# The Bosch Advantage: Commercial Vehicle Segment

Technologies from Bosch are used in almost all leading commercial vehicles – assuring safe, comfortable, and efficient rides. We have dedicated over 125 years of pioneering spirit and expertise in continuous research and manufacturing to achieve this. We continue to work with our unique combination of solutions for spare parts, workshop solutions, and services. Choose the best. Choose Bosch for powering the perfect drive.

Some of the top reasons why dealers and workshops prefer Bosch Commercial Vehicle Parts and Accessories are:

# Auto Electricals

For a Superior Driving Experience.

With over a 100 years of experience, Bosch has a wide range of Alternators, offering solutions to match every requirement. As the leader in the segment, Bosch Alternators offer a reliable supply of electrical energy with improved efficiency.

## Bosch Alternators

### Benefits:

- Splash- and dust-protected
- Protection against voltage spikes for all electrical and electronic components
- More freedom for application engineering
- High reliability; adaptable to extreme climatic conditions
- Low maintenance, long life of carbon brush, slip rings, and bearings

## Range of Alternators with External Fan

### G1-S1, G1-S2

#### Benefits:

- External fan mostly used in tractors prevents mud and water entering from the front
- Zener diode effectively converts AC into DC
- Compact size

Parameters	G1-S1	G1-S2
Range	14 V 23 A – 45 A	14 V 23 A – 45 A
Weight	3.4 kg	3.4 kg
Casting diameter	112 mm	112 mm

## Range of Alternators with Internal Fans

### B0

#### Benefits:

- Reduced size enables heat exhaust, more cooling, and less noise
- Zener diodes for load dump protection
- In-built monolith voltage regulator
- Optimised design and outstanding heat dissipation

Parameters	B0
Range	14 V 40 A – 60 A
Weight	3.4 kg
Casting diameter	114 mm

## B1

### Benefits:

- Internal fans
- Zener diodes for load dump protection
- Compact size and low noise
- Optimised design and outstanding heat dissipation

Parameters	B1
Range	14V 60 A – 85 A
Weight	4.6 kg
Casting diameter	117 mm

## B3

### Benefits:

- Internal fans
- Zener diodes
- Compact size and low noise
- Optimised design and outstanding heat dissipation

Parameters	B3
Range	14 V 70 A – 110 A
Weight	5.5 kg
Casting diameter	136 mm

## KCVP

### Benefits:

- Internal fans
- Compact size and low noise
- Higher output and efficiency
- Optimised design and outstanding heat dissipation
- Vacuum pump helps in smooth braking

Parameters	KCVP
Range	14 V 40 A – 110 A
Weight	5.5 kg–6 kg
Casting diameter	136 mm

## PowerPlus Series

PowerPlus Generators are designed to keep your vehicle's air-conditioning running smoothly even during idle conditions, for a long time. These generators are mostly used in refrigeration systems and bus body-building.

Parameters	
Voltage	24 V
Operating Temperature Range	40 °C – 100 °C
Max. Output Current (hot)	150 A
Rotation	Clockwise (viewed from drive end)
OEM No.	8SC3110VC

## New Baseline Alternators

Bosch's Baseline Alternators are compact and sturdy, and are specially designed for automobiles with low electrical energy requirements.

