**Appendix B: Recipient Fields for PERM+ Data Submissions ..... 1**

**Appendix C: Provider Fields for PERM+ Data Submission ..... 1**

**Appendix D: PERM+ Transmission Cover Sheets ..... 1**

## 1. Overview

Under the Improper Payments Information Act (IPIA) of 2002<sup>1</sup>, the heads of federal agencies are required to conduct an annual review of all programs under their administration. Based on these reviews, agency heads are then required to identify programs that may be susceptible to significant improper payments, estimate the total amount of improper payments, and submit those estimates to congress along with a report detailing the actions the agency is taking to reduce improper payments going forward.

CMS developed the Payment Error Rate Measurement (PERM) program to calculate the rates of improper payment in Medicaid and CHIP. Improper payment rates are based on reviews of the Fee-For-Service (FFS), managed care, and eligibility components of these programs during each review period.

Before improper payment rates can be calculated, states must submit all of the Medicaid and CHIP claims that were paid or denied during the review period to CMS' Statistical Contractor (SC). This is a large and complex data request that essentially includes all of a state's Medicaid and CHIP recipient-specific payments and many aggregate payments (together referred to as the PERM "universe"), as well as recipient and provider information for claims that are sampled for review.

These instructions are intended to guide state staff in the preparation and submission of claims data to the PERM SC. The instructions include information about PERM program areas that are measured, required variables that states must submit, state Quality Control (QC) checks, and data submission security requirements. Appendices include tables of required fields, a Transmission Cover Sheet for QC verification, and specific differences between the Fiscal Year (FY) 2017 and Reporting Year (RY) 2021 PERM cycles.

**Each member of the state's PERM team, including technical and non-technical staff from the state and any relevant vendors, should receive a copy of these instructions and review them early in the PERM cycle but no later than prior to the state data intake meeting.**

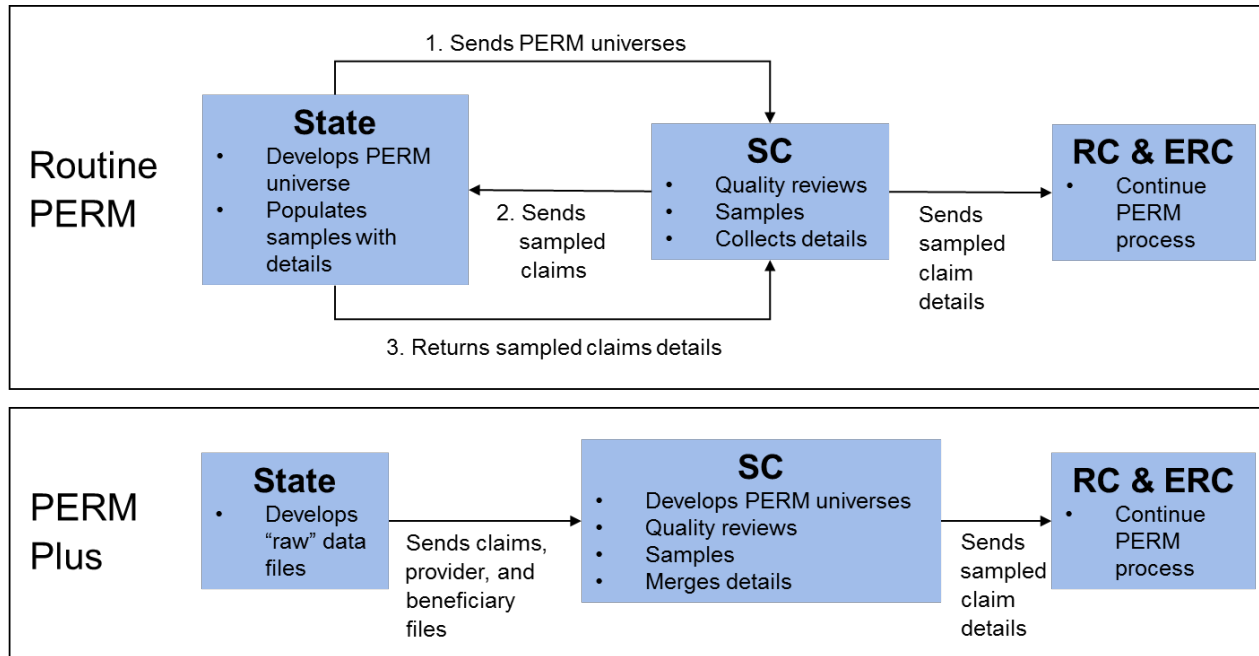

### 1.1 PERM+ Process Overview

PERM+ simplifies the PERM data submission process for states, allowing for claim, recipient, and provider data to be submitted simultaneously and eliminating the need for states to submit additional information prior to requesting medical records. **Exhibit 1** compares data flow for routine PERM and PERM+.

---

<sup>1</sup> As amended by the Improper Payments Elimination and Recovery Act (IPERA) of 2010 and by the Improper Payments Elimination and Recovery Improvement Act (IPERIA) of 2012.

**Exhibit 1: Data Flow in Routine PERM and PERM+**

PERM+ generally requires less upfront analysis and data modifications by the state. The PERM SC is responsible for assigning and extracting data as “sampling units” (e.g., determining if a claim or payment should be sampled at the header or line level based on the payment methodology, removing records that do not qualify for sampling). The PERM SC is also responsible for dividing the PERM+ data submissions into FFS and managed care datasets for sampling. However, the SC needs the state’s help to understand the data and accurately build universes that meet PERM requirements.

**1.2 Initial Preparations for PERM+**

**In early quarters, the amount of assistance needed may be higher so the SC will work with the state to clarify what information is required and in what timeframes.**

It is imperative that correct universe data are provided to the SC during the cycle. This ensures that the sampling universe is accurate, contains all required payments, and reflects the data present in the state’s system. Inaccurate or incomplete data or data with incorrect universe identifiers can delay the creation of samples and details, lead to oversamples and resamples of universes, and complicate the eligibility, data processing, and medical records reviews performed by other contractors. This document is intended to provide states with information critical to creating an accurate universe.

**1.2.1 The Statistical Contractor’s Role**

All contractors work closely with the state during the PERM process. Beginning at the start of the cycle, the SC will:

- Assist each state in interpreting and applying the PERM data submission instructions included in this document
- Schedule meetings with state staff to discuss the data request and learn how the state adjudicates claims and processes other payments
- Work with state staff to ensure that the state included all required PERM data in their data submissions

The SC will also respond to state questions throughout the process to ensure mutual understanding of the data requirements and specifications.

**1.2.2 The State PERM Team**

Each state should develop a PERM team that includes program, policy, technical, and budget staff. From experience, CMS has identified the characteristics of effective PERM teams, which are summarized in **Exhibit 2**. In addition to the characteristics outlined below, PERM teams should also include budget and finance staff who are responsible for developing and submitting federal matching fund reports (e.g., quarterly CMS-64 and CMS-21 reports).

**Exhibit 2: Capabilities of Effective PERM Teams**

| Program Structure   | Data Sources  | Technical Aspects of Claim Adjudication   |
|---|---|---|
| <p>Includes staff from the single state agency and other designated state agencies who are responsible for and knowledgeable of:</p> <ul style="list-style-type: none"> <li>▪ Medicaid and CHIP program administration, development of state regulations and policies, and coordination across the organization(s)</li> <li>▪ Managed care program design, contract administration and oversight, and quality measurement</li> <li>▪ Reimbursement policies for state plan services, rate development for at-risk and/or partial risk contracts, and cost reconciliation arrangements</li> <li>▪ Claims, billing, and payment mechanisms for all federally matched Title XIX and XXI services</li> <li>▪ State-only funded and waiver programs adjudicated in MMIS</li> </ul> | <p>Includes state staff and contractors responsible for the implementation and ongoing support of:</p> <ul style="list-style-type: none"> <li>▪ The state’s Medicaid Management Information System (MMIS) and any Third Party Administrator (TPA)</li> <li>▪ Health insurance premium payment (HIPP) program and payments</li> <li>▪ Pharmacy Benefit Manager (PBM)</li> <li>▪ Behavioral Health programs</li> <li>▪ Other state agencies, systems, and vendors responsible for claims, payments, adjudications, or data warehousing</li> </ul> | <p>Includes staff knowledgeable of data components and processing and those who can apply PERM requirements to identify necessary fields that indicate certain considerations for PERM, including:</p> <ul style="list-style-type: none"> <li>▪ Definition of paid date</li> <li>▪ Treatment of adjustments, denied/voided/rejected claims</li> <li>▪ Services matched with certified public expenditures (CPEs) and the amount</li> <li>▪ Co-pays and Third Party Liability (TPL)</li> <li>▪ Claims billed using local procedure, revenue, or place or service codes</li> <li>▪ Provider contact information for medical and data processing review requests</li> <li>▪ Recipient information</li> <li>▪ Original paid date</li> </ul> |

### 1.3 File Development and Submission Timeline

- The PERM project cycle is expected to take approximately two years. Claims and payment record collection and sampling activities are concentrated in the first four quarters, with states submitting data quarterly beginning October 15, 2019. Improper payment rates are calculated at the end of the review cycle.

