width (closed handles)

73,0 mm

Height

18,3 mm

Weight:

512 g

Package dimensions:

240 x 81 x 25 mm

HP 3

Manual tool, compact and easy to use, equipped with:

- treated steel crimp jaws with high mechanical properties.
- factory-set ratchet for crimping control (automatic handle opening upon completion of crimping operation).
- Emergency release lever which, if necessary, opens the crimp jaws before their complete closure.
- Ergonomically designed non-slip moulded plastic grips.

Technical features:

Crimpstar[®] HP 3

Crimp style:

PVC, PC and PA6.6 insulated terminals and connectors for conductor sizes 0,25 to 6 sqmm

Crimping range:

Dimensions:

Length (closed handles)

234,5 mm

Width (closed handles)

73,0 mm

Height

18,3 mm

Weight:

498 g

Package dimensions:

240 x 81 x 25 mm

HNN 3

Technical features:

Crimpstar[®] HNN 3

Crimping range:	PA6.6 insulated terminals and connectors for conductor sizes 1,5 to 10 sqmm
Dimensions:	
Length (closed handles)	234,5 mm
Width (closed handles)	73,0 mm
Height	18,3 mm
Weight:	491 g
Package dimensions:	240 x 81 x 25 mm

Crimp style:

Manual tool, compact and easy to use, equipped with:

- treated steel crimp jaws with high mechanical properties.
- factory-set ratchet for crimping control (automatic handle opening upon completion of crimping operation).
- Emergency release lever which, if necessary, opens the crimp jaws before their complete closure.
- Ergonomically designed non-slip moulded plastic grips.

HNN 4

Technical features:

Crimpstar[®] HNN 4

Crimping range:	PA6.6 insulated terminals and connectors for conductor sizes 10 and 16 sqmm
Dimensions:	
Length (closed handles)	234,5 mm
Width (closed handles)	73,0 mm
Height	18,3 mm
Weight:	492 g
Package dimensions:	240 x 81 x 25 mm

Crimp style:

Manual tool, compact and easy to use, equipped with:

- treated steel crimp jaws with high mechanical properties.
- factory-set ratchet for crimping control (automatic handle opening upon completion of crimping operation).
- Emergency release lever which, if necessary, opens the crimp jaws before their complete closure.
- Ergonomically designed non-slip moulded plastic grips.

MECHANICAL TOOLS *Crimpstar*[®] RANGE

HPH 1

Manual tool, compact and easy to use, equipped with:

- treated steel crimp jaws with high mechanical properties.
- factory-set ratchet for crimping control (automatic handle opening upon completion of crimping operation).
- Emergency release lever which, if necessary, opens the crimp jaws before their complete closure.
- Ergonomically designed non-slip moulded plastic grips.

Technical features:

Crimpstar[®] HPH 1

Crimp style:

Through connectors
PE HD insulated, heat shrinkable.
for conductor sizes 0,5 to 6 sqmm
and PA6.6 connectors NL-M, NL-P
for conductor sizes 0,25 to 6 mm²

MECHANICAL TOOLS *nd*[®] RANGE

ND#1

A generation of tools, with a unique mechanism to reduce operator effort. Small and compact, with ergonomically designed handles for ease of operation.

High quality materials combined with advanced design and manufacturing technology, produce a reliable tool with a guaranteed consistent, crimping operation.

Technical features:

ND#1	Crimp style:	
Crimping range:	Insulated and uninsulated end sleeves for conductors sizes 0,3 to 1,5 sqmm	
Dimensions:		
Length (closed handles)	190 mm	
Width (closed handles)	72 mm	
Height	21 mm	
Weight:	470 g	

ND#2

Technical features:

ND#2	Crimp style:	
Crimping range:	Insulated and uninsulated end sleeves for conductors sizes 1 to 6 sqmm	
Dimensions:		
Length (closed handles)	190 mm	
Width (closed handles)	72 mm	
Height	21 mm	
Weight:	470 g	

ND#3

Technical features:

ND#3	Crimp style:	
Crimping range:	Insulated and uninsulated end sleeves for conductors sizes 6 to 16 sqmm	
Dimensions:		
Length (closed handles)	190 mm	
Width (closed handles)	72 mm	
Height	21 mm	
Weight:	470 g	

ND#4

Technical features:

ND#4	Crimp style:	
Crimping range:	Insulated and uninsulated end sleeves for conductors sizes 0,5 to 4 sqmm	
Dimensions:		
Length (closed handles)	190 mm	
Width (closed handles)	72 mm	
Height	21 mm	
Weight:	470 g	

Package dimensions: 195 x 76 x 20 mm

MECHANICAL TOOLS ZKE RANGE

Crimp style:

ZKE 6-F

Tool for crimping end sleeves
0,5 to 6 sqmm
front insertion

Crimp style:

ZKE 610

Single aperture, ratchet controlled tool
for crimping end sleeves,
0,08 to 10 sqmm
side insertion

Crimp style:

ZKE 2

For end sleeves
0,5 to 16 sqmm

MECHANICAL TOOL HWE1

with interchangeable dies

HWE1

Rapid insertion/extraction of
dies without using other tools

A robust and reliable tool designed to
optimise the installers time and
effort. A single tool body with
a range of interchangeable
dies allows a quick and simple
transfer from one cable/connector
combination to another, across a range
of applications.

Technical features

- Length: 240 mm
- Weight: 590 g
- Automatic opening of handles following completion of the crimping operation
- Dull Nickel finish
- Anti-slip handle grips

- HWE1 Manual mechanical tool
- WF16 die
- IT6 die
- all contained in a sturdy plastic case with extra compartments for interchangeable dies

MECHANICAL TOOLS HP4 RANGE

HP4-R

Professional manual mechanical tool with ratchet mechanism that prevents the handles from opening again before reaching the ratchet.

