Patura Electric Fencing

...ONE OF THE BEST ELECTRIC FENCING SYSTEMS IN THE WORLD...

When you invest in electric fencing, you'll want to be sure you can depend on it, without question, without fail - whether it's to keep animals in or to keep them out! Already the "system of choice" across Continental Europe, Patura is a respected brand with an enviable reputation for practical, efficient yet innovative products.

As part of our ongoing commitment to and investment in our stockists, we offer branded merchandisers free of charge with an initial order over £1,000.

Call your Account Manager today!

Combining the latest technologies and materials with guaranteed quality, reliability and durability, plus German attention to detail from the acknowledged experts in electric fencing.

Patura won't let you down, guaranteed.

GOLD STAMP OF QUALITY

Patura is a German manufacturer of a quality product with outstanding strength and durability.

*Terms and conditions apply, for more information please contact your supplier.

5-YEAR WARRANTY

All Patura products are manufactured to the highest industry standards and this is backed by a no-quibble guarantee policy. All energisers have a 3-year warranty* and some insulators have a 10-year warranty.

Rubber Matting

STANBRIDGE STABLE MAT

The Stanbridge stable mat is made from solid rubber with a moulded bubble top surface. Our best selling and most popular stable mat has a wide rib base which allows for easy drainage.

Application: **Stables, Walkways, Horseboxes**

CODE	SIZE MM	WEIGHT KG
4089-1857	1830 x 1220 (6'x4') x 17	35

WYCOMBE STABLE MAT

Manufactured from high quality non-porous solid rubber. The hammer top / tortoiseshell surface makes mucking out and sweeping very easy, with a wide rib base allowing for easy drainage.

Application: **Stables, Walkways, Horseboxes**

CODE	SIZE MM	WEIGHT KG
4091-1857	1830 x 1220 (6'x4') x 17mm	35kg
4093-1857	1830 x 1220 (6'x4') x 10mm	25kg

PREMIUM STABLE MAT

Manufactured to our own pattern and specification, we have created a mat with extremely high abrasion resistant properties. The top surface has a diamond chequer plate finish giving very good grip but still allowing for easy cleaning and sweeping.

Application: **Stables, Walkways, Horseboxes, Horse Walkers**

CODE	SIZE MM	WEIGHT KG
4083-1857	1830 x 1220 (6'x4') x 18mm	40

LOKMAT

Manufactured from high quality non-porous solid rubber, this mat is easy to handle due to its size. It has an interlocking edge on four sides of the mat, allowing any size to be created, preventing gapping, and can be used in areas without walls.

Application: **Stables, Walkways**

CODE	SIZE MM	WEIGHT KG
4090-1227	1220 x 910 x (4'x3') 17mm	20

CONTINUOUS ROLL RUBBER

Hardwearing anti-slip rubber matting - the ultimate for joint-free walkways and horse transporter flooring. Up to 2.4m wide. Hammer blow top with micro rib base.

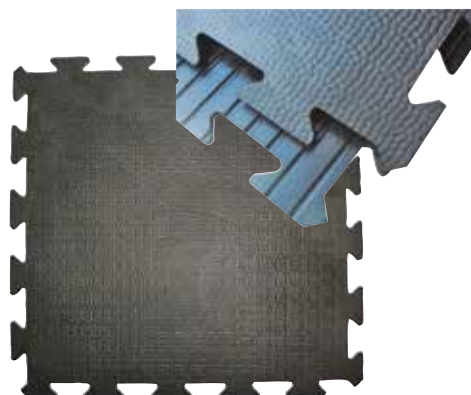

Application: **Horseboxes, Stables, Walkways**

CODE	SIZE
4110-2407	2.4m x 10mm x 40m. Available cut to length
4110-2417	2.4m x 15mm x 40m. Available cut to length

TUDOR INTERLOCKING MAT

Very high abrasion resistant interlocking mat for the most demanding of areas. Easy clean hammer top and mats will not separate due to interlocking system.

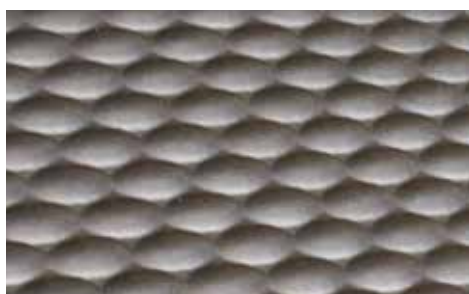

CODE	SIZE MM
4308-1010	1000 x 1000 x 17mm

RUBBERLITE MAT

This unique mat is made from a mixture of rubber and EVA. This gives the lightweight characteristics of EVA but with added durability for long lasting use.

Application: **Stables, Horseboxes**

CODE	SIZE MM	WEIGHT KG
4094-0320	1850 x 1200 x 20mm	9

GRANULISTIC LIQUID RUBBER FLOORING

A trowel applied latex rubber flooring that cures to form an impervious hard wearing equestrian flooring. Suitable for veterinary situations, stables, lorries and trailers. Pack coverage 1.8m² @ 12mm thick. Use a spiked roller to finish and seal the surface.

Application: **Stables, Horseboxes**

SPIKED ROLLER

Used to remove air bubbles and help seal and finish the surface of Granulistic Rubber Flooring.

CODE	WEIGHT KG
4097-0907	24
4097-1000	Spiked Roller

DURAFLOOR

Hard wearing rubber matting with a linen surface to provide a lighter weight flooring for single piece trailer and vehicle floors. Rubber top surface with a polyester backing gives exceptional strength and ease of bonding.

CODE

Code 4111-2021C

SIZE

2m wide x 4mm cut to length.

MOULDED RUBBER RAMP MAT

Ribbed ramp mat with integral rubber bars. The superb rib texture offers maximum slip resistance while the integral rubber bars, spaced to conform to DEFRA regulations, are also ribbed to ensure a secure foothold for both horse and handler. The mat is non-absorbent 100% rubber and can be hosed clean in seconds. The premium choice of most horsebox manufacturers. Available in two sizes with the largest mat designed to cover the gap between ramp and lorry.

Application:

Horsebox Ramps

CODE

4100-2257

2.3 x 2.48m (single piece)

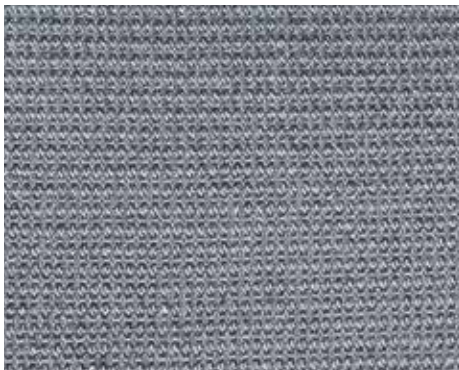

4100-2387

2.3 x 2.8m (single piece)

GRIP TOP MATTING

Hard wearing grip-top rubber matting providing excellent grip for all ramps. Available in two widths.

Application: **Horsebox Ramps**

CODE

4105-1507

1.5m wide x 50m. Available cut to length

4106-1207

1.2m wide x 50m. Available cut to length

SIZE

RAMP CARPET

Latex backed ribbed ramp carpet. Stocked in dark grey but other colours available to order. Available in two widths.

Application: **Horsebox Ramps**

CODE

4103-2008

2m wide x 25m. Available cut to length

4104-2009

1m wide x 25m. Available cut to length

SIZE

BROAD RIB RUBBER

An economical ribbed rubber suitable for many applications from ramps to living areas and general walkways.

Application: **Horsebox ramps & General Walkways**

CODE **SIZE**
4107-1207 1.2m x 6mm x 10m. Available cut to length.

FINE RIB RUBBER

Suitable for many applications where low cost, easy clean protection is required.

Application: **Application: Horsebox Ramps, Living Areas & Walkways**

CODE **SIZE**
4108-1207 1.2m x 3mm x 10m. Available cut to length

INSERTION RUBBER

Smooth finish rubber with a cotton insertion for use on partitions and walls.

Application: **Horsebox Partitions**

CODE **SIZE**
4120-1407 1.4m x 5mm x 10m. Available cut to length
4121-1207 1.4m x 3mm x 10m. Available cut to length

RUBBER SHEETING

Smooth finish rubber.

Application: **Horsebox Partitions & Walls**

CODE **SIZE**
4114-1407 1.4m x 10mm x 5m

CLEAR PVC SHEETING

Exceptionally strong clear PVC sheeting for use on horsebox partitions and doorways.

CODE	SIZE
4125-1208	1.2m x 4mm x 10m
4125-1208C	1.2 x 4mm cut to length

EVA WALL BOARDS

Suitable for lining horsebox and stable walls. These lightweight energy absorbing wallboards are of the highest quality and will provide ultimate protection for your horse. Surface finished in a random pattern.

Application: **Horsebox & Stable Walls & Floors**

CODE	SIZE MM	WEIGHT KG
4094-0127	1800 x 1200 x 11mm.	4.5
4094-0167	1800 x 1200 x 15mm	6
4094-0227	1800 x 1200 x 22mm	9

EVA WALL BOARDS – STANDARD QUALITY

Energy absorbing EVA boards with a cross hatch surface pattern.

Application: **Horsebox & Stable Walls**

CODE	SIZE MM	WEIGHT KG
4094-0107	1800 x 1200 x 10mm	4.5
4094-0117	1800 x 1200 x 20mm	9

EVA WALL FIXINGS

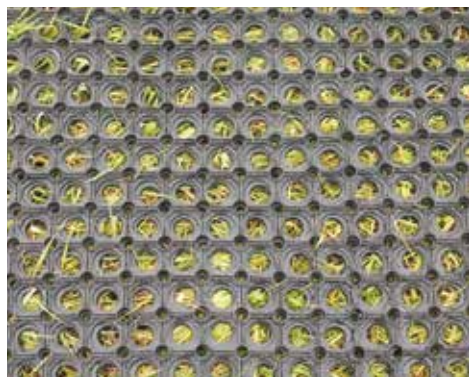

Recessed plastic washer. Set includes 1 x stainless steel screw, 1 x plug, 1 x plastic recessed washer.

CODE	DESCRIPTION
4094-1000	s/s screw, plug & recessed washer
4094-1001	Recessed black finishing washer

GROUND RING MAT

The ideal solution for muddy gateways. Free draining perforated mats reduce poaching and create a stable walking surface.