**Exhibit 3** outlines the major activities in the data submission process. The quarterly data submission dates are:

- Quarter 1: October 15, 2019
- Quarter 2: January 15, 2020
- Quarter 3: April 15, 2020
- Quarter 4: July 15, 2020

To meet the PERM project deadlines, it is important for states to:

- Begin development of the PERM data submissions as early as possible in the cycle. States should expect to spend time in the first quarter (Q1) of the review period of the measurement (July through September 2019) preparing for the first quarter data submission in October
- Respond to questions about the PERM universe and resolve any data issues found during data validation and QC. States should expect to respond to questions from October through December, with subsequent data submissions due in January, April, and July

#### **Exhibit 3: Major Activities of Data Submission Process**

| Date                       | State Activities   | SC/CMS Activities  |
|----------------------------|--|--|
| <b>May - June<br/>2019</b> | <ul style="list-style-type: none"> <li>■ Determine if the state will submit via PERM Plus or routine PERM</li> <li>■ Select PERM team</li> <li>■ Provide completed State Information and State Contact Surveys and applicable data dictionaries</li> <li>■ Participate in PERM 101 education sessions</li> </ul> | <ul style="list-style-type: none"> <li>■ Meet with select states to discuss the PERM Plus submission option</li> <li>■ Answer questions about PERM</li> <li>■ Send final component sample sizes to each state</li> </ul> |

| Date                              | State Activities   | SC/CMS Activities   |

## 2. PERM+ Data File Specifications

This section addresses the content of the PERM+ data submissions, including the structure of the submission, PERM payment inclusions and exclusions, and descriptions of the required fields along with requirements for those fields.

### 2.1 File Structure

States participating in PERM+ submit data files to the SC containing all fields required for sampling, data processing review, and medical record request and review (see **Exhibit 4**). Note that all required fields for all claims types might not be in the same system. States submit PERM+ data in three files: claim information, recipient information, and provider information.

#### Exhibit 4: Claims, Provider, and Recipient Data are Required for PERM+ Submissions

#### 2.1.1 Claim Header and Claim Detail Files

Generally, states participating in PERM+ include all recipient-level Medicaid and CHIP claims and payments that are matched with either federal Title XIX or Title XXI funds.

PERM+ offers states flexibility in the structure of the data files submitted to the SC. PERM+ states may submit:

- One file with claim headers and a second file with claim details
- One file with both claim header and detail data
- Another combination of files (e.g., institutional and practitioner claims in separate files)

- The SC will work with the state to determine the most appropriate file structure

### **2.1.2 Recipient and Provider Files**

The PERM Review Contractor (RC) and Eligibility Review Contractor (ERC) require recipient and provider information for all sampled claims. This information is needed before the contractors can request medical records from providers and conduct medical, data processing, and eligibility reviews. States participating in PERM+ submit recipient information (e.g., name, date of birth) and provider information (e.g., address, provider type) as separate files. For each sampled claim, the SC will use the recipient and provider numbers to “match” to the recipient and provider information in the separate files.

When developing the provider file, states should include all available provider records regardless of the provider’s status as an active or inactive provider. The provider file should include information for all billing, performing (servicing/rendering/attending) and referring (prescribing) providers.

When developing the recipient file, states should include recipient records for all recipients who have a claim in the PERM claims file. The SC will work with states to satisfy these requirements for the provider file and the recipient file.

### **Special Note about Provider Fields**

The amount of required provider information has changed since your state’s previous PERM cycle. Required provider information is summarized below:

| <b>Provider Type</b>          | <b>When Required for PERM Claims</b>   |
|-------------------------------|--|
| Billing Provider              | <ul style="list-style-type: none"> <li>▪ <b>Required for all claims</b></li> </ul>   |
| Performing/Servicing Provider | <ul style="list-style-type: none"> <li>▪ <b>Required for claims paid at the line level</b></li> <li>▪ Should reflect the provider who performed or provided the service to the recipient</li> </ul>  |
| Referring Provider            | <ul style="list-style-type: none"> <li>▪ <b>Needs to be provided when the billing entity is not the physician who ordered or prescribed the service</b></li> <li>▪ Required for claims for lab, x-rays, physical/occupations/speech therapy, durable medical equipment, prosthetics and orthotics</li> </ul> |
| Attending Provider            | <ul style="list-style-type: none"> <li>▪ <b>Required for institutional claims</b></li> <li>▪ Should link back to an individual provider and not an institution</li> </ul>  |
| Prescribing Provider          | <ul style="list-style-type: none"> <li>▪ <b>Required for pharmacy claims</b></li> <li>▪ The physician who prescribed the medication or supply for the recipient</li> </ul>   |

## **2.2 Universe Parameters**

The PERM+ data submission is primarily defined by three major parameters with PERM specific definitions:

- Program Type
- Date

- Paid Amount (Total Computable Amount)

This section defines and discusses the three primary PERM universe parameters and provides guidance on other areas that are critical to the submission of a complete and accurate PERM universe. This includes the treatment of denied and zero-paid claims, payments and records excluded from PERM, and PERM data sources.

### **2.2.1 Program Type**

The PERM data submission can include up to four data universes, depending on the program structure and service delivery systems operating in each state. Potential universes include:

- Medicaid FFS
- CHIP FFS
- Medicaid managed care
- CHIP managed care

How each universe must be defined for PERM purposes may differ from each state’s definitions of its programs. Identification of Medicaid and CHIP and the division between FFS and managed care is discussed further in the following sections.

### **2.2.2 Identifying Medicaid and CHIP**

States include both Title XIX and Title XXI matched payments in the PERM data submissions. Because CMS must report separate improper payment rates for the Medicaid and CHIP programs, states must separate PERM data submissions between Title XIX and Title XXI and submit these in separate PERM universe files for each quarter. States should separate claims into the Medicaid or CHIP universe based on the following key questions:

The “Fields for Universe Submission” table in **Appendix A** also includes a field called “funding code.” States may populate this field with any state-specific value that identifies, or helps identify, the state requested federal Title XIX or Title XXI match for the claim or payment. For the PERM claims file, states are required to include all payments that are paid for in whole or in part by Title XIX or Title XXI FFP dollars, as well as those payments considered for FFP dollars but which were denied your state. If your state has difficulty distinguishing between Title XIX and Title XXI payments in either paid or denied claims, please notify the SC who will work with state staff to find an appropriate solution.

The PERM claims file must include all Medicaid expansion and/or stand-alone CHIP payments in the PERM submission, including payments that are paid for in whole or in part by Medicaid (Title XXI) FFP dollars, as well as payments submitted as CHIP (Title XXI) services but denied. This includes any paid or denied claims that are adjudicated by and/or stored with third party data vendors.

### **2.2.3 Identifying Fee-For-Service and Managed Care for PERM**

In addition to separating Medicaid (Title XIX) and CHIP (Title XXI) payments, PERM also measures FFS and managed care payments independently. Referred to as “component” measurements, FFS and managed care have PERM-specific definitions which may differ from

how states define each mode of service delivery. PERM also has additional inclusion rules that are necessary to ensure a complete and accurate PERM universe. An overview of PERM definitions for each “component” is included below, along with information on what types of records are included in each “component” universe.

During each state’s intake discussion, the SC will discuss these component definitions in more detail with the state to ensure that data provided is consistent and compliant with PERM guidance. The SC will also support the state in determining where specific payments should be assigned for PERM purposes.

### **2.2.3.1 Fee-For-Service Universe**

The PERM FFS universe includes three primary types of Medicaid and CHIP payments:

#### **1. Traditional FFS claims**

The FFS universe is comprised of all payments made on a FFS/indemnity basis, including:

- Traditional FFS payments to physicians, hospitals, pharmacies, home health agencies, Long-Term Care (LTC) facilities, etc.
- Medicare crossover claims
- FFS claims for services carved out of managed care
- FFS claims paid for retroactive eligibility periods

#### **2. Fixed non-risk payments**

In addition to traditional FFS payments, the PERM FFS universe also includes other types of payments referred to as “fixed” for PERM purposes. These payments are often capitated, Per-Member Per-Month (PMPM) payments. They could also be system-generated, non-medical, or administrative-like payments that – unlike other PERM FFS payments - would not require a PERM medical record review. Examples of PERM “fixed” payments include a variety of payments made to providers or vendors, such as:

- Monthly Primary Care Case Management (PCCM), Health Homes, or Patient Centered Medical Home (PCMH) fees paid to participating providers
- Health Insurance Premium Payment (HIPP) payments made to purchase or subsidize employer-sponsored insurance
- Capitated non-emergency transportation broker payments
- Fixed recipient-specific pharmacy dispensing fees (e.g., a state pays nursing home pharmacies a monthly fixed amount per recipient)
- Reinsurance payments
- Managed care stop loss payments
- Supplemental payments made to managed care organizations based on service type (e.g., FQHC) or geographic region

***The SC will work with the state to evaluate state programs and services and determine if any meet the PERM “fixed” payment definition and should be included in the FFS universe.***

### **Aggregate payments**

While most Medicaid and CHIP payments are paid at the recipient level, states may calculate and pay for some services on behalf of a group of recipients. PERM classifies these payments, which are made for a group of recipients where individual payment records are not readily available or cannot easily be re-created, as “aggregate payments.”