Equipped with a positioning device to reduce the operator's effort and facilitate proper crimping of the conductor. According to the different thicknesses of the conductor insulation, the crimping on the insulation can be carried out by adjusting the jaws through three different settings:

1) strong, 2) medium, 3) light.

The tool is particularly easy to use thanks to its shape and handle coating.

At the end of the crimping the outer surface of the conductor is automatically stamped with the following crimping code:

one point for red conductor sizes from 0.25 to 1.5 mm²

Construction features:

- Special treated and externally protected steel body, ratchet and handles.
- Handle coating in soft red PVC plastic.

Technical features:

HP4-R

Crimping range:

Dimensions:

Length (closed handles)

Width (closed handles)

HP4-B

Professional manual mechanical tool with ratchet mechanism that prevents the handles from opening again before reaching the ratchet.

Equipped with a positioning device to reduce the operator's effort and facilitate proper crimping of the conductor. According to the different thicknesses of the conductor insulation, the crimping on the insulation can be carried out by adjusting the jaws through three different settings:

1) strong, 2) medium, 3) light.

The tool is particularly easy to use thanks to its shape and handle coating.

At the end of the crimping the outer surface of the conductor is automatically stamped with the following crimping code:

two points for blue conductor sizes from 1.5 to 2.5 mm²

Construction features:

- Special treated and externally protected steel body, ratchet and handles.
- Handle coating in soft blue PVC plastic.

Technical features:

HP4-B

MECHANICAL TOOLS HP4 RANGE

Construction features:

- Special treated and externally protected steel body, ratchet and handles.
- Handle coating in soft yellow PVC plastic.

HP4-G

Professional manual mechanical tool with ratchet mechanism that prevents the handles from opening again before reaching the ratchet.

Equipped with a positioning device to reduce the operator's effort and facilitate proper crimping of the conductor. According to the different thicknesses of the conductor insulation, the crimping on the insulation can be carried out by adjusting the jaws through three different settings:

1) strong, 2) medium, 3) light.

The tool is particularly easy to use thanks to its shape and handle coating.

At the end of the crimping the outer surface of the conductor is automatically stamped with the following crimping code: three points for yellow conductor from 4 to 6 sqmm

Technical features:

HP4-G

Crimp style:

Crimping range:

PVC, PC and PA6.6 insulated terminals and connectors for conductor sizes 4 to 6 sqmm

Dimensions:

Length (closed handles)

320 mm

Width (closed handles)

105 mm

Weight:

810 g

Package dimensions:

330 x 110 x 50 mm

HP4-C10

Professional manual mechanical tool with ratchet mechanism that prevents the handles from opening again before reaching the ratchet.

The tool is particularly easy to use thanks to its shape and handle coating.

Construction features:

- Specially treated and externally protected steel body, ratchet and handles.
- Handle coating in soft yellow PVC.

Technical features:

HP4-C10

Crimp style:

Crimping range:

For sleeve connectors type C6-C6 and C10-C10

Dimensions:

Length (closed handles)

325 mm

Width (closed handles)

105 mm

Weight:

730 g

Package dimensions:

330 x 110 x 50 mm

MECHANICAL TOOLS TN RANGE

TN 70SE

Professional manual mechanical tool suitable for crimping A-M Cu lugs and non-insulated L-M and L-P connectors.
Heat treated steel crimp jaws.
Easily adjustable die positioning by knurled screw and reference vernier scale.
Handles made from anti-slip plastic with hilt.

Technical features:

TN 70SE

Crimping range:

Dimensions:

Length (closed handles)

WIRE STRIPPERS

HB 1-U

Wire stripper for PVC insulated cables 0,1 to 6 sqmm

HB 11

For photovoltaics insulated cables 2,5 to 6 sqmm stripping length 8,5 mm

SCISSORS

New

SC 1

Electricians scissors with high tensile steel blades allowing for excellent strength and performance. Specially micro-serrated blades for anti-slip purpose. Handles are made from dual component materials.

SC 3X

Multi-purpose scissors with high hardness blades (56 HRC) and anti slide serrations. The moulded plastic handles combine a rigid structure with a softer material for finger comfort. Cutting of flexible conductors up to 35 mm²

SC 5X

Robust-A

New

Professional scissors with Special Steel frame, high hardness blades (58 HRC) and anti slide serrations. The moulded plastic handles combine a rigid structure with a softer material for finger comfort. Cutting of flexible conductors up to 50 mm²

CABLE STRIPPING TOOLS

HB 13UE

Universal cable stripping tool for external sleeves of Low/Medium Voltage cables Ø 12,7 to 63,5 mm and primary insulator in XLPE max Ø 38,1 mm

HB 12N

HB12N cable stripping tool removes the semiconductor layer by being manually rotated around the cable while lateral advancement is achieved automatically. Safe and convenient, it can be used on cables with a semi-con diameter between 18 - 60 mm.

- Sturdy frame in anodised Aluminium alloy and Steel.
- Special Steel blade with precise cutting depth regulation.
- Stripping operation can start at any point along the conductor.
- Bearing mounted rollers provide smooth cutting action.

For vulcanised extruded semiconductor

- With "REVERSE" function, which allows the removal of semiconductor up to 7 mm thick from the sheath of the cable.
- Double speed for each direction.

The **HB 12N** kit includes:

- HB 12N cable stripping tool
- sturdy plastic case

HB 29-U HB 40-U

Wire stripper, for circular cables.

- Three types of cut:
 - Circumferential
 - Linear
 - Spiral
- Blade height adjustable to suit insulation thickness
- Blade profile suits difficult insulation
- PTFE blade housing reduces friction
- Spare blade HBSJ29/40

- **HB 29-U:** Ø 4,5 - 29 mm
- **HB 40-U:** Ø 19 - 40 mm

Dimensions:	HB 29-U	HB 40-U
Length mm:	138	153
Width mm:	38	54
Depth mm:	38	28
Weight g:	100	110

HAND TOOL FOR CUTTING AND SEALING FLEXIBLE CONDUIT

KTS 1632

Cuts and seals flexible plastic conduit in a single operation. Lightweight and easy to operate. Suitable for flexible conduits from Ø16 to Ø32 mm.

