Venting Notes:

- Above table applies from sea level to 2,000 ft. For higher elevations, decrease vent pipe lengths by 8% per 1,000 ft of additional altitude.
- · Subtract 3.5 ft for each additional 3"-90° elbow.
- \cdot Subtract 2.5 ft for each additional 2"-90° elbow.
- \cdot Two, 45° elbows are equivalent to one, 90° elbow.
- One, short-radius elbow is equivalent to two, long-radius elbows.
- Do not include termination elbows in vent length calculation.
- Only listed pipe materials are approved for use with MG2R furnaces.

²⁾ Orifice will vary with altitude; consult the unit installation instructions for correct orifice selection for your application and altitude.

³⁾ These items are available as drop-ship only (not stocked), where a non-cancellable order minimum and longer lead-time may apply.
