- Ink Configuration: Cyan, Magenta, Yellow, Photo Black, Matte Black

₱ 297,695.00

Produce prints that are durable enough to withstand elemental challenges with Epson's all-pigment UltraChrome XD ink, which has a higher ink penetration on paper, providing you with tested high lightfastness, rub and water-resistant prints, ensuring that your prints can go anywhere you need them to.

It uses a refillable ink solution (140ml bottles) rather than cartridges, for convenience and low running costs. These innovative ink bottles can also be used to replenish the ink while printing, which significantly reduces downtime. It also features a low-cost inkset: K (pigment) and CMY (dye) while retaining the high levels of speed and print quality.