Length: 230 mm
Width: 58 mm
Thickness: 32 mm.
Weight: 0,32 kg.

PC 1

Plastic pipe cutting tool
 Cutting capacity: Ø 6 to Ø 42 mm.

Body:
 die-cast aluminium alloy
Blade material:
 hardened Carbon Steel

FRAME-TYPE HOLE PUNCHING TOOL FOR CABLE TRUNKING

MT-FC48N

Table denotes the punch/die set reference, for each hole size.
 Suitable for punching holes in mild steel, fibreglass or plastic material, up to 2 mm thick.

VAL P30
 Supplied in a robust plastic case.

Lightweight and easy to operate, designed for punching holes up to 47,2 mm diameter in the side wall of trunking without the need for pre drilling.

Max centre of hole to edge of trunking: 53,5 mm

Length : 251,5 mm
Width: 224 mm
Thickness : 66 mm
Weight: 3,28 kg

* Supplied as standard with the machine

** Supplied as standard with the die

PNB-1

Pneumo-hydraulic, production bench press, controlled by a foot operated pedal, provides a consistent and reliable crimped connection. Extensive range of interchangeable dies available for crimping a wide variety of connectors.

Technical details:

- Nominal operating pressure: 6 bar
- Dimensions LxDxH: 180x320x700 mm
- Weight: 23 kg (without dies)

NOTE: for applications not listed, please contact Cembre.

Tool	Connector Type	Conductor Size sqmm
PNB-3P*	Insulated connectors red, blue and yellow	0,25÷6
PNB-3PD	Insulated terminals and butt connectors - frontal insertion	0,25÷6
PNB-3N1	Uninsulated terminals	0,25÷10
PNB-3N5	Uninsulated terminals	10÷16
PNB-3NN3	Polyamide insulated terminals	1,5÷10
PNB-3NN4	Polyamide insulated terminals	10÷16
PNB-3F/M	Bullet connectors	0,5÷2,5

* Will also crimp Polycarbonate fully-insulated terminals if fitted with PNB3F/M positioner; available as an optional accessory.

PNB-3

Technical details:

- Normal operating pressure: 6÷7 bar
- Dimensions LxDxH: 130x370x195 mm
- Weight: 10,3 kg

Pneumatic bench press operated by foot pedal for crimping terminals and connectors 0,25 to 16 sqmm.

Tool	Connector Type	Conductor Size sqmm
PNB-4KE	End Sleeves type PK. and type KE	0,3÷10

Technical details:

- Nominal operating pressure: 6 bar
- Dimensions LxDxH: 120x160x300mm
- Weight: 6 kg

PNB-4KE

Pneumatic bench press, controlled by a foot operated pedal. Supplied with a multi-aperture die suitable for crimping insulated and uninsulated end sleeves from 0,3 to 10 sqmm. Compact and efficient. Easy to operate, producing a secure and reliable crimped connection.

ELECTRO-PNEUMATIC BENCH PRESS

EPB-1N

*automatic stripping / crimping machine
for insulated end sleeves*

New

Bench press type **EPB-1N**, electro-pneumatically operated, is designed for stripping and crimping insulated end sleeves Cembre type PKC, PKD and PKE.

The basic configuration processes connectors of c.s.a 0,5/0,75/1,0 and 1,5 mm² with a sleeve lengths of 6, 8, 10 and 12 mm.

Adapter kits are available:

KIT 2.5-EPB1N

for insulated end sleeves c.s.a **2,5 mm²** with a sleeve length of 8, 10 and 12 mm

KIT 4-EPB1N

for insulated end sleeves c.s.a **4,0 mm²** with a sleeve length of 10 mm

Stripping and crimping operations are carried out in quick succession. Adjustable loading speed of vibrating charger.

Quick and easy change of configuration for different connector sizes. Automatic adjustment of operating parameters to suit each configuration.

Modular structure and wear-free components guarantee excellent reliability.

Adapter Kit for insulated end sleeves c.s.a **2,5 mm²** (KIT 2.5-EPB1N)

Technical data

Bench Press EPB-1N	
Power Supply:	230 V/50 Hz (110 V/60 Hz)
Current:	0,5 A
Connector c.s.a:	0,5-1,5 mm ² (basic configuration)
Length of crimp:	6, 8, 10 and 12 mm
Geometry of crimp:	Trapezoidal
Cycle time:	2 s
Compressed Air supply:	Min. 4 - Max 6 bar
Air consumption:	1,2 l/cycle
Cycle controller:	Electro-pneumatic, with microprocessor
Counter:	Digital
Dimensions (w x l x d):	240 x 390 x 490 mm
Weight:	29 kg

ELECTRICAL CRIMPING TOOL

Portable

ECT-KE2.5N

Tool	Connector Type	Conductor Size sqmm
ECT-KE2.5N	End Sleeves type PK.. and type KE	0.14÷2.5

Portable electrical crimping tool for end sleeves 0,14 to 2,5 sqmm with 13 mm crimp length.

Crimping occurs automatically when the end sleeve activates an internal pressure switch.

Technical details:

- Supply voltage: 220/230V 50Hz
- Maximum operating temperature: 40 °C
- Crimp length: 13 mm

Crimp style:

PNEUMATIC CRIMPING TOOLS

Hand held - PNB series

PNB-6KE
PNB-7KE

Technical details:

PNB-6KE

Crimping range	0,25 ÷ 2,5 sqmm / 24 ÷ 14 AWG
Weight	400 g
Dimensions	Ø 44 x 200 mm
Spiral hose length	2 m

PNB-7KE

Crimping Range	4 ÷ 10 sqmm / 12 ÷ 8 AWG
Weight	400 g
Dimensions	Ø 44 x 200 mm
Spiral hose length	2 m

PNB-6KE and **PNB-7KE** hand tools facilitate the rapid crimping of insulated end sleeves while avoiding the operator discomfort associated with ordinary manual tools.