### Features:

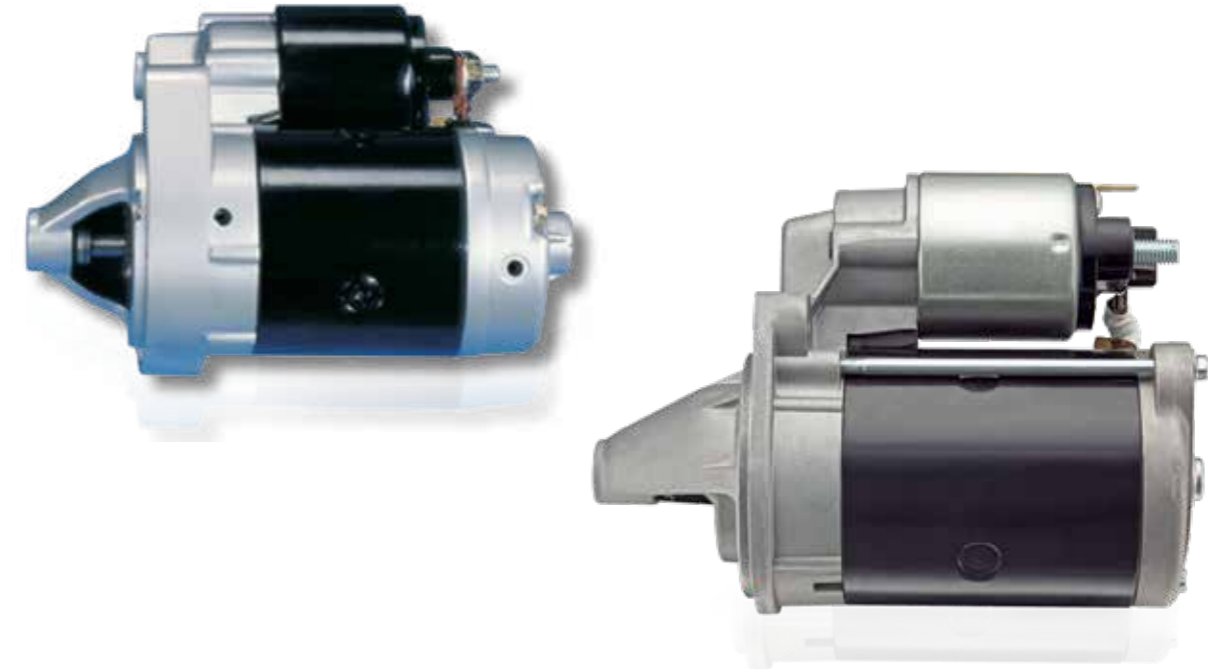

- Compact size with basic functionality
- Robust design
- Improved protection against water and dust
- Maximum ambient temperature:
  - standard up to 950 °C
  - optional up to 1,050 °C

Parameters	B1	B3	B3PI	B3Ph
Output (A)	37 – 70	50 – 90	60 – 100	55 – 110
Weight (kg)	<4.3	<5.0	<5.2	<5.2
Casting diameter	125	136	136	136

# Auto Electricals

Heavy-Duty Starters for Heavy-Duty Applications.

Bosch Starter Motors are specifically built to withstand the harshest environments and are designed as per OEM quality standards, and can deliver maximum performance for the longest periods. Because of higher carbon brush & bearings life, Bosch Starter Motors require very little maintenance.

## Bosch Starter Motors

### Benefits:

- Ability to start under extreme climatic conditions
- Lower fuel consumption and emission
- Better solenoid performance under adverse conditions
- Low maintenance due to higher carbon brush life and bearings

## DE78

### Benefits:

- Pre-engaged
- Direct drive
- Electrical excitation

Parameters	DE78
Range	12 V 0.7 kW – 0.9 kW
Weight	3.2 kg
Pole housing Ø (Dp)	78.5 mm
Length (L)	140 mm
Centre distance (C)	68 mm
Solenoid Ø (Ds)	52.5 mm

## R70-M, R70-L, R74-E, R78-M

### Benefits:

- Pre-engaged reduction drive
- Permanent magnet excitation
- High power-to-weight ratio
- Increased cold-cranking capability
- High reliability

Parameters	R70-M	R70-L	R74-E	R78-M
Weight	3.0 kg	3.3 kg	3.8 kg	4.4 kg
Pole housing Ø (Dp)	70 mm	70 mm	74 mm	78 mm
Length	185 mm	200 mm	210 mm	220 mm
Centre distance (C)	65.5 mm	65.5 mm	71 mm	71 mm
Solenoid Ø (Ds)	52.5 mm	52.5 mm	56 mm	56 mm
Range	12 V 1.1 kW – 2.2 kW			

## HX 78

### Benefits:

- Pre-engaged gear reduction type
- High power-to-weight ratio
- Completely sealed starter
- High reliability
- Replaces DE114-type starter

Parameters	R70-M
Range	12 V and 24 V 3.3 kW – 4.5 kW
Weight	7.5 kg
Pole housing Ø (Dp)	87 mm
Length (L)	350 mm
Centre distance (C)	150 mm
Solenoid Ø (Ds)	125 mm

## Series 39 and Series 42

### Benefits

- Torque performance exceeds OE specification
- Power performance exceeds OE specification
- Speed performance matches OE specification
- Rotatable drive end housing feature for universal fit
- All models come with integrated magnetic switch and a few with overcrank protection
- Tested and validated up to 25,000 cycles

# Automotive Batteries

Modern vehicles are equipped with more and more components running on electrical energy. They need to be supplied with reliable sources of energy with high performance. Equipped with modern technology and featuring a corrosion-proof design, Bosch automotive batteries provide different types of vehicles with the energy they need – over long periods.

## S3 Batteries

### Benefits

- Outstanding starting power and a long service life
- Absolutely maintenance-free
- High corrosion resistance
- High safety
- 12 months warranty

## S4 Batteries

### Benefits

- Outstanding starting power and a long service life
- Absolutely maintenance-free
- High corrosion resistance
- High safety
- 18 months warranty

## S5 Batteries

### Benefits

- Optimised current flow and less corrosion increases the cold-start performance
- Absolutely maintenance free
- High corrosion resistance
- High safety
- 30 months warranty

## S5+ Batteries

### Benefits

- Designed for high performance
- 24 + 24 months warranty\*
- Silver alloy technology

## T4 Batteries

### Benefits

- Outstanding starting power and a long service life
- High resistance to vibrations
- Absolutely maintenance-free
- Particularly high corrosion resistance
- High safety
- 18 months warranty

# Brake Parts

## Brake Pads

Bosch Brake Pads are specially formulated to provide high comfort and great performance with little pedal effort.

