YOUR PASSION IS OUR TRADITION

Beretta New Zealand is proud to release the third edition of our catalogue, and introduce you to the range of products and brands that we distribute.

This catalogue aims to combine modernity and tradition that is appreciated by users of our products. Whether you are a hunter, shooter, or competitor; we have tried to focus on the products that are at the centre of your passion and accompany you on your adventures.

The quality of our products and the prestige of our brands are a guarantee of longevity, quality and commitment. We make every effort to ensure that firearms, optics, ammunition, accessories, and clothing are accessible to you and offer the quality you demand.

Please follow the social networks of our brands, Beretta, Benelli, Sako, Tikka, Franchi, Uberti, Aimpoint, Burris, and Steiner.

Subscribe to our mailing list on our website berettanewzealand.com

Be informed of the latest news in real time and share your experiences with the brands you love!

Gunsmithing tradition, technological innovations, and current design combine to create this catalogue and showcase our range of products.

We hope you will find it informative and useful.

NICCOLO D'AMICO
GENERAL MANAGER

Showroom and Made to Measure Gunfitting Service.

Knowledge, skill, quality, and tradition are corner stones of the 500-year-old Beretta brand. Since the company's creation in 1526, the oldest industrial dynasty has been developing products that are truly inspiring, combining both perfect functionality and beauty.

All over the world, Beretta boutiques have been created to enable customers to share in their passion of the brand and admire the products that come under the Beretta umbrella. Niccoló d'Amico, General Manager of Beretta New Zealand, is proud to announce the opening of the Beretta Showroom in Auckland, New Zealand. *"The opening of the Beretta Showroom allows us to maximise the Beretta Experience for the customer. Ensuring they receive a product that is as personalised as the individual buying it"*.

Although the brand is at the forefront in firearm development and utilises the most advanced technology of any firearm brand in the world,

it still calls upon the experience and craftsmanship that has been passed down through the generations.

This combination of technology and expertise is the foundation of the brand and the products it manufactures. Maximising this foundation is best experienced in a Beretta Showroom, where the on-hand knowledge can be called upon by the customer.

The showroom offers the ability to hold, shoulder and discuss a number of firearms that you would be hard pressed to find outside of a boutique. This enables customers to truly come to grips with what the brand can offer from both a technical standpoint, but also in terms of quality and service. The showroom gives the customer the environment to select, discuss and have a gun personalised to suit their shooting style or personal desires.

Niccoló d'Amico knows all too well how personalised these guns can become, having previously been the Product Manager for Beretta Premium

Firearms in Italy, responsible for the production of all bespoke handmade firearms. "Beretta has always had the ability to offer this within the New Zealand market as it does overseas. However, unlike in Europe where retailers and customer travel to the factory for this experience, the 18,000km trip to Gardone Italy is slightly impractical! Our showroom now allows Europe to come to the New Zealand market, offering a level of customer service and an experience not offered by any other brand"

Customers coming to the showroom for a premium firearm can select the gun, wood grade, barrel length, engraving pattern and more. While doing this, viewing the guns on the rack to either select or to use as an example to base custom orders from.

Our in-house gun smith is also able to fit adjustable comb guns to an individual and identify any other adjustments that need to be made.

A large value-added offering of the Beretta Showroom is the made to measure service. We are able to work with specific retail partners and gun

smiths to take measurements for a shotgun and have these sent to Italy for a bespoke made to measure stock. These measurements can be sent over with wood grade requests and initials to be engraved into the butt stock oval, making these firearms truly bespoke and a family heirloom.

When visiting you will also meet the team at Beretta and appreciate that once you have purchased your premium gun, you have a team behind you to assist in any way possible. Whether it be an annual firearm servicing or a simple technical question, the Beretta experience does not end when you walk out the door.

The showroom is by invitation for those looking to purchase a Beretta Premium Shotgun. This starts at Beretta 694 level and continues up through 687 EELL, DT11 and beyond. For more information, please speak to your authorised Beretta retailer.

THE GUARANTEE OF ADVENTURE

Our products benefit from strong guarantees offered by our strong brands.

Every firearm we sell is marked with official proof marks, and is recognized by the C.I.P. They constitute the maximum safety guarantee that can be given, with these tests being carried out at pressures much higher than those which can be developed by ammunition currently being used.

Damage resulting from abnormal use, misuse, or lack of maintenance is excluded from the warranty. In addition, the guarantee can not be put into play if modifications have been carried out without our written authorisation. Problems or accidents resulting from negligence, condition of storage, lack of maintenance, or use outside of the products intended use is not covered by these guarantees.

The warranty is limited to the replacement of parts and / or products that do not conform to the technical specifications indicated in the manufacturer's operating instructions and only take effect from the date of delivery. Wood and plastic parts are not guaranteed. The warranty is only applicable to the original purchaser, from the date of the first purchase, (the date of the invoice). Finally the parts under warranty that are being exchanged must be returned.

All return shipping must be paid by the claimant, unless agreed otherwise. In no case will our products be taken back or exchanged without our prior approval.

In order for Benelli shotguns to qualify for the 10 year warranty the purchaser must register their shotgun online at <https://www.benelli.it/it/login> within 30 days of purchase.

Benelli B.E.S.T treated barrels and parts (available on specific models) are warranted against rust and corrosion for 25 years from date of purchase if the firearm is registered within 30 day of purchase.

Full warranty provisions available at <https://www.benelli.it>

NO RETURNS WILL BE ACCEPTED WITHOUT OUR PRIOR AGREEMENT.

A deep love for nature and outdoor life, a constant search for innovation, a particular attention to detail, and an ever renewed enthusiasm for quality and unique style without limits.

These are the fundamental values that guide us, and that you will find in Beretta products.

For five centuries, we have been with you, we share the same passions, we make sure to serve you with enthusiasm and dedication by offering authentic, beautiful, and reliable products.

We welcome you to the Beretta world.

Please keep the original receipt indicating the store and the date of purchase. This is necessary when requesting warranty repair services.
Prices displayed in this catalogue are recommended retail prices (RRP) and for indicative purposes only. Prices displayed may not accurately represent prices in store or online.
Prices are displayed in New Zealand Dollars and are subject to change without notice.

BRX1 Linear Reloading System

- Very fast and instinctive linear reloading system.
- Back + forward sliding easy movement, no rotation
- Lever/bolt handle is right above the trigger
- Bolt handle features 45° angle and ergonomics for perfect fast reloading
- It does not jam even in very fast reloading cycles

Interchangeable barrel of different calibres

- Barrel and calibre are interchangeable on the rifle, same rifle, different calibres
- Easy and fast to change and assemble
- Thanks to its bedding geometry every barrel always stays in the same position to guarantee 3 SUB MOA accuracy even after new assembly
- Scope remains assembled on the barrel when changing calibre – this prevents losing the optic regulation and subsequent accuracy

3-position manual Safety:

- Fire & reload
- Blocked trigger & operating bolt for safe load/unload
- Blocked trigger & blocked bolt

Trigger:

Adjustable on 3 positions (~1,0 ; +0,2 ; +0,2 kg)

Magazine Reload:

Possibility to reload from top or simply by switching or inserting a full new magazine

Ambidextrous Bolt handle:

- Easy and fast to swap for left to right
- No tools required
- Bolt handle position right on top of trigger for faster reloading

Polymer composite stock Adjustable LOP with spacers and functional texture

Right-Hand & Left-Hand cartridge ejection:

- Ejection side can be selected by disassembling and turning the bolt head 180°
- No tools are required
- Ejection side is independent from the bolt handle position

M14 Threaded barrel With Barrel-thread cover 16mm barrel profile

BRX1 - STRAIGHT PULL RIFLE

RRP From \$2,899

AVAILABLE IN 308 / 30.06 SPRG / 300 W.MAG

- Weight: 3,3KG (with 22" barrel & no scope)
- LOP: 365mm with 1/2" spacer (12,7mm spacer)
- OAL (over all length):
 - 114,5cm (62cm barrel magnum calibres)
 - 109,5cm (57cm barrel standard calibres)
- Muzzle thread: M14
- Mag. capacity: 5 shots Flush (Magnum cal. Included)
- Adjustable trigger in 3 weights starting from 900g up to 1500g*
- 3 interfaces for optic mounts
 - Picatinny
 - Tikka 17mm dove tail
 - Beretta Quick Detachable

LOAD YOUR INSTINCT

9 REASONS TO CHOOSE BERETTA SEMI-AUTO TECHNOLOGY

- 1 PERFECT PATTERNS ON EVERY SHOT.**
The ingredients of the great accuracy of the Beretta Steelium barrels are: the exclusive tri-alloy Beretta Steel (Ni, Cr, Mo), the deep drilling, the cold hammering process and the vacuum distension. Every OptimaBore HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shells: lead, steel and steel High Performance.
- 2 THE BEST RECOIL REDUCTION.**
Kick-Off, Kick-Off Plus and Kick-Off Mega ensure you up to 70% recoil reduction giving you more stability, comfort and control for faster target acquisition. More comfort for you, especially when you enjoy shooting hundreds of shots in a single day, and enhanced durability.
- 3 CLEANER THAN EVER AND EASIER TO CLEAN.**
With B-Link, the only weak point of the gas-operating system has been practically reduced to zero. The re-engineering of gas ports and the systematic reduction of all the mechanical frictions reduce dirt to the minimum terms. You will experience the lowest maintenance need ever, and a smart, easy, fast and secure cleaning.
- 4 ALL-LOAD PROVEN RELIABILITY, FROM 24 G. TO 64 G.**
Beretta gas-operating system B-Link is world's most reliable system. The closing force is stronger because, when the reloading cycle begins, the energy available to unlock the bolt is significantly higher. Higher energy when opening allows higher closing force, preventing the bolt to unlock when it is not supposed to do it.
- 5 UNBELIEVABLE RELOADING SPEED (+36%).**
The Beretta gas-operated system is fast like an eye's blink. That's why it's called B-Link. The power of the gas-system, combined with the precision of the rotating bolt, ensure you a fast, reliable and smart cycling. You can spend all your magazine's cartridges before the 1st round touches the ground.
- 6 COMFORT AND EASY TO ASSEMBLE.**
The MicroCore® pad is softer than gel, lighter than rubber and perfectly slipping. It's available in several dimensions to customize your length of pull. The magazine cap allows a quicker and better safety check on the shotguns magazine. The B-Lok cap, the magazine cap exclusive to Beretta, ensures a perfect and secure closing with just 60 degrees of rotation instead of multiple turns.
- 7 LOWEST MUZZLE JUMP.**
Beretta semi-auto shotguns give you the lowest muzzle jump ever combining the stunning recoil reduction of the Kick-Off devices with the unique ballistic features of the Steelium OptimaBore HP barrels. More control after each shot, better performance for each next one.
- 8 ERGONOMIC AND EASY TO OPERATE.**
The extended bolt handle and bolt release low profile lever allow for easier manipulation during the coldest and rainiest days. An enlarged loading port facilitates an easier and quicker reloading. The new extended lifter avoids thumb bite or glove catch while loading the gun.
- 9 DESIGNED FOR THE FUTURE, NEVER FORGETTING TRADITION.**
The Beretta in-house design team works every day to match design with functionality, giving you original and aesthetically beautiful, simple solutions that optimize the shape, weight and ease of use.

INTRODUCING THE NEW

NEW FOR 2023

A300 ULTIMA™

KICK-OFF RECOIL SYSTEM
Beretta's Kick-Off recoil reduction system provides enhanced stability, comfort, and control for faster target acquisition

ENLARGED CONTROLS
Larger bolt handle and bolt release for easy manipulation in adverse conditions

WIDER STEPPED RIB
High rib with included mid-bead and fiber optic front sight

A400 Xtreme PLUS

Beretta A400 Xtreme Plus. The evolution of the world's softest shooting waterfowl shotgun.

Available in Black Synthetic, Max5, or Optifade Camo - the A400 Xtreme Plus is comfortable, powerful, and reliable.

It features the latest technical innovations including;

- Optima Bore Steelium Plus Barrels, for tight shot patterns and long barrel life. Steel proof.
- Kick-Off3 Cube for the ultimate in recoil reduction.
- Long 360mm forcing cone improves shot pattern, consistency, and accuracy; while reducing recoil.
- Extended charging handle and bolt release for improved handling.
- Enlarged loading port and coloured magazine follower for easy loading and to enable the shooter to easily identify when the gun is empty.
- Competition style steel mid-bead and fibre-optic front bead on a 7x7mm stepped rib.
- Rubber cheek piece to cushion recoil on the shooters cheek.
- Exceptional corrosion resistance.

1 KICK-OFF

Best Recoil Reduction System in the world: -60 %

Kick-Off® is the only recoil reduction system in the world that uses two hydraulic dampers similar to those used for suspension in cars. All other systems on the market are based on the deformation of soft materials like rubber, polyurethane or polymer inserts.

What's the difference ? Imagine driving a car with rubber suspension!

2 Micro Core

Another leap forward in flexibility

Micro-Core is an innovative expanded polymer, developed by Beretta after decades of experience shooting around the world.

This new base plate, when subjected to pressure during firing gradually relaxes while simultaneously increasing the contact surface with the shoulder.

This reduces felt recoil and increases shooter comfort.

3 BLINK

High Speed Mechanics

Reliable speed and unequalled performance.

Blink is the new engine of the A400, the result of the integration between the new Beretta gas-operated, rotary-head locking system and a new fuel system. The new gas-operated system is equipped with an innovative piston with a scraping elastic o-ring which also acts as a seal. Blink is therefore more powerful and much cleaner.

36% faster cycling than any other semi-automatic. The mechanics of the A400 is a true engineering jewel and is unlike any other shotgun on the market with its outstanding reload speed.

Being the fastest to make the next move will increase your chances of hitting your target. With the Beretta A400, this is possible.

4 OPTIMA BORE HP

Designed for Steel

The unique Optima-Bore® HP geometry is designed to provide the best performance even with HP steel shot.

The spray remains perfect and uniform thanks to the use of HP Optima-Choke® chokes.

5 STEELIUM PLUS

Steel Technology

Steelium is a technology used when producing Beretta firearms. Beretta's special tri-alloy steel is used and ensures barrels are of exceptional quality. Through deep drilling, cold hammering, and special vacuum expansion - our Tri-alloy steel acquires the ideal characteristics that offer the best ballistic performance available today.

Steelium Plus has all the benefits of Steelium, plus a tapered internal profile of 360mm for even smoother pellets dynamics and ultimately better shot patterns.

6 KICK-OFF³

The only device in the world that acts on the second peak of recoil

Laboratory tests have shown that the recoil has two distinct components: the explosion of ammunition at the moment of firing (1st peak of recoil) and the impact of the bolt carriage against the receiver during the reloading phase (2nd peak).

Kick-Off 3

Is a 3rd hydraulic damper acting on the 2nd peak of recoil. As a result, wear of the mechanical parts is greatly reduced, increasing the longevity of the firearm and decreasing felt recoil.

7 UNICO

Universal Chamber :

Exclusive Beretta technology ensuring excellent performance with all types, and weights of ammunition from 24 to 64 grams.

A400 LITE COMPACT YOUTH

A400 LITE SYNTHETIC OR MAX5

The A400 LITE is a 3" chambered shotgun combining Kick-Off Plus recoil absorption (-50%) and Beretta Steelium barrel technology. It's light weight thanks to the technopolymer stock construction. The LITE is the perfect blend of strength, agility and precision featuring a Short fore-end, 3 kg weight, S-Grip for excellent grip, an ergonomic stock, and Kick-off Plus recoil reduction.

Kick-off Plus: Two new high-tech recoil absorption cells that combine an impressive reduction in recoil with a significant reduction in weight. Recoil -50%

Super Ergonomic Stock: When shooting, the cheek remains resting on the stock, increasing stability and allowing faster and more accurate follow up shots.

S-Grip: The high-tech technopolymer stock & fore-end have a new checkering pattern; the S-Grip, designed to increase the performance, grip and feel of the shotgun.

Short Fore-end: The new fore-end has been shortened to reduce weight on the front of the shotgun, improving balance and speed of handling. The 3kg weight makes the A400 Lite Synthetic very light when taking into account all the technical advances and features built into the shotgun.

Beretta Ultraleggero THE LIGHTEST STEEL SHOTGUN IN THE FIELD

Like all Beretta Shotguns, the Ultraleggero is a work of art, providing balance and reliability in the field, with one major difference. The new Ultraleggero provides all the benefits of a Beretta Sporting Shotgun, without the weight. Based on the popular 690 platform, with features and innovations seen in the 694, the Ultraleggero has been developed and engineered to be a truly unique firearm. At under 3kg, every component has been studied and redesigned to reduce the weight without compromising performance. The Ultraleggero has been trimmed of over 400grams of weight*. From the extra-light recoil pad and select walnut stock, through to the steel receiver with carved sides and bottom, aluminum forend system, and optimabore HP barrels, every individual element has been carefully designed. As an added feature, the unique action has techno-polymer side plates that can be printed in multiple designs. Aiming for innovation. Aiming for lightness. Aiming to amaze you.

EXTRALIGHT® RECOIL PAD

- 30% lighter than a standard recoil pad
- Much more resistant to abrasion, aging and the elements
- Closed cell structure that avoids liquid absorption
- Delivering comfort, stability and excellent recoil absorption

THE LIGHTEST STEEL SHOTGUN 2.8kg

Thanks to the carved steel receiver, OCHP barrels with no side ribs, stock with increased cavity and the aluminum forend iron system and trigger guard.

CHAMBERED FOR EVERY CARTRIDGE

76 mm chamber to shoot magnum cartridges with lead shot, steel shot, steel HP shot.

INNOVATIVE DESIGN

Techno-polymer inserts with a cutting-edge floral motif.

STRENGTH MADE LIGHT

Key Features:

- Full steel receiver with weight saving cut-outs
- Lightweight barrels in either 28 or 30"
- 2.5 grade Turkish walnut stock
- OptimaHP choke technology
- 2.8kg total weight

SILVER PIGEON I

With over 2M pieces made, the BERETTA Silver Pigeon is famous around the world for hunting, sport shooting and competition. The patented latch and locking system make Beretta shotguns highly reliable, robust and exceptionally manoeuvrable. The internal mechanisms, also patented, allow the shooter to obtain quick starts and feature an extremely fast ignition lock time. The closing lock automatically catches every time. The barrels are manufactured from high-quality steel and are cold hammer forged.

687 FIELD

THE ULTIMATE EVOLUTION OF THE LEGEND
687 SILVER PIGEON V

THE HUNT FOR STYLE AND PERFORMANCE

The Silver Pigeon evolves with the new V version. A beautiful symbol of efficiency and reliability inherited from the 680 platform, with minimum maintenance requirements.

Characterised by a new look, together with a superior wood grade, hunters will love this gun even more. The fine engravings are made using state-of-the-art 5-axis laser technology and feature deep scroll engravings with modern floral details. The engravings are further embellished by a special sparkle in the bas-relief areas, creating a contrast effect, and highlighting the deep scroll motifs.

The exquisite gloss finish enhances the grain of the stunning grade 3 wood and protects it from rain and humidity. Superior quality envelopes every feature of the Silver Pigeon V. Combined with superior features are the excellent ballistics guaranteed by the Steelium Optima-bore HP tri-alloy steel barrels. The new model features a gold-plated single selective trigger located inside the safety tang it allows the user to select the barrel for the first shot with a simple quick sideways movement.

Available in the Hunting or Sporting versions in gauges 12 and 20, the 687 Silver Pigeon V is the shotgun for those who like to stand out with a gun that has never stopped evolving over the course of 30 years. An icon of quality and elegance; almost at the same level of a premium gun.

MAIN FEATURES: Selected walnut, grade 3 wood, Round Forend design, Gloss and water-repellent wood finish, High contrast deep scroll engraving, Nistan finish, 76 mm (3") chamber and Steelium Optima-bore HP barrels.

FIELD FEATURES: 6x6 top rib, Wooden butt pad, Available barrel length: 71-76 cm / 28"-30" and Internal Optima-choke HP chokes.

687 EELL models are the top of the line Beretta Shotguns

They feature sideplates that act as extra canvas for the lavish hand-chased engraving, as well as a specially-selected walnut stock that gives it a true heirloom quality. While the 687EELL certainly figures well while on display, the 687EELL's worth as a game gun is equally striking. With the point of balance right at the hinge-pin, it is a shotgun that comes up naturally to the shoulder while still having enough of a lively feeling forward of the supporting hand. This is an over-under with the feel and allure of a classic, for the discriminating hunter who appreciates all the finer points of a perfectly-made premium gun.

The Beretta SL3 is a new era of high-end shotgun.

Combining the latest technologies available from across the different Beretta product families.

The result is a fusion of outstanding performance in the field, and an elegant aesthetic. Handcrafted in Gardone Val Trompia by our most talented gunsmiths whose craftsmanship, passion, and pursuit of perfection is brought to life in our premium gun shop.

Technical Characteristics

The new SL3 platform is an elegant and reliable box lock system designed to provide the best performance in the field and withstand intensive use.

- Featuring a unique design, the action of the SL3 offers a perfect action / barrel locking system, increasing the robustness and rigidity of the platform.
- The barrels are anchored in three distinct points; hinge pins, lower hooks and locking pins. The opening and closing of the shotgun will remain fluid and effortless over time.
- The firing mechanism is quick and precise thanks to the special leaf spring used in our luxury hunting and competition shotguns.
- New ejector design is even more reliable and easy to clean.
- Optima Bore HP Barrels. The main ingredients behind the astonishing performance of Beretta Steelium barrels are:
- Exclusive Beretta Tri-Alloy (Ni, Cr, Mo) Steel is used for the barrels. Barrels are cold hammer forged.
- The Optima HP Bore Profile has been specifically designed to provide excellent patterns with every type of cartridge: lead, steel and other lead alternatives.
- Design. The rounded and fluid design of the SL3 opening lever underscores the shotguns profile, improving its graceful appearance while aiding in quick target acquisition.
- The unique shape of the opening lever has been designed to perfectly compliment the elegant lines of the receiver.
- The rear end of the opening lever is tapered, gently flowing into stock.
- A newly designed trigger group gives the SL3 a contemporary look. The engravings are created with the best and the most modern of Beretta technologies: a 5-axis laser capable of engraving rounded surfaces with a perfect continuity of the pattern.
- You can choose from three different engravings designed by the Beretta Master Engraver. The SL3 is also available in a polished mirror version, requiring hours of polishing by hand on each surface.
- The SL3 is the first Beretta shotgun supplied with a dedicated suitcase and manufactured entirely by hand in our new workshops.