Lightweight and easy to use, these tools are ideal for panel building applications and component assembly.

Both tools are designed to be maintenance-free and need no routine calibration. A 4-6 bar air supply is required for connection via the quick coupler fitted to the hose supplied with the tool.

PNEUMATIC CRIMPING TOOLS

Bench mounted tools with foot pedal - PNB series

PNB-6KE-T
PNB-7KE-T

PNB-6KE-T

Crimping range	0,25 ÷ 2,5 sqmm / 24 ÷ 14 AWG
Weight	1000 g
Dimensions	Ø 140 x 200 x 70 mm
Inclusive of spiral hose, foot pedal and bench mount with storage	

Technical details:

PNB-7KE-T

Crimping Range	4 ÷ 10 sqmm / 12 ÷ 8 AWG
Weight	1000 g
Dimensions	Ø 140 x 200 x 70 mm
Inclusive of spiral hose, foot pedal and bench mount with storage	

PNB-6KE-T and **PNB-7KE-T** have bench mounts with storage and are foot pedal operated to allow operators to have both hands free when assembling cable harnesses.

Both tools are designed to be maintenance-free and need no routine calibration. A 4-6 bar air supply is required for connection via the quick coupler fitted to the hose supplied with the tool.

BENCH PRESS

ELB-3

for Polycarbonate insulated chain connectors

Electro-pneumatic, production bench press, controlled by a foot operated pedal. Producing a consistent and reliable crimped connection. Interchangeable application heads available to suit the complete range of polycarbonate insulated connectors.

Technical details:

- Air supply: 6 bar (90 psi)
- Dimensions LxDxH: 180x250x620mm
- Weight: 41 kg (without application heads)
- Motor:
 - Power 0,55 kW / 0,75 HP
 - Supply Voltage 220 V / 50 Hz
 - Speed 2.800 r.p.m

INTERCHANGEABLE APPLICATION HEADS, SIDE ENTRY WITH PNEUMATIC FEED (ORDER AS REQUIRED)

Type.	Connectors	Conductor Size sqmm
RA-3	Polycarbonate insulated chain terminals	red
BA-3		blue
GA-3		yellow
KE 1A-3	Insulated chain end sleeves	0,5÷1
KE 2.5A-3		1÷2,5

OPERATING TEMPERATURE UP TO 115°C

See pages 6-7 and 16 for types and features of the insulated chain connectors and end sleeves.

HYDRAULIC CRIMPING TOOLS AND CUTTERS

HYDRAULIC CRIMPING TOOL

HT 45-E

general features

Crimping force kN	Dimensions mm		Weight kg
	length	width	
50	346	130	2,0

MAIN APPLICATIONS - max section mm²

L.V. lugs and splices	"C" sleeve connectors	H.V. lugs and splices
150	35	70

STORAGE

Type	Dimensions mm	Weight kg	Supplied with the tool	Purchase separately
VAL P1*	445x290xh95	1,2	✳	—

*Suitable for storage of the tool and 20 sets of dies.

Lightweight and compact, this tool is ideal for the compression of connectors on over head lines and other general applications.

Having the benefit of spring loaded handles, the dies can be advanced using only one hand; therefore leaving the other hand free to position the connector.

For ease of operation and comfort of the operator, the tool head can be fully rotated through 180 degrees.

The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and a pressure releasing system can easily be operated at any stage of the compression.

The operator can advance the dies using only one hand, leaving the other hand free to position the connector.

Openable head, ideal for derivations from running conductors

180° rotatable head, to work in the most comfortable position

Safety valve bypassing the oil supply when the maximum pressure is reached

Pressure releasing system, that can be operated at any stage.

HYDRAULIC CRIMPING TOOL

VAL P1*	445x290x95	1,2	✳	—
Canvas bag 007	350x105	0,13	—	✳

* Suitable for storage of the tool and 20 sets of dies.

Hydraulic press-head complete with quick automatic coupler for connection to hydraulic pump with working pressure of 700 bar max. (see page 170-174). RHM50 is suitable for installing the same range of connectors as RH50.

Particularly suitable for high volume bench crimping.

RHM 50

These tools are supplied without dies. For die selection, please refer to chart on pages 178 to 190

HYDRAULIC CRIMPING TOOL

HT 81-U

This lightweight and self contained tool, features a patented closure and release mechanism for the die locking pin.

A wide range of connectors can be crimped with a small number of die sets due to their unique, double groove styling.

Dies for cutting copper, aluminium, aldreyl and aluminium-steel, are also available (see table below).

The tool features a double speed action: a fast advancing speed for rapid approach of the dies to the connector and a slower more powerful speed for crimping.

For ease of operation and comfort of the operator the tool head can be fully rotated through 180 degrees.

The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and a pressure releasing system can easily be operated at any stage of the compression.

general features

Crimping force kN	Dimensions mm		Weight Kg
	length	width

MB2-80U	This die is suitable to cut steel conductors (R ≤ 160 daN/mm ²) having the most common strandings, i.e.: 19 x 1,2 = Ø est. 6,0 mm 7 x 3,0 = Ø est. 9,0 mm 19 x 2,1 = Ø est. 10,5 mm 19 x 2,3 = Ø est. 11,5 mm	
MB3-80U	Suitable to cut aluminium strands of 150 mm ² aluminium-steel conductors, without damage to the steel core	

HYDRAULIC CRIMPING TOOL

general features

HT 120

Crimping force kN	Dimensions mm		Weight kg
	length	width	
120	488	138	5,7

MAIN APPLICATIONS - max section mm²

L.V. lugs and splices	Insulated terminals	"C" sleeve Connectors	H.V. lugs	H.V. Splices
400	240	185	400	400*

* limited to the cable insulation diameter

STORAGE

Type	Dimensions mm	Weight kg	Supplied with the tool	Purchase separately
VAL P3*	620x380x135	2,5	✳	—

* Suitable for storage of the tool and 14 sets of dies.

