(End of Instruction)

Section H - Special Contract Requirements

CLAUSES INCORPORATED BY FULL TEXT

52.0100-4042 LIABILITY (INSURANCE) (FAR 28.307-2)(DMC)(MAR 2004)

Worker's Compensation and Employer's Liability: Contractors are required to comply with applicable Federal and State workers' compensation and occupational disease statutes. If occupational diseases are not compensable under those statutes, they shall be covered under employer's liability section of the insurance policy, except when contract operations are so commingled with a Contractor's commercial operations that it would not be practical to require this coverage. Employer's liability coverage of at least \$100,000 is hereby required.

(a) General Liability: Bodily injury liability insurance coverage written on the comprehensive form of policy of at least \$500,000 per occurrence is hereby required.

(b) Automobile Liability: The Contractor shall submit proof of automobile liability insurance written on the comprehensive form of policy. The policy shall provide for bodily injury and property damage liability covering the operation of all automobiles used in connection with performing the contract. Coverage of at least \$200,000 per person and \$500,000 per occurrence for bodily injury and \$20,000 per occurrence for property damage is hereby required. The amount of liability coverage on other policies shall be commensurate with any legal requirement of the locality and sufficient to meet normal and customary claims.

The amounts of liability coverage listed above are minimum amounts only. The amount of coverage shall be commensurate with any statutory requirements of the locality and sufficient to meet any normal and customary claims.

(End of Local Instruction)

52.0100-4113 AUTHORITY (DMC) (MAR 2004)

The Contracting Officer shall be the only individual authorized to direct and/or redirect the effort or in any way amend any of the terms of this contract.

(End of Local Instruction)

52.0100-4115 DEFINITION OF APPROVALS BY GOVERNMENT (DMC)(MAR 2004)

Unless expressly stipulated elsewhere in this contract as being excepted from this clause, wherever this contract provides for submittal of policies, procedures and plans, or other items for

approval of the Contracting Officer or other authorized Government representatives, such approvals shall not be construed as a complete check as to the adequacy of the submittal, nor as an agreement that the submittal will meet the requirements of the Performance Work Statement (PWS). Such approvals are for the purpose of insuring Government knowledge of Contractor's plans and progress and will indicate only that the Contractor's general approach toward meeting contractual requirements is satisfactory. Such approvals shall in no way relieve the Contractor of the responsibility for any error or deficiency which may exist in the submitted design or other item, as the Contractor shall be responsible for meeting all the requirements of the contract PWS.

(End of Local Instruction)

52.0100-4116 AWARD FEE POOL EXCLUSIONS (DMC)(MAR 2004)

Contract Line Item Number (CLIN) 0001, 0003-0005, 0007-0009, 0011-0013, 0015-0017 and 0019-0021-are specifically excluded from the Award Fee Pool. Available award fee will not include any amount of these CLINs.

(End of Local Instruction)

52.0100-4117 AWARD FEE (DMC)(MAR 2004)

The Contractor may earn an award fee up to the estimated amount specified in Section B. Such a fee may be earned by the Contractor on the basis of his/her performance during the periods of performance and in the amount specified in the Award Fee Plan, Section J, Attachment 7.

(End of Local Instruction)

52.0100-4118 SEGREGATION OF COSTS (DMC)(MAR 2004)

The Contractor shall segregate all costs associated with each Contract Line Item Number (CLIN) of this contract from each other in a manner and format as agreed to in writing between the Contractor and the Contracting Officer.

(End of Local Instruction)

52.0300-4017 LIST OF FEDERAL HOLIDAYS (DMC)(MAR 2004)

The contractor shall provide 24 hour, seven (7) days a week service in accordance with paragraph 1.3, entitled "Hours of Operation", of the Performance Work Statement. The following is a list of holidays recognized under Federal Law:

- New Year's Day January 1st
- Martin Luther King, Jr's Birthday 3rd Monday in January
- President's Day 3rd Monday in February
- Memorial Day Last Monday in May
- Independence Day 4th of July
- Labor Day 1st Monday in September
- Columbus Day 3rd Monday in October
- Veteran's Day 11th of November
- Thanksgiving Day 4th Thursday in November
- Christmas Day 25th of December

Note: When holidays fall on Saturday or Sunday (unless otherwise designated) they are observed on Friday or Monday respectively.

CLAUSES INCORPORATED BY FULL TEXT

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days.

(End of clause)

52.217-9 OPTION TO EXTEND THE TERM OF THE CONTRACT (MAR 2000)

(a) The Government may extend the term of this contract by written notice to the Contractor within 15 days (insert the period of time within which the Contracting Officer may exercise the option); provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 60 days (60 days unless a different number of days is inserted) before the contract expires. The preliminary notice does not commit the Government to an extension.

(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed five year and six months.

(End of clause)

52.222-2 PAYMENT FOR OVERTIME PREMIUMS (JUL 1990)

(a) The use of overtime is authorized under this contract if the overtime premium cost does not exceed _____ or the overtime premium is paid for work --

(1) Necessary to cope with emergencies such as those resulting from accidents, natural disasters, breakdowns of production equipment, or occasional production bottlenecks of a sporadic nature;

(2) By indirect-labor employees such as those performing duties in connection with administration, protection,

transportation, maintenance, standby plant protection, operation of utilities, or accounting;

(3) To perform tests, industrial processes, laboratory procedures, loading or unloading of transportation conveyances, and operations in flight or afloat that are continuous in nature and cannot reasonably be interrupted or completed otherwise; or

(4) That will result in lower overall costs to the Government.

(b) Any request for estimated overtime premiums that exceeds the amount specified above shall include all estimated overtime for contract completion and shall--

(1) Identify the work unit; e.g., department or section in which the requested overtime will be used, together with present workload, staffing, and other data of the affected unit sufficient to permit the Contracting Officer to evaluate the necessity for the overtime;

(2) Demonstrate the effect that denial of the request will have on the contract delivery or performance schedule;

(3) Identify the extent to which approval of overtime would affect the performance or payments in connection with other Government contracts, together with identification of each affected contract; and

(4) Provide reasons why the required work cannot be performed by using multishift operations or by employing additional personnel.

(End of clause)

52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)

In compliance with the Service Contract Act of 1965, as amended, and the regulations of the Secretary of Labor (29 CFR Part 4), this clause identifies the classes of service employees expected to be employed under the contract and states the wages and fringe benefits payable to each if they were employed by the contracting agency subject to the provisions of 5 U.S.C. 5341 or 5332.

THIS STATEMENT IS FOR INFORMATION ONLY: IT IS NOT A WAGE DETERMINATION
Employee Class Monetary Wage-Fringe Benefits

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

<http://www.arnet.gov/far>; <http://farsite.hill.af.mil>;

(End of clause)

52.252-6 AUTHORIZED DEVIATIONS IN CLAUSES (APR 1984)

(a) The use in this solicitation or contract of any Federal Acquisition Regulation (48 CFR Chapter 1) clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the date of the clause.

(b) The use in this solicitation or contract of any FAR/DFARS clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the name of the regulation.

(End of clause)

52.0300-4217 EXTENSION OF SERVICES APPLICABLE TO CPAF (DMC)(APR 2004)

The contract includes FAR Clause 52.217-8 - Option to Extend Services. Typically, the contractor is extended at the current contract price that is usually expressed in terms of a monthly price. The only equitable adjustment allowed is an increase due to a wage adjustment. Since this is a CPAF (Cost Plus Award Fee) contract, the overall contract price is expressed as a contract ceiling. If the Government exercises an option using contract clause 52.217-8, the amount for the option will be determined by prorating the current contract ceiling by the number of months the contract is extended. The same rationale will be used for the "Award Fee" portion of the CLIN. **FOR INFORMATION PURPOSES:** The contract will be extended by quarters (three month period) in order to align with the "Award Fee Plan" included in the contract.

Attachment 1
Government Furnished Property
(Facilities Support)

1. The Government will provide the following facilities support:
 - a. Approximately 878 square feet of administrative office space.
 - b. Approximately 1358 square feet of technical work area.
 - c. Approximately 2613 square feet of securable storage area.
 - d. Approximately 450 square feet of warehouse storage area.
 - e. Access to shipping and receiving dock.
 - f. Customary support services such as custodial, rest room facilities, access to the lunchroom, etc.
 - g. Building keys.
 - h. Identification badges.
 - i. Access to parking areas.
 - j. Telephone service.
 - k. Use of a forklift, scissors lift, and boom lift as required.

1.0 GENERAL.

1.1 DMC, NMC-DTS, AND DVIC MISSION STATEMENTS.

1.1.1 DMC MISSION STATEMENT. The mission of the DMC is to present, broadcast, and distribute media to support the OSD internal communications mission. This radio and television programming is for the exclusive use of American Forces Radio and Television Service (AFRTS) outlets serving Department of Defense (DoD) personnel and their families overseas and must provide a free flow of news and information without censorship, propagandizing, or manipulation. DMC further supports the DoD internal information themes through insertion of spot and public service announcements in AFRTS programming.

1.1.2 NMC-DTS MISSION STATEMENT. The mission of the Navy Media Center's Direct-to-Sailor (NMC-DTS) program at DMC is to accept television program streams from DMC and insert Navy unique program, spot, and interstitial material for delivery via satellite to United States Navy ships-at-sea. Additionally, radio program and data information is transmitted within the same satellite broadcast stream originating at DMC. These programs and data services are for the exclusive use of United States Navy vessels, AFRTS outlets serving Department of Defense (DoD) personnel and their family's stationed overseas, and designated AFRTS recipients.

1.1.3 DVIC MISSION STATEMENT. Defense Visual Information Center (DVIC) serves as the primary official Department of Defense (DoD) records center for the storage and preservation of selected original and irreplaceable motion picture, video, still, audio, and mixed media visual information records which depict the DoD, its heritage, and its current activities. DVIC is responsible for the reception, selection, storage, preservation, retrieval, research, compilation, and duplication of significant DoD imagery in support of military operations, training, intelligence activities, historical/legal documentation, psychological operations, and public/internal information functions. The DVIC stores and maintains DoD visual information records until such time as they are either transferred to the National Archives and Records Administration (NARA) or disposed. In addition, DVIC provides visual information products and services to the public.

1.2 DMC, NMC-DTS AND DVIC OPERATIONS.

1.2.1 PROGRAMMING. The DMC staff performs a wide array of post-production functions on programming acquired from sources including U.S. commercial and public broadcast networks, independent producers, and programming distributors. Promotional spots and interstitial materials are created for inclusion into any of the ten televised program streams and fourteen radio channels. Some limited in-house production is performed for radio programming only. The majority of data information is stored and forwarded or immediately forwarded with three data channels within the aggregate transmitted bit stream. All program material and information is distributed to AFRTS outlets and authorized users through a global satellite digital network or on duplicated media supplied under duplication contracts, whichever is most appropriate. AFRTS outlets further distribute this programming to their local audiences by means of standard AM,

FM, TV, microwave, satellite, or cable TV transmission systems. In some cases, remote videotape duplication facilities use the satellite signals from DMC to duplicate programming for use within a specific geographic area or to U.S. Navy ships and other deployed forces.

1.2.2 PROGRAM CONTENT. DMC operates much like any other network broadcast center with two significant differences. First, the DMC originates little of its own programming; typically only in-house promotions are originated at the DMC. Secondly, DMC programming is totally free of commercial advertisement. Though the program material used by DMC contains commercial advertising the commercial advertising material is removed automatically before distribution and is replaced with DoD and other not-for-profit public service announcements.

1.2.3 BROADCAST MEDIA AND FORMAT. The DMC receives programming via a wide variety of media and formats including, but not limited to: IMX-2000, D-2, one inch type-C, Betacam SP, U-matic, or VHS videotapes, audio on reel-to-reel, compact disc, audio cassette, cartridge, and various other digital audio media. In addition, the DMC receives programming and data information via fiber optic, telephone, data and satellite circuits. Extensive in-house use of video and audio analog and digital equipment is used to produce, post-produce, and store programming in all of the above-mentioned formats and media types. The DMC utilizes video and audio servers to store television and radio, long format, spot, and interstitial materials. In short, the DMC is extensively committed to a wide variety of broadcast media, formats, and transmission types which are all used to provide programming to DoD personnel and their families overseas. The NMC-DTS receives media in all Sony and DVCPRO formats. The DVIC also receives media in the same variety of formats as DMC and NMC-DTS but also includes still media in photographic negative, print, slide, and digital formats. The DVIC is committed to the handling, storage, and reproduction of media for Government and commercial customers.

1.2.4 BROADCAST TRANSMISSION. The DMC employs digital compression technology to condense ten television, sixteen radio, and three data channels into one satellite broadcast stream for worldwide broadcast operations into a service called SatNet (Satellite Network). Two additional broadcast streams originating at the DMC use the same brand of compression equipment to transmit three video, three audio, and a 128Kbps data channel within each stream. These additional broadcast streams are transmitted to the Pacific Ocean Region (POR) and the Atlantic Ocean Region/Indian Ocean Region (AOR/IOR) for the U.S. Navy Direct-to-Sailor (DTS) program. The Air Force's PowerVu Pacific system does a similar re-packaging of DMC channels for their audiences.

1.2.5 AUTOMATION. System assisted switching, distribution, and routing equipment is used for control of recording (off-line), playback (on-air) for audio, television, and data signals. Automation and microprocessor based equipment are integral to the operation and control of much of the facility's equipment and systems. A central local area network (LAN) serves eight library management systems to automate the thirteen television channels. Many systems throughout the facility operate around an automation system that feeds the correct program input, provides start commands, and terminate operations as scheduled. Other computer-based systems control the recording of radio newscasts, commentaries and feature materials, and the playback of these materials at predetermined times. In radio and television operation areas operators control signal levels and de-commercialize the program material for immediate on-air re-

broadcast. Television program materials are recorded for later re-broadcast are recorded into video servers and onto Betacam SP tape. Radio program materials receive cue tones within the audio to identify commercial spot announcements. These tones are used by DMC to de-commercialize spot announcements and insert DoD or public service announcements. Some radio cue tones are retranslated into the DMC broadcast stream for affiliate use. Television program materials recorded for later playback are ingested into a broadcast automation system and their metadata is entered into a database identifying start-of-message and end-of-message of the television program segments. Post production areas use computer assisted editing equipment and audio/video (A/V) tape machines.

1.2.6 EQUIPMENT. The A/V equipment to be maintained is generally commercial, off-the-shelf, equipment. Although some of the equipment utilized has undergone modification to better support the DMC, NMC-DTS, and DVIC missions, the vast majority is maintained and aligned in accordance with manufacturer's recommendations or de facto industry standards, whichever provides for better performance. The age of most of the equipment currently in use ranges from approximately ten years to less than one year old. The Director of Engineering manages DMC equipment replacement using an equipment life-cycle replacement plan. Equipment replacement for the DVIC is managed through the DVIC Logistic Branch. NMC-DTS is responsible for life-cycle replacement of their equipment.

1.2.6.1 EQUIPMENT TECHNOLOGY. The predominate format used by DMC for on the air play out is Sony MAV-70 video servers consisting of air and protect channels with backup of selected media from tape, a Sony PetaSite tape archive using a Harris/Louth automation system and an Avalon Data Manager controlling Sony Digi-beta, Sony Betacam SP, and Sony IMX format tape decks. The server also accomplishes ingest of program material for later use from satellite and multiple tape formats, near-line storage of archive television material (Sony PetaSite tape archive). The system also controls an RF routing matrix for incoming signal reception, using an automation system to control operations. It also schedules all television channels, and track program material acquisition, rights, usage and kill dates. Collectively these automation systems are referred to as the Broadcast Automation System or "BAS". Radio currently operates a full analog radio facility by switching among audio sources: purchased or gratis programming on tape, Compact Disc (CD), etc. from producers/vendors; hard disk-recorded audio feeds; satellite; fiber; IP; and telecommunication services. It also uses a variety of playback equipment for production and support of its full-time radio formats. Radio gets these materials from a variety of sources and they are technically varied, ranging from analog to AES digital audio. Radio uses a Wegener audio tone encoder Binary Coded Digit (BCD) System to generate up to 15 unique cues for each radio channel. Radio program provider stations use cues or relay closures to control automated broadcast equipment at the DMC. The foundation of the NMC-DTS system at the DMC is the Philips Media Pool video server supported by the DVCPRO. The DVIC uses a mix of 1 inch, Betacam SP, and VHS tape machines as well as server technology.

1.2.6.2 EQUIPMENT WARRANTY. The A/V maintenance contractor will be provided existing warranty information on the broadcast automation server equipment and will track those items under warranty coverage. The Contractor will troubleshoot the system when necessary and identify the defective system component or software and interact with the warranty providers to obtain technical assistance or obtain warranty repair. The Contractor will sometimes act in the

best interest of the Government to make repairs to keep the system operational working with the warranty provider to provide service of equipment. If necessary, the Contractor will prepare for shipment and ship all equipment under warranty to the applicable vendor or manufacturer.

1.2.7 PERSONNEL RESOURCES. DMC competes with the greater Los Angeles area to attract broadcast qualified technical personnel to maintain the broadcast facility.

1.2.8 OPERATIONS. Both Radio and Television Operations departments function 24/7 every week of the year. Qualified radio voice operators broadcast sport scores and game updates from an on-air control room. In addition, radio operators record and edit news features, interstitial material, and DoD and PSA announcements for later playback in any or all of the news and entertainment radio channels. Television operators record television program material from both satellite and fiber-optic feeds. Some television program material is shipped to DMC from vendors in Betacam SP, D-2, or 1 inch tape formats. Recorded tape format programs are reviewed to identify start of message (SOM) and end of message (EOM) segments within a program in order to automatically de-commercialize and reinsert DoD and PSA information and announcements. There are thirteen television channels consisting of ten channels of programming: Atlantic, Pacific, Korea, News, Sports, Spectrum, Movies, Family, Pentagon Channel and Program guide. Atlantic and Pacific are primary channels and with some material removed from the Pacific channel the Korea channel is created. Due to the nature of the world-wide audience three of the channels, (Spectrum, Movies, and Family) are digitally delayed for two different time zones. Additionally the Spectrum channel consists of eight hours of entertainment program material repeated two additional times to complete a 24 hour day. The Pentagon channel is fed pre-produced from Washington D.C. and is not controlled by the Broadcast Automation Server (BAS) system except for input and output routing. The News and the Sports channels have a majority of the program material broadcast live from one of four manned television control rooms. The Program Guide showing an automated program schedule. The broadcast automation system executes a program channel play list and automatically inserts DoD and PSA announcements in place of commercials on all channels but the Pentagon channel. Satellite or fiber-optic fed program's are de-commercialized and immediately re-transmitted often with short turn around times. Occasionally, any or all of the entertainment channels are simulcast with live sporting events or breaking news stories.

