HPE Alletra 6000

Experience the Power of Predictive

Is your enterprise class storage holding you back because you are tied down administering, tuning, and supporting infrastructure? Are you looking to shift to a cloud everywhere experience with the same agility, simplicity, and cloud consumption for every application?

HPE Alletra powers your data from edge-to-core with the cloud experience for all your apps. For business-critical workloads, HPE Alletra 6000 delivers fast, consistent performance and industry leading data efficiency. It enables IT to shift from owning and maintaining data infrastructure to simply accessing and utilizing it on-demand, as-a-service. Eliminate performance and efficiency trade-offs with no knobs or configurations to adjust and always-on data services. Get resilient storage with intelligence and a no single point of failure platform that together deliver 6-nines availability guaranteed. Deliver on recovery SLAs with fast, integrated app aware backup and recovery—on-premises and in the cloud.

What's new

- Eliminate complexity by unifying infrastructure management silos under a cloud managed single pane of glass - accessible from anywhere and from any device.
- Developed from the foundation of HPE Nimble Storage architecture, proven to deliver speed, efficient, and resiliency with cloud agility.
- Delivers up to 3X faster performance than previous HPE Nimble Storage All Flash Arrays.
- Designed for high availability requirements with 6-nines availability guaranteed as a standard benefit without requiring a special contract.
- HPE Store More Guarantee¹ delivers more effective capacity per terabyte of raw flash than competitive all-flash arrays.
- Eliminate forklift upgrades, non-disruptive controller upgrades, flat support pricing, and flexible consumption options.

Overview

HPE Alletra 6000 array
(Base array, 4U; 24 bays with NVMe SSDs)

Standard Features

AI-driven

- Predict and prevent disruptions across storage, services, and virtual machines, resulting in savings of over 1.5 million hours of lost productivity due to downtime.
 - Redefine support experience with predictive support automation that delivers an unprecedented support experience with automated L1 and L2 and direct access to the resources you need.
 - Pinpoint issues between storage and VMs and underutilized virtual resources without effort.
 - Take the guesswork out of managing data infrastructure with AI-driven recommendations that improves performance, drives higher availability, and optimizes resource utilization and planning.
-

Built for Cloud

- Setup in minutes because systems are automatically discovered, on-boarded, and configured.
 - Say goodbye to time-consuming, LUN-centric provisioning with AI-driven, intent based provisioning of application workloads on infrastructure best suited for optimizing SLAs.
 - Experience faster access to innovation with no disruptions because new features and enhancements are instantly available through self-service upgrades.
 - Manage from anywhere with simple global management driven through a SaaS-based user experience.
-

As-a-Service

- Consume data infrastructure as a service via HPE GreenLake, eliminating up front capital costs with a pay-per-use model.
 - Shift from owning and maintaining data infrastructure to simple accessing and utilizing it on-demand.
 - Free up your cash flow and increase financial agility with the right mix of subscription and consumption-based services.
-

Absolute Resiliency

- 99.9999% (6-nines) guaranteed availability
 - Triple+ Parity RAID tolerates 3 simultaneous drive failures plus additional protection through intra-drive parity.
 - App-granular, FIPS-certified encryption provides data at rest and over-the-wire protection. Secure data shredding is built in.
 - Native application-consistent snapshots and replication plus integration with leading backup software.
 - Redundant, hot-swap components including controllers, power supplies, SSDs, and IO cards.
-

HPE Data Services

HPE Alletra 6000 arrays include a subscription to HPE Data Ops Manager for cloud-based management of the array from the HPE Data Services. The subscription is included in the quote when support is selected and has the same duration as support. For more information, please refer to the HPE Data Services QuickSpecs:

Notes:

– Specifications are subject to change without notice.