### Features and Benefits:

- Advanced friction technology ensures excellent stopping distance
- Asbestos-free manufacturing (non-carcinogenic)
- Optimum friction co-efficiency for superior response
- Improved wear and tear resistance for long operating life
- Better NVH characteristics (OE specifications)

## Tractor Brake Lining

Manufactured to meet the highest quality standards, the all-new, asbestos-free brake linings for tractors endure the toughest and most thorough testing. Because when it comes to safety, there are no second chances.

### Features and Benefits:

- 100% asbestos-free construction that ensures protection from harmful, cancer-causing elements
- Advanced friction formulation
- Extended wear, consistent performance, and long life
- Low water-absorption and swelling
- Optimal coefficient of friction
- Assured quality and safety

## Brake Discs

With Bosch Brake Discs in your vehicle, you are assured of a quick braking response, every time. This means better control and greater safety while on the road. Manufactured as per OEM guidelines and under strict quality control measures, Bosch Brake Discs are ideal for usage in regular and performance-oriented driving.

### Features and Benefits:

- Durable, even in extreme situations
- High quality materials, controlled production tolerances and accurate fit
- All specification and dimensions are with controlled tolerances for easy, efficient and safe installation
- Innovative brake disc anti-rust coating
- Engineered with expertise by Bosch

# Brake Fluid

Brake fluid is one of the most important components in a braking system. When the pedal is actuated, the fluid is pressurised and it transmits the pressure to the pads or shoes. Additionally, it also lubricates the moving parts and protects the entire system from corrosion. Brake fluids are also suitable for use in clutch systems.

Bosch brake fluids exceed the legal standards. With higher wet and dry boiling points, Bosch brake fluids are recommended every time, as they are the safest choice.

Bosch offers several brake fluid variants conforming to DOT standards, in accordance with ISO:8654-2001. DOT 3 is the most commonly used brake fluid in vehicles. It cannot be mixed with or replaced by other variants. DOT 4 indicates brake fluid with higher boiling points. This fluid is used in new-generation vehicles.

### Benefits

- Consistent and steady brake pressure response throughout its service life
- Optimal viscosity even under extreme temperature conditions
- Maximum protection against vapour formation and corrosion
- Enhanced lubrication of the hydraulic components

# Diesel Parts and Components

## Features:

- Manufactured from special low-carbon steel conforming to international standards
- Zinc-plating with yellow passivation prevents corrosion and rust
- High-quality basic seamless steel tube, imported from Germany
- Uniform inner bore diameter and fine finish ensure smooth fuel flow
- Conforms to OEM specifications

## Common Rail Injector

Ensure quiet, highly efficient combustion in any driving situation: The Bosch common rail injector precisely injects fuel directly into the combustion chamber.

## Common Rail Pump

Always ensure a constant supply of fuel at precisely the required injection level, whatever the driving situation: The Bosch common rail pump compresses fuel up to 2700 bar and provides the exact amount required. Expertly engineered for smooth operation, high engine performance, low fuel consumption and constant optimum rail pressure, even at low speeds.

## Denoxtronic Dosing Module

Ensure efficient exhaust-gas treatment: The Bosch Denoxtronic dosing module's demand-based injection of AdBlue into the exhaust system helps reduce nitrogen oxide emissions. The Denoxtronic dosing module contributes to reducing nitrogen oxide emissions to comply with the emissions standards.

## Denoxtronic Supply Module

Ensure efficient exhaust gas treatment: The Bosch Denoxtronic supply module is part of the system responsible for delivering AdBlue to the exhaust system, to reduce nitrogen oxide emissions.

# Diesel Parts and Components

## Distributor-Type Injection Pump

For a high-performance, versatile injection system: A Bosch distributor-type injection pump's compact design enables diverse applications in cars, commercial vehicles, stationary engines and heavy plant machinery. Electronically controlled injection with electric supply pump provides accurate fuel dosing through variable injection pressures and injection timing.

## In-line Diesel Injection Pump

Ensure higher cylinder outputs while using less fuel and reducing emissions: The Bosch in-line diesel injection pump is used in commercial vehicles, construction and agricultural machinery and stationary engines.

## Nozzle-and-Holder Assembly

Ensure top performance with precise fuel injection into the combustion chamber: Select a Bosch nozzle-and-holder assembly to match delivery rate, spray form and injection pressure requirements. Proven, robust technology and design with wide selection of assemblies for use with all conventional systems and types of engine, from single-cylinder to car and truck.

## Pressure Valve

For assured peace of mind: Bosch pressure valves are made with very high precision, using premium materials, both of which are essential requirements for one of the most strained components of an injection system. Valve pistons and pieces perfectly fit into one another for low friction losses. Made of high tenacity materials with additional tempering or hard chromium plating for increased service life and consumption benefits.