Exclusive to Beretta Premium Shotguns

Leather Beretta Premium accessories that celebrate Beretta's legacy and also reflect the stunning attention given to detail that characterizes the Beretta Premium philosophy.

A touch of class

The ergonomics of the leather handle and perfect balance of the case make it comfortable and easy to carry, while offering your shotgun the best protection. All cleaning accessories are included in a beautiful leather pouch.

Beretta is the only manufacturer in the world that has retained the skills and know-how to produce high quality, fine shotguns with side-locks that are much sought after by connoisseurs around the world.

Made by gunsmiths of great talent and engraved by master engravers of great renown, these beautiful shotguns are real works of art. The range is available in SO6, SO10 and SO5 models. Both Optima Choke version and fixed choke versions are steel shot proven. These shotguns are made by special request, with a choice between an English buttstock or Burl walnut stock. The price is dependent on the type of engraving.

S010 EELL

Seventy years after the first modern Beretta over-and-under (the model S1, launched in 1933), a new sidelock shotgun was born. The S010 over-and-under is the deserving successor of the famous Beretta SO series of hunting and competition shotguns that have earned their reputation as the most functional, elegant, and exclusive over-and-under in the world. Now the S010 is regarded as a true modern classic, with the lines of its receiver redefining elegance in a hunting shotgun. This premium shotgun comes in four action sizes, each efficiently sized for a different gauge. Available in 12, 20, 28 and .410 chamberings, offering owners the most exquisite proportions in a game gun. Add to this the premium wood that is individually sized to the customer's specifications, and the S010 is the veritable pinnacle of shotgun craftsmanship and the crown jewel of any exclusive gun-room.

486

by Marc Newson.

What happens when the worlds oldest firearms company offers the design of the most traditional and the most elegant side by side?

A work of art is created. The new 486 by Marc Newson is a faithful reinterpretation of a traditional side by side, with innovative technical solutions improving the performance, look, and feel. The traditional tail of the rocker has been shortened allowing the fine wood to separate the rocker and the Selector / Safety. This unique design makes the 486 very elegant and immediately recognisable. Engraving is a special tribute to Asia - the country of origin of the pheasant. This unique design is made possible thanks to high-tech laser technology which is used in the manufacturing process.

The new opening key has been specially designed to emphasize its independence from the rest of the shotgun. While most shotguns have the trigger guard screwed to the back of the scale, the Beretta 486 inserts the trigger guard into a countersunk guide, providing a perfect junction of both surfaces which adds greater aesthetic value to the gun. Features elegant Grade 4 wood with a wooden butt plate.

Marc Newson has been described as the most influential designer of his generation.

A400 XCEL MY2020

The A400 Xcel is a 12-gauge competition shotgun that is faster-cycling, softer-shooting, and better balanced than anything else on the market. Built on the revolutionary A400 action, it delivers follow-up shots 36% faster than any other brand, while its advanced recoil-reducing systems make it absolutely pleasant to shoot even on demanding all-day competitions. Its sleek lines and superior ergonomics are designed with one goal in mind: letting the A400 naturally follow your eye to the target. This is why it has quickly become a favorite among serious competitive shooters the world over.

GunPod 2

Totally new feature combining a downloadable application on smartphone, a GPS function, a shooting counter, a photo and video function related to shooting and sharing on social networks via bluetooth.

Kick-Off PLUS

Two hydraulic shock absorbers for the best recoil reduction performance in the world (-60%), and a reduction of the muzzle rise of the gun when firing.

B-Link

Beretta gas-powered system, rotating head, and new gas operating system: unmatched speed, reliability and performance.

Steelium

Beretta's special steel, deep drilling expertise, cold hammering, and vacuum tempering combine to make the best shotguns in the world.

Microcore

Optimum flexibility, lightness and fluidity for a better comfort and a perfect shoulder.

Optimabore HP

The special Optima-Bore HP geometry was conceived to offer the best performance even with steel shot. The shot pattern remains perfect, uniform and consistent.

Balance Cap

The Balance Cap System has three interchangeable weights that allow the shooter to weight the shotgun to become an extension of himself. Anodized finish on the cap.

686 SILVER PIGEON I SPORTING VITTORIA (LADIES)

The new Vittoria series is the first Beretta shotgun range specifically designed for women. Developed with input from champion lady pro-shooters, the Vittoria series shotguns feature dedicated ergonomics to ensure a smooth, comfortable and precise handling. The stocks have been completely re-engineered to fit a women's dimensions. Made of beautiful grade 2.5 oiled walnut, the length of pull is reduced and the comb features a semi-Monte Carlo design with a slight drop and additional "toe-out" cast. The checkering on both the stock and the fore end are extra fine for added comfort during a long day of training or competing. The 690 Sporting Vittoria is built on the same durable, heirloom quality receiver and cold hammer forged Steellium barrels as the standard 691, features a sporting vent side rib and tapered top rib and extended Optima HP chokes. The attractive contemporary scroll engraved receiver is coated in a solid and durable Nistan finish providing excellent resistance to corrosion. The low profile receiver ensures a quick mount and good fit ensuring maximum clay breaking success. Vittoria shotguns perfectly fit smaller frames while offering full-size performance.

Exceptional Quality for Exceptional Performance

The performance and reliability of this sidelock shotgun is the result of the quality of materials used, individual craftsmanship and the precision of the manufacturing processes. Barrels are constructed of cold-hammer forged Boehler Antinit steel, ensuring perfect alignment of the tubes, exceptional strength and long-lasting corrosion resistance. They are carefully tested and checked for ballistic performance and consistency of shot pattern. To minimize locking stress while shooting, the cross-bolt locking system operates on Monobloc lugs positioned at the height of the upper tube axis. Locking shoulders are replaceable.

Premium Pointability, Customizable Stock Dimensions

The low-profile sidelock action body is exceptionally sleek to enhance swing and pointability in the heat of competition. The true sidelock design is reliable because it is simple, and has been renowned for at least two centuries for its extremely quick lock times and ultra-crisp trigger pull. The side plates are beautifully hand engraved with a light scroll pattern and finished to Beretta's extremely high custom standards. The S05's competition pistol-grip stock and fore-end feature left- or right-hand palm swells and are crafted from carefully selected, highly figured walnut. They can be sized and tailored to the shooter's individual dimensions and preferred configuration. Each is finished and checkered by hand with the utmost care. S05 Competition shotguns are available, on request, with fitted stock blank and/or removable side-locks.

Available in Trap, Skeet and Sporting Clays Configurations

The S05 Trap features a single, non-selective trigger, an International-style or Montecarlo stock with special trap rubber recoil pad and heavier Beavertail competition fore-end. The barrels are specially weighted to afford the perfect equilibrium for Trap shooting. The Skeet model has a competition skeet stock with deep diamond hand-cut checkering and a heavier beavertail fore-end. Hand-checkered buttplate or special rubber recoil pad are available on request. The short barrels and light weight enhance swing and pointability. They can be ordered with special Skeet chokes or interchangeable Mobilchoke® tubes. The S05 Sporting features a single selective trigger, stock with special anti-recoil rubber pad and Schnabel fore-end. Barrels are medium weight and have Mobilchoke® choke-tubes, which can be changed quickly and easily. This model can be supplied with the new Optima-Bore® barrels that enhance felt recoil reduction and, thanks to the new Extended Optimachoke® tubes, improve shot pattern concentration and distribution.

The NEW 694 is designed to bring a whole new level of performance to competition shooters.

It is the successful combination of tradition and technology, combined to offer superior ballistics and ergonomics, with an elegant design that makes this shotgun absolutely exceptional. With many new features - the NEW Beretta 694 is built to win.

Steelium Plus barrels feature a forcing cone that is 5x longer than the Steelium barrels, offering a significant improvement in shot pattern and consistency.

New shape & engraving design. New extractor system. Improved feel when opening.

New Stock Design
Offers better peripheral vision & a new pistol grip shape for improved ergonomics.

Redesigned Steel Opening Lever
Low profile with an anti-glare finish

New Safety Design
Redesigned barrel selection button. New checkering. Improved ergonomics.

New Fore-end release Button
Reduces movement of the fore-end over time and is self adjustable.

Better weight distribution + Lower internal barrel pressures = Optimised shot pattern and consistency + Improvements from the front to rear = Perfect ballistics performance

B-FAST Beretta Fast Adjustment System Technology (B-FAST) is a system combining modular control systems specifically designed for Beretta competition shotguns.

B-FAST Comb Riser The comb is adjustable for height and pitch.

Steelium Plus Barrels Less recoil, therefore faster acquisition of the target for the second shot. Increased precision and improved shot pattern.

Wider Receiver For improved balance when mounting the gun. Faster target acquisition and follow up shots.

The design of the receiver is elegant and technical, with a polished profile on the flanks and the underside. The steel opening lever has been enlarged and redesigned for better control when breaking the gun. The barrel selection button features new checkering and has been improved to only allow it to operate when the gun is safe, to avoid accidentally activating the selector while opening the gun. The pistol grip has been redesigned for better ergonomics and feel, while the fore-end latch has been redesigned for longevity. Combined with premium Steelium Plus barrels the new Beretta 694 is built to win.

PERFORMANCE AT EVERY LEVEL

At Beretta, we understand that the right gun can make all the difference.

From the Silver Pigeon I to the 694 to the DT11, our Steelium barrels ensure a more gentle shot with better consistency. With each advancement, a higher grade Steelium barrel means an even more consistent patterning when your shots hit their target. Steelium, Steelium Plus and Steelium Pro, when you need the extra edge, Beretta provides a complete range of competition shotguns to suit any discipline and any budget.

It's all about you!

The ingredients for the stunning performance of the Beretta **Steelium barrels** are: the exclusive tri-alloy Beretta steel (Ni, Cr, Mo), the deep drilling, the cold hammer forging, the vacuum distension and the 80 mm extended forcing cone. The inner profile of the OptimaBore HP barrels has been designed and tested to provide perfect accuracy with every type of shells: lead, steel and High Performance steel. This results in perfect patterns on every shot.

The **Steelium Plus** barrels have a triple forcing cone that reaches a length of 320 mm (in a 76 cm barrel). In **Steelium Pro** barrels, the length of the forcing cone is further extended, up to 450 mm (in 76 cm barrels). This progressive inner profile of the barrel provides smoother shot with reduced muzzle rise and guarantees perfect, dense and uniform patterns with any type of ammunition.

* The indicated lengths are based on 76 cm barrels.

DT11 BLACK EDITION

Beautiful contrasts between the matte and polished surfaces, the trunnions, and the shiny black logo give a very refined shotgun. An elegant matte look is extended to all components and the finishing of the guns is entirely in line with the style of the gun. The detachable trigger group and the 10x10 band are all carbon, which saves about 140g (sporting) and 220g (trap) on the total weight of the shotgun. The B-Fast balance system allows the shooter to adjust the weight and balance of the gun to transform it into a unique and truly customised piece.

The balance and feel of the shotgun can easily be adjusted and customised simply by fitting additional weights into the stock. (10 grams each & included with the gun), or by adding weights to the fore-end.

The DT11 Black Pro is the result of a collaboration between several Beretta shooting champions and is designed to offer the shooter maximum capability to customise the balance of the gun, and the stock fit to the shooter.

The DT11 Black Pro retains all the features that made the DT11 Black Edition so successful, but also adds a new removable weight system to the front of the barrel and the new fully adjustable TSK stock. The Beretta TSK stock is highly adjustable and is perfectly adaptable to the requirements of any shooter. The length, angle, recoil pad angle, and the comb height are all easily adjustable by the shooter.

AUTO-ADAPABILITY.

Tsk stocks offer your firearm a whole new world of versatility and customisation, allowing you to adjust your comb, stock length, cast and more all with ease. Without a doubt, TSK have become the gold standard for adjustable stocks, and we have multiple TSK stocks to choose from, allowing you even more control over your gun of choice.

COMPETITION STOCKS

TSK STOCKS

TSK adjustable stocks are manufactured entirely in Italy using only top-quality materials.

TSK stocks are highly-adjustable competition grade stocks. Designed to allow a perfect fit between the shooter and their shotgun.

TSK stocks are user adjustable for Length, Comb Height, Cast, Pitch, Drop at Heel, Butt Pad height/angle and more. All structural elements are made from solid high-strength yet light-weight alloys. The screws are stainless steel with appropriate Heli-coil inserts for added strength.

The butt pad is a supple elastomeric resin providing maximum comfort.

Both the grip and comb are made of a high-grade walnut. The weight is approx 940 grams. TSK uses high-tech surface treatments, modern design, and meticulous attention to detail to create the best competition stocks in the world. Available to suit a range of shotguns of various makes & models.

TSK stocks are now available with "RR Recoil Reduction", which simply put is the best reduced recoil adjustable stock available. When using it, you can control and check the recoil absorption. In addition to that, the shooter will experience no jump, and no spring effect. While the gun shoots, the butt plate and comb stay still as recoil is reduced by TSK polymer technology which allows the stock to compress up to 8 mm during firing.

Available in Right or Left Handed, Black or Silver colours, and sizes Short, Medium, and Long.

Brand	Model	RRP Std From	RRP with Recoil Reduction

MATTARELLI TRAPS

ITALIAN MADE QUALITY

Mattarelli traps have long been regarded as the best trap machines in the world, being used across a myriad of international competitions as well as national competitions right here in New Zealand. The innovation, simplicity and robustness of their designs ensures unparalleled reliability and longevity. No matter what your needs are, there is a Mattarelli trap machine available covering all disciplines from the Olympic disciplines to D.T.L., as well as Sporting. Mattarelli produce 220/240V solutions as well as 12V for those ranges without mains power or that need more mobility with their traps. Backed with ELFIPA sequencers & electronics, you can't go past a Mattarelli solution for your club.

OLYMPIC LINE

Mattarelli is known worldwide for manufacturing the most precise and indestructible trap machines and are the favoured choice of many international shooting ranges and international competitions. All of our Olympic traps run on leaf springs for more precise and consistent trajectories. Coupled with ELFIPA or Elettronica Progetti electronics we can offer a turn key solution for your shooting range update. All of our traps are also available in 12V for those more remote installations.

SPORTING LINE

Mattarelli's sporting machine line-up is derived from the ever reliable and indestructible Olympic traps blueprint and provides years of reliability and extremely low maintenance. Mattarelli traps are built simple with few moving parts to make servicing a breeze. All traps are available in 220V or 12V power and can easily be connected to a myriad of release systems to automate your range. These traps are suitable from the home/farm set-up all the way to a world class sporting layout.

Beretta firearms have been adopted as a standard issue firearm by many armed forces, special forces and police services around the world.

The largest military contract for handguns since the Second World War was won in 2009 by Beretta, to supply US forces with the 92FS semi-automatic pistol, widely recognised as the most widely used pistol in the world, with millions of units sold.

The most recent generation of semi-automatic handguns manufactured in a modern technopolymer, have seen the emergence of a new quality standard with the launch of the new range of Beretta APX pistols.

1301 TACTICAL

Compact and lightweight, the 1301 Tactical gas-powered shotgun was developed to run a wide range of cartridges (from 24 grams).

Ambidextrous and oversized safety button on the right-hand side, Ghost ring sights, oversized and rounded cocking handle to improve grip with gloves, new grip surfaces for better grip and an oversized bolt release button for one position fast closing.

RRP	\$2,599

APX STRIKER

APX - A1 NEW

THE BERETTA APX A1 is the next evolution of striker-fired pistols made by the longest-standing name in firearms. Built on the heritage of the original APX platform that passed MHS testing for the US Army, the APX A1 delivers a crisp, class-dominating trigger, improved ergonomics, aggressive slide serrations, and MRDS Optics cuts right out of the box.

The ultimate convergence of Form, Function & Fortitude, the Beretta APX A1 takes the proven ergonomics, reliability, and accuracy of the APX family and delivers a superior firing solution – from the casual shooter to the most demanding professionals in the world.

BEST-IN-CLASS TRIGGER

• A crisp, class-dominating trigger features a light pull, clean break, and a short reset for fast target engagements.

RED DOT OPTIC-READY SLIDE

• The red dot optic-ready slide lets you easily install a wide range of optics to your training or home defense setup for quicker target acquisition when it matters most.

IMPROVED SLIDE DYNAMICS

• Aggressive slide serrations let you rack, and press check even in extreme conditions. The Aquatech Shield coating improves corrosion and chemical resistance, while the black serrated rear sight and tritium front sight gives the perfect sight picture in any lighting conditions.

AMBI-CAPABLE

• Ambidextrous controls are configurable for right or left-handed shooters, with both the slide and mag release able to be easily setup depending on the shooter's needs.

ERGONOMIC GRIP

• The 360-degree extended textures are right where your hands use the greatest amount of pressure, and enhanced texturing gives you a more consistent grip every time. Improved Ergonomics include a higher undercut trigger guard, enhanced beaver tail, and modular grip panels for length of pull and palm-swell customization. All these features help maximize surface contact and achieve a higher-tang grip for a more natural shooting position and better recoil control.

MODULARITY

• The modular frame comes with three interchangeable backstraps so it can contour to the hands of any shooter in minutes for a better feel, and greater recoil management.

APX - BERETTA STRIKER PISTOL

The Beretta APX semi-automatic pistol uses a removable serialized chassis. It can be easily customized by changing the polymer frame, and its disassembly and maintenance are simple. Ease of use was a critical point in the development of APX. The low profile and clean design of the APX make it easy to carry and remove from the holster. The magazine release is reversible in order to suit both right and left-handed users. The lightweight and durable polymer casing utilizes modern thermoplastic technology through the use of fibreglass reinforced technopolymer to make a durable and lightweight pistol.

The Beretta 92FS has been setting the standards for the best military, police and tactical pistol for over a quarter century.

The reason is that it was designed—and has kept evolving—to be and remain the most accurate, durable and reliable semi-auto handgun on the market. Easy to use, absolutely safe and delivering impressive firepower, it remains the sidearm of the US military and of allied forces the world over, as well as of countless police and law-enforcement agencies.

92FS

A legendary firearm, the service pistol used by military and police forces around the world, including the US Marines Corps, the Spanish Civil Guard, Italian carabinieri, Italian army etc. Large capacity 15 round magazine, total security (triple safety) and excellent ergonomics.

Weight	975 g
RRP	\$1,899

Chambered in the powerful .40 S&W, the **96A1** is an evolution of the legendary 92FS (M9), one of the world's most successful pistols for military and law-enforcement. It comes with two 10-round magazines to deliver impressive firepower. It is safe, accurate and reliable while offering easy operation, accessory attachment and disassembly; and its durability is further enhanced by a recoil buffer that greatly diminishes component stress. A pistol that bears the unmistakable Beretta looks, it is the ultimate choice for shooters.

Calibre	40 SW
Mag Cap	12
Action	Single/double
Length	217 mm
Barrel	125 mm
Width	38 mm
Height	140 mm
Sight Radius	155 mm
Weight	975 g
RRP	\$1,899

92X PERFORMANCE

The 92X Performance was created to satisfy two requirements: Speed and accuracy. Beretta's new competition pistol is uncompromising and aims for top performance, offering the world of competitive dynamic shooting one of the most reliable and world-renowned locking systems, together with a steel frame, a heavier Brigadier slide and the new Extreme-S trigger mechanism.

Calibre	9mm Para
Mag Cap	15
Action	Single/double
Length	222 mm
Barrel	125 mm
Width	48 mm
Height	137 mm
Sight Radius	155 mm
Weight	1350 g
RRP	\$2,999

The raised frame profile near the magazine release enables the shooter's hand to sit as high as possible on the hilt, which itself is also oversized to enable a deeper hold. The magazine release is oversized and reversible and an adjustable version is available on the aftermarket. Safety on the frame is ambidextrous and is available in three different size profiles, making it adaptable to various hand types and different IPSC divisions.

92X PERFORMANCE - Faster cycle time To enable even faster cycle time, the 92X has a skeletonized hammer with a competition standard hammer spring. The new Extreme-S trigger mechanism keeps the striker automatic safety latch active ensuring the safety of the pistol in case it falls but decreases trigger reset by up to 40%. With the Extreme-S the 92X Performance has an "out of the box" weight of 1.5 kg in single action and 3 kg in double action. The saw-toothed handling grooves on the front and rear of the Brigadier slide ensure maximum grip during slide movement, in all conditions. The steel spring recoil rod ensures maximum operational accuracy. The area where the finger rests on the trigger is chequered and was redesigned to achieve a vertical front profile in single action.

The "Match" take down lever ensures a precise reference point for the second hand. The "hold open" lever profile is lowered and is of the "stealth lever" type, so as not to interfere with the finger resting on the safety lever during the out of ammunition warning. The front bead is equipped with a red fibre optic insert to enable quick and accurate aim realignment, it also has a rear sight, without coloured references, which can be adjusted laterally and vertically to the micrometre.

92X PERFORMANCE OPTIC READY NEW

SIGHT
Black full adjustable rear sight, red fiber optic front sight

Calibre	9x19
Mag Cap	15
Action	Single/double
Length	222 mm
Barrel	125 mm
Width	48 mm
Height	145 mm
Weight	1350 g
RRP	\$3,649

92X DEFENCE

The 92X Performance also offers the possibility to regulate the pre-travel (ONLY with Single Action Only models) and overtravel (All Models) via two adjustment screws located inside of the magwell. Please note that for standard DA/SA models, ONLY the overtravel screw will be present. The Pre-Travel screw is not functional for the DA/SA models.

The 92X has an appealing and refined dual tone look, obtained using a Nistan finish to treat the frame surface and slide with the contrast provided by the black burnished barrel.

The pistol comes with two 15-cartridge magazines with an oversized rubber pad to give the dominant hand extra grip and to protect the magazine during quick change operations..

Calibre	9x19
Mag Cap	15
Action	Semi Auto
Length	222 mm

OLYMPIC VEST

Unisex shooting vest in breathable mesh and stretch cotton with microsuede slide and expandable front pockets. The Uniform Pro 20.20 shooting vest is the latest born among Beretta shooting vests and presents numerous innovations both in terms of materials and in terms of design. The slide is in microsuede with laser-cut details for greater grip of the gun stock, the body is almost entirely in breathable and elastic 3D mesh while side panels in stretch material ensure excellent fit and freedom of movement. The front pockets are expandable with hidden snap buttons. The back in comfort cotton can be customized with embroidery or prints.

