CLX-6260 SERIES FEATURES

Enjoy quality printouts

Samsung's unique ReCP (Rendering Engine for Clean Page) Technology improves the overall quality and vibrancy of your colour printing, ensuring every printout looks perfect. It automatically sharpens the focus of both graphics and text, while solid objects are overlapped to eliminate white gaps.

Polymerised toner

Our newly developed polymerised toner has smaller and more uniform particles than conventional toner. Meaning, your printouts will have crisper lines and more vivid colours - helping avoid any paper curling. Also, its higher wax content improves the image gloss and enhances the durability preventing unwanted fading.

More power, higher productivity

Some days it seems like the printing never ends. With the CLX-6260 533 MHz Dual CPU, and 512MB standard memory (expandable up to 1GB) you can be sure that this printer will handle the entire load of your workgroup's need.

Speedy and flexible paper handling

If you want to print or copy onto heavier weights of paper, you can. Weights of up to 220g/m2 are handled with ease through the 50 page multipurpose tray as well as the 250 page standard cassette. Plus, with the optional 520 sheet second cassette you can increase your total paper input capacity to 820 sheets. That way you can also use up to three different media types without the need to waste time changing paper.

Low cost, low impact on the world

Save toner, paper and energy with ease - it's good for the environment and it's good for your business' profits. Being economical and printing vibrant colour documents goes hand in hand with the CLX-6260

Extra high yield means extra low costs
Enjoy professional colour print-outs while staying in complete control of your total cost of ownership. Our specially developed higher yield cartridges means more time between changes and less expense with each print out. (Black toner cartridges yield: 6,000 standard pages, Yellow/Magenta/Cyan toner cartridges yield: 3,500 standard pages)

Cut costs with duplex printing
With the integrated duplex feature, saving paper has never been easier. That's because the paper is turned automatically so that you can print on both sides. It could mean an amazing saving of up to 50% on your paper consumption.

Save money the eco way
Every business sees the need to cut costs wherever it can. With the ECO button and the smart eco driver funtions it's easier than ever. Print more on each page with the N-up and duplex functionality, skip blank pages or print in greyscale instead of full colour. With the result simulator you can even see how much CO_2 power and paper you've saved.

Low Power Consumption
Despite its impressive list of features and functions, the CLX-6260 consumes less energy than most of its competitors. Its innovative polymerized toner requires lower fusing temperatures, the instant fusing technology saves warm up time before first print, and our new Dual CPU make it one of the greenest devices around today.

Easy toner replacement

Gone are days of fiddly, dirty and time-consuming toner cartridge changes. It's all made easier with a push loading drawer. What's more, the high yield cartridges mean fewer changes.

Secure, confidential printing

With the CLX-6260 you can increase your entire workgroup's workflow with a range of easy-to-use features and ingenious time-saving support software that helps free you to work smarter and faster.

Secure, confidential printing
If you need to print sensitive data through your printer, you can relax. You can now ensure personal print jobs remain personal. Just enter a password, and you can retrieve a print job at your convenience, away from any prying eyes. And with the integrated numeric key pad it's easier than ever!

Convenient USB printing

With the CLX-6260 you can increase your entire workgroup's workflow with a range of easy-to-use features and ingenious time-saving support software that helps free you to work smarter and faster.

Convenient USB printing
Print documents directly from the printer, without the need of a computer, via a front-facing Direct USB slot located just below the operating panel.