**States may also make payments in aggregate based on recipient-level information. States and the SC will work together to determine a plan for submitting this payment information.**

Unless otherwise specified by CMS, all payments for services to recipients are included in the PERM universe, regardless of whether the state claims FFP at the medical services match rate or as an allowable administrative cost. The SC will work with the state to determine whether certain payments should be classified as aggregate payments for the purposes of PERM. Examples of aggregate payments seen in previous cycles include:

- Reimbursement to counties for non-emergency transportation services provided to all Medicaid recipients residing in that county
- Contractual payment to a broker for services (e.g. transportation) that cannot be identified at the recipient level
- Fees paid to a case management vendor based on the number of recipients enrolled in the Medicaid program each month

In some cases, states may determine payment at the individual level but maintain payment records at the aggregate level. CMS and the SC will work with the state to determine how aggregate payments should be submitted and reviewed for PERM. For example, some states make supplemental payments for FQHC services provided to recipients in an MCO. While these payments are typically made at the recipient level, states may only have the payment data available at the MCO level. In this case the payments would be moved to the FFS fixed payments strata for sampling. It is critical that states inform CMS and the SC of all possible aggregate payments so that all payments required for PERM review are included in a universe.

### **Other Payments**

States may need to submit other types of payments as part of the PERM universe:

- **Incentive Payments:** A number of states have implemented new programs that make supplemental or “bump” payments for certain types of services. Examples of these payments include difficulty of care payments made to ICF/IIDs for recipients with developmental disabilities, “bump” payments made to clinic claims to increase them to the Medicare allowable, and health home incentive payments. These are usually small dollar

Not all incentive payments meet the requirements for inclusion in the PERM universe. States that make these payments need to provide the following information to the SC: who receives the payment and the basis of the payment.

payments that can be tied to individual recipients and services. In rare instances, these payments are made to providers on the aggregate level

- **Financial Transactions:** The SC usually sees this type of payment for services that are not submitted via the MMIS and for which records are usually kept on paper or spreadsheets. There are numerous situations in which a payment may be made via this method, including payments for services given to qualified aliens, reimbursements for transportation to caregivers, payments for interpreter services, and reimbursements for out-of-pocket expenses
- In these types of situations the state needs to discuss these payments with the SC to determine what the payments are for, if they should be included in the sampling universe, the payment level of the claim, and what information the state will need to submit in the universe data for these payments
- **Wrap-around payments:** This is a supplemental payment usually made to an MCO to increase the reimbursement for certain types of services. We see this most often with FQHC/RHC services. These wrap-around payments provide for supplemental payments from states to FQHCs and RHCs equal to the amount or difference between the payment under the FFS methodology and the payment provided under the managed care contract
- If your state makes these types of payments you need to notify the SC during the intake meeting process
- **ASO programs** - Payments made to an organization under an Administrative Services Only (ASO) arrangement would be included in the FFS universe. ASOs generally are contracted to manage claims and benefits while bearing little or no risk for the cost of delivering care. There are typically two different scenarios for ASO payments:
  - **Scenario 1:** ASOs receive an Advance PMPM for patient care. Providers bill the ASO for services received by the recipients. The PMPM payment is used by the ASO to pay claims incurred by members. In many cases the payments are later reconciled with the state to the actual claim amounts. In these cases the state maintains the risk
  - **Scenario 2:** the ASO is budgeted for a target amount for a set period of time (e.g., a year), but goes over the set amount in reimbursement of services. The ASO will be reimbursed for the difference by the state, and therefore all the risk is maintained by the state

The SC will work with each state to evaluate state programs and determine if program payments conform to the PERM managed care definition or if the payments should be included in the FFS universe instead. Please be prepared to discuss any ASO arrangements in your state with the SC during the Intake Meeting.

### **2.2.3.2 Managed Care Universe**

For the purposes of PERM, managed care universes consist of payments made to “at-risk” organizations that provide services to their assigned beneficiaries. These payments are not individual claim payments or reimbursements for individual claims payments. They are typically capitation payments covering multiple services for which the organization — not the state — is at

financial risk. These payments, and not the claim payments made by the organizations, are subject to Federal match, and are therefore reviewed under PERM.

These payments include:

- Premiums for “capitated” or “full risk” arrangements, such as payments to Health Maintenance Organizations (HMOs), Managed Care Organizations (MCOs), Pre-paid Inpatient Hospital Plans (PIHPs), and Health Insurance Organizations (HIOs)
- Payments to service-specific providers paid as part of capitated arrangements (e.g., PBMs, behavioral health MCOs)
- Condition-specific capitation payments for special needs recipients (e.g., at-risk payments for services provided to people living with HIV/AIDS) who are enrolled in a specialized managed care program
- Certain non-capitated, recipient-specific payments made to MCOs such as newborn delivery supplemental payments or “kick” payments, which include multiple services, are paid at a negotiated rate and not paid on a FFS basis

**Full Risk Managed Care Program**

A provider organization, or group of organizations, receive from the payer a set payment per patient for specified medical services. In this way, the provider takes on 100% of the insurance risk for the covered patient and services.

**Partial Risk Managed Care Program**

Managed care plan pays providers prospectively for a subset of services, such as case management or crisis services, with other services reimbursed on a FFS basis. The plan may be at risk for costs or gains that exceed a predetermined cost for the services covered under the partial risk program.

While full-risk payments to MCOs are clearly part of the managed care universe, payments associated with certain types of capitated programs may more appropriately be included in the FFS universe (see Capitated Non-Risk Payments, above). The PERM SC will discuss each state program during the data intake process and will work with the state to determine the appropriate universe (FFS or managed care) for each type of payment.

The RC can only accept single-line managed care claims. States should inform the SC about claims for any type of program that have multiple lines (e.g. one line to reflect a behavioral health payment and another to reflect a physical health payment) so that the SC can determine the best way to create a sampling universe and supply the RC with all the information needed to complete the data processing review.

**2.2.4 Date**

PERM universes include claims and payments originally paid during the review period. For RY 2021 those dates are 7/1/2019 – 6/30/2020. To support consistency across states, PERM relies on the **original paid date** to determine whether a payment falls within a given cycle measurement.

- If a state originally paid a claim during the cycle under review, but adjusted the claim after the PERM measurement period, the claim should be included in the PERM data submission based on the original paid date

- Conversely, if a claim’s original paid date is prior to the PERM measurement period, but an adjustment falls within the PERM measurement period, the claim would not be included in the PERM data based on the original paid date

For the RY 2021 PERM cycle, the state’s PERM universe includes claims and payments with original dates of payment between July 1, 2019 and June 30, 2020.

States submit PERM data quarterly, including all claims with an original date of payment within the review quarter. Data are due to the SC 15 days after the end of each quarter. See **Exhibit 5** for the data submission due dates for RY 2021 and the paid claim dates to be included in each quarterly submission.

**Exhibit 5: RY 2021 Quarterly PERM Data Submission Dates**

| <b>RY 2021 Quarter</b> | <b>Claim Date Paid</b>        | <b>Data Submission Due</b> |
|------------------------|-------------------------------|----------------------------|
| Quarter 1              | July 1 – September 30, 2019   | October 15, 2019           |
| Quarter 2              | October 1 – December 31, 2019 | January 15, 2020           |
| Quarter 3              | January 1 – March 31, 2020    | April 15, 2020             |
| Quarter 4              | April 1 – June 30, 2020       | July 15, 2020              |

States often make managed care capitation payments prospectively (e.g., on the 25<sup>th</sup> of the month prior to the month of coverage) or retrospectively (e.g., in the month following the month of coverage). Managed care capitation payments should be included in the PERM data submission based on paid date as well.

- Prospective example: A state makes a capitation payment on December 25, 2019 for services in January 2020; the state includes the payment with the PERM Q2 data submission
- Retrospective example: A state makes a capitation payment on October 5, 2019 for services in September 2019; the state should include the payment with the PERM Q2 data submission

**Important notes about the dates used in the sampling universe:**

States may submit the adjudication date instead of the original paid date in the PERM universe as long as the state maintains a consistent date approach throughout all four quarterly submissions. The adjudication date refers to the date that a claim is fully processed and either approved for payment or denied. The state should discuss this approach with the SC during the data intake meeting.

***States may also submit certain types of claims (e.g., off-MMIS claims) using a date approach that is different from the other universe claims, as long as the dates for each data set submitted for those claims are consistent over the course of the year.*** For example, a state could submit all MMIS claims using adjudication date but submit all off-MMIS waiver claims from sister agencies using paid date.

The SC will review the dates that are included for each data source with the state at the beginning of the cycle and will work with the state to identify the best date field for determining the PERM universe for each quarter. This information will be relayed to the RC and ERC for use during the data processing and eligibility reviews

### **2.2.5 Paid Amount**

The paid amount for each claim and payment in PERM should reflect the **original, non-adjusted total computable paid amount**. The total computable paid amount is the federal share plus the state and/or local share of the payment. CHIP and Medicaid are jointly funded by the federal and state governments. As such, both funding sources should be represented in the total computable paid amount.

**The total computable paid amount should not include recipient cost sharing amounts, such as patient liability (co-pays, contribution to care), TPL, or any other non-Title XIX or Title XXI matched dollars (e.g., taxes paid on waiver services).**

For certified public expenditures (CPEs) such as school-based services or payments to public hospitals, the state must provide both the federal and state/local share for the PERM paid amount even if the paid amount in the payment system only reflects the federal share for which match is claimed. **Please discuss with the SC any CPEs or other payments where the paid amount in the state's payment system might not reflect the PERM-defined total computable paid amount.**

## **2.3 Additional PERM Universe Specifications**

In addition to the three main parameters identified above, PERM universes must also meet additional specifications.