1.2.9 TECHNOLOGIST BRANCH OPERATION. The Technologist Branch provides customer service to AFRTS, affiliates and viewers. Customer Service assist with authorizing integrated receiver decoders (IRDs) through a internet based program (pvconnect.net) linked to the DMC PowerVu system. The operation is located in room 261, which houses the PowerVu Graphical User Interface (GUI), an internet access computer, downlink monitoring and the "Watch Dog" cue verification computer. Authorization requests are delivered via telephone calls, direct contacts, and e-mail to the DMC technologist. A computer workstation is located in room 261 for e-mail request delivery and response. Customer Service reviews the customers internet information, the appropriate data, and advises the customer of any incorrect data entry. Where internet access is unavailable or limited Customer Service assist customers by making the web base entries in pvconnect.net. Data entries, format, and tiering assignments are defined in Attachment 13. E-mail "Reply" or telephone response is sent to the respective organization when an IRD/s has been authorized. In addition, requests to verify authorization of IRDs is received

from the same organizations and are handled in like manner as request for IRD authorizations with the exception of data entries. Request to remove (suspend) the authorization of an IRD is issued by the PowerVu System Administrator at DMC. Technologists are also called upon by the Contractor's technicians and engineers to assist, as needed, in troubleshooting DMC systems in urgent situations.

1.2.9.1 CUSTOMER SERVICE CALLS. Customer Service receives telephone calls from DMC affiliates and viewers via telephone for assistance to verify service. Assistance is in the form of verifying transmitted program cues, radio, television, and data transmission. Customer Service representatives use a computer and a software program, Watch Dog, located in room 261 to monitor cue returns from the domestic satellite. Additionally, visual monitors of all DMC television and audio satellite return signals are present in room 261. Problems experienced with broadcasting are referred to the contractor's engineers for restoration.

1.2.9.2 TECHNICAL SUPPORT. The Technologist Branch provides technical support to AFRTS, DMC affiliates and viewers. Technologist provide technical assistance identifying equipment requirements needed to lock onto the AFRTS satellite signal and provide support in the form of PowerVu menu set-up, see attachment 14, satellite information for obtaining the AFRTS signal, see attachment 15 and 16, and satellite antenna azimuth and elevation for their location. Software program, (presently) WinAim, located on the Technologist's computer in room 261 provides satellite antenna azimuth and elevation information for downlink sites. Additionally, technologists troubleshoot the worldwide satellite network to the uplink or downlink site experiencing technical difficulties. With feedback from monitors, affiliates, and viewers technologist contact domestic and international satellite gateways to determine reception and confidence return of the AFRTS signal from the respective domestic or international satellite. Identified problems are communicated immediately to the Government's Operation department shift supervisor – the "Air Boss", Engineering Director or representative, Affiliate Relations and affiliates and viewers, if practical, by radio, telephone, e-mail and / or other message delivery means. Technologists monitor the reduced service situation and provide regular updates until service is restored.

1.3 GENERAL SCOPE OF WORK

1.3.1 CONTRACT HOURS. This Performance Work Statement (PWS) identifies the performance requirements to provide continual, 24/7 every day of the year, Audio Video (AV) maintenance support, signal monitoring, and customer support for DMC and NMC-DTS on the premises of the DMC. Likewise, AV maintenance support for DVIC is on the premises of the DMC but performance requirements are limited to 8 hours a day, five days-a-week maintenance support. The Contractor shall provide all management, supervision, technical expertise, labor, material (except as set forth herein) and all other products or services necessary to perform the AV maintenance function of the DMC, NMC-DTS, and DVIC.

1.3.2 CONTRACT PRIMARY LOCATION. The DMC /NMC-DTS/DVIC facility is located at 1363 Z Street, Bldg. 2730, March Air Reserve Base, California 92518-2017. Currently, all DMC, NMC-DTS and DVIC equipment to be maintained is located at this facility. However,

there is also a requirement to provide maintenance support at other locations, generally within the greater Los Angeles area, in support of occasional DMC/DVIC special events.

2.0 DEFINITIONS

AFFILIATE RELATIONS. A Division within the Program Directorate of DMC who takes and responds to affiliate and viewer questions and complaints.

AFFILIATE. A component of the U.S. Army, U.S. Navy or U.S. Air Force Broadcast Service. Affiliates re-broadcast the DMC satellite signal locally or regionally after inserting regional/local command information.

AFN. The American Forces Network, the group of various radio, television, and data streams that make up the services provided for by the DMC.

AUDIO/VIDEO (AV) EQUIPMENT. DMC, NMC-DTS, and DVIC Audio/Video equipment generally falls into these two categories:

BROADCAST MAINTENANCE SCHEDULE (BMS). A schedule developed by the Contractor to show maintenance actions scheduled for specific end item equipment.

CENTRALIZED BENCH STOCK. This is the grouping of all individual repair parts into a secure, centralized location.

CONTRACT ADMINISTRATION. The performance of post-award functions related to the administration of the contract to ensure the terms and conditions of the contract are met. This includes all administrative activities (e.g., management, financial, etc.) associated with completing the tasks required.

DEE. Directorate of Engineering / Engineering Division. An e-mail address DEE within DMC.

END ITEM. This is a major piece or functional unit of equipment, for example, a video tape recorder or a compact disc player.

EQUIPMENT TO BE MAINTAINED. That Government property which is to be maintained under this contract and is peculiar to the mission of the DMC, NMC-DTS, and DVIC but is not provided as Government Furnished Equipment to the Contractor. Examples of this equipment include, but is not limited to, video and audio servers, videotape recorders, audio tape recorders, satellite receivers, satellite antennas, video and audio production and distribution equipment, film to videotape transfer equipment, and all of those items listed as GFE, AVM under the DVIC visual information support contract.

FIRST LEVEL MAINTENANCE. That maintenance performed by the Operator on a piece of equipment, whether fixed or portable. This maintenance includes cleaning, wiping, and routine operational checks of the equipment. The operator does NOT open any machines to perform any type of cleaning or wiping. The contractor would clean areas inside and behind console and equipment racks to maintain dust levels.

GOVERNMENT FURNISHED EQUIPMENT (GFE). Equipment or systems acquired directly by the Government or the Contractor using Government funds and identified to the Contractor as GFE for use in the performance of this contract. Examples include computer workstations and communications equipment.

GOVERNMENT FURNISHED INFORMATION (GFI). Attachments 2a, 2b, 2c for the DMC and NMC-DTS and attachments 5 and 6 for DVIC, which identifies the equipment to be maintained, equipment spares and spare subassemblies, and current spare parts and bench stock,

to be made available to the Contractor, will be provided by the Government. Information on items such as technical manuals, applicable DMC Operational Guidelines (OG), DVIC Standard Operating Procedures (SOP), and the DPAS database, for example, will be provided after contract award.

GOVERNMENT FURNISHED PROPERTY (GFP). The Government will provide the Contractor with the Government furnished property, including facilities, described in attachment I for use in connection with and under the terms of this contract.

HOLDING AREA. This is a secure area used to store ordered materials to support a specific work order/job order.

IRD. An Integrated Receiver Decoder whose identification is stored and authorized from the PowerVu PCC2000.

KO. The DMC Contracting Officer.

MAINTENANCE MANAGEMENT INFORMATION SYSTEM (MMIS). A LAN-based, computer system which is operated and maintained by the Contractor and contains equipment maintenance and cost, and management information and data pertinent to the DMC, NMC-DTS, and DVIC Audio/Video maintenance contract. The Government owned hardware and data that make up this system and will be provided as GFE to the Contractor.

MISSION EQUIPMENT. Mission equipment is that equipment determined necessary by the Government to accomplish the DMC, NMC-DTS, and DVIC mission. One of two types of Audio/Video (AV) equipment.

PREVENTIVE MAINTENANCE. Maintenance performed on a regularly scheduled basis to prevent the occurrence of defects and to detect and correct minor defects before they result in serious consequences. Maintenance would include following the manufactures recommended cleaning, adjustment, and lubrication procedures or using best judgment creating procedures where none are available. Preventive maintenance would also include ensuring that environmental conditions that the equipment operates in are monitored for proper temperature and humidity levels.

PROPERTY ADMINISTRATION. The administration of the contract requirements and obligations relating to Government Property in the hands of the Contractor.

QUALITY CONTROL (QC). Establishing of a method whereby the Contractor can control quality and offer to the Government only those services that conform to contractual requirements.

REPAIR PARTS. Repair parts are electronic and mechanical components or sub-assemblies, including but not limited to spare printed circuit boards that are used to repair and troubleshoot an end item.

RESIDUAL AREA. This is a secured area used to store leftover materials from completed or canceled work orders/job orders. Leftover materials that are common to the Centralized Bench Stock will be placed in the bench stock and the stock inventory adjusted to reflect the added stock. No new items will be added to the Centralized Bench Stock without COR concurrence.

RESOURCE MANAGEMENT. Resource management is based on the concept of identification, planning, and scheduling of equipment maintenance and repair requirements.

SPARE. This is a duplicate of an end item or major component of an end item that is on-hand and available for direct exchange with a like item of equipment or component of an end item.

SUB-ASSEMBLY. This is a major component or piece of an end item of equipment.

SUPPORT EQUIPMENT. Support equipment is that equipment necessary to support the mission, such as test and evaluation, diagnostic, and repair equipment. One of two types of Audio/Video (AV) equipment.

TIERING. The processing of assigning a PowerVu decoder to a level of access that allows proper authorized material to be decoded.

VIEWER. A customer legally receiving AFN program material from satellite or through an affiliate re-broadcasting the DMC signal via satellite.

3.0 SCOPE OF WORK

3.1 GENERAL SCOPE OF WORK.

3.1.1 GOVERNMENT FURNISHED EQUIPMENT. The Government will deliver to the Contractor, for use in connection with, and under the terms of this contract, the Government furnished test equipment described in Attachment 3. The Government will also deliver to the Contractor, for use in connection with, and under the terms of this contract, the Government furnished support equipment described in Attachment 4.

3.1.2 RESPONSE TIMES. The response times listed below are identified by category and are required in order to ensure that DMC and NMC-DTS on-air and DVIC delivery requirements can be met. The DMC COR will establish categories for DMC and NMC-DTS equipment. The DVIC Quality Assurance Evaluator (QAE), will establish categories for each action in consultation with the DMC COR for DVIC equipment. The categories and response times are listed below. Any adjustments, extensions, or modifications to assigned action categories shall be coordinated and approved by the DMC COR or DVIC QAE through the DMC COR for their respective systems.

3.1.2.1 DMC and NMC-DTS RESPONSE TIMES

3.1.2.1.1 ROUTINE. There is no immediate impact on mission requirements. The Contractor shall respond within 12 hours of notification. Preventive maintenance falls under this category unless the DMC COR requests a higher priority.

3.1.2.2.2 PRIORITY. There is potential impact on mission requirements. The Contractor shall respond within 1 hour of notification. Corrective actions must be accomplished to avoid possible emergency conditions such as a loss of signal.

3.1.2.2.3 EMERGENCY. There is an immediate impact on mission requirements such as loss of a signal. The Contractor shall respond immediately upon notification or discovery of the condition. Corrective actions must be expedited and completed at the highest possible priority.

3.1.2.2 DVIC RESPONSE TIMES

3.1.2.2.1 ROUTINE. There is no immediate impact on mission requirements. The Contractor shall respond within 24 hours of notification by the DVIC QAE. Work shall be completed within

10 workdays after receipt of notification. Preventive maintenance falls under this category unless the DVIC QAE requests a higher priority.

3.1.2.2.2 PRIORITY. There is potential impact on mission requirements. The Contractor shall respond within 4 hours of notification by the DVIC QAE. Work shall be completed within 3 workdays after receipt of notification.

3.1.2.2.3 EMERGENCY. There is an immediate impact on mission requirements. The Contractor shall respond within 1 hour of notification by the DVIC QAE. Work shall be completed within 24 hours after receipt of notification.

3.1.2.3.1 TECHNOLOGIST BRANCH RESPONSE TIMES. Assistance for Integrated Receiver Decoder (IRD) authorization shall be as soon as possible based on the following order of priority: AFRTS-HQ, HQ USAREUR, U.S. Navy's Fleet Support Detachments, FSD, deployed military units, direct-to-home viewers. AFRTS-HQ and the requesting agency are notified once an IRD or a list of IRDs has been authorized. Technical support is provided as calls are received or based upon priority when multiple requests are received.

3.1.2.3.2 TECHNOLOGIST TECHNICAL SUPPORT PRIORITY. Technical support request received from multiple sources at the same time are prioritized and handled in the following manner. When the support telephone is busy incoming calls are transferred to Operations and answered by Operation personnel who notify technologist. Priority is based upon the nature of the request and size of viewing audience. The affiliate with the most dramatic loss and affecting the largest number of viewers will have priority. A dramatic loss of an entire signal service can override an affiliate with a greater number of viewers as in the following example. Individual channels are restored following complete loss of signals. The primary signal is SatNet, secondary is Pacific PowerVu, and the final is NMC-DTS. Within the SatNet signal the Pentagon channel has first priority followed by: Atlantic, Pacific, News, Sports, Spectrum, Movie, and finally the Family channel. Technical Support notifies the Operations shift supervisor "Air Boss" when a loss of the signal is experienced by a DMC affiliate.

3.1.3 PERSONNEL QUALIFICATIONS. The Contractor shall maintain on site sufficient qualified management, administrative, and technical personnel to ensure satisfactory contract performance 24/7 days a week. The KO reserves the right to require proof of experience and sufficient knowledge for all management and technical personnel. The Chief, Broadcast Engineering at the DMC with the COR will review the technical education and experience of proposed new hire employees, the level or grade at employment commencement under this contract, and any changes in the level or grade of technical personnel during the contract and provide recommendations to the KO. The Government will not validate the resume statements for accuracy.

3.1.4 PERSONNEL HOURS. The Contractor shall maintain a sufficient number of technical personnel of technical competence to maintain a complex, broadcast facility and all on-air broadcast channels 24 hours a day, every day of the year.

3.1.5 CONTRACTOR RESPONSIBILITIES. The Contractor shall provide all labor, common tools, test equipment, including calibration of those tool and test equipment, and transportation/shipping of items for outside repair or calibration to maintain the DMC, NMC-DTS, and DVIC equipment. Maintenance includes, but is not limited to, corrective, preventive and depot level maintenance.

3.1.6 MANAGEMENT. The Contractor shall provide management of every area of contract performance, including, but not limited to, management in areas such as diagnostics, maintenance and repair, scheduling, purchasing, and other engineering management support functions.

3.1.7 CONTRACTOR EVALUATION. The Contractor's performance of this contract will be subjectively evaluated at all times by the Government based upon the overall performance in meeting the specifications set forth in this contract including any amendments or changes hereto. Quarterly, an Award Fee Board will meet to determine the percentage of award fee to be awarded to the contractor based on the performance requirements listed in attachment 7 and the process of attachment 8. The Contractor's management efforts accomplished under this contract will directly affect the policies, procedures, and general tones for the operation of the contract.

3.1.8 REPLACEMENT EQUIPMENT. The Contractor shall be responsible for the installation and testing of all new and/or replacement equipment, to include integration within existing systems, as directed by the COR. (see paragraph 8.2)

3.1.9 SPECIAL EVENTS. The contractor shall be responsible for the design, set-up and operational support of special events. This may include, but not be limited to, Public Address, microphones, video projection systems, monitors, videotape and all cabling required including the interface to fixed systems. (see paragraph 8.5)

3.1.10 ACCEPTABLE PERFORMANCE STANDARDS. The Contractor shall adhere to broadcast, electronics and industry standards in the performance of the requirements under this contract. The technical performance specifications established by the original equipment manufacturer shall be the minimum acceptable quality level for equipment maintained hereunder.

3.1.11 CONFIGURATION MANAGEMENT. The Government will retain configuration management authority over equipment hardware and systems integration. The Chief, Broadcast Engineering manages equipment replacement using an equipment life-cycle management plan. The Contractor is encouraged to provide inputs on equipment hardware and systems integration to the Government.

3.1.12 CONTRACTING INTERFACE. The primary technical interface will be between the Contractor and the Contracting Officer's Representative (COR) Alternate Contracting Officer's Representatives (ACOR), and operational managers. To assist the Contracting Officer and COR, Assistant CORs will monitor contractor's performance under this contract.

3.2 GOVERNMENT FURNISHED PROPERTY/SERVICES

3.2.1 WORKSPACE. The Government will provide administrative, storage, and maintenance areas (including existing furnishings) to the Contractor's dedicated on-site personnel for their use in the performance of the duties required by this contract. The areas provided by the Government are rooms 220, 221, and 223. In addition, some warehouse space will be provided for materials that do not require a climate controlled storage area. All office furniture/equipment provided by the Government will remain the property of the Government while in the custody of the Contractor, and will be accounted for through an initial transition inventory, signed by both the Contractor and COR.

3.2.2 UTILITIES. The Government will provide utilities (water, heat, facility air conditioning, and electric power).

3.2.3 TELECOMMUNICATIONS. The Government will provide telecommunications services, as currently exist at DMC. The Contractor shall ensure that these systems are used for official use only e.g. parts/vendor research. The use of Government telecommunications services is subject to monitoring and control by the Government. If the Contractor desires relocation of Government provided telecommunications equipment, such relocation shall be subject to approval of the COR.

3.2.4 FACILITY MAINTENANCE AND REPAIR. The Government will provide facility maintenance as required.

3.2.5 TECHNICAL INFORMATION. The Government will provide to the Contractor all technical manuals, training data and engineering data required to effect repair of equipment. The Contractor shall maintain the technical information while in his custody and shall be responsible for replacing any documentation, which is lost, stolen or damaged by Contractor personnel. All manuals, documents, and data provided by the Government shall remain the property of the Government. Replacement of documentation for other than obsolescence shall be the responsibility of the Contractor.