FULL MESH VEST

The Full Mesh Vest is designed for particularly hot summer days, made with large mesh inserts strategically positioned in key points to help the moisture management. The cut of the vest and the great variety of sizes it is made in ensure this vest is also suitable for woman and young shooters. In its simplicity, this vest is full of technical details including the elastic inserts on the shoulders, the large front pockets, and the inner pockets for the "Beretta Recoil Reducer" gel-tek recoil reduction system.

CARE INSTRUCTIONS

- In case of direct expose to water or humidity do not dry the leather through heat sources.
- Do not clean with stain remover and chemical solvent.
- To keep the natural leather aspect daub the product with neutral shoe-shine cream. Test a small quantity of cream on a hidden part of the product to avoid leather color changing.
- When the neutral shoe-shine cream is absorbed, clean the leather with a microfibre cloth.

PUULL SHOOTING GLASSES SET OF 3 INTERCHANGABLE LENSES

The Puull eyeglasses were specifically engineered and designed for shooters to provide unparalleled fit and optical advantage. They have a superior wraparound design and provide extraordinary optical protection. The Puull eyeglasses are intended to help the athlete maximize his focus on the target.

Light Purple: Designed to minimize green in the background, enhances the true depth of background and orange targets.
Magenta: Designed to boost orange target, medium yellow light and vibrant color enhancement.
Scarlet: Designed for balanced color enhancement, bright sun - collecting clouds - white sky, high resolution - crisp detail.

Item	Part#	RRP

Benelli

The story of Benelli Armi begins in 1967 with the Benelli brothers, owners of a motorcycle factory in Pesaro, Italy. Their interest in precision mechanics was not limited to the motorcycling sector, but also extended to another passion: hunting.

The Benelli brothers were convinced that the evolution of hunting rifles was moving in direction of self-loading firearms. The idea was born with the support of Bruno Civolani, talented Bolognese designer, who helped with the creation of a revolutionary firearm: the new project did not use a gas system, but instead the inertia of the firearm. Thus was born the Benelli inertia system, with a guarantee of safety and reliability.

Through many years of work, Benelli has built around the genius of his inertia system, the range of semi-automatic shotguns the largest and most tested in the world.

Technological advances by Benelli, 4 patented systems:

A.R.G.O.

ComforTech

CRIO SYSTEM

INERTIA DRIVEN SYSTEM

10
25
BE.S.T.

Ambidextrous safety
Excellent ergonomics and smoothness, easy to operate keeping the right alignment on the target.

L.O.P. spacers
The standard length of pull can be adjusted from 350 mm to 385 mm for quicker, more instinctive shouldering.

Combtech
Reduced cheek impact and vibrations.

Picatinny rails
3+2*+3 drilled holes for strong and rigid rail attachment for a consistent precision, even when the scope is frequently disassembled (*tapped).

Easy loading
Wider top cartridge loading.

AirTouch grip
The AirTouch checkering of the grip ensures that hunter's hand can breathe naturally for a superior grip.

SUB-M.O.A. Crio free-floating barrel
Every Benelli Lupo is accuracy-tested to prove it performs SUB-M.O.A. with 3-shot group for excellent ballistic performance, using quality factory ammunition.

LUPO

Detachable magazine
Fast loading and unloading. Double stack magazine, to perfectly align the cartridge to the chamber. More compact with greater capacity and without protrusion.

Steel barreled action and 3-locking lug system
More rigidity for better precision. More safety and 60-degree aperture, for quicker and easier repetition of the shot.

Integrated trigger guard
Optimal accessibility to trigger, major rigidity of the rifle for utmost accuracy.

Aluminium chassis
Greater stiffness between chassis and barreled action, consistency and accuracy.

Perfect Fitting
Great and easy drop, cast, comb and trigger reach adjustment. Fitting means better control and improved accuracy, thanks to maximum modularity.

Adjustable trigger pull
For maximum control by the hunter.

Progressive Comfort
Less recoil, greater control and maximum target acquisition speed for repeated rapid firing, staying accurately on target.

"It's been 18 months since the Lupo first landed in our hands here at the show, and I must say – it's been absolutely flawless"
- The Hunters Club

"Under the pressure the Lupo comes through!" - Anto Hall
 A trophy of a lifetime and a Douglas score of 30 1/4. The Benelli Lupo strikes with a chamois harvest for the record books!

We've claimed some amazing trophies with the rifle; an 11 3/8s inch Chamois, the 5th biggest ever shot in NZ, along with a monster 17 year old Bull Tahr, a ripper 10 point roaring West Coast red, and even a couple of prized Pitt Island rams.

As producer of the show, I'd admit that our team of hardy hunters are notoriously hard to keep happy, each having their own preferences and opinions on gear. However, they're all singing from the same song sheet when it comes to the Lupo, and luckily for me, when it comes to capturing the action in the heat of the moment, they've also all got their Lupo's singing sweetly as well!

DAVE SHAW

The Lupo has recently been release into the wild as a fine-tuned and well adapted predator with bloodlines that inherit all the hall marks and genetics that Benelli is well known for in their world class Shotguns.

Over the last few hunting seasons, the Lupo has accompanied me on all my rifle hunts. Well-engineered with repeatable accuracy has meant the Lupo has simply not missed a beat. Chambered .308 my Lupo has seen deployment in close quarter hunting in the thick beech forests of the North Island to longer range applications in the open expanses of the South Alps.

As the new kid on the block the Lupo was

initially met with some apprehension and wily scepticism on my behalf with a 'not worthy' until proven attitude. But based on the practical results in the field that speak for themselves it's fair to say the Lupo has certainly earned its seat at the table and has definitely put food mine.

As an engineer I appreciate innovation in design with attention to detail and for the Lupo this has culminated in a highly functional, accurate and aesthetically pleasing tool in the hand. A factory rifle with a custom quality feel, that's well balanced, efficient, durable and remains portable without giving anything up on accuracy. The Lupos form lines hark back to Benelli's semiauto shotgun pedigree yet sets its own unique tone and feel.

Benelli's guarantee the Lupo's accuracy with 3-shot sub-MOA straight out of the box and it comes at no surprise when you look at its configuration. The Lupo's aluminium chassis actually forms the lower portion of the receiver and extends forward under the stock. This system gives the bedding rigidity and consistency a real key to repeatable accuracy. In addition, the cold-hammer-forged cryogenically treated barrel is free-floating and secured to the action via an oversize nut. The hammer forging process ensures that both rifling, and the chamber are perfectly aligned and is likely one of the secrets to the Lupo's excellent accuracy. The barrel muzzle also features a 5/8x24 thread with

a near-seamless thread protector for brake and suppressor options if required.

The Lupo sports Benelli's BE.S.T. (Benelli Surface Treatment) finish which is a hybrid physical vapor and plasma-enhanced chemical vapor coating technology. What this basically means that the steel finish on the Lupo is extremely durable to corrosion and wear. All steel components of the Lupo receive this treatment giving you piece of mind and longevity in the field.

Again, attention to details one cool and unique feature on the Lupo is the bolt can be disassembled for maintenance in the field without any tools. A release on the cocking mechanism allows you to rotate and remove the component. It's little details like this for a back country hunter that you never know you need until you really need it.

Even with is modern look and finish It's handled all the abuse I have thrown at it in NZ's hostile backcountry and remains reliable and accurate to this day. Just like the Wolf it is aptly named after the Lupo is an efficient, precise, extremely durable hunter that is packed with innovative instinct yet remains user-friendly and adaptable. It's fair to say the Lupo has proven itself in the field for me over the last few years and will continue to be my rifle of choice on our upcoming adventures into the wilderness.

ANDRE ALIPATE

Lupo is the Italian word for wolf, and this rifle is destined to dominate the land in much the same way that Benelli's shotguns have dominated the skies for decades.

We all know how reliable and perfectly engineered Benelli shotguns are, and while we could write pages on what makes a Benelli shotgun a cut above the rest, we want to focus on the Lupo.

For the last couple of seasons, the Lupo has been my rifle of choice and has performed flawlessly, assisting me in taking some of my best game to date.

When the moment of truth comes, I can depend on my Lupo to get the job done.

While I was cautious about adopting a relatively new rifle a few years ago, without the history of other brands, it was made easier when you combine proven performance of the Benelli brand with real life results that you can see and feel, and the results from the Lupo from the last few seasons of the show speak for themselves.

The Lupo is packed with innovative features that add up to hunting rifle that provides a customized fit, handles beautifully and carries a 3-shot sub-MOA guarantee.

The Lupo was built for accuracy; the key is the barrel system, featuring a precision crio-treated, free-floating barrel attached to a hardened steel barrel extension bedded to a steel block in the alloy receiver. The result is

precision sub-MOA accuracy... shot-after-shot.

The Lupo tames the recoil synonymous with big-game calibers by utilising a built-in Progressive Comfort system and Combtech cheek pad. Modified from Benelli's proven system used on its shotguns, the system is engineered with sets of interlacing fingers that flex, absorbing much of the recoil before it reaches the shoulder. Decreased recoil, less muzzle flip and less anticipated recoil by the shooter result in a greater ability to stay accurately on target.

The shape of the Benelli Lupo is also optimized for control. The trigger is crisp and with an adjustable trigger pull weight. Included trigger reach spaces can be used between the receiver and the stock to position the shooters hand at an optimal distance from the trigger. The ambidextrous top safety is easy to access. The Airtouch Grip surfaces allow for a safe and firm hold on the rifle.

One of the truly unique features of the Lupo is the ability to adjust drop, cast and trigger reach with included shims. Shooters can achieve a customized fit out of the box without the need for often expensive gunsmithing. Shims allow the stock to be set in one of 36 different positions. Optional fit choices include two raised cheek pad styles and one optional length butt pad. Great fit equals better control... and increased accuracy.

The detachable box magazine is a double-stack configuration with a partial divider that loads like a single stack. Cartridges can be easily loaded with the magazine removed, or smoothly top loaded with the magazine in place. The Lupo cutaway bolt works with the magazine, allowing the magazine to insert fully into the receiver without protruding from the bottom of the gun.

From putting the Lupo through its paces in some of the worlds harshest environments I know when carrying the Lupo I have the best tool available for the job. I look forward to continuing to feed the wolf on our adventures together.

ANTO HALL

The Over & Under from the Third Millennium

"828" is the number that identifies the Historic Center of Urbino in the World Heritage List of Unesco. The 828 U overlay combines the art of the past with the technology of the future.

The wooden stock incorporates the Benelli Progressive Comfort system, and a special polyurethane pad, which is extremely effective at reducing recoil and barrel rise. Lightness, comfort, stability and versatility define the 828 U. This ultra handy shotgun is very stable and easy to adapt to all types of hunters and shooting styles.

The 828 U is the only shotgun that offers precise drop and cast adjustment for a perfect fit. The heart of the Benelli over & under is its highly reliable hardened steel locking plate.

Its simple but ingenious design ensures a robust and reliable locking mechanism, and eliminates the mechanical stress at the pivots of the action.

By combining this advanced locking system with an aluminium receiver, Benelli has succeeded in creating a shotgun weighing less than 3 kg that is also robust and perfectly balanced. Another key feature of the 828 U is its compact, precise, reliable, fast, and easily removable trigger group.

The ejection system is driven by the pulse of the cartridge during firing, thus there is no mechanical interaction between the barrel and the trigger group with the arming of the firing hammers being achieved with the opening lever. The barrels are therefore interchangeable.

Owning an 828 U means tailor-made comfort and maximum precision for any shooter.

Beautiful design.

Total weight of 3kg (w/ 28inch barrel).
Perfectly balanced.
Rounded profile.

Easily removable trigger group.

Second generation of the PROGRESSIVE COMFORT system.
Reduces recoil by more than 50%.
Reduces muzzle rise during firing.
Progressive recoil absorption.
Soft and ergonomic recoil pad (Interchangeable).
Adjustable length of pull (365mm - 375mm - 385mm)

REMOVABLE TRIGGER GROUP
Compact profile, modular concept, made from aluminium and steel. Removable for cleaning.

PATENTED BARREL CONSTRUCTION

1. Improved ejection
2. Excellent ballistic performance
3. Safe and reliable
4. Minimum weight & compact design

PERFECT FIT
40 possible adjustments.

LOADING & UNLOADING
Innovative and ergonomic design of the opening lever.
Barrel opening angle of 48deg.

Progressive Balancing

Allows you to perfectly balance your shotgun thanks to 8 steel weights, each weighing 12.5g. The center of gravity can be moved from -8mm to +8mm by removing or adding weights. The grade 3 walnut stock has been developed for total control and instinctive natural swing.

Perfect fitting

Allows a perfect fit with precise adjustment of the cast and drop. 20 possible positions. Standard length of pull of 375 mm, which is user adjustable between 360 and 390mm

Detachable Trigger Group

Light & efficient with an exceptionally clean break. Adjustable trigger for maximum control. 5 different positions are possible. Quick and easy disassembly of the trigger group.

Supreme Ballistics

Features a 10mm carbon fibre rib with shooting line in the center and a highly visible white bead. The rib floats on the barrel which reduces vibration and increases the accuracy and quality of the shot pattern.

Powebore and Crio

The high quality steel barrels are made in Italy. Powerbore technology and Cryogenic treatment combine to bring the best technology to the sports shooting disciplines. Ensures speed and a perfect pattern with every shot.

Chokes Sport

5 external chokes (Full, **,***,****,Cyl).

SPORTING PEDIGREE

Weight, balance and ergonomics - everything has been developed for Sporting shooting. Excellent stability and swing for the most difficult stages. The steel receiver helps to concentrate the weight of the shotgun (3,650kg) in the hands of the shooter for dynamic handling of the shotgun. Perfect balance, great stability, minimum muzzle rise, and low recoil are noticeable from the first shot.

RAFFAELLO BE DIAMOND

New Comfortech 3 Recoil Reduction System.

Recoil reduction and comfort is improved with any ammunition used - from 28 to 56 g. New, extra-soft CombTech interchangeable (patented) comb ensures effective shock absorption on the cheek. The barrel and chokes are cryogenically treated, with the barrel also featuring a carbon-fibre rib and fibre-optic front bead. The greatest improvement lies in the BE Diamond's brilliant black surface treatment, that took 7 years to develop: Benelli Surface Treatment (BE S.T.). This surface treatment is highly abrasion and corrosion resistant, meaning less rust, less maintenance, and increased longevity of the shotgun.

Increased comfort and corrosion resistance.

The new Raffaello BE-Diamond has been completely redesigned and features new technologies in the guns finish, barrel, inertia operating system, and the stock

25
BE.S.T.

25 year warranty on B.E.S.T treated parts when you register your gun online

BE.S.T.

Benelli Surface Treatment is the exclusive Full Protection Treatment that gives the barrel and breech superior resistance to corrosion, abrasion and wear. The new treatment offers protection against scratches, corrosion, and rust, while leaving a finish that is elegant and totally black. Benelli Surface Treatment makes the barrel extremely hard and adds a touch of beauty, while also reducing the need for maintenance with protective oils. Unlike other coatings on the market that get scratched and become susceptible to rust, BE.S.T. technology ensures total protection of the barrel.

Clear window in the magazine tube shows number of shells loaded in the magazine.

M2 WOOD

The M2 is designed for the dynamic and demanding hunter who requires both speed and power. The Wood model features a walnut stock and fore-end. Ventilated butt pad significantly reduces recoil at the moment of firing. Available in right or left-hand. Receiver is milled for optical accessories.

M4

Ultra-reliable in all conditions

A.R.G.O.

The M4 has a patented gas system that is both ingenious and innovative. The gas port is positioned near the chamber which makes it possible to use high pressure gas when cycling the shotgun, thus guaranteeing reliability and clean operation with all types of ammunition and is made possible thanks to a careful design using only optimal materials. The system guarantees efficiency, reliability, ballistic precision, and durability. The barrel is chromed lined inside, and phosphated on the outside for durability and wear resistance. The steel Ghost Ring sighting system is adjustable for windage and elevation. All external surfaces are protected by an anti-reflective MILSPEC (Military Specification) finishing treatment. The simplicity of the design makes it easy to disassemble in seconds without tools.

Benelli Nova and Supernova

Benelli's Nova and SuperNova pump-action shotguns feature a ferro-lacquered technopolymer stock and receiver housing that is extremely durable and tough. The Nova model's receiver housing is integral with the stock, which is therefore fixed in place for exceptional robustness. The SuperNova is built in two parts with a removable butt stock, allowing the mounting of different types of stocks. It is available with a ComforTech® fixed stock that effectively reduces recoil allowing for faster follow up shots. The Benelli rotary-head locking system ensures safe operation. The 3.5inch chamber combined with the robust structure of the firearm, make it possible to use all 12ga cartridges, from the lightest to the most powerful 3.5inch super magnums. The butt pad is specifically designed to reduce the recoil to a minimum. This shotgun works perfectly in all climatic conditions, from the lowest to the highest temperatures and humidity.

FRANCHI

FEELS RIGHT

FOUNDED IN 1868 AND TODAY PART OF THE PRESTIGIOUS BERETTA GROUP, FRANCHI REPRESENTS A STRONG BRAND IN CONSTANT EVOLUTION.

Our history includes more than 150 years of passion, research, development, ever with the same energy and desire that every hunter has at the beginning of each new day in nature.

We continue to grow, making sure to never compromise our philosophy, that the firearm and the hunter become a single entity.

HORIZON

A new Horizon. An idea born of a great desire: the desire to surpass oneself in order to discover a new horizon.

Instinct, cunning, patience, and strategy; are necessary elements for hunting. The Horizon bolt action rifle is the perfect companion to the hunter, in any place and in any condition. Ergonomics and precision are the basis for the Franchi Horizon bolt-action rifle. The ergonomic stock was developed by studying the shooting technique of more than 1000 hunters and shooters, resulting in a perfectly proportioned and instinctive rifle. Numerous grid zones are present to aid handling in different firing positions.

The Horizon bolt has three chrome locking lugs and is machined from a solid block of steel. Featuring a 60° bolt-throw for faster loading, the Horizon is factory tested to shoot a sub-MOA 3-shot group at 100 metres. The Franchi Horizon is compatible with Remington 700 style scope mounts and bases and offers the shooter with a quality Italian made rifle at an attractive price.

- Large bolt handle for quick and easy loading.
- Adjustable Trigger.
- Detachable Magazine
- Strata camo stock

- Fluted bolt for weight reduction and beauty.
- 2-position safety.
- Burnt bronze cerakote on Elite model.
- Muzzle thread

FRANCHI AFFINITY

The Affinity semi-automatic shotgun is the ideal coming together of Italian craftsmanship and passion. As you first shoulder it, you'll be surprised by the lean dimensions, functional design, and ideal weight and balance. The trim forend helps keep your eye close to the bore axis for quicker and more intuitive pointing. The bolt handle, bolt release, and loading port are designed for positive use even with gloved hands. The Front Inertia Driven® system along with the TSA recoil pad makes the Affinity easy on the shoulder and suitable for use in the field, or on the clay target range.

AFFINITY 3 SYNTHETIC

The Affinity Synthetic is designed for the shooter who wants the simplicity and ease of care that only a synthetic stock can provide. Rugged and weather resistant, the Affinity Synthetic is the ideal choice for your next waterfowl hunting trip.

STOEGER WAS ESTABLISHED IN 1924 AND IS PART OF THE BERETTA GROUP OF COMPANIES. STOEGER OFFERS THE RELIABILITY OF A GREAT BRAND AT A COMPETITIVE PRICE.

Technology and expertise are integral to Stoeger's manufacturing processes. Stoeger products enjoy a solid reputation for affordable quality among working men and women who enjoy shooting sports.

STOEGER M3000

The M3000 is the latest addition to the Stoeger semi-automatic line of shotguns. Designed and manufactured to provide excellent performance under the most extreme conditions, while offering excellent value for money.

The Stoeger M3000 features a highly reliable inertia driven system with a rotating bolt. It's easily dismantled, and its components have been heat treated for hardness and durability. A special chrome plating has then been applied to ensure corrosion resistance, longevity and ease of maintenance of the shotgun. The M3000 is available in several configurations including Wood, Black Synthetic, Max5 Camo - and a tactical version with a collapsible stock.

M3000 PEREGRINE M5 BURNT ORANGE

The M3000 Peregrine features a burnt bronze Cerakote coating on the barrel and action for corrosion resistance and longevity, and a MAX5 camo stock for added concealment.

sako

demand perfection

ATTENTION TO DETAIL IS IN THEIR NATURE

Sako, the world's most prestigious rifle and cartridge brand, combines advanced technology with traditional gunsmith craftsmanship.

Founded in Finland in 1921, Sako has a fascinating history which included the critical task of supporting Finland during the First World War. In 1989, it merged with Tikka and in 2000 it proudly became a part of the Beretta Holdings group.

These days, Sako has become known as New Zealand's favourite quality brand of rifle.

When you don't want to compromise on quality, Sako is your choice.

The Sako reputation, manufacturing high-quality products is rooted in the unique skills of its employees. Sako take pride in what it makes. Their products and way of working are based on a culture deeply rooted in the unforgiving Nordic nature.