### **2.3.1 Denied and Zero-Paid Claims**

In both the FFS and managed care universes, as defined above, states should include the following types of records, as applicable.

#### **2.3.1.1 Denied Claims**

Denied claims are claims that are adjudicated in the state's payment system but denied for payment. States must submit denied claims as part of the state's PERM+ data submission. Denied claims from vendor payment systems must be included in the PERM+ data submission if the claims are program claims that are not found in the state MMIS. ***In certain instances, states may not be able to determine if a denied claim should be assigned to the Title XIX or the Title XXI program (e.g., a claim that is denied due to an invalid recipient identifier). Please discuss the treatment of these denied claims with the SC.***

#### **2.3.1.2 Zero-Paid Claims**

States must include zero-paid claims in the PERM+ data submission. A zero-paid claim is a claim for which the state had no financial liability. For example, claims may be zero-paid due to TPL, a Medicare crossover payment exceeding the state allowable charge, or for spend-down recipients who have not met their financial obligations.

### **2.3.2 Service Expenditures Matched at the Administrative Rate**

PERM includes payments made for medical services received by individual recipients that are matched either at the medical Federal Medical Assistance Percentage (FMAP) or that receive FFP as an allowable administrative cost. The most common medical services that may be matched with administrative funds include NET or HIPP payments. Please discuss with the SC any services that are considered an allowable administrative cost, but could be considered a medical service to determine if the service payments should be reported for PERM.

### **2.3.3 Claims and Payments Excluded from the PERM Universe**

Below we provide some specific guidance regarding what types of payments, claims, and records are excluded from the PERM universe. Certain claims and payments for which states receive FFP through Title XIX or Title XXI are explicitly excluded from PERM, either by regulation or in accordance with established policy. During the intake meetings, the SC will discuss these exclusions in more detail to ensure that each state's specific data submission is compliant with PERM requirements regarding excluded data. ***It is vital that all excluded claims are identified in the PERM+ universe to ensure there is a valid sampling universe. Failure to do so can result in dropped samples, oversamples, and resamples that increase the work required by the state and contractors.***

### **2.3.4 Payments Excluded by Regulation**

The PERM regulation explicitly excludes a small number of specific payment types from the universe, when not paid at the individual recipient-level.<sup>2</sup>

- Disproportionate Share Hospital (DSH) payments
- Drug rebates
- Grants to state agencies or local health departments
- Cost-based reconciliations to not-for-profit providers or Federally Qualified Health Centers (FQHCs)
- Mass adjustments
- Lump-sum Graduate Medical Education (GME) payments
- Express Lane Eligibility (ELE) claims are excluded from eligibility reviews

### **2.3.5 State-only and Other Non-Title XIX /Non-Title XXI Payments**

Not all claims processed in MMIS are matched with Title XIX or Title XXI funds. Only claims and payments matched with Title XIX and Title XXI federal funds are included in PERM. PERM+ states may include state-only or other federally funded claims and payments in the PERM+ submissions, however, the states must provide documentation and guidance that will allow the SC to exclude these payments from the PERM sampling universes.

---

<sup>2</sup> States may include these in the PERM+ submissions if the payments are readily identifiable and the state instructs the SC to remove the payments prior to sampling.

### 2.3.6 Medicare Part A and Part B Premium Payments

States should not include Medicare Part A and Part B premium payments in the PERM data submission. The SC will collect these payments from CMS to include in each state’s universe prior to sampling. **Any premium payments that are sampled will be sent to the states and are subject to data processing review.** The RC will notify the states about what information needs to be provided for these claims during their reviews.

### 2.3.7 Informational-only Data

States who submit informational only lines in the universe data **must** provide the SC with a way to identify these lines in the data in the PERM submissions. Informational-only data is defined as records maintained in the state or vendor payment system that do not represent actual payment to a provider. Examples include:

- Supporting service lines submitted with an inpatient hospital claim paid via Diagnosis-Related group (DRG) payment
- FQHC claims with procedure codes billed in addition to the T1015 procedure code
- Bundled claims that list out all billed procedure codes when only one code was adjudicated

PERM+ states may include informational-only data in the PERM+ submissions, however, the state must provide documentation and guidance that will allow the SC to exclude these from the PERM sampling universes.

### 2.3.8 Encounter Data

States must not include encounter data or “shadow claims” in the PERM submissions. For PERM purposes, encounter data is defined as informational-only records submitted to a state by managed care contractors under an at-risk contract with the state. The records include claims paid by the contractor for services covered under a managed care capitation payment. States often collect this data in order to track utilization, assess access to care, and possibly compute risk adjustment factors for use in risk-adjusting capitation payments. While encounter data records are recipient-specific, they do not represent an actual payment made by the state. As a result, these claims are not subject to FFP, and as a result, not included in PERM.

### 2.3.9 Rejected Claims

States should only include fully adjudicated claims and payments in their PERM submissions. Claims that are “rejected” from the claims processing system prior to adjudication are not part of the PERM review. Often claim rejection occurs in a pre-processor or translator prior to the system assigning the claim an internal control number. PERM+ states may include rejected claims in the

#### Data Issues Caused by Inclusion of Excluded Claims or Lines in the Sampling Universe:

- Any of these claims that are sampled have to be dropped
- Dropped samples are addressed in two possible ways:
  - Replacement samples are drawn
  - Universe is resampled after excluded lines are removed from the sampling universe
- This situation creates extra work for the states and all contractors (SC/RC/ERC)

PERM+ submissions; however in that case, the states must provide documentation and guidance that will allow the SC to exclude these from the PERM universes.

### **2.3.10 Payments for Administrative Functions**

As noted above, PERM claims and payments represent services to recipients. Payments made entirely for administrative functions are not included in the PERM review and states should not include these in the PERM submissions. These include payments such as:

- State staff salaries
- Fiscal agents and other administrative vendors
- Outreach funding

*For cases in which a state blends dollars for recipient services with administrative payments into a single reimbursement rate, the state should submit the entire payment for PERM review.*

### **2.3.11 Adjusted Claims**

Only original claims and payments are included in PERM. PERM+ states may include adjusted claims and payments in the PERM+ submissions, however in that case, the states should provide documentation and guidance that will allow the SC to exclude any adjustments or refunds from the PERM universes. **Please notify the SC if your state uses a void and replace system.**

## **2.4 Data Sources**

States generally extract a majority of PERM+ data from their MMIS. However, states often maintain other payment systems that record payments matched with Title XIX or Title XXI funds (and for which the state does not also maintain a payment recorded in MMIS). States must include all payments, including those from non-MMIS systems, in the PERM+ data submissions. PERM+ affords states flexibility to submit data from systems outside MMIS as separate files from the MMIS data.

When reviewing possible data sources, states are advised to consider sources such as:

- Claims paid by separate vendors or third party administrators
  - Pharmacy
  - Dental
  - Vision
  - Behavioral Health
- Claims paid by state agencies (not the Medicaid agency)
- Services for Individuals with Intellectual Disabilities or Developmental Disabilities (ID/DD)
- State-owned facilities such as nursing homes;
- Waiver services (including consumer-directed individualized budgets)

- Claims paid by counties
- Transportation provider payment systems
- Case management costs
- Stand-alone or “manual” systems
- HIPP payments
- FQHCs, Rural Health Clinics (RHC), Indian Health Service (IHS) clinics and facilities
- Systems that produce payments such as PCCM payments and non-emergency medical transportation broker capitation payments

**State staff should “follow the money” by reviewing their state’s federal financial reports to determine if a state is capturing payments from all of the data sources.** If a state determines that data from multiple sources populates the CMS-64 and/or CMS-21 Financial Reports, the state should evaluate these data sources to identify claims and payments to include in the PERM data submission.

## **2.5 Payment Level in the PERM+ Submission**

Unlike Routine PERM, under PERM+, the SC, not the state, is responsible for establishing the correct payment level for each claim or payment (i.e. header or line level).

States need to submit both header and detail/line records for all claims for PERM+. States also need to provide guidance to help the SC identify header and detail records in the claims submission. **Submitting all of the header and detail information for a claim is a key difference between the PERM+ data submission and the routine PERM data submission.**

The SC will discuss with states the various payment methodologies for claims to understand how different types of claims are adjudicated and paid. The SC will then use the claims and payment data and guidance from the state to identify the appropriate claim payment level and develop the PERM sampling units.

**Correctly identifying how claims are paid is important for sampling claims at the correct level; errors at this stage can lead to oversamples late in the cycle.**

PERM defines a sampling unit as the smallest, individually priced and paid unit available. The PERM universe will have one record for each sampling unit. States must provide universe data at the sampling unit level.

Individual recipient-level FFS claims are typically submitted at the line or claim (header) level. A broad definition is provided below and more detail is provided in the following sections.