- o ¹ Scale-out configuration consists of up to four (4) HPE Alletra 6000 and/or Nimble Storage arrays; mixed models and generations supported; specifications listed above are for 4x 6090 arrays, each with two all-flash shelves.
- o ² Raw, usable, and effective capacities are shown in TB (10¹² bytes). Usable and effective capacities take into account space used for parity, spares, and system overhead.
- o ³ Effective capacity is the capacity of the base array and maximum number of expansion shelves. Assumes data reduction of five to one (5:1) from deduplication and compression.
- o ⁴ Each array controller has 4 x 1GbaseT ports built in. Optional ports are 10GbaseT, 10GbE SFP+, 25GbE SFP28, 100GbE QSFP28, and 32Gb (16Gb) FC.
- o ⁵ The Total Max Raw Capacity per system is limited by the architecture of the system and is not to be exceeded, even if it may be possible to configure a system that exceeds this limit.
- o ⁶ Array port counts shown include both controllers.
- o ⁷ Future support planned
- o ⁸ Usable capacity has changed from previous generation arrays to allow larger core dumps to be processed on the Alletra 6000. Reference NiniaSTARS for detailed usable capacity.

Service and Support

Warranty

HPE Alletra 6000 arrays come with the following warranties:

- 1-year; parts-only warranty for hardware components, including SSDs
- 90 day, software updates for defects

Additionally, HPE Alletra 6000 will provide phone support for replacing a defective part. Additional support coverage is required for HPE Alletra 6000 arrays.

Notes:

– For hardware warranty claims, defective part must be received before replacement parts are shipped.

– Warranty is provided by HPE Alletra 6000.

Service and Support

Support is required for all HPE Alletra 6000 arrays. Support SKUs provide up to five years of 24x7 telephone and email support for the arrays and hardware components (Including SSDs reaching the write wear limit) with a choice of Next Business Day (NBD) parts exchange, Next Business Day (NBD) onsite support, 4-hour parts exchange, or 4-hour onsite support, access to the HPE InfoSight predictive analytics platform and software updates.

HPE Pointnext **Tech Care** is the new operational service experience for HPE products. Tech Care goes beyond traditional support by providing access to product specific experts, an AI driven digital experience, and general technical guidance to not only reduce risk but constantly search for ways to do things better. HPE Pointnext Tech Care has been reimaged from the ground up to support a customer-centric, AI-driven, and digitally enabled customer experience to move your business forward.

Notes: Support contract is mandatory for all HPE Alletra 6000 products.

Data Services Support with HPE Alletra 6000

A valid subscription enables the following enterprise-level support:

- 24x7 telephone and email support for all entitled services available through HPE Data Services
 - Direct connection to expert-level support within minutes
 - Guidance through troubleshooting and configuration of available service and interoperability within your cloud and/or on-premises environment.
-

Installation Services

Installation Services are intended to guide you from start to finish and to help make your installation a success. Our engagement includes:

- Inventory and verify HPE Alletra 6000 equipment against the sales order
- Physically rack and cable all HPE Alletra 6000 equipment, including connecting network cables provided by the customer
- Conduct power-on tests and verify operation
- Add the array to an existing HPE Alletra 6000 or HPE Nimble Storage Group, if applicable
- Configure array's basic management, monitoring, & reporting capabilities
- Configure array for additional data networks / SAN connectivity as needed
- Upgrade the array to the latest recommended HPE Alletra 6000 or HPE Nimble OS version as needed

HPE Tier 1 Storage Array Startup service - HA114A1#5MR

Provides full hardware and software installation of a new HPE Tier 1 Storage array in a data center with up to six (6) shelves. Quote this service when you want onsite and remote assistance in setting up a new array from hardware racking through setting up vvolts on servers in the configuration. This service may not be quoted as

Service and Support

part of a Greenfield or Brownfield dHCI storage configuration.

HPE Tier 1 Storage Array Hardware Installation service - HA113A1#5MR

Provides on-site hardware installation only of a new HPE Tier 1 Storage array in a data center with up to six (6) shelves. This service should be quoted for customers who want assistance with the heavy lifting and hardware racking, but prefer to perform the software configuration work on their own. This service may not be quoted as part of a Greenfield or Brownfield dHCI storage configuration.

HPE Tier 1 Storage Upgrade service – HA124A1#5MS

On-site installation of upgrades kits or for an existing HPE Tier 1 Storage array. This service is for in-family upgrades only and cannot be quoted to upgrade an existing array to the next generation of storage. This service can be used to upgrade components within an existing Greenfield or Brownfield dHCI storage configuration.

