## RG-24 Hydraulic O-Ring Assortment

The Weatherhead RG-24 assortment is your solution to storing a useful inventory of hydraulic o-rings. This kit contains o-rings for Weatherhead straight thread and FOR-SEAL® tube fitting applications as well as popular split flange hydraulic applications. The RG-24 comes enclosed in a handy

steel case with a carrying handle. Consider an RG-24 for an over-the-counter sales merchandiser or keep one in your equipment shop or maintenance trailer to prepare for those critical “got-to-have-it” applications.

Twenty-four individual compartments keep your

hydraulic o-ring inventory separated by part number, and labeled illustrations on the inside of the assortment prevent the mix-up of o-rings. Compact, organized, and reasonably priced, if you specialize in hydraulic applications that call for o-rings — we’ve got your number — RG-24.

### A2103 Mylar Hose Labels

Eaton now offers Mylar labels for marking hose assemblies. They are self-adhesive Mylar strips, 1" wide by 3-3/4" long, with a 1" x 1" white area on one end for printed information. They are supplied on a roll of 2000 labels with each perforated page containing eight labels. The format is suitable for use in typewriters and tractor-feed or friction-drive printers.

Whether for compliance with federal hose assembly labeling requirements, or for simply meeting customer demands for labeling hose assemblies, we strongly recommend labeling become part of your hose assembly "manufacturing" procedure. The National Highway Traffic Safety Administration places responsibility for labeling an air brake hose assembly in the hands of the "manufacturer" of the hose assembly. (Not the manufacturer of the hose or hose ends.) For a summary

of air brake hose assembly labeling recommendations, see "Air Brake Hose Assembly Guidelines." For specific air brake hose assembly regulations, consult "Federal Motor Vehicle Safety Standard (FMVSS) 571.106," available from NHTSA, at the address listed below. For use other than air brake applications, customers may want additional information on the labels. Generally, the labels will accept 9-10 characters per row, on 4 or 5 rows. The information can be handwritten, typed, or printed on the labels. The main concern is resistance to the elements. Procedure for applying the labels is simple:

1. Print the appropriate information on the label.
2. Wrap the tag around the hose assembly; printed end first.
3. Cover the printed end with the clear mylar tail of the label.
4. The clear tail will protect the printed area from the elements.