- **Line level:** If a payment amount is determined to be at the “line” level for each specific service provided, the sampling unit is the line level; each claim line has an opportunity to be sampled; this applies to most physician and outpatient claims that have multiple paid lines on each claim

- Sample of fields from a line paid claim:

| clm_id_icn | diag_code_1 | diag_code_2 | dos_from_clm | line_number | proc_code_line | units_of_svc_paid | amt_paid_line |
|------------|-------------|-------------|--------------|-------------|----------------|-------------------|---------------|
| 1234567    | 43889       | 431         | 09012012     | 0           | A4253          | 2                 | 100.00        |
| 1234567    | 43889       | 431         | 09012012     | 1           | A4256          | 1                 | 150.00        |
| 1234567    | 43889       | 431         | 09012012     | 2           | E0607          | 1                 | 100.00        |

- Header level:** If the payment amount is determined to be at the claim level, the sampling unit is at the claim or “header” level; a header level sampling unit has a paid amount that is not associated with any specific line or service; rather, it is based on days, groups of services and/or other related information, encounter rates, or point of sale transactions; this applies primarily to inpatient and pharmacy claims where there are no separate line-level payments
- Sample of fields from a header paid claim:

| clm_id_icn | line_number | dos_from_clm | dos_to_clm | diag_code_1 | diag_code_2 | rev_code | place_of_svc |
|------------|-------------|--------------|------------|-------------|-------------|----------|--------------|
| 1234567    | 0           | 09012012     | 09302012   | 43889       | 431         | 0191     | 2            |
| 1234567    | 1           | 09012012     | 09302012   | 43889       | 431         | 0250     | 2            |
| 1234567    | 2           | 09012012     | 09302012   | 43889       | 431         | 0258     | 2            |
| 1234567    | 3           | 09012012     | 09302012   | 43889       | 431         | 0300     | 2            |
| 1234567    | 4           | 09012012     | 09302012   | 43889       | 431         | 0301     | 2            |
| 1234567    | 5           | 09012012     | 09302012   | 43889       | 431         | 0430     | 2            |
| 1234567    | 6           | 09012012     | 09302012   | 43889       | 431         | 0434     | 2            |
| 1234567    | 7           | 09012012     | 09302012   | 43889       | 431         | 0460     | 2            |

**Important notes about payment level determinations:**

- For FFS claims, note that if payment amount determination is made for the claim as a whole, regardless of the number of lines, and the individual lines are informational but not used for payment, it is a header level payment. If each line in a claim stands the chance of being paid or denied individually, these are line level payments
- For managed care payments made to full-risk entities and for payments made to partial-risk or non-risk entities on a PMPM basis, the sampling unit is typically the capitated amount that is paid each month on behalf of the Medicaid or CHIP enrollee. When an actual payment to an entity spans multiple months of coverage, the sampling unit would be the total amount paid to the entity for the enrollee at one time
- For aggregate payments, CMS, the SC and the RC will work with your state on each payment identified to determine the smallest paid amount available for electronic submission. For example, an aggregate payment sampling unit could be a monthly payment to a county for all transportation provided to Medicaid enrollees in that month or a quarterly pay-for-performance payment to a provider based on the provision of a certain number or set of services provided to individual enrollees

### **2.5.1 Payment Level and Third Party Liability**

TPL is the portion of the allowed Medicaid/CHIP reimbursement that is paid by other insurance or the recipient.

**As mentioned earlier in this document, the total computable amount submitted in the claims universe should not contain any TPL payments. Including this amount in the Paid Amount field can result in claims being sampled in the incorrect strata if the TPL is taken out at a different level than the one at which the claim is typically paid. Correctly identifying how claims are paid is important for sampling claims at the correct level; errors at this stage can lead to oversamples or resamples late in the cycle.**

To accurately report the amount that Medicaid or CHIP paid for services excluding TPL for PERM, states should submit line level claims, such as physician claims, where TPL is reported at the header level as header level sampling units. For most states, only the claims with TPL would be reported as header level sampling units. Claims without TPL should be reported as line level sampling units.

**The state should review with the SC any recipient cost-sharing policies and requirements – such as co-pays and deductibles - before preparing data submissions.** The state will need to identify how cost-sharing is reflected in the data and at what level federal match is provided (i.e., claim paid amount or individual line paid amount) to ensure the total computable paid amount is accurately identified. Identification of claims with TPL is vital to ensuring that claims are both sampled at the correct level and accurately reflect the total computable amount.

### **2.5.2 Payment Level Identification Challenges**

For certain types of claims and payments, it can be difficult to accurately identify the appropriate “payment level” for PERM purposes. States should pay particular attention to certain types of claims for which the payment level might differ from other payments for similar services and communicate those to the SC. Examples are discussed below.

- **Bundled payments:** In some states, providers submit denied or \$0 paid informational line details with claims that are paid at a bundled rate. These informational line items should be included in the PERM+ universe submission (as discussed in Claims and Payments Excluded from the PERM Universe, above) but the state **MUST** provide logic to be able to identify and remove the informational lines prior to sampling
- **Medicare crossover claims:** Medicare crossover claims are often paid on the basis of the type of service, and the universe file will need to capture these payments at the header or line item level, as appropriate to each payment. States need to provide the SC direction about the best way to identify crossover claims in the universe data
- **Payments made to state-owned facilities or out-of-state facilities:** Some states pay state-owned facilities differently than private providers. If this is the case, be certain to select the appropriate header or line value for the PERM universe
- **Compound drugs:** Many times the payment rate for compound drugs is different than for other pharmacy claims. Please be sure to verify the payment level for these claims and ensure that, at the details stage, all billed NDCs can be provided to the SC

- **Clinic claims:** Clinic claims paid under an all-inclusive code (i.e. T1015) are treated similarly to header level claims. Only the line with the all-inclusive code will be eligible for sampling. All other lines are informational only and should not be subject to sampling but are required to be present in the details
- **Multiple units of service:** Multiple units of service recorded on a single line should not be divided into multiple sampling units if the units were priced and paid on the same line. For example, a procedure code having 2 units should not be made into 2 records of one unit each

**A sampling unit should never be represented multiple times within a universe file or included in more than one universe file across programs or across quarters. For line-level claims, the same ICN and line number combination should not repeat. For header-level claims, the same ICN should not repeat. If a claim is submitted at the header level, the associated lines should not be included in the sampling universe. Likewise, if a claim is submitted at the line level, the associated header should not be included in the sampling universe.**

Again, the SC will work with the state to evaluate payments and help determine if the state should include the payment in the PERM universe at the line level or the header level.

### **2.5.3 Identifying Sampling Strata**

For RY 2021, the SC will use payment-based stratification. The FFS universe is stratified into five dollar-weighted strata with an additional stratum for claims that cannot receive Medical Record Review. The managed care universe will continue to be stratified by payment amount only. The SC will assign each payment in the FFS PERM universe to one of six strata, which include:

- Fixed Payment Strata (MEDICAID) – Stratum will include fixed payments, Medicare premium payments, aggregate payments, and Medicare crossover claims. The count of sampled claims from this stratum will be capped at no more than 10% of the sampled payments each quarter
- Fixed Payment Strata (CHIP) – Stratum will include fixed payments, aggregate payments, and Medicare crossover claims (if applicable)
- Five (1-5) Payment-Weighted Strata (MEDICAID AND CHIP) – All FFS claims that do not fall into one of the strata listed above will be classified into one of five payment strata. *The count of sampled claims from each payment-weighted stratum will be two claims at a minimum for each quarter*

## **3. Changes to the RY 2021 PERM+ Data Submission Instructions from FY 2017**

There have been fourteen updates to the required fields since the FY 2017 cycle.

| <b>General Fields</b>                  |  |
|--|--|
| <b>Federal Claims Category</b>         | This column should be populated with MSIS Code, CMS 64 line, or other state mapping into a federal claim category. The values help reconcile between the PERM universe and the reported federal dollars on the CMS 64/21 forms. States may also use this field in their quality review to determine all federally matched Title 19 and 21 payments are included in PERM submission.  |
| <b>Provider Fields</b>                 |  |
| <b>Attending Provider</b>              | Attending provider is the specific individual providing the services to the patient. This is required for institutional claims. In previous cycles, this was noted in the performing provider field, but there are now separate attending provider fields in the layout.   |
| <b>Attending Provider Location ID</b>  | This field is required if the attending provider ID is not unique to the location of the provider (e.g., if provider ID = NPI). This variable is in both the Claims and Provider files and both values must match between the two files.   |
| <b>Billing Provider Location ID</b>    | This field is required if the billing provider ID is not unique to the location of the provider (e.g., if provider ID = NPI). This variable is in both the Claims and Provider files and both values must match between the two files.   |
| <b>Performing Provider Location ID</b> | This field is required if the performing provider ID is not unique to the location of the provider (e.g., if provider ID = NPI). This variable is in both the Claims and Provider files and both values must match between the two files.  |
| <b>Prescribing Provider</b>            | Prescribing provider – the provider who wrote the script - is required for pharmacy claims. In previous cycles, this was requested in the referring provider field, but there are now separate prescribing provider fields in the layout.  |
| <b>Billed Fields</b>                   |  |
| <b>Billed Units</b>                    | This field should only be used if the units of service billed by the provider are different than the units of service that are included in the current ‘Units of Service’ field. This information is used by the RC during the medical record reviews. If your state does not capture this information the new field may be left blank.  |
| <b>Bill Type</b>                       | This field should be used to distinguish which claims are billed on the UB-04 form or the CMS 1500. If the claim was not billed on either form, the value may be blank or populated with a state-specific value. If state-specific values are given, please provide a data dictionary decode. This information is used by the RC during the medical record reviews. If your state does not capture this information, the new field may be left blank.                      |
| <b>Billed Procedure Code</b>           | This field should be used only if the procedure code on the line billed is different than the procedure code provided in the ‘Proc Code Line’ field. If the billed procedure code is the same as the one listed in the ‘Proc Code Line’ field, ‘Billed Procedure Code’ may be left blank. If state-specific procedure codes are used in this field, please provide data dictionary decodes. If your state does not maintain this field, the column may also be left blank. |

