

Lamps for Artists

2015 - 2016

The Daylight Company

Daylight™

The best lamps for artists

The quality and unique design of our lighting range for painters, sculptors and other artists ensures that, in this brochure, they will find the best choice for their lighting needs.

Our range is the result of 30 years' experience in the design and manufacture of high quality task lamps for artists that deliver optimal results. Our designs incorporate our accumulated knowledge of the major elements that allow artists to work in comfort:

- The type of colour-balanced light required
- The level of brightness needed
- The avoidance of glare and heat
- The ergonomics of where and how different artists work

Where and how artists work

Artists work in many different ways. We offer lamps suited to small, medium or large artwork, for working at an easel, on a table or against a wall, as well as lamps for lighting small or large objects or surfaces.

Our lamps are designed to be positioned so that the light shines exactly where it is needed. The lamps can be moved around as necessary. They are all made with high quality materials and components, ensuring durability and reliability for years to come.

Easel

Studio

Table

Bulbs

Artists need colour-balanced light

Painters, sculptors and other artists need to see their work-in-progress clearly and continuously, at any time of the day or night. They need to be able to choose, mix and apply colours correctly, as they would in “natural daylight”. Conventional lighting is usually very yellow and makes it hard to judge colours accurately.

All our lamps simulate natural daylight with a light colour of 5500°- 6500° Kelvin, which allows you to see true colours all of the time.

Luminos

D/E35600

This powerful LED lamp provides the ultimate in high light output with an extraordinary wide spread of light that is fully dimmable. Ideal for work on a large table, or with the addition of a floor stand, it is excellent for work at an easel or on a sculpture.

The arm has a long reach of 112cm (44") and can be moved easily with one hand. The shade can be positioned effortlessly, exactly where it is needed. A piece of precision engineering, incorporating the latest high power LED technology, that is also robust and long lasting.

Key Features

- Very wide shade 65cm (25½")
- Effortless free-motion, spring balanced arm
- Extra long reach: 112cm (44")
- Internally reinforced arm
- 120 powerful Daylight™ LEDs provide true colour matching
- 3 step dimmer
- Lamp Brightness: 4,200 Lux at 30cm (12")

Artists need a bright light

In order to see comfortably it is of the utmost importance that the project in progress has the right amount of light. Insufficient light has a negative impact on the creative process, as well as causing eyestrain, irritation and tiredness.

All our lamps, when correctly positioned, ensure a brightness of at least 1000 Lux (and often more). This is the minimum we believe is acceptable at normal working distances.

Professional Artist Lamp

D/E33900

Have total control over your creativity with the right light exactly where you need it, by using the 360° shade rotation and 320° head-flip system. This allows the lamp head to swivel completely to a different area, maximising light coverage of up to A1-size surfaces (approx. 59cm x 84cm / 23½" x 33").

This attractively engineered lamp is supplied with two clamps. The universal easel clamp allows the lamp to be attached to virtually all floor standing metal and wooden easels. The heavy duty table clamp allows the lamp to be used with a table easel, on a drafting table or work bench.

Key Features

- 2 mounting clamps, 1 for an easel and 1 for a table
- 360° shade rotation to direct the light exactly where it is needed
- 320° head-flip system which allows light coverage for A1-size area
- Fully adjustable flexible arm
- Daylight™ light source provides true colour matching
- Replacement 24W tube: D13627
- Lamp brightness: 1,850 Lux at 30cm (12")

Avoiding heat and glare

Heat and glare can cause discomfort. Artists often have to work in close proximity to the light source, so it is vital that this emits as little heat as possible. All our lamps generate very low heat. They are also designed to be used in a way that will minimise glare.

Easel Lamp

D/E31075

A simple solution for all artists working at an easel. Ideal for work up to A1-size surfaces (approx. 59cm x 84cm / 23½" x 33"), or smaller

It has a unique Clamp-lock™ system which keeps the lamp firmly attached to the easel. The flexible arm allows the light to be positioned exactly where it is needed.

Key Features

- Unique Clamp-lock™ system keeps the lamp firmly in position
- Attaches to easels or tables up to 3cm (1¼") thick
- 18cm (7") flexible arm to direct the light exactly where it is needed
- Wide shade with reflective coating for maximum light spread
- Powerful 20W energy saving Daylight™ bulb for true colour matching
- Lamp brightness: 2,970 Lux at 30cm (12")
- Replacement 20W bulb D15200

Engineered for a purpose

Artists work in many different ways. Our range of lamps allows painters to work at an easel, sculptors to move light around their floor space, and others to work at a table. Amongst the lamps we offer, artists will find lamps that suit the size of their artwork. We also recognise that artists frequently move, adjust and reposition their lamp(s) to have the light where it is needed. Our lamps are designed to make this a simple and easy process.

Artist Studio Lamp and Stand

D/E31375

Provides maximum light output over the largest area. Exceptionally versatile lamp for work on medium, large and very large surfaces and objects. Ideal for large canvasses, murals and sculptures.

This lamp has a high quality, large brushed aluminium shade. It can be clipped on to the tall tripod stand in any position. It is relatively light and therefore easy to move around.