3.2.6 GFE CALIBRATION. The Government will provide to the Contractor, as part of Government Furnished Property, all existing special tools and test equipment available on-site. All tools and test equipment provided by the Government shall remain the property of the Government. The Contractor shall implement a calibration program for maintaining GFE test equipment and /or tools in calibration to insure accurate measurement and adjusting of equipment and measuring signal levels. The Contractor's calibration program shall, at a minimum, identify equipment / tools for calibration, track equipment calibration cycles, label calibration equipment / tools with last calibration date and next calibration due date. Calibration labels to shall be placed, at minimum, on the equipment's front panel. The Contractor shall request from the Government replacement of GFE tools and test equipment, which become obsolete, inoperable due to age or non-availability of repair parts, or beyond economical repair.(see paragraph 9.6.3.4)

3.3 CONTRACTOR'S GENERAL RESPONSIBILITIES

3.3.1 COMPLIANCE WITH LOCAL DIRECTIVES. The contractor shall ensure all employees are aware of and comply with all local directives listed in paragraph 9.4.1 through 9.4.17 and DMC Standard Operating Procedures (SOP's).

3.3.2 GENERAL MANAGEMENT. The Contractor shall develop organizational procedures and practices to ensure Government resources are efficiently and effectively managed and utilized. The Contractor shall ensure that Government property and other assets are safeguarded against waste, loss, unauthorized use, or misappropriation. The Contractor shall provide courteous, professional service to all personnel.

3.3.3 TOOLS AND TEST EQUIPMENT. The Contractor shall provide any additional tools or equipment not provided by the Government. Such items may consist of: basic hand tools, common test equipment, personal protective devices (respiratory and cartridge face shields, chemical splash goggles, rubber aprons, rubber gloves, etc.) or any other tools and test equipment required to perform the maintenance requirements of the PWS. The Contractor shall furnish toolboxes and containers for the storage and safekeeping of such tools/equipment. Tools, test equipment, and materials charged to the Government will remain the property of the Government upon completion of contract performance.

3.3.4 UTILITIES CONSERVATION. The Contractor shall ensure the most effective and efficient use of utilities to conserve energy and financial resources in its day-to-day activities at the work sites. Programs on the prudent consumption of utilities shall be initiated and continued to ensure that utility usage by Contractor personnel does not exceed actual requirements or imposed limits.

3.3.5 JANITORIAL. The Contractor shall be responsible for cleaning their assigned offices, maintenance shops/work areas outside maintenance shop, and storerooms. All areas the Contractor occupies shall be left in the same physical and orderly condition as before the Contractor occupied or used the area. The Contractor shall provide all material and supplies required to affect such efforts. The Government will provide janitorial services for those areas that are not the Contractor's responsibility.

3.3.6 TRANSPORTATION. The Government will furnish or fund, at the Government's discretion, transportation for Contractor personnel, tools, and equipment between points of business requiring Contractor services under this PWS.

3.3.7 CONTINUOUS IMPROVEMENT. The Contractor is encouraged to make recommendations to the Government for the replacement or modification of equipment and systems, Government facilities, or changes to procedures in use or required by the Government; however, such changes will not be implemented until approved by the Government.

3.3.8 PERMITS. Contractor shall obtain all appointments, licenses, certifications, and permits required for the performance of its responsibilities hereunder. In doing so, the Contractor shall

comply with all applicable Federal, State and Local laws or regulations. Evidence of such shall be provided to the Contracting Officer prior to commencing work.

3.3.9 REPAIR PARTS AND CONSUMABLES. The Contractor shall be responsible for researching and acquiring all repair parts and consumables required to effect repairs of the equipment. (see paragraph 9.6.3.4)

3.4 EQUIPMENT OPERATION AND MAINTENANCE

3.4.1 GENERAL PROVISIONS AND PRACTICES. Under the terms of this contract, the Contractor shall fully support all audiovisual, broadcast, and systems and facility type systems located at DMC and equipment subsequently procured to supplement or replace on-site equipment. Support shall include, but not be limited to, all maintenance, repair, calibration, equipment relocation, installation, operational testing, technical support and operator training/familiarization of equipment to DMC staff and faculty when directed by the COR. The numbers and types of equipment to be maintained will vary depending on changing, training requirements and/or transferred or new equipment. Should new equipment be purchased by DMC, which is of such a state-of-the-art that would require significant additional contractor personnel training to support the equipment, the Government will negotiate an equitable adjustment to the contract value with the Contractor. The equipment/supply inventory to be maintained/utilized will be provided to the Contractor. The Contractor shall maintain the equipment/supply inventory in accordance with this PWS. The Government offers no guarantee and accepts no responsibility relative to the adequacy and accuracy of the inventory. If the Government deems appropriate, it will provide changes and modifications to the inventory.

3.4.2 EQUIPMENT MAINTENANCE

3.4.2.1 MAINTENANCE COVERAGE. All work performed by Contractor personnel shall be accomplished in accordance with this Performance Work Statement and established procedures, instructions and standards. Vendor and/or commercial data shall govern maintenance not covered by the aforementioned procedure, instructions and standards. The Contractor shall coordinate with equipment users equipment downtime to perform maintenance. During this period, the Contractor shall complete any scheduled maintenance, as well as operational checks. The Contractor shall be particularly attentive to maintaining the integrity of warranties, guarantees, and restoring the usual or standard configuration of the equipment upon completing maintenance. The Contractor shall maintain the equipment in a serviceable, operating condition by performing systematic inspections, tests, checks and services to detect, prevent, or reduce equipment operational deterioration/failure, to include the use of process control strips to certify, in accordance with industry standards, all processors under this contract. The Contractor shall immediately notify the COR of any equipment malfunction or deficiency that adversely impacts broadcast ability.

3.4.2.2 MAINTENANCE MANAGEMENT INFORMATION SYSTEM. The Contractor shall utilize a computer based Maintenance Management Information System (MMIS) program, provided by the Government, for equipment tracking and history. Program entries shall include but not limited to; cost, life-cycle, equipment maintenance history, available spare parts,

maintenance resources, equipment location and additional data as may be required to report to the COR on the current status of equipment and systems. All updates to the MMIS shall be delivered, in hard copy and/or on magnetic media as directed, to the COR quarterly, and shall be available to the COR for inspection at any time. All equipment shall be inventoried yearly.

3.4.2.3 JOB CONTROL SYSTEM. The Contractor shall maintain a Job Control System. The Job Control System provides specific information to the COR on current scheduled or unscheduled equipment maintenance actions. The Job Control System shall include, but is not limited to: equipment status, calibration cycles, specific corrective actions, usage of stocked repair parts and spares, and accounting of repair parts purchased by the government. The Contractor shall monitor job status to ensure timely repair of assets and for system derogation, which may impact mission requirements caused by job actions.

3.4.2.4 MAINTENANCE OPERATING PROCEDURES. The Contractor shall establish written Maintenance Operating Procedures that govern the periodic inspection and schedules for preventive maintenance of all equipment covered under this contract. The Contractor shall utilize the existing Government approved Maintenance Operating Procedures currently in use by the out-going Contractor pending review and approval of Contractor-developed procedures. It shall be the Contractors' responsibility to review the provided procedures, establish replacement written procedures, if necessary, and provide them to the COR for review and approval not later than 90 days after the end of the transition period. Subsequent changes to any Maintenance Operating Procedure shall be submitted to the COR for review and approval.

3.4.2.5 MAINTENANCE RESPONSIBILITY. The Contractor shall be responsible for all preventive, corrective and depot level maintenance. This includes maintenance of all interconnecting cables between audiovisual and broadcast equipment and ADP equipment and other connectivity to the maintained equipment, e.g. video cable interconnects to non-linear editing systems. Upon Government approval, the Contractor may establish an off site repair facility or subcontract repair/rework or return subassemblies or modules to the original equipment manufacturer for repair/replacement or purchase an identical replacement. The Contractor shall be responsible for the cost of all maintenance (repair/rework/parts/return) on all equipment to include packing and shipping costs to and from the manufacturer or subcontract facility. Repair parts/materials or replacement item shall be the responsibility of the Contractor (reference paragraph 3.3.9).

4.0 APPLICABLE COMPLIANCE DOCUMENTS. The Contractor shall comply with all requirements of all documents referenced in this contract, unless prior written approval for non-compliance is obtained from the Contracting Officer (KO).

5.0 CLEARED CONTRACTOR. The Contractor will be required to work on equipment that may have information classified as "confidential", or "secret" playing, recorded or loaded. The Contractor is required to comply with FAR 52.204-2 security requirements to include complying with the Security Agreement (DD Form 441), and the National Industrial Security Program Operating Manual (DoD 5220.22M) and any revision to that manual, notice of which has been furnished to the Contractor.

6.0 PHASE-IN PERIOD.

6.1 PHASE-IN PLAN. The Contractor shall perform in accordance with a phase-in plan submitted as part of his proposal and approved by the Government. The phase-in period shall not exceed 15 days. During this phase-in period, the Contractor shall have representation on-site for the purpose of orientation and briefing by the former contractor. The Contractor shall ensure that a smooth transition occurs such that contract performance can commence at the end of the phase-in period without personnel or assistance from the out-going contractor. All Contractor personnel assigned to this contract shall be present or available on or before expiration of the phase in period.

6.2 PHASE-IN PLAN VARIANCE. The Contractor shall perform in accordance with the approved phase-in plan unless otherwise directed by the Contracting Officer.

6.3 PHASE-IN ASSISTANCE. During the phase-in period, the Contractor may expect assistance from the out-going contractor or the Government or both in the following areas:

6.3.1 PLANED PROJECTS. Familiarization with current and planned projects, equipment installations, equipment upgrades modifications, removals, relocations, and former contractor's engineering and configuration recommendations.

6.3.2 PHYSICAL LOCATIONS. Familiarization of Contractor personnel with physical locations of installed equipment, storage areas, shipping and receiving areas, and locations of both spare equipment and spare parts.

6.3.3 GOVERNMENT PROPERTY PROCEDURES. Familiarization with procedures pertinent to the handling of Government property including property book management and accountability, shipping and receiving of Government property, and inventory control of Government property as these subjects relate specifically to Contractor operations.

6.3.4 EXISTING DATA BASE. Training on the use of the existing maintenance data base software and associated local area networks, Government provided computer hardware, local area network operations, and interfaces, if any, with existing DMC, NMC-DTS, and DVIC computer systems.

6.3.5 MAINTENANCE HISTORY. Familiarization with the maintenance history database relating to the Government equipment to be maintained under this contract.

6.3.6 QUALITY CONTROL. Familiarization with procedures relating to current quality control and quality assurance programs.

6.3.7 DRAWINGS AND BLUEPRINTS. Familiarization with the current AutoCAD software, hardware, and procedures and policies regarding the development of engineering and AV maintenance related drawings and blueprints.

6.3.8 COMMAND STRUCTURE. Orientation and familiarization with the command and management structure of the DMC, NMC-DTS, and DVIC in addition to the internal and external operational interfaces required of the Contractor.

6.3.9 PHASE-IN TRAINING. During the phase-in period, the Contractor may expect assistance from Government personnel and out-going Contractor personnel with the installed equipment and training on the use of the following systems: PowerVu, PCC 2000, system and database, suspending IRD authorization, PVConnect.net web base IRD authorization program, AFRTS Satellite Network, Electronic Program Guide, KenCast System, Offut Weather Computers and transmission path, Watch Dog cue recording system, Government provided computer hardware, and e-mail system.

6.4 PHASE-IN INVENTORY. The Contractor shall, jointly with the Government and the out-going contractor, inventory all equipment, systems, and sub-assemblies during the phase-in period. To ensure the smooth transition and accountability for all Government Property, the Government will secure custody of all Government Property from the out-going contractor upon completion of the inventory, and subsequently transfer custody to the incoming Contractor. Another joint inventory will be conducted 90 days prior to the end of the contract to ensure proper accountability during the life of the contract.

7.0 GENERAL TECHNICAL REQUIREMENTS.

7.1 TECHNICAL SCOPE OF WORK. The Contractor shall perform Audiovisual Maintenance (AVM) Services in support of the DMC and NMC-DTS mission on a 24-hour per day, 7-days per week basis and in support of the DVIC mission on an 8-hour normal workday, 40-hour per week. If the Contractor requires access to areas controlled by DVIC or DVIC's contractor after hours, the Contractor will make arrangements through DVIC's QAE and carbon copy requests to the DMC COR. AVM services include, but not limited to, the maintenance and repair of audio, video, and radio frequency equipment; satellite reception equipment; telecommunications and data equipment, including all imbedded and peripheral computers, printers, monitors, microprocessor based, local area networks, and automatic data processing equipment (ADPE) associated with data; audio or video functions; provide new system and equipment engineering and installation support as approved by the COR; assist Government project engineers in evaluating and analyzing the DMC/AFRTS global network or parts thereof; install new or replacement equipment or systems under the direction of Government project engineers; provide recommendations on project installations to Government project engineers; produce and/or fabricate test leads or connectors for equipment/system evaluations or project development; evaluate and test proposed new equipment or systems as directed; schedule and perform preventive maintenance; repair all identified operational equipment and systems including their interconnecting audio, video, control, data, radio frequency, and power supply cables; and conduct and perform operational tests, measurements, adjustments, alignments, and systems analysis necessary to ensure that the DMC, NMC-DTS and DVIC is able to process video, audio, pictorial and data signals; all signals are available for transmission 24-hours per day, 7 days per week, 365/366 days per year with the exception of DVIC whose normal hours of operation are 40 hours per week.

7.2 REPAIR RESPONSIBILITY. It shall be the Contractor's responsibility to analyze systems and equipment to determine the cause of malfunctions or degradation in performance and/or signal quality, correct such deficiencies, and maintain system and component integrity. The Contractor shall be responsible for including changes, hardware updates, software updates, field changes, manufacturers recommended modifications to equipment, and shall be responsible for maintaining and updating equipment and system configuration drawings, records, standards, technical manuals and publications. Close coordination between the Contractor and the COR will be expected with regard to accomplishment of changes, upgrades, and modifications listed herein.

7.3 DRAWINGS AND BLUEPRINTS. Drawings maintained by the Contractor for broadcast equipment and system configuration shall incorporate a drawing tree for quick reference and identification of the more detailed drawings. The contractor shall maintain two copies of broadcast equipment and system configuration drawings in the following locations: the master set of drawings in contractor's technical work area, and a second copy in room 261. Drawings and their copies will be updated when drawing revisions have been finalized. Only the master set of drawings will have pen and ink changes to identify intermediate changes until a revision is issued. The Contractor shall make suitable data back-ups of all drawings, to include drawings identified in paragraphs 7.3.3, 7.3.4, 7.3.5, and blueprints to be stored off-site to ensure that the blueprint data is protected against loss or corruption.

7.3.1 DRAFTING EQUIPMENT. The Contractor shall provide drafting support of equipment, network, and system configurations to the DMC Government project engineers. The Contractor will receive hand sketch drawings from DMC engineers and develop industry standard drawing from the information provided by the Government. The Contractor shall provide a hard copy of the completed drawing to the Government engineer through the COR.

7.3.2 DRAWING SUBMITTAL PROCESS. The Contractor shall develop a drawing change and submission program. The contractor shall develop the change program to comply with the requirement of this contract and submit their procedures to the KO via the COR for review and approval in accordance with (IAW) Contract Data Requirements List (CDRL) Data Item (DI) No.001. The final approving authority for all DMC and NMC-DTS drawing will be the Chief, Broadcast Engineer.

7.3.3 FACILITIES DRAWINGS. The Contractor shall provide facility drafting support to maintain as-built drawings of architectural, electrical distribution, plumbing, mechanical, and air conditioning and heating. The Contractor will establish a drawing tree for quick reference and identification of the more detailed drawings. The Contractor will receive drawing changes from the Government's facilities engineer through the COR to update as-built drawings. Facility drawings will be maintained in a location as directed by the Government's plant engineer and updated with revisions as required.

7.3.4 INFORMATION TECHNOLOGY DRAWINGS. The Contractor shall provide Information Technology (IT), drafting support to document local area networks, network

segments, server location, and network segment identification for the DMC and DVIC. The Contractor shall establish a drawing tree for quick reference and identification and location of more detailed drawings. One set of IT drawing will be maintained in a room designated by the IT division manager at DMC. The Contractor will receive drawing inputs and changes from the IT division manager through the COR.

7.3.5 OUTSIDE PLANT DRAWINGS. The Contractor shall provide drafting support to document outside plant installations performed by the DMC engineering visual information and distribution divisions. The Contractor shall establish a drawing tree for quick reference and identification and location of more detailed drawings. The Contractor will receive drawing requirements from engineering through the COR. Outside plant drawing files will be maintained by the Contractor and prints produced as required by the COR.

7.4 EQUIPMENT REPLACEMENT RECOMMENDATIONS. The Contractor shall make appropriate recommendations for equipment replacement, new equipment and systems. This does not preclude the Contractor from making recommendations to the Government for the replacement or modification of equipment and systems, Government facilities, or changes to procedures in use or required by the Government; however, such changes will not be implemented until approved by the Government.

7.5 MINIMUM BENCH AND STOCK LEVELS. At the start of the contract, the Government will provide the Contractor with an accounting of the existing stock of spares; sub-assemblies and repair parts listed in Attachments 2b and 2c. The MMIS, described in paragraph 8.3, shall be used to track, control, and re-supply the inventory of spare equipment, sub-assemblies, and repair parts. This material is considered necessary to ensure uninterrupted operations of the DMC, NMC-DTS and DVIC. The Contractor shall ensure that established minimum stock levels are on hand at all times. As bench stock is used by the DMC, NMC-DTS and DVIC the appropriate units' funds shall be charged for bench stock replenishment. The Contractor shall obtain written approval from the COR prior to changing any stock level of spares, sub-assemblies, and repair parts. Written approval can be in the form of e-mail from the COR. Sub-assemblies, including printed circuit boards, shall be repaired as soon as possible after they are found to be defective, but have a lower repair priority than mission equipment.

7.6 INTERFACE BETWEEN CONTRACTOR AND GOVERNMENT. The primary technical interface will be between the Contractor and the COR, Alternate Contracting Officer's Representatives (ACOR), Quality Assurance Evaluators, and operational managers. To assist the KO and COR, Quality Assurance Evaluators (QAE) will monitor performance under this contract in accordance with the Performance Requirements Summary (see Attachment 8)

7.7 USE OF GOVERNMENT VEHICLES. The Contractor shall use Government vehicles, fork-lift, bobcat, and man-lift in conjunction with this contract. The Contractor shall adhere to DVIC SOP 0017 for vehicle request and will maintain the appropriate liability insurance required by law. Contractor employees using Government vehicles must possess a valid driver's license or permits.