# Diesel Parts and Components

## Unit Injector System

Ensure top power and save fuel: The Bosch unit injector system is a nozzle holder assembly with integrated high-pressure pump, providing injection pressures up to 2,200 bar for optimal air/fuel mixture. The main peculiarity of unit injector systems is their design with an individual pump for each cylinder. For this purpose, both the pump and the injection nozzle are combined into a single unit installed right into the cylinder head. Bosch Unit Injector system is expertly engineered for high and optimized engine performance and low fuel consumption.

## Unit Pump System

For top power and fuel efficiencies for commercial vehicles only: The Bosch unit pump system is a high-pressure pump with separate nozzle holder assembly, providing injection pressures up to 2,200 bar for optimal air/fuel mixture. The main peculiarity of unit pump systems is their design. Like unit injector systems, they use an individual pump for each cylinder. Unlike UIS, however, pump and injection nozzle are not combined into a single unit. They represent two separate devices instead. A short line connects them with one another. Bosch Unit Pump system is expertly engineered for high and optimised engine performance and low fuel consumption.

## DuraSpeed Glow Plug

For an immediate combustion in diesel engines and a low voltage design for battery protection: Bosch DuraSpeed glow plug's fast preheating and its long post-glow times of up to 15 minutes contribute to fuel efficiency and reduced engine emissions.

## Duraterm Glow Plug

For fast and reliable combustion in diesel engines: The patented Bosch Duraterm glow plug's fast preheating and long post-glow times contribute to fuel efficiency and reduced engine emissions.

## Duraterm High Speed Glow Plug

For fast and reliable combustion in newer diesel engines: The patented Bosch Duraterm High Speed glow plug's fast preheating and long post-glow times contribute to fuel efficiency and reduced engine emissions while offering an even longer service life.

# Filters

## Bodyguard of the Engine.

For over 80 years, Bosch has been in the forefront of development and innovation in the field of filter technologies. Today, Bosch offers over 400 different types of filters, each developed to efficiently eliminate impurities, and enhance engine performance.

## Lube Oil Filters

### Features:

- Anti-return valve that lubricates even when oil or dirt clogs the spin-on filter
- Anti-drain valve of spin-on filters lubricates cold engines immediately after ignition
- Paper impregnated with phenolic resin for greater resistance to smoke and cracks
- Exhaust-proof valve that prevents oil leaks

## Air Filters

### Features:

- Separates dirt with an efficiency of up to 99%
- Maximum dust separation due to large filtration surface
- Impregnated with resin for greater resistance to heat and water
- Ensures leak-proof operation

## Petrol Filters

### Features:

- Application-specific media designed to meet the needs of each engine
- Ensures optimum functioning and long service life of the components

- Provides excellent performance in all types of operating conditions

- Unmatched fuel-cleansing performance

## Diesel Filters

### For Conventional Systems

#### Features:

- Available in two forms: Spin-on and Inserts
- High dust-holding capacity ensures longer and hassle-free service life
- Better separation of water and fuel to prevent damage from corrosion
- Stability even at the highest injection pressure
- Optimised pore size in the media to separate even the smallest particles and at the same time ensure free flow of oil

### For Common Rail Systems

#### Features:

- Available in two forms: Spin-on and Inserts
- Double-layered filtration material absorbs maximum level of impurities and separation of contaminants
- Melt-blown / hydrophobic media ensures maximum separation of water
- Trouble-free performance even under the extreme pressure of common rail systems

# Gasoline Systems

## Air Mass Meters

The air mass flow meter is located between the air filter and throttle valve and measures the air mass flow through the induction manifold. An electrically heated thin platinum wire film resistance with a temperature sensor is inserted into the induction manifold air flow. The ECU receives a voltage signal which is proportional to the air mass flow, from which the control unit calculates the necessary quantity of fuel.

### Features / Advantages:

- Model-specific application of the Bosch Air Mass Meter leads to best engine characteristics, low fuel consumption, and low pollutant emissions
- Latest hybrid / micro-electric technology, therefore high accuracy on air mass measurement
- Precise sensing and evaluation of signals
- Optimum driving response
- Responds within a short time span

Part No	Product Description	Model Description	MRP (₹)
<b>Gasoline</b>

# Horns

## The Art of Sound.

Whether it is the city roads or the highway, Bosch Horns have been designed for specific vehicle models keeping the discerning motorist in mind. Complete with sturdy brackets for a perfect one-time fit, Bosch Horns can be conveniently mounted.

Bosch Horns are tested under rigorous operating conditions, including tests for vibration- and corrosion-resistance, continuous blasts, endurance, water- and dampness-resistance, temperature, stability, etc.

### Variants

#### FC4 Standard Disc Horns

##### Features:

- Penetrating sound over long distances
- Galvanised steel for protection against corrosion, dust, and humidity

#### Scarlet Horns

##### Features:

- Large trumpet for enhanced sound proliferation
- Robust build for greater durability and reliability
- Corrosion-resistant
- EMC protection

# Lighting

Bosch Automotive Bulbs stand for reliability and durability. They enhance road safety and improve driving comfort by providing excellent road illumination without dazzling oncoming traffic. The extensive range includes head lamps, fog lamps, stop & tail lamps, conventional i2 bulbs, and miniature bulbs.

