

DURATAPE RGBW IP67

Dynamic Color Changing Energy Efficient Low Voltage Strip Light

CONCEPT

A high output dynamic color changing strip with rich RGB saturated colors working along side white spectrum to create soft pastel tones and/or tones of white enriched with RGB color.

MECHANICAL CHARACTERISTICS

Materials	LED strip with fully extruded silicon jacket. Double layered copper substrate for optimum heat dissipation, minimizing voltage drop while increasing run lengths per power feed, standardizing electrical flow over entire length of the strip for maximum product reliability.
Functionality	Ideal for linear dynamic color changing applications such as cove or niche, architectural decorative lighting accents, under-counter/ cabinet, lighting accents, or OEM product designs/chandeliers.
Installation	Field cuttable. Manufacturer pre-assembled to specific project lengths with factory attached end prep assemblies to be mounted or inserted into thermally protective profiles, see available options. Suitable for MRI installations. Driver to be mounted outside of MRI room and to be use with PVC or aluminum profiles only. To be installed with adhesive or MRI safe hardware only, no factory provided mounting hardware to be used.
Protection	Strip jacket rated at IP67.