CODE	SIZE MM	WEIGHT KG
4191-1507	1500 x 1000 x 16mm	14
4192-1507	1500 x 1000 x 23mm	18

SUREFOOT RUBBER ADHESIVE

A trowel applied polyurethane adhesive specially suited for gap filling and used widely to bond horsebox floors and ramp mats.

Application: **Horsebox Floor & Ramp bonding.**

CODE	WEIGHT KG
4128-6001	9

SUREFOOT MAT ADHESIVE

Formulated for bonding stable mats, this moisture cure adhesive will foam to fill and seal gaps as it cures.

Application:
**Stable floors –
bond rubber to
concrete.**

CODE	WEIGHT KG
4130-1000	10
4130-2501	22.5

SUREFOOT JOINT SEALANT

Our joint sealer is specially formulated to seal joints around the perimeter and between rubber mats. The 600ml tube has to be used with a barrel applicator gun (available part No 4129-2000).

Application: **Sealing rubber matting
– Horseboxes, Stables etc.**

CODE	SIZE MM
4129-1000	600ml
4129-2000	Sealant Applicator Gun. For 600ml Joint.

BROUGHTON FITNESS MAT

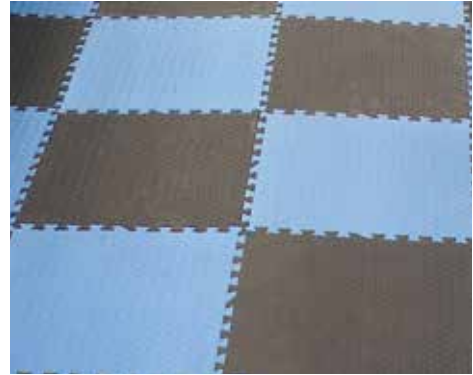

Solid rubber matting suited to the most demanding areas. Ideal for weights training as they protect the floor from heavy weights. Two thicknesses are available.

CODE	SIZE MM	WEIGHT KG
4091-1857	1830 x 1220 x 17mm	35
4093-1857	1830 x 1220 x 10mm	25

GYM FLOOR

1m square tiles which interlock together to form an energy absorbing soft warm floor. Suitable for all workout areas.

CODE	SIZE MM	WEIGHT KG
4302-1007BL	1000 x 1000 x 20mm	3
4302-1007BK	1000 x 1000 x 20mm	3

RUBBER BRIQUETTES

Interlocking bricks made from thick composite rubber. Specifically developed in extra heavy-duty quality for horse walkers. They provide a higher level of shock absorption with greater slip resistance and are free draining. Choice of red, green or black.

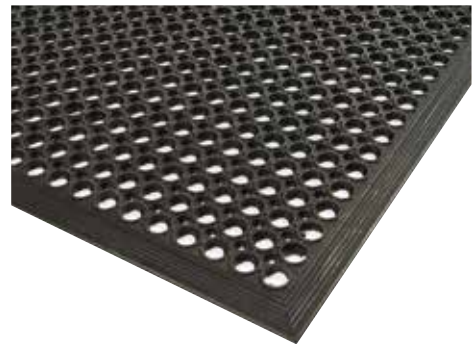

Application: **Horse Walkers**

CODE	FINISH
4089-1000	Red

ULTI-MAT

Hollow top mat ideal for cleaning boots and shoes. Raised design on surface provided for greater traction and ramped edges for non-trip safety. This makes an excellent entrance mat or economical anti fatigue mat for behind a counter.

CODE	SIZE MM
4202-1527	910 x 1550mm

MAXI GUARD ENTRANCE MAT

Thousands of rubber bristles clean boots and shoes fast. Exceptionally hardwearing and will not clog with dirt. Ramped edges for non-trip safety.

CODE	SIZE MM
4217-0617	800 x 600mm
4217-1617	1000 x 600mm

GALVANISED BOOT SCRAPER ENTRANCE MAT

A galvanised boot scraper complete with side brushes.

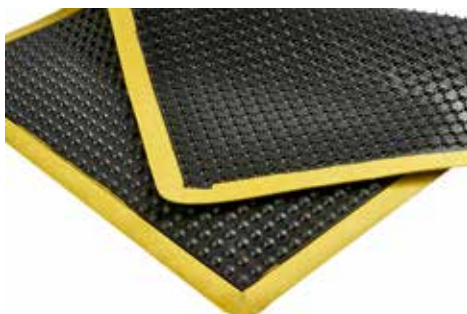

CODE	SIZE MM
4096-1007	1007mm

ANTI-FATIGUE MATTING

ERGO-TRED

The ultimate anti-fatigue mat for behind any counter. Air-cushioned surface is designed to create a comfortable working environment. Heavy duty construction with flexible dome designed surface to reduce fatigue and increase productivity. 5 star rating for comfort.

CODE	SIZE MM
4200-2917	900 x 1200 (black with yellow safety border)

FOOT BATH MAT

Ramped edges contain any sanitising solution for boot dipping. The base of our boot dips are constructed with hundreds of rubber bristles which trap dirt and grit and scrub boots clean.

CODE	SIZE MM
4213-1707	700 x 900 x 25mm
4213-2507	980 x 810 x 48mm

DIRT-BUSTER MAT

Heavy duty product that provides an economic upgrade for your entrance. Rubber backing to prevent movement on carpeted surfaces. Absorbs dirt and moisture, considerably reduces your cleaning work and lengthens the life of your floors. Easy to clean and lightweight.

CODE	SIZE MM	FINISH
4210-1507	850 x 1500mm	Black Steel, Black Blue, Black Mink, Granite

LOGO ENTRANCE MAT

Couple the first impression of your company with custom Logo Entrance Mats. We offer in-house graphic design, all that we require is an electronic copy of what you are seeking to promote. Choose up to 8 colours from our huge 30 colour palette to 'show your true colours'. Tough nitrile rubber backing ensures no slipping will occur.

CODE	SIZE MM
4214-1207	850 x 1200mm

SADDLERS

SHAVINGS FORK

High quality polypropylene head shavings forks. This fork makes mucking out easier due to it being very lightweight.

Its aluminium handle gives it strength yet keeps weight to a minimum. Available in long handle or D-handle with colour options for the heads.

COLOURS AVAILABLE:

CODE	DESCRIPTION	FINISH
674-1021	D-Handle	Black, Pink
674-1521	Long Handle	Black, Pink

SADDLERS**HEAVY DUTY
ECONOMY
SHAVINGS FORK**

This heavy-duty shavings fork has a long wooden handle and a steel head which is galvanised for increased durability.

A good economical option for mucking out which is available to purchase as a complete fork or just the head or handle.

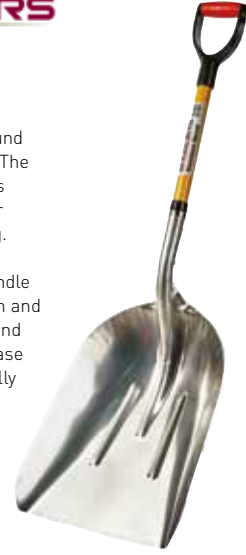

CODE	DESCRIPTION
671-0259	Head & Handle
671-0250	Head only
603-0040	Wooden Handle

SADDLERS**ALUMINIUM
SHOVEL**

An essential tool around the yard and stables. The aluminium shovel has a large blade ideal for scraping and clearing.

It has a fibreglass handle for increased strength and reduction of weight, and a D-handle grip for ease of use. An exceptionally lightweight shovel.

CODE	DESCRIPTION
672-6559	D-Handle

SADDLERS**LARGE
PLASTIC SHOVEL**

A versatile and essential product for use around the stables. With a wide blade and a sturdy wooden handle this shovel is extremely durable.

This shovel is lightweight for easy use.

CODE	DESCRIPTION
672-1009	D-Handle

SADDLERS**YARD SCOOP**

Handling of bedding and waste couldn't be much easier. With a long wooden handle and a lightweight plastic head, this scoop is an extremely versatile tool to have around the stable and yard.

Whether it be clearing bedding or rubbish, this scoop makes the job easier every time.

CODE	DESCRIPTION
673-1509	Long Handle

HAROLD MOORE STANDARD SHOVEL

Self-assembly shovel, standard sized blade with hollow D-grip cone shaft. This shovel is ultra lightweight and easy to handle. A perfect all rounder.

COLOURS AVAILABLE:

CODE	DESCRIPTION	FINISH
670-0309	D-Handle	Red, Orange Lime Green, Yellow

HAROLD MOORE HAND SHOVEL

Hand shovel with small reinforced flared blade and end cap. A must have versatile tool ideal for general stable and yard applications and cleaning small areas such as trailers.

COLOURS AVAILABLE:

CODE	FINISH
670-0019	Magenta, Blue, Red, Orange

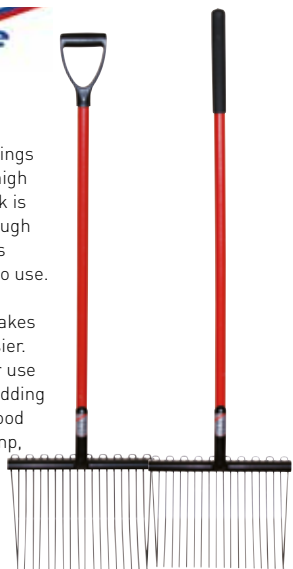

SHAVINGS FORK

A trusted popular shavings fork manufactured to high specifications. This fork is engineered to last through its superior quality. It is light, strong and easy to use.

The perfect balance makes mucking out much easier. This fork is suitable for use on multiple types of bedding including; shavings, wood pellets, wood chip, hemp, and paper.

Available in long handle or D-handle.

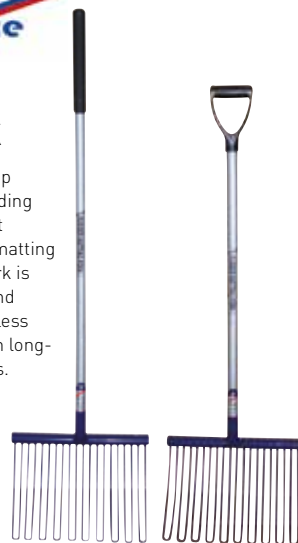

CODE	DESCRIPTION
681-1100	D-Handle - 110cm
681-1200	Long Handle - 120cm

RUBBER MATTING FORK

Rounded tines pick up manure and wet bedding with ease but will not damage the rubber matting in the stable. This fork is perfectly balanced and makes mucking out less back breaking. Tough long-lasting finish handles.