## Pure Light

### Features:

- Brighter, sharper, and safer
- UV block protects the headlamps from harmful radiation
- Longer life
- Best visibility without compromising on safety of oncoming traffic

## Racer

### Features:

- Brighter, sharper, and safer
- UV block protects the headlamps from harmful radiation
- Longer life
- Best visibility without compromising on safety of oncoming traffic

## Racer Ultra Bright

### Features:

- Brighter, sharper, and safer
- UV block protects the headlamps from harmful radiations

## Stop and Tail light Miniature Bulbs

### Features:

- Manufactured to international standards (ICE)
- Highly Transparent Glass
- Excellent Light Efficiency
- Perfect Heat Dissipation
- Long-Lasting

# Lubricants

One of the leading manufacturers of automotive solutions, Bosch offers a wide range of world-class products and services for commercial vehicles. Helping us retain our market share in lubricants are high-quality Engine Oils, Gear Oils, Greases, and Coolants that ensure superior protection, better fuel economy, and longer engine life. Bosch Lubricants are efficient even in the toughest climates, with the ability to withstand extreme temperatures and pressure conditions, giving you hassle-free drives for a longer period.

## Superia Trucker – Multigrade Engine Oil (API: CI4+; SAE: 15W-40)

Bosch Superia Trucker CI4+ 15W-40 is a superior premium diesel engine oil designed to deliver excellent performance in the new generation BS IV/BS III automotives and off-road diesel vehicles. Specially formulated to reduce oil thickening the engine oil lowers piston deposits resulting in lower oil consumption and hence leading to an extended drain interval. Recommended for use in modern diesel powertrain engines requiring CI4+ 15W-40 grade.

### Benefits

- Exceptional soot discrepancy to control oil thickening due to high soot loading
- Specially formulated to reduce oil thickening
- Specially formulated for extended drain interval
- Helps lower piston deposits resulting in lower oil consumption
- Helps reduce pollution

## Power Turbo – Multigrade Engine Oil (API: CI4; SAE: 15W-40)

Bosch Power Turbo CI4 15W-40 is a premium diesel multigrade engine oil designed to deliver excellent performance in diesel passenger cars and commercial vehicles. Formulated to reduce the soot levels in the engine over a wide range of temperature. Designed for reliable operation, the oil protects the engine from harmful deposits and from corrosion.

### Benefits

- Reliable for all weather applications with wide viscosity range
- Extended oil drain service level
- Reduces fuel consumption
- The oil handles higher soot level and protects engine parts against corrosive action of combustion gases
- Reduced maintenance cost

## Multi Turbo – Multigrade Engine Oil (API: CF4/SG; SAE: 15W-40)

Bosch Multi Turbo API CF4/SG SAE 15W 40 is a high performance, heavy-duty engine oil that provides proven protection to diesel engines operating in severe on- and off-highway service applications. Formulated to provide excellent engine lubrication in turbo-charged, as well as naturally aspirated diesel engines, it protects against sludge and maximises engine oil. Recommended for use in diesel engines requiring 15W 40 grade.

### Benefits

- Reduces friction, dissipates heat - minimises wear
- High performance, heavy-duty engine oil that provides proven protection to diesel engines operating in severe on-and off-highway service applications
- Recommended for use in BS I/ BS II vehicle diesel engines
- Protects against sludge - maximizes engine life
- Optimal viscosity & temperature characteristics - reliable for all weather operations
- Anti-foaming and anti-oxidation characteristics

# Lubricants

## Sprint – Multigrade Engine Oil (API: CF; SAE: 20W-40)

Bosch Sprint Engine oil API:CF/SF, SAE:20W40 multigrade diesel and petrol engine oil for HCV, LCV, Jeeps, tractors, 3 wheeler stationary engines, earth moving equipment, passenger cars it provides. Excellent protection from engine wear and tear even in conditions of heavy load. Formulated to provide excellent engine lubrication in diesel engines, it protects against sludge and maximises engine oil life. Recommended for use in diesel and petrol engines requiring 20W 40 grade.

### Benefits

- Reduces friction, dissipates heat, minimises wear
- Optimal viscosity, reliable for all weather operations
- Protects against sludge, minimises engine life

## Maxima Trucker – Engine Oil (API: CH4; SAE: 15W-40)

Bosch Maxima Trucker CH4 15W-40 is a super premium diesel multi-grade engine oil designed to deliver excellent performance in BSI/BSII/BSIII diesel passenger cars and commercial vehicles.

### Benefits

- Formulated for reliable operation
- Protects engine against harmful deposits
- Helps in corrosion protection

## Power Boost (API: CF4/SG; SAE: 15W-40)

Bosch Power Boost API: CF4/SG SAE: 15W-40 is a premium grade diesel mineral engine oil for 3-wheelers and LCVs that provides excellent protection from engine wear and tear even in conditions of heavy load. Formulated to provide excellent engine lubrication in smaller diesel engines, it protects against sludge and minimises engine oil. Recommended for use in diesel engines requiring 15W 40 grade.