7.7.1 VEHICLE REQUESTS. The Contractor shall direct requests for forklift, bobcat and man-lift usage to the COR. Contractor employees designated to operate the man-lift shall possess Occupational Safety and Health Administration, OSHA, certification for the equipment operation.

7.8 TECHNOLOGIST SUPPORT. The Contractor shall perform Customer Service and Technical Support in support of the DMC and NMC-DTS mission on a 24-hour per day, 7-days per week basis. Customer Service includes, but not limited to, web base entries associated with authorizing IRDs, suspend IRD authorization, confirm authorization or suspense of IRDs via e-mail to originator of request and DEE, and monitor AFN return satellite signals. When required confirm, cue transmission via Watch Dog computer, receipt and transmission of Stars and Stripes, and operation of the Program Guide computer. Equipment failure, absence of the AFN satellite return signal, or a portion thereof, or a degradation of signal quality shall be recorded continuously and submitted, via e-mail, to the Shift Supervisor and DEE for Government review at the end of each shift. Technologist Support includes, but not limited to, monitor AFN return satellite signals, receive telephone calls for technical assistance from affiliates and viewers, provide guidance with satellite antenna setup, satellite position, frequency, and polarity, PowerVu IRD menu settings, telephone satellite gateways to confirm signal transmission, maintain record of event per shift, and submit shift records to Shift Supervisor and DEE via e-mail. With feedback from monitors, affiliates, and viewers technologist contact domestic and international satellite gateways to determine reception and confidence return of the AFRTS or NMFC-DTS signal from the respective domestic or international satellite. Any loss of the AFN or DTS signal to an affiliate shall be reported to the Shift Supervisor immediately.

8.0 SPECIFIC TASKS.

8.1 CONTRACTOR'S RESPONSIBILITY FOR EXISTING EQUIPMENT. The Contractor shall perform all maintenance, repair, equipment relocation or installation, and general support, including the purchase of replacement equipment as directed by the KO for all existing DMC, NMC-DTS and DVIC audio, video, pictorial and data systems which includes all equipment listed in attachments to the contract.

8.1.1 OPERATOR MAINTENANCE. First level maintenance as defined herein will be performed by the Government operator of each item of equipment. (See paragraph 2.0, Definitions)

8.1.2 CONTRACTOR PROVIDED TRAINING FOR EXISTING EQUIPMENT. The Contractor shall provide operator training and equipment familiarization training to personnel on existing equipment and/or systems as directed by the COR.

8.2 CONTRACTOR RESPONSIBILITY FOR NEW EQUIPMENT. The Contractor shall perform all maintenance, repair, and general support for all new AV systems and equipment purchased by the Government or by the Contractor as directed by the Government. The Contractor shall perform receiving inspections on new equipment, pre-engineering for installation of new systems or equipment as requested, installation and integration of new systems and equipment, and/or re-engineering, removal and re-installation of existing systems or

equipment as directed by the COR. The contractor shall develop acceptable quality standards and preventive maintenance requirements (approved by the COR) for new equipment and systems. Upon receipt and an operational check of these systems and equipment, appropriate entries shall be made to the MMIS database. New systems and equipment will be inspected, checked and entered into the MMIS database within three working days after the contractor receives the systems or equipment from the Government. The A/V maintenance contractor will be provided the warranty information applicable to any new equipment. When necessary the Contractor shall interact with equipment manufacturers or vendors to obtain warranty repair. The Contractor shall prepare for shipment and ship all equipment under warranty to the applicable manufacturer or vendor. The Contractor shall provide operator training and equipment familiarization training to designated personnel as directed by the COR.

8.3 MAINTENANCE MANAGEMENT INFORMATION SYSTEM. The computer based Maintenance Management Information System (MMIS) shall be maintained by the Contractor. Database entries shall include, but not be limited to: cost, life-cycle, cumulative maintenance cost, equipment maintenance history, available spare parts, maintenance resources, equipment location, and additional data as may be required to report to the KO and COR on the current status of equipment and systems. All updates to the MMIS will be provided, in hard copy or on magnetic media as directed by the KO, to the COR quarterly and shall be available to the COR and QAEs for inspection at any time. The existing database and computer support equipment will be turned over to the Contractor at the start of the contract.

8.3.1 LEGACY PROGRAM. The current MMIS database is run in Paradox with custom programming in PAL for protection of data as the program runs in the background. The government plans on transitioning to a new database program custom written for use at the DMC. Historical maintenance data will be imported for use in the new database system. The Contractor shall supply their own hardware and software to manage their payroll as needed.

8.3.2 GOVERNMENT FURNISHED EQUIPMENT. The contractor will be provided Government furnished equipment and test equipment as identified on attachments 3 and 4 of the contract. The contractor will maintain a Government Furnish Equipment Property book within the Government's Defense Property Accounting System (DPAS) in accordance with DVIC SOP 0019. The Government will provide the contractor with an account within DPAS.

8.4 ENGINEERING DESIGN, ANALYSIS, AND EVALUATION SUPPORT. The Contractor shall coordinate and/or provide engineering design, analysis, and evaluation support to the DMC Government Project Engineers and DVIC in connection with the purchase of new or replacement systems and equipment or other capabilities as directed by the COR. DVIC does not have Government project engineers on their staff; therefore, the Contractor shall provide the DVIC these services upon approval of the DMC COR.

8.4.1 ENGINEERING INSTALLATION OF NEW SYSTEMS. The Contractor shall install and/or coordinate the installation of new systems or components purchased by the Government for installation at DMC. Coordination of the installation of new systems shall include, but not limited to, identifying blocks of audio/video/data/control cable numbers using DMC/DVIC cable

numbering standard; wiring to demarcation of new system; cable length calculations, coordination of system installation with the vendor; and testing of the system within the broadcast plant.

8.5 SPECIAL EVENTS SUPPORT. The Contractor shall provide all necessary technical, maintenance, and repair support for all DMC, NMC-DTS, and DVIC special events within metropolitan Los Angeles, California. This includes, but is not limited to, conferences, seminars, training sessions, military formations, and official DMC, NMC-DTS, and DVIC social events. Such support includes, but is not limited to, equipment delivery, set-up, and continuous technical support for the duration of the event, equipment tear down, and the return of equipment to the DMC.

8.6 SATELLITE NETWORK TESTING. The Contractor shall be responsible for operating all AV equipment and test equipment associated with the periodic satellite network circuit tests scheduled by the DMC. It shall be the Contractor's responsibility to maintain the correct equipment configuration and equipment calibration necessary to perform these tests.

8.7 MAINTENANCE OPERATING PROCEDURES. The Contractor shall establish written Maintenance Operating Procedures (MOP) that govern the periodic inspection and preventative maintenance of all AV equipment covered under this contract. The Contractor shall use existing MOP provided by the Government pending review and approval of contractor-developed procedures. However, it shall be the Contractor's responsibility to review those procedures, establish replacement written procedures, and provide them to the KO for review and approval IAW CDRL DI No.002. Subsequent changes to any MOP shall be submitted to the COR for review and approval.

8.8 PRODUCTION CONTROL. The Contractor shall establish a Production Control System for the centralized control of equipment/system preventative maintenance, corrective maintenance, and project implementation and installation. The Contractor shall ensure that work requirements are formulated and scheduled for accomplishment in a relative order of priority, based on criticality, safety, and mission accomplishment. Corrective maintenance, although not previously planned or programmed, will require prompt attention. Unscheduled maintenance must be added to, integrated with, or substituted for previous scheduled workloads, depending on mission support requirements and the availability of parts to make the repair.

8.8.1 BROADCAST MAINTENANCE SCHEDULE. The Contractor shall maintain a Broadcast Maintenance Schedule (BM Schedule). The current BM Schedule is an integral part of the Production Control System and shall provide the COR and operational managers with information relevant to scheduled maintenance activity on specified end item equipment or systems. The BM Schedule shall identify, but is not limited to, the equipment or system to be serviced, length of down time, the date and scheduled time of equipment or system downtime, and identify associated equipment or system impacted by the scheduled equipment maintenance. The Contractor shall notify and coordinate with work area managers and/or shift supervisors when performing maintenance on equipment or systems in an operational status. Annual preventive maintenance inspections (PMI) shall be accomplished within 2 weeks of scheduled date. Quarterly preventive maintenance inspections shall be accomplished within 1 week of

scheduled date. Weekly preventive maintenance inspections shall be accomplished within 2 days of scheduled date. Daily preventive maintenance inspections shall be accomplished within the day of scheduling. PMI's that can not be accomplished at the scheduled inspection time shall be rescheduled as approved by the COR. Rescheduled PMI's will be recorded and submitted in a monthly report to the COR. The Government plans on completing its review of a new Broadcast Maintenance Schedule computer software program and implementing it during the course of this contract.

8.8.2 JOB CONTROL SYSTEM. The Contractor shall maintain a job control system that is an integral part of the production control system. The current job control system provides specific information to the COR on current scheduled and unscheduled maintenance and repair activity. The job control system shall include, but is not limited to, equipment status, specific corrective actions, usage of stocked repair parts and spares, and accounting of repairs parts purchased by the Contractor. The Government plans on completing its review of a new Job Control System computer software program and implementing it during the course of this contract.

8.9 EMERGENCY FACILITIES SUPPORT. The Contractor shall provide support for facilities related emergency problems that occur outside of normal DMC working hours. The support is expected to be limited to the abilities of the contractor's personnel on-duty at the time of the emergency situation and entails restarting chillers, air-conditioning units, resetting UPS systems, circuit breakers, or opening or closing isolation valves.

8.10 TEST EQUIPMENT. The Contractor shall maintain all measuring, test equipment, and test devices and request replacement when necessary.

8.10.1 REPLACEMENT OF GFE. The Contractor shall submit a request to the KO for replacement of Government Furnished Test Equipment after determining that replacement is needed. After receipt of such a request, the KO will determine whether the replacement is required and whether the Government or the Contractor will purchase the replacement. If the Contractor is directed to purchase the replacement, an equitable adjustment in the estimated contract price will be negotiated. The request shall include, as a minimum, the following:

8.10.1.1 REPLACEMENT JUSTIFICATION. Reason replacement is necessary (e.g., obsolescence, excessive cost to repair, non-repair ability, etc.) and the approximate cost of the replacement.

8.10.1.2 REPLACEMENT RECOMMENDATION. The Contractor's replacement recommendation shall include state-of-the-art equipment or a more efficient item and the cost of that item.

8.11 STANDARDS AND ACCEPTABLE QUALITY LEVELS (AQL). The Contractor shall adhere to broadcast and electronics industry standards in the performance of all requirements under this contract. The technical performance specifications established by the manufacturer shall be the minimum AQL for equipment and broadcast industry standards shall be the minimum AQL for the broadcast plant. The Contractor shall maintain equipment so that it performs to the manufacturers' specifications.

8.12 CONTRACTOR MAINTAINED TECHNICAL LIBRARY. A library of equipment manufacturer operation and technical manuals, operating system's software and application software will be provided to the Contractor. The library does not contain an operation and/or technical manual for every piece of different equipment or model at DMC, NMC-DTS and DVIC, nor may it be necessary. The Contractor shall purchase those operation and/or technical manuals when necessary for equipment operation and maintenance. In addition, the Contractor shall purchase replacement manuals when necessary for manuals showing signs of excess wear and tear. Manuals purchased by the Contractor shall be placed into the Government library and maintained accordingly. The Contractor shall maintain the library on-site. This includes keeping all manuals updated and current in accordance with manufacturers' recommendations. All technical orders, publications, and documentation of historical data and major repairs shall be updated within 15 days of receipt.

8.13 QUALITY CONTROL PROGRAM. The Contractor shall provide the Government a QC program that is designed to ensure the Contractor meets all of the requirements of this contract. The QC program shall ensure AQL's for the equipment being maintained under this contract are met. The QC program shall be developed and tailored by the Contractor for this contract and provide the program to the KO for review and approval IAW CDRL DI 003.

8.13.1 NEED FOR QUALITY. Quality control shall be inherent in all other tasks required in this contract, but special emphasis shall be placed on the maintenance and repair of AV equipment. The Contractor shall develop and implement a QC program which, as a minimum, includes:

8.13.1.1 QC PROGRAM SCOPE. Application of the QC program to all areas of the contract.

8.13.1.2 QC SYSTEM. A systematic method of meeting required AQL's that are planned, developed and implemented in conjunction with an overall AV maintenance effort.

8.13.1.3 QC INSPECTIONS. A system that detects, prevents, corrects, and reports all areas not conforming to the QC program. Non-conformances shall include actual and potential defects in workmanship and procedures and detrimental trends in workmanship and procedures that could result in unsatisfactory services by the Contractor or in the performance of equipment or both. A system shall be established which ensures that unsatisfactory services are documented and the details of planned and ongoing corrective action are made available to the Government upon request.

8.13.1.4 QC DEFICIENCIES. A system that ensures the Contractor responds to Deficiency Reports immediately and deficiencies corrected by a time established by the COR.

8.13.2 QC PLAN REQUIREMENT. The QC program effort must be fully defined in a QC Program Plan that the Contractor submits in draft as part of the proposal, and shall be submitted for final review and approval as referenced in paragraph 8.13. The plan at a minimum shall include those areas described in paragraphs 8.13.1.1 through 8.13.1.4 and describe the organization of the QC function, specify a functionally independent QC monitor, include a

complete listing of the QC monitor's responsibilities, an enumeration of all tasks to which the QC program will be applied, and an outline of responsibilities of Contractor management personnel for the QC program.

8.14 CONTRACTOR RESPONSIBILITY FOR SAFETY. The Contractor shall comply with all federal, state, and local safety standards, practices, and ordinances, and shall comply with all safety requirements set forth elsewhere herein. The Contractor shall maintain current Material Safety Data Sheets (MSDS) for products used on this contract and within the work area. Additionally, a copy of the MSDS shall be provided to the COR for inclusion in the building's Fire Marshall MSDS binder.

8.15 TRAINING FOR CONTRACTOR PERSONNEL. Training for Contractor personnel on new equipment purchased by the Government, or by the Contractor as directed by the Government, will be provided as approved by the KO. However, this does not relieve the Contractor from the responsibility of ensuring that an adequately trained technical staff is available at all times. The Contractor shall submit a Training Plan annually to the KO for review and approval IAW CDRL DI No.004.

8.16 EXISTING DATA. The Contractor will be provided with copies of existing maintenance schedules, equipment lists; spare part stock lists, drawings, cable lists, and other data on hand. This information will be provided in printed or magnetic data record form. Magnetic data records will be provided as part of the existing MMIS. It shall be the Contractor's responsibility to maintain, update such records, and back-up data records for casualty recovery. This data is provided for information only and does not relieve the Contractor of the responsibility for performance in accordance with the terms of the contract.

8.17 REPORTS. The Contractor shall provide the COR with reports, as described herein, which provide details and status of planned and ongoing equipment maintenance, repair, and other job activity.

8.17.1 WEEKLY JOB CONTROL STATUS REPORTS. A DMC and NMC-DTS Work Control Status Report shall be submitted IAW CDRL DI No. 005 prior to 0800 hours on Tuesdays, and shall be submitted in electronic form such as electronic mail, computer diskette, or other electronic media as approved by the COR. This report shall include, but not be limited to, equipment identification of DMC and NMC-DTS equipment, equipment location, description of problem and equipment status, corrective action, job control number, initiation date of job control action, identification of person requesting job action, target date for completion of repairs or change in equipment status, man-hours accounting, job priority, repair parts used, and an accounting of Contractor purchased repair parts used or on order. The capability to provide hard-copy status reports shall be maintained by the Contractor at all times and hard copies shall be submitted as required by the COR. For Tuesday holidays, this report shall be submitted by 0800 hours on the proceeding Monday.

8.17.2 WEEKLY COMPLETED JOBS REPORT. A Completed Jobs Report of DMC and NMC-DTS completed jobs shall be submitted IAW CDRL DI No. 006 in hard-copy prior to

0800 hours each Tuesday containing a summary of each job completed since the previously submitted Completed Jobs Report. This report shall include, but not be limited to, the same information contained in the Equipment Status Report described above, but in this report the information shall be in final form including, for example, final corrective action taken or total man-hours expended for a given job. For Tuesday holidays, this report shall be submitted by 0800 hours on the preceding Monday.

8.17.3 MONTHLY BROADCAST CENTER, NMC-DTS AND DVIC MAINTENANCE SCHEDULE REPORT. A Monthly Broadcast Center, NMC-DTS and DVIC Maintenance Schedule Report summarizing the scheduled preventive maintenance and scheduled repair for that month shall be submitted IAW CDRL DI No. 007 in hard-copy to the COR by noon on the first normal work day of the month during which the schedule applies. This report shall include, but not be limited to, identification of functional area, physical location, type of maintenance, periodicity, equipment identification, system/equipment name, job control number, and scheduled date and projected time of maintenance or repair. The Contractor shall be responsible for scheduling such maintenance in order to ensure minimum impact on the mission of DMC, NMC-DTS and DVIC.

8.17.4 DAILY DVIC UPDATE REPORTS. A daily e-mail report of all opened and closed DVIC work orders with nomenclature, priority and status shall be submitted to the DVIC QAE and DMC COR IWA CDRL DI No. 008.

8.17.5 FAILED PREVENTITIVE MAINTENANCE REPORT. A monthly report of all preventative maintenance inspections that were not completed within scheduled periodicity shall be made in the first week of the month following and delivered to the COR. The report will include, but not limited to, identification of the equipment, type of maintenance, periodicity, job control number, reason why PMI was not completed and an estimated time of completion.

8.18 MATERIAL AND STOCK LEVEL CONTROL. This task involves the control of audio and video maintenance supplies and materials. Under this task, supplies and materials are differentiated from equipment end-items, the control of which is covered elsewhere in this document. The main function of this task is to process requests for material, monitor status of requirements, and provide information on availability of materials. The Contractor shall operate a material control system. In addition, the Contractor shall:

8.18.1 SUPPLY ACCOUNTING SYSTEM. Establish and maintain an approved supply accounting system for full control, issue, receipt, ordering, and inventory of all supplies and materials used in conjunction with this contract as it pertains to DMC, NMC-DTS, and DVIC. The system shall be described in writing and included as part of the Property Administration and Accounting Procedures to be submitted IAW Paragraph 9.8.

8.18.2 AUTHORIZED EXPENDITURES. The material identified herein shall be expended only on authorized work orders or job orders.