|   |  |
|---|--|
| <b>Billed Revenue Code</b>                | This field should be used only if the revenue code on the line billed is different than the revenue code provide in the 'Rev Code' field. If the billed revenue code is the same as the paid, then the 'Billed Rev Code' may be left blank. If state-specific revenue codes are used in these fields, please provide data dictionary decodes. If your state does not maintain this field, the column may also be left blank. |
| <b>Billed Amount</b>                      | This column should only be populated if the billed dollar amount is different than the total computable paid amount on the claim. If the billed amount equals the paid amount, the 'Billed Amt' field may be left blank. If your state does not maintain this field, the column may also be left blank.  |
| <b>Eligibility Fields</b>                 |  |
| <b>Recipient Eligibility Type</b>         | This field has been added to collect information on the recipient's eligibility. This information should be identified from the state's adjudication system. It should be the eligibility of the recipient used to adjudicate the claim. All value decodes must be provided in the data dictionary.  |
| <b>Recipient Date of Death</b>            | This field should contain the date of death of the recipient if deceased. This field may be blank for the majority of recipients. This value should be taken from the state's adjudication system.   |
| <b>Express Lane Eligibility Indicator</b> | This field contains the indicator for recipients with Express Lane Eligibility (ELE). Data decodes must be provided in the data dictionary. Recipients with ELE do not qualify for eligibility review, but may qualify for medical record or data processing review.   |

## 4. Quality Review

States are responsible for performing a quality review of their PERM+ data submissions each quarter before submitting files to the SC. Quality review saves time and resources for both the state and CMS contractors by identifying data problems early in the PERM process. **Exhibits 6, 7, and 8** contain suggested minimal QC checks for states to complete.

### Exhibit 6: Minimum Claims File Quality Control Checks

| Quality Review   | Suggested Tests  |
|--|--|
| 1) Ensure all required fields are reported in the claims file(s) | <ul style="list-style-type: none"> <li>▪ Prepare a list of all fields in the state's claims file and compare to the list of fields for the claims file in Appendix A</li> <li>▪ Identify any missing fields</li> <li>▪ Determine why the field is missing; if the state does not report a field, let the SC know when submitting the file</li> </ul> |

| Quality Review  | Suggested Tests  |
|---|--|
| <p>2) Check that key fields are properly formatted and have valid values</p>  | <ul style="list-style-type: none"> <li>▪ Check that key fields are not truncated or contain extra data. Review fields such as               <ul style="list-style-type: none"> <li>• ICN;</li> <li>• Line Item Number;</li> <li>• Billing Provider Number;</li> <li>• Recipient ID;</li> <li>• Total Computable Amount Paid Header;</li> <li>• Total Computable Amount Paid Line; and</li> <li>• Dates of payment</li> </ul> </li> </ul>   |
| <p>3) Check that the dates of payment for all records are within the appropriate quarter in RY 2021</p>   | <p>Review the values in the paid date field<br/>Only include payments that were adjudicated in the appropriate quarter of RY 2021</p>  |
| <p>4) Confirm that the SC can identify claims as Medicaid (Title XIX) or CHIP (Title XXI)</p>   | <p>Review programming logic and outputs to make certain that claims in the Medicaid universe were matched with Title XIX funds and claims in the CHIP universe were matched with Title XXI funds. This check includes sharing funding source information so that the SC can identify Title XIX Federal Financial Participation (FFP) or Title XXI FFP.<br/>Please note, Medicaid expansion (M-CHIP) claims reimbursed with Title 21 funds belong in the CHIP universe for PERM purposes.</p>           |
| <p>5) Confirm that the SC can identify claims as FFS or Managed Care</p>  | <p>Confirm that data are present and documentation is available that would allow the SC to assign claims to FFS or managed care universes<br/>Review notes from intake discussion and subsequent communications with the SC and CMS to ensure the universes contain the required types of claims and payments<br/>If PERM “fixed” payments will be submitted with the managed care data, be sure to notify the SC and provide guidance on how to identify the payments so they can be moved to FFS</p> |
| <p>6) Check that the following payment records can be identified by the SC:</p> <ul style="list-style-type: none"> <li>▪ Adjustments and voids</li> <li>▪ State-only claims</li> <li>▪ Administrative payments</li> <li>▪ Gross adjustments</li> <li>▪ Claims matched with funds other than Title XIX or Title XXI</li> </ul> | <p>Confirm that data are present and documentation is available that would allow the SC to identify and remove these records from all data sources</p>   |

| Quality Review   | Suggested Tests  |
|--|--|
| 7) Each payment is represented only one time in the claims file                                    | Confirm there are no ICN-line number combination is repeated in the claims file  |
| 8) Confirm that no encounter claims data is submitted in the claims file                           | Remove all encounter records or provide logic for Lewin to remove these records  |
| 9) Prepare to review the SC's comparison of the CMS-64/21 reports to the PERM universe submissions | Compare PERM universe totals to either two previous quarters' CMS-64/21 reports, or to the current quarter's CMS-64/21 reports<br>Look for major dips or spikes or "significant" differences |
| 10) Compare the universe size to previous quarterly submissions                                    | Sum number of claim lines and paid amount and compare across quarters<br>Note the reason for any significant changes   |

**Exhibit 7: Minimum Recipient File Quality Control Checks**

| Quality Control Check   | Suggested Tests   |
|---|---|
| 1) Make sure all required fields are reported in the recipient file | Prepare a list of all fields in the state's recipient file and compare it to the list for the recipient file in Appendix B<br>Identify any missing fields<br>Verify there is no truncation of variable values<br>Determine why the field is missing; if the state does not report a field, let the SC know when submitting the file |
| 2) Check that the Recipient Number field is properly formatted      | Check that the Recipient ID field is not truncated or has additional data<br>Replace the data in the Recipient ID field if formatting problems are found  |

**Exhibit 8: Minimum Provider File Quality Control Checks**

| Quality Control Check  | Suggested Tests   |
|--|---|
| 1) Make sure all required fields are reported in the provider file | Prepare a list of all fields in the state's provider file and compare it to the list for the provider file in Appendix C<br>Identify any missing fields<br>Determine why the field is missing; if the state does not report a field, let the SC know when submitting the file |

| Quality Control Check                           | Suggested Tests  |
|---|--|
| 2) Check that key fields are properly formatted | <p>Check that the Provider Number or the Provider NPI field is not truncated or has additional data depending on which field the state uses to identify providers</p> <p>Replace the data in the Provider Number or the Provider NPI field if formatting problems are found</p> <p>Ensure that the Provider Number is a unique identifier in the Provider File and matches the Provider Number in the Claims File (i.e., Provider information can be merged onto the claims data file supplied)</p> <p>Include all billing, performing, attending for institutional claims, referring, and prescribing providers in the file</p> |

#### 4.1 CMS-64 and CMS-21 Report Comparison to PERM Universe Data

States should compare their PERM+ data submissions to CMS-64 and CMS-21 Financial Reports, respectively, to ensure that the universes are complete and accurate. Comparing the PERM+ data to the CMS Financial Reports ensures that no programs (likely not in MMIS) that appear on the CMS Financial Reports have been omitted from the PERM+ data and that the state is capturing all necessary data sources in the PERM+ data submission.

This comparison may identify data which does not fit cleanly into the definitions previously discussed in these submission instructions. For example, the CMS Financial Reports include non-recipient-specific payments, such as aggregate provider reconciliations. When aggregate or similar payments are identified on the CMS Financial Reports, we ask that states bring this to the attention of the SC so that we can investigate whether these should be included in the PERM+ data on a case-by-case basis. Lewin begins these comparisons as soon as Quarter 1 data is sampled.

If after this comparison the state identifies Medicaid or CHIP dollars that were excluded from the PERM+ data, the state should notify the SC to coordinate the submission of the missing data. The CMS-64 and CMS-21 forms may not be finalized until after the PERM+ data are submitted, so we ask that states conduct these comparisons after the forms are finalized and as necessary review forms submitted from previous quarters to see if any adjustments were made after the initial submission that will need to be communicated to the SC during reconciliation.

**All claims submitted to the SC under the CHIP program should be matched with Title XXI funds; these are reported on three forms, 64.21U, 64.21U-Waiver, CMS-21. If you believe some CHIP claims submitted for PERM review are reported on any other forms, please notify the SC. No Title XXI matched claims should be included in the PERM Medicaid universe.**

The comparison that the states are asked to do is separate from the in-depth comparison that the SC will conduct throughout the cycle. The SC will identify the portions of the CMS-64 and CMS-21 Financial Reports that are not appropriate to compare to PERM universes (excluded claims, drug rebates, adjustments, etc.), remove these from the CMS-64 and CMS-21 Financial Report Totals, and separate the CMS-64 and CMS-21 totals between FFS and managed care. If significant differences, as defined by CMS greater than 15% per quarter and 5% overall, between PERM

universes and the Financial Reports are identified, the SC will contact the state to resolve the differences. **Please note that if significant differences are found, the SC may halt sampling and details work on impacted universes until the discrepancies are resolved.**

## **5. Data Transmission and Security**

This section discusses the PERM+ data submission media, PERM+ data submission formats, Transmission Cover Sheet and QC verification, and data transmission and security.