The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and a pressure release system can easily be operated at any stage of the compression.

This lightweight and self contained tool will accept the semi-circular slotted dies, common to most 130 kN tools.

It is particularly suitable for installing crimp type electrical connectors for overhead line applications.

The tool features a double speed action: a fast advancing speed for rapid approach of the dies to the connector and a slower more powerful speed for crimping.

For ease of operation and comfort of the operator the tool head can be fully rotated through 180 degrees.

HT 120-KV
version also available for
Power Supply Companies

Die release system, protected from accidental operation

HT 120 features a double speed action: a fast advancing speed for rapid approach of the dies to the connector and a slower more powerful speed for crimping.

Pressure release trigger, which can be operated at any stage of the compression.

HYDRAULIC CRIMPING TOOL

HT 131-C

This new model, self contained, robust and sturdy, will accept all semi-circular slotted dies, common to most 130 kN tools. The tool features a double speed action: a fast advancing speed for rapid approach of the dies to the connector and a slower more powerful speed for crimping. For ease of operation and comfort of the operator the tool head can be fully rotated through 180 degrees.

New

Operable from single or double acting hydraulic power source

Lifting eye; screwed into the base of the cylinder; allows easy transportation of the head in aerial operation.

RHU 1000 is a 1.100 kN hydraulic presshead for full tension, transmission and substation connections, complete with quick automatic coupler for connection to hydraulic pumps with a working pressure of 700 bar max, (see pages 170-174).

The standard version must be operated by a single acting pump; possibility to convert from single to double acting by substitution of the breather valve with a female quick coupling. RHU1000 will accept all semi-circular slotted dies common to most

100 ton heads as the Alcoa ones. The die cap is removable for an easy connector positioning; the upper part of the cap automatically rotates during the die changing process to present the correct positioning of the die. Lifting eye included.

Insertion of the upper die:

After substitution of the dies, insert the die cap into the head.

Pull the pin.

The upper part of the cap automatically rotates...

...to the correct position.

INDUSTRIAL APPLICATION
HT-TC051

Hand operated hydraulic tool specifically designed to cut Copper, Aluminium and Telecommunications cable having a max overall diameter of 50 mm. The tool features a double speed action: a fast advancing speed for rapid approach of the blades to the cable and a slower more powerful speed for cutting. The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. The head can be easily opened to allow the cutting of running cables.

The head can rotate through 90 degrees, to enable the operator to work in the most comfortable position. HT-TC051 features an automatic

OVERHEAD LINE APPLICATION
HT-TC041N

Hand operated hydraulic tool specifically designed to cut Copper, Alredy, Aluminium, Aluminium-Steel cables and Steel ropes, Aluminium and Steel rods having a max overall diameter of 45 mm.

New model, even more self contained, robust and sturdy.

The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. The head can rotate through 180 degrees, to enable the operator to work in the most comfortable position, and can easily be opened to allow cutting of running cables.

HT-TC041N features an automatic safety valve to bypass oil when reaching maximum pressure; a pressure release device can also be operated at any stage of operation.

OVERHEAD LINE APPLICATION HT-TC051Y

Hand operated hydraulic tool specifically designed to cut Copper, Aluminum, Aluminum-Steel cables (ACSR) having a max overall diameter of 50 mm.

The HT-TC051Y is provided with a two stage hydraulic system, which advances the blades quickly to the cable. This proven system saves operator time and effort.

The HT-TC051Y is provided with an automatic safety valve to bypass oil when reaching max pressure. This means safety to the operator and protection to the blades.

The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. The shape of the blades provides a "clean" cut.

The head can be opened to allow cutting of running cables and ropes. The head rotates 90 degrees allowing the operator to perform the cut in the most comfortable position.

The tool is supplied complete with canvas bag 010 for protection and storage when not in use.

Not suitable for cutting stay wire, Steel rope or earthing rod.

OVERHEAD LINE APPLICATION TC 050Y

Hydraulic cutting head complete with quick automatic coupler for connection to a hydraulic pump with a working pressure of 700 bar max, (see page 170-174).

TC 050Y features the same cutting capability as HT-TC051Y.

Not suitable for cutting stay wire, Steel rope or earthing rod.

OVERHEAD LINE APPLICATION
HT-TC055

Hand operated hydraulic tool specifically designed to cut Copper, Al, Aluminium, Aluminium-Steel cables and Steel ropes, Aluminium and Steel rods having a max overall diameter of 55 mm.

The HT-TC055 is provided with a two stage hydraulic system, which advances the blades quickly to the cable. This proven system saves operator time and effort. The HT-TC055 is provided with an automatic safety valve to bypass oil when reaching max pressure. This means safety to the operator and protection to the blades. The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. The shape of the blades provides a "clean" cut.

The head can be opened to allow cutting of running cables and ropes. The head rotates 330 degrees allowing the operator to perform the cut in the most comfortable position. The tool is supplied complete with plastic case VAL P7 for protection and storage when not in use.

general features

Frame-type hole punching head RH-FC48N

Table denotes the punch/die set reference, for each hole size. Suitable for punching holes in mild Steel, fibreglass or plastic material, up to 2 mm thick.

VAL P30

Supplied in a robust plastic case.

Hydraulic head complete with automatic quick coupler, designed for punching holes from 15,5 up to 47,2 mm diameter in the side wall of trunking without the need for pre drilling. For operation, the head must be joined to a hydraulic pump developing a pressure of 700 bar (see page 170-174).

*Supplied with the head

Piercing heads RHT

Hydraulic head complete with automatic quick coupler, for piercing holes of various diameters in Copper, Aluminium and Steel bars with max. thickness of 10 mm.

This compact and handy tool is widely used for transformer room connections, control switch boards and power plants.

For operation the head must be joined to a hydraulic pump developing a pressure of 700 bar (see page 170-174).

