

Overview

HPE MSA P2000 G3 Modular Smart Array Systems

HPE's MSA P2000 Family of storage arrays features P2000 G3 arrays with the latest 8 GB Fibre Channel, 6 GB SAS, 10GbE iSCSI connected models, and an iSCSI model with four 1 GB iSCSI ports per controller. The arrays are designed for entry-level customers and feature the latest in functionality and host-connect technology while offering excellent price/performance. They are ideal for companies with small budgets or limited IT expertise, and also larger companies with departmental or remote requirements. Each solution is designed to be easy to deploy, to be secure, along with low management costs, while driving rapid return on investment through efficient storage consolidation.

The MSA P2000 G3 arrays are 2U storage area network (SAN) or direct connect solutions (OS and protocol dependent) offering a choice of five controllers - two FC, one SAS, one 10GbE iSCSI and the newest model features a four port 1 GB iSCSI. The first Fibre Channel controller is a high-performance, 8 GB dual port model. The second offering is a unique dual-purpose Combo controller with two 8 GB Fibre Channel ports with the addition of two 1GbE iSCSI ports. The third controller choice is 6Gb SAS with four ports per controller. There is also the addition of a two port 10 GB iSCSI, while the latest controller introduction features four 1 GB iSCSI ports per controller. Whatever the situation calls for, the P2000 G3 line-up has the right solution.

The dual-protocol MSA P2000 G3 MSA FC/iSCSI Combo Controller gives exceptional flexibility. The 8 GB FC ports support a full FC SAN while the two 1GbE iSCSI ports can serve two purposes. With this combination you can economically share the array storage resource with a smaller department accessing it over iSCSI or enable the new optional Remote Snap functionality over iSCSI protocol (also available over FC).

The MSA P2000 G3 SAS is the follow-on product to the MSA2000sa G2, adding the latest 6 GB SAS technology to the four host ports per controller. The P2000 G3 SAS array is designed for directly attaching up to four dual-path or eight single path rack servers. SAS array support for BladeSystems utilizes the HPE 6 GB SAS BL Switch.

The MSA P2000 G3 10GbE iSCSI brings the very latest in high-performance host connection with technology generally found only in higher priced arrays. The bandwidth it provides in conjunction with server consolidation is highly advantageous in shared storage configurations. Array connection to 10GbE switches that are in turn connected to 1GbE NICs is commonplace. Directly attached server support requires the server units to have 10GbE NICs.

Rounding out the controller choices is the MSA P2000 G3 iSCSI controller featuring four 1Gb iSCSI Ethernet ports, double the number of the G2 model. This allows an array that keeps the price of the components, particularly the interconnection, low while markedly increasing the performance capabilities.

All MSA P2000 G3 models can be equipped with single or dual controllers, feature the same scalability, and offer 6 GB SAS back-end transmission speed to drives and JBODs. Significant data protection advances are delivered by the all P2000 G3 arrays. All G3 units come STANDARD with sixty-four snapshot capability at no extra cost and there is an option for the G3 series of five hundred and twelve snapshots. Volume Copy (clone) also comes standard. In a further move to protect the user's data, optional Remote Snap (replication) capability is offered on the FC, FC/iSCSI, and both iSCSI versions.

All MSA P2000 G3 models support hot plug replacement of redundant controllers, fans, power supplies, and I/O modules. Hot add of expansion enclosures is also supported.

The controller-less MSA P2000 chassis is offered in two models - one comes standard with twelve Large Form Factor (LFF) 3.5-inch drive bays, the other can accommodate twenty-four Small Form Factor (SFF) 2.5-inch drives. Both are able to simultaneously

Overview

support enterprise-class SAS drives, SAS Midline, and archival-class SATA Midline drives. Either chassis can have one or two matching P2000 G3 controllers (same protocol) and are available with AC or DC power Supplies.

The Hewlett Packard Enterprise modular approach to entry level SAN solutions enables incremental customer purchases, allowing the array to grow as needs grow, thus allowing a maximum return on investment. Choose a single controller unit for low initial cost with the ability to upgrade later; or decide on a model with dual controllers for the most demanding entry-level situations. There are no unexpected additional charges, licenses or fees as you add enclosures or hosts and users.

Capacity can easily be added as the need develops by attaching additional drive enclosures. Maximum capacity ranges with LFF drives up to 57.6 TB SAS, 57.6 TB SAS Midline or 192 TB SATA Midline with the addition of the maximum number of drive enclosures. Configurations utilizing the SFF drive chassis and the maximum number of drive enclosures can grow to 178 TB of SAS, 149 TB of SAS Midline or 74.5 TB SATA Midline with a total of 96 LFF or 149 SFF drives. The P2000 G3 Arrays do not support SSDs.

What's New in the P2000 G3 array family

- Introducing support for 12G SFF Hard Disk Drives.
 - HPE MSA 300GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive
 - HPE MSA 600GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive
 - HPE MSA 900GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive
 - HPE MSA 1.2TB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive

Features

Key Features

The HPE P2000 G3 Modular Smart Array family encompasses five controllers, each featuring different protocols or combination of protocols to match the exact needs of the user.

- P2000 G3 FC/iSCSI Combo MSA controller: this unique controller offers both 8 GB Fibre Channel and 1 GbE iSCSI functionalities built into a single array controller. This allows customers to enable storage needing high performance thru the FC ports while leveraging their SAN investment by sharing the array resources with smaller departments through low-cost iSCSI. It also enables optional Remote Snap (replication) for data protection.
- P2000 G3 FC MSA controller: Dual 8 GB Fibre Channel host ports per controller give high performance with a mature topology and is compatible with the largest installed base of SAN users.
- P2000 G3 10GbE iSCSI MSA controller: Hewlett Packard Enterprise was the first of the major modular array manufacturers that brought a high performance dual-ported 10GbE iSCSI solution to the entry level segment. Ideal for those who want to utilize cost-effective Ethernet as their infrastructure without sacrificing access time to their data. Now supports Remote Snap (replication).
- P2000 G3 SAS MSA controller: the P2000 G3 SAS model gives fast 6 GB transmission rates with low cost SAS connections. Four host ports per controller support a highly efficient direct connect configuration.
- P2000 G3 iSCSI MSA controller offers four 1 GB iSCSI ports utilizes the popular Ethernet infrastructure with its low cost and ease of management, while the additional ports assure increased performance over the previous generation. Now supports Remote Snap (replication).

All P2000 G3 models offer a common set of valuable features:

- Ease of management featuring browser-based out-of-band access. This allows a department or small company to effectively handle growing storage requirements, with the aid of an intuitive GUI to administer the unit with a minimum of complexity. Ideal for local or remote installations.
- All G3 models come standard with 64 controller-based snapshots and clone capability. The G3 arrays also support an optional 512 snaps.
- Choose either a low-cost single controller array or start with a configured dual controller array model to fit the budget, high availability, and performance needs.
- All models feature a wide variety of drives: enterprise-class SAS, SAS Midline, and archival-class SATA Midline in either P2000 LFF 3.5-inch or HPE Storage SFF 2.5-inch drives.
- P2000 G3 models can have a maximum number of P2000 LFF drive enclosures (7), a maximum number of D2700 SFF enclosures (5), or mix both sizes. The array can grow incrementally from a few drives to 178 TB SAS, 576 TB of SAS MDL or 192 TB SATA MDL.
- 2 GB transportable read/write cache per controller. Battery-free cache backup with super capacitors and compact flash
- Vdisks can be spanned across multiple enclosures
RAID levels 0, 1, 3, 5, 6, 10, 50
- Maximums vary by RAID levels: 2 drive max for RAID level 1; max of 16 drives for RAID levels 0, 3, 5, 6, and 10; max of 32 drives for RAID level 50
- 512 LUNs with LUN sizes greater than 40TB depending on the RAID configuration chosen. The maximum LUN size is 64TB
- Non-disruptive on-line controller code upgrade (requires dual controllers w/ multi-pathing software)
- Upgradable by design. Owners of an original MSA2000 G1 or G2 array are able to do data-in-place controller upgrades to the P2000 G3 FC, Combo FC/iSCSI, 1 GB or 10GbE iSCSI, or P2000 G3 SAS. Cross protocol upgrades are also supported between the protocols. This unique ability protects the earlier investments in chassis, drives, and JBODs

HPE P2000 G3 FC MSA SAN Starter Kits

The new P2000 G3 FC MSA SAN Starter kits are offered to simplify ordering and implementation of your SAN. Hewlett Packard Enterprise includes all the necessary hardware components to build your own SAN solution in one package, just add the drives of your choice. These kits are offered at very affordable prices which reflect a savings over purchasing each SAN component separately.

Virtualization SAN Starter Kit

HP P2000 G3 FC MSA Dual Controller Virtualization SAN Starter Kit

AP848B

The HPE P2000 G3 FC MSA Dual Controller Virtualization SAN Starter Kit addresses the growing need for server and storage administrators to deliver end-to-end storage, virtualization, and management capabilities across their network infrastructure. The hardware bundle consists of six Host Bus Adapters (HBAs), two FC switches, a P2000 G3 FC MSA Dual Controller Array (SFF Chassis), sixteen 8Gb FC SFPs, ten HPE 5M FC cables as well as two licenses per switch enabling Server Application Optimization (SAO) and Adaptive Networking (AN). SAO is an adapter technology that offers Quality of Service (QoS) capabilities that can be used in conjunction with fabric wide QoS and to enable a high performing, virtualized infrastructure. With SAO deployed, administrators can protect a VM and its application by assigning its IO flow to a specific priority level. The QoS priorities are enforced at the hardware level, thereby providing adequate bandwidth during periods of high congestion. Applications such as email and databases achieve better performance when deployed in specific SAO and MSA configurations.