The powerful light output provided by this lamp can be doubled by adding an additional lamp (D/E31475 - Artist Clip-On Studio Lamp) to the tripod.

Two Artist Studio Lamps & Stands used simultaneously provide a fantastically even light, eliminating shadows.

Key Features

- Ideal for work on large surfaces
- High quality 2.3m metal tripod stand supports up to 2 lamps
- Daylight™ light source provides true colour matching
- Extremely powerful 32W energy saving Daylight™ bulb
- Replacement bulb: D15320
- Lamp brightness: 4,600 Lux at 30cm (12")
- Additional Clip-on Studio Lamp available (D/E31475)

Artist Clip-On Studio Lamp

D/E31475

This is an additional lamp, which can be added to the tripod stand of the D/E31375 Artist Studio Lamp to achieve greater light output.

Durability and Reliability

All of our products are made with high quality materials and components and undergo vigorous tests during development. Our quality control and safety standards are recognised as amongst the best.

Wafer 1 & 2 Lightbox

D/E35040 & D/E35030

The latest generation of lightweight ultra slim lightboxes using fully dimmable LED technology. Available in 2 sizes: A4 and A3. They provide an even spread of light from edge to edge and emit very low heat. Supplied with a mains adapter. The Wafer lightboxes are ideal for tracing, sketching, stencilling, calligraphy, scrapbooking, embossing, embroidery, sewing and much more.

D/E35040 Wafer 1 Lightbox

Size: A4, 32cm x 23cm (12½" x 9")

Weight: 0.92kg

D/E35030 Wafer 2 Lightbox

Size: A3, 44cm x 32cm (17" x 12½")

Weight: 1.64kg

Key Features

- Only 0.8cm (⅜") thick
- Daylight™ light source provides true colour matching
- High Quality LEDs
- Fully dimmable
- Cable length: 1.8m (6ft)

Other lamps popular with artists

Ultra Bright Slimline LED Table Lamp D/E35127 Slimline LED Table Lamp D/E35107

D/E35127 lamp Brightness 2,100 Lux at 30cm (12")
D/E35107 lamp Brightness 1,630 Lux at 30cm (12")

These powerful LED Table Lamps will add value to any home, office or studio. They are available in 2 models. The 35107 is our standard version and the 35127 is our ultra bright and dimmable version.

They both provide a long arm reach of 90cm (35½") and a wide, even light coverage, which is ideal for large work surfaces. The daylight light source reduces eye strain and glare for healthy vision and allows true colour matching.

- Brushed steel finish
- Flexible arm with 90cm (35½") reach for wide spread of light
- Supplied with high quality metal clamp
- Daylight™ LEDs provide true colour matching
- Slimline Table Base available separately (D52107)

Twist Portable LED Lamp D/E35700

This lamp is one of the most popular lamps in the Daylight™ range. The Daylight™ LEDs provide high contrast and accurate colour matching, making it easier and less tiring to read, work and see detail clearly. They are also low in energy consumption.

The twistable shade allows the light to be positioned where you need it. The lightweight design makes it easy to move around the house and also ideal to take to classes.

- Lightweight and foldable, take Daylight™ with you wherever you go
- “Easy-Twist” shade for accurate positioning of light
- Removable base to increase the stability of your lamp
- Daylight™ LEDs provide true colour matching
- Daylight™ LEDs reduce eyestrain and improve contrast
- Lamp brightness: 2,200 Lux at 30cm (12")

Freedom LED Battery Lamp

D/E35027

This LED Lamp is truly portable, with a rechargeable battery life of up to 6 hours. It is ideal when you need light far away from a plug socket. The Daylight™ LEDs provide high contrast and accurate colour matching, making it easier and less tiring to read, work and see detail clearly.

The lamp has an integrated handle and is supplied with a rechargeable battery and AC Adapter. It is ideal for reading, crafting, taking to classes or when working in a garage or workshop.

- Use your Daylight™ lamp anywhere
- Ideal for reading, crafts, DIY, work and travel
- Rechargeable - up to 6 hours of light
- 2 ways to power:
 - Internal rechargeable battery (included)
 - Plug in power supply (included)
- Daylight™ LEDs provide true colour matching
- Lamp brightness: 1,400 Lux at 30cm (12")

MAGnificent Floor & Table Magnifying Lamp

D/E25050

The MAGnificent Lamp is ideal for all types of detailed work. This lamp is cleverly designed to be used as both a floor lamp (with 2 different height options) as well as a table lamp. The Daylight™ LEDs provide high contrast and accurate colour matching, making it easier and less tiring to read, work and see detail clearly. LEDs use very little energy. The large, semi-rimless 1.75X magnifying lens allows close-work activity.

- Ideal for all types of detailed work
- Height adjustable, can be used as a floor or table lamp
- 1.75X magnification lens, 14.6cm (5¾") diameter, to help you see more clearly
- Large, semi-rimless lens allowing close-work activity
- Flexible gooseneck directs light exactly where you need it
- Maximum height; Floor lamp 125cm (50") and table lamp 50cm (20")
- Daylight™ LEDs provide true colour matching
- Lamp brightness: 1,850 Lux at 15cm (6")