Available accessories (to be ordered separately):

SPECIAL TOOLS

Puller-type hole punching tool HT-FL75

general features

New

Hand operated hydraulic tool specifically designed for hole punching stainless Steel, mild Steel, fibreglass and plastic sheet materials up to 3,5 mm thickness. Compact, lightweight and easy to handle.

The balanced punching head pivots 180deg through a full 360deg rotation for ease of use in confined spaces.

The tool is supplied complete with plastic case VAL P28 for protection and storage when not in use.

Supplied with Pullers TD-11, TD-19 and spiral bit Ø 11,5 mm.

For the punch-die selection chart see page 168.

Universal joint allows punching head to pivot 180deg over a full 360deg rotation.

PRESSURE TEST DEVICE FOR HYDRAULIC PUMPS AND TOOLS

MPC 1

The MPC1 device, complete with test adapter set, is used to measure the maximum oil pressure on all Cembre tools.

MPC 2

The MPC2 device, complete with test die set, to measure the maximum force developed by Cembre tools:
HT 131-C, HT 131LN-C, HT 120, HT 120-KV, RHC 131, RHC 131-KV, RHC 131LN, B 131-C, B 131-C-KV, B 131LN-C, B 131LN-C-KV, B 135-C, B 135-C-KV, B 135LN-C, B 135LN-C-KV.

MPC 4

The MPC4 device, complete with test die set, to measure the maximum force developed by Cembre tools:
ECW-H3D, RHU240-3D-850, RHU 300-3D

MPC 7

The MPC7 device, complete with test die set, to measure the maximum force developed by Cembre tools:
HT45, HT 51, HT 51-KV, HT 51L, HT 51L-KV, RH 50, HT 61, RH 61, B15D (use adaptor available separately), B 35-45D, B 35-50D, B 46, B 51, B 51-KV, B 51L, B 51L-KV, B 54D, B 55, B 55-KV, B 62.

ACCESSORIES

Flexible hoses

High pressure flexible hoses for joining hydraulic heads to pumps. In addition to the standard versions listed below alternative hose lengths are available, upon request:

TF 300-Q 38 FM
3 m length flexible hose fitted with an automatic female quick coupler and a male quick coupler.

TF 600-Q 38 FM
6 m length flexible hose fitted with an automatic female quick coupler and a 3/8" NPT male threaded bush.

TF 300-Q 38 F
3 m length flexible hose equipped with automatic female quick coupler at one end and male threading at the other end.

Quick couplers

STANDARD VERSIONS

Q 14-MS
Male automatic coupler for hydraulic heads (1/4" NPT).

Q 14-MS

Q 38-F
Female automatic coupler for hydraulic pumps and flexible hoses (3/8" NPT).

Q 38-F

Q 38-MS
Male automatic coupler for flexible hoses (3/8" NPT).

Q 38-MS

INSULATED VERSIONS

I 38-F
Female automatic coupler for insulated hydraulic pumps and flexible hoses (3/8" NPT).

I 38-F

I 38-MS

VALP38	520x432x126	2,6	*	—

The tool is supplied as:

- Basic tool with battery and shoulder strap
- Spare battery
- Battery charger
- USB cable
- Plastic carrying case suitable for storing the tool and 14 die sets

The next generation of Cembre cordless hydraulic tools represents a significantly advantageous evolution from current models.

Born of the renowned B51 type crimping tool, the 63 kN B500E is suitable for a wide range of connectors up to 240 sqmm using die sets common to the Cembre 50 kN tooling range.

New Li-Ion 18 V 4 Ah batteries offer a higher capacity than 14.4 V 3 Ah, while greater crimping speed and crimping force result from a revitalised hydraulic system with double speed action: a rapid approach of the dies to the connector then a slower, more powerful speed for crimping.

A maximum pressure sensor and pressure relief valve assure greater precision and repeatability of the pressure cycle and double the provision for operator safety.

The OLED display provides essential real time tool operating information data including:

- Crimping pressure and force being generated, for confirmation of adherence to norms and best practice
- Battery power availability
- Tool identification, LED work light state, reset, no. of operational and service crimping cycles
- Tool service required to maintain optimum condition.

Designed with improved balance, B500E is easily manageable during the crimping process and, by the use of bi-component plastics, has a shell with high resistance to wear and damage.

Rubber grip inserts, low noise and minimal vibration aid operator comfort while additional convenience and safety are provided by LED lighting of the working area. Crimping cycle data (up to 200,000 events) is automatically stored on a memory card for transfer to PC by USB interface.

Operating temperature:
-15 to +50 ° C

New

Can be operated with one hand. Balanced for greater control. Head rotates 180° for ease of operation in confined spaces. Fitted with a maximum pressure valve. Extremely quiet, minimal vibration. Durable moulded body offering high resistance to wear and damage in all operating conditions. New Li-Ion 18V 2Ah High Power battery. The battery is equipped with LED indicators to show the remaining battery life at any time by pressing the adjacent button. Supplied in a robust plastic case to accommodate the tool and all the accessories.

Two batteries and charger included. Operating temperature: -15 to +50 °C

The tool is supplied as:

- Basic tool with battery and shoulder strap
- Spare battery
- Battery charger
- Cable USB
- Plastic carrying case suitable for storing the tool and accessories

Next generation of 18.0V cordless hydraulic cutting tool specifically designed to cut Copper, aldrej, Aluminium, Aluminium-Steel cables and Steel ropes, Aluminium and Steel rods having a max overall diameter of 25 mm.

The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. New Li-Ion 18 V 4 Ah batteries offer a higher capacity than 14.4 V 3 Ah, while greater cutting speed and cutting force result from a revitalised hydraulic system with double speed action. The battery is equipped with LED indicators to show the remaining battery life at any time by pressing the adjacent button.

The head can rotate through 180 degrees, to enable the operator to work in the most comfortable position, and can easily be opened to allow cutting of running cables.