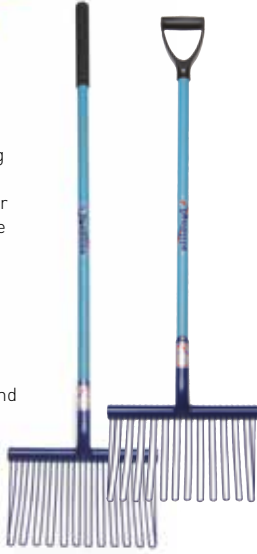

CODE	DESCRIPTION
684-1020	D-Handle
684-1220	Long Handle

PELLET MASTER

Ingenious design traps debris but allows bedding to fall between the tines. The tines are much closer together than the Fynalite Shavings Fork.

Rounded tines pick up manure and wet bedding but will not damage the rubber matting in the stable. It is strong light and easy to use.

CODE	DESCRIPTION
690-1100	D-Handle
690-1200	Long Handle

SUPER LITE FORK

Many people find that a standard adult stable fork is too long and wieldy and a junior fork is however too short. This fork has been developed to be shorter in length and has a narrower head to reduce the weight. This lightweight fork reduces back strain and makes mucking out a breeze.

Available in long handle.

CODE	DESCRIPTION
686-1200	Long Handle

MULTI MUCKA

The Multi Mucka is designed to work on all bedding types. With sharpened and pointed prongs, it allows bedding to be removed with ease.

This fork is made from high specification lightweight steel and high-carbon spring steel wire tines. It is perfectly balanced and is strong, light and easy to use. It is very well suited to field clean up as the prongs slide easily under debris without becoming clogged with grass.

CODE	DESCRIPTION
683-1010	D-Handle
683-1210	Long Handle

GROOVY FORK

A trusted popular shavings fork manufactured to high specifications. This fork is engineered to last through its superior quality and it is light, strong and easy to use. The perfect balance makes mucking out much easier. This fork is suitable for use on multiple types of bedding including; shavings, wood pellets, wood chip, hemp, and paper.

Available in long handle or D-handle.

CODE	DESCRIPTION
687-1200	Senior - Long Handle
687-7500	Junior - Long Handle

JUNIOR SHAVINGS FORK

A scaled down version of the Fynalite Shavings Fork designed for the younger user. A smaller more appropriate fork meet children's needs allowing them to become more involved and helps establish good stable practise and responsibility for the horse. Available in D-Handle.

CODE	DESCRIPTION
682-7500	D-Handle

MINI MUCKA

This fork is specially designed for the very young users (5 to 8 years). Its special lightweight construction allows children to learn good stable management at an early age.

COLOURS AVAILABLE:

CODE	DESCRIPTION	FINISH
688-7500	Long Handle	Blue, Pink

ASH HANDLE MANURE FORKS

Manufactured with high quality forged high carbon heads which are designed for long life and strength. The fork head is forged out of a single piece of steel resulting in them being less likely to snap, shatter or bend.

Strong wooden ash handles light in weight yet exceptionally strong. Choice of handles available in D or Long. Superbly balanced to ease back strain.

CODE	DESCRIPTION
680-2120	2 Prong Pitch Fork – Long Ash Handle
680-3120	3 Prong Hay Fork – Long Ash Handle
680-4110	4 Prong Manure Fork – Ash D-Handle
680-4120	4 Prong Manure Fork – Long Ash Handle
680-4540	4 Prong Manure Fork – Extra-Long Ash Handle

HI-STRENGTH FORKS

Fynalite Hi-Strength forks have steel heads forged in one piece giving added strength meaning they are less likely to snap, shatter or bend.

The handles are high tensile steel (BS 6323) which is light in weight yet stronger than mild steel, and the handle precision is shaped to fit for extra strength whilst maintaining a superb balance.

COLOURS AVAILABLE:

CODE	DESCRIPTION	FINISH
680-6110	4 prong Manure Fork – Hi-Strength D-Handle	Green, Pink
680-6120	4 Prong Manure fork – Hi-Strength Long Handle	Green, Pink
680-6130	5 Prong Manure Fork – Hi-Strength T Handle	Green

MULTI WEEDA

An exceptional all-round weeding tool. This excellent tool easily removes the most difficult and toxic weeds. Its sharpened prongs dig easily in the ground, even when the ground is hard or stony.

It allows the whole weed to be removed with minimal disturbance to the soil and prevents the need for harmful chemicals.

Spare clips for fixing all our standard hayracks.
Packed in a set of four. BZP finish.

CODE	FINISH
909-0002	BZP

SADDLERS**CORNER FEEDING STATION**

Heavy duty plastic corner feed station that holds a small bale of hay and two buckets for feed or minerals. By incorporating the buckets within the feeding station the risk of trapped hooves, broken buckets and hay wastage are minimised. The feeding station ensures horses eat at a natural level which results in a healthy respiratory system and reduction in the risk of colic. Easy to clean smooth, non-porous surface. Available in horse or pony size. Bucket holders are removable.

CODE	SIZE MM	FINISH
909-0859	Pony (does not hold buckets)	Black, green
909-1209	Horse (buckets not included)	Black, green

SADDLERS**HAY-GRAZE FEEDER**

Reduce hay wastage by up to 50%. Keeps the paddock tidy. Minimise poaching by rotating around the field. Quick & easy to fill. Strong frost resistant plastic. 250L capacity. Alleviated boredom with slower feeding. Use in field, yard or stable. Allows horses to eat at natural level. Ideal for laminitics and horses on restrictive diets.

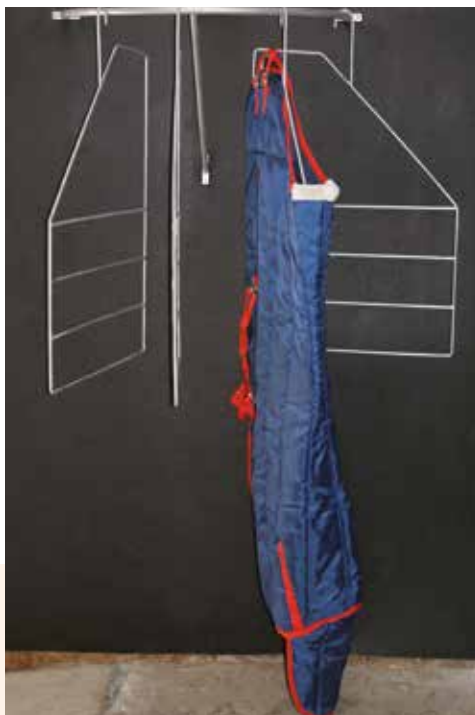

Size: 110 x 75 x 55 cm.

CODE
909-2209

SADDLERS**BLANKET HANGER & RAIL**

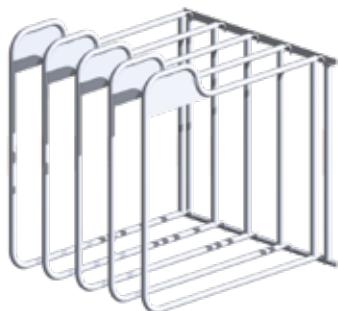

An innovative, versatile and effective rug hanging system allows storage of up to 20 rugs in a compact but accessible way. Its horizontal bars also enable the hanger to be used for smaller items such as Numnahs and Saddle Pads. Galvanised finish.

CODE	DESCRIPTION
947-0002	Rail
948-1002	Hanger

SADDLERS**RUG HANGER**

Uniquely designed tubular rug hanging rail can be screwed to a wall in any suitable location. The folding arms make for convenient storage when not in use. Available with three or five arms in the highest quality epoxy finish. An excellent quality British made product.

CODE	DESCRIPTION

SADDLERS

PURE HIMALAYAN SALT LICK

Saddlers Pure Himalayan Salt Licks provide the essential minerals Sodium and Chloride, which are often short in diets of working horses. Salt (Sodium Chloride) is such an important mineral for good health that horses seek it out if they are short. Therefore, offering a block is a good way to ensure they can help themselves to what they need. One of the purest, most natural sources of salt available, the Himalayan blocks are mined out of the ground at the foot hills of the Himalayan mountains. The blocks are 550 million years old, a completely natural source of salt for your horse.

The blocks are very hard so they won't crumble and the horse will not be able to bite off large chunks as they may do with pressed salt blocks. The hardness also makes them more resistant to rain so they can be hung in the field. Saddlers Pure Himalayan Salt Licks contain mostly salt, with a small amount of other essential minerals including magnesium, potassium and iron.

KBF99

The new range of KBF99 products brings a revolution to Horse Health Care. KBF99 will assist in the prevention of infection and reinfection of these troublesome and painful diseases. Laboratory tests resulted in KBF99 material killing 99% of the bacteria test culture.

Any reduction of harmful bacteria and fungus in the stable environment assists in reducing the chances of the diseases being transmitted from horse to horse. The KBF99 product range has been developed to help protect and safeguard horses and in some cases humans from contracting these and other conditions.

SEALING TAPE

Sealing Tape is a heavy duty, reinforced tape, designed for holding bandages and poultices in position for prolonged periods. Ideal for use on awkward to access areas and hooves. Individually wrapped, 7.5cm wide, 50cm long, the Sealing Tape is very economical in use.

CODE	PACK QUANTITY
800-0125	Single Roll
800-0126	Pack 16 Rolls

WRAPTEC

The VetSet Wrap Tec is a self-adhering bandage, ideal for holding dressings and providing support during strenuous exercise. Care must be taken when used over padding to avoid restriction to blood flow. Easy to tear, WrapTec will conform to hold dressings securely, allowing movement without slippage. Individually packed to avoid contamination and available in a variety of colours.

COLOURS AVAILABLE:

CODE	SIZE	COLOUR	PACK QTY
800-0085	10 cm	Black, Blue, Red	12 rolls

POLDRESS

PolDress is a highly absorbent, multi-layered and impregnated dressing making it the preferred choice of many veterinarians. PolDress contains a mild anti-septic, Boric Acid, to minimise the risk of infection and promote the healing process. For maximum effect, the PolDress should be impregnated with water. This will activate the Tragacanth, a poulticing agent, which will help draw out infected wounds. Each PolDress poultice is wrapped individually to ensure a clean dressing is immediately available. Use wet or dry, cut to the required size and secure with ElasTec or WrapTec cohesive bandage.