8.18.3 ESTABLISHMENT OF HOLDING AREA. Establish and control a holding area. The Contract shall established a separate holding areas for equipment awaiting maintenance (AWM)

and for equipment awaiting parts (AWP). The Contractor shall make a detailed periodic review, at least quarterly, to ensure that only valid material orders are on hand. Material in the holding area shall be marked or tagged to identify the maintenance action or project the material is associated to.

8.18.4 ESTABLISHMENT OF BENCH STOCK AREA. Establish a centralized bench stock area located within the Government provided maintenance area as approved by the COR.

8.18.5 MAINTENANCE OF STOCK LEVELS. Establish, revise, add, and delete special stock levels not justified by consumption data as approved by the COR.

8.18.6 INSPECTION REQUIREMENT. Inspect incoming supplies and equipment for damage, serviceability, completeness, and identification, and take necessary action to correct deficiencies. After inspection of the material place the incoming material in the designated area to which it belongs, i.e., bench stock, holding area.

8.19 CONTRACTOR'S TECHNOLOGIST BRANCH RESPONSIBILITY FOR CUSTOMER SERVICE AND TECHNICAL SUPPORT. The Contractor shall perform all PowerVu IRD and PVConnect administrative entries, monitor broadcast signals, operating systems, and incoming feeds, assist affiliates and viewers to establish broadcast reception, verify AFN satellite broadcast at uplink gateways, and log events for distribution.

8.19.1 POWERVU IRD ADMINISTRATIVE ENTRIES. The Contractor's technologist shall: assist customers authorize PowerVu IRDs to receive the AFRTS broadcast, suspend authorizations, notify requestor, AFRTS and DEE via e-mail of IRD authorized or suspended, enter applicable IRD data into PVConnect when authorizing IRDs, verify data and authorization when requested, monitor PowerVu operation, notify Shift Supervisors and DEE immediately of abnormal PowerVu operation, confirm weekly PowerVu database backup.

8.19.2 MONITOR BROADCAST SIGNALS. The Contractor's technologist shall: monitor AFN transmitted return signal from the domestic satellite, DTS Pacific international satellite and DTS Atlantic domestic satellite returns. Monitored signals include radio, television and data channels, as well as, take a daily reading of PowerVu IRD bit error rate and signal strength on one receiver in each of the above networks. The reading shall be compiled in a monthly report and updated daily with a copy of the report e-mailed to the Chief, Broadcasting Engineering daily. The depth of monitoring shall include, but not limited to, loss of signal, the presence of individual channels within the signal and the quality of these channels referenced to industry standards. The Contractor shall restore lost signals or signal quality. The Contractor will notify the Shift Supervisor immediately and DEE, if possible, when a loss of radio, television or data channel is experienced. Additionally, the Contractor shall notify the COR, Chief, Broadcast Engineering Division, and the Director of Engineering during a complete signal outage lasting, or projected to last, more than five minutes. In addition, the Contractor will back-up to floppy disk recorded television cue closure stored within the WatchDog computer station. The back-up shall occur the first normal workday of the month and shall include all cueing information since the previous back-up. Only one-month television cue back-up is required; therefore, previous

back-ups can be erased. The contractor shall insure a complete back-up occurred before erasing, cleaning, the television cue log from the WatchDog computer station.

8.19.3 FAILURE NOTIFICATION. In the event of a signal failure or loss of a program caused by equipment malfunction Government personnel must be notified in a timely matter. Contractor personnel shall be required to call designated Government personnel at any hour when an off-the-air condition exists for more than three minutes or a program is substituted due to circuit or equipment failure for more than five minutes. Notification is not required for program substitutions made by the Government shift supervisor for non-circuit and non-equipment failures such as rain delays, sun outages, or media problems.

8.19.4 MONITOR OPERATING SYSTEMS. The Contractor shall monitor for proper operation the following operating systems to include, but not limited to: PowerVu PCC-2000, Ken Cast and Program Guide. The contractor shall note systems not operating properly in their shift report sent to DEE and restore the system to proper operation.

8.19.5 MONITOR INCOMING FEEDS. The Contractor shall monitor incoming broadcast feeds from the News Center and other Armed Forces originated feeds. The Contractor shall monitor for proper set-up, provide immediate telephone feedback to originator of technical difficulties, and immediately notify Shift Supervisor of technical difficulties.

8.20 ASSIST AFFILIATES AND VIEWERS. The Contractor shall provide technical assistance to AFRTS affiliates and viewers requesting information on AFRTS satellite location, frequency, polarity, azimuth and elevation. The Contractor shall provide callers information on PowerVu Integrated Receiver Decoder (IRD) menu set-up for their specific geographical area, IRD configuration, LNB information, and general satellite antenna set-up. In addition, the Contractor shall confirm for AFRTS affiliates signal distribution as observed or recorded from the domestic AFRTS satellite. Signal confirmations include, but not limited to, radio, television, data, and television cues.

8.21 VERIFY AFRTS SATELLITE BROADCAST. The Contractor shall verify AFRTS satellite broadcast through telephonic communications with satellite gateways upon notification of signal failure or outage from affiliates or viewers. The Contractor shall determine the point of failure during signal loss, whether domestic or international, and take the following action: if signal loss originates from DMC (domestic) signal restoration shall be handled under this contract; if signal loss is determined international (AFRTS satellite gateways) the Contractor will notify the Shift Supervisor immediately and DEE, if possible. The Contractor shall determine which satellite gateway is experiencing problems and monitor the problem until service is restored. The Contractor shall maintain communication with the gateway up-link station, as necessary, to provide assistance in restoring DMC or NMC-DTS signals.

8.22 LOG EVENTS. The Contractor shall create and transmit a Shift Log (record of events), which occurred during the shift. The Contractor shall record at a minimum: date and time of event, broadcast service (channel) involved, nature of event, corrective action taken, personnel contacted by name and company/agency, and estimate time of restoration if not readily resolvable. The Contractor shall create the log for transmission via e-mail to DEE and DOM e-

mail lists and will not transmit the log outside the DMC facility. The Contractor will respond, via e-mail, to IRD authorization or suspend requests to the originator, AFRTS and DEE when action has been completed on the request.

9.0 MANAGEMENT REQUIREMENTS. The Contractor shall provide overall management of the Contractor's operation including Contract and Operations Management, Contract and Property Administration, and Financial Management.

9.1 CONTRACT MANAGEMENT. The Contractor shall designate and locate at DMC and DVIC an on-site manager with responsibility only for this contract, which is empowered to make and implement all decisions regarding the performance of this contract. The on-site manager shall have independent authority for all contract matters and shall be at the DMC and DVIC facility during normal business hours. Normal business hours range from 0600 to 1700 and accommodate flexible hour schedules. The Contractor will confer with the Government to establish a workweek that meets the Governments needs while allowing flexibility.

9.2 PRINCIPAL RELATIONSHIPS. This task covers the management of the entire contract, and therefore includes interface with all facets of DMC, NMC-DTS and DVIC functional managers, key staff managers, and their administrative support staffs. The Contractor's primary contact will be with the KO, COR, Alternate COR, and QAE personnel. The Contractor, at the request of the Government, shall attend meetings and provide appropriate advice and input of a technical nature relating to systems and equipment planning, for both existing and future requirements of the DMC, NMC-DTS and DVIC.

9.2.1 MANAGEMENT SCOPE. The Contractor shall provide management of every area of contract performance, including, but not limited to, management in areas such as diagnostics, maintenance and repair, scheduling, purchasing, and other engineering management support functions.

9.2.2 SUBJECTIVE EVALUATION. The Contractor's performance of this contract will be subjectively evaluated by the Government based upon the overall performance in meeting the specifications set forth in this contract including any amendments or changes hereto (See Performance Requirements Summary, attachment 8). The management efforts accomplished under this task set the policies, procedures, and general tones for the operation of the contract.

9.2.3 QC INSPECTIONS. The Contractor will be inspected by Government Quality Assurance Inspectors and the COR on specifications set forth within this contract. A copy of any inspection or evaluation indicating a contract deficiency will be forwarded to the Contractor for corrective action.

9.2.4 DEFICIENCY CORRECTION REQUIREMENT. Correct deficiencies within 48 hours of receiving a copy of an inspection or evaluation deficiency report. Notify the COR within the 48 hours if any deficiency can not be corrected within the established time frame because required parts are not available or of other circumstances beyond the Contractor's control. Based on the circumstances experienced by the Contractor the COR will established a time frame for

the correction of the deficiency. Re-open the original job order, if applicable, and document the deficiency and the corrective action on the original job order.

9.3 KEY MANAGERIAL RESPONSIBILITIES. The Contractor shall develop an organization, procedures and practices to ensure that:

9.3.1 EFFECTIVE MANAGEMENT. Resources are efficiently and effectively managed and utilized.

9.3.2 MANAGEMENT OF COST. Obligations and costs are in compliance with applicable laws and contract provisions.

9.3.3 SAFEGUARD OF ASSETS. Funds, property, and other assets are safeguarded against waste, loss, unauthorized use, or misappropriation.

9.3.4 RECORDING OF EXPENDITURES. Expenditures applicable to this contract are to be properly recorded and accounted for. The Contractor shall keep expenditures individually for the DMC, NMC-DTS, and DVIC recording costs associated with each separately and also providing a sum of total expenditures. Three distinct, accounting fund sites for DMC, NMC-DTS and DVIC, respectively, will be provide to the Contractor by the Government each contract year for billing purposes.

9.4 DMC OPERATIONAL GUIDELINES (OG's) and DVIC STANDARD OPERATING PROCEDURES (SOP's). The Contractor shall ensure that Contractor employees are familiar with and comply, as appropriate, with the following DMC OGs and the following DVIC SOP's. The Contractor shall ensure that any memoranda required by the following listed OG's is routed through the COR prior to submission to any other DMC office. DMC OG's and DVIC SOP's are subject to periodic review; therefore, an amendment to this contract will be issued should there be any additions or deletions to the following list:

9.4.1 DVIC SOP 0017. Utilization of Government Vehicles.

9.4.2 DVIC SOP 0019. Management of Accountable Government Property.

9.4.3 DVIC SOP 0020. Shipping and Receiving Procedures

9.4.4 RESERVED

9.4.5 DMC OG 5-1. Internal Security

9.4.6 DMC OG 5-2. Bomb Threats

9.4.7 DMC OG 6-1. Telecommunications Services

9 4.8 DMC OG 9-2. Fire Regulations

9.4.9 DMC OG 9-3. HAZARDOUS MATERIAL MANAGEMENT

9.4.10 DMC OG 9-4. Use of Government-Owned Audio/Video Equipment and/or Engineering Technical Assistance

9.4.11 DMC OG 10-1. Assumption of Authority in the Armed Forces Radio and Television Service -Broadcast Center (DMC)

9.4.12 DMC OG 10-2. Health Promotion and Smoking Policy

9.4.13 DMC OG 13-03. Prohibited and Unauthorized Use of Government Information Technology (IT) Network Automated Information Systems (AIS)

9.4.14 DMC OG 13-04. Authorized Uses of the Government Information Technology (IT) Network Automated Information System (AIS)

9.4.15 DMC OG 13-05. Information Technology Help Desk Customer Support

9.4.16 DMC OG 13-07. Personal Passwords

9.4.17 DMC OG 13-08. Information Technology Requisitions

9.4.18 Note that OGs 13-3, 13-4, 13-5, 13-7 and 13-8 do not apply to IT equipment listed as GFE Support Equipment on Attachment 4.

9.5 CONTRACT SUPPORT STAFF. A staff of an appropriate size and mixture of skills shall directly support the on-site manager.

9.5.1 KEY MANAGERIAL TASKS. The Contractor shall plan, organize, schedule, direct, coordinate, and control the resources required to perform the contract as outlined below. The Contractor shall manage all operational areas in the contract.

9.5.1.1 QC TASKS. Establish a QC function to continuously evaluate the efficiency and effectiveness of all areas of operation to assure the optimum utilization and control of resources (see paragraph 8.13).

9.5.1.2 EFFICIENCY. Coordinate all areas to ensure effective communication and efficient use of resources.

9.5.1.3 COORDINATION WITH GOVERNMENT. Coordinate with DMC and DVIC technical personnel to ensure effective communication and to assure smooth contract interface.

9.5.1.4 IMPROVEMENT. Recommend and propose methods to improve the management operational interface of the AVM function.

9.6 FINANCIAL MANAGEMENT (PURCHASING). The Contractor shall operate and maintain a Financial Information System (FIS) approved by the KO, which will assist the Government in tracking maintenance costs, preparing budgets, and maintaining Government financial records.

9.6.1 SCOPE OF FINANCIAL MANAGEMENT. Financial management involves the fiscal management of all manpower, materials, equipment, and methods that ensure an effective operation. Included in this management is fiscal planning and control of support activities inherent to the normal DMC, NMC-DTS and DVIC AVM operations.

9.6.2 FINANCIAL INFORMATION SYSTEMS. The Contractor shall maintain three separate financial information systems, one each for DMC, NMC-DTS and DVIC which provides data for budgeting and cost accounting so as to support effective and economical planning, scheduling cost and technical performance. The system shall provide, at a minimum, the following information.

9.6.2.1 EXPENDITURES ON EQUIPMENT. A continuous record of expenditures for labor, material, and parts expended on each individual end-item of equipment.

9.6.2.2 USE OF VOUCHERS. The Contractor shall voucher the Government for payment the cost accrued under the heading of DMC, NMC DTS and/or DVIC for the services rendered IAW CDRL DI 0.

9.6.2.3 EXPENDITURES ON PARTS. A continuous record of expenditures for spares, spare parts, sub-assemblies, and spare printed circuit boards itemized to include, but not limited to, the following: part number, item nomenclature, item cost, and end-item or job order application.

9.6.3 EXPENDITURES. The Contractor shall purchase material, equipment, and services not provided as GFE. Purchased materials and equipment shall be owned by the Government and voucher to the Government at the time of contractor receipt from suppliers. This material, equipment and services include, but are not limited to, spares, sub-assemblies, spare printed circuit boards, repair parts and any other necessary material.

9.6.3.1 SHIPPING AND RECEIVING. Materials purchased by the Contractor for delivery to DMC shall be coordinated with DVIC Supply and Receiving personnel for the delivery of the material. DVIC Supply and Receiving personnel receive all material entering the DMC facility.

9.6.3.2 DAILY OPERATION PURCHASES. The Contractor shall purchase equipment, material and services for the daily operation of the AVM function at DMC, NMC-DTS and DVIC.

9.6.3.3 UTILIZATION OF EXCESS GOVERNMENT PROPERTY. The Contractor shall maximize the utilization of excess Government property in support of this task.

9.6.3.4 COMPETITIVE SOURCING REQUIREMENTS. All purchases or contracts for any individual service or equipment exceeding \$10,000.00 for DMC and \$2,000 for DVIC shall be

submitted to the Contracting Officer for review and approval. The Contractor shall secure two or more "competitive" bids for all items or services exceeding \$2,500 or prepare a justification why competition cannot be obtained. Contractor must retain all documentation related to the competitive bids obtained for each purchase.

9.6.3.5 RECORD AVAILABILITY. The records set forth herein shall be made available to the Government at all times. The Contractor shall prepare and submit a Contract Costs Status Report IAW CDRL DI No. 009.

9.7 PROPERTY ADMINISTRATION AND ACCOUNTABILITY. The Contractor shall account for all Government property used or held by the Contractor in accordance with FAR 45.5. The Contractor's records shall be current, accurate, and sufficient to determine the amount, status, value, location, and condition of non-expendable property at all times. This shall include performing physical inventories of a type and frequency approved by the COR. The Contractor shall prepare and submit procedures the Contractor develops under this task must cover all Government property used in all other tasks.

9.7.1 REQUIREMENT TO TRACK GFE. The Contractor shall be responsible for tracking, cataloging, and maintaining the official Government records of all GFE in DPAS. In addition, the Contractor shall be responsible for tracking all Government Equipment to be maintained under this contract and shall ensure that the DMC and DVIC Property Book Officer has access to these records as well. The Contractor shall use a system that identifies and differentiates between DMC, NMC DTS and DVIC maintained equipment. The Government will audit the Contractor periodically to ensure that adequate records are being maintained. The Contractor shall determine what system of automated property management to use subject to the approval of the KO. The Contractor shall ensure that the COR and DMC and DVIC Property Book Officer have unlimited, read only access to the Contractor's property management system.

9.7.1.1 Change In Property Book Status Report. The contractor shall submit to the Government on the first business day of the month by midday any additions or deletions to end items of attachments 2, 3, 4, 5 and 6 that occurred during the previous month. The report shall identify DMC, NMC DTS and DVIC end items. Report submission shall be IAW CDRL DI No. 011.

9.7.2 EXCESS GFE AND GOVERNMENT EQUIPMENT. The Contractor shall promptly identify excess GFE or other Government equipment and specify whether the property is in excess to current or future requirements, or that there is a known or reasonably certain future need for the property and, if required, prepare documentation for turn-in. In addition, the Contractor shall:

9.7.2.1 DAMAGED EQUIPMENT. Report damage or destruction of GFE or other Government equipment to the COR immediately.

9.7.2.2 LOST EQUIPMENT. Report loss of Government property within 48 hours of discovery and submit appropriate documents to the COR.

9.7.2.3 CANNIBALIZATION OF EQUIPMENT. Refer all requests for cannibalization to the COR for approval.

9.7.2.4 EXPENDABLE SUPPLIES. Monitor and control consumption of expendable Government supplies.

10.0 PHASE-OUT PERIOD. The phase-out period shall be completed in accordance with contract clauses FAR 52.237-3, entitled "Continuity of Services"

Attachment 7
Award Fee Evaluation Plan

1. Introduction. This Award Fee Evaluation Plan presents the criteria to be used by the Defense Media Center (DMC) when evaluating the contractor's performance under this contract. In addition, the plan outlines the procedures for an assessment of that performance to the Fee Determining Official. Any fee determination made by the Fee Determining Official will not be subject to the Disputes Clause of this contract.

2. Organization. The organizations responsible for the Award Fee process are:

a. The Award Fee Determining Official (FDO) is the Director, Capital Investments. The FDO will be assisted by an Award Review Board (ARB). The organization and membership of the board is shown in Annex 1.

b. The Contracting Officer will implement the award fee contractual actions. The FDO will appoint evaluators who will monitor contractor performance and make the initial evaluation of that performance for each evaluation period. These evaluators will be assigned specific performance criteria categories (i.e. quality assurance, purchasing, material control, etc.) to evaluate. They will submit evaluation reports, as required, to the ARB.