### **5.1 Submission Media**

The SC's data systems are capable of reading electronic data stored on a variety of media (e.g., CDs, DVDs, portable hard drives). It is preferred that states send their data via Secure File Transfer Protocol (SFTP). SFTP instructions will be sent to the states before the first required data submission. Any files sent via SFTP need to be encrypted and password protected. If submission via SFTP is not an option, states may submit data on an encrypted CD or DVD. Do not send PERM data via email.

States planning to use the SFTP will be required to test their access prior to the first data submission. Please note that the Lewin SFTP has been updated since the last cycle. It now has two-factor authentication for increased security. Once the user names and passwords for your state are assigned, you will receive instructions on how to access the new SFTP site. States are encouraged to test access as early in the cycle as they are able.

See the Data Transmission section below for information on passwords and encryption.

### **5.2 Submission Formats**

The SC prefers receiving data in one of three formats: SAS data set, delimited file, or flat file.

- SAS data set: PC-based SAS data set
- Delimited file: Comma delimited (.csv) or delimited (pipe, tab, etc.) text (.txt)
- Flat file: A universal text format with a single fixed record length and layout (also called a "flat format" or "ASCII format"); if the state submits text files, except for the first row of the field names, do not include any log or summary information at the beginning or at the bottom of the data file

### **5.3 Transmission Cover Sheet**

The state must submit a Transmission Cover Sheet with every data submission. The Transmission Cover Sheet is used to ensure that all the data sent by the state is received by the SC, and to compare the control totals and to correct any potential data transmission errors before processing and sampling the data. Examples of the Medicaid FFS and Medicaid managed care data Transmission Cover Sheets are provided in Appendix B. The state may include the Transmission Cover Sheet on the CD or DVD with the data, email the cover sheet to the SC, or submit as a separate file through the SFTP. SC will not process the data further until the control totals match.

## 5.4 File Layouts

States are required to submit file layouts to inform the SC of the field name, length, and type (numeric versus character), and valid values as applicable. File layouts are required to the SC ahead of the state's first quarterly data submission and any time there is a change made to the initial file layout. If files are submitted from multiple sources or in multiple formats the state should submit a separate file layout for each of the files. Failure to provide this documentation will delay the SC's work on the state data submission. This is critically important in processing the files. Failure to submit correct and complete file layouts may lead to:

- Truncation of data
- Missing required fields
- Inability to remove non-PERM compliant records from the universe, which may in turn lead to oversampling
- Delay reviews

## 5.5 Data Dictionary

For each data source included in their PERM+ submission, states are required to submit a file in Excel, CSV, Word, or other text detailing the values in each variable field and what they stand for. For example, claim type variable can have values, such as: "I", "O", "3", "6", and data dictionary would indicate "I" = "Inpatient", "O" = "Outpatient", "3" = "Clinics", and "6" = "Fixed Payment". If the field has standard codes, like ICD9/10, diagnosis codes, or procedure modifiers, these variable values do not need to be provided in the data dictionary. States must ensure that valid values listed in the data dictionary match the values in the claims data.

Required tabs/pages in the data dictionary:

- FFS
  - Claim type
  - Provider Type
  - Billing Provider Specialty
  - Service Category
  - Place of Service
  - Local Codes (procedure, revenue, place of service, etc.)
  - Recipient aid category/recipient eligibility category
  - Funding Code
- Managed care
  - Payment Type
  - Program Type

- Recipient rate indicator
- Recipient aid category/recipient eligibility category
- Funding Code

## **5.6 Privacy**

The SC is committed to protecting the confidentiality, integrity, and accessibility of sensitive data. PERM states should comply with HIPAA Privacy and Security Rules, CMS Business Partners Systems Security Manual rules for sensitive data transfer, and state privacy and security rules. Data that include Protected Health Information (PHI) and/or Personally Identifiable Information (PII), such as recipient ID numbers, is considered sensitive data.

## **5.7 Data Transmission**

All data transmissions containing PHI or PII must conform to the FIPS 140-2 standards and comply with proper password protection and encryption procedures.

The SC will only accept data files via SFTP transmission or sent on hard media (e.g. CD, DVD) through the mail. Do not send PERM data via email.

The preferred method of data transmission is via SFTP.

### **Follow these steps if sending data via SFTP.**

- 1) Contact the SC to discuss the SFTP site, establish an SFTP connection, and test the SFTP prior to data submission
- 2) Encrypt and password-protect data files
- 3) Zip all PERM data files, including the Transmission Cover Sheet and file layouts, into a single zip file
  - Note: For very large files, more than one zip file may be necessary. Contact the SC for more information.
- 4) Upload the zipped file to the SFTP
- 5) Email a copy of the Transmission Cover Sheet and password(s) to the SC to indicate that the PERM data is available on the SFTP site

### **Follow these steps if mailing data.**

- 1) Zip files, as needed, based on file size
- 2) Encrypt and password-protect data files, copy to a CD or DVD
- 3) Label the CD or DVD “CMS Sensitive Information”
- 4) Label the envelope “To be opened by addressee only”
- 5) Address the envelope to the SC
- 6) Mail the CD or DVD via a private delivery service (such as FedEx or UPS) or the USPS

7) E-mail the Transmission Cover Sheet and password(s) for the data to the SC

## 6. Common PERM Data Issues

| PERM Data Issue                               | State Responsibility   |
|---|--|
| Vendor Data                                   | <ul style="list-style-type: none"> <li>▪ Ensure that all state vendors participate in the SC intake meetings and data from all state vendors is included in the data submission</li> <li>▪ Send the file layout and data dictionary for each data source to the SC ahead of the Quarter 1 data submission</li> <li>▪ Notify the SC if the claims information in the vendor system (paid dates, paid amounts, payment status, etc.) differs from what is provided in the universe data</li> <li>▪ Notify SC if claims information in the vendor system is stored in another system (i.e., MMIS or data warehouse)</li> <li>▪ Ensure that all vendor data dictionaries are sent to the SC</li> </ul> |
| M-CHIP and S-CHIP Claims                      | <ul style="list-style-type: none"> <li>▪ Notify the SC if your state has a Medicare expansion program</li> <li>▪ Provide the SC with the information needed to identify these expansion claims in the universe data</li> <li>▪ Verify the match type that these claims receive and provide that information to the SC</li> </ul>   |
| CMS 64/21 Reconciliation                      | <ul style="list-style-type: none"> <li>▪ Ensure that the data and financial staff attend the 64/21 intake meeting</li> <li>▪ Work with financial staff to ensure that all federally matched data is included in the universe</li> <li>▪ Check the quarterly 64/21 reports to ensure that all required data is being submitted to PERM</li> <li>▪ If you receive notification that the 64/21 reconciliation numbers are outside the allowed threshold, provide information needed to address the differences within the timeframes requested by the SC</li> </ul>   |
| Missing Provider and/or Recipient Information | <ul style="list-style-type: none"> <li>▪ Review universe data submission and verify that all required provider and recipient fields are populated</li> <li>▪ Send an explanation to the SC for any fields that are blank (not always present on denied claims, not applicable for aggregate claims, will be provided only for sampled claims, etc.)</li> <li>▪ Notify SC if provider/recipient information reside in multiple systems – for example at the vendor and at the state/MMIS</li> </ul>   |
| Timeliness                                    | <ul style="list-style-type: none"> <li>▪ States need to review the cycle timelines as well as the state-specific timelines sent over by your Data Manager</li> <li>▪ If the state anticipates any delays – in submitting data, responding to questions, or providing information needed for details – the SC should be notified as soon as possible</li> <li>▪ Delays in completion of sample and detail files cause delays in the start of reviews by the ERC and RC</li> </ul>   |

## **7. Appendices**

### **7.1 Fields for PERM+**

Appendices A, B, and C list the fields for states to include with the PERM+ data submissions. PERM+ data submissions include provider, recipient, and full claim detail information. States do not need to submit “detail” information after claim sampling. However, this does require the inclusion of more fields in the PERM+ data submission—similar to the field requirements in the routine PERM detail submission.

The data fields to include in each PERM+ file are described in the following appendices:

- Appendix A: Claims File
- Appendix B: Recipient File
- Appendix C: Provider File

### **7.2 PERM+ Transmission Cover Sheets**

Appendix D shows copies of the Transmission Cover Sheets that states should use when submitting files for PERM+. There are separate cover sheets for the claims file, recipient file, and provider file. State should use copies of these transmission cover sheets to report the control totals for each file for each quarter of data submitted for PERM+.