Small Business SAN Starter Kit

HP P2000 G3 FC MSA Dual Controller Small Business SAN Starter Kit

AP847B

The HPE P2000 G3 FC MSA Dual Controller Small Business SAN Starter Kit is a unique end-to-end 8 Gbps SAN Solution, just add disks and power. This kit includes one 8 Gbps P2000 G3 FC MSA Dual Controller Array (LFF Chassis), four 8 Gbps FC HBAs, two HPE SN6000 Stackable 8 Gbps 8-port FC switches, twelve 8Gb FC SFPs, eight HPE 5M FC cables and HPE unique Simple SAN Connection Manager (SSCM) SAN management software, cables, rails and optics. SSCM is the only SAN management software that can manage the FC switch, HBA and provision HPE storage from a single pane of glass.

Application Solutions

The HPE P2000 SAN is the ideal solution for customers running Oracle, Microsoft, SAP environments and those customers who are deploying virtual server technologies like VMware, Hyper-V, and Oracle Virtual Machine. The HPE P2000 SAN delivers enterprise functionality that enhances virtual environments, simplifies management, and reduces costs. Easy to deploy, scale and maintain, HPE P2000 SANs ensure that crucial business data remains available.

Hewlett Packard Enterprise has developed best-in-class expertise in Oracle, Microsoft, SAP, and Virtualization Hypervisor technology through extensive testing with the HPE P2000 SAN, HPE servers, and management software; high availability and disaster recovery solutions; and backup and recovery on the Oracle, Microsoft, and SAP application platforms. As a result, our customers can expect a wide range of operational and business benefits where they can:

- Deploy IT assets across multiple locations.
- Incrementally grow storage without interruption.

Features

- Enable high availability and disaster recovery capabilities for critical applications.
- Deploy a remote disaster recovery site.

|---|--|
| controller | point-to-point or FCAL (loop). The default is FCAL which is used in Direct Connect, particularly with two controllers. The PtP (fabric) mode is used with almost all switches. |
| Combo controller with FC and iSCSI ports | This ingenious dual-protocol "combo" controller supports a full FC SAN through the 8Gb FC ports, while designating the two 1 GbE iSCSI ports to enable remote replication over iSCSI protocol and perform as an iSCSI target. This allows economical sharing of the storage resource (the P2000 G3 array) with one department needing the performance afforded by the 8 GB FC ports while simultaneously supporting another department with lesser performance needs and a budget only allowing a 1GbE iSCSI network. |
| 6Gb SAS controller | Four 4x host ports per 6Gb SAS controller. |
| 10GbE iSCSI controller | Two 10GbE ports per G3 10GbE iSCSI controller. Ports are ready for the choice of SFP (none included) Supports the ProCurve and ISS versions of the following 10GbE parts for use in the controllers: HPE 10Gb Cables <ul style="list-style-type: none"> • HPE SFP+ 10GbE Copper Cable • HPE ProCurve 10-GbE SFP+-SFP+ Direct Attach Cable HPE SFP+ Transceivers <ul style="list-style-type: none"> • HPE BladeSystem 10Gb SR SFP+ and HPE BladeSystem 10Gb LRM SFP+ • HPE ProCurve 10-GbE SFP+ SR Transceiver and HPE ProCurve 10-GbE SFP+ LRM Transceiver • No SFP+ LR Transceiver support |
| 1 GB iSCSI controller | Four 1 GB Ethernet iSCSI ports per G3 iSCSI controller |
| Modular Chassis | 2U rack height. 12 Large Form Factor or 24 Small Form Factor drive bays, accommodating SAS and SATA. Comes with space for one or two controllers, or P2000 3.5-inch disk Enclosure I/O modules (LFF chassis only) |
| Drives available | The P2000 G3 controllers support both the P2000 3.5-inch Large Form Factor (LFF) drives, and the HPE Storage 2.5-inch Small Form Factor (SFF) drives. <ul style="list-style-type: none"> • Serial Attached SCSI (SAS) enterprise-class drives are designed for high demand, 24x7 usage. • SAS Midline and SATA Midline are usually reserved for archival of data as they are both relatively inexpensive and are available in very large capacities. |

The Hewlett Packard Enterprise entry-level family of arrays can accommodate both SAS and SATA drives within the same enclosure making it ideal to have both business-critical, high activity files on SAS drives while using Snapshot, clone, or Remote Snap capability to keep back-up or archival data on the less expensive drives.

For investment protection, the controllers will support single and dual port SAS & SATA drives in a legacy single - or dual - domain MSA70. This support allows current owners of MSA70s to migrate their single port drives (in their MSA70 only, not into the array head) to be attached to a P2000 G3 FC or SAS. They can only cascade to another single I/O MSA70. This is not a data-in-place transition, and overall performance could be impacted.

SAS drive performance can be approximately 30% greater than SATA performance on sequential host I/O. SAS performance excels in sequential lower latency response time and random I/O per second transaction performance due to higher rpm disk speeds yielding lower seek times. SAS drive random performance is generally twice that of SATA drives.

Family Information

NOTE: P2000 and MSA2 3.5-inch Large Form Factor (LFF) drives are for use only in the P2000 G3 or MSA2000 models. The 2.5-inch Small Form Factor (SFF) drives are supported only with the P2000 G3 or the MSA2300 G2 controllers and are Storage hot-plug 2.5-inch drives.

Optional Disk enclosures Just as the user has a choice of chassis for the array head (LFF and SFF drive bays, AC or DC powered), so also do they have a choice of expansion disk enclosures accommodating either drive size. Both the P2000 and the D2700 disk enclosures can be hot-added to an operating array.

(NOTE: these are not supported as part of a NEBS-certified configuration with the MSA Carrier Grade Chassis. There is a certified JBOD listed in the Carrier-grade section)

P2000 3.5 - inch drive enclosure. This 2U storage enclosure (AP843B) is designed to support twelve Storage 3.5 - inch Universal form factor (LFF) 6Gb SAS or SATA hard drives. It ships standard with dual I/O modules installed.

- This 3.5-inch drive enclosure can be attached to either the P2000 G3 FC or SAS LFF or SFF array head.
- Each configured model ships standard with two .5m mini-SAS to mini-SAS cables for cascading to other P2000 drive enclosures
- Up to seven P2000 3.5-inch enclosures can be attached to a P2000 G3 FC, FC/iSCSI Combo, or SAS controller in the array head.

D2700 2.5-inch drive enclosure. This 2U storage enclosure (AJ941A) is designed to support twenty five ProLiant 2.5-inch Universal form factor (SFF) 6Gb SAS or SATA hard drives. It ships standard with dual I/O modules installed.

- This 2.5-inch drive enclosure can be attached to a P2000 G3 controller (SFF or LFF) array head
- The D2700 enclosure ships with a two .5m miniSAS to miniSAS cable.
- Up to five D2700 may be attached to the P2000 G3 array head, given total support for 149 SFF drives.

MSA 2040 3.5-inch Disk Enclosure. This 2U unit has twelve LFF (3.5-inch) drive bays and accepts for MSA dual-ported SAS and SAS MDL drives. The pre-configured HPE MSA 2040 LFF Drive Enclosure (MOS96A) has two I/O modules and supports both single and dual controller arrays.

This 3.5-inch MSA disk enclosure can be attached to P2000 G3 FC or SAS LFF or SFF array head Each configured model ships standard with two .5m mini-SAS to mini-SAS cables for connection to the MSA 2040 array expansion port or existing disk enclosure cascade port.

Up to seven MSA 2040 3.5-inch enclosures can be attached to a P2000 G3 FC, FC/iSCSI Combo, or SAS controller in the array head.

Family Information

Scalability

The P2000 G3 FC, Combo FC/iSCSI, SAS, 1 GB or 10GbE iSCSI controllers are designed to allow an installation to begin with smaller capacity and be able to grow gradually as needed. The flexibility of SAS or SATA drive technology, form factors, sizes, speeds, and costs per GB allows a system to easily fit in almost any budget.

- Large Form Factor configurations can scale up to 7.2 TB SAS, 72 TB SAS MDL or 24 TB SATA, expandable to 57.6 TB SAS, 576 TB SAS MDL or 192 TB SATA with the addition of a maximum of seven P2000 3.5-inch Drive Enclosures.
- Small Form Factor configurations can scale from 21.6 TB SAS, 24 TB SAS MDL or 12 TB SATA MDL. With the addition of five D2700 JBODs, the P2000 G3 can support 134 TB SAS, 149 TB SAS MDL or 74.5 TB SATA MDL.
- Users may configure a 24-drive P2000 G3 SFF array head with 12-drive LFF P2000 3.5-inch disk enclosures. This is an excellent method for a configuration that supports fast SFF enterprise-class SAS drives in the array head, combined with economical LFF drives staged for archival purposes, all in the same array.
- Qualification of larger capacity drives is ongoing.

Vdisks

Vdisks can span across multiple enclosures, where drives used in the Vdisk can be contained in different enclosures. The maximum number of drives that can be used in RAID 1 Vdisk is 2; RAID 0, 3, 5, 6, and 10 is 16; and for RAID 50 Vdisk is 32.

LUNs

The HPE 2000 family of arrays supports 512 LUNs (total volumes in a dual controller system) and LUN sizes up to 64 TB depending on the RAID configuration chosen. The array supports expansion and deletion of any LUN.

RAID 0, 1, 3, 5, 6, 10, 50

In addition to the usual RAID levels, the P2000 G3 features several important additional levels. RAID 6 is the highest level of RAID protection. It allocates two sets of parity data across drives and allows simultaneous write operations. It can withstand two simultaneous drive failures without downtime or data loss. RAID 10 is mirroring and striping without parity. It is the most popular of the multiple RAID levels, allowing large arrays with high performance in most cases and superior fault tolerance. RAID 50 combines the block striping and parity of RAID 5 with the straight block striping of RAID 0, yielding higher performance than RAID 5 through the addition of RAID 0, particularly during writes.