3. Award Fee Process. The award fee process will consist of the following:

a. Continual evaluation by the designated evaluators.

b. Consolidation of the evaluators' input by an assigned recorder for presentation to the ARB.

c. Evaluation by the ARB.

d. Presentation by the Chairperson, ARB, to the FDO with a recommendation of an award fee amount to be paid to the contractor.

e. FDO determines what amount will be paid.

f. FDO sends a letter informing the contractor of the amount that has been approved for payment.

Contractual action by the Contracting Officer (CO) to implement the FDO's decision.

4. Award Review Board. An appointee designated by Executive Director, DMC will chair the ARB and will have the following duties:

a. Nominating board members and submitting their names to the FDO for approval.

b. Establishing dates and times to convene the ARB to consider information submitted by the following sources:

**Attachment 7
Award Fee Evaluation Plan**

- (1) Initial evaluations submitted by the Quality Assurance Evaluators (QAE).
- (2) Assessment of formal and informal inputs from AV equipment users and their supervisors.
- (3) Contracting Officer Representatives (COR) appointed by the CO.
- (4) A written self-assessment of performance if submitted by the contractor to the chairperson through the CO for each evaluation period under consideration.
- (5) An oral assessment by the contractor, if requested by the CO, prior to the ARB meeting.
- (6) Any other pertinent information that is received from DMC personnel which has any bearing on the contractor's performance during the period being considered.

c. After receiving the presentations listed above and reviewing all available information, the ARB members will individually vote on each criteria category.

5. Frequency of Evaluations and Award Fee Determination. The ARB will normally complete its evaluation and make a recommendation to the FDO within three weeks following the close of the evaluation period. The FDO will normally make an award fee determination within one week following the ARB recommendation. The CO will appropriately modify the contract within two weeks after this award fee determination has been made. Receipt of a contract modification will formalize the contractor's notification of the amount of award fee earned for the period considered.

6. Fee Allocations by Evaluation Period (Basic Contract). The award fee earned by the contractor will be determined at the completion of the evaluation periods shown below. The percentage for each evaluation period will be the maximum amount that can be earned during the period and will be computed and expressed in dollars. Any portion of the award fee for an evaluation period that is not earned and awarded for that particular period is not transferable forward to a subsequent evaluation period.

Evaluation Period	From	To	Award Fee Available
First	1 Sep 04	30 Nov 04	25%
Second	1 Dec 04	29 Feb 05	25%
Third	1 Mar 05	31 May 05	25%
Fourth	1 Jun 05	31 Aug 05	25%

7. Performance Criteria Categories.

**Attachment 7
Award Fee Evaluation Plan**

a. The performance evaluation areas listed below will be evaluated using the performance criteria categories with their corresponding percentage weights set forth below (further defined in Annex 3).

- (1) Audio/video maintenance 50%
- (2) Audio/video maintenance support 25%
- (3) Contract management and administration 25%

b. The same areas listed for the preceding award fee evaluation period will be used in the next immediate period unless the CO gives prior notice to the contractor in writing that there will be a change in any evaluation area or the value of any existing area. However, subsequent evaluation period performance evaluation criteria may require greater or lesser emphasis and other performance evaluation criteria may surface as the effort becomes clearer or as emphasis shifts. Any changes to performance evaluation criteria and/or percentage weights for each area will be made by revising Annex 2, to apply prospectively and by the CO advising the contractor, in writing, prior to the start of the evaluation period that will be affected by the change. After commencement of the evaluation period, changes may only be made by mutual agreement between the contractor and the government.

c. The contractor will earn an award fee by achieving a level of effectiveness in each area in accordance with the award fee standards set forth below:

Rating Description	Point Range	Percentage of Award Fee
Excellent	91-100	91-100
Very Good	81-90	81-90
Good	65-80	65-80
Satisfactory	51-64	51-64
Unsatisfactory	0-51	0

8. Award Fee Evaluation Process, Specific Responsibilities.

a. Quality Assurance Evaluators (QAE) will maintain a continuous written record of the contractor's performance in their evaluation areas of responsibility.

(1) The QAE will also use the contractor's self-assessment review in their own evaluation process. If the contractor chooses to submit said assessment, it shall be provided to the COR within three working days after the end of the award fee period.

(2) Normally within five working days following each evaluation period, the ARB recorder will request that the evaluation monitors review the back-up material and submit an evaluation report which will grade the contractor in performance criteria categories, covering strong and weak performance. They are

Attachment 7
Award Fee Evaluation Plan

to characterize, in this report, contractor performance in each area as unsatisfactory, satisfactory, good, very good, and excellent, referring to correspondence, reports, data items, meetings, conversations and other input which demonstrates the contractor's day-to-day performance. The evaluation report will include a recommended award fee rating, using Annex 2 and the sample illustration in Annex 3. Evaluation monitors will maintain close liaison with the contractor through informal discussions for the purpose of advising the contractor of strong and weak performance within the PWS of the contract to date.

(3) Informal records used in preparation of the evaluation report will be retained by the evaluation monitors for six months after completion of the contract in order to support any inquiries by the FDO and may be used to informally discuss weak and strong areas of performance with the Contractor to date.

b. Award Review Board. ARB members are to review the evaluation reports, consider all information from pertinent sources, and arrive at a fee recommendation to be given to the FDO by the ARB chairperson.

c. Fee Determining Official. The FDO is to review the recommendation of the ARB, consider all appropriate data, and advise the contractor and the CO of the award fee determination.

d. Recorder. The recorder is the contract administrator and is a non-voting member of the ARB and must be thoroughly familiar with current award fee policy, guidelines, regulations and government/contractor correspondence pertinent to the award fee process. The recorder is responsible for coordinating the administrative actions required by the QAEs, the ARB and the FDO including:

- (1) Receipt, processing and distribution of evaluation inputs from all required sources.
- (2) Scheduling and assisting with internal evaluation milestones, such as briefings.
- (3) Other actions as required to ensure the smooth operation of the award fee process.

9. Discrepancy Reporting. The chairperson of the ARB will normally hold meetings with the QAEs and the CO at periodic intervals during evaluation periods, at which time the QAEs will point out any performance evaluation area where performance improvement seems to be in order. The contractor will be notified of performance deficiencies and will be required to respond to the CO in a timely manner, setting forth plans for increasing effectiveness in the defective areas or explaining why it is not feasible to do so.

Attachment 7
Award Fee Evaluation Plan

10. **Award Fee Integrity.** The award fee process is recognized to be subjective in nature, but every effort will be made to ensure fairness. The written records of the QAEs, the inputs from other pertinent sources and the contractor's self—assessment of performance in each of the performance evaluation areas provide the checks and balances necessary to assure award fee integrity.

11. **Termination for Convenience.** In the event the contract is terminated for the convenience of the government, the remaining award fee payable will be a matter of equitable adjustment in accordance with the termination clause of the contract.

Attachment 7
Award Fee Evaluation Plan

ANNEX 1

AWARD REVIEW BOARD MEMBERSHIP AND ADVISORS

1. Designated by Executive Director-DMC Chairperson
2. DMC General Counsel - Member
3. Chief, Broadcast Engineering - Member
4. Contracting Officer – Member

**Attachment 7
Award Fee Evaluation Plan**

ANNEX 2

PERFORMANCE CRITERIA CATEGORIES AND THE RATING METHODOLOGY

The performance criteria categories shall be rated using the following rating methodology.

RATING METHODOLOGY

Adjective Rating	Adjective Definition	Percent Range
Excellent	Performance is, in most respects, approaching the best that could be performed by a qualified contractor and greatly exceeds the required performance level. Areas of deficiency are few and relatively unimportant.	91-100
Very Good	Performance is substantially above the required performance level, with only a few deficiencies.	81-90
Good	Performance exceeds the minimum required. Areas of deficiency may be offset by better performance in other areas.	65-80
Satisfactory	The minimum required performance is met. Areas of deficiency may be off-set by better performance in other areas.	51-64
Unsatisfactory	The contractor's overall performance is less than the minimum required.	0-50

Attachment 7
Award Fee Evaluation Plan

ANNEX 3

PERFORMANCE CRITERIA CATEGORIES

I. AUDIO/VIDEO MAINTENANCE

1. Maintains and Repairs Existing Equipment and Systems
 - a. Contractor ensures existing equipment meets manufacturer's recommended operational and technical specifications.
 - b. Contractor ensures existing broadcast plant configuration meets broadcast industry standards.
 - c. Contractor monitors AFRTS and DTS return satellite signals for quality, monitors cue transmissions, and data reception and transmission.
 - d. Contractor investigates satellite network failures to point of origin. Contacts satellite gateways of both SatNet and DTS networks to determine regional transmission interruptions / failures.
2. Maintains and Repairs New Equipment
 - a. Contractor ensures new equipment is installed correctly and subsequently meets manufacturer's recommended operational and technical specifications.
 - b. Contractor ensures new system and plant configurations meet broadcast industry operational and technical specifications.
3. Perform Satellite Network Testing
 - a. Contractor performs broadcast plant and systems testing to ensure plant and system are operating to broadcast industry standards.
 - b. Contractor performs satellite network testing as scheduled and verify transmitted test parameters via the satellite return signal. Ensures proper coordination with operational managers.
4. Production Control
 - a. Ensures production control, job order, maintenance scheduling, and repair activities are coordinated and result in minimum interruption to the mission of AFRTS-BC.
5. Emergency Facilities Support
 - a. Contractor provides support for facilities related emergency situations, which may occur outside of normal hours of operation.
6. Test Equipment Calibration
 - a. Contractor ensures all test equipment is calibrated in accordance with manufacturer's recommendations of as required.
7. Contractor adheres to broadcast and electronics industry standards in the performance of all repair and maintenance.

II. AUDIO/VIDEO MAINTENANCE SUPPORT

Attachment 7
Award Fee Evaluation Plan

1. Provide AVM Support and Ensure Mission Accomplishment
 - a. Perform continual, 24-hour per day, seven days per week AV maintenance support on all broadcast and broadcast related equipment and systems covered by this contract.
 - b. Contractor provides technical assistance to affiliates and viewers trying to acquire the AFRTS satellite signal.
 - c. Contractor provides technical assistance to affiliates and viewers with decoder menu setup and authorization.

2. Maintains the Maintenance Management Information System (MIMIS)
 - a. Ensures Maintenance Management Information System is fully operational, accessible and contains required data entries. Contractor shall know the status of all maintenance activity, repair activity, and projects and shall submit reports to the COR as directed.

3. Provide Engineering Design, Analysis, and Evaluation Support
 - a. Provide generalized engineering and design support as directed by the COR.

4. Provide Special Events Support
 - a. Contractor shall provide support for special events as directed by the COR.

5. Technical Library and databases
 - a. Contractor maintains all equipment operating, reference, and technical manuals and software copies for all equipment and systems under the service contract.
 - b. Contractor maintains the AFRTS integrated receiver decoder database. Contractor updates field information within the database, authorize and disable decoders, and sets the program tier.

6. Quality Control Program
 - a. Contractor shall maintain a quality control program, which meets the requirements of the contract.

7. Safety and Hazardous Waste Procedures
 - a. Contractor shall meet industry safety and hazardous waste standards.

8. Training for Contractor Personnel
 - a. Contractor shall ensure an adequately trained technical staff is available at all times.

9. Material and Stock Level Control
 - a. Material Control System shall provide for the control of ordering, stocking and supply accounting for maintenance and repair materials.

III. CONTRACT MANAGEMENT AND ADMINISTRATION

1. Maintenance Operating Procedures
 - a. Contractor ensures Maintenance Operating Procedures are applicable to equipment being maintained and updated on a timely basis.

2. Maintains and Updates Schedules, Lists, Drawings and All Applicable Data
 - a. Contractor shall provide the COR with updates to all data changes as directed.

Attachment 7
Award Fee Evaluation Plan

- b. Contractor shall update drawings as soon as practical and maintain a master set of drawings with pen and ink changes until the broadcast facility drawing is updated.
3. **Contract Management**
- a. Provide overall management for contractor operations including all aspects of contract, operations, property, personnel, and financial management and administration.
 - b. Corrects reported contract deficiencies in an effective and timely manner.
4. **Financial Management and Purchasing**
- a. Contractor shall maintain a Financial Information System and shall provide adequate fiscal planning, management, and controls over expenditures and costs.
5. **Contract Administration**
- a. Contractor properly prepares correspondence, documentation, company positions in accordance with the contract, FAR, current laws, and regulations.
6. **Property Administration and Accountability**
- a. Maintains accurate property records. Properly identifies all property in accordance with FAR Subpart 45.5. Conduct inventories as scheduled and promptly record results.

Attachment 8
Performance Requirements Summary

Required Service	Paragraph Number	Standard	Method of Surveillance
Provide AVM support and insure mission accomplishment	1.3.1 7.1 8.1	Perform continual, 24 hour a day, seven days per week AV maintenance support on all AV equipment covered by this contract	Daily monitoring
Maintain and repair existing equipment, broadcast systems and broadcast plant configuration	3.1.10 3.4.2.1 8.11	Contractor insures equipment and systems meet manufacturer's recommended operational and technical specifications and broadcast plant conforms to broadcast industry standards	Periodic inspection
Monitor AFN and DTS return satellite signal	1.2.9.1 8.19.2	Contractor monitors radio, television and data transmitted signals from the domestic satellite, return signal for quality compared to broadcast industry standards	Daily monitoring
Investigate AFN and DTS satellite network failures	8.19.2	Contractor determines point of failure of the AFN satellite network and monitor the restoration progress until the service is restored	Situational inspection
Maintain and repair new equipment and systems	8.2 8.4.2	Contractor insures new equipment and systems are installed correctly, and subsequently, meets manufacturer's recommended operational and technical specifications and meets broadcast industry standards	Periodic and situational inspections
Maintain broadcast plant operation to broadcast industry standards	3.1.10 3.4.2.1 8.11	Contractor insures broadcast plant operation for radio, television, and data meet broadcast industry standards	Periodic inspection
Perform satellite network tests	8.6 8.11	Contractor conducts satellite network tests and insures test signals employed in testing individual channels meet broadcast industry standards, Verifies satisfactory test transmissions though the AFN return signal	Situational inspection

Attachment 8
Performance Requirements Summary

Required Service	Paragraph Number	Standard	Method of Surveillance
Production Control	8.8 8.8.1 8.8.2	Contractor insures production control, job orders, maintenance and installation scheduling and repair activities are coordinated and result in minimum interruption to the mission of the DMC, DVIC and DTS	Periodic review and inspection of procedures and schedules
Emergency facility support	8.9	Contractor provides facility related support during causalities or emergencies, which occur outside of normal hours of operation	Situational inspection
Test equipment calibration	3.2.6 8.10	Contractor maintains all test equipment and insures test equipment assigned to a calibration program to maintain reliability and necessary accuracy	Weekly inspection
Provide technical assistance to affiliates and viewers to acquire the AFN satellite signal	1.2.9 3.1.2.3.1 7.8 8.19 8.19.1 8.20	Contractor assists affiliate and viewer with satellite antenna set-up information and provides guidance to acquire the AFN signal	Situational inspection
Authorized decoders and provide decoder menu set-up assistance	1.2.9 8.19 8.19.1 8.20	Contractor authorizes decoders, makes appropriate entries, and instructs customers on decoder menu set-up	Daily monitoring with monthly inspection of database entries
Maintain the Maintenance Management Information System (MMIS)	3.4.2.2 7.5 8.2 8.3	Contractor insures MMIS is operational and utilized to store historical data. Insures reports are provided to the COR as required.	Periodic or situational inspection; not more frequently than weekly
Provide engineering design, analysis, and evaluation support	7.2 8.4 8.4.1	Contractor provides engineering design, analysis, and evaluation support as directed by the COR	Review design, analysis, and evaluation reports as required
Provide special events support	1.3.2 8.5	Contractor provides AV support during special events as directed by the COR	Situational inspection with input from event organizers

Attachment 8
Performance Requirements Summary

Required Service	Paragraph Number	Standard	Method of Surveillance
Maintain technical library and operating system software	8.12	Contractor maintains all operational, technical and reference manuals, operation system and application software, to include revisions and patches	Periodic and situational inspection not to exceed more than once a week
Maintain ARN Integrated Receiver Decoder (IRD) database	8.19 8.19.1	Contractor maintains and updates IRD database as soon as a change and or authorization of an IRD is requested	Periodic inspection
Exercise quality control program	8.13 8.13.1.2 8.13.1.3 8.13.1.4 8.13.2	Contractor maintains a quality control program, which addresses the requirement of this contract and meets acceptable quality levels	Periodic inspection
Comply with safety and hazardous waste procedures	8.14	Contractor complies with federal, state, and local safety standards and provide Material Safety Data Sheets (MSDS) for all hazardous materials in use under this contract by the contractor	Periodic inspection
Provide adequately trained personnel	3.1.3 8.15 9.5	Contractor provides adequately trained technical personnel at all times	Periodic inspection and review of personnel qualifications during hiring
Maintain material and stock levels for maintenance and repair of equipment	7.5 8.18 8.18.4 8.18.5	Contractor maintains material and spare parts stock levels in sufficient quantities to support on going maintenance operations	Periodic inspection but not to exceed a monthly inspection
Maintain maintenance operating procedures	8.7	Contractor establishes and maintains maintenance operating procedures applicable to equipment being maintained and updated as required	Quarterly inspection or when new change submitted for approval
Maintains and updates applicable databases, schedules, and lists	3.4.2.2 7.3 7.5 8.2 8.3 8.16	Contractor maintains and updates applicable files and drawings and submits updates to the COR as directed	Quarterly inspection

**Attachment 8
Performance Requirements Summary**

Required Service	Paragraph Number	Standard	Method of Surveillance
Maintains and updates drawings and maintains master set of drawings with pen and ink changes	7.3 7.3.1 7.3.2 7.3.3 7.3.4	Contractor maintains master set of drawings with pen and ink changes until broadcast facility drawings are updated. Contractor maintains duplicate copies of drawings within the facility per contract	Periodic inspection of updates. Situational inspection of pen and ink changes to master drawings
Controls and tracks equipment repair status and maintenance activities	8.3 8.8 8.8.2 8.17	Contractor maintains status of all maintenance, repair and project activities and submits reports to the COR as directed	Reviews reports, schedules and MMIS on a daily basis
Provide contract management	9.0 9.1 9.2.1	Contractor provides overall management for contract operations to include all aspects of this contract, operations, property, personnel and financial management and administration	Records, reports and daily monitoring
Respond to deficiency reports	9.2.4	Contractor provides a timely response to deficiency reports	Situational reports
Provide financial management and purchasing	9.6 9.6.1 9.6.2 9.6.2.1 9.6.2.2 9.6.2.3	Contractor maintains a financial information system that incorporates fiscal planning, management, and control over expenditures and cost	Periodic inspection and audits as situation requires but not more than monthly
Provide contract administration	9.7.2 9.7.2.1 9.7.2.2	Contractor prepares correspondence, documentation, company position briefs in accordance with the contract, FAR, currently laws, and regulations	Review of documents and reports as submitted
Provide property administration and accountability	9.7	Maintains accurate property records, identifies all property in accordance with FAR subpart 45.5, and conducts required inventories and promptly records results	Periodic and situational inspection but not more than weekly

CONTRACT DATA REQUIREMENTS LIST						Form Approved OMB No. 0704-0188		
The public reporting burden for this collection of information is estimated to average 340 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Service and Communications Directorate (0704-0188). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please do not return your form to the above organization. Send completed form to the Government Printing Office for the Contract/PR No. listed in Block E.