## Appendix A: Claims Fields for PERM+ Data Submissions

| Field Designation | Standard Field Name | Field Description  | Required for FFS | Required for MC | Standard Field Format | Quality Review  |
|-------------------|---------------------|--|------------------|-----------------|-----------------------|---|
| ICN               | icn                 | Unique claim identifier (e.g., ICN, TCN, other state issued number)  | X                | X               | varchar               | <p>Ensure the field is not truncated and does not contain extra data</p> <p>Each record in the Claims File must be able to be uniquely identified with data elements contained in the record, typically a combination of ICN and Line Number</p> <p>If the ICN/Line Number is not sufficient to uniquely identify a claim, the state must identify fields that can be used to uniquely identify a claim</p> |
| ICN Former        | icn_former          | For adjustment claims, the state-assigned internal control number (ICN) or transaction control number (TCN) of the claim that the current claim is adjusting | X                | X               | varchar               |   |

***RY 2021 PERM+ Data Submission Instructions***

| Field Designation       | Standard Field Name | Field Description   | Required for FFS | Required for MC | Standard Field Format | Quality Review                                   |
|-------------------------|---------------------|---|------------------|-----------------|-----------------------|--|
| Claim type              | clm_type            | State claim type indicator, typically identifying whether the claim is an institutional, medical, or crossover claim            | X                | X               | varchar               | State-specific values                            |
| Medicaid/CHIP Indicator | medicaid_chip       | Indicator identifying the record refers to a Medicaid (Title XIX) or CHIP (Title XXI) payment.                                  | X                | X               | numeric               | 1 - Medicaid (Title XIX)<br>2 - CHIP (Title XXI) |
| State Funding Code      | state_funding_code  | Code that indicates whether the claim is matched with Title XIX, Title XXI, state-only or local funds, or other funding source. | X                | X               | varchar               | State-specific values                            |
| Record Type             | record_type         | Code indicating whether the record is a claim header or a detail/line.  | X                | X               | varchar               | 'H' – Header Record<br>'L' – Line Record         |
| Fixed Payment Indicator | fixed_payment_ind   | Code indicating whether the claim or payment conforms to the PERM FFS fixed/capitated payment definition.                       | X                |                 | numeric               | 0 - FFS Claim<br>1 – Capitated or Fixed Payment  |

| <b>Field Designation</b>            | <b>Standard Field Name</b>   | <b>Field Description</b>   | <b>Required for FFS</b> | <b>Required for MC</b> | <b>Standard Field Format</b> | <b>Quality Review</b>  |
|-------------------------------------|------------------------------|--|-------------------------|------------------------|------------------------------|--|
| Adjustment Indicator                | adjustment_ind               | Code indicating whether the claim/line is an adjustment and the type of adjustment (e.g. original claim, void, credit, debit, etc. | X                       | X                      | varchar                      | State-specific values  |
| Date Paid Header                    | date_of_payment_header       | The date a claim or payment was originally adjudicated or paid; not the check date (unless there is no adjudication date)          | X                       | X                      | varchar (mm/dd/yyyy)         |  |
| Medicare Crossover Indicator Header | mcare_xover_indicator_header | Header-level indicator that a claim is a crossover claim from Medicare to Medicaid   | X                       |                        | varchar                      | "Y" = Crossover<br>"N" = Not a Crossover<br><br>Ensure all values are coded as "Y" or "N" and the field is populated for all records |
| Category of Service                 | service_category             | Classification for broad types of state/federal covered services   | X                       |                        | varchar                      | Can be MSIS category of service or state-defined service type  |

## Appendix B: Recipient Fields for PERM+ Data Submissions

| Field Designation       | Standard Field Name     | Field Description   | Standard Field Format | Quality Review   |
|-------------------------|-------------------------|---|-----------------------|--|
| Recipient ID            | recipient_id            | Recipient ID number<br>Can be Medicaid ID or system-specific ID   | varchar               |  |
| Recipient name          | recipient_name          | Recipient Name<br>States may submit recipient name according to state preference (e.g., can submit multiple fields for first, middle, and last name or a single field containing recipient full name) | varchar               |  |
| Recipient date of birth | recipient_dob           | Recipient date of birth   | varchar (mm/dd/yyyy)  | Ensure year of birth is not future date or extreme date in the past (example: 1800s) |
| Recipient gender        | recipient_gender        | Recipient gender code   | varchar               | Ensure all values are coded as "M" or "F" and the field is populated for all records |
| Recipient county        | recipient_county        | Recipient county  | varchar               | State-specific values  |
| Service area indicator  | service_area_ind        | Indicator for the geographic service area if the service area is not the county   | varchar               | State-specific values  |
| Recipient Date of Death | recipient_date_of_death | Date of death of recipient  | varchar (mm/dd/yyyy)  |  |

| <b>Field Designation</b>                 | <b>Standard Field Name</b> | <b>Field Description</b>                                     | <b>Standard Field Format</b> | <b>Quality Review</b> |
|--|----------------------------|--|------------------------------|-----------------------|
| Express Lane Eligibility (ELE) Indicator | ele_ind                    | Indicator for recipients with Express Lane Eligibility (ELE) | Varchar                      | State-specific values |

## Appendix C: Provider Fields for PERM+ Data Submission

Medical Record Contact provider information are listed in separate fields. All other providers – billing, performing/rendering/servicing, attending, prescribing, referring provider information should all be listed in the provider fields. Note: institutional claims require that the performing provider fields be populated by the attending provider information. For example, if on an institutional claim, the attending provider ID is P8756276, the provider ID in the provider file will be set to P8756276 and the attending provider number will be set to P8756276 in the claims file. Thus, resulting in a one-to-one match between the provider file and the claims file.

| Field Designation             | Standard Field Name | Field Description                          | Standard Field Format | Quality Review  |
|-------------------------------|---------------------|--|-----------------------|---|
| Medical Record Contact Name   | mr_contact_name     | Medical record contact name                | varchar               | Ensure this field is populated when available<br><br>Do not report this field if values are the same as data in the corresponding fields for billing, performing or referring providers |
| Medical Record Contact Addr 1 | mr_contact_addr_1   | Medical record contact address first line  | varchar               | Ensure this field is populated when available<br><br>Do not report this field if values are the same as data in the corresponding fields for billing, performing or referring providers |
| Medical Record Contact Addr 2 | mr_contact_addr_2   | Medical record contact address second line | varchar               | Ensure this field is populated when available<br><br>Do not report this field if values are the same as data in the corresponding fields for billing, performing or referring providers |

| <b>Field Designation</b>     | <b>Standard Field Name</b> | <b>Field Description</b>  | <b>Standard Field Format</b> | <b>Quality Review</b>   |
|------------------------------|----------------------------|---|------------------------------|---|
| Medical Record Contact City  | mr_contact_city            | Medical record contact city   | varchar                      | <p>Ensure this field is populated when available</p> <p>Do not report this field if values are the same as data in the corresponding fields for billing, performing or referring providers</p>  |
| Medical Record Contact State | mr_contact_state           | Medical record contact state: 2-character postal abbreviation.                          | varchar                      | <p>Ensure this field is populated when available</p> <p>Do not report this field if values are the same as data in the corresponding fields for billing, performing or referring providers</p> <p>Use the abbreviated 2-letter code for each state (e.g. WA for Washington state)</p> |
| Medical Record Contact Zip   | mr_contact_zip_code        | Medical record contact zip code. Should contain either 5 or 9 digits (ZIP+4 digit code) | varchar                      | <p>Ensure this field is populated when available</p> <p>Do not report this field if values are the same as data in the corresponding fields for billing, performing or referring providers</p> <p>If possible do not include hyphens when using a ZIP+4 digit code</p>                |

| Field Designation            | Standard Field Name | Field Description  | Standard Field Format | Quality Review  |
|------------------------------|---------------------|--|-----------------------|---|
| Medical Record Contact Phone | mr_contact_phone    | Medical record contact phone number.<br><br>All phone numbers should be 10 digits, including the area code | varchar               | Ensure this field is populated when available<br><br>Do not report this field if values are the same as data in the corresponding fields for billing, performing or referring providers   |
| Provider number              | prov_id             | Provider ID<br>Can be NPI or legacy provider ID  | varchar               | State-specific values<br><br>Ensure this is a unique identifier match to billing/performing/referring id in claims layout. This ID should guarantee a one-to-one match. If it does not, please include other variables (i.e., provider location ID) or logic to achieve one-to-one match. |
| Provider name                | prov_name           | Provider name  | varchar               |   |
| Provider type                | prov_type           | Provider type  | varchar               | State-specific values   |
| Provider specialty           | prov_spec           | Provider specialty code  | varchar               | State-specific values   |
| Provider address 1           | prov_addr_1         | Provider address first line  | varchar               |   |
| Provider address 2           | prov_addr_2         | Provider address second line   | varchar               |   |
| Provider city                | prov_city           | Provider city  | varchar               |   |
| Provider state               | prov_state          | Provider state   | varchar               | Use the abbreviated 2-letter code for each state (e.g. WA for Washington state)   |
| Provider zip                 | prov_zip_code       | Provider zip code<br>Should contain either 5 or 9 digits (ZIP+4 digit code)                                | varchar               | If possible do not include hyphens when using a ZIP+4 digit code  |

| Field Designation    | Standard Field Name | Field Description   | Standard Field Format | Quality Review   |
|----------------------|---------------------|---|-----------------------|--|
| Provider phone       | prov_phone          | Provider phone number(s)<br>All phone numbers should be 10 digits, including the area code          | varchar               | If possible, do not use hyphens or parentheses                     |
| Provider fax         | prov_fax            | Provider fax number, when available<br>All fax numbers should be 10 digits, including the area code | varchar               | If possible, do not use hyphens or parentheses                     |
| Provider NPI         | prov_npi            | Provider NPI, if available  | varchar               | If certain atypical providers do not have NPIs, please note to SC. |
| Provider Location ID | prov_loc_id         | State specific code that differentiates different addresses for the same provider                   | varchar               | Required if provider ID is not unique per each provider location   |

## Appendix D: PERM+ Transmission Cover Sheets

These forms will also be provided to the state in MS Excel (“.xlsx” file format).

| Transmission Cover Sheet   |                    |               |                  |                    |               |                      |  |   |  |
|--|--------------------|---------------|------------------|--------------------|---------------|----------------------|--|---|--|