Performance

Performance numbers are a guideline as established by tests using RAW I/O in an Operating System Agnostic test lab environment. 144 GB 15K SAS drives were used in a dual controller configuration of 12 vdisks consisting of twelve disks per vdisk, 1.6 TB volumes, and 3 volumes per host. 4 hosts directly attached to the P2000 G3 array were used in this test configuration (results cannot be expected with a single host). Results were achieved in Sequential Writes with 256K blocks; all random tests were based on 8K block sizes.

NOTE: Number and type of applications, drive type and number of drives, operating system used, and the number of hosts will affect overall performance. This table is provided strictly as a test-lab comparison. NOTE: These numbers reflect a full array configuration with the maximum number of front-end ports, disks, and controllers. The test results shown for the P2000 G3 are designed to give a conservative reference point for comparisons.

| 2000 Array Performance | P2000 G3 FC | P2000 G3 SAS | P2000 G3 10GbE iSCSI | P2000 G3 1GbE iSCSI |
|------------------------|-------------|--------------|----------------------|---------------------|
| Protocol (host | 8 GB | 6 GB | 10Gb | 1 GB |

Family Information

DC-power chassis

Hewlett Packard Enterprise is making the two models of controller-less chassis available with direct current (DC) power supplies. They each have the two empty bays where users can insert one or two P2000 G3 controller(s). In addition, the P2000 chassis with LFF drive bay can have P2000 3.5-inch I/O modules inserted to create a LFF DC-power JBOD.

The 500 watt power supply is designed to operate over the input range of -40VDC to -75VDC.

| | SKU |
|--|--------|
| HP P2000 DC-power LFF Chassis (supports up to 2 controllers or I/O modules) | AP840B |
| HP P2000 DC-power SFF Chassis | AP841B |

Configuration and Management Tools

HPE Storage Management Utility (SMU). Management access, out-of-band: WEB GUI, CLI. Interface Types: USB, 10/100 Ethernet. Protocols Supported SNMP, SMI-S, SSL, SSH, SMTP, FTP, HTTP, Telnet

P2000 Software and Documents Support CD

- All product documentation (CD can be used on ALL supported server Operating Systems.)
- MSA Device Discovery Tool (Win and Linux) - reports P2000/MSA HW devices, and supported storage software
- Host Software Bundles (Win and Linux for both ProLiant x86, ProLiant x64 and Integrity IA64servers)
- CD updated quarterly on HPE.com with sustaining firmware updates
- The P2000 G3 contains an embedded SMI-S provider for use by SMI-S client applications. The embedded provider is designed to support P2000 configurations with up to 24 hard drives, and up to 250 mapping paths. A mapping path is defined as a P2000 volume presented through a P2000 target port to a Host initiator.

Hot Plug Expansion and All P2000 G3 models support hot plug expansion and replacement of redundant controllers,

Family Information

- Replacement Support** enclosures, fans, power supplies, and I/O modules for simple, fast installation and maintenance. Hot add expansion of disk enclosures is also supported.
- Snapshot and Clone** All G3 arrays come standard with 64 snaps, 512 snaps available. Controller based functionality. Offers higher levels of data protection, enabling an almost instant recovery from data failure or corruption. Offers alternative development testing of 'offline' production data and the ability to backup snapped/cloned data.

| | |
|---|---|
| Overview | <p>The P2000 G3 arrays come integrated with web browser and CLI based software for storage and RAID management, setup, configuration, and troubleshooting. This reduces the cost of ownership by reducing the training and technical expertise necessary to install and maintain your Hewlett Packard Enterprise storage solution.</p> <p>The SPOCK database provides interoperability information for thousands of components and millions of component combinations. It is available to all users at http://www.hp.com/storage/spock.</p> |
| Server Compatibility NOTE: depends on protocol | <p>Supports most HPE ProLiant, BladeSystems and Integrity servers including</p> <ul style="list-style-type: none"> • HPE ProLiant DL, ML • HPE c-Class Blade Servers • Integrity servers, IA64 (FC and FC/iSCSI support only) • Compatibility must be confirmed at: http://www.hp.com/storage/spock |
| Industry Standard servers support | <ul style="list-style-type: none"> • Supports most multi-vendor industry standard 32-bit Intel and AMD based (x86) servers. Hewlett Packard Enterprise requires the Third-Party Server to be logo'd and listed on the Microsoft Windows Server Catalog. • Refer to the Microsoft website: http://www.microsoft.com/windows/catalog/server/ • Hewlett Packard Enterprise Division recommends that the Third-Party Server Vendor is an active member of TSANet. Refer to the TSANet website for details: http://www.tsanet.com • Non-HPE servers will generally be supported if the HPE storage stack is used. This includes supported Hewlett Packard Enterprise branded HBAs and drivers, and supported FC switches. |

Software

VMware Site Recovery Manager (SRM)

VMware vCenter Site Recovery Manager (SRM) is an extension to VMware vCenter that delivers business-continuity and disaster-recovery solution that helps you plan, test, and execute the recovery of vCenter virtual machines. SRM can discover and manage replicated datastores, and automate migration of inventory from one vCenter to another. Site Recovery Manager integrates with the underlying replication product through a Storage Replication Adapter (SRA).

HPE P2000 Site Recovery Adapter (SRA)

The HPE P2000 SRA, a free-to-use plugin, is the program that integrates the VMware vCenter SRM with HPE P2000 G3 arrays. It enables full-featured use of the VMware SRM. It is a host-software component installed on a Microsoft Windows Server that enables disaster recovery management (DRM) software on the host to communicate and control certain aspects of the replication feature in storage systems connected to the server. It allows the VMware SRM software to automatically coordinate virtual machine failover and failback between a protected data center and a disaster recovery site by employing a disaster recovery solution called Remote Snap. A perfect combination of the Remote Snap replication and VMware SRM provides an unfailing automated solution for implementing and testing the disaster recovery between sites located across geographies. It enables communication between the HPE P2000 Remote Snap replication functionality that is embedded in HPE P2000 Fibre Channel, iSCSI, and Combo Fibre Channel systems. Users are required to acquire Remote Snap license for their local and remote HPE P2000 G3 arrays to use the HPE P2000 SRA.

Site Recovery Manager Requirements/Dependencies:

- Requires vSphere 5.0/SRM 5.0
 - Not compatible with SRM 4.x
- Requires HPE's P2000 SRA 2.0 Plug-in (downloadable from Hp.com)
- SRM works with Remote Snap functionality
 - Requires purchase of P2000 G3 Remote Snap licenses (one for each site)
- Customers must upgrade to T240 or the latest firmware
- SRM works with FC, iSCSI or Combo controllers only

HPE Insight Control Storage Module for vCenter

HPE Insight Control Storage Module for vCenter

HPE Insight Control Storage Module for vCenter is a component within the HPE Insight Control plug-in for vCenter. It provides VMware administrators that are using VMware's vSphere management console (vCenter) with the ability to see how virtual machines are mapped to datastores and individual P2000 volumes. By providing these clear relationships between VM's, datastores and storage, the VMware administrator's productivity increases, as does the ability to ensure quality of service. Roles for administrators can be defined on an individual basis, providing the ability to apply specific permissions for both view and control functions.

The HPE Insight Control Storage Module for vCenter supports mixed array environments including EVA, P4000, P2000 (MSA), and the XP array series including the P9500.

Software

When deployed with the P2000 array, provides the following:

- Active Management functionality for the P2000 array:
 - Create/Expand/Delete a Datastore
 - Create a Virtual Machine from a template
- Monitors the health and status of the P2000
- Displays LUN / volume connections from VMs and ESX servers to the arrays and provides the location and attributes of the P2000 within the SAN
- Identifies what storage features are available to allow administrators to match the features available on the P2000 to their requirements
- Provide a cluster-level view of the storage

HPE Insight Control Storage Module for vCenter is downloadable from Software Depot:

<https://h20392.www2.hp.com/portal/swdepot/displayProductInfo.do?productNumber=HPVPR>

For more information on HPE Insight Control Storage Module for vCenter visit:

<http://www.hp.com/go/vmware>

vStorage API for Array Integration (VAAI)

The vStorage API for Array Integration (VAAI) is one of the storage application programming interface (API) sets in vSphere 4.1. VAAI is an API storage partners can leverage to enhance performance of virtual machine (VM) management operations by delegating these operations to the storage array. With hardware offload, ESX/ESXi hosts perform certain operations faster and consume less server CPU and memory resources, and also storage port and storage fabric bandwidth. VAAI includes high performance and scalable VM data path primitives. HPE introduced VAAI support for HPE MSA P2000 Storage array products starting with the T230 firmware release.

Storage Hardware Primitives for VAAI

In the VMware vSphere 4.1 release, the HPE StorageWorks P2000 G3 MSA Array Systems offload capabilities support the following three primitives:

- Full Copy or Hardware Assisted Move
- Block Zeroing or Hardware Assisted Zeroing
- Hardware Assisted Locking or Atomic Test and Set (ATS)

HPE Storage Management Pack for Microsoft System Center

The HPE Management Pack for Systems Center Operations Manager provides seamless integration with Microsoft Systems Center Operations Manager and now System Center Essentials by integrating predefined discovery and state monitoring policies, event processing rules and tasks, and diagram and topology views for the storage system.

For more information:

http://h18000.www1.hp.com/products/quickspecs/14249_div/14249_div.html

HPE Storage Management Pack can be downloaded free from the following website:

<https://h20392.www2.hp.com/portal/swdepot/displayProductInfo.do?productNumber=SCOM>

Software

Copy Software for the P2000 G3 Data Protection

- Snapshots create up to 512 point-in-time pictures of data (512 snaps are exclusive to the P2000 G3)
- Volume Copies create up to 128 point-in-time copies of data
- Recovery is instant - revert data from any previous Snapshot or Volume Copy
- Backup 'snapped' data to disk, virtual tape, or physical tape without a backup window
- A 64 snapshot license and Volume Copy are included with all P2000 G3 models.
- Support and updates are desired for bundled software functionalities (such as 64 LTU Snap and/or Volume Copy etc. in the P2000 G3 products) a combination HW + SW support care pack must be purchased.
- Hewlett Packard Enterprise does not provide warranty assistance for software products included with our base hardware products. This would either be SupportPlus or SupportPlus24. The hardware warranty component of these services is accounted for in the pricing of the SP and SP24 care packs.