99730	- Vending Machine Repairer	19.14
99740	- Vending Machine Repairer Helper	12.82

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: Life, accident, and health insurance plans, sick leave, pension plans, civic and personal leave, severance pay, and savings and thrift plans.

Minimum employer contributions costing an average of \$2.56 per hour computed on the basis of all hours worked by service employees employed on the contract.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; 3 weeks after 5 years; and 4 weeks after 15 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year: New Year's Day, Martin Luther King, Jr.'s Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved. (See 29 CFR 4.174)

THE OCCUPATIONS WHICH HAVE PARENTHESES AFTER THEM RECEIVE THE FOLLOWING BENEFITS (as numbered):

1) Does not apply to employees employed in a bona fide executive, administrative;

or professional capacity as defined and delineated in 29 CFR 541. (See CFR 4.156)

2) **APPLICABLE TO AIR TRAFFIC CONTROLLERS ONLY - NIGHT DIFFERENTIAL:** An employee is entitled to pay for all work performed between the hours of 6:00 P.M. and 6:00 A.M. at the rate of basic pay plus a night pay differential amounting to 10 percent of the rate of basic pay.

3) **WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY:** If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 8pm and 6am. If you are a full-time employee (40 hours a week) and Sunday is part of your regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 15% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance, explosives, and incendiary materials. This includes work such as screening, blending, drying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead oxide, black powder and photoflash powder. All dry-house activities involving propellants or explosives, dealliteration, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regrading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

**** NOTES APPLYING TO THIS WAGE DETERMINATION ****

Source of Occupational Title and Descriptions:

The duties of employees under job titles listed are those described in the "Service Contract Job Directory of Occupations," Fourth Edition, January 1993, as amended by the Third Supplement, dated March 1997, unless otherwise indicated. This publication may be obtained from the Superintendent of Documents, at 202-783-3238, or by writing to the Superintendent of Documents, U.S. Government Printing Office,

Washington, D.C. 20402. Copies of specific job descriptions may also be obtained from the appropriate contracting officer.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE (Standard Form 1444 (SF 1444))

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. (See Section 6.6 (C) (vi)). When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed (occupation) and computes a proposed rate.
- 2) After contract award, the contractor prepares a written report listing in order proposed classification title, a Federal grade equivalency (FGE) for each proposed classification, job description, and rationale for proposed wage rate, including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour decision to the contractor.
- 6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination.

Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.

1444-100-0000

CONFORMED CLASSIFICATIONS

The Department of Labor has approved the following labor classifications; and the following wages and fringe benefits entitlements apply for these employees:

<u>TITLE</u>	<u>WAGE</u>
1. Principal Broadcast Engineer	\$32.87
2. Senior Broadcast Engineer	\$27.65
3. Broadcast Engineer	\$23.04
4. Broadcast Technologist	\$19.07

FRINGE BENEFITS

1. The fringe benefits listed in Revision 18 of Wage Determination Number 94-2054 for Health and Welfare, Vacation, and Holiday apply to these employees.
2. **SHIFT DIFFERENTIAL:** An employee is entitled to pay for all work performed on swing shifts, and grave shifts, from 6:00 pm to 6:00 am, at the basic rate of pay plus a night differential pay amounting to 10 percent of the basic rate of pay.
3. **SUNDAY PREMIUM:** An employee is entitled to pay for all work performed on Sunday at the basic rate of pay plus a Sunday Premium for amounting to 25 percent of the basic rate of pay, which is not overtime. An employee will not receive shift differential for a period worked which they receive the Sunday Premium.

PRINCIPAL BROADCAST ENGINEER

A Principal Broadcast Engineer must have at least 20 years of increasingly responsible experience in television engineering in Broadcast Facilities, including 10 years of supervisory and administrative responsibilities. A BE in Electronic engineering or CPBE certification by the Society of Broadcast Engineers (SBE) is required. Must have a valid General Radio Telephone License issued by the Federal Communications Commission, and have a working knowledge of Rules and Regulations relating to radio, telephone, television and satellite broadcast communications as published by the Federal Communications Commission. Must possess strong supervisory skills and a thorough knowledge of broadcast and production equipment and systems. Ability to: successfully organize and manage projects; work effectively with people to achieve organizational goals, work both independently and as a team member; understand and relate to others the maintenance of complex electronic equipment.

Specific performance requirements are:

- a. Must be capable of generating new system designs, specifying equipment and parts required, produce wire tables and facility drawings.
- b. Plan equipment procurement, budget management, installation schedules and manpower requirements.
- c. Perform with the ability to design, breadboard and develop new concepts and designs, recommend design changes, and initiate wire tables and facility drawings. May be required to present new electronic circuit designs, to include PCB layout and final assembly to include system testing of new equipment.
- d. Must be capable of repairing, aligning, and maintaining to NTSC broadcast television standards, digital and analog video systems, satellite decoders, synchronizing generators, computerized video servers, automation systems, and all other peripheral systems and broadcast equipment.
- e. Maintains and repairs broadcast video tape recorders and cameras according to SMPTE and manufacturer's specifications. Is capable of performing all troubleshooting, repairs, and equipment modifications.
- f. Must be able to instruct others and develop lesson plans and course outlines.
- g. Maintains digital noise reduction, and other video refinement systems including video frame synchronizers. Qualified to originate and perform modifications necessary to improve the systems.
- h. Must be competent in the usage and maintenance of digital television equipment in all categories, including video processing, switching and memory systems.
- i. Must possess a thorough knowledge of broad-spectrum RF systems, modulation techniques, antennas and wave propagation, as well as maintenance and operation of satellite communications equipment. Ensures through systems analysis that all RF systems comply with FCC regulations.

Computer knowledge and training should include at a minimum a Novell NetWare Certified Administrator (CNA) or a Novell NetWare Certified Engineer (CNE), or the ability to acquire either within one year from date of hire.

BROADCAST ENGINEER

A Broadcast Engineer is a highly skilled technician with an extensive background in electronics, trained in broadcast technology with five years experience in the broadcast environment working directly in radio or television studios. Must be certified by the Society of Broadcast Engineers (SBE) as a Broadcast Engineer or higher or be prepared to pass SBE certification within six months of hire date. Must have a valid General Radio Telephone License issued by the Federal Communications Commission, and have a working knowledge of Rules and Regulations relating to radio, telephone, television and satellite broadcast communications as published by the Federal Communications Commission.

Additional requirements include a sufficient working knowledge of electronics and training necessary to troubleshoot all major end items to a component level. Completion of professional school training and experience to design, install and troubleshoot complex problems in audio, video and data reception/transmission, and computer data in LAN used in broadcast communications. Must have a dynamic understanding of video waveforms, relating to NTSC Standard RS-170A timing. Must be able to set up test equipment, read, display and understand the traces produced on a waveform monitor, vectorscope and oscilloscopes.

General duties include, but are not limited to, fabricating specialized fiber optic and copper cables and connectors used for radio/television signals and telephone data, to include completion of design and installation of these cables in punch blocks and cabinets. Accomplish repairs using highly sophisticated test equipment and by demonstrating the ability to complete exceptional soldering techniques, produce wiring and cable harnesses, following industry standards for the installation and maintenance of audio and video systems.

Normal duties require comprehension of schematic diagrams, wiring drawings, and blue prints. Performing routine preventative maintenance inspections, certification and calibration of highly sophisticated radio and television broadcast equipment and systems. A working knowledge of computer controlled automation systems in DOS, Windows 95/98 and Unix environments.

Perform duties and assist training others with the installation and maintenance of production switchers, routing switchers, monitors, VTR.s, satellite receivers, CCTV cameras and test equipment used in the Broadcast Center following industry standards using tie wraps, punch down blocks, hand and power tools. This position requires an extensive knowledge of standard safety regulations and precautions and ability to work rotating shifts.

SENIOR BROADCAST ENGINEER

Senior Broadcast Engineers must have ten years experience in broadcasting a Senior Broadcast certification by the Society of Broadcast Engineers (SBE) and possess a valid Federal Communications Commission (FCC) General Radio Telephone License. Supervise and perform maintenance and repair in all areas, keeps abreast with state of the art changes, and displays a continuous desire for perfection in the maintenance of the broadcast facility or station.

Must be able to work with and supervise Broadcast Engineers and Technologists, and have completed lengthy training and experience relating to maintaining all systems in the facility, with a thorough understanding of FCC Rules and Regulations relating to radio, television and satellite broadcast (including NTSC Standards). Demonstrates a high sense of responsibility, devotion to duty and an ability to lead, train, and direct others to include emergency response to assist others in the troubleshooting of equipment. Must possess and demonstrate a professional demeanor in all aspects of performance, including dress and appearance, cooperative attitude, complimentary and effective representation of the company and the Government in all circumstances. Specific performance requirements include:

- a) Repair, align, and maintain, to NTSC broadcast industry standards, digital and analog video systems, satellite decoders, synchronizing generators, computerized video servers, automation systems, and all other peripheral systems and equipment.
- b) Maintains and repairs broadcast video and audio tape recorders according to industry and SMPTE specifications. Performs all troubleshooting, repair and equipment modifications, instructs others in the operation and maintenance of same equipment.
- c) Operates and maintains digital noise reduction, and other video refinement systems including video frame synchronizers. Qualified to originate and install modifications necessary to improve the systems.
- d) Will perform and specialize as an engineering assistant to the chief engineer with the ability to design, bread board and develop new concepts and designs, recommend design changes, and initiate wire tables and facility drawings. Complete PCB layout and final assembly to include systems testing of new equipment Required to present new circuit designs without assistance of engineering personnel. Performs new system's layout, specifying equipment and parts required and producing preliminary or final drawings.
- e) Competent in the usage and maintenance of digital television equipment in all categories, including video processing, switching and memory systems.
- f) Possess thorough knowledge of broad-spectrum RF systems, modulation techniques, antennas and wave propagation, as well as maintenance and operation.
- g) Computer knowledge and training includes, at a minimum, a Novell NetWare Certified Administrator (CNA) or a Novell NetWare Certified Engineer (CNE), or the ability to acquire either within one year from date of hire.

BROADCAST TECHNOLOGIST

A Broadcast Technologist is a skilled technician with a solid background in electronics, with specific training and knowledge in broadcast technology relating to radio and television stations. Must have at least two years experience in the broadcast environment and is certified by the Society of Broadcast Engineers (SBE) as a Broadcast Technologist or possess a valid General Radiotelephone License issued by the Federal Communications Commission. A working knowledge of Rules and Regulations relating to radio, telephone, television and satellite broadcast communications as published by the Federal Communications Commission is required. Candidate must acquire the SBE certification within six months of hire date.

Must have a minimum knowledge of electronics and training necessary to troubleshoot complex problems in audio, video and computer equipment used in broadcast communications to end item level. Must have a good understanding of NTSC Standard, RS-170A and be familiar with traces produced on a waveform monitor, vectorscope or oscilloscopes. Be able to perform basic installations of equipment and systems to include reading and following wiring diagrams to run cables and inter connect wiring, using the proper tools to complete punch down block installation and complete proof of performance tests on all cables and wiring.

General duties include, but are not limited to, fabricate wiring and cable harnesses following industry standards for the installation and maintenance of audio and video systems. Interconnecting specialized copper and fiber optic cables and connectors used with television/radio signals or telephone data. Accomplish troubleshooting and repairs using complex test equipment while demonstrating exceptional soldering techniques.

Normal duties require the ability read and understand wiring drawings, blue prints and perform routine preventative maintenance inspections on broadcast equipment and systems, installation of equipment and cabling to include termination and connection of 50 and 75 ohm systems for audio, video, RF, data and computers.

Performs duties with minimum supervision and is familiar with production switchers, routing switchers, monitors, VTRs, satellite receivers, CCTV cameras and test equipment used in the Broadcast Center. Ability to test both video and audio systems and be willing to work rotating shifts, to include Grave Shift, Day Shift and Swing Shift as directed by the supervisor.

AMC-1 (Very large domestic dishes only)

Location: 103 degrees West

Band: C

Transponder Polarity: Horizontal

Receiver Setting Polarization: "H-fixed"

C-Band frequency: 4.065.75 GHz

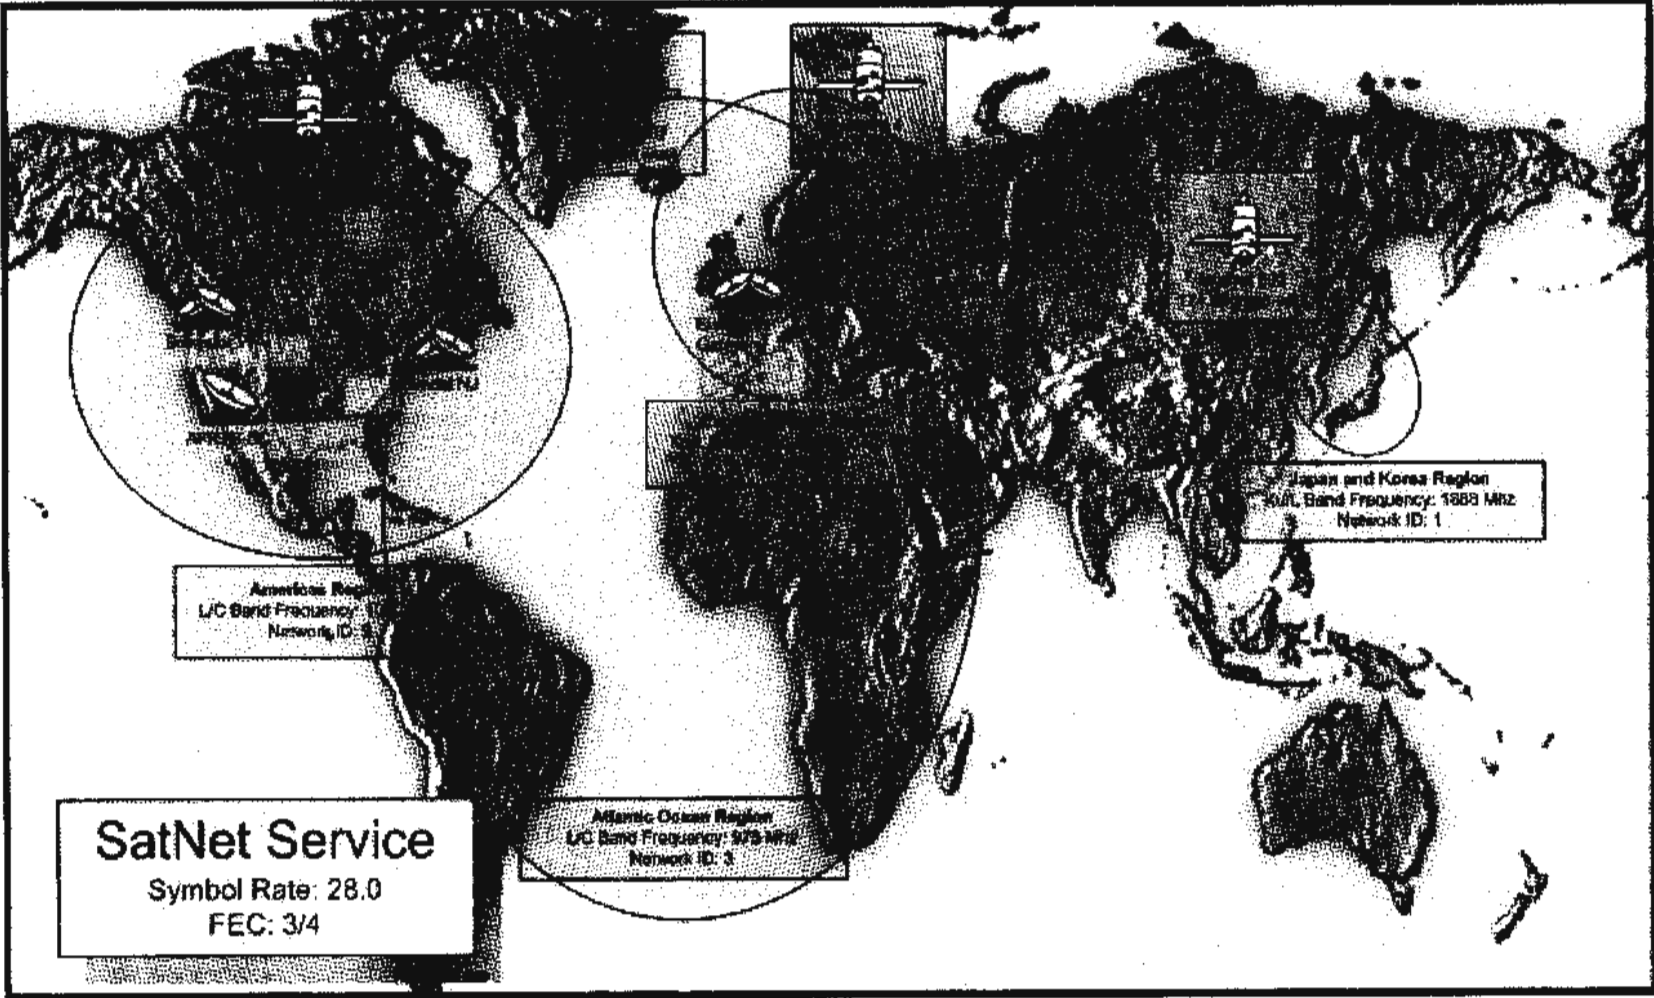

L-Band frequency: 1.084.25 GHz

Network ID 9

Coverage map: <http://www.ses-amricom.com/satellites/amc-1.html>

* **Important note on LNB frequencies:** all C-band LNB's have a local oscillator (L.O.) frequency of 5.150 GHz but Ku-band LNB's may come in many different frequencies typically 9.750 to 12.75 GHz. This means that if you're attempting to watch a Ku-band service you need to set the decoder's frequency using a bit of simple math. The formula to set the Ku-Low/Single L.O. frequency on the AFRTS decoder is the downlink frequency minus the L.O. frequency. As an example the downlink frequency for the Intelsat 802 satellite serving the Japan and Korea Direct to Home service area is 11.6380 GHz. An LNB with a local oscillator frequency of 10.000 GHz would give a Ku Low/Single L.O. frequency of 1638 MHz (1.638 GHz) by working the math problem $11.6380 - 10.000 = 1.638$. The Ku-band satellite serving the European service area is HotBird 4 at 13 degrees east and it has a downlink frequency of 10.775 GHz. Connecting an LNB with a local oscillator frequency of 9.750 would result in a receiver frequency of 1025 MHz ($10.775 - 9.750 = 1.025$ GHz which is 1025 MHz).