Fitted with a maximum hydraulic pressure valve.

Designed with improved balance, B-TC250E is easily manageable during the cutting process and, by the use of bi-component plastics, has a shell with high resistance to wear and damage.

Rubber grip inserts, low noise and minimal vibration aid operator comfort while additional convenience and safety are provided by LED lighting of the working area. For cutting capacity data see page 140.

Operating temperature: -15 to +50 ° C

HYDRAULIC PUMPS AND UNITS

HYDRAULIC PUMPS

PO 7000

Foot operated double speed pump, developing a maximum pressure of 700 bar.

The pump is supplied with 3 m long high pressure flexible hose complete with female self-lock quick coupler.

Pressure can be withdrawn at any time during operation by depressing the release lever.

A solid shaped stand gives the pump stability during operation.

Operating pressure bar	Dimensions mm			Weight kg
	length	width	height	
700	680	200	163	9,8

Storage type	Dimensions mm	Weight kg
VAL P21*	820x430xh290	6,74

*Supplied with the pump

CPP-0

The CPP-0 air hydraulic power unit intensifies an air supply of 6-8 bar (87-115 psi) to a power crimping or cutting force of up to 700 bar (10.000 psi) depending upon the input pressure.

The control pedal allows for advancing and pressure release at any stage of the operation.

The unit is provided with a 2 m high pressure flexible hose, including a 3/8" NPT female self-lock quick coupler.

Operating pressure bar	Dimensions mm			Weight kg
	length	width	height	
700	320	150	200	6,8

HYDRAULIC PUMPS

CPE-1

CPE-1-110

Operating pressure bar	Dimensions mm			Weight kg
	length	width	height	
700	372	223	482	21

The pump is supplied with:

- high pressure flexible hose with male and female automatic quick coupler
- remote hand controller
- external supply connection cable

Available as optional accessories:

- Remote foot controller **RCP-B70**.
- Transportation trolley **CS-CPE-1**
- Control handle integrated with 3 m length flex hoses **ERCH-WH**

Electrically driven hydraulic pump, powered by a 230V / 50-60Hz single-phase electric motor.

The remote hand controller allows advancement and pressure release on completion of the crimping operation.

The mechanically actuated emergency button located on the pump body allows the pressure release at any time in case of power shortage.

Also available **CPE-1-110** version for 110-115V / 50-60Hz. Both models are IP 55 rated.

PORTABLE ELECTRO-HYDRAULIC PUMPS B70M-P24 RANGE

BATTERY OPERATED

Easily accessible oil top-up inlet

Remote electrical hand or foot controller connection (not KV version)

Remote pneumatic hand controller connection (KV version only)

24V dc external power supply socket with protective cap

**24V
3.1Ah
Ni-MH**

Powerful 24V Ni-MH rechargeable battery

Battery residual power level display

Manual pressure release button

High pressure hose connects to automatic self-lock quick coupling with protective cap

Variously supplied with different versions:

B70M-P24-KV

B70M-P24-KV

- 1 Portable electro-hydraulic pump, 24V dc battery for independent use. Equipped with high dielectric insulated oil and automatic "insulated" lock quick coupler to allow connection only with insulated hoses.
- 2 **BH2433** Battery 24V dc 3.1Ah.
- 3 **DC24** External battery charger.
- 4 Shoulder strap
- 5 Canvas holdall for carrying accessories.
- 6 **PRCH** Remote pneumatic hand controller

Insulated heads suitable for use with this pump are generally supplied complete with high pressure insulated hoses; if necessary the hose can be purchased separately.

800	-	37,6	-
1000	-	42,2	-

NOTE: The values given for flexible conductors represent both class 5 and class 6 conductors.

^a Solid Copper conductor shaving cross-sectional areas of 25 mm² and above are for particular types of cable, e.g. mineral insulated, and not for general purposes.

MINIMUM AND MAXIMUM DIAMETERS OF STRANDED COMPACTED CIRCULAR COPPER, ALUMINIUM AND ALUMINIUM ALLOY CONDUCTORS

Cross-sectional area [mm ²]	Stranded compacted circular conductors (Class 2)	
	Minimum diameter [mm]	Maximum diameter [mm]
10	3,6	4,0
16	4,6	5,2
25	5,6	6,5
35	6,6	7,5
50	7,7	8,6
70	9,3	10,2
95	11,0	12,0
120	12,3	13,5
150	13,7	15,0
185	15,3	16,8
240	17,6	19,2
300	19,7	21,6
400	22,3	24,6
500	25,3	27,6
630	28,7	32,5

NOTES: - The dimensional limits of Aluminium conductors with cross-sectional areas above 630 mm² are not given as the compaction technology is not generally established.

- The values are given for compacted Copper conductors in the size range 1,5 mm² to 6 mm².

MINIMUM AND MAXIMUM DIAMETERS OF CIRCULAR ALUMINIUM CONDUCTORS

Cross-sectional area [mm ²]	Solid conductors (Class 1)	
	Minimum diameter [mm]	Maximum diameter [mm]

^a Aluminium conductors 10 mm² to 35 mm² circular only

^b Solid Copper conductors having nominal cross-sectional area of 25 mm² and above are for particular types of cable, e.g. mineral insulated, and not for general purposes.

^c For solid Aluminium alloy conductors, having the same nominal cross-sectional area as an Aluminium conductor, the resistance value given in the table should be multiplied by a factor of 1,162 unless otherwise agreed between the manufacturer and the purchaser.

^d For single core cables, four sectoral shaped conductors may be assembled into a single circular conductor. The maximum resistance of the assembled conductor shall be 25% of that of the individual component conductors.

CLASS 2:

STRANDED CONDUCTORS FOR SINGLE-CORE AND MULTI-CORE CABLES

^a Non-preferred sizes. Other non-preferred sizes are recognized for some specialized applications but are not within the scope of this standard.

^b The minimum number of wires for these sizes is not specified. These sizes may be constructed from 4, 5 or 6 equal segments (Milliken).