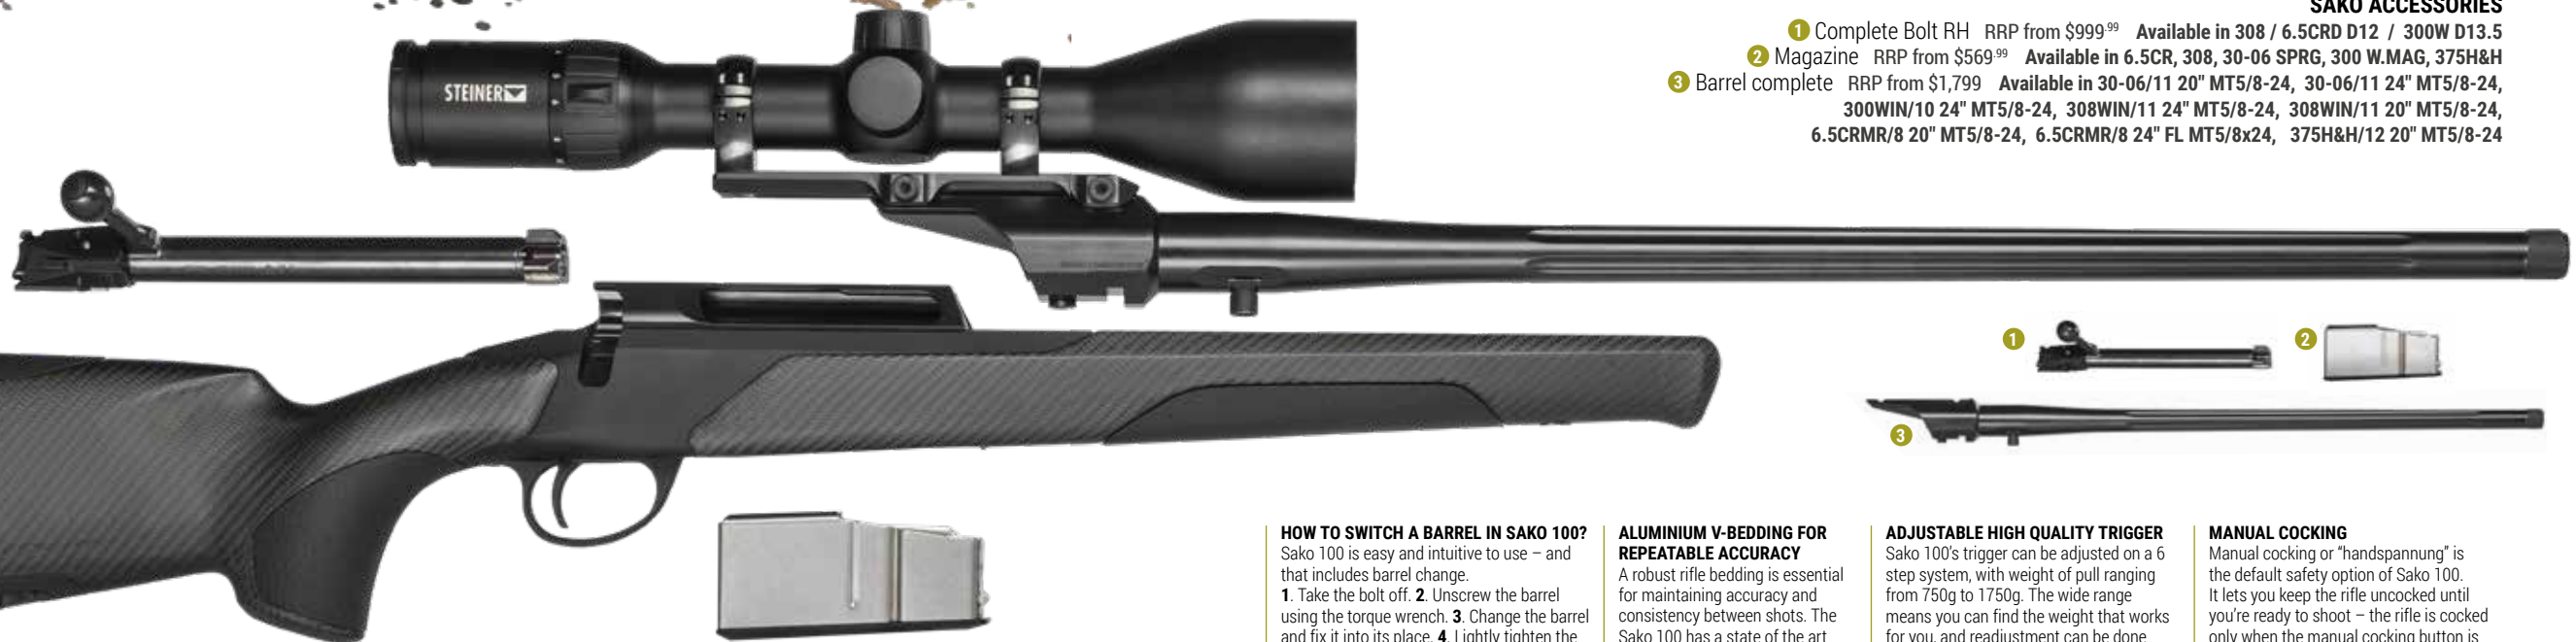

Overcoming these harsh conditions has always demanded perfection in every detail.

100

SWITCH-CALIBER HUNTING RIFLE

NEW
FOR 2023

A BARREL MOUNTED SCOPE FOR OUT-OF-THE-CASE ACCURACY

Unlike many other hunting rifles, the Sako 100 is ready for action straight out-of-the-case, delivering unparalleled accuracy appreciated by a travelling hunter. Sako 100's barrel mounted scope means there's no need for lengthy or inconvenient re-zeroing on the range, so you can change barrels on the go – making Sako 100 the rifle of choice for hunters that prioritize freedom and adaptability in all conditions. Once zeroed, no re-zeroing is needed upon caliber change.

SAKO 100 SWITCH CALIBRE HUNTING RIFLE

RRP from \$9,399

SAKO 100 EXPLORER CARBON

Designed for maximum usability and reduced weight, the sturdy Sako 100 Explorer Carbon emphasises the modern aesthetics. 360-degree weaved carbon used in RTM-manufacturing results in extremely dimensionally accurate stock that has unparalleled torsional rigidity in every direction. In addition, the soft-grip surfaces offer the best grip in all weather conditions and world class resistance against chemical agents.

Available in 20" 6.5 CM, 308, 30-06 Spring, 375 H&H
24" 300 W.MAG

RRP from \$7,899

SAKO 100 EXPLORER WOOD

A high quality walnut stock is a stylistic choice for the discerning hunter. The schnabel-like fore-end and the Monte Carlo comb of the rear-stock pay subtle homage to classic European stocks and hand-crafted rose wood details and checkering at the fore-end and pistol grip finalize the design.

Available in 20" 6.5 CM, 308, 30-06 Spring, 375 H&H
24" 300 W.MAG

HOW TO SWITCH A BARREL IN SAKO 100?

Sako 100 is easy and intuitive to use – and that includes barrel change.

1. Take the bolt off.
2. Unscrew the barrel using the torque wrench.
3. Change the barrel and fix it into its place.
4. Lightly tighten the screws.
5. Slide the bolt back in place and close the bolt.
6. Tighten the screws to 7 Nm with the torque wrench.

The torque wrench used to change the barrel comes as an accessory with the rifle. In the wild (or when the torque wrench is out of reach), you can also use the handy tool located in the compartment of the stock to make sure the screws are tightened. The same tool can also be used to detach the scope and rear-stock and adjust trigger position, enabling field maintenance.

ALUMINIUM V-BEDDING FOR REPEATABLE ACCURACY

A robust rifle bedding is essential for maintaining accuracy and consistency between shots. The Sako 100 has a state of the art aluminium V-bedding that has been designed to be in contact with the full length of the receiver. This creates a solid foundation and results in a truly well-balanced, reliable and accurate rifle for all hunting conditions.

ADJUSTABLE HIGH QUALITY TRIGGER

Sako 100's trigger can be adjusted on a 6 step system, with weight of pull ranging from 750g to 1750g. The wide range means you can find the weight that works for you, and readjustment can be done without any disassembly. For the most optimal trigger ergonomics the trigger can also be moved forwards and backwards with a movement range of 7mm. The factory setting is in the middle.

MANUAL COCKING

Manual cocking or "handspannung" is the default safety option of Sako 100. It lets you keep the rifle uncocked until you're ready to shoot – the rifle is cocked only when the manual cocking button is pushed. When the rifle is cocked and ready to fire, you can safely decock the rifle and bring down the firing spring tension by applying the small release latch located on the top edge of the larger cocking button. You can open the bolt securely when the safety is on by pressing the bolt release button on the side of the bolt shroud and opening the bolt. Now you can safely remove a cartridge from the chamber. Safety will remain on until you have closed the bolt and re-cocked the rifle.

SAKO S20 ACCESSORIES

The Sako S20 is a highly customisable rifle, and features many Sako factory produced accessories, which are designed to perfectly complement the customisable nature of the Sako S20

FUTURE-PROOF YOUR RIFLE With accessories, you can entirely re-define what you want your rifle to be. Some accessories are beneficial for hunters, whereas others are more suited to the shooting range.

ADJUSTABLE ERGONOMICS Accessories help you when you go from an upright to a prone shooting position or when the terrain gets tricky. Together with the S20's adjustable features, you can be sure that you can quickly adjust your rifle to match the situation and still deliver precision.

ROBUST IN ALL CONDITIONS Attaching the accessories straight to the aluminium chassis via aluminium M-LOK placements ensures they hold firm even in the toughest conditions.

SAKO S20 SCOPE MOUNT

The S20's high-duty performance scope mount is something never seen before. Made from extremely strong aircraft-grade aluminium and steel, it was designed specifically to provide a robust scope mount for the demanding user. It provides a strong hold for a rigid scope, supported by the sturdy aluminium base. A variety of different heights and ring sizes ensures that there's a perfect option for every shooter. The scope rings can also be installed to different spots in the base, ensuring that both long and short optical tubes are compatible with this mount.

RRP \$219.99

SAKO S20 BARRICADE STOP

The barricade stop was designed to be attached in front of the magazine, allowing the shooter to support the rifle on barricades or obstacles without damaging the magazine and achieving a steadier position for maximum precision. The barricade stop can be attached to any M-LOK compatible fore-end or hand guard.

RRP \$169.99

SAKO S20 MONOPOD

The S20 monopod provides further stability and support when you need to aim for that extra precision. You can quickly engage the desired height with one push of a button. The mount also has a threaded micro adjustment so that you can fine-tune your rifle's elevation by rotating the pod. The monopod can be locked to a vertical, 45-degree or horizontal 90-degree position.

RRP \$199.99

SAKO S20 THUMB REST

With the S20 thumb rest, you can improve your shooting position by placing your thumb on either the left or the right side of the precision stock. It enables a more secure and fixed hand position to get more accurate index finger trigger control. The thumb rest is easy to install by just removing the screw and replacing the stock insert with the thumb rest.

RRP \$39.99

SAKO S20

SAKO S20 HUNTER

RRP from \$3,299

Grey Cerakote over Stainless Steel

Available in 6.5 CM, 308, 243, 30-06 Spring, 270, 6.5 PRC, 7MM R.MAG, 300 W.MAG

The Sako S20 ergonomic hunting stock was designed with ultimate shooting comfort and ergonomics in mind. Having the best, most ergonomic grip on your rifle improves accuracy without compromising comfort. In an intense hunting situation, this can be the deciding factor between success and failure. The thumbhole style pistol grip is made from a unique, soft, high-quality synthetic material with a leather-like texture, giving the optimal grip in any weather conditions. You can perfectly align with the rifle scope with the quick-adjustable cheek piece, and the length of pull can also be adjusted with spacers. The Quick Detachable (QD) sling placements on both sides of the stock enable fast and easy attachment of the sling, improving rifle handling.

SAKO S20 PRECISION

RRP from \$3,899

Grey Cerakote over Stainless Steel

Available in 6.5 CM, 308, 243, 30-06 Spring, 270, 6.5 PRC, 7MM R.MAG, 300 W.MAG

The S20 tactical precision rear stock combines great modularity with unparalleled ergonomics for the most demanding precision shooters out there. It was created especially for long distance and precision shooting. The forend has integrated M-LOK placements on both sides of the stock and on the bottom, so attaching multiple accessories is possible. The quick-adjustable cheek piece enables perfect alignment with the rifle scope, and the recoil pad's height and angle can be adjusted to reduce felt recoil and to enable the most comfort in different shooting postures. The length of pull can also be adjusted with spacers for maximised control, accuracy and comfort. The pistol grip has a rough surface, helping you secure your grip even in the roughest conditions.

SAKO 85

CUSTOM SHOP

Sako 85 rifles are built with demanding design criteria, based on tradition and innovation, allowing you to choose between different models for the given hunting or training purpose. The Sako 85 series offers several stock styles and barrel options. These options, combined with a comprehensive caliber selection, will give you the ultimate bolt-action rifle. When you buy a Sako, you're buying a high-quality rifle that has undergone thorough quality assessments that ensure its lasting value from father to son..

MODEL

STOCK

ENGRAVING

You can choose how your rifle is put together, from stock model and wood quality to engravings and a range of other details.

BARREL

In addition to stock model, wood grade and engravings, you can also select your length of the barrel, material and finish options. Available depend on the stock and engravings you have chosen.

visit sako.fi/rifles/sako-85

The Sako 85 Carbonlight is a high-end rifle designed for hunters seeking the best equipment possible.

The Sako 85 Carbonlight is a high-end rifle designed for gear-oriented enthusiasts who are after any type of game. This ultra-light multi-purpose hunting rifle features a carbon fibre stock with a soft-touch surface, a palm swell, and a cheek piece. With an approximate weight of only 2.4 kg, the Sako 85 Carbonlight with S-action or the new XS-action is exceptionally comfortable to carry, even on extended hunting trips.

SAKO 85 CARBONLIGHT

RRP from \$6,099

SAKO 85 CARBONLIGHT LEFT HAND

Fluted Stainless hammer forged Barrel. Left hand available in S action calibres only. Barrel threaded M14x1
Available in 243, 6.5CM, 7MM-08, 308

RRP from \$6,399

SAKO 85 FINNLIGHT II

RRP RH from \$4,899

EXPERIENCE AN ICON REBORN

Building on the famous Finnlight name, the Sako 85 Finnlight II is an icon reborn. The lightweight RTM fibreglass stock is extremely rigid while making the rifle light to carry for extended periods. The barrel and action have been treated with a tough Cerakote® coating, which protects the steel from the elements making this rifle the perfect choice for all conditions.

The cheek-piece is fully adjustable and ensures the rifle is perfectly customisable for your preferences. The barrel is cold hammer forged stainless steel and is fluted for accuracy, weight reduction, and heat dissipation. The stock features rubberized grip areas to ensure excellent grip in all conditions.

Available in 6.5CM, 270, 300W.MAG

*Some calibres may be special order only

SAKO 85 FINNLIGHT II LEFT HAND

RRP LH from \$5,199

SAKO 85

SAKO 85 HUNTER STAINLESS

RRP from \$3,699

Calling the Sako 85 Hunter Stainless a standard is a serious understatement. It comes with world-class Sako features, including the legendary Sako accuracy, smooth bolt operation, and perfect balance; making it a valued rifle to both own and shoot. The Sako 85 Hunter Stainless features a walnut stock and stainless steel barrel and action. Available in 260, 7MM-08, 270

SAKO 85 BLACK WOLF

RRP from \$4,649

A rifle designed for both Hunting and Target Shooting. Quickly adapts to the needs of its user. At the rear of the stock are two buttons which allow quick adjustment of the cheek piece and length of pull. Ergonomic pistol grip for a natural and relaxed grip. Double sling swivels on the fore-end allow for ideal installation of both a bipod and a carry sling. Wide fore-end aids accuracy when shooting off a bench or other shooting rest. The barrel is cold hammer forged, fluted, and is threaded for M15x1. Available in 260

SAKO FINNFIRE II WOOD

RRP FROM \$2,299

We take pride in our past, and the Sako Finnfire II celebrates the old Finnfire rifle. The Finnfire II brings a kind of retro spirit into our rimfire selection and features some of the classic design elements of the old Finnfire. Features a beautiful blued barrel, action, and a walnut stock. Available in .22LR and .17HMR

SAKO QUAD

The Sako Quad series of rifles feature grand Sako quality and easily interchangeable barrels.

Each calibre is identifiable by colour: Green 22 LR - Orange 17HMR - Blue 17Mach2 or Yellow 22WMR. Barrel is cold hammer forged and free floated. The trigger is identical to that found in other SAKO rifles and is adjustable from 1 to 2 kg. These rifles can be delivered, optionally, with open sights. Barrel is threaded for use with various muzzle devices.

SAKO QUAD HUNTER PRO

RRP FROM \$2,749

The Sako Quad Hunter Pro has the latest Sako features and is designed to look and feel like a traditional Sako hunting rifle. The full-sized walnut stock resembles the famous Sako 75 design and offers the same accuracy as all Sako hunting rifles. Available in .22LR, 17Mach II, .22WMR and .17HMR

SAKO QUAD

SAKO QUAD SYNTHETIC - COMBO

*Enquire for pricing

Includes .22LR, .22WMR, .17Mach II & .17HMR Barrels

SAKO QUAD SYNTHETIC

RRP FROM \$2,049

The Sako Quad Synthetic comes with a stylish modern synthetic stock, blued barrel and a black rubber recoil pad. Stock spacers are available (not included) to enable the user to modify the length of pull to perfectly fit the shooters. Open sights are optional. Available in .22LR, .22WMR, .17Mach II, .17HMR

SAKO QUAD VARMINT

RRP FROM \$2,749

The Sako Quad Varmint is an excellent choice for hunting and bench-rest target shooting. The walnut stock features a flat-bottomed extra wide fore-end and heavier barrel for precise accuracy. Available in .22LR, .22WMR, .17Mach II, .17HMR

SAKO QUAD SYNTHETIC HEAVY BARREL

RRP FROM \$2,149

The Sako Quad Heavy Barrel rifle can take repeated firing without getting too warm. The Monte Carlo-style cheek piece on the black synthetic stock ensures a great shooting position. The rifle's length of pull can be adjusted with recoil pad spacers. Available in .22LR, .22WMR, .17Mach II, .17HMR

SAKO QUAD RANGE

RRP FROM \$3,249
(Scope & mounts not included)

The Sako Quad Range has been designed to be an ultra-versatile rifle. The Sako Quad Range model is an extremely versatile rimfire rifle that can accompany you on a small game hunt as well as to the range. An ergonomic laminate stock combined with the ability to quickly swap calibres make the Sako Quad Range a true multi-purpose rifle. Available in .22LR, .22WMR, .17Mach II, .17HMR *Special order only

CONTESSA

CONTESSA

Contessa has been machining tight tolerance parts for the gun making, automotive, textile, lighting, taps and valve, and tooling industries for almost three decades. Over the past 10 years, the company has been focusing on the development and production of its own line of optic mounting solutions: products so accurate, precise, beautifully finished, and good looking that they are set apart from all competition. The quality of our extensive range of mounts is the result of our 30-year experience combined with professionalism, passion, and enthusiasm. Beretta New Zealand offers a variety of Contessa products including scope rails and mounts for Sako, Tikka, and other firearms.

SAKO M10

MULTI-Calibre, CONFIGURABLE, LONG RANGE RIFLE

The SAKO TRG M10 is a new generation of long range rifle. The M10 can be configured between various calibres in minutes, with simple tools (supplied with the rifle). The M10 transforms from a compact mid-range rifle to a full-featured, high-precision long range platform capable of accuracy at 1500m and above. The SAKO TRG M10 is available in 3 different calibres (308 Win, 300 Win Mag, and 338 Lapua Mag) and in different barrel lengths, allowing the shooter to setup their rifle according to the distance they will be shooting. (short, medium and long distances).

TRG M10 COYOTE BROWN OR BLACK

Sako TRG M10 Suggested RRP from \$17,999

Features a 30MOA MIL-STD-1913 'Picatinny' rail mounted on the receiver & handguard for optimal long distance compensation.

The MIL-STD-1913 rail is full-length and ideal for mounting night vision and other optics. Each barrel is threaded M18x1 for mounting an optional muzzle brake or suppressor.

At the rear of the stock is a MIL-STD-1913 lower rail for attaching a special TRG rear support/monopod (not included). Supplied standard with a rear stock-hook which doubles as a rail protection cover.

The recoil pad is a new design, providing excellent recoil reduction and increased comfort when shooting heavy recoiling rounds.

The trigger group is robust and fully adjustable, and can easily be detached from the rifle for cleaning or maintenance without disassembly. Removable magazine has a strong steel body and polymer bottom section, with a rubber surface for easier handling under any conditions.

Magazines are marked for faster tactile calibre identification, even in low light. All Torx keys for complete disassembly of the rifle are integrated in the handguard handle under the barrel, against the receiver.

Three sizes of grips (small, medium and large) are included with the rifle. The modular components of the different calibre conversions are easily identifiable thanks to tactile and visible indicators on each part.

SAKO TRG M10 CALIBRE CHANGE KITS & BARRELS

Optilock Rings and Bases were designed to match and complement the lines of Sako and Tikka Rifles while offering unmatched reliability and capability to hold zero.

They have new features to bring greater precision. They keep the scope aligned and secure in all circumstances. The polymer insert inside the ring evenly distributes the clamping force for better protection of your optics. Standard Optilock bases have an anchor point for easy attachment of the rings without accidental rotation. All new Optilock bases have a new angular design to perfectly match the lines of the rifle. Optilock bases and rings are available in different lengths and sizes to fit most optics on the market. Optilock rings and mounts are manufactured from a solid block of steel, creating a strong and ultra-precise product.

A cartridge is never simply just a cartridge. It's an essential part of each hunt, the enabler of each shot. It's something that puts you in charge of the situation. Matching the correct tool for the task makes all the difference in the world.

UNRIVALLED ACCURACY AND CONSISTENT PERFORMANCE All Sako and Tikka rifles and cartridges are tested to guarantee 1 MOA or better accuracy - straight out of the box. Our products are continuously tested for Sako's high standards on accuracy, performance, stopping power and reliability.

PRECISION LOADING OF ONLY THE BEST QUALITY COMPONENTS Every bullet and case is individually inspected, the deviation of the highest quality single-base powder charge is minimized and the ignition time of the primers remains constant, providing a level of quality that exceeds the precision of hand loading.

RELOADABILITY Due to a proprietary heat treatment method, as well as zero impurities of the case material, our cartridges have the industry's highest reloadability and pressure resistance, maximizing the lifespan and safety of any rifle.

STOPPING POWER All hunting loads and bullets are developed at the Sako ballistics laboratory.

They are tested during real big game hunts for optimal weight retention and double-diameter mushrooming for maximum impact.

GAMEHEAD PRO CENTERFIRE CARTRIDGES

Gamehead Pro with Sierra's GameChanger bullet features rapid expansion and is designed for medium sized game. The polymer tip and aerodynamic design allow for high ballistic coefficients and rapid expansion. Because of the optimised jacket thickness, the bullet's expansion is also excellent at extended distances. Precisely engineered to withstand high muzzle velocity, the Gamehead Pro has one of the best ballistic coefficients on the market and is ideal for long range precision hunting.

SAKO CARTRIDGES

SUPER HAMMERHEAD CENTERFIRE CARTRIDGES

Super Hammerhead is growing with smaller calibers. .270 Win with 8,4 g/130 gr bullet, 6,5 Creedmoor and 6,5 x 55 SE will both be manufactured with 9,1 g/140 gr bullets. Bonded, strong, and non-fragmenting bullet ensures controlled expansion. Super Hammerhead provides high weight retention, resulting in effective penetration. It is boat-tailed for high ballistic efficiency, which causes a flatter trajectory.