Data Testing

- Snap or clone data to test the performance of a software application on 'offline' production data
- Snap or clone data to test how a software patch or enhancement will function on 'offline'; production dat0061

P2000 G3 Snapshot and Clone:

G3 controllers/models come STANDARD with 64 snapshots and Volume Copy software
512 Snapshot option is ONLY available and supported with the G3, not the prior generation MSA2000 models

HP P2000 Array System Snapshot 512 Software LTU TA806A

HP P2000 Array System Snapshot 512 Software E-LTU TA806AAE

MSA2000 and MSA2000 G2 Snapshot and Volume Copy (clone) software:

Snapshot and Volume Copy software is optional on models other than the P2000 G3.

The following skus are designated for use by the MSA2000 G2 models. They are neither necessary nor available for the P2000 G3 FC.

HP 2000 Modular Smart Array Volume Copy Software LTU T5514A

HPE MSA Recovery Manager Software

Overview

MSA Recovery Manager (RM) intelligently creates and manages application specific snapshots that can be used to quickly restore application instances or databases. This optional software delivers a standalone solution to augment your existing backup software strategy. It provides seamless integration with HPE P2000 G3 storage hardware.

Recovery Manager currently supports Microsoft Exchange and Microsoft SQL. Integrated with Hewlett Packard Enterprise and 3rd party back up applications, RM provides reliable data recovery. Recovery Manager is integrated with Microsoft Volume Shadow Copy Service (VSS) to make non-disruptive point-in-time copies of Microsoft Exchange and Microsoft SQL databases for constant data protection. RM eases costs and administration by providing rapid, affordable online recovery of Microsoft® SQL Server databases from multiple, highly granular point-in-time snapshots. Quickly recover a database to a known point in time, speeding up a variety of operations including rapid recovery of the production SQL server.

HPE P2000 Remote Snap Software (G3 FC and FC/ISCSI,

- HPE P2000 Remote Snap Software is array based software that provides remote replication on the HPE P2000 G3 MSA Array products (except SAS model). HPE Remote Snap is a form of asynchronous replication which consists of replication of block-level data from a volume on a local system to a volume that may be on the same system or on a second independent system.

Software

1GbE and 10GbE iSCSI controllers only)

This second system may be collocated with the first system or may be located at a remote site. It requires T230Rxx controller firmware or higher.

- HPE Remote Snap functionality is based on existing Snapshot technology offered by HPE P2000 SAN Array products. Snapshots are used to track the data to be replicated as well as to determine the differences in data updated on the master volume, minimizing the amount of data to be transferred.
- HPE Remote Snap replication technology provides the ability to accomplish key data management and protection capabilities. First, because Remote Snap uses snapshots as the underlying technology it creates multiple local recovery points which can be used for such tasks as to complement daily backups; second, replication provides the ability to access data in a remote site which could be used for dispersed operations; and third but definitely not least important replication allows for business continuance in the event of a failure on the primary site.
- In order to perform a replication, a snapshot of the volume to be replicated is taken, creating a point-in-time image of the data. This point-in-time image is then replicated to the destination volume by copying the data represented by the snapshot via a transport medium such as TCP/IP (iSCSI) or Fibre Channel. The amount of data transferred is minimized through the use of snapshots whenever possible.

HP P2000 Array System Remote Snap Software LTU

TA808A

HP P2000 Array System Remote Snap Software E-LTU

TA808AAE

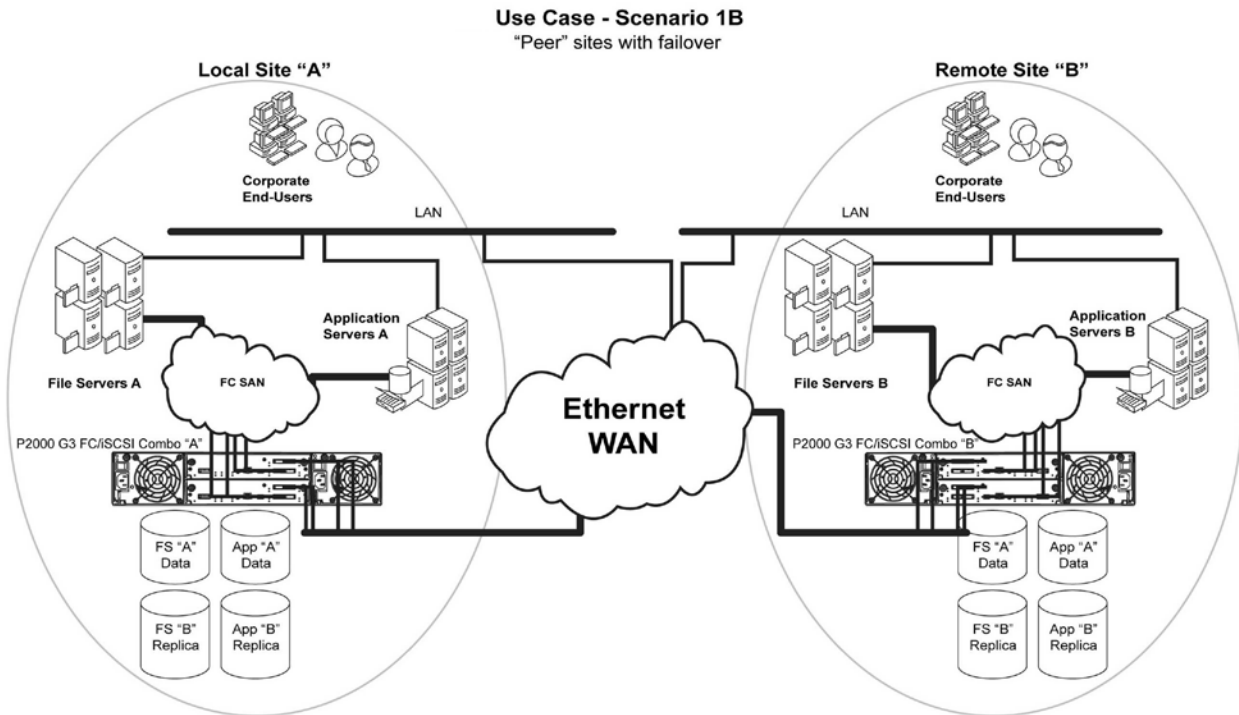

(NOTE: One license per array is required for replication. For example, if you have two P2000 arrays performing replication (from Primary system to Remote System), you will need 2 licenses).

Product Features

- Storage based asynchronous snapshot replication
- Initial copy of data can be performed locally, reducing burden on wide area networks
- Support of both Ethernet and Fiber Channel interconnects provides flexible options to the application environments.
- Snapshot based replication technology means only changed data will be replicated to alternate site
- Many to 1 replication (up to 4 nodes) - primary use case is to replicate from "many" branch offices to the home office for the purpose of backing up data from the branches
- Single controller to single controller replication
- Mixed controller replication - replication between P2000 G3 Fibre Channel and P2000 G3 FC/iSCSI Combo arrays
- Advanced scheduler provides several options to IT administrators for business continuance
- Flexible architecture allows remote replication between P2000 G3 Fibre Channel and/or P2000 G3 FC/iSCSI Combo arrays. You can also join dissimilar controllers; for instance a Combo controller can snap remotely to a 1 or 10 GbE iSCSI array. Protects existing investments and enhances business continuity planning objectives.
- Replication Wizard simplifies the task of setting up and establishing replication pairs from one unified, easy to use GUI.
- Snapshot based replication enables both local and remote recovery depending on the need. Snapshot replication isolates problems to a specific point in time which can be selected by the administrator. Additionally snapshot replication supports longer distance replication.
- Multiple relationships provide greater storage flexibility and utilization.
- Bundled 64 Snapshots and Volume Copy integration provides better efficiencies by combining the management and array technologies to create local copies.
- Fast application recovery with minimal or no transaction loss

Software

- Creation of disaster tolerant copies of your critical business data
- No-single-point-of-failure solution to increase the availability of your customers data

Customer Benefits

Disaster Recovery

Replication technology has typically been used to address disaster recovery issues. Disaster recovery is still the driving business case behind replication. Remote replication can be implemented from the production site to one or more remote sites across a campus, across town, across a state or across the country. When a disaster strikes the primary location, the applications can be brought up at the remote site and continue processing against the replicated copies. When the primary site is back online, the replication can be reversed and when the data is resynchronized, processing can be switched back to the primary site and business can continue. In the past, if an e-mail system experienced a disaster it was an "oh well" moment. The loss of a day or more of e-mail was not considered important. Today, e-mail is a critical component of many companies' business plans and recovering e-mail after a disaster quickly and completely is required.

Maintenance

HPE Remote Snap software can also be used to solve other business needs. For instance, E-mail servers may need periodic maintenance that can take hours to complete. With remote replication in place, the downtime can be minimal (as long as it takes to bring the remote peer of the primary e-mail server online). The primary server can be worked on (patches, hardware upgrades, etc.) and then brought back online and into production. A whole datacenter can be failed over to a remote site on purpose to perform maintenance on generators, air conditioning, etc. Replication can also be used to perform a datacenter move with minimal downtime (fail everything to the DR site, move the production datacenter to its new location then fail the DR site back to the new datacenter).

Storage Based

Data replication is performed at the storage subsystem controller level and is totally transparent to the host, alleviating unnecessary host cycles to perform the data mirroring functions. Unlike a fabric based or host based solution, the storage based solution dedicates its resources to managing the replication

Software

process between arrays, with minimal impact to applications, other data or devices on the SAN.

Bi-Directional

The bidirectional HPE P2000 Array solution addresses the growing need among businesses to ensure continuous availability of applications that are critical to daily business operations. HPE P2000 enables two sites in a remote replication connection to use each other as a destination to maintain replicated copies of online data. This maximizes resource utilization while enabling business continuance, even in the event of disaster.

