

End of Sale Announcement

HP/3COM Legacy Access Points and Workgroup Bridge

Announcement Date: September 19, 2011

End of Sale Date: November 1, 2011 or while supplies last

The HP/3Com Legacy Access Points and Workgroup Bridge End of Sale (ES)

The below HP access points and workgroup bridge are going End of Life. These products are standalone/autonomous mode APs and do not require a wireless controller to manage them. Going forward, customers will need to buy the E-series equivalent autonomous mode APs as outlined in the table below.

NOTE: For customers running these APs in WDS mode (bridging mode), you will need to replace both ends, as WDS mode does not have interoperability between different APs.
