

## Boutique metallic luxury in ultra-thin design

External Hard Drive HC660

### HC660 External Hard Drive

Just 9.6mm thick, the HC660 is at the apex of light and stylish external hard drives, available in 1TB and 2TB versions. Easily store your media and files, including the highest fidelity content, without worrying about running out of space. We created the HC660 to look great and be durable, so it uses a scratch and damage-resistant sandblasted metallic surface. It is electroplated to ensure it maintains its looks for a long product lifespan: surface paint won't chip off or dull, and the grooved texture will remind you of the HC660's fusion of fashion and utility for years to come.

#### Ultra-slim through smart engineering

Thanks to meticulous craft and balancing, the HC660 is nearly the same height (or thickness) as a standalone 2.5" internal drive. Its durable and stylish enclosure provides great looks and protection without adding bulk or weight.

#### Lots more capacity in a slim form

Think of your games, videos, photos, documents, work projects, and pretty much any other content squeezing into a slim form factor. That's great space that slips into a pocket with ease. Choose 1TB or 2TB – both are plug n play and unlock extra space right away.

Ultra-Slim  
9.6mm design

## Gorgeous textured surface

We've employed sandblasted and electroplated metal in the HC660 enclosure to deliver strong resistance against scratches, paint chips, fingerprints, and smudges. The coming together of science, engineering, and fashion make this possible, proving that delicate beauty and tough performance can go together, and that an essential storage device can be elevated to a style statement.