### Benefits

- Extended engine life – superior protection for critical parts
- Lower oil consumption – reduces oil thickening
- Cost-effective operations – longer drain interval and lower maintenance
- Recommended for use in diesel engines of 3-wheelers and sub 1 tonne commercial vehicles

# Lubricants

## CNG Power (API: SF/CC; SAE: 20W-50)

Bosch CNG Power API SF/CC 20W50 is a premium quality engine oil for 4 stroke CNG/LPG driven 3 wheelers/LCVs. This has multi graded 20W-50 visco-matrix to facilitate easy starting even at lower ambient temperatures. Recommended for use in vehicles driven by CNG fuel.

### Benefits

- Excellent protection against oxidation and nitration
- Protects engine from wear and rust
- Catalytic converter friendly
- Longer life and equipment life
- Offers better fuel efficiency

## Tractor Engine Oil – CF4 15W-40

Bosch TEO 15W-40 is a multi-grade diesel engine oil manufactured from high viscosity index base stock. It is recommended for use in tractors of Mahindra, Eicher, Escorts, TAFE, Swaraj, IndoFarm, HMT, Sonalika, etc., and is suitable for use in both naturally aspirated and turbocharged diesel engines operating under severe service conditions.

### Benefits

- Easy starting
- Resists oil thickening
- Reduces fuel consumption and maintenance cost
- Extended oil drain service interval
- Protects from rust and corrosion

## Bosch Hydraulic Oil ( AW 68 & AW 46)

It is suitable for use in hydraulic systems of construction and agricultural equipment, hydraulic systems requiring anti-wear and anti-corrosion oils & for high pressure and power transmission systems, hydraulic systems with vane, gear, or piston pumps. It is recommended for tractors, construction equipment, and heavy-duty automotive applications.

### Benefits

- Outstanding anti-wear and anti-corrosion properties
- Excellent air release properties
- Good oxidation stability
- Compatible with most seal materials commonly used in hydraulic systems

# Lubricants

## Universal Tractor Transmission Oil API GL4

Recommended for use in heavy-duty Tractor transmission with wet break, used in off-highway equipment's in agriculture, construction quarrying. Can be used in transmission application requiring API GL-4 oil, except in hypoid gear designs.

### Benefits

- Superior friction durability and ensures noise free operation, smooth and effective breaking
- Excellent anti wear properties and extreme pressure properties
- Extends equipment life and reduces maintenance costs
- Excellent protection against rust and corrosion

## Pace - Multigrade Engine Oil (API: CF; SAE: 20W-40)

Bosch Pace Engine oil API:CF,SAE:20W 40 is a premium grade diesel mineral engine oil for passenger car vehicles, MUV, & Jeeps, that provides excellent protection from engine wear and tear even in conditions of heavy load. Formulated to provide excellent engine lubrication in diesel engines, it protects against sludge and maximises engine oil. Recommended for use in diesel engines requiring 20W 40 grade.

### Benefits

- Reliable for all weather operations
- Higher corrosion protection
- Maximises engine life

## Power Steering Oil (Automatic Transmission Fluid A)

Bosch Power Steering Oil (TASA Type A mineral oil) is used for power steering units of trucks and cars It is blended from specially selected base oil fortified with multinational additives to impart anti-oxidation, anti-wear, discrepancy and desired friction characteristics. Due to its high viscosity index, low pour point, it assure quiet and smooth operations under all climatic conditions.

### Benefits

- Higher viscosity index leading to smoother operation, over a wide range of ambient temperatures
- Enhanced low temperature fluidity assist in good cold start performance
- Reduced tendency to foam leading to smoother gear shifts smooth operation over a wide range of application
- Provides good anti-wear protection to critical parts resulting in smooth, chatter-free, clutch engagement

# Lubricants

## Glide Synth Semi-Synthetic Multi-grade Gear Oil (API: GL4; XP 75W-90)

Bosch Glide Synth SAE: 75W-90 Semi-Synthetic Gear Oil is a super slick and long-lasting gear oil designed especially for high performance applications. It is made up of a special additive package that cushions gears and resists squeezing out under extreme pressure situations, where other gear lubricants just aren't good enough. Specially designed to stand up to high temperatures without losing its lubricity, Bosch Glide Synth 75W-90 is recommended for use in manual transmission and transaxles requiring API GL4 specifications.

### Benefits

- Excellent load carrying properties provides protection from shock loads and wear thereby ensuring transmission durability
- Excellent synchronizer compatibility ensures smooth and jerk-free gear shifting
- High thermal stability prevent deposit formation and keeps gears clean
- Ensures low temperature fluidity and ensures less wear during cold starts

## GO 90 and GO 140 Mono Grade Gear Oil

Bosch GO – Mono-Grade Gear Oils are formulated with extreme pressure additives to provide protection to the automotive gear components by effective lubrication in transmissions and axle drives, where GL4 quality oils are specified. It is available in viscosities of 90 and 140 in the GL4 category.

