Made for iPhone | iPad | iPod

i-Memory Flash Drive AI920

The AI920 Flash drive features Lightning and USB 3.1, delivering high speed performance for all content types, support for Live Photos, diverse multimedia, and subtitles – a great plus for movie and TV fans. AI920 is equipped with a snapshot function allowing photos and videos to be saved directly to the flash drive. And offering instant storage and simple sharing, made strong with water and dust resistant and extra-convenient thanks to extended-clearance connectors and even one-touch backup. In addition, the AI920 protects all stored content with strong encryption against unauthorized access.

Full-on rapid data transfer

At just 6.9mm thin and 3.6g light, the AI920 is slimmer than pretty much any smartphone on the market right now.

All-new slim and light design

Five times faster than USB 2.0, AI920 packs read performance up to 150MB/s, and with lightning connector it delivers speeds up to 30MB/s in a super-compact form factor and transfers data between devices.

USB 3.1

5X Faster

USB 2.0

Recording and directly saving

The AI920 supports all the file formats and standards that power contemporary smartphone photography. This includes support for Live Photos on iOS, burst mode, and action shots. The AI920 allows you to save precious moments, but doesn't get in the way

Dust and water resistant

Sturdy chip on board (COB) construction and demanding ADATA tests ensure the AI920 is highly dust and water resistant. From sandy beaches to refreshing waterfalls, your memories and content are in good hands with a well-protected and insulated design that keep water and particles out.

Features

● 6.9mm ultra-thin and compact Flash drive
