

Trust Kensington to be the first line of defense

As the industry leader we take security incredibly seriously. Our locks are thoroughly tested.

A lock is far cheaper than a new laptop and is a small price to pay for peace of mind. A Kensington lock is tested to extremely high standards in the following:

Securing a Device Has Never Been so Easy

There's a small hole integrated into the best IT hardware. It's called the Kensington Security Slot (K-Slot). We introduced it to the world in 1992 as a way to lock down your equipment.

All leading IT hardware manufacturers integrate a Kensington Security Slot into their hardware. They, like us, understand it's value.

Loop: around an anchor point

Lock: to your to your Kensington slot

Leave: you're laptop/device is now secure

Security Solutions

Whether your customer needs to protect laptops, desktop computers, tablets or peripherals, Kensington has the security solutions you need that are easy to use, yet tough for thieves to defeat.

Enterprise Security

With Kensington businesses don't get just security, they get a security partner with a 24-hour support, lifetime limited warranties, key replacement and secure management.

Master Access

Give individual employees the power to protect their laptops. Personal locks let employees work on- or off-site and protect laptops no matter where they do business—in a conference room, home office or in the airport. With a master key, your IT staff retains universal access to unlock any piece of equipment for upgrades, relocation or replacement. Master keys also offer a quick and easy solution for misplaced or lost keys requiring new locks.

Register & Retrieve

Our Register & Retrieve™ lock registration suite empowers administrators to manage their lock programmes and ensure staff benefit from Kensington support services without needing to contact their administrator.

Security Policy Download

The independent policy is written by research analysts IDC and can be easily implemented by organisations large and small.

Organisations will find that our policy document can be the catalyst of cultural change to safeguard itself, it's employees and it's customers.

Common sense policies combined with an office culture that fosters and expects lock usage can be quickly implemented. Ownership of a lock does not constitute having adequate protection opportunistic laptop theft.

Just like switching off the lights to reduce electricity use, we encourage you to set the example amongst your colleagues and throughout your organisation as so using your lock becomes second nature.

Kensington®

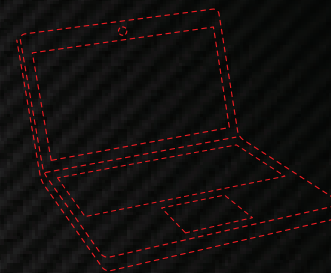

Trust Kensington® Security inventors and innovators.

NIGHTMARE. HOW DO YOU TELL YOUR BOSS YOU'VE JUST LOST YOUR LAPTOP?

The chance of retrieving a stolen laptop is 3%*, so it's good practice to lock them.

Next time you leave your laptop unattended make sure it's secured by a Kensington® ClickSafe® lock. It's the simpler, safer, smarter way of protecting your business and your credibility.