POWERHEAD BLADE CENTERFIRE CARTRIDGES

Powerhead series features the newly-introduced SAKO BLADE bullet. The terminal BLADE Tip, together with its 5-stage bullet expansion architecture, expands the bullet even at the lowest impact velocities (long ranges) while also ensuring high resistance against bone hits and close-range shooting situations. The Sako Blade bullet has a uniquely deep hollow-point which provides one of the largest mushrooms in the market, with optimized reactivity and strength. The bullet is high-speed machined and has optimal rear balance, resulting in outstanding precision.

sako BALLISTICS APP

The Sako Mobile Ballistics App is a free, easy-to-use ballistic calculator that allows hunters and long-range shooters to identify the right cartridge. The application stores data on all of Sako's cartridges and you can create your own profile for your rifle and ammunition combo. Available for download from the App Store and Google Play. Get it today.

Nature always has the upper hand. You aren't as fast as animals and you can't see as far and clear as they do. The animal smells and hears you before you even know they're there. You have to learn their ways. You have to outthink the animal you're hunting by knowing where they come from and anticipate where they are going. You can do everything right and still fail. Even the best hunter can end up empty-handed. But you're the hunter. There's something you can do. You can never give up. Those who succeed, never turn back. You can keep going. You can create the right place and the right time. Because you know what every Tikka shooter knows: That you can trust your rifle. You can be confident it will handle the same forces that you can. Whatever the situation or circumstance, all you have to do is concentrate on your shot. Your Tikka rifle is the ultimate tool for accuracy. Tikka is second to none.

TIKKA T3X A NEW ERA OF PRECISION.

Even the best rifle manufacturers must continue to develop new products to stay at the top.

At Tikka, our product development is not only based on our extensive expertise, but also on the practical experience taken from hunters and shooters. Now available is the latest result of our work; the Tikka T3x. Made up of new features, these rifles are the symbol of a new era of precision.

THE ULTIMATE TOOL FOR ACCURACY

All Tikka rifles are designed and manufactured by Sako in Finland. We produce our products with pride to give you what we have promised you. Each of these hunting rifles is tested at the factory before departure and must hold a group of 1MOA maximum for 3 shots at 100m.

Tikka rifles are both innovative and durable, but above all, they are reliable in all circumstances. A rifle is born with one goal, to successfully hit the target. When it comes to accuracy and performance, Tikka has no equal. **The best of evolution.**

SAFETY

Tikka rifles feature a two-stage safety, blocking both the trigger and the bolt. The Safety is easy to operate and indicates when the rifle is ready to fire.

BOLT

The bolt is designed for accuracy, reliability, and ease of use. Tikka rifle bolts feature two large locking lugs. The bolt features a short 70° bolt-lift. It's one of the smoothest actions on the market.

TRIGGER

The trigger has vertical grooves for better grip even when wearing gloves. Pull weight is easily adjustable from 1 to 2 kg.

RECEIVER

The integral dove-tail rail is machined into the top of the receiver for mounting Tikka Optilock rings & bases. The receiver is also drilled & tapped for mounting a Picatinny rail.

BARREL

A Sako cold hammer forged stainless steel barrel of high quality is fitted to the action by a robust thread ensuring safety and precision.

MAGAZINE

The detachable magazines are made from fibreglass reinforced plastic. The magazine holds 3, 5 or 6 rounds depending on the model and calibre. The magazine release button is situated in front of the magazine to prevent accidentally dropping the magazine.

STOCK

The stock of the T3x is designed to be lightweight and durable. Carefully made of walnut or reinforced fibreglass synthetic materials to guarantee solid performance. An optional butt plate with inserts allows you to adjust length of pull. The grip has been specifically designed to be comfortable and firm.

CUSTOMIZE

Tikka rifle accessories are available to suit your needs. See page 138 for more details.

WIDENED EJECTION PORT

The T3x receiver introduces a widened angular ejection port that makes it easier to feed one cartridge at a time.

ROBUST BOLT SHROUD

Our T3x models come with a high-quality, durable metallic bolt shroud that covers and shields the rear of the bolt body and the firing pin.

FEATURES YOU CAN RELY ON

Tikka T3x's features provide world-class functionality and ultimate precision.

MODULAR STOCK

T3x has a modular synthetic stock that has interchangeable pistol grips, making it possible to modify the angle of the grip. This allows for multiple shooting positions. Additional grips are sold separately.

The T3x synthetic stock also has an additional attachment point which allows you to change the width of the stock's fore-end.

RECOIL PAD

The recoil pad technology incorporated in T3x models reduces the impact of recoil on the shooter. The robust pad allows you to fully concentrate on the accuracy of your shots.

NON-SLIP GRIP

The T3x synthetic stock has an asymmetrical grip pattern and shape that has been specifically designed to give a solid grip in all conditions.

VERSATILE RAIL ATTACHMENT

Always keep the target in your sight. The T3x models have extra screw placements on top of the receiver so that you can robustly attach a Picatinny rail – even when using larger scopes.

STOCK NOISE REDUCTION

Be as silent as the forest. All fixed T3x synthetic stocks have a foam insert within the interior of the rear stock. This lowers the stock-generated noise and can help you keep your target in sight. Not available for models with an adjustable cheek piece.

T3X UPR STAINLESS (ULTIMATE PRECISION RIFLE)

RRP from \$3,499

The Ultimate Precision Rifle introduces a new kind of lightweight stock construction. The bedding features an extra layer of carbon fiber mixed with fiberglass for increased rigidity and accuracy. The stock is coated with a rough surface for excellent grip in any condition, and also features an adjustable cheek piece making the UPR ideal for use with large optics. The UPR also features a piccattiny rail, Teflon coated bolt, medium contour stainless steel barrel, enlarged bolt-knob, 10-shot magazine, two-stage trigger, and a threaded muzzle.

Available in 6.5CR and 308

TIKKA T1X

Tikka T1x MTR introduces Rimfire Cartridges to the Tikka line up with two popular calibres: 22 LR and 17 HMR.

The name MTR stands for 'Multi Task Rimfire'. The barrel of the T1x MTR has been designed with an intermediate profile to get the accuracy benefits of a heavy barrel while keeping added weight to a minimum. The rifle weighs 2.6kg. The action footprint of the T1x is the same size as other T3x Rifles and can therefore be fitted with stocks & accessories compatible with the T3x range. The stock of the T1x is also compatible with many accessories available for the T3x: including vertical pistol grips, wider fore-end, coloured grips etc. The T1x the trigger mechanism is the same as that of the T3x rifles ensuring a high quality and familiar trigger. The T1x magazine holds 10 shots in both .22LR and .17HMR calibres. The T1x has a smooth stainless steel bolt for quick reloading. The MTR offers the familiar feel of the T3x, but in Rimfire calibres.

TIKKA T1X MTR - RIMFIRE - RIGHT HAND

RRP from \$1,249
Available in .22LR and .17HMR

TIKKA T1X MTR - RIMFIRE - LEFT HAND

RRP from \$1,349
Available in .22LR and .17HMR

T1X HUNTER

RRP from \$1,449

The T1x Hunter features a beautiful walnut stock, and a blued barrel & action. The barrel is cold hammer forged from premium steel for accuracy and longevity.

Available in .22LR and .17HMR

TIKKA T1X UPR - ULTIMATE PRECISION RIMFIRE

RRP from \$2,099

The best choice for practical rimfire shooting. The T1x Ultimate Precision Rifle introduces a new kind of lightweight stock construction. The bedding features an extra layer of carbon fiber mixed with fiberglass for increased rigidity and accuracy. The stock is coated with a rough surface for the best grip in any condition and also features an adjustable cheek piece making the UPR ideal for use with large optics.

Available in .22LR and .17HMR

Fiona lining up in Fiordland with the Tikka T3x Aspire we use in the show

This year's filming has again seen the crew venturing into some amazing wild places, from searching for an ancient Wapiti bull in the vast Fiordland mountains, Quail hunting in some dense Central Otago Matagouri, to sneaking up close on Red deer in the steep hill country of Marlborough

The season has certainly had its challenges with endless unsettled weather patterns, Covid-19 doing the rounds among the team, and the arrival of my second child, ensuring every week is bit of a juggling act! All these trials however do make you really appreciate the time away in hills that you get as a reset for the body and mind, and I'm very grateful for the support of our loyal brand partners who allow us to continue showcasing our hunting lifestyle to the

masses on television.

Our Tikka T3x Aspire chambered in 7mm Rem Mag has clocked up a lot of miles all over the country and despite the tough conditions we've exposed it to, it continues to be extremely accurate and has never missed a beat. Having faith in your hunting rifle goes a long way when those critical opportunities present themselves. The Beretta A400's have given us faultless reliability on all our Waterfowling adventures, and

the conditions experienced on Lake Wairarapa were some of the roughest we've ever encountered while filming! It was also great fun to try some of Beretta's upland shotguns on our quail hunt where a light and fast pointing gun was a must.

Will we get to try Sako's 100 year anniversary offering this season, the new Sako 100? Only time will tell if stock of the rifle will make it out here to New Zealand before we wrap up filming but rest assured, our all new season is going to be a great one.

Keep your eyes peeled for Season 9 of NZ Hunter Adventures coming early 2023 to DUKE and TVNZ1!

Willie

The Sako 100 Carbon in the field next to a Whitetail buck taken on the Sako hunt in Finland - unfortunately not mine! This one was taken by Gemma Dunn from Australian Womens Shooter Magazine. Keep an eye out for some kiwi imagery once we get a rifle in NZ

In October I was fortunate enough to be one of 12 journalists from around the world to be invited to the Sako factory in Finland for the release of their brand new flagship rifle, the Sako 100.

The new switch-calibre rifle is a credit to Sako's world leading engineering, and a tribute to their 101 years in operation. And while I found the rifle superb; clever, beautifully finished and classy - what really stole the show for me was the company. Rather than a swarm of sales personalities armed to the teeth with buzz words, we were met and introduced to the new rifle by genuine staff. The very head of the marketing team, the researchers, the engineers, the hands on people who were a part of not just the 100 but the Tikka T3, the Sako S20 and so many of the other offerings from this Scandinavian powerhouse. Meeting these people said to me that Sako took us seriously. It gave us the chance to ask them any questions we liked and expect a genuine answer, like had they fixed the extractor complaints? Yes. Was this model in stainless steel so it could actually be used in New Zealand? Yes. The Sako 100 felt like a fitting celebration for a time honoured

company. An exercise in craftsmanship, prestige and class. After the introduction, and some fascinating insight to Beretta international (a phenomenal company - 496 years old, the world's oldest gunmaker, and still family owned) and the direction Sako is taking in to the future we had the chance to feel a Sako 100 in our own hands. Right there at the press event was both a wooden and a carbon model for us to drool over. While I was initially drawn to the carbon, for this kind of elegant rifle the beautiful walnut stock complemented the blackened barrel perfectly. With so much more than simple performance at play; the celebration of Sako's heritage, and the feel of elegant craftsmanship, it was the wooden model my eye was drawn back to every time.

The factory tour was more of the same. An immersion in their fantastic history - founded as a division of the civil guard to repair Maxim machine

guns and old Mosin Nagant's they've grown to a world leading rifle and ammunition manufacturing company. Along the way you can't help but pick up on their importance to Finland. First saved in hard post-war years via ownership by the Finnish Red Cross, to prosperity under ownership by the Finnish technological giant Nokia, and finally welcomed into the fold of master gunmakers by Beretta's management in 2000.

And all throughout I was humbled by little old New Zealand's impact. In the history documentary there is a crate of rifles labelled 'New Zealand' with what looks to be 'NZFS Trading' beneath in the 50's, almost certainly a shipment of our beloved Sako Vixen 222's ready for cullers. That continues today with downunder (us and Aussie) making up 20% of Sako's sales, a significant achievement for our little markets.

Keep an eye out for a detailed review of the Sako 100 in NZ Hunter Magazine once we finally get some here in NZ to test! **Flip through this catalogue to find all of the specs and calibres.**

Luke

John Geiger from SCI putting the Sako 100 Wooden model through it's paces at the Sako range

TIKKA T3X TAC A1

T3X TAC A1 - THE GAME CHANGER

The Tikka T3x TAC A1 changes the game, for the best accuracy in long distance shooting. 10-shot steel double stack magazine. Full Length Picatinny rail, Free floating 13.5" M-LOK Handguard, medium contour barrel. Enlarged Bolt-handle. The folding, fully-adjustable stock meets the most demanding MIL / LE standards and enables the rifle to be setup to perfectly fit any shooter. The hammer forged match-grade barrel comes factory threaded and includes a muzzle brake. The TAC A1 also features an adjustable 2-stage trigger for accuracy and safety. A special Teflon coating on the bolt reduces glare and increases the smoothness of the action. All varmint and tactical models feature a 5-shot sub-MOA guarantee. Available in 223, 6.5CR, 260 and 308win

T3X TAC A1

TIKKA RINGS AND MOUNTS

Tikka Optilock Mounts offer a strong and secure scope mounting solution while complementing the design of the rifle.

Unlike conventional scope mounts, the Optilock rings feature a polymer ring insert within the ring that evenly distributes clamping force for better protection of your optics.

An anchor point on the base of the rings/mounts lock the mounts in place and ensure the mounts cannot move under recoil resulting in a rock-solid zero.

Optilock rings & bases are made from a billet of high-quality steel, creating a solid optic mounting solution with ultra-precise sizing.

FOUR TORX SCREWS

Designed to evenly distribute the clamping force

COPOLYMER INSERTS

Protect the scope and spread the load evenly across the entire circumference

ROBUST STEEL BASE

Provide a solid mount to the Tikka integral rail

RINGS

Made from solid steel with a concave internal surface to hold the polymer insert

PERFECT FIT

Designed specifically for your Tikka Rifle these rings ensure a perfect fit for repeatable accuracy

Built-in recoil lug for solid mounting

TIKKA CARBON BIPOD

NEW FOR 2022

The Tikka bipod is a custom made combination from the Javelin production. It has the head of the "Javelin Lite" and legs from the "Javelin Pro Hunt" with rubber locks.

Carried off the rifle and attached in seconds, this bipod is designed for hunters who need to cover lots of ground but be ready in an instant. By using high-grade carbon fiber, the bipod is really light weighted at 170g and does not compromise the balance of the rifle, making it perfect for hunters on the move, especially as it can be attached and detached in an instant using the 'Spartan Magnetic Attachment System'.

- Locking cant facility for uneven terrain
- Track targets with the traversing function or use in locked target mode
- Lockable, extendable legs that are easy and quick to operate with a single hand
- Quick and easy to swap to other rifles using the spartan magnetic attachment system
- Secure sling attachment
- Low profile adapter makes carrying a slung rifle comfortable
- Supplied with storage case and a classic rifle adapter kit

With over 45 years experience in precision engineering, Victrix Armaments brilliantly combines traditional manufacturing with modern technologies to offer a complete and high quality product range. Victrix 3 main values are passion, precision and perfection. Victrix Armaments makes innovation and mechanical precision a priority. Our attention to detail ensures a high level of quality and enables our rifles to reach the height of precision.

VENUS X

The first European rifle designed for Precision Rifle Series® shooting, ready for delivery and in different versions. Leave the unexpected to your competitors. Available in calibres: 6.5 Creedmoor and .308 Winchester. The action will be in 17-4 PH, the same used for the Victrix rifles of the Professional line, a hammer forged barrel in 24" manufactured by Lothar Walther, a chassis in light alloy machined from billet, a six-symmetrical-lug bolt and a double-feed, double-stack 10-round magazine. The new buttstock is designed and manufactured following PRS shooting specifications.

Calibres	Length	Barrel	Twist	MagCap	Stock	Weight	Colour	RRP
308	Min. 975 mm/Max. 1225 mm	24"	11"	5	Adjustable	6kg	Black Adonised	\$5,699
6.5 CR			8.5"					

GLADIO X

"The essence to the service of precision", this is the presentation of the new entry level model of one of the classic Victrix Armaments products in the Professional line: a Lothar Walther hammer forged barrel in ARMAD®, an octagonal forend in light alloy with M-LOK® system, a 20 MoA integrated monobloc top rail according to STANAG 4694/Mil std 1913 and an integrated monobloc Anschutz rail for mounting a bipod, a Victrix Sporting X single-stage trigger.

Using superior quality forged steel, state-of-the-art technology and high precision machine tools; combined with the centuries-old skills of polishers, engravers and stock makers, Uberti is able to create historical firearms with the same loving care with which the originals were crafted all those centuries ago. Uberti joined the Beretta Group in the year 2000. The Company then moved into a brand new ultra-modern building in 2002 with up-to-date facilities, and excellent environmental conditions for its workers. High-tech machinery was also introduced on a large scale. Uberti is proud to claim that ardent collectors and demanding shooters from all over the world find Uberti reproduce the same shapes, mechanics, and ballistic features of the originals - but are enhanced by modern production methods and materials.

UBERTI REPLICAS

RIFLES

1866 YELLOW BOY CARBINE & SPORTING RIFLE

Carbines feature a round barrel profile, and sporting rifle features an octagonal barrel profile

Calibre	Barrel Length	RRP
38SP	19inch - carbine (round barrel)	\$2,349
45Colt	19inch - carbine (round barrel)	
44/40	19inch - carbine (round barrel)	
38SP	20inch - sporting rifle (oct barrel)	\$2,299
45Colt	20inch - sporting rifle (oct barrel)	

The 1866 Yellowboy Rifle was a marked improvement over the Henry rifle. It became a worldwide hit. It had a convenient new type of loading gate devised by Winchester plant superintendent Nelson King. It passed cartridges through the side of the receiver. This improvement made the lever action more functional and allowed for the installation of a wooden forend.

1873 SHORT RIFLE

Calibre	Barrel Length	RRP
.357mag	20inch	\$2,499
44/40	20inch	
45Colt	20inch	
32-20	20inch *special sporting short rifle	

The Winchester 1873 Rifle was called the "rifle that won the West." When the gun was first offered, it was chambered in the powerful new .44-.40 cartridge. The .44 calibre bullet was propelled by 40 grains of black powder. The success of the 1873 Rifle was assured when Colt quickly offered its Peacemaker in the same calibre. Then a cowboy needed only 1 cartridge belt for a lever-action rifle plus his 6-shooter.

1873 COMPETITION RIFLE

Calibre	Barrel Length	RRP
.357mag	20inch	\$2,699
45Colt	20inch	

The Winchester 1873 Rifle was called the "rifle that won the West." The competition version features a short-stroked lever action for faster reloads and colour case hardened steel receiver.

1894 LEVER ACTION RIFLE

Calibre	Barrel Length	RRP
38-55	20inch	\$2,449
38-55	24.25inch	
38-55	26inch	

The Winchester Model 1894 is a classic design that is just as dependable and revered today since its introduction in 1894. The Model 1894 was a combination of the best features of all previous Winchesters and the cartridges Winchester developed for the action. No repeating rifle system ever made will appeal to the eye and understanding of the shooter as this will. It's strong, light and elegant.

1885 HIGH WALL

With an 1885 High Wall single shot sporting rifle or carbine from Uberti, you can relive a time when rifle shooting was more than a pastime. It was a serious business. Like the original High Wall Winchester rifles, today's guns are chambered in the classic buffalo cartridge of .45-70. Available in various configurations including carbine, sporting, and long rifle versions.

Calibre	Barrel Length	RRP
45-70	28inch carbine (round barrel)	\$1,999
38-55	28inch carbine (round barrel)	
45-70	30inch sporting rifle (oct barrel)	\$2,099
38-55	30inch sporting rifle (oct barrel)	
45-70	32inch long rifle (oct barrel)	

UBERTI SCOUT RIMFIRE LEVER ACTION

The Uberti Scout is the ultimate small-bore lever action rifle chambered in .22LR and .22WMR. This is an all original lever action firearm based on the classic styling of the Old West lever gun. The Uberti Scout embodies the best features of the proven lever-gun design that goes back as far as the mid-1800s. Chrome-plated alloy receiver with a walnut stock. Great for small game hunting and plinking. A unique feature of the Uberti Scout is that it has a cartridge mechanism allowing controlled round-feed, so the gun can be fired reliably while held at any angle.

Calibre	Barrel Length	RRP
22LR	19inch	\$1,049
22WMR	19inch	\$1,199

1873 REVOLVER CARBINE

The Colt Buntline 1873 Single-Action target revolver has become one of the icons of the Old West. Only 31 of the original Buntline revolvers were ever produced, and only 18 of those are around today. The name Buntline Specials was given to long-barreled Peacemakers, based on this story: Tradition has it that dime novelist Ned Buntline presented special-order 1873 Colt revolvers with extra-long barrels, target sights, and detachable wire shoulder stocks to a select group of Old West celebrities. They included Wyatt Earp and Bat Masterson.

Calibre	Barrel Length	RRP
.357Mag	18inch	\$1,549
45Colt	18inch	

1858 NEW ARMY TARGET CARBINE

The Remington Arms Company began production of 1858 New Army single-action revolvers, and 5 years later the revolver had gained a foothold. In the years following the Civil War, the black powder firearms maker also manufactured a carbine version of the 1859 New Army, called the 1858 Target Carbine, in smaller numbers.

Calibre	Barrel Length	RRP
.44BP	18inch	\$1,149

*Note that this is a black powder Cap and Ball firearm and does not use cartridges.

1851 NAVY REVOLVER

The Navy, Pocket Navy, Army, and Police Black Powder Revolvers all evolved between 1851 and 1862 from one model originally designed by Colt. By the start of the Civil War, Colt had refined the Navy into a sleek, streamlined weapon with an improved loading lever.

Calibre	Barrel Length	RRP
.36BP	7.5inch	\$699.99

1858 NEW ARMY REVOLVER

Though many percussion revolvers were on the market before during and after the Civil War, no firearm offered such a challenge to the dominant Colt revolvers as did the 1858 Remington. The 1858 Revolver was considered by many to be every bit the gun a Colt was and then some. It is said that soldiers of the Civil War not only preferred it by far as their choice of sidearm but would actually trade a handful of Colts for one Remington New Army. In fact after the war the Remington out-sold the Colt as a surplus weapon to veterans who had experienced first hand how the two guns stood up side by side to the rigors of combat use. The strength of the Remington had always been in its favor.