^c For stranded Aluminium alloy conductors having the same nominal cross-sectional area as an Aluminium conductor the resistance value should be agreed between the manufacturer and the purchaser.

CLASS 5:

- H** Cable conforming to harmonised standards
- A** Recognised national type of cable
- N** Other type of national cable

- 00** Less than 100 / 100 V
- 01** Above 100 / 100 V and less than 300 / 300 V
- 03** 300 / 300 V
- 05** 300 / 500 V
- 07** 450 / 750 V
- 1** 0,6 / 1 kV

- B** Ethylenpropylene rubber for working temperature of 60° C
- N** Polychloroprene
- N2** Polychloroprene for welding cables
- Q** Polyurethane
- R** Rubber
- V** Common-quality PVC
- V2** PVC for working temperatures of 90° C
- V3** PVC for low temperature cables
- V4** Reticulate PVC
- V5** Oil-resistant PVC
- Z** Polyolefin mixture

- C** Concentric Copper core
- C4** Copper braid screen on multiple cores
- C5** Copper braid screen on single cores
- C7** Screen made of Copper straps or ribbons

- Z2** Round Steel strand armour
- Z3** Steel strap armour
- Z4** Steel ribbon armour
- Z5** Steel strand braid

- H** Flat divisible cable with or without sheath
- H2** Flat indivisible cable
- H3** Flat cable with cores separated by a slot
- H6** Flat cable with three or more cores
- H7** Cable with double-layered insulation
- H8** Extendable cord

- D** Flexible core for weldings cables
- E** Very flexible core for welding cables
- F** Flexible core for moving connections
- H** Very flexible core for moving connections
- K** Flexible core for fixed laying
- R** Rigid round cord
- U** Round rigid single strand

**1st CHARACTERISTIC NUMBER:
PROTECTION AGAINST INGRESS OF SOLID MATTER**

PROTECTION	0	1	2	3	4	5	6
Protection against ingress of solid matter caused by		solid bodies measuring over 50 mm	solid bodies measuring over 12,5 mm	solid bodies measuring over 2,5 mm	solid bodies measuring over 1 mm	powder in harmful quantities	Powder (completely protected)
Test method		Accessability gauge ø 50 mm	Accessability gauge ø 12,5 mm	Accessability gauge ø 2,5 mm	Accessability gauge ø 1 mm	talcum powder	talcum powder

**2nd CHARACTERISTIC NUMBER:
PROTECTION AGAINST INGRESS OF LIQUIDS**

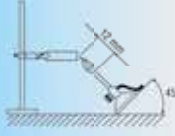

PROTECTION	0	1	2	3	4	5	6	7	8
Protection against ingress of liquids caused by		Drops of water falling vertically	Vertical drops of water with inclination of casing up to 15°	Rain	Sprays of water	Jets of water	Powerful jets of water	Temporary Immersion	Permanent Immersion
Test method		Drops of water falling vertically	Vertical drops of water with inclination of casing up to 15°	Rain	Sprays of water	Jets of water	Powerful jets of water	Temporary Immersion	Permanent Immersion

**1st ADDITIONAL LETTER
RESTRICTED ENTRY TO DANGEROUS PARTS**

RESTRICTED ENTRY	A	B	C	D
Restricted entry to dangerous parts caused by	back of hand	finger	tool	wire
Test method	accessibility gauge ø 50 mm	articulated test finger	accessibility gauge ø 2,5 mm	accessibility gauge ø 1 mm

**2nd ADDITIONAL LETTER
MEANING OF THE SECOND ADDITIONAL LETTER**

SPECIFIC CRITERIA	H	M	S	W
Specific criteria	High voltage equipment	Tested against negative effects of water penetration, when the moveable parts of the equipment (e.g. wheels of a revolving machine) are moving	Tested against the negative effects of water penetration, when the moveable parts of the equipment (e.g. wheels of a revolving machine) are stationary	Suitable for use in environmental conditions as specified and equipped with additional measures of protection

TYPE OF TEST	TEST EQUIPMENT	COMPLIANCE WITH STANDARDS	OBJECTIVE OF TEST	TEST RESULTS	TEST CONDITIONS		
					heat source	length of test	characteristic features
CHARACTERISTIC FEATURES		IEC 695-2-1 CEI 50-11 DIN VDE 0471-2-1	Check that abnormal heating produced by overcurrent and bad contacts does not compromise the safety of the insulating material. Lighting test. The wire is pressed against the sample using force and penetrates up to 7 mm.	Any sign of flame starting must stop within 30 sec. of removing the glowing wire TEST TEMPERATURE <ul style="list-style-type: none"> • 650° for materials which do not support parts under tension • 750° for materials which support parts under tension of moving sockets and plugs • 850° for materials which support parts under tension of fixed sockets and switches 	Glow-wire 4 mm in diameter	Wire applied for 30 seconds	Flame extinction time
NEEDLE FLAME		IEC 695-2-1 CEI 50-11	Simulates the effect small flames have which may occur due to internal faults of products in order to judge the fire risk.	<ul style="list-style-type: none"> • the sample does not catch fire • the flame and incandescent particles do not spread the fire • combustion lasts less than 30 seconds 	Bunsen burner flame	Flame applied for (Ta) 5, 10, 20, 30, 60, 120 sec. According to particular standards	The degree of severity: flame application time (Ta)
UL (UNDERWRITER LABORATORIES)		UL 94	Measuring of time the sample continues to burn after the direct flame has been removed	<ul style="list-style-type: none"> • V0 if the sample burns for less than 5 sec. before going out. • V1 if it burns for less than 25 sec. • V2 if it burns for less than 25 sec. With incandescent drops • HB if it burns for more than 25 sec. (horizontal sample and burning speed less than 38 mm per minute) Comparable to ASTM D-635 	Bunsen burner flame	Flame applied for 10 seconds twice following	Length of combustion
