HPE-Arista joint networking product portfolio End of Sale (EOS) announcement—FAQ

Scope and timeline

1. What is being announced?

HPE is announcing the End of Sale (EOS) of the HPE-Arista joint networking product portfolio (the product portfolio offered and sold by HPE as HPE-Arista SKUs and listed in the [EOS Announcement](#)). Upon the EOS date, these SKUs will no longer be available for order from Hewlett Packard Enterprise Company, its worldwide subsidiaries, affiliates, authorized resellers, or country distributors.

2. What is the scope of this announcement?

This EOS announcement covers Arista products and Arista-branded support which have been sold by HPE as J-suffix SKUs/product numbers, identified in the EOS announcement. This includes Arista switches, software, accessories, and bundles as well as Arista-branded support offerings. This announcement pertains only to the end of sale of the Arista solution portfolio as currently offered and sold by HPE. This announcement is not an announcement of discontinuance/end-of-support of the solution portfolio as offered, sold and supported by Arista. See separate [Arista for HPE Smart Connect EOS announcement](#) pertaining to the Arista products offered as part of HPE Smart Connect solutions.

3. What is the End of Sale date?

The targeted EOS date is September 30, 2019. All Arista networking products and support will remain orderable until September 30, 2019 or until supplies last.

Support services

4. How will the EOS impact Arista networking solutions deployed prior to EOS?

See sections below specifically pertaining to Arista A-Care and HPE Pointnext Services supported deployments. Generally, HPE and Arista will ensure continuity of support for existing deployments.

Arista A-Care supported solutions

5. How will the EOS impact Arista A-Care-supported deployments?

EOS will not impact the support of these deployments. Arista products purchased from HPE with A-Care support will continue to be supported by Arista in the same manner in which they are currently—per terms and duration of the support contracts purchased by customers for each Arista product.

6. How do I renew my current Arista A-Care support contracts? Whom do I contact?

As your paid support contracts near the end of their term, a representative of Arista or their authorized partners will contact you with information regarding your installed base of switches. Support quotes will be prepared and presented. You can also contact Arista directly at renewals@arista.com to initiate this process.

7. I currently have an Arista solution deployment for which HPE Pointnext Services provide support. I want to transition to Arista A-Care support once my current HPE Pointnext Services support contract period ends. How do I do that?

Customers can work with Arista directly to transition to A-Care support once the existing HPE Pointnext Services contract period ends. Please contact Arista directly to renewals@arista.com to initiate this process.

8. I currently have an Arista solution deployment for which there is a mixture of HPE Pointnext Services and Arista A-Care support. I want to transition to an all Arista A-Care support environment once my current HPE support contract period ends. How do I do that?

Customers can work with Arista directly to transition to A-Care support for the portion of their deployment currently supported by HPE. Please contact your HPE or Arista representative to initiate this process.

Frequently asked questions

For HPE and Channel Partner internal use only.

HPE Pointnext Services supported solutions

9. How will this EOS impact HPE Pointnext Services-supported deployments?

HPE Pointnext Services will not be affected by this EOS. Existing deployments will continue to be supported as they are currently.

10. Will I be able to renew/extend HPE Pointnext Services support on my Arista deployment after the EOS date?

Yes. After the EOS date, HPE Pointnext Services will continue to be available and can be purchased directly from HPE or through an authorized HPE reseller.

11. I currently have an Arista solution deployment for which there is a mixture of HPE Pointnext Services and Arista A-Care support. I want to transition to an all-HPE Pointnext Services support environment once my current HPE support contract period ends. How do I do that?

Customers can work with HPE Pointnext Services to transition to HPE Pointnext Services support for the portion of their deployment currently support by Arista once the existing A-care contract period ends. Please contact HPE Pointnext Services to initiate this process.

More information on HPE Pointnext Services can be found at hpe.com/pointnext.

Arista product certification and integration in HPE Solutions

After EOS, the HPE-Arista SKUs listed in the [EOS announcement](#) will no longer be orderable as part of integrated HPE solutions.

12. How will this EOS impact my HPE Azure Stack solution deployed with Arista networking products?

Existing Azure Stack solution deployments from HPE including Arista products will continue to be supported. Only the Azure Stack solution with HPE FlexFabric (and Aruba switching in the near future) will be supported with a factory integration option. The highest configurable solution for HPE customers will continue to be provided.

13. How will this EOS impact my HPE SAP HANA® solution deployed with Arista networking products?

Existing SAP HANA solution deployments from HPE including Arista products will continue to be supported. HPE SAP HANA solutions integrated with Arista will no longer be available with Arista networking products replaced by alternative networking options.

14. How will this EOS impact my HPE Smart Connect solution deployed with Arista networking products?

Arista networking solutions are currently available as dedicated HPE products for HPE Smart Connect solutions. These products will also no longer be available after October 31, 2019. Existing Smart Connect solution deployments including Arista products will continue to be supported. Please see the [Arista for HPE Smart Connect EOS announcement](#) for more information.

15. How will this EOS impact other HPE integrated solutions?

Arista portfolio will continue to be listed as a certified networking option for integrated HPE Hybrid Cloud Solutions in which it is currently certified. This certification is subject to change and may be impacted by subsequent solution integration announcements.