Calibre	Barrel Length	RRP
.44BP	8inch	\$949.99

1860 ARMY REVOLVER

The 1861 Navy is often acclaimed as Colt's most handsome pistol. Colt worked to perfect his cap and ball revolver, designing the 1860 Army around a lightweight frame, but chambered for the more powerful .44 calibre ball. The first models featured fluted cylinders, while later models incorporated a belted cylinder for added strength and a "creeping" loading lever for easier loading. The sleek 1860 Army is considered to be the ultimate combat handgun of the percussion era.

Calibre	Barrel Length	RRP
.44BP	8inch	\$699.99

1873 CATTLEMAN REVOLVER

Made in 1872 this is a gun that needs no introduction. The buyer can specify either the "old model" screw retainer for the cylinder pin or the more convenient "new model" plunger.

Calibre	Barrel Length	RRP
.357Mag	5.5inch	\$1,399
44/40	5.5inch	\$1,049
45Colt	5.5inch	\$1,049

1873 CATTLEMAN EVIL ROY REVOLVER

Features include a wide square notch rear and wide constant width front sight, slim grips checkered, an action tuned by a skilled gunsmith complete with lightened trigger, hammer springs and improved internals for reliability.

Calibre	Barrel Length	RRP
.357Mag	4.75inch	\$1,149
45Colt	4.75inch	

1873 CATTLEMAN EVIL ROY REVOLVER STAINLESS

Made in 1872 this is a gun that needs no introduction. The buyer can specify either the "old model" screw retainer for the cylinder pin or the more convenient "new model" plunger.

Calibre	Barrel Length	RRP
.357Mag	4.75inch	\$1,399

Stoeger AIRGUNS

Stoeger Airguns are modern, high-tech air rifles with the look and feel of quality, European sporting arms. Developed by Italian engineers and designers, Stoeger airguns combine rugged, efficient design with quality manufacturing. Known for quality, accuracy and power, the guns serve as excellent training devices for marksmanship and safety principles. They also provide recreational shooters with a fun and economical shooting experience as well as being ideal for light pest control.

Stoeger Airguns Rifles are modern and technologically advanced, with the appearance, ergonomics, and quality of European sporting firearms.

Developed by Italian engineers, they combine assertive design with precision and quality of manufacture. Stoeger Air Guns are suitable for a wide range of recreational shooting, including target shooting and hunting small game. The X3 rifle is specially designed for youth with its short 30cm length of pull. It's compact and lightweight, and is cocked by simply tilting the barrel. Arming force is reduced and the ergonomic sleeve on the barrel makes cocking effortless. Like all Stoeger Air Guns, the ambidextrous automatic safety is located at the rear of the rifle. This avoids having to place the finger inside the trigger guard - improving safety. The 370 mm long high quality steel barrel ensures accuracy. Features adjustable fibre-optic sights and a 2-stage trigger. The receiver has a dovetail for scope mounting.

RX5

The challenge for the designers when designing the new RX line was to:

Develop an ergonomically perfect design that is modern, accurate, high-quality, and easy to use.

The RX represents the perfect match between technological style, technical efficiency, and attention to detail. The elegant and ergonomic shapes make the gun fit the shooter perfectly. Stoeger AIRGUNS and its RX line translate technology into style, accuracy, and precision.

RX5 SYNTHETIC COMBO

Compact Performance: lightweight rifle with a 4x32 scope. Weighs only 2.4kg without scope.

The Multi Grip System gives the shooter the choice of the most appropriate grip for their needs.

Innovation, Technology and Style are the three principles behind a fully new concept. Stoeger AIRGUNS designer's new challenge has been to develop and implement something special that could convey new emotions. The unique design and ergonomic shapes makes the air rifle fit perfectly to the shooter. The shooter can adapt their rifle to their own style by choosing between a Soft Touch Grip or the innovative Stoeger Pro Adaptive checkering. The RX20 comes with extra grip kits in blue and orange to enable the user to customise the rifle to their preferences.

X50 MAGNUM COMBO

Features magnum power for high performance.

The X50 is a magnum sized, high-power, break-barrel airgun, and features a cocking grip, precision rifled barrel, fully adjustable rear sight with fibre-optic bead, adjustable two-stage trigger, automatic ambidextrous safety, ambidextrous black synthetic stock, double cheek-piece, checkering on pistol grip and fore-end, rubber recoil pad, and a receiver with dovetail rail ensures a scope can be mounted securely. X50 models are mounted in Monte Carlo-style stocks for improved control and target acquisition. The raised, ambidextrous cheek-piece lets you shoot comfortably, while the magnum performance ensures enough power for any airgun task. Checkering on the pistol grip and fore-end ensures a firm grip in wet weather and rubber butt-pad provides a solid shoulder mount.

HOW TO SIGHT IN YOUR STOEGER AIR GUN/SCOPE

Step 1 - Install Stoeger target into Stoeger Pellet Trap. **2** - Ensure a suitable back-drop behind your target / pellet trap. **3** - Fire three pellets at the target and inspect point-of-impact. We suggest starting at a close distance and working your way back. **4** - Adjust scope turrets in the direction you require the point-of-impact to shift to. **5** - Fire three more pellets at the target and again inspect the point-of-impact. **6** - Again adjust the scope turrets in the direct you require the point of impact to shift to. **7** - Repeat until you are happy with the point-of-impact at your chosen distance.

Stoeger XM1 PCP (Pre-charged Pneumatic) Rifle

The XM1 has a cutting-edge, distinct, and streamlined design with multiple characteristics. It's sporty, elegant, and innovative. The XM1 appears strong and self-secure. All surfaces are designed with clear attention to ergonomic and anatomic functionality. The innovative Italian design by Stoeger AIRGUNS can immediately be recognized at first glance. The extreme proportions and the unique lines of its profile make the new XM1 a real multi-use rifle.

STOEGER PELLETS

Precision Pellets for Air Rifles

Each shooter has specific expectations, and the choice of ammunition is essential in meeting those expectations. Stoeger's finely selected range of pellets offer the shooter a wide variety of different pellet designs and weights, and offer a pellet to suit any requirement. Precision is the combination of several parameters among which the quality and consistency of the pellet is the most important factor. Stoeger pellets are made in Germany with unparalleled know-how and state-of-the-art technology for consistent performance - shot after shot.

X-SPORT

Target Practice

Lightweight accurate pellet for training and hobby shooting. Meets all underlying requirements. For universal use. 500 per Tin. 5 Tins to an Outer. Available in .177

Article	Calibre	Part#
STOEGER X-SPORT PELLETS 500PER TIN .177CAL	.177	STGXPELLETSPORT177

- Weight: 6oz

BURRIS CUSTOM TURRET

FREE WITH EACH BURRIS SCOPE PURCHASED*

BURRIS CUSTOM TURRETS / KNOBS

Burris has the ability to manufacture custom scope knobs/turrets, that are specifically calibrated to match your rifle, load, and even environmental conditions. Custom turrets are available for Veracity and Signature-HD Burris Scopes.

The user simply inputs parameters that are specific to their rifle - such as projectile, velocity, and ballistic co-efficient. Burris can then calculate and manufacturer custom turrets that are precisely calibrated to match the trajectory based off the ballistics data provided.

Each turret is also labelled with a unique identifier of your choosing, allowing turrets to simply be switched when swapping between various loads or rifles. eg one for your hunting load and one for your PRS load.

Step 1 - visit the Custom Knob section of the Burris Optics website burrisoptics.com/ballistics

Step 2 - Select your scope model and reticle. Input your Zero Distance & scope height above the bore

Step 3 - Select your load from the drop-down menu or input your custom load data.

Step 4 - Enter the environmental conditions at which the rifle is zeroed.

Step 5 - Enter your personal details and a name or identifier for your custom knobs.

*Offer Exclusive to Burris Signature Dealers. Shipping fees will apply. Visit berettanewzealand.com to find your nearest Burris Signature Dealer.

VERACITY - Award-winning, premium hunting scope from Burris

The Burris Veracity is our top-of-the-line hunting scope featuring a 5x zoom system, a larger field of view, and a choice of front or rear focal plane design. Front focal plane reticle ensures trajectory compensation is always correct on any power setting. Advanced windage and elevation adjustment is accurate and repeatable, and matches the reticle's MOA measurement system. **Available with the Modular Adjustment Dial (M.A.D.) Turret System!**

- Versatile 5-times zoom system provides a larger field of view at close ranges and better target acquisition at long ranges
- Front focal plane reticle design ensures trajectory compensation is always correct
- Progressively Thick Crosshairs (PTC)
- Reticle measurements remain correct and proportional to the target, regardless of power setting
- High-grade optical glass provides excellent brightness and clarity
- Index-matched, Hi-Lume® multicoating provides low-light performance and glare elimination
- Double internal spring-tension system ensures the scope holds zero through shock, recoil, and vibrations
- Waterproof
- 30 mm body tube
- Nitrogen-filled body tubes prevent internal fogging in the cold, rain and humidity
- Zero stop on turrets
- Precision-gauged and hand-fitted internal assemblies
- Side focus for easy-to-reach parallax adjustment from 50 yds. to infinity
- Covered by the Burris Forever Warranty
- 1/4MOA exposed turrets now included with every veracity

Modular Adjustment Dial (M.A.D.) System

The Modular Adjustment Dial (M.A.D.) System allows you to choose from exposed turrets or capped turrets on both the windage and elevation adjustments. The windage and elevation turret adjustment system has been engineered to accept the M.A.D. System knobs. Zero Click Stop function is standard in both turrets styles. **The system also allows for custom knobs to be added to the riflescope to perfectly match the trajectory of your ammunition. The M.A.D system is compatible with Veracity, XTR2, and XTR3 scopes. Custom knobs are available online from Burris. Veracity scopes now include both the capped and uncapped MAD turrets with every scope.**

VERACITY 2-10X42MM

The smallest member of the Veracity family, the Veracity 2-10x42mm is small enough for driven hunts and bush stalking, but 10x magnification offers enough zoom for most longer range hunts as well. The compactness and low weight make it very popular for lightweight hunting rifles. 1/4MOA exposed turrets now also included with every Veracity.

Reticle	Magnification	Focal Plane	Ø tube	Length	Weight	RRP
Ballistic E1	2-10x42mm	1st Focal Plane	30 mm	343 mm	645g	\$1,499

VERACITY 3-15X50MM

The Veracity 3-15x50mm is a new size for hunting scopes. 3-15x has been very popular in tactical shooting, because it offers a combination of high field-of-view, and extreme magnification at the upper end. 1/4MOA exposed turrets now also included with every Veracity.

Reticle	Magnification	Focal Plane	Ø tube	Length	Weight	RRP
Ballistic E1	3-15x50mm	1st Focal Plane	30 mm	359 mm	712g	\$1,799

VERACITY 4-20X50MM

Long range precision target shooters are familiar with 4-20x front focal scopes. Burris now brings that size to long range hunters. The Burris Veracity 4-20x50mm allows target shooters and hunters the same finely-tuned precision. 1/4MOA exposed turrets now also included with every Veracity.

Reticle	Magnification	Focal Plane	Ø tube	Length	Weight	RRP
Ballistic E1	4-20x50mm	1st Focal Plane	30mm	381 mm	772g	\$1,999

VERACITY 5-25X50MM

The Burris Veracity in 5-25x50mm size is designed to push the limits of long-range hunting, and to pull double duty in long range target and precision rifle shooting. It's perfect for varmint hunting and any other very long range hunting where pinpoint accuracy becomes critical. 1/4MOA exposed turrets now also included with every Veracity.

Reticle	Magnification	Focal Plane	Ø tube	Length	Weight	RRP
Ballistic E1	5-25x50mm	1st Focal Plane	30mm	417 mm	800g	\$2,199

Signature HD Riflescopes. Bridging the gap between a Hunting and Long Range optic.

Built on a legacy of reliability and confidence when it matters most, the new Burris Signature Series line of rifle scopes offers shooters the Burris Signature experience with bright clear optics and rugged dependability. Available in three different magnification levels and various front and rear focal plane reticle options, the Signature Series brings high-end features to a platform serious hunters and shooters will enjoy.

The Signature Series produce crisp, bright images using premium, multi-coated glass. Precise machining, zero stop on all target knobs and push/pull locking turrets provide the reliability and ease-of-use that seasoned hunters demand. Signature HD rifle scopes are waterproof, shockproof and fog proof and come with the Burris Forever Warranty.

New Push-Pull locking turrets allow the zero to be set simply by lifting up the knob, turning it to zero, then pushing it back down.

Zero Stop feature on all target style knobs, when set, prevent the user from accidentally dialing down past their zero point when returning to zero.

SIGNATURE HD 2-10X40MM

Shooters and hunters who routinely shoot at shorter distances or hunt dense bush will benefit from the Burris Signature HD 2-10x40 rifle scope's wide viewing angle, low magnification and the speed at which the targets can be acquired. The 2-10x40 is built with a one-inch nitrogen-filled tube and includes push/pull locking turrets that can easily be reset to zero making the signature HD the ideal "dial up" hunting optic. Featuring the Ballistic E3 reticle, shooters are given a simple method for determining holdover and wind drift.

E3 Reticle

Reticle	Magnification	Ø tube	Length	Elev Adj	Zero Stop	Weight	RRP
Ballistic E3	2-10x40mm	1inch	11.7inch	120 MOA	NO	505g	\$999.99

SIGNATURE HD 3-15X44MM

The versatile the Signature HD 3-15x44 scope is ideal for shooters who value a bright, clear view over a wide range of distances. The Burris Signature HD 3-15x44 features a lightweight 1-inch tube construction, with dialable turrets; complete with zero-stop and side-parallax adjustment. The Signature HD bridges the gap between lightweight hunting scopes and dedicated long-range optics; offering consistent long range dialability in a lightweight package that is perfectly suited to the hunter.

E3 Reticle

Reticle	Magnification	Ø tube	Length	Elev Adj	Zero Stop	Weight	RRP
E3 Illuminated	3-15x44mm	1inch	13.2inch	80 MOA	YES	570g	\$1,299

SIGNATURE HD 5-25X50MM

For precision or long-range shooting, the 5-25x50 Signature HD version is built with a 30mm nitrogen-filled tube and is available with several different reticle options. Featuring a 30mm tube, dial-up turrets with zero stop, a side parallax adjustment, and options for First or Second Focal Plane; the Signature HD 5-25x50 is the perfect choice for the long range / hunting cross over rifle or PRS style setup.

Fine Plex Reticle

Reticle	Magnification	Ø tube	Length	Elev Adj	Zero Stop	Weight	RRP
Fine Plex	5-25x50mm	30mm	14.3inch	65 MOA	YES	681g	\$1,599
E3 Illuminated	5-25x50mm	30mm	14.3inch	65 MOA	NO	681g	\$1,699

Burris Fullfield IV - The evolution of a legend

On any hunt, there's a few things you can count on. Wary game. Lousy weather. And your Fullfield IV scope. With over 50 years of steady performance and constant refinement, the latest Fullfield riflescope from Burris® is the surest companion a hunter or shooter can have. The completely redesigned Fullfield IV™, is rugged, lightweight, and most importantly reliable for an accurate shot every time. Five Fullfield IV models are offered each with an improved 4x optical system, premium multi-coated lenses for edge-to-edge clarity combined with low light performance. Fullfield IV riflescopes are built with nitrogen filled tubes and are waterproof, shockproof and fog proof and can handle recoil from all platforms including air rifles, slug guns and high calibre rifles. New designed sleek turret knobs allow easy finger adjustments. Like all Burris products, the Fullfield rifle scope comes with the Burris Forever Warranty.

- Popular and premium traditional hunting riflescope at an affordable price
- High-grade optical glass provides excellent brightness and clarity with lasting durability
- Improved 4x zoom system with premium, multi-coated lenses for edge-to-edge clarity and low light performance
- Durable, integrated-eyepiece design has no-slip grip for easy adjustment in the field
- Sleek new design with finger adjustable turret knobs, adjustable parallax (select models).
- Wide selection of reticles for both hunting and long-distance target shooting
- Positive steel-on-steel adjustments assure repeated accuracy
- Waterproof
- Nitrogen-filled scope tubes prevent fogging, even in cold and rain
- 1-in. or 30mm body tube depending on model
- Guaranteed by the Burris Forever Warranty.

FULLFIELD IV 2.5-10X42MM

The 2.5-10x42mm offers a wide field of view and three reticle options including an illuminated and non-illuminated Ballistic E3 and the proven Plex for quick holdovers across most hunting cartridges. Designed around a one-inch main tube.

Reticle	Magnification	Ø tube	Length	Weight	RRP

Ballistic E3 Illuminated	2.5-10x42mm	1inch	11.6inch	477gm	\$699.99

FULLFIELD IV 3-12X42MM

For versatility, from shooting varmints to big game, the 3-12x42mm is the right choice and is particularly suited for long range shots with any of its three reticle options.

Reticle	Magnification	Ø tube	Length	Weight	RRP
Ballistic E3	3-12x42mm	1inch	12inch	499gm	\$699.99

FULLFIELD IV 4-16X50MM

The 4-16x50mm is designed to reach out for shots at long range targets with three reticles to choose from including the E3 illuminated, Long Range MOA illuminated and new Burris exclusive 6.5 CM™ reticle. Quick holdover estimates for 6.5 creedmoor are now possible ideal for match when shooting or hunting when confidence and seconds matter. Side parallax adjustment and focus as close as 10 yards allows for fine tuning for crisp views perfect for all platforms including rimfire and air guns..

Reticle	Magnification	Ø tube	Length	Weight	RRP
Ballistic E3	4-16x50mm	1inch	12.4inch	590gm	\$979.99

FULLFIELD IV 6-24X50MM

For even more magnification and precise holdover estimation 6-24x50mm has increased 6x magnification and three reticle options built on a 30 mm tube for long range shooting activities. Available with three reticle options including the Ballistic 3, this is the only Fullfield model to feature the Fine Plex and SCR MOA reticles. This model also features close focus at 10 yards and parallax adjustment.

Reticle	Magnification	Ø tube	Length	Weight	RRP
Fine Plex	6-24x50mm	30mm	15.6inch	709gm	\$1,199
Ballistic E3	6-24x50mm	30mm	15.6inch	709gm	\$1,049
SCR MOA	6-24x50mm	30mm	15.6inch	709gm	\$1,099

Burris Droptine. Our most affordable scope, but still fully loaded

Droptine scopes come packed with features, but still perform in a big way with quality Burris glass, Ballistic Plex reticles, and lifetime warranties. Plus there are specific models calibrated for both centrefire or rimfire rifles.

- Available in four different sizes, with seven different scopes in the Droptine family to cover all uses.
- High-grade optical glass provides excellent brightness, clarity, and lasting durability.
- Quality precision-ground lenses are larger than those of comparable scopes, for better light transmission.
- Index-matched, Hi-Lume® multi-coating aids in low-light performance and glare reduction, increasing your success rate.
- Durable, integrated-eyepiece design has no-slip grip for easy adjustment in the field.
- Positive steel-on-steel adjustments ensure repeatable accuracy.
- Waterproof.
- Nitrogen-filled scope tubes prevent internal fogging even in cold, rain, and humidity.
- Stress-free, 1-piece, solid outer tube is durable enough to withstand shock and vibrations of even the heaviest-recoiling calibres
- 1 inch tube
- Burris Ballistic Plex Reticle for precise accuracy and hold-overs
- Guaranteed by the Burris Forever Warranty

Ballistic Plex Reticle

DROPTINE RIMFIRE 3-9X40

3-9x is THE classic size for hunting scopes. A great all round scope for rimfire hunting and target shooting. The 3-9x40mm is compact and lightweight, with a nine times magnification that provides enough distance for most hunting situations. The simple, rugged reticle has holdover for precise shots at extended ranges. The low-profile turret is finger-adjustable. A separate eyepiece and power ring allow for flip-up lens caps. Set to be parallax free at 50yards.

Reticle	Magnification	Ø tube	Length	Weight	RRP
Ballistic Plex	3-9x40mm	1inch	313 mm	370g	\$449.99

Focus at 50 Yrds

DROPTINE 3-9X40

3-9x is THE classic size for hunting scopes. A great all round scope for hunting and target shooting. The 3-9x40mm is compact and lightweight, with a nine times magnification that provides enough distance for most hunting situations while keeping the package small and light weight. The simple, rugged reticle has holdover points for precise shots at extended ranges. The low-profile turret is finger-adjustable. A separate eyepiece and power ring allow for flip-up lens caps. Set to be parallax free at 50yards. The riflescope is resistant to a lifetime of field use, heavy recoil, and harsh vibration. It is protected by the Burris Forever Warranty™.

Reticle	Magnification	Ø tube	Length	Weight	RRP
Ballistic Plex	3-9x40mm	1inch	313 mm	370 g	\$449.99

Focus at 60 Yrds

DROPTINE 4.5-14X42

The largest scope in the Droptine family, the Burris Droptine 4.5-14x42 mm scope is designed for people who want to extend their ethical and accurate shooting distance without breaking the bank. The only Droptine model with adjustable parallax focus: necessary when targets are further and further away.

Reticle	Magnification	Ø tube	Length	Weight	RRP
Ballistic Plex	4.5-14x42mm	1inch	331 mm	511 g	\$699.99

FOREVER WARRANTY™

Every Burris optic is covered by the **Burris Forever Warranty™***
 We will repair or replace your Burris optic if it is damaged or defective.
 The warranty is automatically transferred to future owners.

- No repair or replacement charge
- No questions asked
- No warranty card needed
- No receipt needed

*Excludes Burris Thermals/Thermal Range.

XTREME TACTICAL XTR II

XTREME TACTICAL XTR II

The XTR II scopes are designed for pinpoint accuracy at long distances. Because those of us whose realities live in the 1,000-plus-yard realm know the difference between success and failure grows exponentially with every foot. Features like the 5x Zoom System and Zero Click Stop Adjustment Knobs—among many more—allow for an epic level of shot control at distances mere mortals only dream of covering accurately.

