

ConX Cloud

Cloud-based video collaboration for everyone, any time, on any device

Transform the way your company communicates with ConX Cloud. ConX makes HD video conferencing available on any device, anywhere, so that you can leverage the full capacity of video conferencing to effectively communicate and maximize the productivity of your organization.

Meet with Anyone, Anytime

Join a call from anywhere, on virtually any device, including smartphones and tablets, any PC or Mac, ConX devices such as the InFocus Mondopad and ConX video phone, or any other SIP or H.323 endpoints, including those from Polycom, Cisco, LifeSize, and more.

People + Data

ConX Cloud supports dual stream video and data feeds so that you can view and interact with people, presentations, data, and other content at the same time. And because it's cloud-based, anyone can edit, change, create, share, save, and send real-time.

Critical Interoperability

ConX Cloud offers SIP, H.323, and Skype for Business interoperability, so you can bring people and data together through a wide variety of endpoints and services, on the devices they already use.

Cloud-based Meeting Control

To run your video meeting like a pro, manage and control your meetings from the Host ConX web portal. Change the video layout, mute or unmute participants, add new participants, and more.

Affordable packages and no extra charges for advanced features

All of our video meeting packages are fully featured so that they'll work for anyone, in any of the ways that your business operates. Connect with your InFocus reseller and select a package of multiple video rooms and allow everyone in your organization to conduct business face to face at a moment's notice.

Visit infocus.com/conx-cloud for a free trial or to learn more.