Disaster Tolerance

The P2000 G3 FC products utilize snapshot data online and in real time to a remote P2000 G3 through a local or extended storage area network (SAN). Additionally, data replication can be bidirectional, meaning that a storage array can be both a source and a destination. A particular LUN can be replicated in only one direction between the two storage arrays. Write I/O data sent to the source is replicated by HPE P2000 Array to the destination. A pair of properly configured HPE P2000 G3 FC arrays is a replication solution that guarantees data integrity in the event of a storage system or site failure.

Normalization (first initial copy)

When a DR site is initially created a normalization or initial copy of the data from the source volume to the target volume must occur. The P2000 G3 array allows this first copy to take place locally. After completion the disks can be manually moved to the remote location. Subsequent changes will only remotely copy the changed blocks.

SAN Extensions

HPE P2000 G3 Array provides the capability to replicate data over direct Fibre Channel. The distances supported over dark fiber are determined by the speed of the dark fiber connection and the technology used to communicate over the dark fiber.

Path failover (MPIO)

MPIO for Windows provides a single multi-path solution for HPE P2000 G3 Modular Smart Array on HPE servers.

Support for Windows 2003 and Windows 2003 R2 operating systems is provided by HPE MPIO Full Featured DSM. For the P2000 G3 this version is 2.6.1.7 or greater.

Support for Microsoft Windows 2008 is bundled within the operating system

Support for Linux distributions is with Device Mapper 4.4.0 or greater.

Support for HP-UX is native multipathing in HPE-UX v3 and PV-Links in HPE-UX v2.

HPE StoreEasy 3000 Gateway Storage

Add more value to your P2000 array

HPE MSA combined with HPE StoreEasy 3840 Gateway Storage enables you to consolidate block and file storage onto a single, high-performance system - giving your business the flexibility to meet changing business needs on-demand.

The HPE StoreEasy 3840 delivers efficient, secure, and highly available file services that help address your changing file-serving needs. It reduces your cost of ownership by simplifying management, increasing resource utilization, centralizing growth, and protecting data. HPE StoreEasy 3840 provides a simple and consistent experience for managing block and file storage for multiple workloads centrally.

Software

HPE P2000 G3 Carrier-Grade Components

The P2000 G3 is an 8 GB Fibre Channel connected 2U storage area network (SAN) or direct connect solution designed for network equipment providers (NEPs) and communication service providers. Suited for those who need a robust telecom infrastructure--- they need storage devices to catch videos, photos, text, new services --- and need a place to have the data stored and cached.

The HPE P2000 Carrier-Grade Chassis AP841B (RoHS Compliant SKU)) is a controller-less 6Gb chassis capable of supporting one or two P2000 G3 8Gb Fibre Channel controllers (AP836A (Retiring SKU) or AP836B (RoHS Compliant SKU)) and has twenty-four Small Form Factor (SFF) drive bays. It comes equipped with two DC-power power supplies.

The HPE P2000 2.5-in Dual I/O JBOD is a special model disk enclosure designed only for use with the carrier-grade array heads. It has 24 drive bays (unlike the D2700 with 25 drive bays) and has dual DC-power supplies. It is only sold with a carrier grade array. Five of these JBODs may be cascaded from the array head.

When used in conjunction with specific Storage SFF SAS drives, the solution is NEBS certified. NEBS level-3 certification provides the assurance that the equipment is safe to operate and sturdy enough to withstand certain physical and environmental (for example, fire, earthquakes) conditions. For Seismic Zone 4 rating, the P2000 must be mounted in an HPE Seismic Rack (AH335A)

HPE P2000 Remote Snap Software (G3 FC and FC/iSCSI, 1GbE and 10GbE iSCSI controllers only)

- HPE P2000 Remote Snap Software is array based software that provides remote replication on the HPE P2000 G3 MSA Array products (except SAS model). HPE Remote Snap is a form of asynchronous replication which consists of replication of block-level data from a volume on a local system to a volume that may be on the same system or on a second independent system. This second system may be collocated with the first system or may be located at a remote site. It requires T230Rxx controller firmware or higher.
- HPE Remote Snap functionality is based on existing Snapshot technology offered by HPE P2000 SAN Array products. Snapshots are used to track the data to be replicated as well as to determine the differences in data updated on the master volume, minimizing the amount of data to be transferred.
- HPE Remote Snap replication technology provides the ability to accomplish key data management and protection capabilities. First, because Remote Snap uses snapshots as the underlying technology it creates multiple local recovery points which can be used for such tasks as to complement daily backups; second, replication provides the ability to access data in a remote site which could be used for dispersed operations; and third but definitely not least important replication allows for business continuance in the event of a failure on the primary site.
- In order to perform a replication, a snapshot of the volume to be replicated is taken, creating a point-in-time image of the data. This point-in-time image is then replicated to the destination volume by copying the data represented by the snapshot via a transport medium such as TCP/IP (iSCSI) or Fibre Channel. The amount of data transferred is minimized though the use

Software

of snapshots whenever possible.

HP P2000 Array System Remote Snap Software LTU

HP P2000 Array System Remote Snap Software E-LTU

TA808AAE

(NOTE: One license per array is required for replication. For example, if you have two P2000 arrays performing replication (from Primary system to Remote System), you will need 2 licenses).

Service and Support, HPE Care Pack, and Warranty Information

Warranty

Three-year limited warranty, parts exchange Next Business day delivery

Enclosures, Hard drives, and Options for the P2000 G3 FC carry their own warranty. Refer to Hewlett Packard Enterprise's Limited Warranty Statement for more information.

The P2000 G3 FC has been designed with customer self-repairable parts to minimize repair time and provide greater flexibility in performing defective parts replacement. Please refer to Hewlett Packard Enterprise's limited warranty Statement and parts replacement instructions for further details.

<http://h18006.www1.hp.com/products/storageworks/warranty.html>

Products included in various kits carry their own individual warranties.

NOTE: The warranty of the hard drive options purchased with the P2000 G3 FC, SAS, and 10GbE iSCSI products is different for SAS hard drives versus SAS MDL and SATA hard drives. SAS hard drive options have a three year warranty and SAS MDL and SATA hard drives options have a one year warranty.

Service and Support

Services to accelerate time to results

HPE Storage Services bring you a rich portfolio of consulting and support services designed to add value to our core storage products and solutions. We have the know-how and experience to put storage technology to work for you. We work closely with you as your strategic partner, leveraging our full services portfolio to make sure that everything works to optimize your enterprise.

Choose from services aligned to our storage product offerings and lifecycle. From mission-critical onsite services to innovative web-based remote support, you choose the precise level of attention and support your business demands.

Discover, plan, and design

Choose from a rich portfolio of services to make the most of P2000 G3 MSA Array Systems (Goose Island - PL Li), so you can efficiently and affordably consolidate, manage, and extract value from unstructured data.

HPE Services can help you discover needs and create a plan for simplifying the environment, reducing risk, and maximizing your storage investments

HPE Storage Efficiency Analysis - The HPE Storage Efficiency Analysis provides customers with a view of their storage infrastructure and operating environment; highlighting recommendations for improvements. The report provides extensive insight about the existing storage environment, opportunities for efficiency gains, asset aging and replacement through interaction with key decision makers

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-6727ENW.pdf>

HPE Storage Impact Analysis (SIA) - The HPE Storage Impact Analysis service provides a 2-4 week discovery engagement with executive summary presentation. The goal of this service is to help provide customers guidance on storage related issues and develop remediation plans.

Service and Support, HPE Care Pack, and Warranty Information

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-1174ENW.pdf>

HPE Storage Cloud Design Service - Build a scalable, low-cost enterprise storage environment with inherent cloud benefits to meet big data needs.

HPE Storage Modernization Service - The HPE Storage Modernization service is a 4-6 week service that defines the customers envisioned target storage environment based on a proven solution design methodology. Hewlett Packard Enterprise architects will quickly perform tool-assisted automatic discovery and facilitate a two-day strategy workshop with all key stakeholders involved in the storage infrastructure initiative

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-4620ENW.pdf>

Deploy and integrate

We can help you configure, set up, and efficiently use P2000 G3 MSA Array Systems (Goose Island - PL Li), as well as help migrate data, improve capacity utilization, and establish information management standards used across backup, replication, and archiving needs.

HPE MSA/P2000 Family Disk Array Installation and Startup Service - Implement right from the start, as Hewlett Packard Enterprise experts install, test, and configure your hardware and software onsite. We deliver a tailored storage deployment properly integrated into your environment.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA0-3048ENW.pdf>

HPE Storage Data Migration Services - End-to-end data migration service providing seamless discovery, assessment, planning, and design, completely customizable to your organization's storage area network or network attached storage environment and using innovative software to help you migrate to HPE storage quickly and efficiently.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-0774ENW.pdf>

HPE Storage and Data Residency Service - Strategic augmentation of your current environment with Hewlett Packard Enterprise resources who become your trusted advisor to provide answers that are right for your storage and backup environment.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-9481ENW.pdf>

HPE Proactive Select - A flexible way to purchase services to fit your environment with an extensive menu of HPE Proactive Select event and technical services, such as onsite firmware upgrades, health checks, assessments, and education.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA2-3842ENW.pdf>

Operate and support

Choose the right support to maximize uptime, free up your resources, and achieve improved value-as you get the most out of the existing IT assets while accelerating time-to-revenue.

HPE Proactive Care 24x7 - Hardware and software support services designed specifically for your technology with rapid access to Advanced Solution Center Specialists plus firmware and software management and best practice advice

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA3-8855ENW.pdf>

HPE Proactive Care Advanced - Building on HPE Proactive Care to give you personalized technical and operational advice from an assigned local Account Support Manager for personalized technical collaboration, flexible access to specialist skills to help fine-tune business critical IT, and Enhanced Critical Incident Management to help make sure your business is not affected if you experience a system or device outage.