### Benefits

- The extreme pressure additives provide excellent protection to gears from wear and scoring even under heavy duty conditions
- High oxidation stability minimises sludge and deposit formation facilitating longer gear and bearing life
- Effective rust and corrosion protection reduces wear and extends component life at low ambient temperatures
- Good anti-foam properties ensure film strength for effective lubrication
- Excellent seal compatibility helps minimise leakages and reduces the chances of contamination

## Glide+ – Multigrade Gear Oil (GL5 BP 80W-90 and 85W-140)

Bosch Glide and Glide+ : Multigrade Gear Oils are formulated with extreme pressure additives to provide protection to the automotive gear components, operating under severe conditions by effective lubrication in transmissions and axles. The Multi grade Gear Oils are available in viscosities of 80W-90 and 85W-140 in the GL5 category. conditions.

### Benefits

- High load carrying capacity for continuous high-speed and High load carrying capacity for continuous highspeed and high-torque service
- Better low temperature fluidity reduces wear and provides easy startup
- High oxidation stability minimizes sludge- and deposit-formation facilitating longer gear and bearing life
- Formulated with extreme pressure additives to provide protection to the automotive gear components operating under severe conditions by
- effective lubrication in transmissions & axles Protects from rust and corrosion

# Lubricants

## Extended Life Grease – NLGI AP3

Bosch Grease is a premium quality, lithium-based, NLGI Class-3 grease which is suitable for both automotive and industrial applications. Fortified with high-quality lithium soaps and performance additives, Bosch Grease is recommended to be used in applications like wheel bearing and chassis.

### Benefits

- Grease which is suitable for both automotive and industrial application like wheel bearings & chassis
- Excellent oxidation and mechanical stability
- Good performance against water wash-outs
- Excellent low temperature characteristics and high temperature performance
- Excellent performance under varying conditions due to better adhesion
- Good pumpability nature provides adequate dispensing of grease at all times

## Bosch Coolants

Ethylene glycol-based coolants from Bosch contain antifreeze ingredients that are responsible for protection against freezing, overheating, rust, and corrosion. Bosch offers two varieties of coolants - Coolant concentrate and Tropical Coolants, both of which are to be used in the ratio of 1:3, coolant to water.

### Benefits

- Ensures rapid heat exchange with excellent heat-transfer, hence optimum engine-cooling and longer engine life
- The corrosion inhibitors protect the interior surfaces of the radiators from rust & corrosion
- Higher ratio of glycol ensures better heat-transfer from the radiators providing quicker cooling
- Lower viscosity ensures lower pumping requirements

