NVS 310 FEATURES AND BENEFITS

LOW-PROFILE AND FLEXIBLE FORM FACTOR	Delivers simplified IT administration and deployment throughout the enterprise. NVS 310 fits into any existing installations without being disruptive, regardless of desktop system (standard tower PC, workstation, small form-factor system) or the display type (LCD, DLP, plasma).
INTELLIGENT POWER MANAGEMENT	Reduces overall system energy costs by intelligently adapting the total power utilization of the graphics subsystem based on the applications being run by the end user. This power-optimized design helps reduce Total Cost of Ownership (TCO) and increases reliability.
NVIDIA ENTERPRISE - MANAGEMENT TOOLS¹	Maximize system uptime by enabling seamless wide-scale deployment. Also, allow remote query and control of graphics and display settings for systems spread across your installations.
DUAL DISPLAYPORT 1.2 DISPLAY CONNECTORS (WITH AUDIO)	Provide compact and secure connectivity for ultra-high-resolution panels (up to 2560 x 1600). These connectors enable maximum range, resolution, refresh rate, and color depth to support the latest display technologies
MULTI-DISPLAY EXPERIENCE WITH NVIDIA® MOSAIC TECHNOLOGY	Offers the ideal solution for seamless taskbar spanning, as well as transparent scaling of any application across up to eight displays. Works over multiple displays or one ultra-high resolution display using a single or multiple NVS graphics cards. <i>Mosaic Technology is supported on Win 7 and Linux only.</i>
NVIDIA NVIEW® DESKTOP SOFTWARE	Delivers maximum flexibility for single large-display or multi-display options. This provides unprecedented end-user control of the desktop experience for increased productivity.