HPE Tier 1 Storage Cross Family Offline Upgrade service – HA124A1#V0R

Provides the on-site hardware upgrade and disk migration from your existing array to the new family array chassis. This service is completed with the array powered off during a downtime window.

Notes: All Installation and upgrade services are optional for all HPE Alletra 6000 products.

Additional Services Available

Get the most from your HPE products. Get the expertise you need at every step of your IT journey with **HPE Pointnext Services**. We help you lower your risks and overall costs using automation and methodologies that have been tested and refined by HPE experts through thousands of deployments globally. HPE Pointnext **Advisory Services**, focus on your business outcomes and goals, partnering with you to design your transformation and build a roadmap tuned to your unique challenges. Our **Professional** and **Operational Services** can be leveraged to speed up time-to-production, boost performance and accelerate your business. HPE Pointnext specializes in flawless and on-time implementation, on-budget execution, and creative configurations that get the most out of software and hardware alike.

Consume IT on your terms

HPE GreenLake brings the cloud experience directly to your apps and data wherever they are—the edge, colocations, or your data center. It delivers cloud services for on-premises IT infrastructure specifically tailored to your most demanding workloads. With a pay-per-use, scalable, point-and-click self-service experience that is managed for you, HPE GreenLake accelerates digital transformation in a distributed, edge-to-cloud world.

- Get faster time to market
- Save on TCO, align costs to business
- Scale quickly, meet unpredictable demand
- Simplify IT operations across your data centers and clouds

HPE Datacenter Care

Helps customers address the pressing needs of IT today and smoothly transform to a more agile cloud-like IT operations model. We help run and monitor your IT by offloading the day to day routine tasks, helping customers be more predictive and proactive, and saving time with one place to call with for all of their IT.

Partner with an assigned account team backed by local and global experts, access HPE enhanced call experience with priority access, use specialized support for complex, technologies, choose hardware and software support for your devices, implement proactive monitoring to stay ahead of issues, and access HPE IT best practices and IP. HPE Datacenter Care advantage options are available to add to your agreement to give you specialized expertise for performance, security, back up analysis, and much more. Datacenter Care is available as both tailored statement of work and as a packaged service for 3, 4, and 5-year terms.

HPE Tier 1 Storage Peer Persistence Setup Service - HA124A1#V0S

Provides remote implementation of the Peer Persistence software functionality available in the HPE Alletra 6000/Nimble Storage operating system (OS). This service provides analysis, implementation, and testing

Parts and Materials

Hewlett Packard Enterprise will provide HPE-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product QuickSpecs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction.

Configuration Information

Step 1 – Choose Base configuration

All HPE Alletra 6000 come in a 4U form-factor chassis with

- (2) controllers with processors, memory, fans and NVDIMM, and
- (8) 1GBase-T network ports, i.e. (4) per controller for iSCSI or management traffic, and
- All-inclusive software including HPE InfoSight predictive analytics

Additional host connectivity per controller is indicated in the product descriptions below.

Flash capacity upgrades, network upgrades and expansion shelves will be available for integration in the field.

HPE Alletra 6000 – Base Configuration Base Array

Description	SKU
HPE Alletra 6010 Dual Controller Configure-to-order Base Array	R4U28A
HPE Alletra 6030 Dual Controller Configure-to-order Base Array	R4U29A
HPE Alletra 6050 Dual Controller Configure-to-order Base Array	R4U30A
HPE Alletra 6070 Dual Controller Configure-to-order Base Array	R4U31A
HPE Alletra 6090 Dual Controller Configure-to-order Base Array	R4U32A

Step 2 – Choose Power Supplies

All HPE Alletra 6000 require one (1) of the Power Supply Kits listed below. Each Power Supply Kit includes four (4) Power Supplies; either 800W or 1600W.

Table below shows All Flash Array compatibilities with Power Supply Kits.

6010	6030	6050	6070	6090	SKU Description	SKU

No	Yes	Yes	Yes	Yes	HPE Alletra 6000 4x 1600W FIO AC Power Supply Kit	R7G13A

Notes:

- The 800W power supplies support both low-line and high-line
- The 1600W power supplies support high-line; no low-line support
- The 1600W power supplies are recommended when there is a choice between 1600W and 800W

Step 3 – Choose Head SSD Capacity

All HPE Alletra 6000 require one or two of the following SSD capacity options.