- Designed for serious, technical, long-range precision rifle shooters—both tactical and competitive.
- Front focal plane reticle design allows the reticle size to increase or decrease as magnification is increased or decreased; trajectory compensation is always correct and proportional for the selected power setting; also called first focal plane or FFP.
- Ergonomic side focus and easy-to-reach parallax adjustment from 50 yds. to infinity, for improved accuracy at long distances.
- 34 mm body tube.
- Excellent resolution optics and tactical-appropriate reticles and adjustment knobs make it easier to identify targets and adjust for windage and elevation.
- Versatile 5-times zoom system allows for a larger field of view at close ranges and better target acquisition at long ranges.
- Zero Click Stop adjustment knobs let you quickly and easily revert back to the original yardage setting without counting clicks.
- Advanced windage and elevation adjustments are fast and easy. Accurate and repeatable reticle adjustments match the measurement system of the reticle.
- High-grade optical glass provides excellent brightness and clarity with lasting durability
- Index-matched Hi-Lume® Multi-coating aids in low-light performance and glare elimination, increasing your success rate
- Illuminated reticle reduces time to get on target in any lighting condition and dramatically increases accuracy when target is dark
- 11 brightness settings (spanning night vision, low light, and daytime), with a convenient battery-saver position between each setting
- Triple internal spring-tension system allows the scope to hold zero through shock, recoil, and vibrations
- Waterproof
- Nitrogen-filled body tubes prevent internal fogging in the cold and rain
- Precision-gauged and hand-fitted internal assemblies maintain a consistent point of impact through the magnification range, regardless of shock and vibration
- Solid, 1-piece outer tube is stress-free and durable; withstands shock and vibration from even the heaviest-recoiling calibres
- Covered by the Burris Forever Warranty™

XTREME TACTICAL XTR II 3-15X50 MM

The XTR II 3-15x50 mm riflescope features a 5-times zoom system and 25% thicker tube construction than the original XTR™ Riflescope. A 3-15 power magnification range ensure a versatile and accurate optic for all types of shooting. MIL Reticle scopes have .1Mil clicks. MOA Scopes have 1/4inch clicks.

Reticle	Magnification	Focal Plane	Ø tube	Length	Weight	Elev Adj	RRP

F-Class MOA illuminated

XTREME TACTICAL XTR III

Designed, machined and assembled in Greeley Colorado, the new XTR III line of riflescopes feature new reticle designs and enhanced field-of-view. Inspired by tactical and competition shooting, precision and reliability are at the core of the XTR III line of optics.

Available in a 3.3-18x50mm and 5.5-30x56mm, both models are built with a 34mm tube for increased strength and extended adjustment range. Elevation adjustments up to 120 MOA on the 3.3-18x50mm will take the 6.5 Creedmoor past one mile.

Expanded side parallax adjustment on both models allows fine-tuning focus at shorter distances.

Premium glass and optical improvements, including a smaller eyepiece signature and larger eye box, provide best-in-class field-of-view, deeper depth of focus, and outstanding light transmission.

The new Special Competition Reticle (SCR) 2 MIL reticle features a gridded "Christmas tree" design, allowing extremely fast and accurate windage and elevation compensation and clear communication with spotters. SCR Mil and SCR MOA reticles are also available.

RACE DIAL Optional dial was designed for PRS and NRL shooters, with a writable surface - perfect for making custom notes in the field.

DRAGON SCALE Aggressive new knurling and large diameter knobs provide a sure tactile surface for adjustments in any weather, even with gloves.

XTREME TACTICAL XTR III 3.3-18X50MM

XTR III 3.3-18x50mm SPECIFICATIONS:

- Magnification 3.3-18x
- Front Focal Plane
- Reticle Choices: SCR MIL, SCR MOA, SCR2 MIL
- Weight 29.8 ounces
- 50mm objective lens
- Overall length of 13.3 inches
- FOV @ 100 yards: 37.5 ft. at 3.3x and 6.8 ft. at 18x
- 3.5-4 inches of eye relief
- Waterproof/fogproof/shockproof
- Wind/Elevation Click Value 1/0 MIL or 1/4 MOA

ELIMINATOR 5 RIFLESCOPE

NEW FOR 2023

Burris ELIMINATOR[®] 5

RIFLESCOPE - 5-20x50mm

ELIMINATOR 5 5-20X50MM NEW

Two words: No guesswork!

It's plug and play in a rangefinding scope that goes even bigger: Just feed the Eliminator 5 your cartridge's ballistic info and the scope calculates perfect holdover at your exact distance, estimates wind drift, then gives you a bright red dot of accuracy in seconds—all at the push of a button.

RRP \$3,899

- Powerful laser rangefinder extends your range to 2,000 yards
- Improved ballistics calculator accommodates centerfire, rimfire, muzzleloader and slug gun loads
- Wireless Bluetooth remote for laser activation
- Proven X96 reticle displays a 10-mph wind value to indicate wind hold-off for your specific cartridge at the indicated range
- Mounts to any Weaver-style or Picatinny base. No rings required

Bluetooth Remote

X96 Reticle

ELIMINATOR IV

ELIMINATOR IV 4-16X50

The new Eliminator IV offers more performance with extended range and enhanced ballistic software. Significantly extends the range and accuracy of your favorite rifle, with ranging capability out to 2,000 yards. It greatly increases the distance at which you can make an ethical shot. A new onboard ballistics calculator offers more data and faster aiming solutions. Bluetooth laser activation has been added to make it easy to range your target. With a trophy in sight, there's no need to fumble with smart phones and handheld range finders. Feed the Eliminator IV your cartridge's ballistic info and the scope calculates perfect holdover at your exact distance, estimates wind drift, then gives you a bright red dot of accuracy in seconds—all at the push of a button. Just aim, range and shoot. It's that simple.

WINDAGE COMPENSATION In addition to distance, the scope's digital display will show a 10 mph. Wind Value for your specific cartridge at the indicated range to your target.

Combining four tools into one advanced optic. Eliminating problems, so you can focus on the shot.

- Precision Optic.** All lenses are fully multi-coated for sharp, crisp, edge-to-edge clarity.
- Smart Dope Card.** Simply program your cartridge and load into the Eliminator. The precise holdover is automatically determined.
- Digital Inclinometer.** An internal inclinometer delivers a precise aiming point for angled shots up to 45°.
- Laser Range Finder.** Powerful, built-in laser rangefinder will instantly determine the distance to your target out to 2,000 yards.
- Improved ballistics calculator** Accommodates centerfire, rimfire, muzzleloader and slug gun loads
- Wireless Bluetooth** remote for laser activation
- Proven X96 reticle** Displays a 10-mph wind value to indicate wind hold-off for your specific cartridge at the indicated range
- No rings required.** Mounts to any Weaver-style or Picatinny base.

Wireless Bluetooth remote for laser activation

ORACLE II BOW SIGHT

ORACLE 2 RANGEFINDING BOW SIGHT

The Oracle 2 improves our original Oracle design with user requested upgrades and enhancements! Eliminate guessing distance with this improved rangefinding bow sight that gives a precise distance to target at full draw. No more aiming between pins – the Oracle 2 instantly calculates and displays the exact aiming point for the distance and shot angle.

- Improved accuracy, easier to set up and sight in.
- Works for right- and left-handed shooters.
- Fixed 20-yard pin dead battery fail safe.
- Program up to two different arrows.
- Improved auto-bright detection for LED pins
- Improved manual brightness control
- Rugged, all aluminum construction
- Enhanced Water Resistance

HOW IT WORKS

Sight in at 20 yards plus two farther distances and the Oracle 2 learns your arrow's entire trajectory curve. Sight in up to 2 additional distances (optional) for extreme long range accuracy. The rangefinder measures the exact distance to your target while at full draw. It instantly calculates the exact trajectory for the distance and shot angle. The sight displays a bright, LED pin at the exact aiming point for your shot.

Visible Laser Output	Visible Laser Wavelength	Infrared Laser Output	Infrared Laser Wavelength	Operating Temperature	Storage Temperature	Battery life (LRF activations)	To deer hide	To reflective target	Minimum range	Weight	RRP
<5mW, Class IIIa	630 to 660 nm	<25W peak power, Infrared Class 1, Eye Safe	905 nm	-20F to 140F	-40F to 158F	2000	200 yds	500 yds	5 yds	20 oz.	\$1,599

ORACLE X RANGEFINDING CROSSBOW SCOPE

The most innovative and technologically advanced crossbow scope available today. Mounted on your crossbow, the built-in laser rangefinder gives an exact distance to your target and provides an exact aiming point. The automatic trajectory compensation eliminates holdover and compensates for both distance and angle.

Battery life (LRF activations)	Minimum Range	Non Reflective	To reflective target	Weight	RRP
3000+	5 yards	200 yds	500 yds	30.8 oz.	\$1,749

- An integrated inclinometer helps to determine shot placement when shooting at steep angles up or down.
- Program and save up to two bolts to cover lightweight, fast bolts and heavy, high penetration bolts for different hunts.
- Wireless remote
- Water Resistant
- Digital level to reduce unwanted cant
- Rugged, lightweight composite construction
- Precise aluminum mount / adjustment system
- Locking screws to ensure adjustments stay in place

FASTFIRE III

A new generation red-dot reflex sight

Smaller, lighter and more compact than most red dot sights, the new FastFire III is extremely strong and durable, with its stainless steel and anodised aluminium frame. Its small size and weight allow the FastFire III to be mounted directly on any firearm. Due to its unlimited eye-relief, the FastFire III can be used on handguns, shotguns and rifles. The Fastfire III has an extremely wide field of view and is parallax-free between 9 and 137m. The outer surface of the lenses is fully treated to allow maximum transmission of light. The new FastFire III is 100% waterproof and is submersible.

Main Features:

- Battery access from above - without disassembly.
- Windage & elevation adjustable without tools.
- 3 manual brightness settings & 1 auto brightness adjustment.
- Low battery indicator.
- Protective lens cap with clear lenses.
- Waterproof.
- Base mounts to a Picatinny rail.
- Available with 3MOA or 8MOA dot sizes.

FASTFIRE III 3MOA

Red-dot 3MOA				
Option	Dot Size	Length	Weight	RRP
With Mount	3 MOA	49mm	43grams	\$649.99
Without Mount	3 MOA	49mm	26grams	\$629.99

FASTFIRE III 8MOA

Red-dot 8MOA				
Option	Dot Size	Length	Weight	RRP
With Mount	8 MOA	49mm	43grams	\$649.99
Without Mount	8 MOA	49mm	26grams	\$629.99

FASTFIRE II

FASTFIRE II 4MOA

The FastFire 2 provides a 4-MOA red dot. Its automatic brightness sensor adjusts to your environment, so you can keep slamming targets.

Option	Reticle	Length	Weight	RRP
With Mount	4 MOA	46mm	43grams	\$499.99
Without Mount	4 MOA	46mm	26grams	\$479.99

RT-1 RED DOT SIGHT

The RT Series was designed for competition and tactical shooting without breaking the bank. The RT-1 is a true 1x magnification for fast target acquisition and both eyes open shooting. It comes with a high and low base mount so you can customize the fit to your specific firearm and to ensure a correct cheek weld.

Dot Size	Length	Weight	RRP
2 MOA	49mm	137grams	\$599.99

SIGNATURE HD SPOTTING SCOPE

Take glassing to a higher level with the Burris Signature HD Spotting Scope. With a 20-60x magnification range, you can save time and energy by finding and evaluating trophy animals from a mountain away. The HD lenses and apochromatic lens system give you the advantage in the field by eliminating colour fringing and delivering edge-to-edge resolution at any magnification.

- Built-in sun shade reduces glare and protects the objective lens from rain and snow
- Both coarse and fine focusing adjustment are possible with the forward mounted focus knob
- Eyecup can be adjusted to accommodate eyeglasses
- Lightweight, durable design, with a die-cast magnesium body that is armored for greater protection in the field
- Angled eyepiece and rotating tripod mount makes it easy to use whether you're standing or prone

Magnification	Objective Diameter	Field of View	Eye Relief	Length	Weight	RRP
20-60x	BM626016	60-117 ft	18-20mm	390mm	1905 g	\$3,149

Fastfire Red-dot Attachment The Burris FastFire red dot sight can be easily attached, and provides an incredibly fast and accurate way to acquire your target. No more getting lost in the magnification when sighting down field. Two attachment points, on either side of the Signature HD, are provided. (FastFire sold separately).

Provision to mount FastFire Red-Dot

Neoprene protective carry case and protective cover included.

Optional 30x wide angle eye-piece provides even more range, detail and a wide field of view. Available with either:

- No Reticle
- SCR Mil Reticle
- SCR Moa Reticle
- Angled eyepiece and rotating tripod mount makes it easy to use whether you're standing or prone

Eye Piece	Reticle	Part#	RRP
30x Wide Angle	SCR MIL	B0626201	\$349.99
30x Wide Angle	SCR MOA	B0626202	\$349.99

SIGNATURE HD BINOCULARS - TAKING GLASS TO A HIGHER LEVEL

The premium binocular in the Burris lineup, the Signature HD Binoculars offer high-performance HD lenses and BaK-4 prisms that produce sharper images and edge-to-edge clarity. The multi-coated lenses create maximum light transmission and reduce any glare when viewing in harsh conditions.

SIGNATURE HD BINOCULARS

It's All About the Glass - HD lenses and BaK-4 prisms. It maximizes the amount of light getting to your eyes. Indexed matched lenses eliminate color aberrations, and give true colour.

PRISMS: Made of BaK-4 glass for optimum resolution, Phase Correct coated for optimum color fidelity and Dielectric Coated for maximum light transmission

LENSES: HD precision ground optical glass for high light transmission, less glare, excellent resolution, and edge-to-edge clarity, Hi-Lume Index-matched fully multi-coated for optimum resolution, light transmission and glare omission.

HOUSING: Ultra-rugged body, Robust metal eyecups for unusual ruggedness, Nitrogen filled for waterproof and fog-proof performance, even in harsh weather extremes. Open bridge design for light weight and very comfortable handling. Durable carrying case and neoprene neck strap for all-day comfort and Rubber armored with unique no-slip texturing.

THREE SIZES: Signature HD Binoculars come in your choice of 8x42, 10x42 or 12x50. Match the size to exactly what best suits your needs: wider field of view, or the ability to get closer.

8x Magnification and HD glass for optimal light transmission and true color fidelity.

10x Magnification brings the minute details into focus without additional weight and bulk.

12x Magnification is the best choice for wide open country and terrain.

Large, 50mm objective gathers more light for better detail in low light.

Magnification	Obj Dia	FOV @ 1000y	Focus	Weight	RRP
8x	42 mm	330ft	Fast	658gm	\$1,049
10x	42 mm	314ft	Fast	658gm	\$1,149
12x	50 mm	251ft	Fast	690gm	\$1,249

DROPTINE BINOS

The Burris Droptine Binocular line is designed to provide the ruggedness demanded by hunters and other extreme binocular users. Comfortable and lightweight enough for extended glassing, the easy-grip exterior rubber armoring makes them easy to hold, even in the wet conditions or with gloves.

Just like the Droptine line of riflescopes, the Droptine binoculars provide the performance you demand at a price point that won't make your eyes water.

Strength where it matters

Eye cups have frequently been a weak point on binoculars. Burris makes them from durable aluminum, not plastic. They'll stand up to drops and abuse.

Ten or Eight

Droptine binoculars are available in the two most common magnifications: 8x or 10x. The 8x model has a wider field of view, letting you see more through the lenses. The 10x will get you closer.

- Made with BaK-4 prisms for optimum resolution
- Hi-Lume Index-matched fully multi-coated lenses for optimum resolution, light transmission and glare omission.
- Phase Correct coating for optimum color fidelity and true-to-life colors
- Dielectric Coated for maximum light transmission and bright images
- Rubber armored with unique no-slip texturing
- Nitrogen filled for waterproof and fogproof performance even in harsh weather extremes
- Ultra-rugged body
- Robust metal eyecups for extreme ruggedness
- Includes durable carrying case and neoprene neck strap for all-day comfort.
- 5.6 x 4.8 x 2.0 inches.

Hunters have trusted Burris optics for over 40 years and the new Droptine binoculars continue the tradition of reliability, affordability and performance. Versatile enough for any style of hunting, they are big on performance but won't slow you down.

8x magnification provides detail and a wide field-of-view. 10x magnification brings the minute details into focus without additional weight and bulk.

Magnification	Obj Dia	FOV @ 1000y	Focus	Weight	RRP
8x	42 mm	330ft	Fast	570gm	\$549.99
10x	42 mm	314ft	Fast	570gm	\$499.99

XTR SIGNATURE RINGS

New XTR Signature Rings were designed for the tactical shooter. They deliver plenty of holding power, with less weight and adjustable cant/MOA angle.

Provides precision customization of cant to maximise usable elevation adjustment. Included inserts allow for 5, 10, 15, 20, 25, 30 and 40MOA of cant.

- Unique, self-centering, dual steel clamps with full cross-through connection assure proper centre on any width Picatinny rail, while adding extra strength
- Revolutionary Pos-Align® Inserts technology, in a tactical ring configuration
- Pos-Align Inserts guarantee perfect centering and maximum scope-to-ring contact for tremendous gripping power without damaging the scope finish
- Corrects misalignment caused by off-centre receiver holes
- Corrects for bases or rings being slightly off-centre
- No need for expensive tapered bases or shimming for thousand-yard shooting
- Rugged, robust aluminium tactical rings save weight and mount on any Picatinny and most Weaver style rails

Item	Part#
SCOPE BUBBLE LEVEL FOR 30MM AND 34MM TUBES	BS626006

SCOPE COVER

Protect your scope during storage and transport. These waterproof scope covers prevent corrosion and fogging. Made from super-soft, breathable fabric that shields your scope from dust and dings.

Item	To Suit Objective Size	Part#
BURRIS SCOPE COVER SMALL SUIT 8.5 TO 10.5 INCH SCOPE LENGTH	Up to 29mm	B0626062
BURRIS SCOPE COVER MEDIUM SUIT 10.5 TO 13 INCH SCOPE LENGTH	Up to 48mm	B0626062
BURRIS SCOPE COVER LARGE SUIT 13 TO 17 INCH SCOPE LENGTH	Up to 61mm	B0626063

LENS PEN

The retractable soft brush gets rid of dust and other lens debris. A chamois pad on the other end removes oils, fingerprints, and moisture with a self-replenishing cleaning compound.

Item	Part#
LENS CLEANING PEN	B0626050

TARGETS

Easily detect bullet holes on these targets, designed for shooters by shooters. The non-glare, orange-red graphics contrast with an off-white, non-reflective background. Has 9 primary aiming spots in varying shapes and sizes. Designed for different yardages and scope magnifications. 10 targets per package.

Item	Part#
BURRIS TARGETS 13 X 13 INCH. PACK OF 10	B0626001

STEINER

Innovation, tradition and experience are the parameters which have made STEINER a recognized expert in optical technology for 60 years.

Trust in our professional optics, earned over several decades has promoted Steiner to the rank of world leader and has allowed us to develop a particularly strong sensitivity for what matters most to our different customers.

STEINER NIGHTHUNTER H35

THE HEART OF THE NIGHTHUNTER

Quantum Vision a perfect combination of state-of-the-art thermal sensor, outstanding display quality and advanced software development. Combined with outstanding usability, handling and the legendary Steiner ruggedness.

PREDATOR 8 SERIES

BEST IN CLASS OPTICAL CLARITY

OVERALL FEATURES

- Best-in-class optical Clarity
 - Massive field of view
 - 92% Transmission
- Versatile for different Hunting pursuits
- Integrated customizable Ballistic turret
 - Illuminated E3 Reticle
 - 1/4 Moa Clicks
 - Zero Stop

STEINER PREDATOR 8 SERIES

PREDATOR 8 2-16X42 RRP \$2,799

Predator 8 delivers perfectly repeatable and precise reticle adjustment. Illumination, side and elevation adjustment knobs are audible and tactile.

PREDATOR 8 3-24X50 RRP \$2,999

An integrated ballistic turret allows the shooter to reliably and accurately compensate bullet drop at different distances. Four different numbered rings, allows the shooter to set marks for custom preferred distances.

Reticle	Magnification	Focal Plane	Ø tube	Ø objective	Length	Weight	Windage/Elevation Click value	RRP
E3	2-16x42 mm	2nd	30 mm	42 mm	343 mm	663g	1/4 MOA	\$2,799
	3-24x50 mm			50 mm	373 mm	714g		\$2,999

Rugged and lightweight
Designed to take the challenges afield, this series is consistently reliable regardless of your preferred rifle.

STEINER TACTICAL T5XI

Steiner T5XI

The T5XI Series brings unmatched clarity, accuracy, and self-assurance to any situation, from combat to competition. Precise German engineering, rugged U.S. construction, slick Never-Lost™ turrets, and new SCR™ reticle gives you the victor's edge in long-range shooting. The T5 series are long-range scopes with 34mm tubes, the new Special Competition Reticle (SCR™) is etched on glass for durability and precision. Second Rotation Indicator on the turret shows each mil of elevation through the indication window on the elevation turret, preventing the user from getting "lost" in their elevation. Front focal plane design. The T5xi are the benchmark for tactical long-range precision optics.

Steiner Tactical T5XI Features

- One-Piece Oversized 34mm Tube** - increases strength and reliability. Also allows for greater total elevation and windage adjustment for longer ranges.
- Special Competition Reticle (SCR™)** - designed by Steiner for precision competition use. Located on the first focal plane, it offers an extended illumination area, 2/10-mil windage and 1/2-mil holdover lines. 1/10-mil ranging brackets allow for precise distance ranging.
- Tapered, All Metal Magnification Ring** - is angled so the shooter can see the magnification setting while positioned directly behind the scope.
- Large, Easy-to-Grip Windage/Elevation/Parallax/Illumination Knobs** for positive, non-slip adjustment of the dioptre, reticle and parallax settings.
- Low Profile Turrets** - parallax adjustment and illumination controls are less likely to hang up or snag during movement.
- Second Rotation Indicator** - a Steiner exclusive that shows each mil or elevation through the indicator window on the elevation turret. After the first 120 clicks (MIL), the numbers on the scale change automatically preventing the shooter from getting lost on the dial.
- Locking Dioptre** - that prevents accidental rotation of the dioptre.
- Waterproof/Fog-proof/Shockproof** - durable construction that can stand up to any cold or wet condition. Waterproof to depths of 33 feet, and impact testing on all optical and electronic components.
- Consistent Eye Relief** - and a generous eye box throughout the magnification range eliminates the need to reposition your eye when changing magnification.
- Throw Lever** - that allow for quick and easy magnification changes.
- Lens Covers** - supplied with high quality Tenebraex lens covers.