CODE	SIZE	PACK QUANTITY
800-0015	20 x 40 cm	10 dressings

POLDRESS HOOF

The PolDress Hoof Poultice is a highly absorbent, multi-layered and impregnated dressing, made in the same way as the PolDress Poultice Dressing. PolDress Hoof Poultice contains a mild anti-septic, Boric Acid, to minimise the risk of infection and promote the healing process. For maximum effect, the PolDress should be impregnated with water. This will activate the Tragacanth, a poulticing agent, which will help draw out infected wounds. The PolDress Hoof Poultice is packed individually to ensure a clean dressing every time.

CODE	SIZE	PACK QUANTITY
800-0025	Hoof	40 dressings

COMBEE T

ComBee T is a highly absorbent cotton padding covered in a gauze tissue. The ComBee T is the traditional medical grade cotton padding - ideal for protection, insulation and absorbency. ComBee T is known for its insulating properties which cushions and protects wounds from external trauma. The low-adherent surface avoids any wound disruption and prevents contamination from loose fibres or harmful particles. ComBee T can be applied over dressings prior to bandaging or cut to size to be used as a primary wound dressing. Ideal for infected and discharging wounds. Can be autoclave sterilized and used as a protective wound padding for all animals. ComBee T should be cut to the required size and secured with ElasTec or WrapTec cohesive bandage. To avoid pressure points do not overlap or fold.

CODE	SIZE	PACK QUANTITY
800-0055	30 cm	18 rolls
800-0056	45 cm	12 rolls

COTTON WOOL

VetSet Cotton Wool is manufactured specifically for Veterinary use. Premium quality fibres are used to produce this highly absorbent veterinary quality cotton wool, which can be used for a variety of applications, including cleansing and padding.

Electric Fencing

Patura Electric Fencing

...ONE OF THE BEST ELECTRIC FENCING SYSTEMS IN THE WORLD...

When you invest in electric fencing, you'll want to be sure you can depend on it, without question, without fail - whether it's to keep animals in or to keep them out!

Already the "system of choice" across Continental Europe, Patura is a respected brand with an enviable reputation for practical, efficient yet innovative products.

Combining the latest technologies and materials with guaranteed quality, reliability and durability, plus German attention to detail from the acknowledged experts in electric fencing.

Patura won't let you down, guaranteed.

GOLD STAMP OF QUALITY

Patura is a German manufacturer of a quality product with outstanding strength and durability.

*Terms and conditions apply, for more information please contact your supplier.

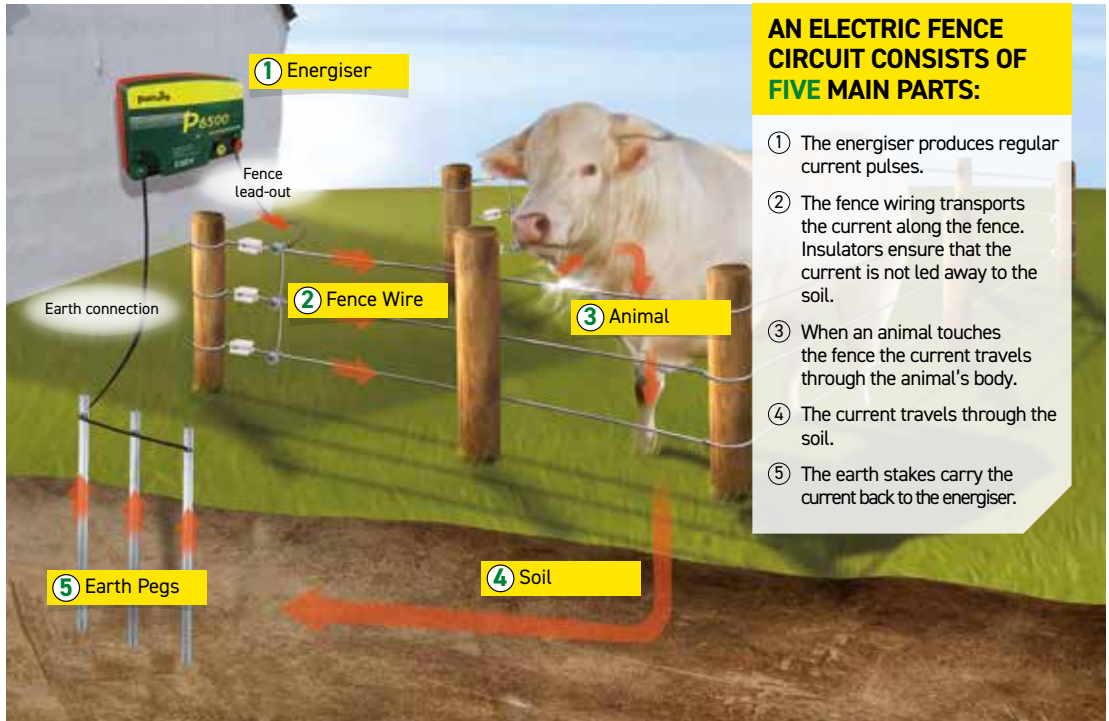

5-YEAR WARRANTY

All Patura products are manufactured to the highest industry standards and this is backed by a no-quibble guarantee policy. All energisers have a 3-year warranty* and some insulators have a 10-year warranty.

PATURA HAS A COMPLETE RANGE FOR EVERY NEED

AN ELECTRIC FENCE CIRCUIT CONSISTS OF FIVE MAIN PARTS:

- ① The energiser produces regular current pulses.
- ② The fence wiring transports the current along the fence. Insulators ensure that the current is not led away to the soil.
- ③ When an animal touches the fence the current travels through the animal's body.
- ④ The current travels through the soil.
- ⑤ The earth stakes carry the current back to the energiser.

THE ENERGISER (POWER SOURCE)

An efficient energiser is the foundation of the basic power supply to your electric fence. The output power of an energiser is specified in joules.

Four factors play a crucial role when deciding which energiser to use:

- ① Vegetation load on the fence
- ② Fence length and conductivity of the wire used
- ③ Type of animal
- ④ Whether a permanent or temporary (moveable) system is required

You will find detailed advice regarding the selection of an energiser in the tables for the particular energisers.

ELECTRIC FENCING ENERGISERS & BATTERIES

Choosing the right energiser

In order to simplify the choice of an energiser in any particular circumstance, consider all the following factors.

VEGETATION (WEEDS ETC)

The decisive role in the selection of an energiser is determined by the effect of vegetation at the fence. The high output energy of the PATURA® energisers is used primarily to destroy heavy vegetation at the fence and, despite this vegetation, to maintain a high voltage level at the fence. These are the various vegetation conditions:

No vegetation - no contact between the vegetation and the fence wire

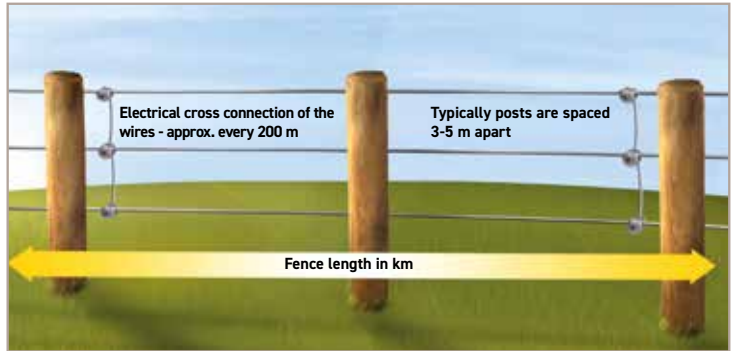

Normal vegetation - the vegetation is often touching the wire

Heavy vegetation - the wire runs completely in vegetation

FENCE LENGTH

After the vegetation, the length of the fence plays the next most important role in the selection of equipment. By fence length we mean not the total length of the individual wires added together, but simply the length of the actual fence itself. Multi-wire fences carry the current better than single strand ones, providing that the wires are connected to each other at regular intervals.

ANIMAL TYPE

The type of animal plays an important role in the selection. With animals that are difficult to contain, such as wild animals, sheep, goats and fowl, powerful equipment should be used. With more easily contained animals, such as cattle, horses, pigs and domestic animals, less powerful equipment is needed for the equivalent length of fencing.

For recommended maximum fence length please refer to the tables for the particular energisers.

Animals that are easy to contain

Animals that are difficult to contain

THE POWER SOURCE

Various power sources are available for powering energisers:

- 230 volts AC from the power outlet
- 12 volts DC from a rechargeable battery
- 12 volts DC from solar cells + battery
- 9 volts DC from non-rechargeable batteries

There are many reasons for choosing an energiser with a mains connection, should such a connection be available: the acquisition price of the energiser is relatively low, the energy costs are extremely low, and the ease of operation is very high. If there is no mains supply available, then the next best alternative is equipment with a 12 volt battery connection. The energy costs are still justifiable, but the maintenance requirement for the recharging of the batteries is nonetheless considerable. In

order to minimise this requirement - at least in the spring to autumn period - we recommend the use of solar panels, especially with the more powerful 12 volt energisers.

The most expensive alternative for powering energisers is the use of 9 volt non-rechargeable dry batteries, which also have to be disposed as special waste when exhausted. The advantage with these energisers is that they are easy to use, but their low power is a disadvantage.

9V Dry-Cell Battery Energisers

PATURA® 9V Dry-Cell Battery Energiser

Battery powered energisers for use with 9V non-rechargeable 'dry-cell' batteries or 12V rechargeable 'wet-cell' batteries. Ideal for use in areas where mains power is not easily available.

DESC	KEY FEATURES	ENERGY OUTPUT (JOULES)	MIN. ORDER Qty	OUTER CARTON Qty	CODE

Solar Powered Energisers & Panels

Suggestions of places to site your Solar Powered Energiser

A solar panel can be mounted anywhere. So long as it is not in a shaded place it will work very effectively.

Note: If theft is likely to be a significant risk mount your solar panel pole as illustrated. Simply connect your energiser to the fence using 2.5mm lead-out cable.

P35 Solar energiser is supplied ready for use. When storing the solar panel over winter take care to follow the instructions enclosed.

IMPORTANT FACT Solar panels work from either sunlight or daylight

PATURA® Solar Panel with Universal Mounting Bracket

- Polycrystalline cells for highest energy efficiency
- 5 year efficiency warranty
- Integrated charge regulator
- Aluminium universal mounting bracket allow mounting onto posts and walls

Energiser Batteries

The constant voltage supply of PATURA® alkaline batteries provides full energiser performance until the very last day.