## Bosch Ad blue

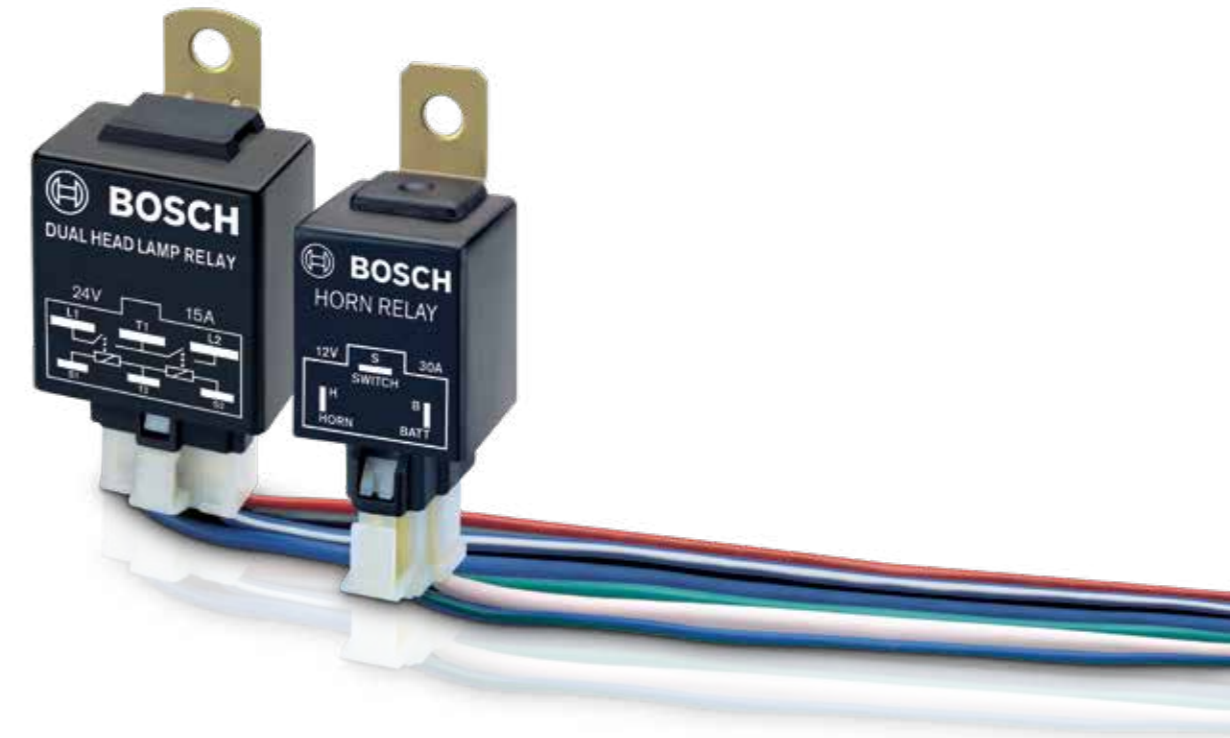

Bosch Ad blue is a clear, non-toxic and non-hazardous synthetic solution used in selective catalytic reduction system in BSIV/BSVI vehicles. The crystal clear solution reduces the NOx emission in diesel vehicles and is carried in additional tank fitted by the vehicle manufacturer. Bosch Ad blue is consistent in quality and adheres to ISO 22214 standards and VDA approved.

### Benefits

- Well ventilated area under roof.
- No exposure to direct sunlight.
- Temp between -5 degrees C to 25 degrees C

# Automotive Relays

Bosch Automotive Relays find application throughout the automobile, whatever the type and model, because almost all vehicles use a 12 V / 24 V supply voltage. While this means that just about everything – every circuit and application – needs a large amount of current to work because of the supply voltage, it also means that they need Bosch Automotive Relays to function properly.

### Features:

- Meets Indian Standard ISO 2077:1996
- Excellent sealing against water and dust – inserted moulded terminals, connector, and housing sealed with Araldite epoxy resin
- Good mechanical and dielectric strength – use of engineering plastic PA6 for housing and connector
- Optimised PCB design with voltage drop

### Benefits:

- Designed to withstand exposure to extreme conditions
- Switch high powers
- Function efficiently and reliably in a broad temperature range
- Extremely resistant to vibration
- Long service life
- Highly climate-proof

# Sensors

Bosch offers a wide range of sensors for the powertrain and exhaust system. The sensors ensure the critical advantages needed for performance, economy, and safety in motor vehicles. At the same time, Bosch exhaust-gas sensors help to reduce nitrogen oxides and CO<sub>2</sub>, as well as to comply with applicable emission standards.

## Crankshaft sensors

Crankshaft speed sensors measure the speed and position of the crankshaft. The results are used by the engine control unit to determine the exact injection and ignition timing.

## Intake manifold and boost-pressure sensor

Intake manifold and boost-pressure sensors measure quickly and precisely the pressure and temperature of the intake air entering internal-combustion engines. The sensor optimises fuel injection and air control.

## Lambda Sensors

Lambda sensors measure the oxygen content of the exhaust gas and supply the necessary information for optimal air/fuel mixture to the engine control unit. Thereby they provide the basis for more efficient and lower-pollutant combustion.

# Sensors

## Differential Pressure Sensor

Differential pressure sensors measure the pressure drop between two points of the particle filter. They report the charge status of the particle filter and monitor its function. This provides a demand-based, fuel-efficient concept for particle filter regeneration.

## Temperature Sensor

Temperature sensors measure the temperature of various operating media such as fuel, coolant, oil and air. They support efficient and safe engine operation.

## Wheel Speed Sensor

Wheel-speed sensors detect the rotational speed of wheels using a non-contacting measurement principle. They pass the information on to the relevant control unit.

## Spark Plug

Modern engines place high and highly differing demands on spark plugs. Bosch thus uses different electrode alloys with specific advantages to be able to meet exactly the specific requirements of the respective engines. Equipped with particularly robust design for extremely high requirements, Bosch Nickel spark plug provide the following features.

### Features and Benefits:

- **Mechanical Robustness:** Outstanding engine protection due to nickel-plated housing and thread
- **High wear resistance:** High wear resistance due to a highly heat-conductive center electrode with copper core
- **Strong reliability:** High gas tightness and stable heat value through heat shrink assembly. Hassle-free spark plug replacement due to factory-set electrode gap
- **Long service life:** Smooth engine operation and steady acceleration due to a high heat conductivity of the ground electrode made of nickel alloy

## Wiper Blades

Bosch Wiper Blades are yet another innovation that makes driving safer. These wiper blades have a double micro-wiping edge which ensures smooth wiping action for clear vision, at all times.

### Conventional Wiper Blades

These wiper blades are equipped with graphite coating to ensure smoother wiping. They come with a pre-mounted Quick-Clip Adapter for ease of installation.

### Features:

- Graphite coating on wiper to ensure smoother wiping
- Double micro-wiping edge for clear vision during day and night
- Special metal construction eliminates vibration during high-speed driving
- Flip-over action of wiper lip ensures no chattering or squeaking on the windshield