Table below shows All Flash Array compatibilities with SSD Options.

Step 4 – Choose Head Networking Option

Up to six (6) of the following networking options can be selected. Please refer to configuration guidelines for specific support of networking options for each array. The HPE Alletra 6010 array supports up to three (3) head networking options.

Notes: The following minimum ports are recommended for best performance:

- 6010: at least 2-ports
- 6030: at least 4-ports
- 6050: at least 8-ports
- 6070: at least 8-ports
- 6090: at least 8-ports

Notes:

- Max One (1) Storage Class Memory kit (R0P46B or R0P48B) per 6050/6070/6090 array
- Max Two (2) 100GbE kits or 32Gb FC 4-port kits (R0R18A/R0R19A or R0R14A/R0R15A) per 6030/6050/6070/6090 array
- Max One (1) 100GbE kits or 32Gb FC 4-port kits (R0R18A/R0R19A or R0R14A/R0R15A) per 6010 array
- All 10GbE kits (Q8C17C and Q8C20C) and 32Gb FC kits (R0P34A and R0R14A) include transceivers
- The 10/25GbE Adapter Kit (R0R12A) and the 100GbE Adapter kit (R0R18A) do not include transceivers. If transceivers are required, they will need to be ordered separately.
- Each Head networking option includes two (2x) cards which are evenly populated in the two controllers.

Racks

HPE Alletra 6000 arrays and expansion shelves are compatible with industry standard 4-post EIA 19-inch racks with square mounting holes, including HPE 36U, 42U and 48U Enterprise Shock Racks. HPE recommends HPE racks with a depth of 1200mm as it provides ample room for cabling and ease of serviceability.

Recommended Racks:

HPE G2 Enterprise Series Racks

- HPE 48U 600mmx1200mm G2 Enterprise Rack
- HPE 48U 800mmx1200mm G2 Enterprise Rack
- HPE 42U 600mmx1200mm G2 Enterprise Rack
- HPE 42U 800mmx1200mm G2 Enterprise Rack

HPE G2 Advanced Series Racks

- HPE 48U 600mmx1200mm G2 Advanced Rack
- HPE 48U 800mmx1200mm G2 Advanced Rack
- HPE 42U 600mmx1200mm G2 Advanced Rack
- HPE 42U 800mmx1200mm G2 Advanced Rack
- HPE 36U 600mmx1200mm G2 Advanced Rack
- HPE 36U 800mmx1200mm G2 Advanced Rack

– For more information on the HPE rack offerings, please see the following URL: <https://www.hpe.com/info/rackandpower>

– For more information on PDUs, see: <http://www.hpe.com/servers/pdu>

Step 7: Required and additional power cords

HPE Alletra 6000 arrays and expansion shelves do not ship with any power cords by default and require a minimum of 4 power cords per system. Please ensure these are selected at time of quoting. Four power cords are required when connecting base arrays (C13/C14 or expansion shelves (C13/C14) to Rack-Mounted Power Distribution Units (PDU). Four country/region specific power cords are required when connecting base arrays or expansion shelves to standard office wall power outlets.

Notes:

- Max One (1) Storage Class Memory kit (R0P46B or R0P48B) per 6050/6070/6090 array
- Max Two (2) 100GbE kits or 32Gb FC 4-port kits (R0R18A/R0R19A or R0R14A/R0R15A) per 6030/6050/6070/6090 array
- Max One (1) 100GbE kits or 32Gb FC 4-port kits (R0R18A/R0R19A or R0R14A/R0R15A) per 6010 array
- All 10GbE kits (Q8C17C and Q8C20C) and 32Gb FC kits (R0P34A and R0R14A) include transceivers
- The 10/25GbE Adapter Kit (R0R12A) and the 100GbE Adapter kit (R0R18A) do not include transceivers. If transceivers are required, they will need to be ordered separately.
- Each Head networking upgrade option includes two (2x) cards which are evenly populated in the two controllers.