By the use of the glass mat battery you get longer use from them and thus make a contribution in preventing waste batteries.

PATURA® 9 V alkaline electric fence battery

PATURA® alkaline batteries have a high constant voltage supply throughout their life. Thus it can be assured that throughout this time the energiser will always provide a constant output to the fence. In comparison with a zinc-carbon battery of the same capacity there is more energy stored (see figure). PATURA® alkaline batteries contain neither mercury nor cadmium. Suitable for storage up to 3 years.

PATURA® 12 V glass mat batteries

Starter batteries for cars or trucks have decisive disadvantages if used to power energisers. They have a high self-discharge, and are only cycle proof to a small degree. i.e. they will stand for markedly fewer charge-discharge cycles. PATURA® glass mat batteries for 12 V energisers and solar installations are totally maintenance-free and function independent from locations. They have a low self-discharge and are especially cyclic proof.

PATURA® 9V Super Alkaline Battery for Energisers

- Our most powerful 9V battery
- The environmentally friendly electric fence battery with constant voltage level; for constant optimal energiser performance

THE ELECTRIC FENCE CIRCUIT EXPLAINED

How does the electric fence circuit work? What are the five main parts to consider? See page 75 for more information.

p75

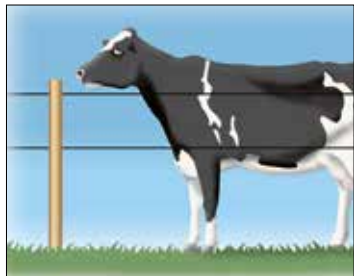

ELECTRIC FENCING CONDUCTORS & ACCESSORIES

Recommended Wire Spacings

Fence animals in...

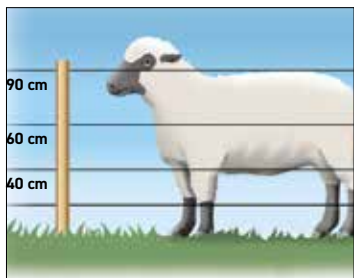

In principle, containing animals is easier than excluding them. Animals that are contained quickly get used to the fence and can be relied upon to respect it. In excluding animals, we have to consider that animals approaching the fence have no previous experience of it. In this case we need to ensure that initially the animal receives a strong and memorable electric shock, and adjusts itself to give the electric fence the necessary respect. Thus for exclusion fences, only especially powerful energisers should be used.

COWS

Electric fences for cows are 0.85 to 1.05 m high with 1 to 2 wires.

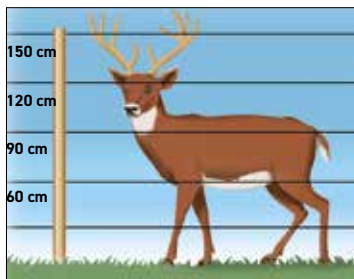

SHEEP

Electric fences for sheep require 3 or 4 highly conductive wires at the spaces shown. (The bottom wire is only necessary if lambs are being kept in)

...or keep wildlife out

EXCLUDING RED DEER

Electric fences for protecting against red deer are up to 1.50 m high with 5 wires.

ELECTRIC FENCES

Electric fences are suitable for containing or deterring just about all kinds of animal.

The fences differ only in their height, the number of wires and partly in the fence material.

Whether the fence is to be an outer fence or a subdivision also plays a role.

On these pages you will find the information on outer fence construction with respect to the quantity and height of wires for the most important types of animal.

For inner fences the heights can be selected as some 10 to 15 cm less, and one wire fewer can possibly be used.

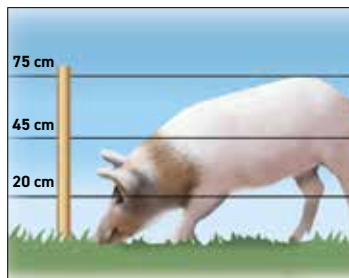

We will be pleased to advise you on any electric fencing questions.

HORSES & PONIES

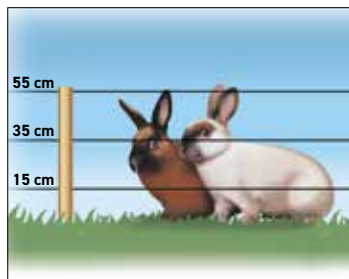

Electric fences for large horses are 1.30 to 1.60 m high with 2 to 3 conducting wires.

PIGS

Electric fences for pigs are 0.55 to 0.75 m high with 2 to 3 wires. Outer fences for domestic pigs should have a second fence to protect against wild animals.

EXCLUDING RABBITS

Electric fences for protecting against rabbits are approx. 0.55 m high with 3 wires. With rabbits, in order to prevent them digging under the fence, it may be necessary to lay an earthed wire directly on the ground. The fence should be slightly canted towards the animals.

THE ELECTRIC FENCE FOR EXCLUDING ANIMALS

As stated above, electric fences used for keeping animals out (excluding) require high power energisers. Also be sure to choose the right conductor as wires may be subject to extreme power loss (wires placed near to the ground or through woodland). The best product to use to withstand this requirement is aluminium wire featured on page 88.

Wire

PATURA® Plain Steel Wire

For permanent electric fencing systems.

FINISH	LENGTH (M)	WIRE Ø (MM)	MIN. ORDER Qty	OUTER CARTON Qty	CODE
Galvanised	approx. 250	1.8	1	5	P109100

PATURA® Tornado Steel Wire

Tornado Steel Wire has a special thick galvanised coating of 95% zinc and 5% aluminium, giving it a life that is 9 times that of normal thick galvanised wire. The retention of the zinc coating on the wire is markedly improved by combination with the aluminium.

LENGTH (M)	WIRE Ø (MM)	MIN. ORDER Qty	OUTER CARTON Qty	CODE
approx. 625	2.5	1	10	P190000

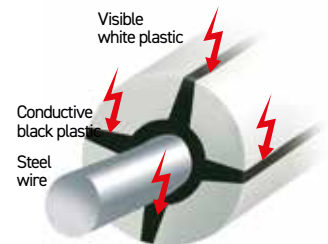

Ø 2.5mm = very high tensile strength.

PATURA® Hippo Wire with Conductive Plastic Coating

- The best visibility, optimum conductivity, minimal risk of injury and a long life - the PATURA® Hippowire meets all those demands with 2.5mm steel wire sheathed in conductive plastic
- The steel wire core ensures the best conductivity, the thick plastic sheathing offers good visibility and the lowest risk of injury, while the 4 black conducting portions ensure that the current is best passed to the animal

FINISH	LENGTH (M)	WIRE Ø (MM)	MIN. ORDER Qty	PALLET Qty	CODE
White	304	7	1	40	P190400

PATURA® Stranded Wire

Typically used with permanent outdoor pig and cattle fences. This product is particularly suitable for fences that are used to deter wildlife as wires can be installed close to the ground.

FINISH	LENGTH (M)	WIRE Ø (MM)	MIN. ORDER Qty	CODE
Galvanised	200	1.5	1	P108100
Galvanised	500	1.5	1	P108200

PATURA® Aluminum Wire

- Very high conductivity, 4 times lighter than normal plain steel wire
- Particularly suitable for fences used to deter wildlife as wires can be installed close to the ground

FINISH	LENGTH (M)	WIRE Ø (MM)	MIN. ORDER Qty	OUTER CARTON Qty	CODE
Aluminium	400	2.0	1	4	P191800

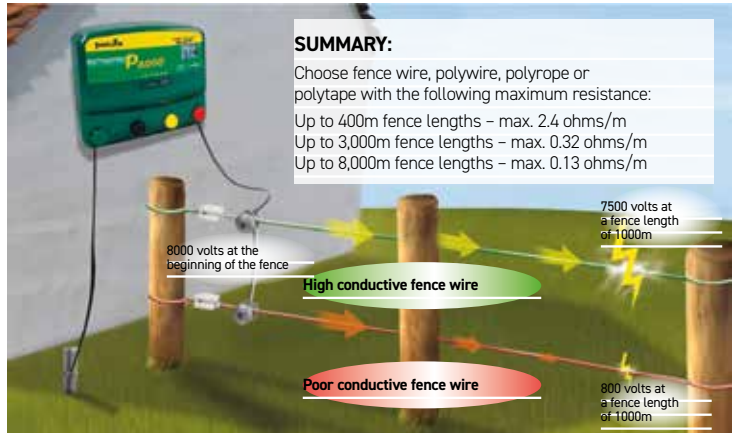

Tip: these wires only require a lightweight tension up to 20kg which can be easily reached by hand

Polywire

Conductivity of the fence wiring

Long lengths of electric fence can only function using fence wiring with good conductivity. When using 4 wires of 2.5mm steel, fences up to 120km can be considered when there is no vegetation. Using only one wire of the same, the maximum length drops to 30km.

If you go down to one compact-polywire that has 6 x Ø 0.20mm stainless steel strands, the maximum length of fence goes down to 250m. If there is vegetation at the fence, then these figures drop considerably. The fence wire must be carefully selected depending on the desired fence length and the anticipated vegetation growth.

In longer fence lengths, only high conductivity fence wires ensure maximum performance to the end of the fence.

Fence Voltage	after 100 m	after 1 km	after 3 km
Standard Polywire 3 x 0.16	2100 V	300 V	100 V
Compact Polywire 6 x 0.20	4200 V	800 V	300 V
Tornado Polywire 1 x 0.30 + 5 x 0.20 Tornado Polywire	7700 V	5500 V	3400 V
Tornado XL Polywire 3 x 0.30 + 8 x 0.20	7900 V	6900 V	5500 V

PATURA® Tornado: MAXIMUM CONDUCTIVITY FOR THE HIGHEST SECURITY

Extremely strong and conductive, thanks to a combination of stainless steel and copper strands. Stainless steel strands are very durable and copper strands are very conductive, which results in a highly effective product - able to cope with long fences in the most challenging conditions!

PATURA® Standard 3 Strand Polywire

Our recommendation for fences up to 100m long.