Service and Support, HPE Care Pack, and Warranty Information

HPE Proactive Care Personalized Support - An option-if you have HPE Proactive Care- to bring increased personalization of the Proactive Care support experience through the assignment of an Account Service Manager (ASM) who provides IT best practice advice to help address IT issues and projects. <http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-3446ENW.pdf>

HPE Foundation Care 24x7 Service - HPE Foundation Care 24x7 connects you to Hewlett Packard Enterprise 24 hours a day, seven days a week for assistance on resolving issues - hardware onsite response within four hours and software call back within two hours after opening your case. Three years' coverage recommended with HPE Care Pack Service.

HPE Education Services - Comprehensive training for new, as well as experienced, storage administrators designed to expand your skills and keep you up to speed with the latest storage and virtualization technology from HPE Storage.

<http://education.hp.com/curr-storsan.htm>

Optimized Care -

Delivers the highest levels of performance and stability through deployment and proactive management practices

Choose from three levels of operate and support care

HPE 6hr CTR Proactive Care Service

Additional options - HPE Proactive Care Personalized Support (Once per Proactive Care support new environment), an additional day of Hewlett Packard Enterprise Personalized Support, and 10 additional Hewlett Packard Enterprise Proactive Select credits per year, per array

Standard Care -

maintains high level of uptime, along with expert help to cut the cost and complexity of implementation and support

HPE Proactive Care 24x7

Additional options - HPE Proactive Care Personalized Support (Once per Proactive Care support new environment), an additional day of HPE Personalized Support, and 10 additional HPE Proactive Select credits per year, per array

Basic Care - Minimum recommended support

HPE Foundation Care 24x7

Additional options - 10 Proactive Select Credits per Year

Remote Support Automation

Hewlett Packard Enterprise Automation provides 24x7 coverage, proactive problem prevention, accurate problem diagnosis and faster problem resolution, as well as interactive support portals and tools. This is an integral, and cost-free, part of your Hewlett Packard Enterprise support relationship and we are continually investing in additional cutting-edge capabilities to make it better.

For more information

<http://www.hp.com/services/storage>

To learn more on HPE Storage Services, please contact your Hewlett Packard Enterprise sales representative or Hewlett Packard Enterprise Authorized Channel Partner

HPE Care Pack Services are sold by Hewlett Packard Enterprise and Hewlett Packard Enterprise Authorized Service Partners:

- Services for customers purchasing from Hewlett Packard Enterprise or an enterprise reseller

Service and Support, HPE Care Pack, and Warranty Information

- are quoted using Hewlett Packard Enterprise order configuration tools.
- Customers purchasing from a commercial reseller can find HPE Care Pack Services at [**http://www.hp.com/go/lookuptool**](http://www.hp.com/go/lookuptool)

Configuration Information

Configure to Order Program Information

Hewlett Packard Enterprise has a very successful Configure to Order program for the P2000 G3 family. The P2000 G3 models and options may or may not be factory installed in a rack with add-on controllers, switches, P2000 disk enclosures and hard drives. The P2000 G3 arrays may be integrated with ProLiant servers or as standalone storage.

Orders to be shipped through the CTO process must have a minimum of two drives of the same type (SAS, SAS MDL, or SATA) ordered per controller. SAN Starter Kits are not eligible for CTO.

| Description | Product Number |

| HP MSA 450GB 12G SAS 15K SFF(2.5-inch) Dual Port Ent 3yr Warranty Hard Drive | J9F41A |
| HP MSA 600GB 12G SAS 15K SFF(2.5-inch) Dual Port Ent 3yr Warranty Hard Drive | J9F42A |
| HP MSA 1TB 6G SAS 7.2K SFF (2.5-inch) Dual Port Midline 3yr Warranty Hard Drive | C8S62A |

NOTE: Go to the HPE Hard Drive Compatibility table for complete drive compatibility information (<http://www.hp.com/products/harddiskdrives>). Using hard drives in unsupported configurations will result in voiding the warranty and could result in damage to the drive and/or loss of data.

Step 1 - P2000 G3 - Base Configuration

Select one:

Model Name

SKU

| | |
|--|--------|
| HP P2000 Modular Smart Array 3.5-inch Drive Bay Chassis | AP838B |
| <ul style="list-style-type: none"> Controller-less chassis with twelve Large Form Factor (LFF) drive bays. Space for two controllers. | |
| HP P2000 Modular Smart Array 2.5-inch Drive Bay Chassis | AP839B |
| <ul style="list-style-type: none"> Controller-less chassis with twenty-four Small Form Factor (SFF) Storage drives bays. Space for two controllers. | |

There are two array-head chassis - one with twelve 3.5-inch large form factor bays, the other with twenty-four 2.5-inch small form factor drive bays. For an additional twelve drive bays purchase a P2000 3.5-inch Disk Enclosure. You may attach a total of seven P2000 Drive Enclosures for a total of ninety-six LFF drive bays. For 25 additional SFF drive bays purchase D2700 JBOD. You may attach a total of five D2700 JBODs for a total of one hundred and forty nine SFF drive bays. Dual I/O modules JBODS support both single and dual controller arrays.

Step 2 - Options

Select each option with quantities specified.

Step 2a - Options

Configuration Information

| Quantity | Description with Parts Shipped: | SKU |
|----------|---|--------|
| 1 or 2 | HP P2000 G3 MSA Fibre Channel Controller NOTE: for either the LFF or SFF P2000 or the two DC-powered chassis | AP836B |
| 1 or 2 | HP P2000 G3 MSA FC/iSCSI Combo Modular Smart Array Controller NOTE: for either the LFF or SFF P2000 or the two DC-powered chassis | AP837B |
| 1 or 2 | HP P2000 G3 SAS MSA Array System Controller NOTE: for either the LFF or SFF P2000 or the two DC-powered chassis | AW592B |
| 1 or 2 | HP P2000 G3 10GbE iSCSI MSA Array System Controller NOTE: for either the LFF or SFF P2000 or the two DC-powered chassis | AW595B |
| 1 or 2 | HP P2000 G3 iSCSI MSA Array System Controller NOTE: for either the LFF or SFF P2000 or the two DC-powered chassis | BK829B |

Step 2b - SAS and SATA Drive Options

NOTE: SATA drives are designed for archival or reference data. They should not be used in a heavy or intense I/O environment. Those situations require the use of enterprise-class SAS drives. P2000 3.5-inch drives are for use only with P2000 products.

P2000 Large Form Factor (LFF) SAS drives for P2000 G3 FC and P2000 3.5-inch Disk Enclosure

| | |
|---|--------|
| HP MSA 300GB 12G SAS 15K LFF (3.5in) Converter Enterprise 3yr Warranty Hard Drive | J9V68A |
| HP MSA 450GB 12G SAS 15K LFF (3.5in) Converter Enterprise 3yr Warranty Hard Drive | J9V69A |
| HP MSA 600GB 12G SAS 15K LFF (3.5in) Converter Enterprise 3yr Warranty Hard Drive | J9V70A |

P2000 Large Form Factor (LFF) SAS MDL DP drives for P2000 G3 FC and P2000 3.5-inch Disk Enclosure

| | |
|--|--------|
| HP P2000 1TB 6G SAS 7.2K rpm LFF (3.5-inch) Dual Port MDL Hard Drive | AP861A |
| HP P2000 2TB 6G SAS 7.2K rpm LFF (3.5-inch) Dual Port MDL Hard Drive | AW555A |
| HP P2000 3TB 6G SAS 7.2K LFF (3.5- inch) Dual Port MDL 1yr Warranty Hard Drive | QK703A |
| HP MSA 4TB 6G SAS 7.2K rpm LFF (3.5-inch) Midline 1yr Warranty Hard Drive | C8R26A |
| HP MSA 6TB 6G SAS 7.2K 3.5in Midline 1yr Warranty Hard Drive | J9F36A |

NOTE: Before installing >3TB HDDs in an P2000 G3 Array please update P2000 array controller firmware to version TS230Rxxx or later

MSA2 Large Form Factor (LFF) SATA drives for P2000 array head an P2000 disk enclosure

| | |
|--|--------|
| HP MSA2 1TB 7.2K rpm LFF (3.5 inch) Dual-port SATA Hard Disk Drive | AJ740B |
| HP P2000 2TB 3G SATA 7.2K rpm LFF MDL Hard Drive | AW556B |

HPE MSA P2000 G3 Arrays support both the HPE ProLiant Server SFF Hard Disk Drives and HPE MSA SFF Hard Disk Drives

HPE ProLiant Server Small Form Factor (SFF) SAS drives for P2000 G3 Array (24 drive bay) and the D2700 JBOD (25 drive bay)

| | |
|---|------------|
| HP 300GB 6G SAS 10K rpm SFF (2.5-inch) Dual Port Enterprise 3yr Warranty Hard Drive | 507127-B21 |
| HP 450GB 6G SAS 10K rpm SFF (2.5-inch) Dual Port Enterprise 3yr Warranty Hard Drive | 581284-B21 |
| HP 600GB 6G SAS 10K rpm SFF (2.5-inch) Dual Port Enterprise 3yr Warranty Hard Drive | 581286-B21 |
| HP 900GB 6G SAS 10K rpm SFF (2.5-inch) Dual Port Enterprise 3yr Warranty Hard Drive | 619291-B21 |

Configuration Information

| | |
|---|------------|
| HP 1.2TB 6G SAS 10K rpm SFF (2.5-inch) Dual Port Enterprise 3yr Warranty Hard Drive | 718160-B21 |
| HP 146GB 6G SAS 15K rpm SFF (2.5-inch) Dual Port Enterprise 3yr Warranty Hard Drive | 512547-B21 |
| HP 300GB 6G SAS 15K rpm SFF (2.5-inch) Hot Plug Enterprise 3yr Warranty Hard Drive | 627117-B21 |
| HP 300GB 12G SAS 15K rpm SFF (2.5-inch) Enterprise 3yr Warranty Hard Drive | 785099-B21 |
| HP 450GB 12G SAS 15K rpm SFF (2.5-inch) Enterprise 3yr Warranty Hard Drive | 785101-B21 |
| HP 600GB 12G SAS 15K rpm SFF (2.5-inch) Enterprise 3yr Warranty Hard Drive | 785103-B21 |

