

SOIL & AMENDMENTS

Soil Amendments

Black Kow® Organic Mushroom Compost

Mushroom compost is not made from ground up mushrooms as you might think. It's the soil used to grow mushrooms. Since mushrooms are such a delicate crop, the soil is used only once. It is then sterilized, composted, and bagged for home gardeners. This rich, soil-building medium is perfect for vegetable and flower gardens, hanging baskets, shrubs and trees.

40lb - Bag - Organic

BGE226127

UPC 051524606667

**Black Kow® Composted Cow Manure**

The all-natural organic way to improve native soils is to start with Black Kow® composted cow manure - The "Mature Manure." Has 10 times more nutrients than typical garden soil, and 4 to 6 times more cow manure than other brands. Helps provide moisture holding capacity to sandy soils. Holds water and nutrients in the soil around the roots.

Soil Amendments

Wiggle Worm Soil Builder™ Pure Worm Castings Organic Fertilizer

100% Organic. Wiggle Worm Soil Builder™ controls all aspects of the worm's environment 24 hours a day, 7 days a week and 365 days a year which eliminates all variables that could affect pureness. This level of control produces a pure, consistent product that can be used as a soil amendment and as a fertilizer. The nutrients and microbial activity of worm castings produce a "living soil" for plants to thrive in. As they are truly pure castings, you only need a small amount around your plants, vegetables, shrubs or grasses to see beautiful yields and growth. A half handful around the root zone of a transplant will produce up to 3-5 times the fruit and plant growth. A little goes a long way. OMRI Listed®.

Moss & Stone

Exotic Pebbles® Bean Pebbles

Exotic Pebbles® Bean Pebbles are a colorful decorative ground cover that will not deteriorate like mulch does. They can be used indoors or outdoors in flower arrangements, walkways, water features, exposed aggregate flooring or walls, around swimming pools, and many other areas. They feature an elegant semi-gloss finish.

Soil

Lambert® African Violets Mix

Lambert's African Violet Mix is formulated for plants that typically grow under large canopies of shaded vegetation such as African violets but also other plants from the Gesneriads family. Under these canopies, one can expect to find rich organic matter from decayed plants. We tried to emulate a media similar to their habitat, which allows for excellent root development.

Uni-Gro® Vermiculite Soil Additive

Uni-Gro® Vermiculite is a soil additive that uses its accordion-like particles to amend soil by retaining water, improving aeration and prolonging nutrient release. Its ability to retain both air and water makes vermiculite ideal for conditioning container soils. Vermiculite can also be used for seed germination, bulb storage and flower arranging.

Lime, Limestone, Gypsum

Soil Doctor™ Pelletized Gypsum Soil Repair

A naturally occurring mineral made up of mostly calcium and sulfur. Incorporate it into your lawn to counter the damaging effects of salt, animal waste and to break up heavy clay soil. It helps improve drainage and encourages deep, healthy root growth. Gypsum does not alter soil pH, so it is safe to use around evergreens and other plants that require acidic soil to grow.

Organic Soils & Amendments

Malibu Compost Tea for Houseplants

The compost tea supports the microbes in your soil by giving them the microbial food they need to do their job to "mineralize" the nutrients that are in the organic matter of your soil for uptake into your plants. This process known as mineralization is what creates and grows abundance and vitality in your garden.