- Clustered connectors, with reinforced edges, increase resistance to sparks and guarantees immediate re-electrification in the event of a power cut
- Our recommendation for fences up to 9000m or 13000m long, when used with 12.5/20mm tape or 40mm tape respectively

Reels

SHEEP SYSTEMS How to erect a 3-line temporary fence system for grazing sheep

Rapid Fence construction – step by step

- Place mounting post with reels at one corner
- Set corner posts at all corners and curves
- Take the polywires from the reels and unwind
- Run the polywires over the corner insulators at the corners
- Attach the polywires at the end of the fence and ...
- ... tension by winding back on the reels
- Put in the plastic posts and attach the polywires
- Attach the cross-connection approx. every 200 m
- Attach and earth the energiser

PATURA® Reel Universal with Handle & Hanging Hook

Tensioning fixture with locking ratchet. Holds up to 800m polywire. Also suitable to fasten to the standard mounting post.

Strainers & Tensioners

PATURA® Rotating Wire Tensioner

- This rotating wire tensioner system enables you to easily tighten wires without cutting them
- The tensioner is inserted in the wire at any place on the fence
- The handle is attached and the tensioner is turned around its own axle until the correct fence tension is reached
- A cotter pin is then installed and the wire tensioner handle removed
- If necessary the wire can be retightened or relaxed at any time

ELECTRIC FENCING GATES

Gates in the Fence – 5 basic rules

1. Keep the number of gates to a minimum, as gates are always a weak point in the fence.
2. If possible, ensure that the gate is on level ground, as the gate area is always endangered by erosion.
3. You will simplify the fence construction by putting the gate in a corner area.
4. Never run the current through the gate itself from one side to the other, rather use high voltage cable to pass it under the gate.
5. Do not use spring gate sets in horse fences.

Spring gate set – the practical gate

A spring gate set consists of 4 parts: the gate handle, gate handle insulator, gate tensioning spring and the insulator for attaching the spring. Patura spring gate sets contain an especially large spring and are suitable for all gate widths from 3 to 5 metres. In the opened condition the spring carries no current, contracts to about 25cm and hangs down, with the handle from the gatepost. To shut the gate, the gate handle and spring are attached to the gate insulator on the other side of the gate. From here, the gate handle and spring obtain the current.

PATURA® Spring Gate Set

P160001

Caution: Electric fence international standards require that warning signs be placed at clearly visible points 50m apart, at junctions with byways, as well as at points where the existence of an electric fence would not be expected.

International standard requirements:

"Energisers for the operation of electric fence installations on pasture land may not be installed in buildings that are susceptible to fire such as barns, hay lofts and stables.

To protect against lightning damage, a lightning protection system (spark gap with earthing) must be built into the fence lead-out before the introduction of that lead out cable into the building".

TEMPORARY HORSE PADDOCK FENCING

The PATURA temporary fence system is ideal for fencing in areas for a short term or in changing locations.

All parts are designed for a quick and easy erection of the fence. It is possible for one person to fence in an area of one hectare, in less than half an hour.

Pest Control

WOODEN TRAPS

Wooden mouse and rat traps supplied on display cards.

CODE	DESCRIPTION
7009-201	Wooden mouse trap – 2 mounted on card
7010-101	Wooden rat trap – mounted on card

SNAPPER TRAPS

Strong plastic traps, hygienic and easy to use. Supplied mounted on display cards.

CODE	DESCRIPTION
7009-209	Snapper Mousetrap – 2 mounted on card
7010-109	Snapper Rattrap – mounted on card

RATSTOP TRAP

Ready to use Rat Trap including special trigger. Used trigger is quickly and easily replaced. Guaranteed trapping efficiency. Replacement bait supplied in packs of 3.

CODE	DESCRIPTION
7010-209	Mounted on a display card
7010-210	Replacement Bait. 3 Pack

FLY PAPER ROLL

Glue trap for controlling flies and flying insects. Use in the stable or dairy. 7m long x 30cm wide with a metal hanging handle. Yellow paper has a greater attraction to flies and insects.

CODE	SIZE
7407-700	Size: 7m x 30cm

BAIT BOX

Lockable rat bait box station ideal for use with loose grain, block bait and pasta bait. Two pre-moulded reservoirs hold grain or pellets and a removable bar with hold block or pasta bait.

CODE
7107-100

HORSEFLY TRAP

This trap will reduce gadfly presence by up to 95% in the immediate vicinity. It has a maximum effective range of approximately 5000m².

- Completely non-toxic and environmentally friendly.
- Easy to assemble and hang using the supplied link chain.
- Umbrella diameter approximately 1.1m.

CODE
6013-004

WASP/FLY TRAP

- Very high capture rate for wasps and flies and other insects attracted by sugar.
- Complete protection for bees – the special entrance to the trap and the transparent cover prevent bees from falling into the trap
- Effective area up to 200m² per trap.
- Exceptionally easy to use.
- Can be stood on a flat surface or hung up
- Weather resistant plastic with UV protection.

CODE **DESCRIPTION**
6012-003
6012-003B Box of 13

WASP/FLY ATTRACTANT

- Highly effective ready to use natural attractant.
- The attractant remains effective for up to 6 weeks.
- Can be used indoors and out.
- Attracts wasps, fruit and house flies and midges thanks to its natural fruit juice concentrates.
- Eco friendly and 100% non-toxic.

CODE DESCRIPTION

6010-001
6010-001B Box of 12

FLYCAGE 2

- Very effective fly trap.
- Special attractants made from natural raw materials.
- Flies are attracted by the scent and drown in the trap.
- Removes approximately 70% of all flies and wasps in a radius of up to 1000m².
- Effective for 4-6 weeks.
- Non-toxic and ecological.

CODE DESCRIPTION

6011-002
6011-002B Box of 20

HORSEFLY BUCKET TRAP

Bucket trap complete with suspension cord and spring snap hook for hanging.

CODE DESCRIPTION

7408-200

HORSEFLY GLUE

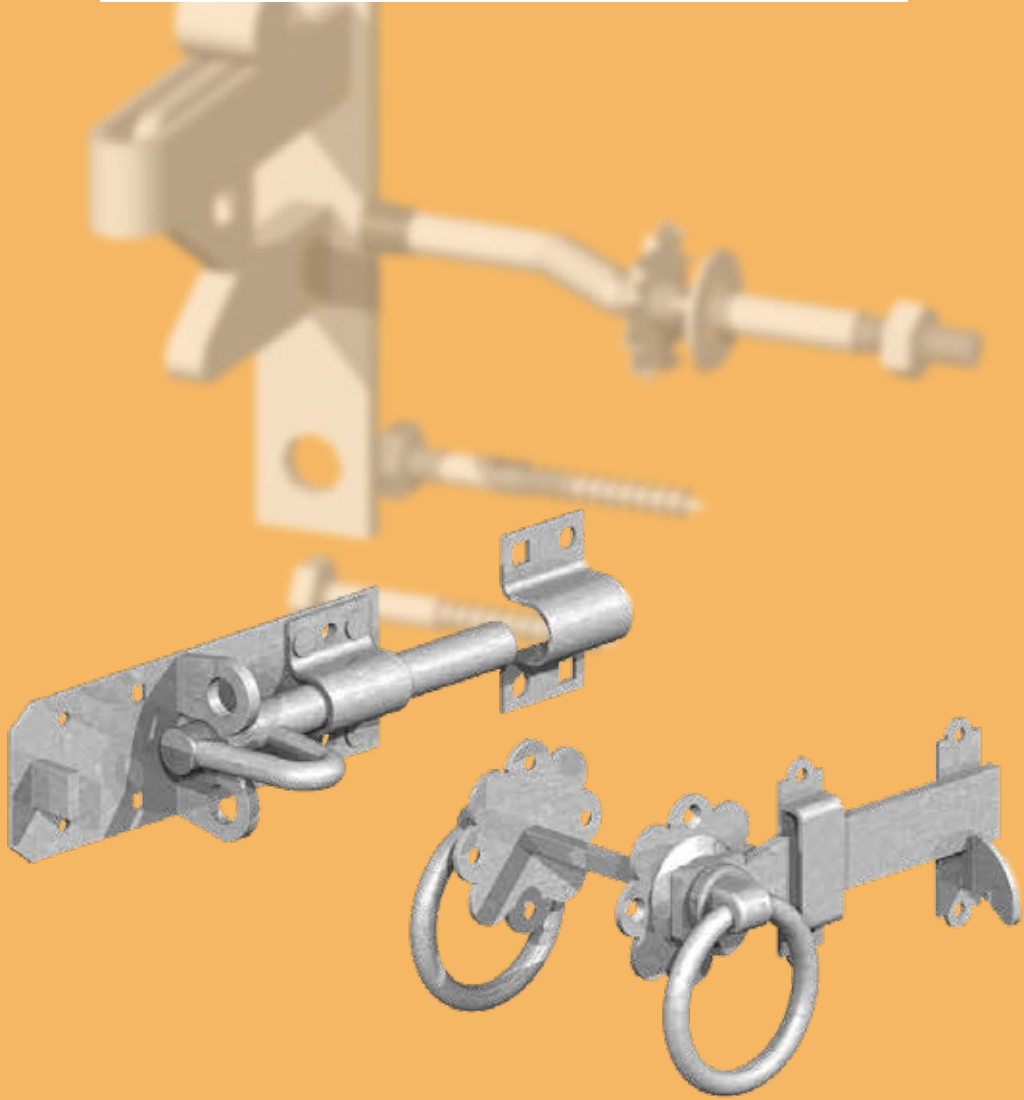

High quality Horsefly glue that remains firmly adhered to the substrate even at high temperatures. Simply coat a surface and flies are immediately attracted and stuck fast. No insecticide and rain resistant.

CODE DESCRIPTION

AGRIMAT

Premium solid rubber interlocking system manufactured in Canada. Stands on a stud to aid softness with high grip surface. Use anywhere cattle are slipping. Can be driven on when fixed with our stainless steel fixings.

4301-3001

TUDOR INTERLOCKING MAT

Very high abrasion resistant interlocking mat for the most demanding of areas. Easy clean hammer top and mats will not separate due to interlocking system.

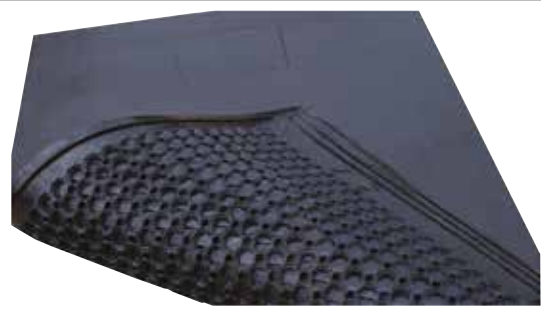

4308-1010

PITZONE

EVA foam matting designed to take pressure off the milker's feet, legs and back. Interlocking lightweight yet super tough matting tile.

