THE WORLD'S MOST ADVANCED  
MODELING AMPLIFIER HAS EVOLVED

# WIP VYPYR

ELECTRIC · ACOUSTIC · BASS

Morphing from a bass amp, to an electric amp, to an acoustic amp, the VYPYR® VIP is  
the industry's first Variable Instrument Performance™ amplifier.

Once again Peavey Electronics revolutionizes the modeling amp industry. Introducing the world's first Variable Instrument Performance amplifier, the VYPYR® V.I.P. — the world's first amp that contains Bass guitar, Acoustic guitar and Electric guitar amplifier models. Now for the first time ever using our Variable Instrument Input, a single amp can provide amplification for a variety of instrument types.

Not only does the amplifier morph from a bass amp to an acoustic amp, to an electric amp, it also, for the first time ever in an amplifier in this category, allows the electric guitar player access to instrument models as well.

Using appropriate technology, Peavey uses a combination of powerful 32-bit, floating point SHARC processors and patented TransTube® analog circuitry to create the best sounding modeling amplifiers available. Nothing sounds as good as a VYPYR.

All VYPYR effects, amp models and parameter controls can be accessed via the amp itself, with no need to hook the amplifier to a computer. Peavey's WYSIWYG control surface quickly allows the user the ability to see and adjust the control position — no guessing where the control is supposed to be or having to manually move it to where it should be from preset to preset.

VYPYR's new USB bi-directional data and audio port provides an easy way to record, and/or connect to our VYPYR software and store presets, get lessons, and practice to backing tracks while connected to your computer.

All of the revolutionary features from the original VYPYR series, now even better. More power, more effects, more amp models, Variable Instrument Input, instrument models, and more make this the ultimate amplifier.

CUBE-LT

**ROLAND CUBE LITE AMP** Featuring a unique combination of COSM guitar tones, 2.1 channel audio, stylish design and iOS interface, the 10W CUBE Lite amp is great for both practicing and casual music listening. Easily interfaces with an iOS device, and allows you to control the blend between COSM tones and iOS audio. The free CUBE JAM app turns your iOS device into a command center for jamming, learning and recording at 16-bits/44.1kHz, create jam tracks via Center Cancel, and adjust playback speed and pitch. Direct Mode allows you to record your guitar dry, for later "re-amping", while listening to COSM sound, or allows for real-time guitar processing in any app, monitoring the output with the CUBE Lite. The CUBE Lite Monitor, for vocals and keyboards, has the same great features as the amp without COSM processing.

**KEMPER PROFILING AMP**

An entirely new way to capture the sound of any amp, "Profiling" creates dynamic, multi-dimensional representations of tube amps that have never before been possible. Profiling an amp is as simple as plugging your amp into the Profiler and pressing "record." Once profiled you can control the sound of the amp as never before, including definition, power sagging, pick attack independent of gain, amp compression, and cabinet voicings. In addition to the vast library of profiled amps the Kemper boasts a huge library of stomp box effects, a powerful EQ section, speaker cabinet profiles, and ample I/O. The standard Kemper comes in a lunchbox-style chassis, however a 19" rackmount version is also available.

**JET CITY AMPLIFICATION RETROVALVE™ TUBE REPLACEMENT DEVICE**

These vacuum tube replacement devices offer the sound of tubes in a low-noise, 100% analog solid-state device that is pin-for-pin compatible with 12AX7 tubes in almost any amp. Robust and consuming less current than traditional tubes, they reduce stress on your amp's electronics (and your wallet!). Three variations of gain are available, and these devices can be mixed and matched with vacuum tubes or each other to create your perfect "tone cocktail".

**LUDWIG CLASSIC MAPLE**

For over a century Ludwig has been crafting some of the most widely-used and oft-recorded drums in history. With a huge variety of shell types, sizes and configurations you can design the perfect kit for your playing style. Legacy Classic drums use the 3-ply shell formula introduced in 1923. Legacy Exotic drums add a modern twist to the 1923 design by adding a thin veneer of exotic wood on the outer shell. The Classic Maple series is a 7-ply formula for optimum resonance and tonality. Ludwig's famous see-thru, Vistalite drums have been updated to provide greater stability to the shells. With so many options available please call your Full Compass sales pro for help designing your dream kit.

AMBER SHADOW BURST

**YAMAHA LIVE CUSTOM DRUMS** This new line of professional drums improves upon the design of Oak Custom. The 8 plies are now 10% thicker at 1.2mm per ply, which results in a more powerful sound on stage. The hoops have been thickened as well, producing a tighter sound and sharper response. The lugs are Yamaha's Absolute and a new tom holder design reduces surface area and weight. The hardware is a darker shade of silver and the inside of the drums are painted black. The Live Custom snare has a new heavy-duty strainer. Shell packs are available as well as individual drums. Please contact your Full Compass Sales Pro for additional configuration & single drum options.

**NEW!**

**YAMAHA P-105 DIGITAL PIANO** This 88-note, graded-hammer standard, weighted-action keyboard feels heavier in the low end and lighter in the top, just like the keys of an acoustic piano. The PureCF sound engine recreates the sound of Yamaha's CFIIIS concert grand piano. Also new, the USB to Host port and line-level AUX outputs allow a variety of connectivity options with everything from an amplifier to an iPad. Its 128-note polyphony ensures the suppression of dropped notes even with simultaneous dual, split, and drum pattern playing. For EQ, an Intelligent Acoustic Control provides full, balanced sound that adapts to your volume setting for the best possible tone at any level.

ITEM	PRICE
P105B.....	599.99

### YAMAHA YDP-C71PE

Provides true piano touch and tone. The GH keyboard and 3-level AWM Dynamic Stereo Sampling Voices deliver remarkably authentic sound and natural expressiveness, making it as enjoyable to play as it is to look at. The damper pedal includes a half-damper effect, for nuanced expressive control over sustained notes. Dual Voice capability allows two different instrument sounds at the same time, while a 2-track song recorder allows recording of original musical ideas and performances. Additionally, the luxurious polished ebony finish brings a touch of class to the ARIUS digital piano line.

25SL-MKII

NOVATION REMOTE SL SERIES WITH AUTOMAP

The main feature for this series is Automap Pro 3 mode – the SL detects which instruments you have in your project and logically maps the controls to its front panel. The instrument information displays on two backlit LCD screens flanking the top panel of the keyboard. A total of 64 assignable knobs, buttons, and sliders, plus 8 velocity sensitive trigger pads are also present. For integrating with DAWs the unit has built in transport controls. The keys themselves are semi-weighted with full velocity and aftertouch. Plug and play with WinXP/Mac OSX with no drivers to install. The Remote Zero SL control surface has the same capabilities as the rest of the controllers, but lacks keys.
