## Hacksaw

- 30705**
- Steel frame can be adjustable to fits 8", 10" or 12" saw blade
  - ABS + TPR handle (Thermoplastic elastomers)
- Packing: 1pc/color sleeve, 6pcs/inner, 24pcs/ctn/2.30'

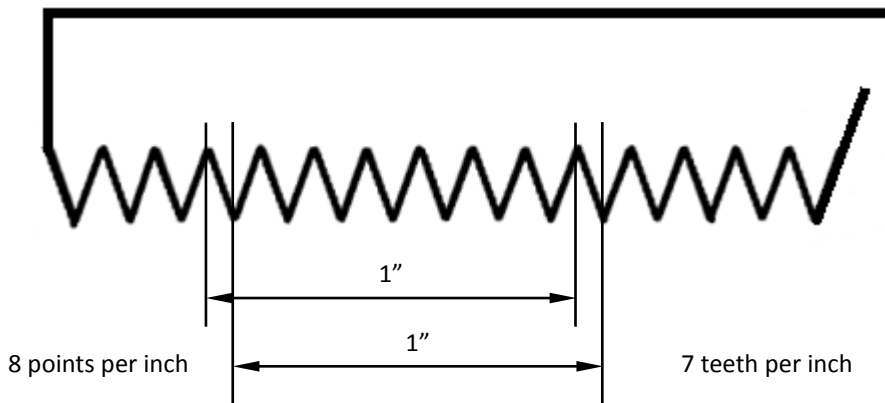

## Saw Introduction

- Feature a comfortable anti-slip tip. Note some are also angle handles which can be used as a quick means of finding 45° or 90° angles.

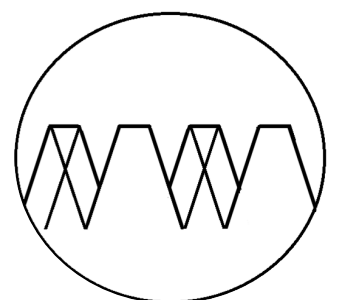

- Teeth/Points per inch:  
The more teeth/points per inch the finer and cleaner the cut. Hand saws average 7 teeth (8 points) to the inch while carpentry saws have up to 13 teeth (14 point) per inch. Super cut teeth give a finer, yet faster, cut compared to the equivalent saw manufactured in the conventional way.
