

AIRSTREAM®

Dual-Axle Travel Trailers 2023 Floor Plan Comparison

More space, more features, and more travel possibilities. Airstream's dual-axle travel trailer lineup offers larger floorplans that incorporate more comforts of home, more living space for family and friends, and more options to make it your own. Built with more than 90 years of expert design and hand-made craftsmanship, our dual-axle model lines are ready to make big travel dreams come true.

23-Foot Models: Key Points

- Two 23-foot floor plans are nearly identical, except for respective model line decor choices. The FB layout puts a queen or twin beds up front, a convertible dinette over the axles, and a wide three-piece bathroom in the rear.
- Our smallest dual-axle trailers, the 23FB floor plans prioritize compact efficiency with all the comforts of home. Front panoramic windows and wide windows over the dinette fill the interior with light, while the all-in-one bathroom setup is a favorite among owners.

Flying Cloud 23FB
Weight: 5,000 lbs.
Exterior Length: 23 ft. 9 in.

International 23FB
Weight: 5,000 lbs.
Exterior Length: 23 ft. 9 in.

25-Foot Models: Key Points

- A diverse collection of travel trailers, the 25-foot lineup offers something for every travel style. Note queen bed position in the RB and FB models, and the way twin beds in the FB models open up the space from rear to front. All 25-foot models feature mid-ship bathroom/shower combos split across the aisle.
- Note panoramic windows at front and rear, letting in ample light and expanding the feel inside. Decor choices, fixtures, and materials are the major differentiators in the versatile 25-foot lineup, which includes the optional rear hatch feature in the Flying Cloud and International line.

Flying Cloud 25RB
Weight: 5,700 lbs.
Exterior Length: 25 ft. 11 in.

Flying Cloud 25FB
Weight: 5,600 lbs.
Exterior Length: 25 ft. 11 in.

International 25RB
Weight: 5,700 lbs.
Exterior Length: 25 ft. 11 in.

International 25FB
Weight: 5,600 lbs.
Exterior Length: 25 ft. 11 in.

Globetrotter 25FB
Weight: 6,100 lbs.
Exterior Length: 25 ft. 11 in.

27-Foot Models: Key Points

- Our most popular traditional travel trailer floor plan, the 27FB offers the perfect blend of space, style, and features. All three are identical except for decor, fixtures, and materials, with a family-friendly option in Flying Cloud and elevated, design-centric decors in International and Globetrotter.
- The optional rear hatch for Flying Cloud and International (25FB and 27FB models) is a popular, versatile feature that lets you open up the dinette area for al fresco dining (or load bikes, kayaks, and other gear). Note how the twin bed setup opens a straight line from rear to front, while creating a separate area that can also be used for relaxing and socializing.

Flying Cloud 27FB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

International 27FB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

Globetrotter 27FB
Weight: 6,300 lbs.
Exterior Length: 28 ft.

28-Foot Models: Key Points

- Though separated by a difference of only one foot of length, the 28RB models offer a significantly different feel over their 27-foot siblings. Main entry doors at the front of the trailer open into spacious living areas with L-shaped lounges that double as sleeping space when the day is done. At the rear are queen or twin beds nestled under panoramic windows that offer exceptional morning views.
- Convertible dinettes across the galley double as extra sleeping space, while the bathroom/shower combo is split across the aisle. The floor plan offers panoramic windows at front and rear, and wide windows mid-ship that expand the space by filling it with natural daylight.

Flying Cloud 28RB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

International 28RB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

Edition 28RB**
Weight: 6,600 lbs.
Exterior Length: 28 ft.

30-Foot Models: Key Points

- Six of our most stunning and versatile models, Airstream's 30-foot lineup offers several unique features not found elsewhere. Three 30-foot Flying Clouds offer a little bit of everything, with a spacious 30RB, a bunk model that sleeps up to 8, and an office model with dedicated work-from-anywhere space.
- 30-foot International, Globetrotter, and Classic models feature rear beds with elevated decors and expanded features. The Globetrotter 30RB offers a unique lounge and table system, while the 30-foot Classic is connected, comfortable, and feature-filled.

Flying Cloud 30RB
Weight: 6,517 lbs.
Exterior Length: 30 ft. 11 in.

**Flying Cloud
30FB Bunk**
Weight: 6,672 lbs.
Exterior Length: 30 ft. 10 in.

International 30RB
Weight: 6,517 lbs.
Exterior Length: 30 ft. 11 in.

Globetrotter 30RB
Weight: 6,990 lbs.
Exterior Length: 30 ft. 11 in.

Classic 30RB
Weight: 7,900 lbs.
Exterior Length: 31 ft. 5 in.

2023 Dual-Axle Travel Trailers

33-Foot Models: Key Points

- Our flagship model, the Classic 33FB comes standard with many upgrades that are offered as optional features in other model lines, including a connected kit, stainless steel exterior components, standard solar package, and powered awning and stabilizer jacks.
- Inside, you'll find stunning design with Shaker-style cabinets, a projection movie theater with two reclining lounge chairs, and a jaw-dropping residential bathroom that spans the entire rear of the trailer.
