iPod iPhone iPad

i-Memory Flash Drive AI920

The AI920 features Lightning and USB 3.1, delivering high speed performance for all content types, with support for Live Photos, diverse multimedia, and subtitles – a great plus for movie and TV fans. AI920 is equipped with a snapshot function allowing photos and videos to be saved directly to the flash drive. The AI920 offers instant storage and simple sharing, made strong with water and dust resistant and extra-convenient thanks to extended-clearance connectors and even one-touch backup. In addition, the AI920 protects all stored content with strong encryption against unauthorized access.

Full-on rapid data transfer

At just 6.9mm thin and 3.6g light, the AI920 is slimmer than pretty much any smartphone on the market right now. it's a sleek extension of devices that never gets in the way of enjoyment or productivity and always adds much-needed storage.

New in Jet Black

We've added the Jet Black version to showcase the ever-relevant need for great connectivity, achieving a striking glossy look through advanced finishing that also resists routine scuffing, scratching, and that occur in daily life.

All-new slim and light design

Five times faster than USB 2.0, AI920 packs read performance up to 150MB/s, and with lightning connector it delivers speeds up to 30MB/s in a super-compact form factor. It is also able to work with individual files larger than 4GB each.

Recording and directly saving

AI920 is also equipped with a snapshot function allowing photos and videos to be saved directly to the flash drive, and its supports up to 4K video recording.