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of offer is extended, is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods:
 (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted;
 or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

**13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS.
IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.**

A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.

SUMMARY OF CHANGES

1. The purpose of this modification is to make changes to Attachment 7, Award Fee Evaluation Plan. Modification P00001, dated 28 Dec 2004, removed the DMC General Counsel as a member of the Award Review Board due to an extended TDY; no replacement was immediately available at the time. Legal counsel is now available, and is being reinstated as a member of the Award Fee Review Board with this modification. Therefore, Annex 1 to the Award Fee Evaluation Plan (Award Review Board Membership and Advisors), is hereby replaced in its entirety.

2. All other terms and conditions of the contract remain in full effect.

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION B - SUPPLIES OR SERVICES AND PRICES

1. The purpose of this modification is to increase CLIN 0006 by \$15,000.00 and decrease CLIN 0007 by \$15,000.00. The reason for this change is for administrative purposes. Upon exercise of the current option year, this funding had to stay in place until outstanding purchase orders had been paid from year 2, as specific costs were not known at the time. The estimated price for CLINs 0006 through 0009, excluding award fee, remains at \$2,615.894.00.
2. All other terms and conditions remain in full effect.

CLIN 0006

The estimated/max cost has increased by \$15,000.00 from \$2,420,714.00 to \$2,435,714.00.

The total cost of this line item has increased by \$15,000.00 from \$2,526,694.00 to \$2,541,694.00.

CLIN 0007

The unit price amount has decreased by \$15,000.00 from \$65,400.00 to \$50,400.00.

The total cost of this line item has decreased by \$15,000.00 from \$65,400.00 to \$50,400.00.

The option status has changed from Option to Option Exercised.
The SIC code 3663 has been added.
The MDAP/MAIS Code 000 has been added.

CLIN 0020

The option status has changed from Option to Option Exercised.
The SIC code 3663 has been added.
The MDAP/MAIS Code 000 has been added.

CLIN 0021

The option status has changed from Option to Option Exercised.

SECTION G - CONTRACT ADMINISTRATION DATA

Accounting and Appropriation

Summary for the Payment Office

As a result of this modification, the total funded amount for this document was increased by \$2,809,376.00 from \$10,709,955.28 to \$13,519,331.28.

CLIN 0018:

AX: 1781810 82K0 253 SAS06 0 068342 2D 000000 K00010000000 was increased by \$100,000.00 from \$0.00 to \$100,000.00

The contract ACRN AX has been added.

AW: 5783400 308 15N1 AMHGBG 040000 59200 88711F 667100 F67100 was increased by \$142,051.00

from \$0.00 to \$142,051.00

The contract ACRN AW has been added.

AU: 9780100.4101 2165 2515 012133 VALA97 DIAC86629 was increased by \$2,262,357.00 from \$0.00 to \$2,262,357.00

The contract ACRN AU has been added.

AV: 9780100.4101 2320 2525 012133 VALA97 DIAC82025 was increased by \$215,768.00 from \$0.00 to \$215,768.00

The contract ACRN AV has been added.

CLIN 0019:

AV: 9780100.4101 2320 2525 012133 VALA97 DIAC82025 was increased by \$54,000.00 from \$0.00 to \$54,000.00

The contract ACRN AV has been added.

AU: 9780100.4101 2165 2515 012133 VALA97 DIAC86629 was increased by \$11,400.00 from \$0.00 to \$11,400.00

The contract ACRN AU has been added.

CLIN 0020:

AU: 9780100.4101 2165 2515 012133 VALA97 DIAC86629 was increased by \$15,800.00 from \$0.00 to \$15,800.00

The contract ACRN AU has been added.

AV: 9780100.4101 2320 2525 012133 VALA97 DIAC82025 was increased by \$8,000.00 from \$0.00 to \$8,000.00

The contract ACRN AV has been added.

13072 - Photographer II	17.67
13073 - Photographer III	24.13
13074 - Photographer IV	32.91
13075 - Photographer V	39.80

13110 - Video Teleconference Technician	16.59
14000 - Information Technology Occupations	
14041 - Computer Operator I	16.30
14042 - Computer Operator II	18.23
14043 - Computer Operator III	21.74
14044 - Computer Operator IV	24.69
14045 - Computer Operator V	27.33
14071 - Computer Programmer I (1)	22.37
14072 - Computer Programmer II (1)	
14073 - Computer Programmer III (1)	
14074 - Computer Programmer IV (1)	
14101 - Computer Systems Analyst I (1)	
14102 - Computer Systems Analyst II (1)	
14103 - Computer Systems Analyst III (1)	27.62
14150 - Peripheral Equipment Operator	16.30
14160 - Personal Computer Support Technician	24.69
15000 - Instructional Occupations	
15010 - Aircrew Training Devices Instructor (Non-Rated)	33.42
15020 - Aircrew Training Devices Instructor (Rated)	38.51
15030 - Air Crew Training Devices Instructor (Pilot)	46.16
15050 - Computer Based Training Specialist / Instructor	33.42
15060 - Educational Technologist	33.04
15070 - Flight Instructor (Pilot)	46.16
15080 - Graphic Artist	22.59
15090 - Technical Instructor	20.32
15095 - Technical Instructor/Course Developer	24.85
15110 - Test Proctor	18.40
15120 - Tutor	18.40
16000 - Laundry, Dry-Cleaning, Pressing And Related Occupations	
16010 - Assembler	9.11
16030 - Counter Attendant	9.11
16040 - Dry Cleaner	11.69
16070 - Finisher, Flatwork, Machine	9.11
16090 - Presser, Hand	9.11
16110 - Presser, Machine, Drycleaning	9.11
16130 - Presser, Machine, Shirts	9.11
16160 - Presser, Machine, Wearing Apparel, Laundry	9.11
16190 - Sewing Machine Operator	12.57
16220 - Tailor	13.42
16250 - Washer, Machine	9.89
19000 - Machine Tool Operation And Repair Occupations	
19010 - Machine-Tool Operator (Tool Room)	18.83
19040 - Tool And Die Maker	21.70
21000 - Materials Handling And Packing Occupations	
21020 - Forklift Operator	14.58
21030 - Material Coordinator	20.13
21040 - Material Expediter	20.13
21050 - Material Handling Laborer	16.24
21071 - Order Filler	14.17
21080 - Production Line Worker (Food Processing)	14.58
21110 - Shipping Packer	14.79
21130 - Shipping/Receiving Clerk	14.79
21140 - Store Worker I	10.87
21150 - Stock Clerk	15.52
21210 - Tools And Parts Attendant	14.58

21410 - Warehouse Specialist	14.58
23000 - Mechanics And Maintenance And Repair Occupations	
23010 - Aerospace Structural Welder	27.91
23021 - Aircraft Mechanic I	26.83
23022 - Aircraft Mechanic II	28.31
23023 - Aircraft Mechanic III	29.39
23040 - Aircraft Mechanic Helper	18.96
23050 - Aircraft, Painter	24.00
23060 - Aircraft Servicer	21.46
23080 - Aircraft Worker	22.69
23110 - Appliance Mechanic	21.20
23120 - Bicycle Repairer	13.98
23125 - Cable Splicer	26.38
23130 - Carpenter, Maintenance	26.57
23140 - Carpet Layer	21.25
23160 - Electrician, Maintenance	27.10
23181 - Electronics Technician Maintenance I	24.06
23182 - Electronics Technician Maintenance II	25.62
23183 - Electronics Technician Maintenance III	27.21
23260 - Fabric Worker	18.26
23290 - Fire Alarm System Mechanic	19.16
23310 - Fire Extinguisher Repairer	16.63
23311 - Fuel Distribution System Mechanic	25.32
23312 - Fuel Distribution System Operator	19.51
23370 - General Maintenance Worker	18.99
23380 - Ground Support Equipment Mechanic	26.83
23381 - Ground Support Equipment Servicer	21.46
23382 - Ground Support Equipment Worker	22.69
23391 - Gunsmith I	16.08
23392 - Gunsmith II	19.09
23393 - Gunsmith III	21.54
23410 - Heating, Ventilation And Air-Conditioning Mechanic	23.79
23411 - Heating, Ventilation And Air Contditioning Mechanic (Research Facility)	
25.44	
23430 - Heavy Equipment Mechanic	25.21
23440 - Heavy Equipment Operator	26.88

28690 - Swimming Pool Operator	18.32
29000 - Stevedoring/Longshoremen Occupational Services	
29010 - Blocker And Bracer	20.91
29020 - Hatch Tender	20.91
29030 - Line Handler	20.91
29041 - Stevedore I	19.41
29042 - Stevedore II	22.51
30000 - Technical Occupations	
30010 - Air Traffic Control Specialist, Center (HFO) (2)	37.58
30011 - Air Traffic Control Specialist, Station (HFO) (2)	25.91
30012 - Air Traffic Control Specialist, Terminal (HFO) (2)	28.54
30021 - Archeological Technician I	21.21
30022 - Archeological Technician II	21.82

30023 - Archeological Technician III	31.10
30030 - Cartographic Technician	31.23
30040 - Civil Engineering Technician	26.50
30061 - Drafter/CAD Operator I	22.40
30062 - Drafter/CAD Operator II	25.20
30063 - Drafter/CAD Operator III	27.98
30064 - Drafter/CAD Operator IV	34.44
30081 - Engineering Technician I	18.14
30082 - Engineering Technician II	20.37
30083 - Engineering Technician III	22.78
30084 - Engineering Technician IV	28.23
30085 - Engineering Technician V	34.88
30086 - Engineering Technician VI	41.77
30090 - Environmental Technician	25.20
30210 - Laboratory Technician	21.03
30240 - Mathematical Technician	29.46
30361 - Paralegal/Legal Assistant I	19.44
30362 - Paralegal/Legal Assistant II	25.20
30363 - Paralegal/Legal Assistant III	30.82
30364 - Paralegal/Legal Assistant IV	37.29
30390 - Photo-Optics Technician	27.79
30461 - Technical Writer I	21.70
30462 - Technical Writer II	26.54
30463 - Technical Writer III	32.45
30491 - Unexploded Ordnance (UXO) Technician I	23.88
30492 - Unexploded Ordnance (UXO) Technician II	28.90
30493 - Unexploded Ordnance (UXO) Technician III	34.61
30494 - Unexploded (UXO) Safety Escort	23.88
30495 - Unexploded (UXO) Sweep Personnel	23.88
30620 - Weather Observer, Combined Upper Air Or Surface Programs (2)	23.99
30621 - Weather Observer, Senior (2)	26.64
31000 - Transportation/Mobile Equipment Operation Occupations	
31020 - Bus Aide	12.25
31030 - Bus Driver	18.76
31043 - Driver Courier	11.87
31260 - Parking and Lot Attendant	8.95
31290 - Shuttle Bus Driver	12.95
31310 - Taxi Driver	10.82
31361 - Truckdriver, Light	12.95
31362 - Truckdriver, Medium	20.02
31363 - Truckdriver, Heavy	21.24
31364 - Truckdriver, Tractor-Trailer	21.24
99000 - Miscellaneous Occupations	
99030 - Cashier	12.13
99050 - Desk Clerk	11.25
99095 - Embalmer	20.03
99251 - Laboratory Animal Caretaker I	11.23
99252 - Laboratory Animal Caretaker II	12.40
99310 - Mortician	25.51
99410 - Pest Controller	14.99
99510 - Photofinishing Worker	12.55
99710 - Recycling Laborer	18.38
99711 - Recycling Specialist	22.52
99730 - Refuse Collector	15.95
99810 - Sales Clerk	14.15

99820 - School Crossing Guard	9.62
99830 - Survey Party Chief	32.71
99831 - Surveying Aide	17.28
99832 - Surveying Technician	23.71
99840 - Vending Machine Attendant	14.10
99841 - Vending Machine Repairer	16.65
99842 - Vending Machine Repairer Helper	14.10

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: Life, accident, and health insurance plans, sick leave, pension plans, civic and personal leave, severance pay, and savings and thrift plans. Minimum employer contributions costing an average of \$3.24 per hour computed on the basis of all hours worked by service employees employed on the contract.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; 3 weeks after 5 years, and 4 weeks after 15 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year, New Year's Day, Martin Luther King Jr's Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4174)

THE OCCUPATIONS WHICH HAVE PARENTHESES AFTER THEM RECEIVE THE FOLLOWING BENEFITS (as numbered):

1) Under the SCA at section 8(b), this wage determination does not apply to any employee who individually qualifies as a bona fide executive, administrative, or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than \$27.63 (or on a salary or fee basis at a rate not less than \$455 per week) an hour would likely qualify as exempt computer professionals, (29 C.F.R. 541.400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition, because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds \$27.63 per hour conformances may be necessary for certain nonexempt employees. For example, if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate, then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally, because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the application of the computer professional exemption. Therefore, the exemption applies only to computer employees who satisfy the compensation requirements and whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am.

If you are a full-time employed (40 hours a week) and Sunday is part of your regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder. All dry-house activities involving propellants or explosives. Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regrading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A links to the Directory may be found on the WHD home page at <http://www.dol.gov/esa/whd/> or through the Wage Determinations On-Line (WDOL) Web site at <http://wdol.gov/>.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation) and computes a proposed rate).

- 2) After contract award, the contractor prepares a written report listing in order proposed classification title), a Federal grade equivalency (FGE) for each proposed classification), job description), and rationale for proposed wage rate), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour decision to the contractor.
- 6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.

AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT

CONTRACT ID: **R** PAGE OF PAGES: **1** / **2**

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

1. The purpose of this modification is to extend the performance period of the last option year (CLIN 0018-Option Year 4) by 6 months. Period of performance is changed from "01 Sep 2008-31 Aug 2009" to "01 Sep 2008-28 Feb 2010". The reason for this extension is to allow sufficient time for the customer to prepare a new Performance Work Statement (PWS). Due to ease of administration, a new CLIN was not created for this extension.

2. Wage Determination 2005-2054, Revision 9 Dated 26 May 2009 is hereby incorporated, a wage increase will be negotiated at a later date.

3. SECTION A - SOLICITATION/CONTRACT FORM

The total cost of this contract was increased by \$1,611,094.73 from \$13,593,482.95 to \$15,204,577.68.

The 'issued by' organization has changed from

HQ0028 DEFENSE MEDIA CENTER
CAPITAL INVESTMENT DIRECTORATE
CONTRACTING OFFICE
1363 Z STREET, BLDG. 2730
MARCH ARB CA 92518

to

HQ0028 DEFENSE MEDIA ACTIVITY
CONTRACTING OFFICE
23755 Z STREET, POC: SUSAN MADRID
RIVERSIDE CA 92518-2031

The 'administered by' organization has changed from

HQ0028 DEFENSE MEDIA CENTER
CAPITAL INVESTMENT DIRECTORATE
CONTRACTING OFFICE
1363 Z STREET, BLDG. 2730
MARCH ARB CA 92518

to

HQ0028 DEFENSE MEDIA ACTIVITY
CONTRACTING OFFICE
23755 Z STREET, POC: SUSAN MADRID
RIVERSIDE CA 92518-2031

4. SECTION B - SUPPLIES OR SERVICES AND PRICES

CLIN 0018

The estimated/max cost has increased by \$1,611,094.73 from \$2,608,890.00 to \$4,219,984.73.

The total cost of this line item has increased by \$1,611,094.73 from \$2,720,176.00 to \$4,331,270.73.

5. SECTION F - DELIVERIES OR PERFORMANCE

The following Delivery Schedule item for CLIN 0018 has been changed from:

DELIVERY DATE	QUANTITY	SHIP TO ADDRESS	UIC
POP 01-SEP-2008 TO 31-AUG-2009	N/A	HQ0030 AFRTS ENGINEERING/DOEE 1363 Z STREET BLDG 2730 MARCH ARB CA 92518-2017 (909)413-2270 FOB: Destination	HQ0030

To:

99841 - Vending Machine Repairer	16.65
99842 - Vending Machine Repairer Helper	14.10

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: Life, accident, and health insurance plans, sick leave, pension plans, civic and personal leave, severance pay, and savings and thrift plans. Minimum employer contributions costing an average of \$3.35 per hour computed on the basis of all hours worked by service employees employed on the contract.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; 3 weeks after 5 years, and 4 weeks after 15 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year, New Year's Day, Martin Luther King Jr's Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4174)

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) **COMPUTER EMPLOYEES:** Under the SCA at section 8(b), this wage determination does not apply to any employee who individually qualifies as a bona fide executive, administrative, or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than \$27.63 (or on a salary or fee basis at a rate not less than \$455 per week) an hour would likely qualify as exempt computer professionals, (29 C.F.R. 541.400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition, because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds \$27.63 per hour conformances may be necessary for certain nonexempt employees. For example, if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate, then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally, because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the application of the computer professional exemption. Therefore, the exemption applies only to computer employees who satisfy the compensation requirements and whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours a week) and Sunday is part of your regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder. All dry-house activities involving propellants or explosives.

Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regrading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made

the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A link to the Directory may be found on the WHD home page at <http://www.dol.gov/esa/whd/> or through the Wage Determinations On-Line (WDOL) Web site at <http://wdol.gov/>.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).
- 2) After contract award, the contractor prepares a written report listing in order proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent

information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).

4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.

5) The contracting officer transmits the Wage and Hour decision to the contractor.

6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.
