

Lenovo N22 Chromebook

Rugged, Durable, Designed for Education

Rugged and Durable

- **Drop resistant** – built to withstand bumps and accidental drops from up to 70cm (2.3 feet)
 - **Stronger, thicker** rear cover and a frame around the screen, sides and corners absorb the force of bumps and reduce damage when dropped.
- **Reinforcement** around ports and hinges adds durability that stands up to student wear and tear
- **Anti-peel keys** resist removal by students
- **Water resistant keyboard** channels spills (up to 330ml) away from the electronics to prevent damage.
- **Sealed touchpad** protects the electronics from moisture and spills
- **Non-slip texture** hides wear and scratches and helps the students to better grip the device
- **Fanless design** eliminates the need for bottom vents which helps keep debris away from the electronics

Designed for Education

- **Rotatable camera** gives students flexibility in how they capture images and video.
 - A student can rotate the camera away to record a science experiment or capture video of other students doing a skit or presenting a report.
 - A student can rotate the camera up to closely examine an object.
 - The integrated microphone also rotates with the camera to better capture sound.
- The **anti-glare screen** produces less reflection under florescent lights and near classroom windows, reducing student eyestrain.
- With **up to 10 hours of battery life**, teachers and students can work where they need to without a power cord. The battery is serviceable and can be replaced by school IT.