STEINER

Nothing Escapes You

STEINER, the only all-in-one solution provider

for high-end military optics, binoculars, and goggles for the Defence & Security markets. The 5x zoom range on the M5XI series, and 7x zoom range of the M7XI designates the STEINER MILITARY range of scopes as the ultimate instrument of optical precision even at very high magnification, and is designed for long range shooting beyond 1500m. An innovative category of rifle scopes, Steiner Military optics have been developed in close collaboration with the special forces to meet their requirements of high precision, ultimate repeatability, and rugged durability. The M5XI & M7XI series exceed the highest military standards in terms of optical excellence, uncompromising robustness, and repeatable precision. The Military series provides brilliant performance that tactical shooters and operators can rely on during their operational deployments. Built to withstand the harshest environments, from freezing Arctic temperatures to tropical humidity, to the hot dry desert climate - the Steiner MILITARY range of scopes will not let you down.

STEINER MILITARY M7Xi 2.9-20X50MM & 4-28X56MM

Steiner M7Xi

Based on the outstanding success of the M5Xi - used today by Special Forces around the globe - Steiner sets a new benchmark with the ultimate long-range rifle scope. The M7Xi 4-28x56 features a 7x zoom and an impressive field of view of 1.42-9 m at 100 m. The new 7x zoom range gives the operator more flexibility and a higher resolution for all distances, while the large field of view and the outstanding optical quality render a perfect overview of the surroundings at all times. The new M7Xi 4-28x56 has been designed to resist the toughest conditions, and is covered by the Steiner Heritage Warranty.

STEINER MILITARY M7Xi IFS 2.9-20X50 & 4-28X56MM

Steiner's Intelligent Firing Solution (IFS) with integrated customizable display provides all the important ballistic information to the operator - in real time.

Steiner sets the new standard for tactical rifle scopes by entering the digital world. Based on the outstanding success of the M5Xi - used today by Special Forces around the globe - Steiner sets a new benchmark with the ultimate long-range rifle scope, the M7Xi IFS 4-28x56 with a 7x zoom range and an impressive field of view (1.42-9 m at 100 m). The Intelligent Firing Solution with integrated customizable display provides all the important ballistic information to the operator in real time. The built in Ballistic Calculator and Sensor Suite determines the bullet point of impact in real time by assessing the temperature, air pressure, inclination and wind drift. Just turn the turrets until the distance and wind correction in the display matches the information provided by the spotter and you will be on target. The display provides information about levelling and the current turret setting. The display and user interface can be customized to user needs. All information can be arranged, or deactivated as needed via smart phone app (Bluetooth connection).

MSR2	4-28x56 IFS	1st	34 mm	56 mm	27 MILS	\$9,999
G2B Mildot						

The display can be 100% customized using the IFS App. Simply, download the app to set up your riflescope directly from your phone via blue-tooth.

PREDATOR 10X42 LRF

Binocular's like no other. The new Predator 10x42 LRF. Steiner's Diamond coating™ revolutionizes High Definition optics, a secret Steiner technology that generates superior light transmission and high contrast imaging. All this in a compact, waterproof and fogproof lightweight design that provides the military ruggedness and durability you expect from Steiner. Decades of range-finding binocular experience packed into a sleek, innovative hunting binocular. The Predator LRF electronics components are completely integrated into the binocular housing providing an optimal grip without bumps or protrusions getting in the way. Dual eyepiece dioptre adjustment ensures crystal clear focus while the built-in angle compensation displays an adjusted distance as well as true horizontal distance. Easy brightness control and fast scan mode to make ranging easier from 4m-1800m with a +/- 1m accuracy.

Steiner's compact and powerful 10x42 roof prism design, lets you achieve the most accurate results through standard, rain, long-distance, or short-distance modes, and quickly learn a landscape through continuous scan mode.

- 10x42 roof prism LRF binocular
- Visible in display range measurement and angle of target

INNOVATION

- No external electronics parts visible (no side bumps, no back bumps, no visible battery compartment)
- Visible in display: distance and angle or real distance
- Fastest and most precise laser measuring in its category
- 4 Different measuring modes (standard, close, far, bad weather)
- 6 display brightness settings
- Scan modus

MILITARY GRADE OPTICS HUNTER READY

- HD Glass with Predator Diamond Coating™
- Laser texture for improved grip in all situations
- Roof prism design - Compact and powerful

FAST-CLOSE-FOCUS™
Central focusing wheel requires minimal rotation for quick absolute sharpness from close-up to infinity.

PREDATOR DIAMOND COATING
High Definition optics meet Predator Diamond Coating – the secret Steiner technology generates superior light transmission, high contrast and high definition imaging.

LASER TEXTURE
Laser texture provide a good grip for these compact and lightweight models making them ideal for hunting or any outdoor excursion.

STEINER HERITAGE™ WARRANTY – FOR THE LIFE OF THE PRODUCT For the lifetime of the product, we will repair or replace the product at no charge to you. The Steiner Heritage Warranty does not cover loss, theft, deliberate damage or cosmetic damage that does not hinder the performance of the product.

- No warranty card needed.
- No receipt required.
- Warranty is fully transferable to future owners of the product.

PREDATOR AF SERIES

A giant leap forward in binocular design and function.

This advanced optical design keeps everything in focus, near and far. CAT coatings and a wide field of view make these the ideal hunting binocular. Steiner's unique CAT (Color Adjusted Transmission) technology let you see deer and other game that are hiding in foliage and shade.

The new Predator AF (Auto Focus) keeps prey in focus at any speed, any distance. Advanced CAT™ lenses reveal game hidden in cover or shadow. Bright 3D depth and detail enhance your target in all conditions. 8x30 or 10x42 power. Bombproof Makrolon® body. Agile open-bridge design. Waterproof, fogproof, razor-sharp scouting anywhere. Clearly, this is the one to take when you're out for meat.

Magnification	Field of View	Focus	Size (inch)	Weight	RRP

HX SERIES BINOCULARS

HX SERIES

Pick your challenge, and there's new HX to master it. From dark woods to sunlit ridges, lowland bogs to the high plains, new optical approaches and frame designs promise brighter, clearer images, extended field of view, easier handling, and all-weather toughness to bring more success to every hunt.

With the innovative HX Series, you've got a new arsenal of optics to match your style and quarry. The high-precision roof prism design, advanced lens coatings, ergonomic rubber-armored polycarb frames, and four specific-performance models let you focus on your individual adventure like never before.

Magnification	Field of View	Focus	Size (W x H)	Weight	RRP
8x42 mm	377ft @ 1000y	Fast Close Focus	125x147mm	785 g	\$1,199
10x42 mm	326ft @ 1000y	Fast Close Focus	125x147mm	795 g	\$1,299
15x56 mm	241ft @ 1000y	Fast Close Focus	145x165mm	1256 g	\$1,799

New Frame Design
Makes the HX binoculars easier to grip, more comfortable for extending scouting

N2 injection™ system
Seals 14-psi pressurized dry nitrogen into the optic, for fogproof clarity in any condition - from arctic cold to desert heat.

Wider Field of View
Helps you spot wildlife more quickly, at greater distances, than ever before.

Fast-Close-Focus™
Central focusing wheel requires minimal rotation for quick, absolute sharpness from close up to infinity.

Steiner Nano-Protection
Hydrophobic molecular coating creates a lens surface so smooth, water sheets off and dirt, dust, snow, and fingerprints are repelled.

Bright, Crisp Images
Are the result of new lens coatings that increase light transmission across the spectrum

Ergonomic Eyecups
Shield against side light and drafts for clear, crisp view.

Makrolon® housing
Is durable polycarbonate with NBR Long Life rubber armoring, creating a lightweight, rugged chassis that withstands 11 Gs of impact. Impervious to harsh conditions for generations of trusted use.

World's First Sunlight Adaptive Binocular.

Exclusive AutoBright™ optics offset dazzling light automatically, for the best view under the sun. Tuck this 4-inch marvel into your pack, pocket, or purse, for glare-free viewing from 6.6 feet to infinity. Fast-Close Focus, rainproof and rugged, with versatile 8x magnification. It's the trimmest, lightest yet.

Sunlight Adaptive optic

- Unique AutoBright™ adaptive lens technology cuts through glare to capture every detail
- Premium optics give you a sharp, clear picture every time
- Compact, light weight, and texture-armored to go anywhere

SKYHAWK 4.0 SERIES

Professional binoculars for nature watching. Ideal for animals, birds, and nature in general.

The new SkyHawk series offers a unique optic experience and course features STEINER'S legendary ruggedness. The SkyHawk 4.0 allows you to observe nature clear and sharp, at any time. The outstanding High-Contrast-Optics deliver razor-sharp images and render every detail of nature in spectacular clarity. No other binocular can compare in terms of clarity, look, ergonomics, and handling.

8X32 A true featherweight, particularly practical for long-term observation. Thanks to their wide field of view and excellent clarity, they are unbeatable and highly versatile for use when observing birds and nature.

8X42 Versatile binoculars perfect for observation in difficult weather conditions. The large field of view and the comfort when handling guarantee unparalleled observation of nature.

10X32 Compact and lightweight binoculars with superb optical performance that allows the user to observe birds and wildlife from a distance. The 10x magnification reveals a fascinating wealth of natural beauty and details.

10X42 10X magnification for long-distance viewing and a 42 mm diameter lens make the 10X42 the absolute top of the Skyhawk series. Crisp clear images, and high magnification makes it the top choice for nature watchers or general purpose use.

The best marine binoculars in the world. Exceptional quality without competition, made by the undisputed market leader.

The Commander Series with its military-grade porro-prism design, is the marine binocular of choice for anyone who makes their living on the water – fishing guides, ship captains, tug boat operators, coast guard, and law enforcement/military. These binoculars are also for those who live aboard or spend weeks on the water - yacht owners, blue water sailors and ocean racers - who need the best in marine optics. The Commander Series has every feature and all the performance serious mariners demand, and are backed by Steiner's unrivaled reputation for total performance on land and sea.

The new NAVIGATOR takes STEINER's popular marine series into a new generation with innovative product features.

Handling is dramatically improved thanks to the new "Open-Bridge-System", while the texturing on the body allows for comfortable and strong grip in any situation. The STEINER Auto-Focus guarantees always sharp images even while handling the product with one hand. All models are reliable under the most adverse weather conditions and keep the promise of legendary STEINER ruggedness.

- **STEINER HIGH-CONTRAST-OPTICS** Delivers bright, high-contrast images, high contour sharpness, and brilliant 3D viewing experiences with natural colour reproduction.
- **ENHANCED COMPASS DESIGN** The modified positioning of the lighting button makes the compass lighting even easier to operate.
- **IMPROVED FIELD OF VIEW** The further extended field of vision offers the best possible overview on the water.
- **ADVANCED ACCESSORIES**
 - New carry bag, so your binoculars stay safe also during off-season
 - Soft neoprene strap with new, universal attachment system
 - Lens protection caps, Rain cover
 - Floating strap with 3M light stripes
- **OPEN-BRIDGE-SYSTEM** Thanks to the "open bridge" the binoculars can now be gripped and held even more securely.
- **SPECIAL RUBBER COATING TEXTURE** The new, wave-like rubber coating texture ensures a secure grip on the binoculars and significantly improves wearing comfort.
- **STEINER AUTO-FOCUS** Once set, the STEINER Auto-Focus always delivers sharp images without refocusing.

STEINER BINOCULARS

MARINE BINOCULARS

"For over 20 years as a professional sportfishing captain I have relied on my trusted Steiner Binoculars. From spotting feeding birds to put my clients into trophy snapper and tuna to safely navigating multi million dollar vessels into new waters. Using Steiner nothing escapes me"

*Captain Tony Orton
Journey of a Fisherman*

STEINER BINOCULARS

MARINE BINOCULARS

"Steiner Navigator Pro Binoculars with built in compass are one of our most important tools for spotting work ups and surface feeding fish. The Crystal clear glass allows us to really focus in and easily work up sign on the horizon, then the compass guides us directly to the fish"

*Captain Tony Orton
Journey of a Fisherman*

MARINE 7X50

The Steiner Marine 7x50 is the perfect set of quality, water-going binoculars for enthusiasts who want the most performance for their money.

7x Magnification Is the marine standard, with a wide, stable image for tracking other boats, buoys and bridge numbers even in rough water.

High Contrast Optics Provide bright, sharply contoured images with natural color definition for outstanding viewing quality suitable for both beginners and professionals.

Floating Prism System Uses flexible silicone lens mount to absorb severe shock, impact and abuse without damage

Sports-Auto Focus™ System Lets you focus each eyepiece to your vision once, then keeps images razor sharp from 20 yards to infinity. No more chasing focus on moving objects.

Waterproof and Rubber Armored Durable construction that can stand up to wet conditions and ergonomic ridges and pads for a secure, comfortable grip.

Aimpoint

THE AIMPOINT PHILOSOPHY

We believe that the sights of a firearm must simplify aiming, while meeting the greatest requirements in terms of reliability and robustness. We know that conditions in the field can impose extreme equipment requirements; That's why we develop and test Aimpoint products to withstand all the conditions you may have to face. We develop our products so they can run continuously for years on a single battery, so that your red-dot sight is always ready when you need it.

ENVIRONMENTAL AWARENESS

At Aimpoint, we make a point of ensuring that no hazardous or radioactive material is used for our sights.

QUALITY

Aimpoint sights are built to ISO 9001: 2008 and meet the highest quality requirements. Each sight is hand-made in our state-of-the-art facilities in Sweden. It receives an individual identification number and undergoes rigorous testing and quality checks during the manufacturing process.

AIMPOINT - WORLD LEADER

Aimpoint is an internationally recognized leader, and is the creator behind red dot sight technology. After more than 40 years of collaboration with experienced hunters, and military weapons system experts around the world, Aimpoint red dot sights remain the # 1 choice when it comes to robustness, speed, and precision.

When it's time to fire, you need to have absolute trust in your optic.

Why an Aimpoint Red Dot Sight?

To reach their target, a shooter must be able to aim with precision and speed under any conditions. On a shooting bench, there is plenty of time to aim, but in the real world, everything is happening fast. Add tough terrain, bad weather, and high stress; and even the most experienced shooter will be put to the test. Aimpoint Red-dot Sights are superior in many ways to mechanical open sights. The use of other aiming devices require that your area of focus leave the target. With open sights, shooters must align the rear sight and front sight with the target. With traditional rifle scopes, the field of view is considerably limited, and valuable time can be lost when locating the target while looking through a tube with one eye closed, which also reduces perception of the surrounding area.

The Aimpoint Red-dot has proven to be the fastest reticle model to aim, and improves the likelihood of hitting moving targets. Red-dot sights allow you to maintain focus on the target. The ability to shoot with both eyes open means you maintain awareness of what's happening around you, and allows the shooter to quickly adapt to any situation.

Aimpoint Sights are free from parallax error.

Aimpoint sights have no parallax, which means that the visible red-dot stays parallel to the barrel axis of your firearm, regardless of the position of your eye in relation to the sight. This means that you never have to focus on the inside of the sight. When the red-dot is on the target, so are you. You will be able to acquire the target quickly, and will not longer have issues in poor lighting, or when shooting moving targets.

Ease of use.

Aimpoint sights are extremely easy to use. Powered by a mechanical switch or digital contact, an Aimpoint sight can be easily and quickly adjusted to the correct setting even when you are simultaneously looking through the sight. Our sights controls are easy to use in all conditions even when wearing gloves.

Aimpoint's advanced circuit technology.

Aimpoint was the first to develop the red dot sight in 1975, which means that each Aimpoint Red-dot sight benefits from more than 40 years of integrated electro-optical science. Aimpoint's new Advanced Circuit Efficiency Technology (ACET) combines superior accuracy with ease of use, and a considerable reduction in power consumption to optimize the life of the battery. ACET sights can last almost 50,000 hours (over 5 years), for constant use with a single battery. This means 49,000 hours more than other competing sights with the same setting. Aimpoint has taken another giant step by applying its expertise to develop the new series of Hunter sights. Hunter sights offer full-featured product performance with features such as 34mm tubes and digital dimming. Place the dot on the target, tap the trigger, and that's all you have to do. Add an Aimpoint Hunter sight to your favourite firearm and put our science to the test. We are ready when you are.

Suitable for all conditions.

Aimpoint sights work in all lighting conditions, from darkness to bright sun light in the desert. They are fully submersible, so you never have to worry about rain or liquid immersion. Aimpoint sights are designed and tested for use in all weather conditions, from sub-zero temperatures in the Arctic to heat and humidity in the tropics.

Suitable for all types of firearms.

Whether you have a hunting rifle, shotgun, or the latest military rifle; Aimpoint has a red-dot sight to suit.

ACRO C-2

The Aimpoint® Acro C-2 is the next generation in the Acro series with an optimized technology. With the new battery size of CR2032 and new diode technology the Acro C-2 will last for 5 years of continuous use on setting 6/10 (daylight setting). The new LED gives you a brighter 3.5 MOA dot. The Acro series includes a wide variety of available mounting solutions, which make it possible to mount the Acro C-2 optic on several weapon platforms such as shotguns and rifles or utilized as a backup sight on magnified scopes. Tested with a minimum of 20,000 rounds on a .40 cal pistol slide, this small optic has proven to lead in ruggedness and reliability. It is trusted by law enforcement, military, hunters, and sport shooters alike. They all rely on the Acro advantage. The enclosed system makes it reliable and operational in any weather conditions. The Acro C-2 is a lightweight, low-profile optic that provides fast target acquisition and an unlimited field of view.

Unique Features

- 3.5 MOA dot size
- 50,000 hours (over 5 years) of operation on one battery
- Battery installation while optic is still mounted on weapon
- Anodized high strength aluminum housing, semi-matte black
- NVD compatible
- 2 night vision compatible settings and 8 daylight settings
- Weight 60 g (2.1 oz) sight only
- Submersible to 5 meters (15 feet)
- INCLUDES: CR2032 Battery, Aimpoint® Tool
- Fully enclosed system
- Variety of mounting options sold separately
- Optimized for pistol and applications which require a low-profile red dot system
- Height of Optical Axis 14 mm (0.6 in) measured from top surface of mounting platform
- Can be used as a secondary sight on magnifying rifle scopes with the Acro adapter rings
- Fully enclosed housing protects all electronic components of the sight from all elements
- Can be mounted on any Aimpoint Micro sight mount via the Acro mount plate with Micro interface
- Easily zeroed with the Aimpoint tool that comes with the sight. Adjustment clicks you can hear and feel.

LOKAWAY

INNOVATIVE SECURITY

PROTECT YOUR INVESTMENTS

Patented in over 30 countries and across 6 continents worldwide, the Swing'n'Slide system is in a league of its own. Developed with years of security experience, the system provides the ultimate in anti-pry security. By concealing the leading door edge entirely any potential prying intrusion is immediately stopped as there is no point of access to pry the door. Innovative locking design, concealed hinges and a strongly constructed product all come together to provide simple yet very secure features, that combine to make the Lokaway Swing'n'Slide range of products as good as they are today.

Swing 'n' Slide

The world's most revolutionary locking system.

Purposely built to store your firearms and ammunition safely and securely. Lokaway Safes exceed all government standards. The ultimate in anti-pry security. By concealing the leading door edge entirely any potential prying intrusion is immediately stopped as there is no point of access to pry the door. Lokaway Safes allow for direct bolting to structures and feature the patented Swing'n'Slide design with door pins for extra security. The Lokaway offers the best anti-pry security possible with the industry's only break-in replacement guarantee. Make sure you and your firearms are protected.

AXIL operates with a clear vision that innovation is the heart of its business.

With its fast-paced level of product and technology expansion, AXIL has lead the way in providing the very best product designs and advancements to the sporting goods industry. AXIL has and always will deliver the finest performing hearing enhancement and protection devices available. From ultra-comfortable fitting processes, to stereo quality sound performance, to reliable & durable engineering – AXIL continues to redefine the premium hearing protection product segment.

XP REACTOR PLUGS

XP Reactor offers you the most innovative sound filtering solution yet. Simply insert these little ear plugs in your ears- you'll hear sound clearly and naturally- almost seems as if your ears aren't even plugged. Then when loud sounds hit your ears, the Dynamic Mesh Filtering System™ will automatically screen those sounds out protecting your hearing. You'll get 33 dB of noise reduction against loud impulse sounds while still maintaining normal hearing. You'll also have 16 dB NRR hearing protection against general loud sounds. Available in Smoke Grey, Pink, Blue, Green, and Orange. Supplied with key ring storage container.

XP Reactor Plugs	Part#	RRP
XP Reactor Smoke Grey	SPEXPR-SML	\$39.99
XP Reactor Pink	SPEXPR-PML	\$39.99
XP Reactor Blue	SPEXPR-BML	\$39.99
XP Reactor Green	SPEXPR-GML	\$39.99
XP Reactor Orange	SPEXPR-OML	\$39.99

X-PRO PASSIVE HEARING PROTECTION

Simply insert these little ear plugs in your ears then decide which mode you want to be in: First, push the button in to open the valve- you'll hear sound clearly and naturally- almost seems as if your ears aren't even plugged. Then when loud sounds hit your ears, the Dynamic Sound Valve™ will automatically screen those sounds out protecting your hearing. Second, simply close the valve by pushing in again for total hearing protection.

SPORTEAR CUSTOM

Custom-made digital earplugs enhance hearing & block out harmful noise. Comfortable and nearly invisible. SportEAR custom electronic plugs offer the user unparalleled hearing ability as well as protection; at work, in the field, or on the rifle range. Beretta New Zealand's hearing expert can perform a hearing examination to identify the type and level of amplification that will best suit you and your your custom hearing protection. Our expert will then take a cast of your ear canal so your custom hearing protection can be manufactured to precisely fit your unique ear. Optional extras can also be added to your custom plugs including various levels of waterproofing and enhanced warranties; to ensure your SportEAR custom plugs can go where you go. Perfect for the duck shooting Maimai or in the wet forests of Fiordland. SportEAR Custom offers the best performance in hearing enhancement and hearing protection, and is tailored exactly to the specific requirements of the user.

COMING SOON!

Rottweil

In 2022, Beretta Holding S.A. successfully completed the 100% acquisition of the Swiss state-owned RUAG Ammotec Group. As a result Beretta Holding will have the most complete offering of premium products which includes small arms, ammunition, optics, clothing, accessories, and electro optics. Several high-end brands like RWS, Norma, Geco, and Rottweil will be added to Beretta Holding existing portfolio of premium brands. With the integration of RUAG Ammotec Group, Beretta Holding – headquartered in Europe – strengthens its position as one of the leading global players in the industry for hunting, shooting, outdoor, defense and law enforcement.