HPE MSA Small Form Factor (SFF) SAS drives for P2000 G3 Array (24 drive bay) and the D2700 JBOD (25 drive bay)

12G SFF 10K SAS HDDs

| | |
|---|--------|
| HP MSA 300GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive | J9F44A |
| HP MSA 600GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive | J9F46A |
| HP MSA 900GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive | J9F47A |
| HP MSA 300GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive | J9F48A |

6G SFF 10K SAS HDDs

| | |

| HP MSA 300GB 12G SAS 15K SFF(2.5-inch) Dual Port Ent 3yr Warranty Hard Drive | J9F40A |
| HP MSA 450GB 12G SAS 15K SFF(2.5-inch) Dual Port Ent 3yr Warranty Hard Drive | J9F41A |
| HP MSA 600GB 12G SAS 15K SFF(2.5-inch) Dual Port Ent 3yr Warranty Hard Drive | J9F42A |

HPE ProLiant Server Small Form Factor (SFF) SAS MidLine drive for P2000 G3 Array (24 drive bay) and the D2700 JBOD (25 drive bay)

| | |
|--|------------|
| HP 1TB 6G SAS 7.2K 2.5in Dual Port Midline 1yr Warranty Hard Drive | 605835-B21 |
|--|------------|

HPE MSA Small Form Factor (SFF) SAS MidLine drive for P2000 G3 Array (24 drive bay) and the D2700 JBOD (25 drive bay)

| | |
|--|--------|
| HP 1TB 6G SAS 7.2K 2.5in Dual Port Midline 1yr Warranty Hard Drive | C8S62A |
|--|--------|

HPE ProLiant Server Small Form Factor (SFF) SATA MidLine drive for P2000 G3 Array (24 drive bay) and the D2700 JBOD (25 drive bay)

(NOTE: SFF SATA drives are single ported and therefore do not have a fail-over path intrinsic to their design)

| | |
|--|------------|
| HP 500GB 3G SATA 7.2K rpm SFF (2.5-inch) Midline 1yr Warranty Hard Drive | 507750-B21 |
|--|------------|

Step 2c - Drive Enclosure Options

Configuration Information

P2000 Dual I/O 3.5-inch 12 Drive Enclosure

Rear Panel components

- | | | |
|--------------------|-----------------|-----------------|
| 1. Power Indicator | 3. Unit Locator | 5. SAS Out Port |
| 2. Fault Indicator | 4. SAS In Port | |

Use either disk enclosure with Large or Small Form Factor, single or dual controller array heads. Each ship with two .5m mini-SAS to mini-SAS cables.

| | |
|---|--------|
| HP P2000 Dual I/O LFF Drive Enclosure | AP843B |
| HP D2700 Disk Enclosure | AJ941A |
| HP MSA 2040 Energy Star LFF Disk Enclosure | MOS96A |
| HP P2000 LFF Drive Enclosure I/O Module | |
| NOTE: Only used in conjunction with the P2000 blank chassis (AP838A) if a single I/O disk enclosure is desired. No cable included) | AP844B |

Step 2d - SAS Cable Options

miniSAS to miniSAS Cables:

Connecting P2000 G3 FC or SAS controller to a JBOD if a longer cable is desired. Also used for attaching the P2000 G3 SAS host ports to servers

| | |
|-------------------------------|------------|
| HP External Mini SAS 2m Cable | 407339-B21 |
|-------------------------------|------------|

Step 3 - Other P2000 G3 Options

Choose optional AC Power Cords (2 required)

NOTE: Two PDU cables: one 142263-008 (Black) and one 1422633-013 (Grey), ship standard with all AC-powered enclosures.

| | |
|---|------------|
| Power Cord, (Australia/China/New Zealand) | 227098-001 |
| Power Cord, (Central Europe) | 157215-001 |
| Power Cord, (United Kingdom/Hong Kong) | 157216-001 |
| Power Cord, (Switzerland) | 157219-001 |
| Power Cord, (Italy) | 157217-001 |
| Power Cord, (Denmark) | 157218-001 |
| Power Cord, (Japan) | 139867-001 |
| Power Cord, (South East Asia/India) | 157220-001 |

Step 4 - Choose Supported Options For Fibre Channel Infrastructure

Configuration Information

| Fibre Channel Host Bus Adapters | Model | Description | SKU |
|----------------------------------|--|--|---|
| X86 servers | BladeSystem c-Class Fibre Channel Mezzanine HBAs | | |
| | | QLogic QMH2562 8Gb FC HBA for HPE c-Class BladeSystem | 451871-B21 |
| | | HP BLc Emulex LPe1205- 8Gb FC HBA for HPE c-Class BladeSystem | 456972-B21 |
| | | Brocade 804 8Gb FC HBA for HPE BladeSystem c-Class, Windows, VMware, Linux | 590647-B21 |
| | Fibre Channel HBAs | | |
| | NOTE: Please visit http://www.hp.com/go/fchba for product details and http://www.hp.com/storage/spock for compatibility details. | | |
| | Brocade Fibre Channel HBAs | | |
| | | HP 81B PCI-e FC HBA Single Port | AP769B |
| | | HP 82B PCI-e FC HBA Dual Port | AP770B |
| | | HP 41B 4Gb PCI-e FC HBA | AP767B |
| | HP 42B 4Gb Dual-Port PCI-e FC HBA | AP768B | |
| Emulex Fibre Channel HBAs | | | |
| | HP 81E PCI-e FC HBA Single Port | AJ762B | |
| | HP 82E PCI-e FC HBA Dual Port | AJ763B | |
| | HP FC2142 4Gb PCI-e HBA | A8002B | |
| QLogic Fibre Channel HBAs | | | |
| | HP 81Q PCI-e FC HBA Single Port | AK344A | |
| | HP 82Q PCI-e FC HBA Dual Port | AJ764A | |
| | HP FC1142 4Gb PCI-e HBA | AE311A | |
| | HP FC1242 Dual Channel 4Gb PCI-e HBA | AE312A | |
| Integrity servers | Integrity | HP 4Gb 1-port PCI-X 2.0 Fibre Channel Host Bus Adapter | AB378B |
| | | HP 4Gb 2-port PCIe Fibre Channel Host Bus Adapter | AD300A |
| | | HP 4Gb 1-port PCIe Fibre Channel Host Bus Adapter | AD299A |
| | | HP 4Gb 2-port PCIe Fibre Channel Host Bus Adapter | AD355A |
| | | HP PCIe 1-port 4Gb and 1-port 1000BT Adapter | AD221A |
| | | HP PCIe 2-port 4Gb and 2-port 1000BT Adapter | AD222A |
| | | HP PCIe 2-port 4Gb and 2-port 1000BSX Adapter | AD393A |
| | | HP PCI-X 1-port 4Gb FC and 1-port 1000BT Adapter | AD193A |
| | | HP PCI-X 2-port 4Gb FC and 2-port 1000BT Adapter | AD194A |
| | | HP PCI Express 1-port 8Gb Fibre Channel SR (QLogic) Adapter | AH400A |
| | | HP PCI Express 2-port 8Gb Fibre Channel SR (QLogic) Adapter | AH401A |
| | | HP 8Gb 1-port PCIe Fibre Channel Host Bus Adapter | AH402A |
| | | HP 8Gb 2-port PCIe Fibre Channel Host Bus Adapter | AH403A |
| | | Integrity server blades | QLogic QMH2562 8Gb Fibre Channel Host Bus Adapter for c-Class BladeSystem |
| | | Emulex LPe1205 8Gb Fibre Channel Host Bus Adapter for c-Class BladeSystem | 456972-B21 |

Summary of Changes

| Date | Version History | Action | Description of Change |
|-------------|-----------------------|---------|--|
| 25-Nov-2015 | From Version 46 to 47 | Added | Added a critical update of supporting the MSA 2040 LFF DE with the P2000 G3 array |
| 16-Oct-2015 | From Version 45 to 46 | Changed | Cosmetic Changes |
| 19-Jun-2015 | From Version 44 to 45 | Changed | Replaced AJ941A with AP843B on page 14 since it was a cut and paste error. |
| 15-May-2015 | From Version 43 to 44 | Changed | Changes were made throughout the QuickSpecs. |
| 30-Mar-2015 | From Version 42 to 43 | Changed | SKUs descriptions were updated, Obsolete SKU were removed. |
| | | Added | Support for 12G SFF and LFF w Hard Disk Drives |
| 01-Dec-2014 | From Version 41 to 42 | Changed | Changes were made throughout the QuickSpecs. |
| 03-Oct-2014 | From Version 40 to 41 | Changed | Changes in the Family Information Section |
| 29-Sep-2014 | From Version 39 to 40 | Changed | Changes were made throughout the QuickSpecs |
| 09-May-2014 | From Version 38 to 39 | Changed | Operate and Support and Basic Care were revised. |
| 28-Mar-2014 | From Version 37 to 38 | Changed | SFP cables and Supported options for SAS connection were revised in Configuration Information. |
| 16-Jan-2014 | From Version 36 to 37 | Changed | Corrected an invalid part number in the Hardware Support section. |
| 09-Dec-2013 | From Version 35 to 36 | Changed | Models, Family Information, Hardware, and Configuration Information were revised. |
| 04-Oct-2013 | From Version 34 to 35 | Changed | Corrected an error in the Hardware section. |
| 13-Sep-2013 | From Version 33 to 34 | Changed | Updated the following: Optional Software - Drives, carrier-grade (all NEBS certified) - HPE 600GB 6G SAS 10K 2.5in Dual Port Enterprise=3yr Warranty Storage Hard Disk Drive - changed part number from E2D57A to C8S58A; Configuration Information - D2700 SAS & SATA Drives (SFF 2.5-inch) - HPE 600GB 6G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Storage Hard Disk Drive - changed part number from E2D57A to C8S58A; HPE 900GB 6G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Storage Hard Disk Drive - changed part number from E2D58A to C8S59A. |
| 19-Aug-2013 | From Version 31 to 33 | Changed | Capacity, Drives available, Optional Disk enclosures, and Scalability were revised in Family Information HPE P2000 G3 Carrier-Grade Components and SAS & SATA Drives were revised in Configuration Information HPE MSA 4TB 6G SAS 7.2K rpm LFF Midline Hard Drive was added to SATA and SATA Drive Options in Configuration Information Brocade 16Gb/16 and 16Gb/28 SAN Switches for HPE BladeSystem c-Class and Brocade 16Gb/28 SAN Switch Pwr Pk+ for HPE BladeSystem c-Class were added to Fibre Channel Switches in Configuration Information HPE 2000 Modular Smart Array Snapshot 255, 64, and 8 Software LTUs and 8 to 255, 64 to 255, and 8 to 64 Upgrade Software LTUs were removed from MSA2000 and MSA2000 G2 Snapshot and Volume Copy software in Options Software |
| 19-Jun-2013 | From Version 30 to 31 | Removed | HPE MSA 4TB 6G SAS 7.2K rpm Hard Drive was removed |
| 13-May-2013 | From Version 29 to 30 | Removed | Configuration Information: Removed PremierFlex OM3+ type |