4302-1007

COMFORTBED

High quality 25mm thick cubicle rubber mat. Unique honeycomb base that provides softness and stability. Suitable for floor-mounted and suspender divider systems.

4305-1807

DURALAY

Dual mattress system with a 4mm thick linen textured rubber laid over 30mm thick polyurethane foam underlay. Superb bedding choice for a lower budget.

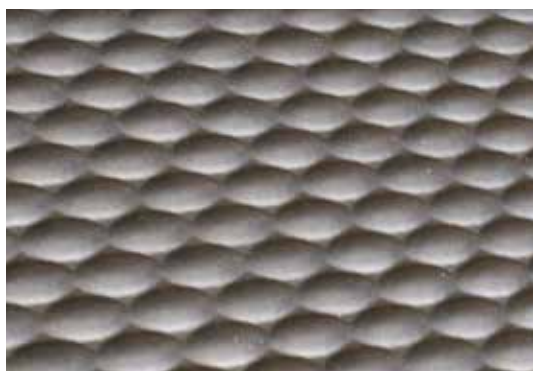

4306-1807

SOFTBED

Premium quality free stall barn matting system delivering outstanding warmth and comfort. Dual mat system renowned for its structural integrity and long life. Bevelled edge assists run-off of dirt and liquid. Top sheet has 22mm thick solid rubber at the edges with 10mm thick rubber through the centre, laid on 30mm polyurethane foam. Exceptional comfort and strength.

4300-1807

RUBBERLITE

20mm thick EVA & rubber mix cow bed mat with a tear drop surface. Excellent quality.

4094-0320

STAINLESS STEEL MAT FIXING

TERMS & CONDITIONS

1. INTERPRETATION

1.1

Definitions. In these Conditions, the following definitions apply:

Business Day a day [other than a Saturday, Sunday or public holiday] when banks in London are open for business.

Conditions the terms and conditions set out in this document as amended from time to time in accordance with clause 11.6.

Contract the contract between the Supplier and the Customer for the sale and purchase of the Goods in accordance with these Conditions.

Customer Force Majeure Event Goods Order the person or firm who purchases the Goods from the Supplier. has the meaning given in clause 10. the goods (or any part of them) set out in the Order. the order for the Goods, as set out in the Customer's written acceptance of the Supplier's quotation, or overleaf, as the case may be.

Specification any specification for the Goods, including any related plans and drawings, that is agreed in writing by the Customer and the Supplier.

Supplier **Eartswood Supplies Limited** (registered in England and Wales with company number 8816584).

1.2 **Construction.** In these Conditions, the following rules apply:

- A person includes a natural person, corporate or unincorporated body (whether or not having separate legal personality).
- A reference to a party includes its personal representatives, successors or permitted assigns.
- A reference to a statute or statutory provision is a reference to such statute or provision as amended or re-enacted. A reference to a statute or statutory provision includes any subordinate legislation made under that statute or statutory provision, as amended or re-enacted.
- Any phrase introduced by the terms **including, include, in particular** or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.
- A reference to **writing** or **written** includes faxes and e-mails.

2. BASIS OF CONTRACT

2.1 These Conditions apply to the Contract to the exclusion of any other terms that the Customer seeks to impose or incorporate, or which are implied by trade, custom, practice or course of dealing.

2.2 The Order constitutes an offer by the Customer to purchase the Goods in accordance with these Conditions. The Customer is responsible for ensuring that the terms of the Order and any applicable Specification are complete and accurate.

2.3 The Order shall only be deemed to be accepted when the Supplier issues a written acceptance of the Order or commences performance of the Contract by delivering the Goods at which point the Contract shall come into existence.

2.4 The Contract constitutes the entire agreement between the parties. The Customer acknowledges that it has not relied on any statement, promise, representation, assurance or warranty made or given by or on behalf of the Supplier which is not set out in the Contract.

2.5 Any samples, drawings, descriptive matter, or advertising produced by the Supplier and any descriptions or illustrations contained in the Supplier's catalogues or brochures are produced for the sole purpose of giving an approximate idea of the Goods described in them. They shall not form part of the Contract or have any contractual force.

2.6 A quotation for the Goods given by the Supplier shall not constitute an offer. A quotation shall only be valid for a period of 30 Business Days from its date of issue.

3. GOODS

3.1 The Goods are described in the Supplier's catalogue as modified by any applicable Specification.

3.2 To the extent that the Goods are to be manufactured in accordance with a Specification supplied by the Customer, the Customer shall indemnify the Supplier against all liabilities, costs, expenses, damages and losses (including any direct, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal and other professional costs and expenses) suffered or incurred by the Supplier in connection with any claim made against the Supplier for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with the Supplier's use of the Specification. This clause 3.2 shall survive termination of the Contract.

3.3 The Supplier reserves the right to amend the specification of the Goods if required by any applicable statutory or regulatory requirements.

4. DELIVERY

4.1 The Supplier shall ensure that:

- each delivery of the Goods is accompanied by a delivery note which shows the date of the Order, all relevant Customer and Supplier reference numbers, the type and quantity of the Goods (including the code number of the Goods, where applicable), special storage instructions (if any) and, if the Order is being delivered by instalments, the outstanding balance of Goods remaining to be delivered; and
- if the Supplier requires the Customer to return any packaging materials to the Supplier, that fact is clearly stated on the delivery note. The Customer shall make any such packaging materials available for collection at such times as the Supplier shall reasonably request.

Returns of packaging materials shall be at the Supplier's expense.

4.2 The Supplier shall deliver the Goods to the location set out in the Order or such other location as the parties may agree (Delivery Location) at any time after the Supplier notifies the Customer that the Goods are ready.

4.3 Delivery of the Goods shall be completed on the Goods' arrival at the Delivery Location.

4.4 Any dates quoted for delivery are approximate only, and the time of delivery is not of the essence. The Supplier shall not be liable for any delay in delivery of the Goods that is caused by a Force Majeure Event or the Customer's failure to provide the Supplier with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.

4.5 If the Supplier fails to deliver the Goods, its liability shall be limited to the costs and expenses incurred by the Customer in obtaining replacement goods of similar description and quality in the cheapest market available, less the price of the Goods. The Supplier shall have no liability for any failure to deliver the Goods to the extent that such failure is caused by a Force Majeure Event or the Customer's failure to provide the Supplier with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.

4.6 If the Customer fails to take delivery of the Goods within three Business Days of the Supplier notifying the Customer that the Goods

are ready, then, except where such failure or delay is caused by a Force Majeure Event or the Supplier's failure to comply with its obligations under the Contract:

- delivery of the Goods shall be deemed to have been completed at 9.00 am on the third Business Day after the day on which the Supplier notified the Customer that the Goods were ready; and
 - the Supplier shall store the Goods until delivery takes place, and charge the Customer for all related costs and expenses (including insurance).
- 4.7 If 10 Business Days after the day on which the Supplier notified the Customer that the Goods were ready for delivery the Customer has not accepted delivery of them, the Supplier may resell or otherwise dispose of part or all of the Goods and, after deducting reasonable storage and selling costs, account to the Customer for any excess over the price of the Goods or charge the Customer for any shortfall below the price of the Goods.
- 4.8 The Customer shall not be entitled to reject the Goods if the Supplier delivers up to and including 5% more or less than the quantity of Goods ordered.
- 4.9 The Supplier may deliver the Goods by instalments, which shall be invoiced and paid for separately. Each instalment shall constitute a separate Contract. Any delay in delivery or defect in an instalment shall not entitle the Customer to cancel any other instalment.

5. QUALITY

5.1 The Supplier warrants that on delivery the Goods shall:

(a) conform in all material respects with their description and any applicable Specification; and

(b) be free from material defects in design, material and workmanship.

5.2 Subject to clause 5.3, if:

- the Customer gives notice in writing to the Supplier within a reasonable time of discovery that some or all of the Goods do not comply with the warranty set out in clause 5.1;
- the Supplier is given a reasonable opportunity of examining such Goods;
- the Customer (if asked to do so by the Supplier) returns such Goods to the Supplier's place of business at the Customer's cost;
- the Supplier in its reasonable opinion having examined such Goods finds that such Goods do not comply with the warranty set out in clause 5.1, the Supplier shall, at its option, repair or replace the defective Goods, or refund the price of the defective Goods in full.

5.3 The Supplier shall not be liable for Goods' failure to comply with the warranty set out in clause 5.1 in any of the following events:

- the Customer makes any further use of such Goods after giving notice in accordance with clause 5.2;
- the defect arises because the Customer failed to follow the Supplier's oral or written instructions as to the storage, commissioning, installation, use and maintenance of the Goods or (if there are none) good trade practice regarding the same;
- the defect arises as a result of the Supplier following any drawing, design or Specification supplied by the Customer;
- the Customer alters or repairs such Goods without the written consent of the Supplier;
- the defect arises as a result of fair wear and tear, wilful damage, negligence, or abnormal storage or working conditions; or
- the Goods differ from their description as a result of changes made to ensure they comply with applicable statutory or regulatory requirements.

5.4 Except as provided in this clause 5, the Supplier shall have no liability to the Customer in respect of the Goods' failure to comply with the warranty set out in clause 5.1.

5.5 The terms implied by sections 13 to 15 of the Sale of Goods Act 1979 are, to the fullest extent permitted by law, excluded from the Contract.

5.6 These Conditions shall apply to any repaired or replacement Goods supplied by the Supplier.

6. TITLE AND RISK

6.1 The risk in the Goods shall pass to the Customer on completion of delivery.

6.2 Title to the Goods shall not pass to the Customer until the earlier of:

- the Supplier receives payment in full (in cash or cleared funds) for the Goods and any other goods that the Supplier has supplied to the Customer in respect of which payment has become due, in which case title to the Goods shall pass at the time of payment of all such sums; and
- the Customer resells the Goods, in which case title to the Goods shall pass to the Customer at the time specified in clause 6.4.

6.3 Until title to the Goods has passed to the Customer, the Customer shall:

- store the Goods separately from all other goods held by the Customer so that they remain readily identifiable as the Supplier's property;
- not remove, deface or obscure any identifying mark or packaging on or relating to the Goods;
- maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;
- notify the Supplier immediately if it becomes subject to any of the events listed in clause 8.2; and
- give the Supplier such information relating to the Goods as the Supplier may require from time to time.

6.4 Subject to clause 6.4, the Customer may resell or use the Goods in the ordinary course of its business (but not otherwise) before the Supplier receives payment for the Goods. However, if the Customer resells the Goods before that time:

- it does so as principal and not as the Suppliers' agent; and
- title to the Goods shall pass from the Supplier to the Customer immediately before the time at which resale by the Customer occurs.

6.5 If before title to the Goods passes to the Customer the Customer becomes subject to any of the events listed in clause 8.2, then, without limiting any other right or remedy the Supplier may have:

- the Customer's right to resell the Goods or use them in the ordinary course of its business ceases immediately; and
- the Supplier may at any time:
 - require the Customer to deliver up all Goods in its possession which have not been resold, or irrevocably incorporated into another product; and
 - if the Customer fails to do so promptly, enter any premises of the Customer or of any third party where the Goods are stored in order to recover them.

TERMS & CONDITIONS

7. PRICE and PAYMENT

- 7.1 The price of the Goods shall be the price set out in the Order, or, if no price is quoted, the price set out in the Supplier's published price list in force as at the date of delivery.
- 7.2 The Supplier may, by giving notice to the Customer at any time before delivery, increase the price of the Goods to reflect any increase in the cost of the Goods that is due to:
- any factor beyond the Supplier's control (including foreign exchange fluctuations, increases in taxes and duties, and increases in labour, materials and other manufacturing costs);
 - any request by the Customer to change the delivery date(s), quantities or types of Goods ordered, or the Specification; or
 - any delay caused by any instructions of the Customer or failure of the Customer to give the Supplier adequate or accurate information or instructions.
- 7.3 The price of the Goods is exclusive of the costs and charges of packaging, insurance and transport of the Goods, which shall be invoiced to the Customer.
- 7.4 The price of the Goods is exclusive of amounts in respect of value added tax (VAT). The Customer shall, on receipt of a valid VAT invoice from the Supplier, pay to the Supplier such additional amounts in respect of VAT as are chargeable on the supply of the Goods.
- 7.5 Unless otherwise agreed in writing by the Supplier (in which case clause 7.6 shall apply), payment for the Goods must be made in advance of delivery to the bank account nominated in writing by the Supplier.
- 7.6 Where the Supplier agrees to provide the Customer with extended payment terms, it shall do in writing and the Customer shall pay the invoice in full and in cleared funds by the end of the month following the date of the invoice. Payment shall be made to the bank account nominated in writing by the Supplier. Time of payment is of the essence.
- 7.7 If the Customer fails to make any payment due to the Supplier under the Contract by the due date for payment, then the Customer shall pay interest on the overdue amount at the rate of 4% per annum above Barclay Bank plc's base rate from time to time. Such interest shall accrue on a daily basis from the due date until actual payment of the overdue amount, whether before or after judgment. The Customer shall pay the interest together with the overdue amount.
- 7.8 The Customer shall pay all amounts due under the Contract in full without set-off, counterclaim, deduction or withholding (except for any deduction or withholding required by law). The Supplier may at any time, without limiting any other rights or remedies it may have, set off any amount owing to it by the Customer against any amount payable by the Supplier to the Customer.

8. TERMINATION and SUSPENSION

- 8.1 If the Customer becomes subject to any of the events listed in clause 8.2, the Supplier may terminate the Contract with immediate effect by giving written notice to the Customer.
- 8.2 For the purposes of clause 8.1, the relevant events are:
- the Customer suspends, or threatens to suspend, payment of its debts, or is unable to pay its debts as they fall due or admits inability to pay its debts, or (being a company or limited liability partnership) is deemed unable to pay its debts within the meaning of section 123 of the Insolvency Act 1986, or (being an individual) is deemed either unable to pay its debts or as having no reasonable prospect of so doing, in either case, within the meaning of section 268 of the Insolvency Act 1986, or (being a partnership) has any partner to whom any of the foregoing apply;
 - the Customer commences negotiations with all or any class of its creditors with a view to rescheduling any of its debts, or makes a proposal for or enters into any compromise or arrangement with its creditors other than (where the Customer is a company) where these events take place for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;
 - (being a company) a petition is filed, a notice is given, a resolution is passed, or an order is made, for or in connection with the winding up of the Customer, other than for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;
 - (being a company) an application is made to court, or an order is made, for the appointment of an administrator or if a notice of intention to appoint an administrator is given or if an administrator is appointed over the Customer;
 - (being a company) the holder of a qualifying floating charge over the Customer's assets has become entitled to appoint or has appointed an administrative receiver;
 - a person becomes entitled to appoint a receiver over the Customer's assets or a receiver is appointed over the Customer's assets;
 - (being an individual) the Customer is the subject of a bankruptcy petition or order;
 - a creditor or encumbrancer of the Customer attaches or takes possession of, or a distress, execution, sequestration or other such process is levied or enforced or sued against, the whole or any part of its assets and such attachment or process is not discharged within 14 days;
 - any event occurs, or proceeding is taken, with respect to the Customer in any jurisdiction to which it is subject that has an effect equivalent or similar to any of the events mentioned in clause 8.2(a) to clause 8.2(i) (inclusive);
 - the Customer suspends, threatens to suspend, ceases or threatens to cease to carry on all or a substantial part of its business;
 - the Customer's financial position deteriorates to such an extent that in the Supplier's opinion the Customer's capability to adequately fulfil its obligations under the Contract has been placed in jeopardy; and
 - (being an individual) the Customer dies or, by reason of illness or incapacity (whether mental or physical), is incapable of managing his or her own affairs or becomes a patient under any mental health legislation.
- 8.3 Without limiting its other rights or remedies, the Supplier may suspend provision of the Goods under the Contract or any other contract between the Customer and the Supplier if the Customer becomes subject to any of the events listed in clause 8.2(a) to clause 8.2(i), or the Supplier reasonably believes that the Customer is about to become subject to any of them, or if the Customer fails to pay any amount due under this Contract on the due date for payment.
- 8.4 On termination of the Contract for any reason the Customer shall immediately pay to the Supplier all of the Supplier's outstanding unpaid invoices and interest.
- 8.5 Termination of the Contract, however arising, shall not affect any of the parties' rights, remedies, obligations and liabilities that have accrued

- as at termination.
8.6 Clauses which expressly or by implication survive termination of the Contract shall continue in full force and effect.

9. LIMITATION OF LIABILITY

- 9.1 Nothing in these Conditions shall limit or exclude the Supplier's liability for:
- death or personal injury caused by its negligence, or the negligence of its employees, agents or subcontractors (as applicable);
 - fraud or fraudulent misrepresentation;
 - breach of the terms implied by section 12 of the Sale of Goods Act 1979; or
 - defective products under the Consumer Protection Act 1987.
- 9.2 Subject to clause 9.1:
- the Supplier shall under no circumstances whatever be liable to the Customer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit, or any indirect or consequential loss arising under or in connection with the Contract; and
 - the Supplier's total liability to the Customer in respect of all other losses arising under or in connection with the Contract, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstance exceed the price of the Goods.
10. **FORCE MAJEURE**
Neither party shall be liable for any failure or delay in performing its obligations under the Contract to the extent that such failure or delay is caused by a Force Majeure Event. A Force Majeure Event means any event beyond a party's reasonable control, which by its nature could not have been foreseen, or, if it could have been foreseen, was unavoidable, including strikes, lock-outs or other industrial disputes (whether involving its own workforce or a third party's), failure of energy sources or transport network, acts of God, war, terrorism, riot, civil commotion, interference by civil or military authorities, national or international calamity, armed conflict, malicious damage, breakdown of plant or machinery, nuclear, chemical or biological contamination, sonic boom, explosions, collapse of building structures, fires, floods, storms, earthquakes, loss at sea, epidemics or similar events, natural disasters or extreme adverse weather conditions, or default of suppliers or subcontractors.

11. GENERAL

- 11.1 **Assignment and other dealings.**
- The Supplier may at any time assign, transfer, mortgage, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract.
 - The Customer may not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any or all of its rights or obligations under the Contract without the prior written consent of the Supplier.
- 11.2 **Notices.**
- Any notice or other communication given to a party under or in connection with the Contract shall be in writing, addressed to that party at its registered office (if it is a company) or its principal place of business (in any other case) or such other address as that party may have specified to the other party in writing in accordance with this clause, and shall be delivered personally, sent by pre-paid first class post or other next working day delivery service, commercial courier, fax or e-mail.
 - A notice or other communication shall be deemed to have been received: if delivered personally, when left at the address referred to in clause 11.2(a); if sent by pre-paid first class post or other next working day delivery service, at 9.00 am on the second Business Day after posting; if delivered by commercial courier, on the date and at the time that the courier's delivery receipt is signed; or, if sent by fax or e-mail, one Business Day after transmission.
 - The provisions of this clause shall not apply to the service of any proceedings or other documents in any legal action.
- 11.3 **Severance.**
- If any provision or part-provision of the Contract is or becomes invalid, illegal or unenforceable, it shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision or part-provision shall be deemed deleted. Any modification to or deletion of a provision or part-provision under this clause shall not affect the validity and enforceability of the rest of the Contract.
 - If any provision or part-provision of this Contract is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable, and, to the greatest extent possible, achieves the intended commercial result of the original provision.
- 11.4 **Waiver.**
A waiver of any right or remedy under the Contract or law is only effective if given in writing and shall not be deemed a waiver of any subsequent breach or default. No failure or delay by a party to exercise any right or remedy provided under the Contract or by law shall constitute a waiver of that or any other right or remedy, nor shall it prevent or restrict the further exercise of that or any other right or remedy. No single or partial exercise of such right or remedy shall prevent or restrict the further exercise of that or any other right or remedy.
- 11.5 **Third party rights.**
A person who is not a party to the Contract shall not have any rights to enforce its terms.
- 11.6 **Variation.**
Except as set out in these Conditions, no variation of the Contract, including the introduction of any additional terms and conditions, shall be effective unless it is in writing and signed by the Supplier.
- 11.7 **Governing law.**
The Contract, and any dispute or claim arising out of or in connection with it or its subject matter or formation (including non-contractual disputes or claims), shall be governed by, and construed in accordance with the law of England and Wales.
- 11.8 **Jurisdiction.**
Each party irrevocably agrees that the courts of England and Wales shall have exclusive jurisdiction to settle any dispute or claim arising out of or in connection with this Contract or its subject matter or formation (including non-contractual disputes or claims).