Summary of Changes

| | | | |
|-------------|-----------------------|---------|---|
| | | | cables P2000 G3 sections from Step 4a |
| | | Changed | <p>Overview: Updated What's New with Adding support for the new HPE P2000 4TB Large Form Factor SAS MDL HDD HPE MSA 4 TB 6G SAS 7.2K 3.5 in MDL HDD Microsoft Windows Server 2012 support Support with HPE StoreEasy 3830 Gateway Storage or StoreEasy 3830 Gateway Storage Blades Models: Updated P2000 G3 Modular Smart Array section. Features: Updated Virtualization SAN Starter Kit section. Family Information: Updated Capacity, Scalability, DC-power chassis and P2000 Software and Documents Support CD sections. Optional Software: Updated Snapshot and Volume Copy Software for the P2000 G3, HPE P2000 Remote Snap Software (G3 FC and FC/iSCSI, 1GbE and 10GbE iSCSI controllers only), HPE StoreEasy 3000 Gateway Storage and HPE P2000 G3 Carrier-Grade Components sections. Configurations Information: Updated SAS & SATA Drives (SFF 2.5-inch), Step 2b, Step 3 and Step 4a.</p> |
| 29-Mar-2013 | From Version 28 to 29 | Changed | Updated the following: What's new; Family Information - P2000 Software and Documents Support CD; OS Support - Fibre Channel ports; OS Support 1GbE iSCSI ports on the G3 combo FC/iSCSI controller; OS Support G3 SAS Controller; OS Support G3 1Gb 8SCSI Controller; OS Support G3 10GbE iSCSI controller; added section on HPE StoreEasy 3000 Gateway Storage |
| 21-Dec-2012 | From Version 27 to 28 | Changed | <p>Changes made in the following sections: Overview: in Overview and What's New Models: updated part numbers in P2000 G3 Modular Smart Array and P2000 G3 Array Bundles Features: updated part numbers in HPE 2000 G3 FC MSA SAN Starter Kits Family Information: updated part numbers in Scalability, DC-Power Chassis, Optional Software: updated part numbers in HP2000 G3 Carrier Grade Components Configuration Information: update product numbers in Configure to Order Program Information, D2700 SAS & SATA Drives, in Step 1, Step 2 and Step 4a.</p> |
| | | Removed | Removed hyperlink in Service & Support, HPE Care Pack and Warranty Information: For More Information section. |
| 23-Aug-2012 | From Version 26 to 27 | Changed | Changes made to the North America and Canada versions only. |
| 13-Aug-2012 | From Version 25 to 26 | Changed | Changes made throughout the entire QuickSpecs. |
| 14-May-2012 | From Version 24 to 25 | Changed | Changes made throughout the entire QuickSpecs. Note that the title has changed. |
| 06-Apr-2012 | From Version 23 to 24 | Changed | URL was changed for HPE Storage Management Pack for Microsoft System Center. |
| 09-Mar-2012 | From Version 22 to 23 | Changed | URL was changed in Optional Software. |
| 02-Mar-2012 | From Version 21 to 22 | Changed | Updated the following: Overview; What's New updated to |

Summary of Changes

| | | | |
|-------------|-----------------------|---------|---|
| | | | reflect new 300GB 6G SAS 15K SFF drives; Key Features; Family Information - Performance; Optional Software - Product Features; HPE P2000 G3 Carrier-Grade Components; Configuration Information - D2700 - added new drive; Configuration Information - Step 2b - added new drive; Configuration Information - Step 4c. |
| 13-Feb-2012 | From Version 20 to 21 | Added | All the HPE Storage Management Pack for Microsoft System Center section. |
| 13-Jan-2012 | From Version 19 to 20 | Changed | P2000 G3 Array Bundles was revised G3 Controller 10GbE iSCSI and HPE 450GB and 600GB SAS 10K rpm SFF Dual Port Enterprise 3yr Warranty Hard Drives were added and G2 Controller 3Gb SAS were removed from HPE P2000 G3 Carrier-Grade Components Related Option: MSA2000 G2 Controllers were removed from P2000 G3 Modular Smart Array models |
| 14-Nov-2011 | From Version 18 to 19 | Changed | P2000 G3 Array Bundles chart was revised in Models Citrix XenServer HPE Enterprise Edition was removed from Family Information HPE Storage Mirroring was removed from Optional Software |
| 02-Sep-2011 | From Version 17 to 18 | Changed | Total LUNs, Maximum host supported and Optional Software were updated in the Family Information chart and Product Technology was revised in Family Information HPE Insight Control Storage Module for vCenter, HPE P2000 Remote Snap Software and Product Features were revised and vStorage API for Array Integration (VAAI) was added to Optional Software Fibre Channel Switches was updated in Step 4a of the Configuration Information |
| 20-Jun-2011 | From Version 16 to 17 | Changed | Capacity was revised in the Family Information chart HPE 450GB and 600GB 6G SAS 10K 2.5 inch DP ENT HDDs were added to SAS and SATA Drives HPE P2000 3TB 6G SAS 7.2K LFF DP MDL HDD was added to P2000 Large Form Factor (LFF) SAS MDL DP drives for P2000 G3 FC and P2000 3.5-inch Disk Enclosure StorageWorks was removed throughout, including from the title |
| 09-Jun-2011 | From Version 15 to 16 | Removed | Mentions of StorageWorks were removed. |
| 09-May-2011 | From Version 14 to 15 | Changed | HPE Insight Control Storage Module for vCenter and HPE P2000 G3 Carrier-Grade Components were completely revised SAS and SATA Drives descriptions were revised Apple MAC OS X was added and Citrix XenServer HPE Enterprise Edition was removed from OS Support HPE StorageWorks 2300fc G2 Modular Smart Array Controller - 4 GB FC was removed from Models |
| 01-Apr-2011 | From Version 13 to 14 | Changed | Server Compatibility was revised in Product Technology HPE Smart Array P712m Controller/256 for Server Blades, HPE Smart Array P711m Controller 1 for Server Blades and HPE StorageWorks 6Gb/s SAS BL Switch - Single and Dual Port for BladeSystems were added to Step 4c |
| 18-Mar-2011 | From Version 12 to 13 | Changed | Small Form Factor SAS Capacity was increased |

Summary of Changes

| | | | |
|-------------|-----------------------|---------|--|
| | | | SuSE Linux IA32, x64 and Citrix XenServer HPE Enterprise Edition were added to OS Support in Family Information HPE Ext Mini SAS 2m and 4m cables were added to Step 4c |
| 07-Feb-2011 | From Version 10 to 12 | Changed | HPE 450GB and 600GB 6G SAS 10K 2.5 inch DP ENT HDD were added to ProLiant Small Form Factor (SFF) SAS drives for P2000 G3 Array and the D2700 JBOD in Step 2b Note was removed from P2000 G3 Array Bundles Model HPE StorageWorks Encryption SAN Switch was removed from Fibre Channel Switches in Step 4a |
| 10-Jan-2011 | From Version 9 to 10 | Added | P2000 G3 Array Bundles was added to Models and HPE 72 GB 6G 15K 2.5 inch SAS DP HDD was added to HPE P2000 G3 and MSA2000 G2 Carrier-Grade Components. |
| 15-Nov-2010 | From Version 8 to 9 | Changed | Changes made throughout the entire QuickSpecs. |
| 15-Oct-2010 | From Version 7 to 8 | Changed | Updated the Features - Application Solutions section only. |
| 27-Sep-2010 | From Version 6 to 7 | Changed | Changes were made within the entire QuickSpecs, including removing Models and adding HPE StorageWorks P2000 G3 10GbE iSCSI Modular Smart Array Controller and HPE StorageWorks P2000 G3 10GbE iSCSI MSA Dual Controller LFF and SFF Array Systems to Configure to Order Program Information. |
| 18-Aug-2010 | From Version 5 to 6 | Added | Added new Smart Buys to the Models section in the North America and Canada versions. |
| 23-Jul-2010 | From Version 4 to 5 | Added | Added new Smart Buys to the Models section in the North America and Canada versions. |
| 29-Jun-2010 | From Version 3 to 4 | Changed | Note the title has changed. |
| 21-Jun-2010 | From Version 2 to 3 | Changed | Changes made throughout the entire QuickSpecs. |
| 29-Mar-2010 | From Version 1 to 2 | Added | P2000 1TB and 2TB 6G SAS 7.2K LFF Hard Drives were added throughout the QuickSpecs. |
